PUBLISHED IN INDIA

P R E F A C E.

THE desire repeatedly expressed in the GENERAL COURTS of the EAST-INDIA COMPANY that an authentic *Gazetteer of India* should be offered to the British public in a cheap and convenient form, has led to the publication of the present edition. The work has been compiled by the authority of the Court of Directors, and though comprised within a single volume, it will be found to contain the great mass of information comprehended in the four volumes of the "*Gazetteer of India*," published by the same author in 1854.

This result has been obtained by retrenching some few redundancies, and by adopting an enlarged page and distributing the matter into two separate columns. By these means space has been also acquired for the insertion of much new matter, rendered necessary by the political and territorial changes which have more recently taken place within our Eastern possessions. On the character of the work a few remarks will be sufficient. Its chief objects are,—1st, To fix the relative position of the various cities, towns, and villages, with as much precision as possible, and to exhibit with the greatest practicable brevity all that is known respecting them; and, 2ndly, To note the various countries, provinces, or territorial divisions, and to describe the physical characteristics of each, together with their statistical, social, and political circumstances. To these have been added minute descriptions of the

PREFACE.

principal rivers and chains of mountains ; thus presenting to the reader, within a brief compass, a mass of information which could not otherwise be obtained, except from a multiplicity of volumes and manuscript records.

The volume, in short, may be regarded as an epitome of all that has yet been written and published respecting the territories under the government, or political superintendence, of the British power in India. Its merits have been frequently discussed in the General Courts of the East-India Company, where successive Chairmen have borne ample testimony to the utility of the publication, and where it has been characterized by the best-informed among the Proprietors as "*a complete history of India, untainted in any degree by political bias.*"

A GAZETTEER,

&c.

ABO—ACH.

ABOO.—A mountain in the territory of Serohee, in Rajpootana, connected with the Aravulli range, but rising far above any other summit. The top of the mountain is extremely irregular, terminating in numerous peaks. The circuit of the base is estimated at from forty to fifty miles. The highest summit, called Guru Sikra, is terminated by a small platform inclosed by a low rampart. The elevation above the sea assigned to it is 5,000 feet. It is a celebrated place of pilgrimage, especially for the Jains, who have a very magnificent place of worship at Dilwara, situate about the middle of the mountain, and five miles south-west of Guru Sikra, the highest summit. The group consists of four temples, arranged in the form of a cross, the principal being that most westerly, dedicated to Richabdeo. Colonel Tod says, "Beyond controversy, this is the most superb of all the temples in India, and there is not an edifice besides the Taj Mahal that can approach it." It has been erected on the site of temples dedicated to Siva and Vishnu, and, according to tradition, the founder purchased the site from the ruler of Serohee, by covering as much ground as was requisite with silver coin, and paying it as the price. In the centre of the court forming the outer part of the building is the pagoda containing a colossal statue of the deified coryphæus of the Jains, composed of an alloy of several metals. Before the temple is an equestrian statue of the founder, Bimul Sah, a Jain merchant of Anbulwara. "The whole of this temple is said to have occupied a period of fourteen years in building, and to have cost eighteen crores of rupees (18,000,000*l.*) besides fifty-six lacs (560,000*l.*) spent in levelling the side of the hill on which it is built." The second temple, dedicated to Nemminath, appears, from an inscription on it, to have been founded in 1236; the two other temples are of later date, being not quite 400 years old, and are much inferior to the former two. All have symptoms of decay. One of the most singular circumstances concerning these extraordinary buildings is, that the vast quantities of marble of which they are constructed must have been brought from a distance, there being none on the mountain. Near the group is a small but beautiful

lake, called the Nuki Talao. The summit of the mountain is situate forty miles north-east of the British cantonment of Deesa, to which it was thought it might afford the site for a useful and excellent sanatorium. The suggestion was favourably entertained. In 1847, about sixty ladies and gentlemen, with a number of children, were assembled here, and a hundred European invalids were also sent to partake of the presumed restorative powers of the climate. Its value in this respect must be tested by further experience. Lat. $24^{\circ} 45'$, long. $72^{\circ} 49'$.

ABOUNUGUR, in the British district of Futtehpore, Lieut.-Gov. N. W. Provinces, a small town on the route from Calpee to the town of Futtehpore, and one mile north-west of the latter. Lat. $52^{\circ} 56'$, long. $80^{\circ} 52'$.

ABOOPoor, in the British district of Meerut, Lieut.-Gov. N. W. Provinces, a village on the route from Delhi to the town of Meerut, and twenty-three miles north-east of the former. Lat. $28^{\circ} 48'$, long. $77^{\circ} 35'$.

ABOR.—A mountain tribe, occupying a tract of country bordering the district of Upper Assam, and intersected by the river Sanpoo or Dihong, the remotest feeder of the Brahmapootra. The centre of the tract is in lat. $28^{\circ} 10'$, long. $95^{\circ} 20'$.

ABRAKONUNE.—A town in the native state of Nepal, distant north-west from Khatmandoo 178 miles. Lat. $28^{\circ} 46'$, long. $82^{\circ} 41'$.

ABRANG.—A town in the native state of Kashmere, or the dominions of Gholab Singh, distant north from Simla 180 miles. Lat. $33^{\circ} 40'$, long. $76^{\circ} 42'$.

ACESINES RIVER.—See CHENAU.

ACHALGANJ, in the district of Bainswarra, territory of Oude, a town four miles north-east of the left bank of the Ganges. Population 5,000, of whom 500 are Mussulmans, the rest Hindoos. Lat. $26^{\circ} 25'$, long. $80^{\circ} 35'$.

ACHEEN.—A native state in the north-western part of the island of Sumatra. In 1819, a treaty was concluded between the E. I. Company and the sovereign of Acheen, on the occasion of the recovery by the latter

of his throne after a temporary expulsion from it; but in 1824, all the British possessions on the island of Sumatra were surrendered to the king of the Netherlands, in consideration of certain cessions made on the part of that sovereign to the British. In the course of the negotiations preliminary to the withdrawal of the latter from Sumatra, a confident expectation was expressed that no hostile measures would be adopted by their successors towards the king of Acheen; and this was met by the plenipotentiaries of the king of the Netherlands in a spirit of cordiality and tolerance. The chief town, Acheen, is situate on a river about a league from the sea. The port is but indifferent. The number of houses, which are of rude construction, is estimated at 8,000. Lat. $5^{\circ} 35'$, long. $95^{\circ} 45'$.

ACHERA, or **UCHRA**, in the British district of Furruckabad, Lieut.-Gov. N. W. Provinces, a village on the route from the cantonment of Alligurrh to that of Futtehgurrh, and twenty-two miles west of the latter. Lat. $27^{\circ} 26'$, long. $79^{\circ} 22'$.

ACHORA.—A town in the native state of Kashmere, or dominions of Gholab Singh, distant north from Sirinagur thirty-eight miles. Lat. $34^{\circ} 36'$, long. $74^{\circ} 53'$.

ADAM'S BRIDGE.—A narrow ridge of sand, nearly closing the Gulf of Manaar on the north and north-east. Its western extremity joins the eastern point of the island of Rameswaram, near the continent of India; its eastern extremity joins the eastern point of the island of Manaar, lying near the coast of Ceylon; and its length is about thirty miles, the direction being from south-east to north-west. It is partly above and partly below water; but when covered, has nowhere, it is said, above three or four feet of water, even at high tides. It is by the Brahmins called the Bridge of Rama, as along it, according to their mythology, Rama, the renowned deity and king of Oude, aided by Hanuman with his host of monkeys, marched, when invading Ceylon, to take vengeance on Ravana, the demon giant, who had carried off his wife Sita. Lat. $9^{\circ} 5'$, long. $79^{\circ} 30'$.

ADAM'S ISLAND, off the coast of Arracan, situate between the islands of Amherst and Paget, and ten miles from the mainland. Lat. $18^{\circ} 45'$, long. $94^{\circ} 4'$.

ADANADA, in the British district of Malabar, presidency of Madras, the residence of the Alvangeri Tamburacul, or chief of the Namburis,—a Brahminical class of which some account will be found under the article MALABAR. Distance from Calicut, S.E., thirty-five miles. Lat. $10^{\circ} 54'$, long. $76^{\circ} 5'$.

ADDALUR, in the British district of Coimbatore, presidency of Madras, a town on the route from Trichinopoly to Seringapatam, ninety-two miles north-west of the former. Lat. $11^{\circ} 25'$, long. $77^{\circ} 34'$.

ADDANKI, in the British district of Nellore, presidency of Madras, a town on the route from Ongole to Hyderabad, twenty-six miles north of the former. Lat. $15^{\circ} 52'$, long. 80° .

ADDAR, in the British district of Chota Nagpoor, Lieut.-Gov. of Bengal, a town on the route from Chaibassa to Palamow, forty-seven miles south-east of the latter. Lat. $23^{\circ} 20'$, long. $84^{\circ} 30'$.

ADDOOE.—A town in the native state of Cutch, under the political superintendence of the presidency of Bombay, distant east from Bhooj fifty miles. Lat. $23^{\circ} 23'$, long. $70^{\circ} 29'$.

ADDUMDIDGEE, in the British district of Bograh, Lieut.-Gov. of Bengal, a town on the route from Pubna to Dinajepoor, fifty-nine miles north of the former. Lat. $24^{\circ} 49'$, long. $89^{\circ} 2'$.

ADEN.—A town and seaport of Arabia Felix, in the province of Yemen, and included among the possessions governed by the East-India Company. The territory of Aden consists of a mountainous peninsula, connected with the mainland by a narrow isthmus of sand, which is nearly covered at high water, spring tides. The town is situate on the eastern shore, and surrounded by an amphitheatre of lofty mountains. Opposite to, and commanding the town, is the island of Secrah, 1,200 yards in length by 700 in breadth. The geological formation of Aden is of igneous origin, the whole peninsula being little more than a huge mass of volcanic rocks. Aden has been not inappropriately styled the "Eye of Yemen," and, from its position, it may be justly regarded as the key to the Red Sea. Its harbour is represented as the finest in Arabia. Since its possession by the British, the port has been declared free, and no customs-duties are now levied there. Its trade is steadily increasing, and under British management the settlement bids fair to regain its former prosperity, and to surpass in the extent of its commerce any of the ports of the Red Sea. As a military post of great strength, an admirable harbour for steamers, a depot for coals, or as the entrepôt for an extensive commerce, it has no rival. A brief sketch of the incidents which led to its occupation by the British may not prove uninteresting. In January, 1837, a Madras ship, sailing under British colours, was wrecked on the coast of Aden. The inhabitants of the town plundered the vessel, and refused to land the crew, or to supply them with provisions; in consequence of which several perished. Such as succeeded in reaching the shore were robbed, and some Mahomedan ladies, bound on a pilgrimage to Mecca, suffered brutal indignities. The government of Bombay felt bound not merely to demand redress for the outrage, but to take such further precautions as should preclude the recurrence of similar enormities. Captain Haines, of the Indian navy, was accordingly deputed to Aden, and

obtained from the sultan an assurance of reparation for the plunder of the vessel, and, moreover, a formal consent to the transfer of the peninsula to the British, in consideration of an annual stipend. But before the treaty could be signed, or the promise of compensation confirmed, a plot had been formed by the sultan's son for the seizure, at the parting interview, of the person and papers of the British agent. Intelligence of the meditated treachery being conveyed to the British, the interview was evaded. After the lapse of a few months, Captain Haines reappeared before Aden, authorized by his government to enforce the completion of the stipulated arrangement. He forthwith addressed the sultan, demanding the fulfilment of the contract; but his requisition was met on the part of the sultan's son by language and conduct the most violent and insulting. "I am," so writes the young sultan, "above you and above my father. If you come to the gate, I will permit you to enter, and then be upon your head: this is the law of the Bedouins." It was obvious that further negotiation must prove futile. The place was attacked by a combined naval and military force, commanded by Captain Smith, R.N., and Major Baillie, of the Bombay army, and captured on the 17th January, 1849, with trifling loss on the part of the victors. A line of works has been thrown across the isthmus, for defence against any attack from the Arabs. The ramparts are about thirty feet high, with ample flanking defences, connecting together the spurs of the heights of Aden, which project forward on the isthmus, and are scarped to an equal height with the ramparts. These defences form a position which is considered to be unassailable by a native force. Lat. 12° 45', long. 45° 3'.

ADJUMPOOR.—A town in the territory of Mysore, under the administration and control of the government of India, distant north-west from Seringapatam 103 miles. Lat. 13° 46', long. 76° 2'.

ADJUNTA, in Hyderabad, or the territory of the Nizam, a decayed town on the southern declivity of a pass over the mountains forming the southern boundary of the valley of the Taptee, or province of Candeish. On the northern slope of the pass towards Candeish, in a deep glen penetrating the inmost recesses of the mountain, is an extensive group of cavern-temples, the most elaborately and skilfully executed of any yet explored in India. Twenty-seven of them have been surveyed, and ascertained to have been intended for Buddhist purposes, either of worship or asceticism. They are generally spacious, hewn with indefatigable toil in the solid rock of amygdaloid, and decorated on the inside with a vast profusion of Buddhistic sculptures or paintings. These generally represent, in brilliant colours in fresco, gay and festive scenes and subjects, apparently marriage processions, or joyous domestic incidents, in which beautiful female

figures are depicted, with complexions as fair as those of Europeans. These specimens of art exhibit perfect decorum, and are unpolluted by the revolting grossness and obscenity so prominently obtruded in Brahminical works of similar description. Captain Gill, an officer of the Madras establishment, has been for some time employed by the government in taking copies of the paintings, several of which have been transmitted to the Museum of the East-India Company in London. These cave-temples are excavated in the face of a cliff about 300 feet high, and the series of openings extends along the front of the precipice for the length of about 500 yards. Adjunta is distant from Aurrungabad, N.E., 55 miles; Ahmednuggur, N.E., 122; Poona, N.E., 190; Bombay, N.E., 222. Lat. 20° 32', long. 75° 49'.

ADJYGURH, in Bundelcund, a hill fort on an isolated summit at the north-western edge of the Bindachal plateau, and separated from its brow by a narrow but very deep and impassable ravine. Granite forms the great body of Adjyghurh, presenting all round a perpendicular face of rock to the height of between thirty and fifty feet, and constituting a natural barrier of defence. North-east of this, and separated from it by a deep ravine, is the hill of Bihonta, of nearly equal elevation, having on its summit a plateau, which, though of a smaller area, affords space for the formation of batteries in position to act effectually against the fortress on the principal hill, the whole summit of which, about a mile in circuit, is inclosed by a rampart running round the bold brow of the rock. Within the inclosure are two great masses of ruins of temples, resembling in architectural character those of Southern India, and covered with most intricate and elaborate sculptures. The whole surface of the plateau is overspread with shattered images and fragments of fine carvings in stone, the sound and durable character of which material defies the prolonged action of the mountain air; and the carving, though overspread by a minute black lichen, being as sharp as when first chiselled. The temples are built of the same materials, viz. greywacke, and of similar proportions. On the northern declivity of the hill, and within the defences of the gate of the fort, is a natural well, or chasm, in the rock, filled with water; the depth is unascertained, but it is said to be several hundred feet. There are two ways from the plain to the summit. One is a footpath ascending obliquely up the eastern declivity; the other, a difficult road up the northern side. From the spot where the extreme steepness bars farther progress without artificial assistance, the ascent is continued by vast flights of stairs formed in the rock. The way on the north side is flanked by five gateways, situate in succession one above the other; that on the east side by four. Adjyghurh seems to find no place in the history of India till towards the close of the eighteenth century, when it was wrested from a Bundela

chief, named Bukht Singh, by Ali Bahadur, a descendant from an illegitimate branch of the house of the Peishwa. Shumsheer Bahadur, his son and successor, appears to have acceded in 1803 to the cession made by the Peishwa, of parts of Bundelcund to the East-India Company, and to have sent an order to the Mah-ratta commandant of Adjyghur for the evacuation of that place; a British force being at the same time despatched to take possession. This force, after repelling a fierce attack from the troops of Luchmun Singh Dowra, a neighbouring semindar, arrived before Adjyghur; but the killadar refused to relinquish possession except on the receipt of 13,000 rupees, to discharge arrears of pay. It was agreed to advance this sum, but Luchmun Singh Dowra privately making an offer of 18,000 rupees, the killadar permitted him to enter, and the British detachment was obliged to retire from the place. Luchmun Singh Dowra retained possession of his purchase till the beginning of 1809, when Adjyghur was invested by a strong British force under Lieutenant-Colonel Martindell. Previously, on the 22nd of January, the steep and high hill of Regowli, situate eight miles north-west of Adjyghur, strongly fortified and garrisoned by 500 chosen men, was stormed by the British, who, however, met with an obstinate resistance, having twenty-eight of their number killed, and 115 wounded. Of the defenders about sixty were killed, many wounded, and the remainder fled. On the 7th of February, the hill of Bihontah, situate immediately north of Adjyghur, was stormed by the British; and strong batteries being formed on commanding points, such impression was made on the defences of the fort, that Luchmun Singh Dowra surrendered the place on condition of receiving an equivalent in lands in the plain. In the following June, Luchmun Singh Dowra secretly, and without notice, repaired to Calcutta; and the authorities at Adjyghur, alarmed at the measure, determined to remove into the fort his family, whom he had left residing at Tirowni, in the immediate vicinity of Adjyghur. An old man, the father-in-law of the fugitive chief, being directed to make arrangements for removing the females of the family, entered their residence, fastening the door after him. After a considerable time, no sound of life being heard, an entrance was effected by the roof, when all the inmates, women, children, and the old man himself, were found with their throats cut. As those who watched without had not heard any noise, it is plain that the sufferers had made no resistance. On the subjection of this territory by the arms of the British, the legitimate rajah, Bukht Singh, attached himself to the victors, and received, in the first instance, a money allowance for his support, which was subsequently superseded by a grant of Adjyghur. On the recovery of the portion of country possessed by Luchmun Singh Dowra, that also was granted to Bukht Singh, subject to the pay-

ment (for the whole) of an annual tribute of 7,750 rupees. Bukht Singh was succeeded, in 1837, by his son Madho Singh, on the occurrence of whose death without issue, some years afterwards, an attempt was made by the widow of the deceased prince to resist the succession of his brother, but without effect. Towards the close of the year 1853, a youth of thirteen years of age succeeded to the throne. Two years afterwards the minor rajah died without a lineal heir by birth or adoption, and the question as to the disposal of the territory is under consideration. The family are Hindoo (Bondela Rajpoots). The territory, which is estimated to have an area of 840 square miles, is bounded on the north by the native state of Churkaree and the British district of Banda; south and east by the native state of Purnah, and west by Chutterpore. It extends from lat. 24° 47' to 25° 5', and from long. 80° 8' to 80° 31'. In 1832 it was stated to contain 608 villages, and a population of 45,000. The latest accounts give the revenue at 325,000 rupees, or 32,500*l*. The military force in 1847 consisted of 200 cavalry, 1,200 infantry, and eighteen artillerymen. Politically, Adjyghur is one of the states connected with the administration of the agent of the Lieutenant-governor of the North-West Provinces. The residence of the rajah is at Nauahah, a town at the northern base of the hill of Adjyghur. The population of this town is estimated at 5,000, and it is a neat, regularly-built place, but subject to virulent malaria. This great evil is not, however, found on the plateau on the summit, which has been proved to be a remarkably healthy station. According to barometrical observations, the mean elevation of the plateau on the summit is 1,340 feet above the sea, 360 above the town at its base, or the general level of the surrounding country. Distance of the town of Adjyghur S. from Banda, forty-seven miles; S.W. from Allahabad, 180; N.W. from Calcutta, by Allahabad, 625. Lat. 24° 52', long. 80° 20'.

ADONI, or ADWANNY, in the British district of Bellary, under the presidency of Madras, a town near the north-western frontier, towards the territory of the Nizam. It is described by the Mahomedan historian as "situated on the summit of a high hill, and containing many ponds and fountains of clear and sweet water, with numerous princely structures." It was considered impregnable, being fortified with eleven ramparts, one within another, and continued to be of great importance until 1786, when it was surrendered, either through treachery or cowardice, to Tippoo Sultan, of Mysore, who lost no time in completely dismantling it. Distance from Bellary, N.E., forty-one miles; Madras, N.W., 270. Lat. 15° 38', long. 77° 20'.

ADRAMPATAM, in the British district of Tanjore, presidency of Madras, a town on the coast of Falk Straits, thirty-four miles west of Point Calimere. Lat. 10° 22', long. 79° 27'.

ADUMPOOR, in the British district of Aizimghur, Lieut.-Gov. N.W. Provinces, a town on the route from Ghazepoor to Goruckpoor, forty-three miles north of the former. Lat. $26^{\circ} 10'$, long. $83^{\circ} 41'$.

ADUSUMALLI, in the British district of Guntoor, presidency of Madras, a town on the route from Ongole to Guntoor, twenty-three miles south-west of the latter. Lat. $16^{\circ} 2'$, long. $80^{\circ} 21'$.

ADWANNY.—See **ADONI**.

AENG.—A village of Arracan, situate on the left bank of the river bearing the same name, and forty-five miles from its mouth. It was formerly a place of some importance on account of the trade between Ava and Arracan, and is represented to have been of considerable size; at the period of Pemberton's visit, however, it contained only 150 houses, built of bamboo, and constructed in the manner usually adopted by the Mughls,—that of raising them on piles two or three feet from the ground. The population, taking on an average five persons to each house, would amount only to 750 souls. The inhabitants consist of Mughls and Burmese. The neighbouring country is fertile, and the plains in its vicinity afford good crops of grain. During the spring tides the river is navigable as far as the village, and at other tides within a few miles of it, and then the cargoes are transferred from the larger boats to the smaller craft, which convey the goods to the town. This place is celebrated as being the commencement of the great route over the Yoomadoug mountains to Ava, and which derives its appellation from this circumstance. At first the route lies through a very level and fertile country, but the scenery is soon changed, and it proceeds over a succession of low hills till it reaches the village of Sarowah, situate fifteen miles from Aeng. During this part of the route it crosses the Aeng river several times; when not fordable, the river is passed by wooden bridges. From Sarowah, which place is 147 feet above the sea, commences the ascent of the pass. For the first few miles it is gradual, but the last mile or two is excessively steep, and the path is conducted in a zigzag manner to the summit. This part of the road passes through much forest and thick jungle; about half-way there is a stream very conveniently situated, but the deficiency of water in most places is very great. The stockade of Nariengain is situate on the summit of the pass. It had been strengthened by the Burmese during the war of 1852, and was deemed impregnable. The removal of the British battalion from the vicinity had, however, induced its occupants to relax from their accustomed vigilance, and on the 7th of January, 1853, a small force, under the command of Captains Nuttall and Sunderland, succeeded in capturing the fortification by surprise. The distance of the summit from Sarowah is eighteen miles, and the ascent

being 4,517 feet, the average rise is 250 feet in the mile. The altitude of Nariengain is 4,664 feet above the sea, and is stated by all travellers of this route to command a most beautiful and extraordinary view. It is thus described by one:—"Here a most splendid panorama presented itself; for on one side, at a distance perhaps of sixty miles, like a reflector, interspersed by numerous blemishes, lay the bay of Combermere, with all its connected estuaries, resembling streaks of silver on an emerald ground; above and about us rolled vast volumes of murky clouds, obedient to the sightless couriers of the air, ever and anon unveiling the mountainous region below to our wondering gaze." The most difficult portion of the pass is the descent on the eastern side of the mountain, which is much steeper than the other. The distance to Kheng Khyong, the next halting-place, is eight miles, and the descent being 3,777 feet, the average declination is 472 feet in the mile. The second division of the route extends to Maphe Myoo, following generally the course of the Man river, which it crosses many times. This stream, even in the season of inundation, is generally fordable at the place where crossed. Obstacles in the shape of boulders of rock at times present themselves, but do not create much difficulty. After passing the village of Dho, which is situate at the foot of the pass, the remainder of the road to Maphe Myoo runs through an open and well-cultivated country. This village has been justly designated as the "key to the whole position." From Maphe Myoo the route proceeds over a thickly-wooded country, and passes through several small villages to Tsedo, a distance of sixteen miles, where it separates, one branch running in a south-easterly direction to the village of Memboo, on the Irawaddy river, a distance of twenty-two miles; and the other forty-six miles, over a fertile and highly-cultivated country, to Shembegwen Ghaut. This route is by far the best of those between Ava and Arracan, and a considerable trade was carried on by means of it. It was not traversed by foreigners, at least till the end of the first Burmese war; and the first persons who crossed it were the officers and men from a detachment of Sir Archibald Campbell's army, under Captain Ross, in March, 1826, who effected the journey from Shembegwen Ghaut to Aeng, a distance of 125 miles, in eleven days. Since that, several others have accomplished it; among whom was Mr. Pemberton, whose account of it has generally been followed in the above narration. The village of Aeng is situate in lat. $19^{\circ} 49'$, long. $94^{\circ} 9'$.

AENG RIVER.—A river of Arracan, which rises in the central ridge of the Yoomadoug mountains, in about lat. $20^{\circ} 2'$, long. $94^{\circ} 15'$, and after flowing, principally in a southerly direction, a distance of about sixty miles, discharges itself into Combermere Bay, fifteen miles east of Khyouk Phyou.

AFGHANISTAN, the name given to the northern portion of the region lying between India and Persia. This country being situate beyond the continent of India, no notice of it in this work can be properly required, although political relations subsist between its ruler and those of the British empire in the East. It may, however, be desirable to give a brief sketch of its history, brought down to the period of its invasion and subsequent abandonment by the British. The dominant power in Afghanistan in later times has been exercised by the tribe of Dooranee. Ahmed Shah, the founder of their government, after experiencing many vicissitudes in contests with the Persians and his own countrymen, procured himself to be crowned at Kandahar in the year 1747: at his death, the dominions which acknowledged his sovereignty extended from the west of Khorassan to Sirhind, and from the Oxus to the sea. His son and successor, Timur Shah, seems to have had no desire as to empire beyond that of preserving the dominions which he inherited. He did not succeed even in this limited object of ambition, having suffered from the encroachments of the king of Bokhara, against whom he was ultimately induced to march with an immense army. This movement, however, produced only a peace, by which that prince was allowed to retain all the fruits of his aggressions. By Timur the chief seat of government was removed to Kabul. He was succeeded by Zemaun Shah, a younger son, who repeatedly threatened India with invasion, the last time in the year 1800, when his design was arrested by apprehensions for the safety of his own dominions on the west. He was finally compelled to yield to his elder brother, Mahmood, by whom, in accordance with Asiatic precedent, he was imprisoned and deprived of sight. Zemaun Shah had inflicted the like penalties on his elder brother, Hoomayon. Mahmood did not enjoy his success undisturbed. His possession of the throne was contested by another brother, named Shoojah-ool-Moolk, and after a severe struggle the latter became master of the prize in dispute, and of the person of his rival. On this occasion Shoojah-ool-Moolk exercised unusual clemency. He imprisoned his brother, but he spared his sight. This humanity was but ill rewarded. In the course of the intrigues and convulsions which marked the reign of Shoojah, in common with all eastern princes, Mahmood obtained his freedom, and reappeared in arms against his competitor. The result was disastrous to Shoojah, who fled to Lahore, where he was confined and plundered by Runjeet Singh. He ultimately escaped, and found a retreat in the British territory. Mahmood owed his success to the talents of his vizier, Futteh Khan; but Kamram, the son of Mahmood, having taken an aversion to the minister, prevailed on his father to imprison him and put out his eyes. Eventually Futteh Khan was murdered with great cruelty. This treatment of the vizier

laid the foundation of another revolution, in which the brothers of that personage were the chief actors. Mahmood fled to Herat, where he died, and was succeeded in the portion of authority which he had been able to retain by his son Kamram. The rest of the country passed into the hands of the brothers of Futteh Singh, the most able and active of them being Dost Mahomed Khan. Shoojah made two attempts to recover his lost throne, but failed, and was compelled again to seek refuge beyond the limits of the dominions which he claimed. About the year 1837, the conduct of certain agents of Russia in the countries lying to the westward of India, excited the apprehensions of the British government. It was consequently desired to establish an alliance with the ruling powers of Afghanistan, and overtures were made to Dost Mahomed Khan. They failed: the attention of the British authorities was then turned to the exiled prince Shah Shoojah, and an expedition from British India on a large scale was prepared for the purpose of restoring him to the throne from which he had been expelled. At this time Dost Mahomed held Kabul and a considerable portion of the Huzareh country. The three brothers of Dost Mahomed, Kohen Dil Khan, Rehem Dil Khan, and Meher Dil Khan, held Kandahar with the surrounding country. Herat, the fourth subdivision of Afghanistan, continued to be held by Kamram. The British force destined to act in Scinde and Afghanistan was furnished partly from Bengal, partly from Bombay, and consisted of 28,350 men. These were to be aided by a Sikh force amounting to 6,000, and by a force nominally assigned to the Shazadah (Shoojah's eldest son), of 4,000; while a Sikh army of observation, amounting to 15,000, was to assemble in Peshawur. The chief command was held by Sir John Keane, commander-in-chief of the army under the presidency of Bombay. The march of the invading force was attended by many difficulties and privations, but it was successfully pursued to Kandahar, where, on the 8th of May, 1839, Shah Shoojah was solemnly enthroned. On the 21st of the same month, the British army was before Ghuznee; on the 23rd the gates of that place were blown in, and the fortress successfully stormed. On the 7th of August the victors entered the city of Kabul (Dost Mahomed having previously quitted it), and the war was regarded as at an end. A few months dispelled this illusion. The British troops, though engaged in maintaining the throne of the prince, who from the chief city of eastern Afghanistan claimed to exercise the power of a sovereign, found that they were virtually in an enemy's country. The wild tribes manifested the most inveterate hostility; and the 2nd of November, 1841, was signalized by a fearful outbreak at Kabul, in which several distinguished British officers were massacred. Among them was Colonel Sir Alexander Burnes. From that time the situation of the British force at Kabul was

one of continued danger and suffering. Akbar Khan, son of Dost Mahomed Khan, arrived to co-operate with the desperate bands previously engaged against them; and late in the month of December, Sir William Macnaghten, envoy in Afghanistan, unfortunately agreed to hold a conference with him. At this meeting the British representative and several officers were treacherously murdered. A convention, under which the British were to evacuate Afghanistan, was subsequently concluded: in the belief that its terms would be observed, the remnant of the army began to move. They were attacked on the road, exposed to miserable hardships from cold, hunger, and fatigue, as well as from the annoyances of the enemy, into whose hands many fell, some as ordinary prisoners, others (including the high-minded Lady Sale and several of her countrywomen) by arrangement with Akbar Khan. The remainder pushed on for Jelalabad, which was held by Sir Robert Sale; but only one European (Dr. Bryden, of the Bengal army), and four or five natives succeeded in reaching it. Such was the fate of a force which, about two months before, numbered 5,000 fighting men, with an array of camp-followers more than three times as many. Other disasters followed, and Ghuznee, so recently and so brilliantly won, returned by surrender into the hands of the enemy. The course of events thus direful to the British army was not less so to the prince in whose behalf it was engaged. Shah Shoojah met the fate which had overtaken so many of his English supporters, and died by the hands of assassins. Gloomy as were now the fortune and prospects of the British in Afghanistan, the darkness was relieved by many displays of brilliant and successful valour. General Nott at Kandahar, and Sir Robert Sale at Jelalabad, must be especially named as having nobly maintained the honour and interests of their country. Preparations were also in progress for vindicating them on a larger scale, before finally abandoning a spot where so much of treachery had been encountered, and so much of disaster incurred. A force of 12,000 men was assembled under General Pollock, and this army, having successfully advanced through the Khyber Pass, joined the force under Sir Robert Sale at Jelalabad. General Pollock subsequently advanced towards Kabul; he was joined by the army under General Nott from Kandahar, and on the 15th of September, 1842, the British national anthem, pealed forth by the band of her Majesty's 9th foot, with three vociferous cheers from the soldiery, marked the elevation of the British colours upon the spot from which they had not long before been driven under circumstances of treachery and murderous cruelty. One of the most gratifying results of this success was the rescue of the European prisoners from the hands of Akbar Khan. It was not intended to retain possession of Kabul, and after destroying the

fort, the magnificent bazaar, the principal mosque, and some other buildings, the British army withdrew, leaving Afghanistan to the anarchy which it seemed destined long to endure. Dost Mahomed Khan had surrendered in the course of the war, and it was apparently intended to keep him permanently under surveillance within the British dominions; but on the abandonment of Afghanistan he was set at liberty. Overtures, at a subsequent period, were made by the Dost, soliciting the establishment of amicable relations with the British, which were met in a friendly spirit by the Indian Government, and resulted in the conclusion of a treaty of alliance with the ruler of Kabul. The treaty bears date the 30th March, 1855.

AFZULPOOR.—A town in one of the sequestered districts of the native state of Hyderabad, or dominions of the Nizam, distant west from Hyderabad 141 miles. Lat. $17^{\circ} 11'$, long. $76^{\circ} 26'$.

AGAI, in the district of Sultanpoor, territory of Oude, a village eleven miles north-west of Sultanpoor cantonment, and eighty south-east of Lucknow. Population 400, all Hindoos. Lat. $26^{\circ} 20'$, long. $81^{\circ} 57'$.

AGAPOOR, in the jaghire of Rampoor, in Rohilcund, a village on the route from Bareilly to Moradabad, and sixteen miles south-east of the latter. Lat. $28^{\circ} 47'$, long. $79^{\circ} 3'$.

AGAWALLEE.—A town in the native state of Dewas, in Malwa, distant north from Oogoin thirty-one miles. Lat. $23^{\circ} 35'$, long. $75^{\circ} 36'$.

AGHAGANJ, in the district of Aldemau, territory of Oude, a village close to the eastern frontier, towards the British district of Goruckpoor. Population 200. Lat. $26^{\circ} 24'$, long. $82^{\circ} 50'$.

AGLAR, a small river of Gurwhal, rises on the northern declivity of the Surkanda Peak, and about lat. $30^{\circ} 32'$, long. $78^{\circ} 23'$, at an elevation of 7,130 feet above the sea. It flows rapidly to the westward through a deep and narrow valley, and after a course of about twenty-three miles, falls into the Jumna on the left side, in lat. $30^{\circ} 35'$, long. $78^{\circ} 3'$.

AGNEAPULLEE.—A town in Hyderabad, or dominions of the Nizam, distant north-east from Hyderabad 155 miles. Lat. $18^{\circ} 5'$, long. $80^{\circ} 46'$.

AGOADA.—A town in the Portuguese territory of Goa. It is situated on the sea-coast, at the entrance of the river leading to the town of Goa, in lat. $15^{\circ} 30'$, long. $73^{\circ} 50'$.

AGOREE, in the British district of Mirzapore, a town on the right or south bank of the river Sone. The town contains some remarkable Hindu temples, fine views of which are given in Daniell's "Oriental Scenery." Distance forty-eight miles south-east of Mirzapore. Lat. $24^{\circ} 32'$, long. $83^{\circ} 1'$.

AGOUTUH, in the British district of Boolundshuhur, Lieut.-Gov. N.W. Provinces, a town on the route from Boolundshuhur to Muzufurnugur, situate nine miles north of the former. Lat. $28^{\circ} 31'$, long. $77^{\circ} 57'$.

AGRA.—A British district within the limits of the Lieut.-Gov. N.W. Provinces, and denominated from the city of the same name. It is bounded on the north by the British district of Muttra; on the east, by the British districts of Mynpooree and Etawa; on the south, by the territories of Dholpore and Gwalior; and on the west, by the territory of Bhurtpore. It lies between lat. $26^{\circ} 46'$ — $27^{\circ} 24'$, long. $77^{\circ} 29'$ — $78^{\circ} 55'$; is eighty-five miles in length from east to west, and thirty-eight in breadth. Its area comprises 1,864 square miles. The elevation above the sea of the average water-line of the Jumna at Agra might be estimated at about 650 feet, and it is probable that, with the exception of the summits of the sandstone hills at Futteh-pore Sikri, no spot in the district has an elevation much exceeding 700 feet. The district, though bounded and intersected by several noble rivers, suffers on the whole from the want of water. Neither the Chumbul, flowing along the frontier in a depressed channel, beset with deep and difficult ravines, nor the scanty and uncertain torrents of Rajpootana, are much available for irrigation, while the channel of the Jumna is much too deep to allow water to be profitably raised and distributed over the surface of the adjacent country. The elevated banks of the Jumna are generally thinly peopled, and barren, or scantily cultivated. The soil is sandy, and its arid character, as well as that of the climate, indicated by the natural produce, consisting of a species of tamarisk, mimosa, capparid, and tamarind. The water of the wells is frequently brackish; in some the contamination is but slight, in others so considerable as to render the water deleterious. In some seasons the rains have nearly failed, and in 1837-38 so completely as to produce famine to an appalling extent. Much of the aridity no doubt results from the neglect or wilful destruction of those noble works constructed by the early princes of the Timurian dynasty, for the purposes of irrigation. The existence of the vast tank, above twenty miles in circumference, which Akbar constructed at Futteh-pore Sikri, can now be traced only in the scattered ruins of the embankment. The most important object presented to the geologist in this district is the well-marked early sandstone of the hills of Futteh-pore Sikri, on the western frontier. They are thus described by Voysey, in the fifteenth volume of the *As. Res.*—"On the Building Stones and Mosaic of Agra:—" "This low range runs in a nearly north-east and south-west direction, and the dip of the strata, which are very distinct, varies from an angle of 25° to 50° , nearly at right angles to the direction of the hill, in a south-south-

westerly direction. It is remarkable that a range of hills, south of Futteh-pore, of the same rock, dips in a contrary direction, the precipitous face being to the southward, and the dip to the northward." The fort of Agra, the mausoleum of Akbar, the great mosque, and a considerable proportion of the Taj Mahal, are built of this stone, though it is of a disagreeable brick-colour, and but of indifferent quality for the purposes of masonry, decomposing very readily, especially some slaty varieties which contain much mica and iron. The red colour frequently passes into a variety of a grey hue, sometimes abruptly, sometimes gradually; and a considerable quantity of the latter variety has been used in erecting the edifices of Agra. The climate has a wide range of temperature. In mid-winter the night frosts and hailstorms sometimes cut off or check the cotton crop, which is the only commercial crop of importance, occupying, on an average, a tenth of the cultivable area. The population, according to census 1852, consisted of 572,226 Hindoos agricultural; 823,812 Hindoos not agricultural; 25,072 Mahomedans and others not Hindoo, belonging to the agricultural class; and 80,851 non-agricultural; making a total of 1,001,961, and giving an average of 537 persons to each square mile. The chief routes through the district are:—1. That from south-east to north-west, from Cawnpore through Etawa, running in some measure parallel to the left bank of the Jumna, which it crosses at Agra by ferry during the rains, and for the rest of the year by a bridge of boats; and then proceeds in nearly the same direction to Muttra, and subsequently to Delhi. 2. From east to west, from Futteh-gurh, by Mynpooree, crossing the Jumna at Agra, and thence by Bhurt-pore and Jeypoor to Ajmere. 3. From north-east to south-west, from Bareilly, by Khaaganj, to Agra, crossing the Jumna there, and thence carried on to Kotah and Neemuch. 4. From south to north, from Mhow (the Bombay and Agra road) to Agra, and thence continued across the Jumna to the grand trunk-road from Calcutta at Allyghur. Several lines proceed from Agra to various places west and south-west of the Jumna. The Jumna is also used as a channel of transport, communication, and travelling, but is ill suited for the purpose. In addition to these routes, the district is intersected by the East-Indian Railway. It is intimated by Ferishta that the arms of Persia had been felt in this part of India previously to the time of Alexander, and that subsequently no foreign power penetrated so far until Mahmood of Ghuznee, in 1017, marched against Kunnoo, and sacked Muhabun, within a few miles of the place where Agra now stands. In 1193, Shahabaddin Mohammad Ghori defeated the army of Jaya Chandra, the rajah of Kunnoo and Benares, the action taking place near Agra, and close to Chand-war, now called Ferozabad. Sikandar Lodi, Afghan sovereign of Delhi, who reigned from

1488 to 1517, regarding this part of his dominions as of great importance, took measures for strengthening his power in it, and making Agra his residence. This prince ended his days there. In 1526 the city fell into the hands of Baber, but his bravery, military talents, and resources were put to the test in overpowering the obstinate resistance of the Afghan population of the country, who subsequently, under Shere Shah, succeeded in de-throning his son and successor Humayon. After the restoration of Humayon, his son Akbar recovered the country about Agra in 1559, fortified the city, and in a great measure made it the seat of government, until that distinction was transferred to Delhi by Aurungzebe, in 1658. On the dismemberment of the empire, consequent on the battle of Paniput, in 1761, Agra, with its territory, fell under the dominion of the Jat chief of Bhurtpore, from which power it passed, in 1774, to Nujeeb Khan, the powerful minister of Shah Allum. Subsequently to the death of Nujeeb Khan, Madajee Scindia, the Mahratta chief, seized the territory under colour of a grant from Shah Allum. Dowlut Rao Scindia, the nephew and successor of Madhajee, assigned this tract to the French adventurer Perron, for the purpose of supplying resources to maintain the large force under his command. In 1803, during the war between the East-India Company and Scindia, Agra was held for Perron by Hessian, an adventurer of Dutch descent, who, after a brief show of resistance, surrendered it to General Lake, in October of that year, and it was formally ceded to the British by the second article of the treaty of Serjee Anjenjaum.

AGRA, a celebrated city, the principal place of the British district of the same name, is situate on the right bank of the Jumna, here to be crossed by the East-Indian Railway. That river, during the season of low water, is dry in the channel next the town; the deeper channel, through which the entire stream then passes, stretching under the opposite bank, distant nearly half a mile. The river spreads most widely opposite the fort, and in that part its extreme breadth during the rains is about half a mile. A fine strand-road, eighty feet wide, was constructed by the labour of the destitute poor during the dreadful famine of 1838, and extends about two miles from the custom-house nearly to the Taj Mahal. Public-spirited natives have adorned it with ghauts, or passages of stone giving access to the river, which is much frequented for the purposes of bathing and ritual ablution. The material for the roads is kun-kur, or calcareous conglomerate, which readily settles into a hard and durable surface. The old walls of the city remain, and mark out a space extending along the river about four miles in length, with a breadth of three; and as the outline does not much deviate from the rectangular, the area is about eleven square

miles: but of this not one-half is at present occupied. There is one fine wide street, running from the fort in a north-westerly direction, and nearly bisecting the city. The houses are built chiefly of red sandstone from the hills of Futtehpore Sicklee, and many are three or four stories high. Most of the other streets are narrow and irregular, but kept clean. "The shops contain very few articles; many of them are small cabins of about eight feet square, and contain goods in proportion" with their insignificant dimensions. The city boasts of numerous large structures, memorials of the resources and magnificence of the sovereigns of the Timurian dynasty of Hindostan. The fort, built by Akbar in the latter part of the sixteenth century, is of an irregular form, but having for its general outline the sides of a scalene triangle, the base of which, about five furlongs in length, extends along the river. The south-western side is slightly concave towards the interior, and is about three furlongs in length: the north-western side is in like manner concave towards the interior, and is about two furlongs in length. The total circuit exceeds a mile. In 1803 this place was invested by the army of Lord Lake, and after some abortive attempts to negotiate, a battery of eight eighteen-pounders being completed, and together with two enfilading batteries, one of four twelve-pounders, the other of two and four howitzers, brought to bear on the south-east bastion, produced such terrible effects, that in the course of a day the Mahratta force, amounting to between five and six thousand men, were compelled to capitulate. On that occasion 164 pieces of ordnance were taken, and treasure to the amount of 264,000*l*. The buildings most worthy of note within the fortress are the palace of Shahjehan, his hall of audience, and the Motee Masjid, or Pearl Mosque. The palace is small, and contains only two chambers of tolerable size. Their interior surface is entirely overlaid with white marble, ornamented with arabesques and carvings of flowers. The even surfaces are decorated with mosaics, and the columns with fillets of yellow or black marble. The parts more in relief were enriched with gilding, of which some vestiges remain. Adjoining is the harem, a suite of small chambers, directly accessible only through the imperial apartments. One more highly ornamented than the rest is said to have lodged the favourite consort of the sovereign. It commands a view of the river, through a screen-work of marble, pierced in one place by a cannon-ball, discharged during the siege by the British army. Many of the chambers were refreshed by fountains which played through orifices in the mosaic pavements. Every practicable contrivance was requisite for mitigating the heat, which during the sultry months is so great that the palace is then uninhabitable for Europeans. Here Shahjehan ended his days in a splendid but vigilantly-guarded captivity, to which he was consigned by his son Aurungzebe. In the

court before this building Tavernier saw a bath forty feet in diameter, hollowed out of one mass of grey stone. Contiguous is Shah-jehan's audience-chamber, equal in size to his whole palace. Originally it was inclosed merely by arcades, occasionally hung with tapestry. The British authorities have walled up the arches, leaving a few openings to serve as windows, and thus formed a large room, used as an arsenal. Although the excessive heat during the sultry season prevents Europeans from permanently inhabiting it, an officer with a company of sepoys is daily on duty in the fort, for the protection of the armory, the medical depôt, and the treasure belonging to the collectorate of the district. Adjacent is the Motee Masjid, or Pearl Mosque, styled so on account of its architectural beauty. The exterior is of the red sandstone of which the buildings of the fort are generally constructed, but within nothing is seen but white marble. A quadrangular court, having in the midst a large basin for ritual ablution, is inclosed on three sides by arcades. On the fourth, facing the entrance, and raised some steps above the level of the court, is a large vestibule, the roof of which is supported by a great number of pillars. Above is a terrace, surmounted by a noble dome, and on each side of this is one similar in shape, but of less size. A large and elegant kiosk rises at each extremity of this front, and in the interval between these are seven others, equidistant. The view of the spectator, completely secluded within the precincts of this building, rests undisturbed on a scene of tranquil solemnity. The interior of the mosque is of an oblong shape, well proportioned and highly embellished. The celebrated Taj Mahal, or mausoleum of Shahjehan and his consort Arjmand Banoo, surnamed Mumtazi Mahal, is situate on the right bank of the Jumna, outside the city, and about a mile east of the fort, with which it communicates by a recently-constructed road. As the intervening ground was covered with ruins of great size and excellent workmanship, much labour and cost were required to level the way, it being frequently necessary to cut it through walls of solid masonry eight or ten feet thick, and so well cemented that it was found requisite to blast them with gunpowder. The extreme outline of the Taj Mahal is a vast rectangle formed by a great wall of red sandstone. The quadrangle is from east to west 964 feet, and from north to south 329. One of the longer faces has a northern aspect, and rises directly from the river; its red hue forms a disagreeable contrast to the dazzling whiteness of the rest of the building. At each extremity of this face, but within the quadrangle, and filling up its north-eastern and north-western angles respectively, is a mosque, or at least a building in the usual style of such edifices. They are constructed principally of red sandstone, but have interspersed embellishments of white marble, and are each surmounted by three domes of the same material. Only that on the

western side, however, is used as a mosque, the other having been built entirely for the sake of uniformity. The Taj Mahal, or actual mausoleum of the imperial couple, is situate on the north side of the quadrangle, looking down upon the river. The whole area before it "is laid out in square parterres, planted with flowers and shrubs in the centre, and with fine trees, chiefly the cypress, all round the borders, forming an avenue to every road." Above the level of this extensive inclosure, and ascended by a noble flight of marble steps, rises the terrace of white marble, on which is situate the sepulchral edifice. This terrace, about 400 feet square, and 60 high, has for its upper surface a platform paved with large slabs of the same material with the steps by which it is reached, highly polished, and formed into regular squares, having the seams marked by narrow streaks of black marble neatly inlaid. At each angle of the terraced platform is a minaret about 100 feet high, surmounted by a light kiosk or cupola, supported on eight pillars, and commanding a grand view of the Jumna, the surrounding country, the fort, the city, and a striking expanse of ruins. The great dome is represented to be 70 feet in diameter, and 260 in height, from the foundation of the lower terrace. It is crowned by two gilt globes, one above the other, a gilt crescent surmounting the whole. The sepulchral apartment in the interior is a regular octagon, each side of which is twenty-four feet in length. Here repose the remains of the Padshah Shahjehan, and by their side those of his consort Arjmand Banoo, surnamed Mumtazi Mahal and Mumtazi Zemani. The actual tomb or sarcophagus of the empress is covered with arabesques, fanciful mouldings, flowers, and other decorations, displaying the exercise of an invention fertile but capricious. Interlaced with the flowers and arabesques are numerous inscriptions taken from the Koran. The tomb of Shahjehan is a little higher than that of his consort, and less profusely decorated. These tombs are within a common inclosure of marble railing, or lattice-work, of extraordinary lightness. The ceiling is dome-shaped; over it is the spacious apartment under the principal dome, and around are several corridors and smaller apartments. On the floor of the upper one are two cenotaphs, corresponding to those below, and surrounded by a screen-work of marble six feet high, loaded with elaborate wrought mosaics. Above rises the great dome, which "is so profusely clustered with fruits, flowers, and foliage of the same splendid description, as to have the appearance of a blooming bower; and there can be little doubt that it was intended to convey an idea of the blissful seats of Paradise." So curious is the workmanship of the mosaics said to be, that "a single flower in the screen around the tombs or sarcophagi contains a hundred stones, each cut to the exact shape necessary, and highly polished; and in the interior of the

building there are several hundred flowers, each containing a like number of stones," of twelve different kinds. Exclusively of the materials of the mosaics, the terrace, the minarets, and the principal buildings, are altogether externally and internally constructed of white marble, or at least overlaid with it, so that no other is seen. It is represented to have been brought from Jeypoor, 130 miles to the west, and, as well as the other materials, except the sandstone, to have been presented as tribute. According to Tavernier, who had an opportunity of observing the progress of the work, 20,000 men were incessantly employed on it for twenty-two years.—(See *Voyages*, vol. iii. p. 94.) To the north-east of the city, higher up the river, and on the left or opposite side of it, is the Rambagh, a sort of pleasure-ground, laid out in a style similar to that in front of the Taj Mahal. It is chiefly remarkable for an antique mausoleum of great dimensions and elaborate workmanship, known by the name of the tomb of Itimad-ud-daulat. It is, however, now much decayed; and its coating of stone having in many places fallen off, the internal structure of crude brick and mud appears. Adjoining the fort on the north-west, is the Jama Masjid, or Great Mosque, an immense pile of building, in general in the same style as that of the interior of the fort. Of modern buildings the most worthy of note is a college, situate on the west of the city, and consisting of a fine quadrangle, having a turret at each corner, and two principal entrances. The Metcalfe Testimonial is considered to possess some architectural beauty. The character of the "testimonial," however, seems remarkable; the building consisting of a dancing-room and refectory, with some subordinate offices. Adjacent to the city, on the west, is the Government-house, the official residence of the Lieutenant-Governor of the North-West Provinces. The civil lines are on the north-west of the city, and inclose various offices of government. The magistrate's cutchery is to the south of the town, between the civil lines and the cantonments; and opposite to it is a printing-office, called the Agra Press. There is also a banking establishment, carrying on business under the name of the Agra Bank. The church is a handsome building, but not capable of containing above a thousand persons; and a new one is about to be erected in the civil station. There are two places of worship for Romanists, and one for Baptists. Among the benevolent establishments of the place may be noticed the Orphan Institution, which originally supported 2,000 children, but now not above a tenth of that number. The Church Missionary Society has a branch here, but on a small scale. Agra, being the seat of the subordinate government of the Upper or North-West Provinces, has revenue and judicial establishments, corresponding with those at Calcutta, which control those branches of administration throughout the Lower Pro-

vinces. The military lines are outside the city wall, and a mile and a half south of the fort, and about the same distance from the right bank of the Jumna. This station is within the Meerut military division, and is usually occupied by a considerable body of European and native infantry and artillery. The climate of Agra is considered healthy from November till the end of March. During the hot winds which prevail in April, May, and the early part of June, the climate is distressing and prejudicial to the European constitution; producing apoplexy, dysentery, dyspepsia, fevers, acute and intermittent, and severe ophthalmia. The rainy season, from the latter part of June to the middle of September, is still more unhealthy; yet even then the average amount of disease is rather below than in excess of that of the generality of stations in the North-West Provinces. The only decidedly unhealthy locality in Agra or its neighbourhood is the fort; and this, in consequence of its position on the bank of the Jumna, where a slimy deposit takes place at the end of the rains, which, aided by the high walls, dense mass of buildings, and deep stagnant ditch, becomes a fertile source of disease during the hot and rainy months. The markets are supplied with poultry, butchers' meat, and such vegetables as are in request by Europeans. Peas, greens, asparagus, cauliflower, French-beans, and artichoke, succeed well in the cold season. Much cotton is sent in boats down the Jumna to the lower provinces from Agra, the produce either of the district, or of the neighbouring one of Muttra, or of the adjacent territories of Bhurtpore or Dholpore, and Gwalior. Salt is a still more important article of commerce, as none is prepared in the Doab; and being principally brought from Rajpootana, it passes in large quantities through Agra. The population of the city of Agra, including the suburbs and cantonment, has been returned, according to the census of 1852, at 125,262. Agra is N.W. from Calcutta 783 miles, N.W. from Allahabad 238, N.W. from Cawnpore 179, S.E. from Delhi, by Allyghur, 139. Elevation above the sea probably about 650 feet. Lat. $27^{\circ} 10'$, long. $78^{\circ} 5'$.

AGRAHAUT, in the British district of Cuttack, lieutenant-gov. of Bengal, a town on the route from Cuttack to Ballasore, nine miles north of the former. Lat. $20^{\circ} 34'$, long. $85^{\circ} 59'$.

AGROHA, in the British district of Haryana, lieutenant-gov. N.W. Provinces, a town on the route from Hissar to Sirsuh, twelve miles north of the former. Lat. $20^{\circ} 18'$, long. $75^{\circ} 44'$.

AGUR, in the territory of Gwalior, or possessions of Scindiah's family, a large town on the route from Oojein to Kota, forty-one miles north-east of former, 101 south of latter. It is situate in an open plain on the north-east of an extensive and fine tank. It has a rampart of stone, and within it a well-

built fort. In 1820 it had a population of about 30,000, and an armed force consisting of 1,200 swordsmen and spearmen, 250 matchlockmen, and 200 cavalry. Elevation above the sea 1,598 feet. Lat. $23^{\circ} 41'$, long. $76^{\circ} 2'$.

AGUSTMOONDI, in the British district of Kumaon, lieutenant-gov. N.W. Provinces, a village with Hindoo temple, on the route from Sireenuggur to the temple of Kedarnath, and twenty-five miles south of the latter. It is situate on the left bank of the Mundagnee, at an elevation of 2,561 feet above the sea. Lat. $30^{\circ} 23'$, long. $79^{\circ} 5'$.

AHAR, in the British district of Boolundshuhur, lieutenant-gov. N.W. Provinces, a town on the route from Boolundshuhur to Moradabad, twenty-two miles east of the former. Lat. $28^{\circ} 27'$, long. $78^{\circ} 18'$.

AHEERWARREE, in the British district of Sholapoor, presidency of Bombay, a town on the route from Sholapoor to Beejapoor, eleven miles south of the former. Lat. $17^{\circ} 30'$, long. $76^{\circ} 1'$.

AHEERWAS.—See **AIRWAS**.

AHEREE.—A town in the territory of Nagpore, distant south-east from Nagpore 130 miles. Lat. $19^{\circ} 27'$, long. $80^{\circ} 3'$.

AHERWA, in the British district of Cawnpore, lieutenant-gov. N.W. Provinces, a village on the route from the cantonment of Cawnpore to Futtehpore, and seven miles south-east of the former. Lat. $26^{\circ} 23'$, long. $80^{\circ} 28'$.

AHIRO.—See **UKROW**.

AHLADGANJ, in the territory of Oude, a province named from one of its towns. It lies between lat. $25^{\circ} 36'$ — $25^{\circ} 58'$, long. $81^{\circ} 8'$ — $81^{\circ} 47'$; is about twenty-five miles in length from south-east to north-west, and eighteen in breadth. It contains the following subdivisions:—1. Ahladganj; 2. Bihar; 3. Manikpur; 4. Rampur. Ahladganj, the town from which it is named, is situate two miles south-west of the route from Banda to Partabgarh, twenty-two miles south-west of the latter, 114 east of the former. Lat. $25^{\circ} 56'$, long. $81^{\circ} 38'$.

AHMADGANJ, in the British district of Futtehpore, lieutenant-gov. N.W. Provinces, a village on the route from Allahabad to the town of Futtehpore, and thirty-six miles south-east of the latter. Lat. $25^{\circ} 47'$, long. $81^{\circ} 12'$.

AHMEDABAD.—A British collectorate within the jurisdiction of the presidency of Bombay: it is bounded on the north by the Guicowar's dominions; on the east by the British district of Kaira, and the territory and gulf of Cambay; and on the south and west by Kattywar. It extends from lat. $21^{\circ} 22'$ to lat. $23^{\circ} 30'$, and from long. $71^{\circ} 26'$ to long. $72^{\circ} 50'$; and is 148 miles in length from north to south, and sixty-two miles in breadth. It contains seven talooks or subdivisions, with an area of 4,356 square miles, and a population of 650,223. The district is traversed from north to south by the river Sabur Muttee. The general ap-

pearance of the country is almost that of a perfect level, the land appearing as if it had been abandoned by the sea at no very remote period, according to the reckoning of geologists. A tract running from the head of the Gulf of Cambay to the Runn of Cutch is still subject to be covered with water. In the Gogo pergunnah, lat. $21^{\circ} 40'$, there are some rocky hills; but from these, as far north as the town of Ahmednuggur, in Guzerat, lat. $23^{\circ} 31'$, there is no hill larger than a sandhill, and no rock or stone to be met with, except on the verge of the two points taken. Beyond Ahmednuggur commences the hill country, whence was brought most of the stone employed in Mahomedan architecture, the fine remains of which still adorn the city and neighbourhood of Ahmedabad. The surface of the country being thus level, there are no ghauts or passes. The roads even in the fine weather are heavy, as the soil is such as to fall into deep sand when much trodden over. The want of material is the great drawback to the construction of roads in this collectorate. In the rains they are impassable for wheeled carriages; in many places they form the drains of the country, and in wet weather, should an inquiry be made as to the locality of the cart-road, a small river or lake would probably be pointed out. An improvement in this respect may, however, be shortly looked for, as the district is about to be traversed by the Bombay and Baroda Railway. The climate during the hot season is dreadfully sultry. The state of the collectorate, as regards the circumstances of the people, is represented to be very superior to the general condition of the inhabitants of the Decan. The villages for the most part consist of substantial houses of brick and tiles, with only a small proportion of huts. In some of the larger villages there are houses with upper stories, and the appearance of the inhabitants indicates them to be in possession of every ordinary comfort. They are generally well clothed, not excepting even the lower classes. Their food is grain of various qualities, from rice to bajree, according to their means. A disposition to apply native energy and capital to the development of the resources of this district has recently manifested itself among the population of one of its towns. It being suggested that greater facility of communication between the town of Dholera and the port of the same name would conduce to the prosperity of those places, a company of native speculators undertook to effect the object by means of a tramway. The distance to be traversed is four miles. Sanguine expectations are entertained that the scheme will prove highly profitable to its projectors; and if this be the result, the investment of native capital in works of public utility may be looked for in other quarters of the presidency. The revision of the government land assessment is in progress, but this collectorate is not yet in a condition for the strict enforcement of a revenue system adapted to more settled districts. The country is inhabited by a race only

recently reclaimed from lawless habit, who are yet to be confirmed in a course of peaceful industry, to which, however, it is stated, they are gradually becoming more devoted. At present the chief object sought is to induce permanency and regularity of cultivation by light rates of assessment, the utmost simplicity of system, and a total abstinence from all vexatious interference with existing immunities.

AHMEDABAD, in the presidency of Bombay, the principal place in the British collectorate of the same name, is situate on the east or left bank of the river Sabarmuttee. An English observer says: "From being formerly one of the largest capitals in the East, it is now only five miles and three-quarters in circumference, surrounded by a high wall, with irregular towers every fifty yards, in the usual style of Indian fortifications: there are twelve principal gates, and several smaller sallyports." At the commencement of the seventeenth century, a very florid description of its glories was given by a native writer: "The houses of Ahmedabad are in general built of brick and mortar, and the roofs tiled. There are 800 different mohullas (wards), each mohulla having a wall surrounding it. The principal streets are sufficiently wide to admit of ten carriages abreast. It is hardly necessary to add that this is, on the whole, the handsomest city in Hindoostan, and perhaps in the world." Its condition in 1780 is thus described by a judicious military historian of our own country: "The walls of Ahmedabad are of immense extent, and, for so vast a city, were remarkably strong. Though this ancient capital was considered in a comparatively deserted condition, even at this period it was supposed to contain upwards of 100,000 inhabitants." Its present decayed state, however, affords indications of its former grandeur, when the mosques and palaces were numerous and magnificent, the streets regular and spacious, and many aqueducts, fountains, and seraes, or public lodging-houses, conduced to the convenience and comfort of the inhabitants and visitors. The noblest architectural relic is the Jumma Musjed, or great mosque, built by Ahmed Shah, of Guzerat, the founder of the city. Near this superb structure is the mausoleum of the founder and his sons, and adjoining is the cemetery of the less eminent members of his family. Another noble structure is the mosque of Sujat Khaun, which, though less magnificent, is more elegant than Sultan Ahmed's. Next worth notice is the ivory mosque, which, though built of white marble, has obtained that distinction from being curiously lined with ivory, and inlaid with a profusion of gems, to imitate natural flowers, bordered by a silver foliage on mother-of-pearl. Near the city wall is a beautiful tank, or small lake, called Koka-rea, a mile in circumference, lined with hewn stone, and a flight of steps all round. There are four entrances, through gateways, adorned with cupolas supported on pillars. In the

middle of the lake is an island, in which are a summer palace and small pleasure-ground. Access to this retreat was gained by a bridge of forty-eight arches, now dilapidated. Two miles from the city, on the banks of the Sabarmuttee, is the Shahbagh, or royal garden, a summer palace, built by Shahjehan, when he governed Guzerat as viceroy of his father Jehangir. It is an extensive structure, of complicated plan; and though now little more than a collection of ruins, plainly appears to have been constructed with great cost, and in an elegant taste. The gardens everywhere had abundance of the finest water, from fountains and aqueducts supplied by the Sabarmuttee; and though they are much defaced, they still contain a great number of fine shrubs, and trees of great age and size. Ahmedabad was formerly celebrated for its commerce and manufactures in cloths of gold and silver, fine silk and cotton fabrics, articles of gold, silver, steel, enamel, mother-of-pearl, lacquered ware, and fine wood-work. Excellent paper was also made here; and there were many artists in portrait-painting and miniatures. The trade in indigo, cotton, and opium was very great. But all this prosperity was swept away by the rapacity of the Mahrattas; and the competition of British goods, so much lower in price than those of India, must effectually prevent the revival of the manufacturing industry of this place. In other respects, this city may yet attain its former flourishing condition, as the Bombay and Baroda Railway is destined to pass close to its walls.

The city was founded in the year 1412, by Ahmed Shah, of Guzerat, on the site of the more ancient city of Yessavul. In 1572 it was, with the rest of Guzerat, subjugated by Akbar. The decay of the realm of Delhi, and the rise of the Mahrattas, led to further changes. As early as 1737 the authority of the court of Delhi in Guzerat was no more than nominal, and various leaders, Mussulman and Mahrattas, contended for the possession of Ahmedabad. In the year last named, it fell into the hands of two of these combatants, who, though of different creeds, had united their army for the promotion of their personal interests, and now exercised an equal share of authority, and divided the revenues between them. The Mahratta chief (Dammajee Guicowar) having subsequently been imprisoned by the Peishwa, the agent of his Mogul partner took advantage of his absence, to usurp the whole power of the city, permitting Dammajee's collector to realize his master's pecuniary claims. Dammajee, on obtaining his liberty, united his forces with those of Ragonath Rao (a name well known in the history of that period), who was engaged in an expedition for establishing the Peishwa's claims in Guzerat; and the combined armies gained possession of Ahmedabad in 1755. In 1760 it was stormed and captured by a British force under General Goddard. The British, however, did not then retain it. The place returned to the Mahrattas.

tas, with whom it remained until 1818, when, on the overthrow of the Peishwa, it reverted to the British government. On its present condition there is little more to remark. The city walls, which have been already noticed, were thoroughly repaired in 1834, at a cost of 250,000 rupees. An ample supply of water is raised from the river, and distributed throughout the city by means of pipes. The population is said to amount to 130,000 inhabitants. One of the government English schools has been established in this town, which was opened on the 1st January, 1846, under a native instructor, who obtained high distinction at the examination of the Elphinstone Institution in 1845. The inhabitants of Ahmedabad had particularly distinguished themselves by their exertions to erect a school-house; and having raised a sum of 4,397 rupees, which, with the addition of a small grant from the Board of Education, was sufficient for the purpose, the building was completed, under the superintendence of the government engineer. Government vernacular schools have also been established in this town. In 1848 a new church was constructed, at an expense of about 12,000 rupees. Ahmedabad is distant from Bombay, N., 290 miles; from Poona, N.W., 320; from Delhi, S.W., 490; from Calcutta, W., 1,020. Lat. 23°, long. 72° 36'.

AHMED KHAN, in the British district of Kurrachee, in the province of Scinde, presidency of Bombay, a town on the route from Kurrachee to Sehwan, seventy miles north-east of the former. Lat. 25° 26', long. 67° 54'.

AHMEDNUGGUR.—A British collectorate within the jurisdiction of the presidency of Bombay. Including the sub-collectorate of Nasick, it is bounded on the north by Candia, on the east by the Nizam's dominions, on the south-east by Sholapoor, on the south and south-west by Poona, and on the west by Tannah and by some of the petty states tributary to the Guicowar. It extends from lat. 18° 16' to 20° 30', and from long. 73° 29' to 75° 37', and is 179 miles in length from north-west to south-east, and 100 miles in breadth; it contains an area of 9,931 square miles, and has a population of 995,585. The principal geographical feature of this tract is the chain of ghats which runs along a considerable portion of its western boundary, throwing out numerous spurs or ridges from its eastern side. Between the ridges are table-lands of greater or less extent, descending in vast terraces of various degrees of elevation above the sea. These terraces have a general and gradual inclination towards the south-east, indicated by the courses of the rivers, which take that direction. The Great Indian Peninsula Railway traverses the north-eastern section of the collectorate. It is also intersected by the Bombay and Agra road, which enters the Ahmednuggur district at the Tull Ghaut, and quits it at the Chandore Ghant. There is also

a road connecting Poona, *via* Seroor, with the town of Ahmednuggur, and continued thence for some distance towards Malligam; another between Poona and Narrayengam, which is to be carried on to Nasick. There are besides various cross-roads, connecting different towns throughout the collectorate. With a view to the production of wool of superior character, sheep-farms were established by the government in 1835, in the neighbourhood of Ahmednuggur; but after the lapse of eleven years, during which period the experiment had been in progress, it became obvious that it was attended with little advantage, and the farms were ordered to be abolished. Except in the town of Yeola, celebrated for its silk fabrics, of which it exports annually to the value of about 50,000 rupees, the only manufacture consists of the coarse cloths of the country.

AHMEDNUGGUR.—The principal town of the British collectorate of the same name, presidency of Bombay. The town, or *petta*, is surrounded by a wall of no great height, and within it by an immense prickly-pear hedge, about twenty feet high. "No human being can pass it without cutting it down, and this is a matter of the utmost difficulty, as it presents on every side the strongest and most pointed thorns imaginable. Being full of sap, fire will not act upon it, and the assailants, while employed in clearing it, would be exposed to the enemy's matchlocks from behind, so that it is stronger than any abbatis or other barrier that can be conceived." The fort is about 1,000 yards from the town, and is built entirely of stone. It is of an oval ground-plan, about a mile in circumference, with a vast number of large round towers. The town contains an English church. In 1849 a commodious dhurmaalah, or place for the accommodation of travellers of all persuasions, capable of containing 250 persons, was erected by funds raised from the subscriptions of the native and European inhabitants. A good supply of water is obtained by means of aqueducts. An English school and several vernacular seminaries have been established in the town by the government.

Ahmednuggur was founded in 1494 by Ahmad Nizam Shah, originally an officer of the Bahmani state, who, on the breaking up of that government, assumed the title and authority of a sovereign, and fixed his capital at this place, named after its founder. It was built on the site of a more ancient town, called Bingar. Ahmad Nizam Shah died in 1508, and was succeeded by his son Boorhan Nizam Shah. In his reign the state attained high prosperity, until he met with a great defeat in 1546, from Ibrahim Adil Shah, king of Beejapoor. Boorhan Nizam Shah died in 1553, and was succeeded by his son Husain Nizam Shah. This prince, in 1562, also suffered a very severe defeat from the king of Beejapoor, and lost several hundred elephants and 600 pieces of cannon; amongst them was

the great gun now at Beejapoor, and considered to be one of the largest pieces of brass ordnance in the world. This king of Ahmednuggur was subsequently confederated with the kings of Beejapoor, Golkonda. and Beedur, against Rajah Ram of Bijayanaar, who, in 1564, was defeated, made prisoner, and put to death in cold blood at Talikot, in the present British district of Belgaum. Husain Nizam Shah died in 1565, and was succeeded by his son Murtaza Nizam Shah, nicknamed Divana, or the Insane, from the extravagance of his conduct. He was in 1588 cruelly murdered by his son Miran Husain Nizam Shah, who, having reigned ten months, was deposed and put to death. He was succeeded by his nephew Ismail Nizam Shah, who, after a reign of two years, was deposed by his own father, who succeeded by the title of Burhan Nizam Shah II. To this prince, who died in 1594, succeeded his son Ibrahim Nizam Shah, who, after a reign of four months, was killed in battle against the king of Beejapoor, and Ahmud, a reputed relative, was raised to the throne; but as it was soon after ascertained that he was not a lineal descendant, he was expelled the city, and Bahadur Shah, the infant son of Ibrahim Nizam Shah, was placed on the throne under the influence of his great-aunt Chand Bibi (widow of Ally Adil Shah, king of Beejapoor, and sister of Murtaza Nizam Shah, of Ahmednuggur), a woman of heroic spirit, who, when the city was besieged by Murad, the son of Akbar, in person defended the breach which had been made in the rampart, and giving the assailants a sanguinary repulse, compelled them to raise the siege. These events took place in 1595. In 1599, Prince Daniel Mirza, son of Akbar, at the head of that monarch's forces, besieged the city of Ahmednuggur, and after Chand Bibi had been murdered in a sedition, stormed the place, massacred most within it, and made prisoner the infant king, who was confined in the fort of Gwalior. Though the capital was thus taken, nominal kings of Ahmednuggur continued to hold feeble and precarious sway until 1636, when Shahjehan totally and finally uprooted the monarchy. In 1759 the city was, for a sum of money, betrayed to the Peishwa by the commandant holding it for the government of Delhi. In 1797 it was ceded by the Peishwa to the Mahratta chief Dowlut Row Scindia. In 1803 it was invested by a British force under General Wellesley, and surrendered after a feeble resistance of two days. It was, however, shortly after given up to the Peishwa, but the fort was again occupied by the British in 1817, by virtue of the treaty of Poona. On the fall of the Peishwa, Ahmednuggur became the seat of the local government of the collectorate of the same name. The city of Ahmednuggur in 1819 was reputed to have a population of above 20,000 persons, and its prosperity has been rapidly progressive since it has been under British rule. Distant from Bombay,

E., 122 miles; from Poona, N.E., 71; Mhow, S.W., 250; Hyderabad, N.W., 280; Nagpore, S.W., 325; Calcutta, by Nagpore, S.W., 930; Delhi, by Mhow, 680. Lat. 19° 6', long. 74° 46'.

AHMEDNUGGUR, in the British district of Allyghur, lieut.-gov. of the N.W. Provinces, a town on the route from Coel to Furruckabad, thirty-three miles south-east of the former; it has a population amounting to 6,740. Lat. 27° 44', long. 78° 38'.

AHMEDNUGGUR.—A Rajpoot district of the Myhee Caunta, in the province of Guzerat, politically connected with the presidency of Bombay. In the year 1790, the then ruler of Edur severed this tract of territory from the remainder of his dominions, and bestowed it as a separate principality upon his second son Sugram Sing. The revenue of the petty state, including that of the feudal chieftains, was estimated in 1847 at 7,000*l.* per annum, of which the rajah's share amounted to 5,000*l.* The British connection with this state commenced in the arrangement made with the Baroda government in 1820, under which the Guicowar stipulated to withdraw his troops from the Myhee Caunta, and the British government engaged to collect the Guicowar's dues free of expense to that prince. The amount of tribute from Ahmednuggur is 895*l.* per annum. In 1835, the death of the rajah gave rise to a case of suttee, performed at midnight, in defiance of the representations of the political commission; the British troops were fired upon, and their European officer, Lieutenant Lewis, wounded. The rite of suttee has been since formally abolished in the Myhee Caunta. The rajah of Joudpore dying in the year 1841 without male issue, led to numerous intrigues in regard to the succession, which finally terminated in the election of Tukht Sing, the rajah of Ahmednuggur, to the throne of Marwar or Joudpore. His possessions in the Myhee Caunta were thereupon claimed by the ruler of Edur, the representative of the senior branch of the family, both as the feudal superior, and as the nearest collateral heir. The validity of the claim was recognised by the British government, and the possessions of Ahmednuggur are now merged in the state of Edur.

AHMEDNUGGUR.—The principal town of the district of the same name, in the Myhee Caunta division of Guzerat, presidency of Bombay. It is situated on the banks of the stream named the Hant Muttee, in an extensive plain, and surrounded by the remains of a fine old stone wall. There is a fort within the area, but it has been allowed to fall to ruin. Population 9,000. Distant north from Baroda ninety-one miles. Lat. 23° 34', long. 73° 1'.

AHMEDPOOR.—A town in the Sindie Sagur Doosab division of the Punjab, situated on the right bank of the Chenab, thirty-seven

miles north-east of Mooltan. Lat. $30^{\circ} 34'$, long. $71^{\circ} 48'$.

AHMEDPOOR.—A town in the native state of Bhawalpoor. It is sometimes called Barra, or "the great," to distinguish it from Ahmedpoor Chuta, or "the little," in the same country. There is a large and lofty mosque, with four tall minarets; but the private houses are in general meanly built of mud. Ahmedpoor has manufactures of matchlocks, gunpowder, cotton, and silk. The population is estimated by Hough at 30,000. Lat. $29^{\circ} 10'$, long. $71^{\circ} 21'$.

AHMEDPOOR CHUTA, or "THE LITTLE."—A town in the native state of Bhawalpoor. Before the annexation of Soubulcote to the Bhawalpoor territory in 1843, Ahmedpoor was the frontier town towards Sinde. Distant south-west from Bhawalpoor 129 miles. Lat. $28^{\circ} 16'$, long. $70^{\circ} 13'$.

AHMOOD, in the British district of Broach, presidency of Bombay, a town twenty-one miles north of Broach, and thirty miles south-west of Baroda. Lat. $21^{\circ} 59'$, long. $72^{\circ} 53'$.

AHMUDGURH.—A town with a fort in the British district of Booldandahur, lieutenant-gov. of the N.W. Provinces, sixty miles south-east of Delhi. Lat. $28^{\circ} 14'$, long. $78^{\circ} 11'$.

AHOO, or **AHU.**—A small river of Malwa, rising about lat. $24^{\circ} 5'$, long. $76^{\circ} 1'$. It holds a sinuous course, but generally in a northerly direction; and forming a junction with the small river Amjar, at a short distance below the confluence, falls into the Kali Sindh, on the left side, at Gagroun, in lat. $24^{\circ} 36'$, long. $76^{\circ} 19'$. The Ahoo is crossed by means of a ford, on the route from Neemuch to Saugor, at Bulwara.

AHRORAH.—The principal place of the pergunnah of the same name, in the British district of Mirzapore, a town twelve miles south-east of Chunar, twenty south of Benares. Lat. $25^{\circ} 2'$, long. 83° .

AHTOOR, in the British district of Salem, presidency of Madras, a town on the route from Salem to Cuddalore, thirty miles east of the former. Lat. $11^{\circ} 36'$, long. $78^{\circ} 39'$.

AIKOTA, in the territory of the native state of Cochin, a town at the northern extremity of the island of Vaipu, or Vipeen, bounded for the most part by the Backwaters, as the British denominate the extensive shallow lake or estuary formed by numerous streams flowing from the Western Ghats. It is described by Bartolomeo as "a fortified town," with a very ancient harbour, where, according to tradition, St. Thomas once landed." In the latter part of the eighteenth century it was held by the Dutch. On occasion of the war in 1790, between Tippoo Sultan and the British, this place was garrisoned by the forces of the East-India Company. Distance from Cochin, north, fifteen miles; from Bangalore, south-west, 220. Lat. $10^{\circ} 10'$, long. $76^{\circ} 15'$.

AIRWAS, or **AHEERWAS**, in the territory of Indore, or possessions of Holkar's family, a decayed town with ruinous fort, in Malwa, on the southern frontier, towards the Dhar territory, held by a petty Goond rajah. It is situate in a rugged tract, amidst deep and scarcely penetrable jungle and forest; and from this circumstance, as well as from the expectation of succour from the fellow-feeling of the rajah, it was sought as the last lurking-place of Chestoo, the notorious Pindaree chief, after he had been hunted from his other places of concealment by the indefatigable pursuit of the British in 1816; and here "he met a most appropriate end, being slain in the jungles by a tiger." Airwas is distant north of Bombay 350 miles. Lat. $22^{\circ} 31'$, long. $76^{\circ} 31'$.

AJEE, a river in Kattywar, rising in lat. $22^{\circ} 10'$, long. $70^{\circ} 52'$, and flowing in a north-westerly direction, falls into the Gulf of Cutch: the total length of its course is about sixty miles.

AJEETMAIL, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a town twenty-five miles south-east of Etawa. Supplies and water are abundant. Lat. $26^{\circ} 33'$, long. $79^{\circ} 23'$.

AJI, or **HADJEE.**—A river rising in the British district Ramgurh, about lat. $24^{\circ} 32'$, long. $86^{\circ} 10'$. It takes a course south-east for twenty-five miles through that district, and for six miles through Mongheer, and subsequently passes into the British district Beerbhoom, through which it continues in a southerly direction for sixty miles, when it takes a course east, which it continues to hold along the southern boundary for ninety miles, until it falls into the Bhagruttee, on the right side, at Cutwa, in lat. $23^{\circ} 39'$, long. $88^{\circ} 9'$. The upper part of its course lies through a tract rich in coal and iron. It is navigable for about ten weeks during the periodical rains of autumn; and advantage is taken of that favourable time to send down coal and iron to Calcutta. According to popular notion, "whatever man bathes in its waters thereby becomes unconquerable."

AJMERE.—The principal place of the British district of the same name, a city of great antiquity and celebrity. It is situate in a valley, or rather basin, which, though rocky, is very picturesque and beautiful, and surrounded by hills. On the base and lower slope of one of the hills the town is built. It is surrounded by a wall of stone. There are five lofty and strong gateways in a beautiful style of architecture, all on the north and west sides. The town contains several mosques and temples, built in a massive style of architecture. The houses of the wealthy are very spacious and well built, and some of the streets are wide and handsome; but the generality are narrow and greatly deficient in cleanliness, though in this respect the place has the advantage over the towns of native states; and on the whole the habitations of the poorer

classes are more commodious than ordinary. Beyond the city walls are the remains of an antique Jain temple, on the lower part of Taragurh, a mountain rising over the town on the north-east. South of the town is an extensive piece of artificial water, called the Ana-Sagar, formed by damming up some torrents by means of a bund 600 yards long by 100 yards broad. In the rainy season the circumference of the Ana-Sagar is upwards of six miles. Until within the last few years, unless the periodical rains were heavy, the lake was not invariably filled. In 1846, measures for increasing the supply were completed, by turning into the lake the stream from the Ajeipall hills; and no inconvenience has been subsequently experienced from the scarcity of water. The river Looni, the name implying "salt," has its origin in this lake; its stream is not, however, salt at its egress. The bund, or dyke, was constructed by Ana Deva, sovereign of Ajmere, probably about the close of the eleventh century. Visola Deva, who reigned about a century earlier, excavated the Beesla Talao, another artificial lake, situate a mile north-east of the former, and half a mile east of the city of Ajmere. The form is a regular oval, the bank of which, originally faced all round with stone, is two miles and a half in circumference. Beyond the city wall is the ruinous palace of Shah Jehan. Another, of Akbar, has been converted into an arsenal, the powder-magazine of which, amply stored, must, in the event of explosion, produce the most awful consequences to the town. Ajmere is the seat of a British political agency. The city, on account of the inclination of its site, has peculiar facilities for drainage, but the habits of the population defy the efforts for enforcing cleanliness made by the police, though active and vigilant. The jail, an old Mahomedan building, some hundred yards outside the town-wall, but in an airy and healthy situation, contains, it is said, on an average, 150 prisoners, generally of the predatory tribes: they are employed on the public works, but the result of their labour is trifling. The climate of the town and its environs, though in the end of spring and the beginning of summer very hot, is in general healthy. Small-pox sometimes prevails to a wide and fatal extent, its desolating effects being increased by the inattention of the people to cleanliness, and their neglect of vaccination. The hospital is a small building near the magazine, and has a central ward thirty feet by twenty. There is no recent return of the population of this town: in 1837 it was stated to be upwards of 23,000, and it is believed that the place has been progressively improving since it came under British rule, a course still in operation. Passing from legend to history, we find it recorded that the rajah of Ajmere confederated, in the year 1008, with those of Lahore, Oojein, Gwalior, Kalinjer, Kanowj, and Delhi, to repel the invasion of Mahmood of Ghuzni, by whom the allied army

was utterly routed. At the time of the Mussulman invasion in 1191, under Muhammed Shalabuddin, monarch of Ghoor, Prithwi Rao, who held the combined rule of Ajmere and of Delhi, was the most powerful sovereign of India. He, at the head of a vast army, met the invader near Thanessar, and overthrew him with great slaughter, Muhammed himself escaping from the field with much difficulty, and severely wounded. The Mussulman, however, subsequently renewing the invasion, with the advantages of greater experience, and an army better disciplined, was met by Prithwi Rao at Tirouri, near Thanessar, where a desperate battle took place, in which the Hindoos were routed with great loss, and their rajah, being made prisoner, was, it is said, put to death. The conqueror, following up his success, took the city of Ajmere, put numbers of the inhabitants to the sword, and enslaved the rest, assigning the devastated country to a relative of the overthrown rajah, under stipulation of a heavy tribute. Akbar acquired Ajmere, in 1559, without a battle, or any resistance, and under his territorial, fiscal, and military arrangements, the city became the principal place of a very extensive province of the same name, which, according to the Ayeen Akbery, included Mewar, or the present state of Oodeypore; Marwar, or the present state of Joudpore; and Haroti, including the present states of Boondes and Kota. On the dismemberment of the empire of Delhi, subsequent to the invasion of Ahmed Shah Durani, Ajmere shared in the confusion of the general struggle, and ultimately fell into the hands of the Maharrattas. In 1809, Doulut Rao Sindia conferred its government on the brother of Bappoo Sindia, and it became the head-quarters of plundering operations in Jeypore and Joudpore. In 1817, at the commencement of the war, a British force was ordered to Ajmere, and the town and territory were afterwards formally ceded to the East-India Company. Ajmere is distant from Bombay, N., by Mhow and Neemuch, 677 miles; from Delhi, S.W., by Numerabad, 258; from Calcutta, N.W., by Allahabad, 1,039. Lat. 26° 29', long. 74° 43'.

AJMERE.—A British district under the lieut.-gov. of the N.W. Provinces. It is bounded on the east by the Rajpoot states of Kishengurh and Jeypore; on the south by the territory of Mewar; on the west and north-west by British Malwara and Joudpore. It lies between lat. 25° 43'—26° 42', long. 74° 22'—75° 33'; is 80 miles in length from south-east to north-west, and 50 in breadth. The area is 2,029 square miles. The south-east part is in general sandy and rather level, yet not without inequalities in some places, forming irregular ranges of no great height or length. In the north, the north-west, and the west, are many hills and mountains, either connected with the great Aravulli range, or forming part of it. They are considered of primitive formation, and are schistose in the

greatest proportion, the strata lying obliquely, dipping from east to west. The summit, rising above the city of Ajmere, and having an estimated elevation of more than 1,000 feet above the valley at its base, or upwards of 3,000 feet above the sea, is probably the loftiest in that part of the range. The mountain of Taragurh contains lodes of carbonate of lead, worked from time immemorial by the natives. The demand for the article is, however, so small, that little if any profit is derived from the working. There are also ores of manganese in the same mountain, and indications of copper, besides some lodes of ore of that metal *in situ*. Iron ore is abundant, and yields a metal of good quality. The soil in many places is much impregnated with mineral salts, especially carbonate of soda. From this cause, the water of the Koree, the only river, cannot be used for drinking, or any alimentary purposes, except during the periodical rains, at which time only it becomes a wide stream. Rising in the territory of Mewar or Oodeypore, about lat. $25^{\circ} 32'$, long. $73^{\circ} 58'$, it takes a course generally east, flows along the southern boundary of the district for about thirty miles, and subsequently through it for the same distance, and joins the Banas on the eastern frontier. The other streams are mere rain-torrents, very full and impetuous in wet weather, but soon subsiding. The Looni, which falls into the Gulf of Cutch, may be said to have its origin in an artificial lake or tank called the Ana-Sagar. The stream, under the name of the Sagar-Mutti, flows first to the Besila Talao, another artificial piece of water. Thence it flows on, till at Govindghur it is joined by the Sarasvati from Poshkur, a third artificial lake, and at this confluence takes the name of Looni. There are no natural lakes in Ajmere, but tanks or artificial bodies of water abound. The principal are those just named; the Ana-Sagar and the Besila Talao, at the city of Ajmere, and the lake of Poshkur, three or four miles to the north-west of it. The general elevation of the plain of Ajmere has been estimated at 2,000 feet above the sea. The entire population, as returned by a recent census (1848), amounts to 224,891; something more than 110 to the square mile. Of the above number, 118,533 are returned as Hindoo agricultural; 79,070 as Hindoo non-agricultural; 7,172 Mahomedans and others not being Hindoos, agricultural; and 20,116 non-agricultural. The superintendent reports that the population was taken by native officers, and that it "may be considered as an approximation to the truth."

AJRA.—A town in the native state of Kolapore, under the administration and control of the presidency of Bombay; distant south from Kolapore forty miles. Lat. $16^{\circ} 8'$, long. $74^{\circ} 17'$.

AKAR.—A town in the territory of Nagpore, distant north from Konkeir forty miles. Lat. $20^{\circ} 50'$, long. $81^{\circ} 32'$.

AKAYA.—A village situate on the left bank of the Kuladyne river, twenty miles west of the town of Arracan. Lat. $20^{\circ} 49'$, long. $93^{\circ} 7'$.

AKBARPOOR, in the British district of Mundlaiser, within the territory of Indore, a town on the route from Bombay to Indore, forty-three miles south-west of the latter. Lat. $22^{\circ} 8'$, long. $75^{\circ} 33'$.

AKBARPOOR, in the British district of Cawnpore, the principal place of the pergunnah of the same name, a town on the route from Cawnpore to Etawa, and twenty-eight miles west of the former; population 6,330. The road in this part of the route is rather good. Lat. $26^{\circ} 22'$, long. 80° .

AKBARPOOR, in the British district of Shahjahanpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to the cantonment of Futtelghur, and forty-two miles south-east of the former. The road in this part of the route is rather good, the country open, level, and cultivated. Lat. $27^{\circ} 48'$, long. $79^{\circ} 43'$.

AKBERPOOR, in the district of Aldemau, territory of Oude, a village situate on the river Tons (eastern), thirty-five miles south-east of Faizabad, 105 south-east of Lucknow. Butcher estimates the population at 1,000, of whom two-thirds are Mussulmans, most of them weavers. Lat. $26^{\circ} 28'$, long. $82^{\circ} 35'$.

AKBURABAD, in the native state of Rampoor, lieutenant-gov. of the N.W. Provinces, a town on the north-eastern route from the town of Rampoor to Nugina, and twenty miles north of the former. Lat. $29^{\circ} 5'$, long. $79^{\circ} 4'$.

AKBURABAD, in the British district of Allypore, lieutenant-gov. of the N.W. Provinces, a town on the route from Allahabad to Coel, twelve miles south-east of the latter. Lat. $27^{\circ} 48'$, long. $78^{\circ} 21'$.

AKBURPOOR, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a village at the eastern base of a rocky range of hills of sandstone formation, largely intermixed with quartz. Distance south from Delhi 56 miles. Lat. $27^{\circ} 52'$, long. $77^{\circ} 10'$.

AKBURPOOR, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from Muttra cantonment to Delhi, and sixteen miles north-west of the former. The road in this part of the route is rather heavy. Lat. $27^{\circ} 39'$, long. $77^{\circ} 37'$.

AKDIRAH, in the Rajpoot state of Joudpore, on the route from Nusserabad to Deesa, and 141 miles south-west of the former. The surrounding country is gravelly, and though occasionally diversified with a few small hills, is in general level. The road in this part of the route is firm and good. Lat. $25^{\circ} 23'$, long. $73^{\circ} 17'$.

AKHA.—A tribe inhabiting the mountainous country situated on the northern boundary of Assam, and the eastern boundary

of Bhotan. The centre of the tract is about lat. $27^{\circ} 10'$, long. $52^{\circ} 40'$.

AKHUNDI, in the Rajpoot state of Joudpore, a village on the route from Balmer to the city of Joudpore, and fifty-two miles east of the former. It is situate six miles north of the right bank of the river Loni, in a low swampy country, liable to be laid under water by the inundation of that river during the rainy season, when the road becomes deep and difficult. Lat. $25^{\circ} 59'$, long. $72^{\circ} 14'$.

AKKAWARRUM.—A town in Hyderabad, or dominions of the Nizam. Distant east from Hyderabad 59 miles. Lat. $17^{\circ} 15'$, long. $79^{\circ} 26'$.

AKKERI.—See **EKKAIREE**.

AKLI, in the Rajpoot state of Joudpore, a village on the route from Pokburn to Balmer, and twenty-six miles north of the latter place. The road in this part of the route is good, being over a plain, though barren, country. Lat. $26^{\circ} 4'$, long. $71^{\circ} 24'$.

AKLONEE.—A town in the native state of Gwalior, or possessions of Scindia, distant south-east from Agra fifty miles. Lat. $26^{\circ} 35'$, long. $78^{\circ} 37'$.

AKLOOJ, in the British territory of Sattara, presidency of Bombay, a town on the right bank of the Neera river, seventy miles east of Sattara. Lat. $17^{\circ} 52'$, long. $75^{\circ} 5'$.

AKNUR, in the Northern Punjab (territory of Gholab Singh), is situate on the banks of the Chenaub, here a very large river. At the beginning of August, when largest, it was found by Broome and Cunningham to have seven channels, the broadest 920 yards wide, some of the others breast-deep, and all having very rapid streams. The Chenaub is navigable downwards from a point a short distance above Aknur to the sea. The town, though mostly in ruins, has a very fine and picturesque appearance when viewed from without, the remains of the old palace being strikingly contrasted with the buildings of the new fort. Here is a ferry over the river. Aknur is situated at the base of the lowest or most southern range of the Himalaya, where it first rises above the plain of the Punjab. Lat. $32^{\circ} 50'$, long. $74^{\circ} 50'$.

AKOAT.—A town in Hyderabad, or dominions of the Nizam, situate in one of the recently-sequestered provinces of the kingdom. Distant west from Ellichpore thirty-two miles. Lat. $21^{\circ} 3'$, long. $77^{\circ} 9'$.

AKOLAH.—A town in Hyderabad, or dominions of the Nizam, distant north from Jaulnah twenty miles. Lat. $20^{\circ} 6'$, long. $76^{\circ} 2'$.

AKORAH, in the British district of Peshawar, one of the divisions of the Punjab, a town situated on the right bank of the Kabool river, a tributary to the Indus, and on the route from Attock to Peshawar, twelve miles north-west of the former. Lat. 34° , long. $72^{\circ} 10'$.

AKOREE, in Bundelcund, in the British territory of Jalon, a small town on the route from Calpee to Jhansi, thirty-five miles south-west of the former. It has water and supplies in abundance. Lat. $25^{\circ} 57'$, long. $79^{\circ} 20'$.

AKOUNAH.—A town in the territory of Oude, distant north from Oude fifty miles. Lat. $27^{\circ} 29'$, long. 82° .

AKOWLAH, in Hyderabad, or the territory of the Nizam, a town in one of the recently ceded districts, on the route from Nagpore to Aurungabad, 142 miles south-west of former, 122 north-east of latter. It is a considerable place, with high and handsome walls, and the numerous ruins contiguous to it indicate that it must have formerly been much more considerable. Distance from Hyderabad, north-west, 250 miles; from Bombay, north-east, 300. Lat. $20^{\circ} 40'$, long. $77^{\circ} 2'$.

AKRA.—A town in the Damian division of the Punjab: it is situated on the left bank of the small river Gombela, a tributary of the Indus, fifty-seven miles north from Dera Ismael Khan. Lat. $32^{\circ} 36'$, long. $70^{\circ} 33'$.

AKRAUNEE PERGUNNAH.—A tract of British territory under the presidency of Bombay, situate between the two branches of the Satpoora mountains, bounded on the north by the Nerbudda; on the east by the Burwani state and Torun Mal; on the south by the Soottampore and Kookurmaoonda pergunnahs; and on the west by the state of Raj Peepla. It extends from lat. $21^{\circ} 39'$ to lat. $22^{\circ} 4'$, and from long. $73^{\circ} 48'$ to long. $74^{\circ} 30'$. It is about fifty miles in length from east to west, and about twenty at its greatest breadth.

AKULKOTE, within the political jurisdiction of the government of Bombay, a town, with annexed territory, in the southern Maharratta country, held in jaghire from the East-India Company by a petty chief styled rajah, who was formerly tributary to the rajah of Sattara. This prince is bound to furnish a contingent of cavalry to the British government. A proposal made by the latter to commute the obligation for a pecuniary payment has been met by a refusal on the part of the rajah. Distant from Bombay, S.E., 250 miles. Lat. $17^{\circ} 30'$, long. $76^{\circ} 16'$.

AKYAB, or **ARRACAN PROPER**.—A district of Arracan, bounded on the north by Chittagong, on the west by the Bay of Bengal, on the east by the Yoomadounng mountains, and on the south by the island of Ramree and numerous creeks and estuaries. It lies between lat. 20° — $21^{\circ} 33'$, long. $92^{\circ} 12'$ — 94° . Its area is about 6,000 miles, and it is the largest of the three provinces of Arracan. It is in general flat, but along the sea-shore some low ridges of hills run parallel with the sea, and to the north and east its boundary is formed by high ranges, over which are several passes to Chittagong and Ava. The valley, which constitutes the principal part of the

province, is intersected by numerous streams and tide nullahs, besides the larger rivers Myoo, Coladyne, and Lemyo, which run through it, and in the rainy season completely inundate the neighbouring country, and insulate the villages in their vicinity. The soil is peculiarly adapted for the cultivation of rice, which is carried to a greater extent here than in any other district in Arracan. The numerous streams and nullahs which intersect the valley are by artificial means turned to the purposes of irrigation. The population of the district amounts, it is stated, to about 177,585.

AKYAB.—The chief town of the district of the same name, as well as the whole province of Arracan. It was formerly called Tset-tse, and is still known by that name among the Mugh inhabitants. The designation of Akyab was derived, Lieutenant Phayre supposes, from a pagoda situate near this spot, which was called Akhyab-dau-kun (royal jawbone hillock), from a jawbone of Gautama's being buried there. It is situate on the eastern side of the island of Akyab, which is at the south-western extremity of the district, and at the mouth of the Coladyne or Kuladyne river. The island is separated from the mainland by the Roozeekees creek, which connects the river Kuladyne with Tekmyoo. It is of late years only that this town has been at all flourishing, for previously to the Burmese war it was a paltry village, consisting only of a few ill-constructed bamboo huts. It is now the most important town in the province, certainly in a commercial point of view, though, as a military station, it is superseded by Khyoak Phyo. The houses are well built and more substantial than the generality of Mugh residences, and the streets, which are broad and regular, are built at right angles to one another. Further improvements are in progress. There is a plentiful supply of all kinds of grain in the shops; and articles for clothing, cutlery, glass, are imported from Bengal, and exposed for sale. Its situation is extremely well suited for a commercial town, and it is to this circumstance, probably, that its present prosperity is owing. Being placed at the entrance of the chief river of the province, which has an uninterrupted inland navigation, and near a fertile country, where much grain is produced, and having a good harbour, it possesses every facility for carrying on an export and import trade, which it in consequence possesses to a considerable extent. Lighthouses and other works, projected for the benefit of navigation and commerce, have been erected in the vicinity of the town. The climate of this town is considered as healthy as Khyoak Phyo or Sandoway. The population amounts to about 5,000 souls. Lat. 20° 10', long. 92° 54'.

ALADIN ISLANDS.—A cluster of islands to the south-west of the Tenasserim provinces, about thirty-four miles distant from the mainland of Siam. Lat. 9° 40', long. 98° 8'.

ALAKANANDA.—See ALUKUNDA.

ALAMBARAJ, ALLEMBADDY, or AL-LUMKADDY, in the British district Coimbatore, presidency of Madras, a town on the right bank of the river Cauvery. In the history of Mysore it is mentioned as a place of importance in 1624; and in the ill-planned British campaign of 1768 it was occupied by a small British garrison, which was dispossessed by the troops of Hyder Ali. Distance from Seringapatam, east, sixty-five miles; from Madras, south-west, 185. Lat. 12° 9', long. 77° 49'.

ALAMPOOR, in the Rajpoot state of Jeypore, a decayed town on the old route from Agra to Mow, 141 miles south-west of former, 274 north-east of latter. In consequence of the distractions and devastations in this part of India during the latter part of the last and the early part of the present century, most of the inhabitants deserted this town, and took refuge in the neighbouring stronghold of Naushahur or Madhupur. Water is obtainable here from numerous wells; but supplies must be collected from the neighbourhood. Lat. 25° 57', long. 76° 25'.

ALAPOOR, in the British district of Goorgaon, lieut. gov. of the N.W. Provinces, a village on the route from Delhi to Muttra, and thirty-eight miles south of the former. The road in this part of the route is good. Lat. 28° 16', long. 77° 7'.

ALATPOOR, in the British district of Mynpooree, lieut. gov. of the N.W. Provinces, a village on the route from the city of Agra to the cantonment of Mynpooree, and eighteen miles west of the latter. The road in this part of the route is laid under water to the depth of from one to three feet during the periodical rains in the latter part of summer; at other times it is tolerably good: the country is level, and partially cultivated. Lat. 27° 10', long. 78° 50'.

ALAYGYAN PASS.—A pass over the Youmadoug mountains, leading from Sandoway, in the British district of Arracan, to the town of Promé, in the British territory of Pegu. The crown of the pass is about eleven miles north-east from Sandoway. Lat. 18° 31', long. 94° 39'.

ALBAK.—A town in Hyderabad, or dominions of the Nizam, distant north-west from Rajahmundry 110 miles. Lat. 18° 10', long. 80° 47'.

ALDEMAU, in the territory of Oude, a district denominated from the village of that name. It is bounded on the north-west by the district Pachamrat; on the north-east by the river Ghogra, separating it from the British district Goruckpoor; on the south-east by the British district Azimgurh; and on the west by Sultanpoor. It lies between lat. 26°—26° 40', long. 82° 15'—83° 6'.

ALDEMAU, in the territory of Oude, an ancient village whence is denominated the

district of the same name. It is situate four miles from the right bank of the river Ghogra. Close to it is a small mud fort, mounted with two cannon, the station of the local officer of police. There are many shops for cloth and other merchandise kept by Hindoo traders. Butter estimates the population at 400, of whom 300 are Mussulmans. Distant fifty miles S.E. from Faizabad; 120 E. from Lucknow; thirty-five N.W. from Azimgurh. Lat. 26° 27', long. 82° 55'.

ALEEPOOR, in the British district of Delhi, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Delhi to Karnal. It is situate on the Delhi Canal, from which it is supplied with water. There is a police-station here. The road in this part of the route is good in dry weather, and supplies for troops may be obtained in abundance on due notice. Lat. 28° 48', long. 77° 12'.

ALEPPI.—See **AULAFOLAT**.

ALI BAUG, in the British district of Tannah, presidency of Bombay, a town on the sea-coast, nineteen miles south of Bombay. Lat. 18° 40', long. 72° 58'.

ALI BUNDER, in Sindé, a small town on the Gonnee, one of the offsets of the Indus to the east. Here is a dam made in 1799 by Futteh Ali, one of the ameers of Sindé. This, according to Pottinger, was "the only work of public utility ever made by one of the reigning family," being intended to retain the water of the river for the purposes of irrigation, and to exclude the salt-water, which, sent upwards by the tide, rendered sterile the surrounding country. This barrier had the natural consequence of causing in the channel of the Gonnee a deposit of alluvial matter, which is gradually filling it; so that, though formerly navigable throughout the year, this branch of the Indus had in 1809 become so shallow, that boats could ply only during four months of the inundation between Ali Bunder and Hyderabad. The channel below Ali Bunder has also become nearly obliterated, though formerly by far the greatest estuary of the Indus. The contiguous part of Cutch also suffered the most disastrous consequences from the water being cut off; the district of Sayra, formerly remarkable for fertility, ceasing to yield a blade of vegetation, and becoming part of the Runn, or Great Salt Desert, on which it bordered. Ali Bunder is in lat. 24° 22', long. 69° 11'.

ALIGANJ, or **SEWAN ALIGANJ**, in the British district of Sarun, lieut.-gov. of Bengal, a town on the route from Dinapore to Goruckpore, fifty-four miles N.W. of former, seventy-four S.E. of latter. It has a good bazaar, and water and supplies are abundant. It is stated that the population are principally Mussulmans. Lat. 26° 8', long. 84° 24'.

ALIGANJ, in the district of Sultanpore, territory of Oude, a village twelve miles north-

west of the cantonment of Sultanpore, seventy south-east of Lucknow. Butter estimates its population at only 100, all Hindoos; yet adds, "there is a bazaar of sixty shops, and a market, attended by between 300 and 400 shopkeepers." Lat. 26° 24', long. 82°.

ALIGUNJ.—A town in the territory of Oude, distant north from Lucknow ninety-one miles. Lat. 28° 9', long. 80° 40'.

ALIPOORA, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 766 miles north-west of Calcutta by the river route, forty-two miles south-east of Allahabad by the same. Lat. 25° 12', long. 82° 14'.

ALIPORA.—See **ALLYPOORA**.

ALIPORE.—A town in British district of the Twenty-four Pergunnahs, lieut.-gov. of Bengal, on the route from Fort William to Fulta, by Tolly's Nullah, four miles south-east of Fort William, twenty-one north-west of Fulta. The official residence of the lieut.-governor of Bengal has been fixed in this town. Heber describes it as a large village, in the vicinity of which are several houses belonging to Europeans, and considered remarkably healthy and dry. In this town is situate the great jail of Alipore, built in 1810, at a cost of 10,000*l.*, exclusive of the labour of the prisoners employed upon the work. Convicts sentenced to long periods of imprisonment in Bengal are usually confined in this jail. The number of prisoners in 1848 amounted to 991. Lat. 22° 30', long. 88° 27'.

ALI WAL.—A village near the left bank of the Sutlej, and within a short distance of the town of Loodianah. It is within the tract of country subject to the commissioner and superintendent of the Cis-Sutlej territories. Here, on the 28th January, 1846, Sir Harry Smith attacked, defeated, and drove back a large body of Sikhs, which had crossed the Sutlej from Philour, on its right bank, and threatened Loodianah. The movements of the officer commanding in this action were marked by the most consummate tact and judgment, and the object of them was completely accomplished. Lat. 30° 57', long. 75° 36'.

ALLAHABAD.—A British district under the lieut.-gov. of the N.W. Provinces, named from its principal place. It is bounded on the north by the territory of Oude; on the east by the British districts Jounpore and Mirzapore; on the south-west by the territory of Rewah and the British district of Banda; and on the west by the British district of Futehpore. It lies between lat. 24° 49'—25° 44', long. 81° 14'—82° 26'; is eighty-five miles in length from south-east to north-west, and fifty in breadth. The area is 2,788 square miles. Four of the subdivisions called pergunnahs, amounting to about a third of the district, are comprised within the Doab, extending upwards from its south-eastern angle, marked by the confluence of the Jumna and Ganges. The general slope

of the surface is to the south-east, as evidenced by the descent of the Ganges and of the smaller streams in the same direction. There is, besides, a declivity from the south-west to the north-east, indicated by the descent in that direction of the Jumna and Tons, discharging themselves into the Ganges, the bed of which is the channel of drainage for the whole district. The elevation above the sea of the average water-mark at the confluence of the Jumna and Ganges, is about 340 feet. The plain of the Doab is estimated to be in this part about sixty feet higher, or 400 feet above the sea; and probably no part of the district within the rivers has an elevation of 500 feet. The part stretching along the left bank of the Ganges has doubtless a less elevation, in consequence of the general slope of the surface to the south-east. The country to the right of the same river, and extending towards the rugged region of Rewah, must have some more elevated spots. The district is well furnished with the means of irrigation, as, in addition to those offered by watercourses and tanks, there are 60,000 wells, of which 9,000 are pukka, or lined with brick. The climate of this district is considered more moist than that of the adjacent tracts; rains are more frequent, and the hot winds thereby mitigated. The vegetation likewise is more luxuriant. The country is overspread with a vigorous growth of timber, and yields an abundant return to the cultivator of even the choicest products of the European garden. The British residents in the district are now making zealous and successful efforts for the improvement of agriculture. The best kinds of maize, cotton, and flax, have been introduced. Some dye-stuffs, besides indigo, are cultivated to considerable extent, especially kussum, or kusumtha (*Carthamus tinctorius*), or safflower, for yielding a bright orange or deep red colour. The most important articles of traffic are salt, cotton, indigo, and sugar. The population, according to the census of 1853, amounts to 1,379,788. A comparison with the area shows that the average number of persons to each square mile rather exceeds 490. The towns and villages, classified according to population, are as follow:—Number containing less than 1,000 inhabitants, 3,319; ditto more than 1,000, and less than 5,000, 238; ditto more than 5,000, 3. The East-Indian Railway traverses the district, which is also intersected by the great trunk road from Calcutta to the North-Western Provinces, proceeding through Benares, and thence north-westerly along the left bank of the Ganges to Allahabad, having previously crossed the river close to it. From Allahabad it proceeds still in a north-westerly direction nearly parallel to the Ganges, and at a short distance from its right bank crosses the north-western frontier of the district of Allahabad to Futtehpore. The earlier history of this province is involved in the obscurity which hangs over the history of India generally until

a comparatively recent period. In 1194 it was subjugated by the Patans under Mohamed Shahab-ud-deen, of Ghor, and wrested from that race by Baber about 1529. On the dismemberment of the empire of Delhi it became a field of contention, on which the emperor, the vizier of Oude, the English, and the Mah-rattas acted conspicuous parts. In the arrangements of the English with the emperor, a portion of this province was assigned for the support of the latter; but on that prince throwing himself into the hands of the Mah-rattas, the territory was regarded as having escheated, and was thereupon transferred to the vizier, from whom, under the treaty of 1801, it passed with other districts to the East-India Company.

ALLAHABAD, the principal place of the district of the same name, is situate at the south-eastern extremity of the Doab, on the tongue of land formed by the confluence of the Ganges and Jumna rivers, the latter of which is here crossed by the East-Indian Railway. The fort on the east and south rises directly from the banks of the confluent rivers, which render it nearly impregnable in that direction. It is about 2,500 yards in circuit, is built of red stone, and, according to Von Orlich, is now "a bastioned quinquangle; the ancient walls with semicircular bastions face the two streams; the land side is quite regular, and consists of two bastions, and a half-bastion with three ravelins," and stands higher than any ground in face of it. Heber observes, "It has been a very noble castle, but has suffered in its external appearance as much as it has probably gained in strength by the modernization which it has undergone from its present masters, its lofty towers being pruned down into bastions and cavaliers, and its high stone ramparts topped with turf parapets, and obscured by a green sloping glacis. It is still, however, a striking place; and its principal gate, surmounted by a dome with a wide hall beneath, surrounded by arcades and galleries, and ornamented with rude but glowing paintings, is the noblest entrance I ever saw to a place of arms." The exterior has been modernized in the Italian style, but the interior retains its antique and striking character. An ancient and spacious palace, overlooking the Jumna, has been fitted up for the residence of the superior officers; and the rest of the Europeans of the garrison are lodged in well-constructed barracks. The arsenal, situate in the fort, is one of the largest in India; it contains arms for 30,000 men, and thirty pieces of cannon. Altogether it is a place of great strength, probably impregnable to native powers, and requiring for its reduction a regular siege according to European tactics. It is said to have cost 1,750,000*l*. Among the finest structures of Allahabad, is that called the Serai of Khusr, the ill-fated son of Jehangir. It is a fine quadrangle surrounded by an embattled wall, along the inside of which are a series of

lodges for the gratuitous reception of travellers. Adjoining is a garden or pleasure-ground, containing some fine old mango-trees, and three mausoleums, in a rich, magnificent, yet solemn style of architecture. Heber states that they were raised over two princes and a princess of the imperial family, but does not specify their names. In the middle of the fort stands an antique stone column, popularly styled *Gada*, or Club of Bhim Sen, a hero who figures in the romantic legends of Hindostan. It is mentioned by Tieffenthaler as standing in his time; was pulled down during some alterations made in the fort in 1798, and has lately been replaced. The length is forty-two feet seven inches; the shape nearly cylindrical, yet slightly tapering, the lower diameter being three feet two and a quarter inches; the upper, two feet two inches. It bears two Sanskrit inscriptions of considerable length, and obviously of remote antiquity; but notwithstanding the endeavours of Prinsep, Troyer, and Mill, no certain conclusion can be drawn as to their date. The present town of Allahabad is situate principally west of the fort, and extending along the Jumna. Its position is advantageous, but it is, nevertheless, an ill-built, poverty-stricken place. Heber observes, "The city of Allahabad is small, with very poor houses and narrow irregular streets, and confined to the banks of the Jumna." The Jumna Masjid, or great mosque, is a solid, stately building, but without much ornament. It is advantageously situate on the banks of the Jumna, and on one side adjoins the city, on the other an esplanade before the glacis of the fort. After the conquest of the province by the East-India Company, it was fitted up as a residence of the general of the station; subsequently, to the purposes of an assembly-room; and ultimately restored to its former destination. The Mussulmans, however, regarding it as polluted, displayed a contemptuous indifference on the subject. Below the fort is a subterraneous temple, entered by a long passage sloping downwards. Its shape is square, and the roof supported by pillars; in the middle is a linga or phallic emblem, and at one end a dead forked tree, continually watered with great care by the attendant priests, who maintain that it still retains its sap and vitality; but Tieffenthaler describes it as leafless in his time, a century ago. The place is a close, loathsome den, rendered more hideous by obscene and monstrous figures of Mahadeva, Ganesh, and other objects of worship; and is damp from water trickling from its rocky walls. This insignificant moisture is alleged by the superstitious to be the outlet of the river Sarasvati, which is lost in the sands near Thanesur, in Sirhind, upwards of 400 miles to the north-west. Wilford observes: "The confluence of the Ganga and Yamuna [Ganges and Jumna] at Prayaga is called Triveni by the Pauranics, because three rivers are supposed to meet there; but the third is by no means obvious to the sight. It is the famous

Sarasvati, which comes out of the hills to the west of the Yamuna, passes close to Thanesur, loses itself in the great sandy desert, and reappears at Prayag, humbly cooing from one of the towers of the fort, as if ashamed of herself. Indeed she may blush at her own imprudence, for she is the goddess of learning and knowledge, and was then coming down the country with a book in her hand, when she entered the sandy desert, and was unexpectedly assailed by numerous demons with frightful countenances, making a dreadful noise. Ashamed of her own want of forethought, she sank into the ground, and reappeared at Prayaga or Allahabad." Close to the wall of the fort, outside this revered cavern, is the actual confluence of the Jumna and Ganges, visited by great numbers of pilgrims of both sexes, anxious to bathe in the purifying waters. Formerly it was not uncommon for devotees of either sex to cause earthen vessels to be fastened round their waists or to their feet, and having proceeded in a boat to the middle of the stream, then precipitate themselves, to rise no more, supposing that by this self-immolation they secured eternal bliss. At present the meetings here appear to have abated somewhat of their more gloomy and murderous character. According to the description of Skinner, who visited the place on the 14th of December, 1826, "it was a religious fair, and took place on the very spot of the confluence of the two streams. There did not seem to me to be anything sold; bathing and praying were the great occupations. A great number of platforms, about eight or ten feet square, with long legs to them, stood in the water; they had canopies above them, and were as booths in English fairs, for in them people frequently sat as if to rest themselves after having waded through the river to reach them. The Brahmans, however, seemed to be the peculiar masters of each, for they never moved from their seats; but occupying the centre, with their rosaries in their hands, remained at their posts to administer to the spiritual wants of those who visited them. It was a very pretty scene; the women had their holiday clothes on, and shone in rosy scarfs among the crowd." The military cantonment is on the north-west side of the fort, in a delightful situation, having some picturesque variety of surface, and being finely wooded. This town is the seat of the civil establishment for the district of Allahabad, which consists of the usual functionaries, European and native. The population of the city and suburbs, according to the census of 1853, amounts to 72,098. There is reason to conclude that the prosperity of the place is on the advance, in part, probably, from the growing importance of the North-West Provinces, and partly from the introduction of steam-navigation on the Upper Ganges. In 1839 a grant from government of 5,000 rupees was sanctioned to aid in the erection of a church, the remaining funds to be supplied by private subscription.

Some have on very slender grounds maintained this place to be the Palibothra of Greek and Roman geographers, but the best authorities consider that city identical with Patna. Probably the first authentic mention of it is by Baber, who styles it *Piag*. The fort was built by Akber, who changed the name of the city to Allahabad. On the dismemberment of the empire of Delhi, it was seized in 1753 by Saifur Jang, the visier of Oude. It had three years previously (1750) been sacked by the Patans of Furruckabad. In 1765 it was taken by the British, and assigned as the residence of Shah Alum, the titular emperor of Delhi, who was, however, so infatuated as to leave this place of refuge in 1771. In consequence it was resumed by the donors, and transferred to the nawaub of Oude by the treaty of 1773. In 1801 it was ceded by the nawaub to the East-India Company. So completely was it ruined, either by violence or gradual decay, that Hodges, who visited it in 1782, describes it as consisting merely of thatched huts, with scarcely a vestige of any considerable house remaining. Its desolation, as well as the great number of fakirs, or mendicants under religious garb, who resort to it, caused it to be called *Fakirabad*. Elevation above the sea about 340 feet. Distance N.W. from Calcutta by land 496 miles; in the same direction from Benares, 75; S.E. from Lucknow, 128; in similar direction from Cawnpore, 124; from Calpee, 153; from Agra *via* Etawa, 288, or by grand trunk road, 302; from Delhi, 391. Lat. 25° 26', long. 81° 55'.

ALLAPOOR, in the British district of Budaon, lieut.-gov. of the N.W. Provinces, a town on the route from Shahabad to Budaon, ten miles south-east of the latter. Lat. 27° 55', long. 79° 20'.

ALLATORI, in the British district of Trichinopoly, presidency of Madras, a town on the route from Trichinopoly to Seringapatam, eight miles west of the former. Lat. 10° 49', long. 78° 39'.

ALLEEGUNJE, in the British district of Purneah, lieut.-gov. of Bengal, a town on the right bank of the river Ronkee, forty miles north of Purneah. Lat. 26° 19', long. 87° 48'.

ALLEE MOHUN, **ALLEERAJPOOR**, or **RAJPOOR ALI**.—A small district in Malwa, under the political superintendence of the Governor-General's resident at Indore. It lies between lat. 22° 2' and 22° 30', long. 74° 16' and 74° 44', and extends from north to south about thirty-four miles; its extreme breadth from east to west being about thirty-two. Its area is 708 square miles. The political connection between the British government and Allee Mohun commenced by the interposition of the former, for the purposes of rendering less humiliating the nature of the rajah's dependence on the neighbouring state of Dhar. Allee Mohun was an ancient tributary of the rulers of Dhar, and the tribute had been commuted by a cession of certain customs-duties

which were collected by the officers of the Dhar state. The authority thus exercised in Allee Mohun by the servants of a foreign government was not only attended with considerable inconvenience, but was calculated to lessen the dignity of the rajah in the estimation of his own subjects; and, at his request, an arrangement was made in 1821, under which the Dhar state transferred to the British government its right to the Allee Mohun tribute, in consideration of an equivalent, and the rajah of Allee Mohun agreed to collect the duties, and to pay to the British government an annual sum, which amounts to 12,000 rupees. The rajah is a Hindoo. The population was estimated by Malcolm at 69,384. The revenue appears to have fluctuated within thirty years, according to the management. The latest account gives it at 35,000 rupees, or 3,500*l*. The military establishment consists but of thirty horsemen and 100 sebundies.

ALLEE MOHUN.—A town in Malwa, the chief place of the petty district of the same name, but not the place of residence of the present rajah, who has fixed his abode at Rajpoor. Lat. 22° 12', long. 74° 24'.

ALLEH, in the British district of Poonah, presidency of Bombay, a town on the left bank of the Kokree river, fifty miles north of Poonah. Lat. 19° 11', long. 74° 5'.

ALLEHGUNJ, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a town on the left bank of the Ramgunga river, eleven miles N.E. of Furruckabad. Allehgunj contains 5,383 inhabitants. Lat. 27° 33', long. 79° 45'.

ALLEMBADY.—See **ALAMBARAI**.

ALLIGAUM.—A town situate on the left bank of the river Bheema, in the British district of Ahmednuggur, presidency of Bombay. Soon after the acquisition of the Deccan by the British, it was observed that the horses of the south of India were rapidly declining in respect to the qualities constituting the perfection of the animal. In the hope of restoring the former character of the Deccan breed, a government stud was established in this place in 1827; but though some good specimens were occasionally turned out, the majority proved greatly inferior to the horses imported from the Persian Gulf and the Cape. The establishment was nevertheless maintained for a series of years. Additional experience, however, resulted only in continued disappointment, and at length, in 1842, all hope of ultimate success being then abandoned, the stud was ordered to be abolished. Distant east from Poonah thirty-two miles. Lat. 18° 35', long. 74° 23'.

ALLIGAUM, in Hyderabad, or territory of the Nizam, a town near the northern frontier, towards the British district Saugor and Nerbudda, on the northern declivity of the range of mountains bounding the valley of the Taptee on the south. Distance

from Ellichpoor, south-west, 71 miles; Aurnagabad, north-east, 100. Lat. 20° 24', long. 76° 53'.

ALLIPOOR.—A town in the territory of Nagpore, distant south-west from Nagpore 50 miles. Lat. 20° 33', long. 78° 44'.

ALLIYARKA TANDA, in the British district of Hyderabad, province of Scinde, a town on the route from Hyderabad to Oomerkote. It is situate at the intersection of the two great routes from Hyderabad eastward, and from Cutch to Upper Scinde and the Punjab. It has some manufactures, principally in cotton and dyeing. Population 5,000. Lat. 25° 27', long. 68° 48'.

ALLOOR.—A town in the territory of Nagpore, distant south-east from Nagpore 170 miles. Lat. 19° 49', long. 81° 20'.

ALLOOR.—A town in Hyderabad, or dominions of the Nizam, distant west from Hyderabad 29 miles. Lat. 17° 20', long. 78° 8'.

ALLOWALLEEA.—A title belonging to certain Seik chiefs, whose possessions on the left bank of the Sutlej were confiscated by the British government in 1843, in consequence of the non-performance of their feudatory obligations during the Lahore war.

ALLUMPOOR, in the British district of Midnapoor, lieutenant-gov. of Bengal, a town 30 miles north-west of Midnapoor. Lat. 22° 30', long. 86° 57'.

ALLYGUNJ.—See **ULLEGUNJE.**

ALLYGURH.—A British district under the lieutenant-gov. of the N.W. Provinces. It is bounded on the north by the British district Bolundshuhur; on the east by the British districts of Budaon and Mynpooree; on the south by the British districts of Mynpooree and Muttra; and on the west by the British districts Muttra and Goorgaon. It lies between lat. 27° 27'—28° 11', long. 77° 32'—78° 47', and embraces an area of 2,149 square miles. Like the rest of the Doab between the Jumna and the Ganges, this district is generally level; but there is a prolonged elevation of surface in the centre, between the two great rivers. The crest of this elevation slopes to the south-east, as indicated by the respective amounts of altitude on the course of the Ganges Canal, which is laid down along the ridge with a view to diffusing more effectually the benefits of irrigation on each side of it. The staple alimentary crops are wheat, barley, millet, and pulse: rice is little cultivated. The chief commercial crops are indigo, cotton, tobacco, and sugar. The population, according to the census of 1853, amounts to 1,134,565. The following classification of the towns and villages of the district is obtained from the official statement prepared in 1853.—Number containing less than 1,000 inhabitants, 1,747; ditto more than 1,000 and less than 5,000, 214; ditto more than 5,000 and less than 10,000, 8; ditto more than 10,000

and less than 50,000, 3; ditto more than 50,000, 1.

At the commencement of the present century this territory was the principal seat of the short-lived power of the French adventurer Perron. Perron's force being either dispersed or destroyed in the campaign of 1803 (principally by the events of the siege of Allyghur and the battle of Delhi), its leader surrendered to the British. In 1804 the district suffered from the devastating incursion of Holkar, the Mahratta chief, who was, however, severely chastised, suffering the loss of his host of cavalry, which was surprised and cut to pieces by the British, under General Lake, at Furruckabad. An incursion, made in the next year by Ameer Khan the Patan, had nearly a similar result; that freebooter losing nearly all his followers, and himself escaping with difficulty across the Jumna. The widely-spread dangers which threatened the British power in India at the commencement of the Pindarree and Mahratta war, in 1817, encouraged, among others, the chief of Hatrass, in this district, to revolt; but a vigorous bombardment of a few hours so shattered the place, that after a great number of its defenders were destroyed, a part of the survivors took to flight, and the rest surrendered the fortress, which was immediately dismantled. A complete pacification of the district speedily ensued.

ALLYGURH.—A fort in the British district of the same name, situate near the route from Agra to Delhi, and fifty-five miles north of the former place. The vicinity is interspersed with marshes and shallow pieces of water, which become so much swollen during the rains as to have rendered the place inaccessible, and consequently secure from attack, at that season. The outline of the works at the time of the capture by the British was a polygon, of probably ten sides, having at each angle a bastion, with a renny or fausse-braye, well provided with cannon. Outside this line of defence was a ditch, above 100 feet wide, thirty feet deep from the top of the excavation, and having ten feet of water. Across this ditch was no passage but by a narrow causeway, defended by a traverse, mounted with three six-pounders. Perron, the French adventurer, who held the fort with a Mahratta force, made demonstrations, at the head of about 20,000 men, of an intention to give battle under its walls; but after a brief and weak resistance, fled to Agra. At daylight on the 4th September, 1803, the British storming party took the traverse before its guns could be discharged, and hurrying forward a twelve-pounder, blew in the first gate, being exposed during this operation to destructive fire; and here the assailants sustained their chief loss. The inner gates were subsequently blown in; and entrance having been finally made by forcing the wicket of another, the ramparts were mounted, and the place taken possession

of after a vigorous defence of an hour, during which fifty-nine of the assailants were killed (including six officers), and 206 wounded. Above 2,000 of the garrison fell, and many more, who had swum the ditch, were destroyed by the British cavalry, in attempting to fly across the country. A medal, commemorative of the storming of the fort, was struck in London in the year 1851, and presented, under the sanction of the Queen, to the surviving officers and soldiers who took part in its capture. The civil and fiscal establishments, as well as the military cantonment and bazaar, are located towards Coel, a short distance south of the fort. In 1844 a proposal for converting the fort of Allyghur into a jail for 1,400 prisoners was sanctioned; but in 1847, in consequence of the alleged unhealthiness of the fort, arising as well from its construction as its position, it was determined to abandon the undertaking. Elevation above the sea 740 feet. Distance S.E. from Delhi 84 miles; N.W. from Calcutta 803. Lat. $27^{\circ} 56'$, long. $78^{\circ} 8'$.

ALLYPOOR, in the British district of Futtehpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from Cawnpore to the town of Futtehpoor, and six miles north-west of the latter. The road in this part of the route is good; the country level, and partially cultivated. Lat. $25^{\circ} 57'$, long. $80^{\circ} 50'$.

ALLYPOORA, or **ALIPORA**, in Bundelcund, a jaghire or feudal possession, named after its principal place. It lies between lat. $25^{\circ} 8'$ — $25^{\circ} 21'$, long. $79^{\circ} 14'$ — $79^{\circ} 24'$. It is bounded on the north by the British district Humerpoor; on the east and south by the lapsed state of Jeitpore; and on the west by the native state of Jhansee; and is estimated "to comprise an area of eighty-five square miles, and to contain twenty-eight villages, with a population of 9,000 souls." The revenue of the jaghire is estimated at 45,000 rupees (4,500*l.*), and the jaghiredar, or dewan as he is called, is stated to maintain a small force of seventy-five infantry. The grant was made in 1803 to the chief found by the British authorities in possession, and whose descendant now holds the jaghire.

ALLYPOORA, or **ALIPORA**, in Bundelcund, the principal place of the jaghire or feudal possession of that name, situate on the route from Gwalior to Chutterpore, 100 miles S.E. of the former, 24 N.W. of the latter. Lat. $25^{\circ} 10'$, long. $79^{\circ} 24'$.

ALLYPOOR PUTTEE, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a town on the route from Cawnpore to Coel, 76 miles south-east of the latter. Lat. $27^{\circ} 20'$, long. $79^{\circ} 18'$.

ALMACOOR, in the British district of Kurnool, presidency of Madras, a town on the route from Kurnool to Guntoor, 38 miles east of the former. Lat. $15^{\circ} 52'$, long. $78^{\circ} 40'$.

ALMELEH, in the British district of Shola-

poor, presidency of Bombay, a town situate five miles from the right bank of the river Beemah, forty-four miles south-east of Sholapoor. Lat. $17^{\circ} 5'$, long. $76^{\circ} 16'$.

ALMORA, the principal place of the British district of Kumaon, within the territories subject to the lieutenant-gov. of the N.W. Provinces, is situate on the crest of a ridge which runs from east to west, and consists principally of one street, three-quarters of a mile long, forming two bazaars, divided from each other by Fort Almora, and by the site of the ancient palace of the rajahs of Kumaon, now occupied by a jail. Detached houses, chiefly inhabited by Europeans and Brahmins, are scattered along each face of the mountain below the town. The houses have each a ground story of stone, and that part in the trading quarter of the town is occupied by a shop. The upper stories, of which there are sometimes two, are constructed of timber, and are covered with a sloping roof of heavy grey slate, on which small stacks of hay are sometimes piled for winter consumption. The stone-built story is generally whitewashed, and tricked out with grotesque paintings. The main street, secured by a gate at each end, has a natural pavement of slate-rock, and is kept in very neat order. At the western extremity, and immediately adjoining the town, are the lines of the regular troops, and in the rear of them the fortification called Fort Moira. The defence on the north-eastern side is a small martello tower called St. Mark's. There are several Hindoo temples, but none meriting particular notice. The Cutcherry, or public office of the district, is at Almora, but the houses of the civil officers are at Hawellagh, five miles north of it, and there the provincial battalion is stationed. This town, which had been fast decaying under the Goorkha sway, has much improved since it has become a British station. At Sittolee, close to Almora, was fought the battle which decided the fate of the war between the British and the Goorkhas. In advancing to the attack, the British had to cross by ford the river Kosila, flowing at the bottom of a deep ravine. Having accomplished the passage, the heights and town of Almora were successively carried in the most rapid and brilliant manner, and the result was the conclusion of a convention, by which the whole of the district of Kumaon was ceded to the British. Elevation above the sea, of Fort Moira, 5,520 feet; of the town, 5,337. Distance N.W. from Calcutta, by Lucknow and Bareilly, 910 miles. Lat. $29^{\circ} 35'$, long. $79^{\circ} 42'$.

ALOT.—A town of Malwa, in the native state of Dewas, distant north from Oojein thirty-two miles. Lat. $23^{\circ} 44'$, long. $75^{\circ} 34'$.

ALSIR, in the Rajpoot state of Bikaner, a small town situate about two miles north of the route from Ruttungurh to the town of Bikaner, and sixty-five miles east of the latter. Lat. $27^{\circ} 56'$, long. $74^{\circ} 24'$.

ALUKNUNDA.—A river in the territory of British Gurhwal, formed by the junction of two considerable streams; the Doulee, flowing from the north-east; the Vishnoo or Bishenganga, from the north-west. The confluence of those rivers is at Vishnooprag, in lat. $30^{\circ} 33'$, long. $79^{\circ} 38'$, where, at the end of May, when the mountain-streams are fullest, Raper found the Doulee to have a breadth of about thirty-five or forty yards, with a rapid current, and the Vishnoo a breadth of twenty-five or thirty yards, also with a rapid current. The elevation of the confluence above the sea is 4,743 feet. The Aluknunda, or united stream, flows south-westward for thirty-four miles to Kurnprag, where it on the left side receives the Pindur, a considerable river flowing from the east. From that confluence it flows westward sixteen miles to Roodurprag, where on the right side it receives the Mundagnee, another considerable river, having a direction from north to south, and coming from the celebrated fane of Kedarnath. It thence takes a direction south-westward for thirty miles, passing by Sireenuggur, the capital of Gurhwal, to Deoprag, where on the right side it is joined by the Bhageerettee; the stream from this confluence downwards being called the Ganges. The Bhageerettee rushes with great force and rapidly down a steep declivity, roaring and foaming over large rocks scattered over its bed. Its breadth is 112 feet, and it rises forty feet during the melting of the snow. The Aluknunda, flowing with a smooth unruffled surface, gently winds round the point of confluence. It is 142 feet in breadth, and rises forty-six feet at the same period. The breadth of the united stream is 240 feet. The Aluknunda abounds with fine fish, some of which, of the rohu (*Cyprinus denticulatus*) species, are four or five feet in length; another kind, called soher, a beautiful and finely-flavoured fish, attains the length of six or seven feet. Gold in small quantities has been obtained by searching the sands of this river; but the remuneration resulting has been so scanty that the search is nearly discontinued.

ALUMKHAN, in the Daman division of the Punjab, a town situated on the right bank of the Indus, distant north-west from Mooltan forty-eight miles. Lat. $30^{\circ} 25'$, long. $70^{\circ} 49'$.

ALUMPARVA, in the British district of Chingleput, presidency of Madras, a town on the coast of Coromandel, thirty miles south of the town of Chingleput. Lat. $12^{\circ} 17'$, long. $80^{\circ} 6'$.

ALUMPOOR.—A town in Hyderabad, or dominions of the Nizam, situated on the left bank of the Toongabudra, distant east from Kurnool seven miles. Lat. $15^{\circ} 52'$, long. $78^{\circ} 11'$.

ALUNG.—A town in the Guicowar's possessions, in the peninsula of Kattywar, under the political management of the presidency of

Bombay, distant south from Gogo twenty miles. Lat. $21^{\circ} 23'$, long. $72^{\circ} 9'$.

ALUNIAWAS, in the Rajpoot state of Joudpore, a village on the route from the town of Joudpore to that of Ajmeer, and twenty-two miles west of the latter. It has 600 houses, the inhabitants of which are of notoriously bad character. Lat. $26^{\circ} 32'$, long. $74^{\circ} 24'$.

ALVAR TINNEVELLY, in the British district of Tinnevely, presidency of Madras, a town on the right bank of the river Chindthoora, nineteen miles south east of Tinnevely. Lat. $8^{\circ} 36'$, long. 78° .

ALWUR, or **MACHERY.**—A Rajpoot state under the control of the Governor-General's agent for the states of Rajpootana. Tijarra included, it may be described as bounded on the north by the British district of Goorgaon and the native district of Kot Quasin; on the east by Goorgaon and the territory of Bhurtpore; on the south by the territory of Jeypore; on the west by the same territory and that of Jhujhur; and lies between lat. $27^{\circ} 4'$ — $28^{\circ} 13'$, long. $76^{\circ} 7'$ — $77^{\circ} 14'$. It is about eighty miles in length from north to south, and sixty-five in breadth. Its area is stated to be 3,573 square miles. The valley into which falls the principal drainage of this tract may, on satisfactory grounds, be taken to have an elevation of at least 900 feet above the sea. Alwur fort is 1,200 feet above the more depressed tracts, or more than 2,000 above the level of the sea. The hills for the most part form continuous ranges, inclosing valleys, or rather plains, of small extent, from which in many places insulated peaks and clusters of peaks rise abruptly, each suggesting by its sharp outline the notion of a tooth. Each of these eminences is usually surmounted by a small fort. The inhabitants, under the name of Mewatti, are described by Rennell as "most savage and brutal." Fraser, who about the year 1820 traversed the country through almost its whole length, and Jacquemont, who took nearly the same route in 1832, received no molestation, though the latter appears to have been rather discountenanced by the rajah, in accordance with his then usual conduct towards Europeans. The marked displeasure which the Governor-General and other British authorities have shown to the Rao Raja, in consequence of this ostentatiously-displayed aversion to the natives of Europe, appears to have produced an amendment in his conduct, as, in 1843, he acted with great politeness to Von Orlich, and cordially invited him to visit Alwur. The population of the Alwur state is computed at 280,000. The annual revenue of the Rao Raja is estimated by Colonel Sutherland at 180,000*l.*; but he has been constrained by the British government, with reference to an engagement concluded in 1826, to grant an annual allowance, and certain districts in Tijarra, to an illegitimate son of his uncle and predecessor. The grant, however, is under-

stood to have lapsed, on the failure of direct heirs on the part of the chief of Tijarra. Jacquemont, who saw a muster of the troops or followers of the Rao Raja, computed their number at 30,000: of these not more than a fourth had arms, such as they were, the best of them being muskets rejected from the British service as damaged. The men, generally natives of Oude, were ill paid, and in all respects badly treated. Never had he seen more wretched troops; and he adds, that a few hundred horsemen of Runjeet Singh would find no difficulty in putting them all to the sword. It is ascertained, however, from official documents, that the entire force of the rajah amounts to about 4,000 cavalry and 3,000 infantry, irrespective of sebandies employed for the purposes of police and the collection of the revenue. Of these there are about 8,000. The rajah is also stated to possess about 360 cannon (50 of them, however, unserviceable), and 500 camel-swivels. He is bound to assist the East-India Company with his entire force in the event of war.

The Mewattis played a prominent and important part in the time of the early Mahomedan kings of Delhi, making predatory inroads even to the gates of their capital, until the fearful chastisement inflicted, as already mentioned, by Gheias-ood-deen Bulbun, in 1265. Early in the fifteenth century they ventured again to brave the power of the sovereigns of Delhi, but, in 1429, they were subdued by Mobarik Shah. About 1720, the rajah of Amber, or Jeypore, taking advantage of the distracted state of the empire of Delhi, wrested from it several possessions, including Mewat, or the country of the Mewattis, of which the present state of Alwur, or Macherry, is part. Pertaub Singh, who held Macherry as a jaghire from the ruler of Jeypore, assisted Nujuf Khan, the ostensible commander-in-chief of the emperor of Delhi, to expel the Jauts from Agra in 1774, and on that event received an imperial sunnud, or grant, constituting him Rao Raja of Macherry, to be held directly from the crown, and independently of Jeypore. The Rao Raja soon after wrested the fort of Alwur, and some other places, from the rajah of Bhurtpore. Towards the close of the last century, nearly the whole territory was overrun by the Maharrattas, who conferred some parts of it on the well-known adventurer George Thomas, and employed him in enforcing their power over the rest. On the 1st November, 1803, this territory was the scene of a signal triumph of the British arms, the particulars of which will be found under the article Laswaree. On the conclusion of peace in 1803, Tijarra and some other districts were made over by the British government to the Rao Raja of Macherry, in consideration of services performed during the war, and a treaty concluded between him and the East-India Company. In the war with the Maharratta leader Holkar, the predatory attacks of the Mewattis caused some inconvenience

and loss to the army of Lord Lake. In spite of every precaution, they constantly succeeded in making booty of numbers of camels and horses, and murdering such men as ventured from the camps singly or in small parties. Still, notwithstanding the lawlessness of these people, the conduct of their rajah was considered so satisfactory to the British government, that, in 1805, it granted to him an additional territory out of that resumed from the rajah of Bhurtpore, in consequence of his treachery during the war with Holkar. In many instances, however, the Rao Rajas, though deeply indebted to the generosity of the British authorities, have shown little cordiality towards their benefactors, and occasionally energetic measures have been necessary to coerce or chastise them. The Rao Raja having, in 1808, made an embankment across the Mahnas Ny, or stream running by Laswaree, and thus prevented the water from flowing into the Bhurtpore territory, where it served extensive purposes of irrigation, the British government interfered, but the dispute, as already mentioned, was not finally settled till after the lapse of many years. In 1812, the Rao Raja commenced hostilities against the state of Jeypore, and seized two forts, with the territory belonging to them, though such aggression was in direct contravention of his treaty with the East-India Company; nor did he, when required, make restitution, until a British force advanced within a day's march of the capital, when he reluctantly yielded. In 1826, Lord Combermere marched against Alwur, in consequence of the refusal of that state to give up certain persons charged with an attempt to assassinate Ahmed Buksh Khan, the nawab of Feroz-pore; but the Rao Raja, by ultimate though somewhat tardy compliance, averted the danger with which he was threatened. In 1831, discovery was made of a negotiation by which the Rao Raja preposterously sought to become anew the vassal of the weak state of Jeypore, and soon after his refusal to redress some wrongs done to the nawab of Feroz-pore, was punished by the infliction of a fine by the British government.

ALWUR.—The capital of the Rajpoot state of that name, situate at the base of a rocky range of quartz and slate, and estimated by Fraser to rise 1,200 feet above the adjacent country. It is an ill-built town, of no great size, and is surrounded by a wretched mud wall, with gates defended by bastions. Within the inclosure are temples, erected by the Hindoo inhabitants, but in a style imitated from Mahomedan structures. The palace of Rao Raja, which is surrounded by a small garden, is of cubical shape, having its wall pierced with a great number of small windows, and covered with rude and glaring paintings, representing the fights of elephants, processions of the chief and his court, and scenes drawn from Hindoo mythology. On the summit of

the mountain is a fort, built in a very ornamental style, and serving as a retreat for the Rao Raja in the sultry season, and as a place of refuge in time of danger. The wall of the town, extending up the steep side of the mountain, incloses also the fort. At the foot of the mountain a very deep tank was excavated by the late Rao Raja, and near it he built a pavilion of white marble, of great size, and in a very elegant and highly finished style. Troops may obtain supplies and water in abundance here. Distance S.W. from Delhi, by Ferozpoore 110 miles, by Rewari 108; N.W. from Calcutta, *via* Muttra, Agra, Etawah, and Allahabad, 900 miles. Lat. 27° 34', long. 76° 40'.

ALYUNNOOR, in the British district of Madras, presidency of Madras, a town on the left bank of the river Goondar, twenty-two miles west of Ramnad. Lat. 9° 17', long. 78° 32'.

AMAIN, or **AMYNE**, in the territory of Gwalior, or possessions of Scindia's family, a town near the left bank of the river Sindh, forty miles E. of Gwalior fort, sixty-five W. of Calpee. Lat. 26° 20', long. 78° 52'.

AMAIT, in the Rajpoot state of Oodeypore or Mewar, a town on the route from Neemuch to Joudpore, ninety miles N.W. of former, 102 S.E. of latter. It is situate in a fine valley, nearly surrounded by hills; is walled, and has a good bazaar. Lat. 25° 15', long. 73° 58'.

AMALLAPOORUM, in the British district of Rajahmundry, presidency of Madras, a town in the delta of the Godavery river, twenty-four miles S.W. of Coringa. Lat. 16° 34', long. 82° 4'.

AMANIGANJ, in the district of Sultanpore, territory of Oude, a village on the route from Lucknow cantonment to Partabgarh, seventy miles south-east of the former, forty north-west of the latter. About 500 people frequent the market held here, and much cotton is purchased from traders, who bring it on bullocks or carts. Water is abundant, and supplies may be had. The road in this part of the route is good. Butter states the population at 300, all Hindoos. Lat. 26° 24', long. 81° 36'.

AMARAH, in the territory of Oude, district of Bainswarra, a village near the left bank of the Ganges, on the route from Cawnpore to Pertabgarh, thirty-nine miles south-east of the former. Lat. 26° 4', long. 80° 56'.

AMARAKANTAK, in the British district of Ramgurbh, territory of Saugor and Nerbudda, under the lieut.-gov. of the N.W. Provinces, a famous Hindoo shrine on a jungle table-land, crowning a mountain of considerable elevation. According to the account received by Blunt from some intelligent Brahmins who had visited the temple, it is situate in the midst of the table-land, and is a building about forty feet high, containing a great

number of images, mostly representing Bhavani or Parvati, considered by the Brahmins as the consort of Siva, and worshipped here with unusual fervour. Close to the temple is a basin, inclosed with masonry, and about eight yards long and six wide, whence flows water, considered by the natives the head of the Nerbudda; and according to an improbable statement, the head-water of the Son issues from the same basin, in an opposite direction. According to the more probable account of Tieffenthaler, the Son rises half a mile from the basin. This place is one of considerable resort for Hindoo pilgrims, though the surrounding country is in general a wild and nearly pathless jungle, regarded by the natives as the "abode only of wild beasts, demons, and savage Goonds." The spot, formerly the subject of conflicting claims, was adjudged within the British territory, in 1826, by the treaty of Nagpore. Though only 120 miles south-east of the British station of Jubbulpore, it has been so imperfectly explored, that no tolerable approximation has been made to ascertain its elevation above the sea. According to one estimate, it is 5,000; according to another, more probable, 3,500 feet. The height, however, is sufficient to render the climate much cooler than in the country about Jubbulpore, which has an average elevation of 1,500 feet above the sea. At Amarakantak the temperature seldom exceeds 95° at the hottest time of the year. Lat. 22° 40', long. 81° 50'.

AMARAPOORA.—See **UMMERAPOORA**.

AMARPATAN.—A town in the native state of Rewah or Baghelcund, distant south-west from Rewah twenty-four miles. Lat. 24° 18', long. 81° 3'.

AMARPOOR.—A town in the native state of Nepal, distant south-east from Khatmandoo 113 miles. Lat. 26° 47', long. 86° 47'.

AMBA.—A town in the native state of Indore, or possessions of Holkar, distant S.W. from Indore ninety-six miles. Lat. 21° 25', long. 75° 16'.

AMBA.—A river rising on the western declivity of the Western Ghats, about lat. 18° 40', long. 73° 23', and flowing first south-westerly for twenty miles, and then north-westerly thirty, falls into the Indian Ocean about lat. 18° 50', long. 73°.

AMBA BHOWANNEE.—A town in the Rajpoot state of Oodeypore or Mewar, distant south-west from Oodeypore sixty-one miles. Lat. 24° 22', long. 72° 51'.

AMBAGUR.—A town in the territory of Nagpore, distant north-east from Nagpore thirty-nine miles. Lat. 21° 29', long. 79° 40'.

AMBAH.—A town in Hyderabad, or dominions of the Nizam, distant N.W. from Hyderabad 167 miles. Lat. 18° 44', long. 76° 30'.

AMBAITA, or **UMBUHTUH**, in the British district of Suhanpore, lieut.-gov. of

the N.W. Provinces, a village on the route from Kurnal to Suharunpoor, and fifteen miles south-west of the last-mentioned place. It is situate in a level and cultivated country, well supplied with water. The road in this part of the route is in general very good, but much under water during the rainy season. Distance N. from Calcutta 995 miles. Lat. $29^{\circ} 51'$, long. $77^{\circ} 24'$.

AMBALA.—See **UMBALLA**.

AMBEANHULLY, in the district of North Canara, presidency of Madras, a village near the Darmany Ghaut, on the road from Dharwar to the port of Coompta, where a toll has been established for the purpose of keeping the road over the ghaut in good repair. Lat. $14^{\circ} 31'$, long. $74^{\circ} 37'$.

AMBER, in the Rajpoot state of Jeypoor, a decayed city four miles north-east of the city of Jeypoor. It is situate on the margin of a small lake, in a valley or rather basin, on all sides surrounded by hills; and its temples, houses, and streets are scattered among numerous ravines, furrowing the slopes of the surrounding hills and opening on the lake. Those streets, intricate and gloomy by site and the shade of numerous trees, are now nearly uninhabited, except by ghastly Hindoo ascetics, with their hair in elf-knots, and their faces covered with chalk, sitting, naked and hideous, amidst tombs and ruined houses. On the slope of the hill, rising west from the margin of the lake, is situate the vast and gorgeous palace of Amber. Its style is massive and solid, resembling those primeval ruins to be seen in Kashmir. Both Jacquemont and Heber observe that they had never viewed a scene so striking, picturesque, and beautiful. Higher up on the slope of the hill, and in general gloomy in the exterior, but crowned with four elegant kiosks, is the zenana; and higher up still, and communicating with the palace by a succession of towers and gateways, is a huge, gloomy castle, with high towers, machicolated battlements, and many loopholes, and rendered more striking by one tall minaret rising above the whole cluster. Besides the purposes of defence, it serves as a treasury and a state prison. Here is a small temple where a goat is daily offered up to Kali, being substituted for the human being sacrificed here every morning (according to local tradition) during the darker and more unmitigated sway of paganism. Amber was the capital of the state of Amber previously to the foundation of the city of Jeypoor by Jai Singh. Lat. $26^{\circ} 59'$, long. $75^{\circ} 58'$.

AMBERWARRA.—A town in the territory of Nagpore, distant north from Nagpore eighty miles. Lat. $22^{\circ} 20'$, long. $79^{\circ} 10'$.

AMBGAON.—A town in the territory of Nagpore, distant S.E. from Nagpore 100 miles. Lat. $19^{\circ} 56'$, long. 80° .

AMBGAON.—A town in the territory of Nagpore, distant E. from Nagpore eighty-five miles. Lat. $21^{\circ} 24'$, long. $80^{\circ} 28'$.

AMBOH.—A town in Keunjur, a native state on the south-west frontier of Bengal, distant S.W. from Balasore fifty-six miles. Lat. $21^{\circ} 7'$, long. $86^{\circ} 14'$.

AMBOOR, in the British district of North Arcot, presidency of Madras, a town on the route from Bangalore to Madras, seventy-nine miles E. of the former. Lat. $12^{\circ} 47'$, long. $78^{\circ} 47'$.

AMBOOR DROOG, in the British district of North Arcot, presidency of Madras, a town on the route from Bangalore to Madras, seventy-five miles E. of the former. Lat. $12^{\circ} 50'$, long. $78^{\circ} 44'$.

AMBORA.—A town in the territory of Nagpore, distant E. from Nagpore thirty-one miles. Lat. $21^{\circ} 3'$, long. $79^{\circ} 39'$.

AMBOYNA.—An island in the Eastern Archipelago, lying to the south-west of the large island of Ceram. It was captured by the British in 1796, and again in 1810, under the vigorous administration of Lord Minto, but finally restored to the Dutch after the peace of Paris, in 1814. The town is in south lat. $3^{\circ} 35'$, long. 128° .

AMEE.—A river rising in the British district of Goruckpoor, lieut.-gov. of the N.W. Provinces, in lat. $27^{\circ} 8'$, long. $82^{\circ} 38'$, and taking a south easterly course, for the first thirty-six miles of which it is "a small marshy channel, which in the rainy season overflows its banks to a considerable extent." At that point, and about lat. $26^{\circ} 55'$, long. 83° , on the right side, it is joined by the Burar or Budh, of nearly equal size; and Buchanan states, "Below the junction the channel is about sixty yards wide, while in the beginning of January the water extended from side to side, and was so deep as to require my elephant to swim. The water was, however, nearly stagnant." Above the junction he describes it as a small river, fed entirely from springs in the plains of this district, but containing a copious supply of water for agricultural purposes. Continuing a south-easterly course, it expands, about seventy miles from its source, into a small lake, and sends off a lateral stream, which, rejoining the lake, forms a triangular island, containing the town of Magular, in lat. $26^{\circ} 41'$, long. $83^{\circ} 19'$. Close to this it is crossed by the route from the cantonment of Goruckpoor to Lucknow, and is there so considerable, that the passage must be made by ferry or by temporary bridge. It continues its south-easterly course; and at Onaula, twenty-five miles below this place, "the channel of the Ami may be thirty or forty yards wide, and in March is filled with water from side to side. It is deep, but nearly stagnant." At that place it is crossed by the route from Azimghur to the cantonment

of Goruckpoor, the passage being made by bridge. A few miles below this place, it falls into the Rapti, on the right side, in lat. $26^{\circ} 30'$, long. $83^{\circ} 29'$. Throughout its course it receives numerous small streams, right and left, and by lateral channels communicates with several of the watercourses and small lakes which abound in this level alluvial tract.

AMEENGURH, in the British district of Belgaum, presidency of Bombay, a town on the route from Kuladgee to Moodgul, thirty-two miles south-east of the former. Lat. $16^{\circ} 2'$, long. $76^{\circ} 1'$.

AMEERGONG, in the British district of Bulloah, lieutenant-gov. of Bengal, a town twenty-eight miles east from Bulloah. Lat. $22^{\circ} 55'$, long. $91^{\circ} 21'$.

AMEER KHAN'S POSSESSIONS.—See **TONE**.

AMERCOTE.—See **OOMERKOTE**.

AMETHI, in the district of Partabgarh, territory of Oude, a town with a small fort. Butter estimates the population at 10,000, all cultivators, and one-fourth Mussulmans. Lat. $26^{\circ} 8'$, long. $82^{\circ} 2'$.

AMHERST, or **JUGGOO ISLAND**, situate off the southern extremity of the island of Ramree. Its greatest length is about six miles; its width about half as much. At the eastern part of the island there is a harbour, and to the north-west cantonments bearing the name of Haye's Cantonments.

AMHERST.—A town situate at the entrance of the Saluen or Martaban river, in a district of the same name, within the province of Tenasserim, and so called in honour to the governor-general during whose administration it was founded. The site was fixed upon by commissioners employed to choose the most eligible spot in the province for a commercial town. The ceremony of hoisting the British flag and naming the future town took place on the 6th April, 1826. On the following day the ground was measured, plans drawn out, and operations commenced; these movements being accompanied by a proclamation to the native inhabitants, which, after declaring that those who chose to take up their abode in the new town should receive the protection and support of the British government, concluded in these terms: "Whoever desires to come to the new town, or the villages beyond the Saluen river, under the English government, may come from all parts and live happy, and those who do not wish to remain may go where they please without hindrance." The town is protected by a battery built on a promontory commanding the entrance of the harbour. Its situation for a commercial town is eligible, being accessible by ships of any burden, and means of inland communication being afforded by rivers in its vicinity. The harbour, however, though large, is somewhat difficult of access, and during the south-west monsoon dangerous. The surrounding country

is dry and elevated, and exposed to the influence of the north-west and south-west monsoons, which renders it remarkably healthy, and suited to European constitutions. There are large forests of good teak in the upper course of the river, and this place is the emporium of the trade for timber from these parts. Shortly after its settlement the number of houses amounted to 230, and the population 1,200 souls. It is about 100 miles S.E. of Rangoon, and 30 south of Moulmein. Lat. $16^{\circ} 4'$, long. $97^{\circ} 40'$.

AMILEA, in the British district of Shahjehanpur, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to Seetapore, fifty-two miles south-east of the former. Lat. $28^{\circ} 3'$, long. $80^{\circ} 10'$.

AMILEA, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawa to Calpee, and twenty-eight miles south-east of the former. The road in this part of the route is heavy and bad, the country level and cultivated. Lat. $26^{\circ} 33'$, long. $79^{\circ} 24'$.

AMIL GOT.—A village in Sind, near a ferry over the Indus, on the route from Subzulcote to Shikarpoor, and about twenty miles east of the latter place. It is situate about a mile from the right bank of the Indus, in a fine plain. At this ferry the army of Shah Shoojah, amounting to 6,000 men, passed in January, 1839. The passage occupied seven days. Lat. $27^{\circ} 53'$, long. $68^{\circ} 56'$.

AMINAGUR, in the British district of Pooralia, lieutenant-gov. of Bengal, a town on the right bank of the river Coosy, fifty miles north-west of Midnapoor. Lat. $22^{\circ} 54'$, long. $86^{\circ} 51'$.

AMJAR, a small river of Malwa, rises in the Mokundara range, about twelve miles west of the Mokundara pass, and in lat. $24^{\circ} 37'$, long. $75^{\circ} 44'$. It holds a course first north-east for twenty-five miles, and then south-easterly for about fifteen miles, and flowing by the south-western entrance of the Mokundara pass, falls into the Aou about ten miles above its confluence with the Kali Sindh, at Gagrour.

AMJHERRA.—A petty Rajpoot state in Malwa, under the superintendence of the political resident at Indore. It is bounded on the north-east, the east, and south-east, by Dhar; on the south by Dhar and the district of Bang; on the south-west by Allee Rajpoot; and on the north-west by Jabooah. It lies between lat. $22^{\circ} 16'$ — $22^{\circ} 47'$, long. $74^{\circ} 40'$ — $75^{\circ} 15'$, and extends from north-east to south-west about forty-two miles, and from south-east to north-west about thirty-three. The area is 584 square miles. In addition to opium, which is extensively cultivated, the staple crops are Indian corn, cotton, gram, sugar-cane, jowar, and bajra. When British supremacy was first established in Malwa, this petty state was labouring beneath a twofold

oppression. The pay of the Arab soldiers and other foreign mercenaries had been suffered to fall in arrear, and the rajah consequently found it impossible either to control or to discharge them; while Scindia, under pretence of satisfying his demand for tribute, held military occupation of the country, and inflicted severe exactions upon the inhabitants. From this state of thralldom the state was rescued through the intervention of the British government. By its aid the bands of mercenaries were paid off and dismissed, and the guarantee of the paramount power for the punctual payment of Scindia's tribute (85,000 rupees per annum) was made conditional on the removal of the troops of that chief. Under these auspices the revenues of the state increased from 40,000 rupees in 1819, to 100,000 rupees in 1829, and have subsequently continued at that amount. The military force maintained by the rajah consists of 1,000 infantry; and the fund for the maintenance of the Malwa Bheel corps is aided by a contribution from this state to the extent of 4,000 rupees per annum. The population was estimated many years since at 57,232, and is perhaps now larger; but the administration of the country is not reported in favourable terms.

AMJHERRA, in Malwa, the principal place of the native state of the same name, is situate in an extensive valley inclosed by low hills on all sides except the north, towards which the valley stretches out in open expanse. The small river which runs by the town becomes dry in the hot season, but a fine tank lies to the eastward, where also there is an encamping-ground. According to Malcolm, the town contained in 1820, 500 houses, with good bazars well supplied. Elevation above the sea 1,890 feet. Distant S.W. from Oojein sixty miles, W. from Dhar twelve miles. Lat. 22° 32', long. 75° 10'.

AMLA.—A town of Malwa, in the native state of Dhar, distant north from Dhar thirty miles. Lat. 23°, long. 75° 20'.

AMLEE.—A town in the Rajpoot state of Oodeypoor or Mewar, distant N.E. from Oodeypoor sixty miles. Lat. 25° 20', long. 74° 20'.

AMMANAIKOOR, in the British district of Madras, presidency of Madras, a town on the route from Dindigul to Madura, fifteen miles south of the former. Lat. 10° 22', long. 77° 59'.

AMMANIMA CHUT, in the British district of Coimbatore, presidency of Madras, a town on the route from Seringapatam to Dindigul, fifty-one miles south of the former. Lat. 11° 44', long. 77° 3'.

AMNEIR.—A town in the territory of Nagpore, distant N.W. from Nagpore forty-seven miles. Lat. 21° 23', long. 78° 29'.

AMPOOD, in the British district of Humberpore, lieutenant-gov. of the N.W. Provinces, a village on the route by Keitah from Jubbulpore to Calpee, thirty-five miles south-east of the latter. Water is abundant; but supplies must be collected from the surrounding country. Lat. 25° 43', long. 79° 45'.

AMORHA, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name. It is situate on the route from Goruckpore cantonment to the city of Lucknow, sixty-eight miles west of the former, ninety-eight miles east of the latter. The Ramrekha, a small feeder of the Koyane, flows close to the town, and though of small width, has depth and volume of water, requiring to be crossed by ferry. Buchanan states the number of dwellings at 100; and consequently, six persons being allowed to each, the population may be estimated at 600. Provisions and wood are plentiful. The road in this part of the route is sandy, heavy, and bad. Distant N.W. from Benares 108 miles; N.E. from Allahabad ninety-five miles. Lat. 26° 43', long. 82° 27'.

AMPATA, or **OMPTA**, in the British district Hooghly, under the lieutenant-gov. of Bengal, a town on the river Damooda. As the river is navigable at all times for considerable craft, from the great channel of the Hooghly, as far up as this place, it is a town of some importance, being the great depôt for the coal brought down by boats in the rainy season from the fields of Burdwan and Bancocora. Distance from Calcutta, W., twenty-two miles; from Burdwan, S., forty-five. Lat. 22° 35', long. 88° 4'.

AMRABAD.—A town in Hyderabad, or dominions of the Nizam, distant S. from Hyderabad eighty-one miles. Lat. 16° 23', long. 78° 55'.

AMRAPOOR, in the British district of Bellary, presidency of Madras, a town on the route from Chittel Droog to Chittoor, forty miles east of the former. Lat. 14° 8', long. 77° 2'.

AMREE.—A village in Sind, on the route from Kotree, near Hyderabad, to Sehwan, and twenty-four miles south-east of this latter place. Amree is situate on the right bank of the Indus; it is a small and apparently a poor village, but there is much cultivation near it. Lat. 26° 7', long. 68° 2'.

AMREELI, or **UMREYLEE**.—A town within the peninsula of Kattywar, situate on the river Thobee, a tributary of the Setroonjee, which, seventy miles lower down, falls into the Gulf of Cambay. "The town of Umreylee has rather a striking appearance on approaching it, presenting a solid circumvallation, with round towers of good dimensions, inclosing about 2,000 houses, with a small stream

(the Thobee) winding round the northern face." The town, with the talook or subdivision annexed to it, contains a population of 32,000, residing in ninety-nine villages and towns; and pays an annual tribute of 1,760 rupees to the Guicowar, and a zortulubee of 4,966 rupees to the nawab of Joonagurh. Distance from Ahmedabad, S.W., 132 miles; Baroda, S.W., 139 miles. Lat. $21^{\circ} 36'$, long. $71^{\circ} 15'$.

AMRITSIR, a walled city of the Punjab, is situate nearly half-way between the rivers Beas and Ravee. It owes its importance to a *Tulao* or reservoir, which Ram Das, the fourth *Guru*, or spiritual guide of the Sikhs, caused to be made here in 1581, and named Amrita Saras, or "fount of immortality." It thenceforward became a place of pilgrimage, and bore the names Amritsir and Ramdaspoor. Nearly two centuries after, Ahmed Shah, the founder of the Durani empire, alarmed and enraged at the progress of the Sikhs, blew up the shrine with gunpowder, filled up the holy *Tulao*, and causing kine to be slaughtered upon the site, thus desecrated the spot, which was dreached with their gore. On his return to Kabool, the Sikhs repaired the shrine and reservoir, and commenced the struggle which terminated in the overthrow of Mahomedan sway in Hindostan. The *Tulao* is a square of 150 paces, containing a great body of water, pure as crystal, notwithstanding the multitudes that bathe in it, and supplied apparently by natural springs. In the middle, on a small island, is a temple of Hari or Vishnu; and on the bank a diminutive structure, where the founder, Ram Das, is said to have spent his life in a sitting posture. The temple on the island is richly adorned with gold and other costly embellishments, and in it sits the sovereign *Guru* of the Sikhs, to receive the presents and homage of his followers. There are five or six hundred Akalees or priests attached to the temple, who have erected for themselves good houses from the contributions of the visitors. Amritsir is a very populous and extensive place. The streets are narrow, but the houses in general are tolerably lofty and built of burnt brick. The apartments, however, are small; but on the whole Amritsir may claim some little architectural superiority over the towns of Hindostan. It has considerable manufactures of coarse cloths, inferior silks, and shawls, made in imitation of the Kashmir fabric, in which great quantities of goats' wool from Bokhara are consumed. There is besides a very extensive transit-trade, as well as considerable monetary transactions with Hindostan and Central Asia, the prosperity of the place having, in these respects, resulted from the decay of Shikarpoor and Mooltan. Rock salt is brought on the backs of camels from a mine near Mundi, about 120 miles to the eastward of Lahore, a large and solid lump, resembling a block of unwrought marble, being slung on each side of the animal. Runjeet Singh constructed a canal from the

Ravee, a distance of thirty-four miles; but it is a mean and inexpensive work. Provision is made for an ample supply of water to the town from the Barea Doab Canal, now in course of construction. The most striking object at Amritsir is the huge fortress Govindghur, built by Runjeet Singh in 1809, ostensibly to protect the pilgrims, but in reality to overawe their vast and dangerous assemblage. Its great height and heavy batteries, rising one above the other, give it a very imposing appearance. It contained, at the time of Hügel's visit, the treasure of Runjeet Singh. Measures have been taken by the British for adding to its security. This city was selected for the establishment of the first mission of the Church of England to the Punjab; and in 1854 subscriptions for a new church had been collected to the amount of 8,000 rupees. Population 80,000 or 90,000. Lat. $31^{\circ} 40'$, long. $74^{\circ} 45'$.

AMROWLI, or UMROWLEE, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghur to that of Futteghur, and twenty-six miles north-west of the latter. The road in this part of the route is bad for wheeled carriages; the country is level, and cultivated in some parts, in others overrun with bush-jungle. Lat. $27^{\circ} 28'$, long. $79^{\circ} 18'$.

AMULNAIR, in the British district of Ahmednuggur, presidency of Bombay, a town on the route from Ahmednuggur to Darroor, forty-one miles south-east of the former. Lat. $18^{\circ} 56'$, long. $75^{\circ} 21'$.

AMULNEIR, in the British district of Khandeish, presidency of Bombay, a town on the left bank of the river Borai, twenty-one miles north-east of Dhoolia. Lat. $21^{\circ} 5'$, long. $75^{\circ} 1'$.

AMURGURH.—A fortress in the north of the Punjab, situate in the dominions of Gholab Singh, two or three miles to the right of the route from Lahore to Kashmir. It formerly belonged to Dyhan Singh, a powerful vassal of the maharaja of the Sikhs. The jealous aversion of its proprietor prevented any European from closely surveying it, but Vigne, who at a distance examined it by means of a telescope, states it to be built on the precipitous bank of a ravine to the westward of it. The outline is rectangular, and though built of stone and of very solid masonry, it must fall before a regular attack, being commanded from other eminences at no great distance. Lat. $32^{\circ} 57'$, long. $74^{\circ} 18'$.

AMURNATH.—A cave amidst the mountains bounding Kashmir on the north-east. It is a natural opening in a rock of gypsum, and is, according to Vigne, about thirty yards high and twenty deep; but McCroft states it to be 100 yards wide, thirty high, and 500 deep. It is believed by the Hindoos to be the residence of the deity Siva, and is hence visited

by great crowds of both sexes and all ages. A great number of doves inhabit the cave, and these, being frightened by the shouts and tumultuous supplications of the pilgrims, fly out, and are considered thus to be evidence of a favourable answer to the prayers offered; the deity being supposed to come forth in the shape of one of these birds. Amongst other fables, it is asserted that those who enter the cave can hear the barking of the dogs in Thibet. It is mentioned by Hügel under the name of Oumarath. Lat. $84^{\circ} 15'$, long. $75^{\circ} 49'$.

AMWA.—A town of Bundelcund, in the native state of Punnah, distant N.W. from Rewah thirty-one miles. Lat. $24^{\circ} 53'$, long. $81^{\circ} 6'$.

ANAGAON.—A town in Hyderabad, or dominions of the Nizam, distant N.W. from Hyderabad ninety-eight miles. Lat. $18^{\circ} 21'$, long. $77^{\circ} 30'$.

ANAJEE, in the territory of Mysore, a town, the principal place of a pergunnah or subdivision of the same name, situate on the north bank of a large artificial lake on the route from Chittel Droog to Savanor, twenty-eight miles N.W. of the former, sixty-three S.E. of the latter. Lat. $14^{\circ} 28'$, long. $76^{\circ} 7'$.

ANAKAPILLI, in the British district of Vizagapatam, presidency of Madras, a town on the route from Rajahmundry to Vizianagrum, forty miles south-west of the latter. Lat. $17^{\circ} 40'$, long. $83^{\circ} 5'$.

ANANDPOOR, in the hill state of Kuluor, a small town situate in the narrow peninsula or tongue of land formed by a remarkable flexure of the Sutlej, and about five miles from either side. It is built at the base of the peak of Nina Devi, stated by Vigne to attain an elevation of about 3,000 feet above the town, or more than 4,000 feet above the sea. That traveller describes it as containing "several large brick buildings with flat roofs and windowless walls, that gave it a sombre but rather imposing aspect." Distant N.W. from Calcutta 1,107 miles. Lat. $31^{\circ} 17'$, long. $76^{\circ} 36'$.

ANANTAWARAM.—A town in Hyderabad, or dominions of the Nizam, distant N.W. from Rajahmundry forty-seven miles. Lat. $17^{\circ} 21'$, long. $81^{\circ} 16'$.

ANCHITTY, in the British district of Salem, presidency of Madras, a town seven miles E. from Seringapatam, and fifty-nine miles N.W. of Salem. Lat. $12^{\circ} 23'$, long. $77^{\circ} 47'$.

ANDAMANS.—See **NICOBAR.**

ANDABY, in the British territory of Saugor and Nerbudda, a town thirty-nine miles S.W. from Jubbulpore, 116 miles N. of Nagpore. Lat. $22^{\circ} 49'$, long. $79^{\circ} 34'$.

ANDOOREE.—A town in the territory of Nagpore, distant S.W. from Nagpore fifty-nine miles. Lat. $20^{\circ} 33'$, long. $78^{\circ} 32'$.

ANDREW BAY, on the coast of Arracan, fourteen miles south of the entrance of the Sandoway river. The centre of the bay is about lat. $18^{\circ} 16'$, long. $94^{\circ} 16'$.

ANDRYTEE, in Bussahir, a feeder of the river Pabur, has its rise on the southern declivity of the Shatal pass, in lat. $31^{\circ} 24'$, long. $78^{\circ} 1'$. It is a powerful and rapid mountain torrent, which holds a southerly course for about fifteen miles to its junction with the Pabur at Chergaon, in lat. $31^{\circ} 18'$, long. $77^{\circ} 56'$. It appears to be mentioned by Hodgson under the name of Indravati.

ANDUR, in the British district of Sarun, lieutenant-gov. of Bengal, a town on the route from Dinapore to Goruckpoor, fifty-eight miles N.W. of the former. Lat. $26^{\circ} 4'$, long. $84^{\circ} 22'$.

ANEAMSAGUR.—A town in Hyderabad, or dominions of the Nizam, distant N.E. from Hyderabad sixty-five miles. Lat. $18^{\circ} 9'$, long. $79^{\circ} 4'$.

ANEE, or **URNEE,** in the British district of Allypore, lieutenant-gov. of the N.W. Provinces, a village on the route from Meerut to Muttra, and thirty miles north-east of the latter. The road in this part of the route is good, the country open and well cultivated. Lat. $27^{\circ} 52'$, long. $77^{\circ} 54'$.

ANGADDYPOORAM, in the British district of Malabar, presidency of Madras, a town fifty miles W. from Coimbatore, and thirty-eight miles S.E. of Calicut. Lat. $10^{\circ} 58'$, long. $76^{\circ} 17'$.

ANGEY KYOUNG, off the coast of Arracan, a long and narrow island running parallel with Peneksong island, in Hunter's Bay. It is about twenty miles in length, and three in breadth, and is described as "mountainous, woody, rugged, without any appearance of inhabitants or cultivation." Lat. $19^{\circ} 47'$ — $20^{\circ} 4'$, long. $93^{\circ} 10'$.

ANGHARAH.—A town in the native state of Nepal, distant N.E. from Almora 121 miles. Lat. $29^{\circ} 58'$, long. $81^{\circ} 40'$.

ANGOOL.—One of the petty native states on the south-west frontier of Bengal, known as the Cuttack Mehals, which became tributary to the British government upon the conquest of the province of Cuttack in 1804. Angool, the principal place, is situate in lat. $20^{\circ} 48'$, long. $84^{\circ} 53'$.

ANG-TONG, in the territory of Siam, a town situated on the left bank of the river Me-nam, fifty-three miles N. of the town of Siam, 248 miles S.E. from Amherst. Lat. $15^{\circ} 35'$, long. $101^{\circ} 20'$.

ANGTSOO.—A town in the native state of Nepal, distant N.E. from Almora 129 miles. Lat. $29^{\circ} 52'$, long. $81^{\circ} 50'$.

ANHUT.—See **AMHERST ISLAND.**

ANIAH, in the British district of Bolundshahr, lieutenant-gov. of the N.W. Provinces, a

village on the route from Allypore cantonment to that of Delhi, and twenty-one miles north-east of the former. The road in this part of the route is good; the country open, with a sandy soil, scantily cultivated. Lat. $28^{\circ} 6'$, long. $77^{\circ} 58'$.

ANIGEEREE, in the British district of Dharwar, presidency of Bombay, a town on the route from Dharwar to Bellary, twenty-nine miles east of the former. Lat. $15^{\circ} 25'$, long. $75^{\circ} 30'$.

ANIKUL, in territory of Mysore, a town on the S.E. frontier, "situate on the eastern verge of the tract of woody hills extending from Savendy Droog to the Cavery." It was formerly a place of strength and importance, where Hyder Ali found refuge when driven from Seringapatam by insurrection. Distance from Seringapatam, N.E., 75 miles; Bangalore, S.E., 20; Madras, W., 178. Lat. $12^{\circ} 44'$, long. $77^{\circ} 44'$.

ANJAR, in the native state of Cutch, under the political superintendence of the Bombay government, a town, the chief place of a district of the same name. As a friendly return for the assistance rendered to the rajah of Cutch in recovering certain alienated possessions, the town and district of Anjar were ceded by him, in 1816, to the East-India Company. In 1822 the arrangement was modified by a new treaty, under which the cession was restored, on condition of an annual money payment. The condition, however, not being satisfactorily fulfilled, the subject was reconsidered, and in 1832 the claim both as to arrears and prospective payments was relinquished. Lat. $23^{\circ} 6'$, long. $70^{\circ} 3'$.

ANJE-DIVA, or ANJADEEPA. — An island distant about two miles from the coast of North Canara. "It is about a mile in length, and possessed by the Portuguese. It appears on the outside barren and rocky, but of a pleasant aspect on the opposite side, next the main, where it is fortified by a wall and some towers. In case of necessity, a ship may find shelter under this island from the S.W. monsoon." Distant S.E. from Goa fifty-one miles. Lat. $14^{\circ} 45'$, long. $74^{\circ} 10'$.

ANJENGAUM, or UNJENGAUM, in Hyderabad, or the territory of the Nizam, a town near the north-western frontier, towards the British districts of Saugor and Nerbudda. It is situate at the southern base of the range of mountains bounding the valley of the Taptee on the south. Distance from Nagpore, S.W., 90 miles; Ellichpore, S.E., 42; Hyderabad, N., 231; Bombay, N.E., 350. Lat. $21^{\circ} 40'$, long. $77^{\circ} 51'$.

ANJENGO, in the territory of Travancore, a town on the seacoast, situate on a narrow strip of land running from north-west to south-east, having on the south-west the Indian Ocean, and on the north-east an extensive shallow estuary or back-water. It consists of two rows of houses, arranged parallel to each

other; the Portuguese church and English burying-ground being at the north-western extremity, the fort at the south-eastern. There is no shelter for shipping, which must anchor at sea, "in eleven or twelve fathoms mud, off shore a mile and a half or two miles;" and the intercourse with the shore is, in consequence of the extreme violence of the surf, very difficult and dangerous, even in the fine season, when it is practicable only in country boats, and is totally impracticable during the monsoon, which is here excessively boisterous, and dangerous to shipping; so that the coast is not frequented during the south-west monsoon. Most of the inhabitants of Anjengo profess to be Christians: they are of the Romish Church, either descended from the Portuguese, or converted natives of Malabar. With few exceptions, they are poor, subsisting by fishing or manufacturing cordage from coir or cocoa-nut fibre. The East-India Company had here formerly a factory of some importance, but latterly discontinued. The district of Anjengo, in which the town is situate, is now, however, under the British government. Distance from Cannanore, S.E., 240 miles; from Madras, S.W., 390. Lat. $8^{\circ} 40'$, long. $76^{\circ} 49'$.

ANKOLA. — See UNKOLA.

ANKREE. — A town in Hyderabad, or dominions of the Nizam, distant N. from Hyderabad 129 miles. Lat. $19^{\circ} 14'$, long. $78^{\circ} 27'$.

ANNADARAROOPAD, in the British district of Rajahmundry, presidency of Madras, a town thirteen miles N.W. from Rajahmundry, forty-five miles N.E. of Ellore. Lat. $17^{\circ} 7'$, long. $81^{\circ} 40'$.

ANNANTAGHERRY. — A town in Hyderabad, or dominions of the Nizam, distant N.W. from Guntoor sixty miles. Lat. $17^{\circ} 3'$, long. $80^{\circ} 3'$.

ANNANTAPOOR. — A town in the native state of Mysore, under the administration and control of the government of India, distant N.W. from Seringapatam 150 miles. Lat. $14^{\circ} 3'$, long. $75^{\circ} 15'$.

ANNAVARAM, in the British district of Vizagapatam, presidency of Madras, a town twenty-five miles N.W. from Vizagapatam, and thirty-nine miles S.W. of Vizianagrum. Lat. $17^{\circ} 50'$, long. 83° .

ANNAWUTTY. — A town in Mysore, under the administration and control of the government of India, distant N.W. from Seringapatam 180 miles. Lat. $14^{\circ} 33'$, long. $75^{\circ} 12'$.

ANNUTRAM, in the British district of Etawa, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawa to Calpee, and 20 miles south-east of the former. Lat. $26^{\circ} 36'$, long. $79^{\circ} 18'$.

ANOOPSHUHUR, in the British district of Bolundshuhur, lieut.-gov. of the N.W.

Provinces, a town on the route from Bareilly to Delhi, and 73 miles south-east of the latter. It is situate on the right bank of the Ganges, the channel of which is here about a mile wide, only one-fifth of that space being occupied by the stream in the dry season, when it is limpid, and still so deep as to be unfordable, and crossed either by ferry or bridge of boats. The right bank, on which the town is situate, is about thirty feet above the channel, the left bank low, and, in consequence, the country on that side is extensively flooded in high inundations. At the time of Tennant's visit, in 1798, it was surrounded by a mud wall between twenty and thirty feet thick, and at the northern extremity was a large antique residence of the zemindar or proprietor of that part of the country; on the south a large fort built of brick, and so strong as to be impregnable to a native force. The town has a bazaar, and though of no great extent, is populous, but ill-built, the houses being either of mud or ill-cemented brick. Population 8,947. Lat. 28° 20', long. 78° 21'.

ANOPGURH, in the Rajpoot state of Bikaner, a town near the north-west frontier, towards Bahawalpore. It is situate in a country of great sterility, in lat. 29° 14', long. 73° 26'.

ANTOWRAH, in the territory of Oude, a town on the route from the cantonment of Futtehghurh to that of Seetapoor, 38 miles north-east of the former, 44 west of the latter. It has a bazaar; water is plentiful, and supplies may be collected from the surrounding country, which is level, and partially cultivated, though in many places overrun with jungle. The road in this part of the route is bad. Lat. 27° 40', long. 80° 6'.

ANTREE, in the territory of Gwalior, a small town on the route from the fort of Gwalior to Saugor, 18 miles S.E. of former, 184 N.W. of latter. It is situate at the southern entrance of a rocky ravine, so narrow that only one wheeled carriage can pass at once along the road, which is very narrow, rocky, and bad. Salt is manufactured here by washing the saline earth in the vicinity, and by the heat of the sun evaporating the brine thus obtained. Tieffenthaler describes it, about eighty years ago, as a town once tolerably handsome, but much decayed, and having at its west side a fort with four very strong towers. Here, at the close of December, 1843, the Mahratta force was posted to oppose the British advancing from Bundelcund under the command of General Grey. The British commander marched westward to turn their position, and the Mahrattas, marching by a parallel route, gave battle at Punniar, and were totally defeated. Lat. 26° 3', long. 78° 16'.

ANUNDPOR.—A town in the native state of Jutt, one of the Sattara jaghires, distant S.E. from Sattara 89 miles. Lat. 16° 54', long. 75° 9'.

ANUNDPOR, in the British district of Midnapore, lieutenant-gov. of Bengal, a town 15 miles N.E. from Midnapore. Lat. 22° 35', long. 87° 30'.

ANWULKHERA, or **UMURKHERA**, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town on the route from the city of Agra to Bareilly by Khasgunge, and 15 miles north-east of the former. It has a small bazaar; indifferent water may be had from wells, and supplies may be obtained from the neighbourhood. The road in this part of the route is bad, the country cut up with ravines, and very partially cultivated. Lat. 27° 19', long. 78° 12'.

AONGTHA, in the Burman empire, a town situate on the left bank of the river Khyendwen, and 90 miles N.W. of Ava. Lat. 22° 39', long. 94° 58'.

AONLAGANJ, or **AOUNLAH**, in the British district of Bareilly, a town on the route from Allypore to Bareilly, 80 miles N.E. of former, 21 S.W. of latter. It has a large bazaar, and water is abundant. Population 7,649. Lat. 28° 16', long. 79° 13'.

AOUGASEE.—The principal place of the pergunnah of the same name, in the British district of Banda, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Jumna, 30 miles north-east of the town of Banda. Lat. 25° 40', long. 80° 50'.

AOUNG, or **AOON**, in the British district of Futtehpoore, lieutenant-gov. of Agra, a village on the route from Cawnpore to the town of Futtehpoore, and 22 miles north-west of the latter. Water is obtained from wells, but supplies are scarce. The road in this part of the route is bad. Lat. 26° 9', long. 80° 38'.

AOUNLAH.—See **AONLAGANJ**.

API.—A town in the native state of Nepal, distant N.E. from Almora eighty-two miles. Lat. 30°, long. 81°.

APPAROWPETT.—A town in Hyderabad, or dominions of the Nizam, distant N. from Hyderabad 132 miles. Lat. 19° 16', long. 78° 14'.

APPOOWA.—A village in Arracan, situate on the right bank of the Coladyne river. Lat. 20° 50', long. 93° 1'.

APTA, in the British district of Tannah, presidency of Bombay, a town on the route from Callianee to Nagotna, twenty-two miles north of the latter. Lat. 18° 51', long. 78° 12'.

ARABUL, in Kashmir, a beautiful cataract on the Veshan, one of the principal tributaries of the Behut or Jhelum. Lat. 33° 37', long. 74° 52'.

ARACHI, in the British district of Salem, presidency of Madras, a town twenty-eight miles N.W. from Trichinopoly, and forty-one miles S.E. of Salem. Lat. 11° 7', long. 78° 30'.

ARAIL, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, the principal place of the pergunnah of the same name, a small town on the right bank of the Ganges, at the confluence of the Jumna, and opposite the city of Allahabad, from which it is distant about a mile. Lat. $25^{\circ} 25'$, long. $81^{\circ} 56'$.

ARAUN.—A river of Hyderabad, rising in lat. $20^{\circ} 10'$, long. $77^{\circ} 12'$, near the town of Bassim, and flowing easterly for fifty miles, and south-east for sixty miles, falls into the Payne Gunga river on the left or north side, in lat. $19^{\circ} 54'$, long. $78^{\circ} 20'$.

ARAVACOOCHY, in the British district of Coimbatore, presidency of Madras, a town on the route from Dindigul to Salem, thirty miles N. of the former. Lat. $10^{\circ} 47'$, long. $77^{\circ} 58'$.

ARAVULLI, in Western India, a range of mountains extending in a direction N.E. from the vicinity of Champanera, about lat. $22^{\circ} 40'$, long. 74° , where, though low and not strongly marked, it joins the W. extremity of the Vindhya. It extends along the S.W. frontier of the territory of Banawarra, Dongurpoor, and the S.W. and N.W. of Mewar or Odeypore, dividing it from the lower region of Marwar or Joudpoor; and, proceeding into the districts of Mairwarra and Ajmere, becomes confounded with the low rocky ranges of Shekhawati and Delhi. Its N.E. extremity may, perhaps, be assumed in lat. $26^{\circ} 50'$, long. 75° . On the N.W. side, or towards Marwar, it is very bold and precipitous, less so on the S.E.; but according to Tod, there is no pass over it practicable for wheeled carriages from Edur, near its S.E. extremity, to Ajmere, a distance of 220 miles. The most elevated summit is Mount Aboo, 5,000 feet above the sea.

ARAWUD, in the British district of Khandeish, presidency of Bombay, a town forty-eight miles S.W. from Boorhaunpoor, sixty-one miles N.E. of Dhoolia. Lat. $21^{\circ} 10'$, long. $75^{\circ} 39'$.

ARCOT (Southern Division).—A British district under the presidency of Madras. It is bounded on the north by the British districts northern division of Arcot and Chingleput; on the east by Pondicherry and the Bay of Bengal; on the south by the British districts of Tanjore and Trichinopoly, and on the west by the British district of Salem. It lies between lat. $11^{\circ} 11'$ — $12^{\circ} 39'$, long. $78^{\circ} 42'$ — $80^{\circ} 4'$. The area, according to official authority, is 7,600 square miles. The general surface of the country forms part of the great slope from the Eastern Ghauts to the coast of the Bay of Bengal. In its eastern part, or towards the sea, it is low and level, but in the interior, towards the ghauts, rises into hills, not forming continuous ranges, but in general isolated. The principal rivers intersecting or bounding the district are the Southern Penna or Panar, and the Coleroon. The former falls into the

Bay of Bengal a little north of Cuddalore. It is devoid of water during the dry season, and such also is the condition of most of the other streams of this district, which fall either into the Penna or into the Bay of Bengal. The Coleroon, however, which forms the southern boundary towards Tanjore, is abundantly supplied with water during the greater part of the year. Pursuing its course in a north-eastern direction, the Coleroon falls into the Bay of Bengal, near Devicottah. From Devicottah, at the mouth of the Coleroon, the seacoast extends in a northern direction for forty-five miles to lat. 12° , long. $79^{\circ} 55'$; thence, in a north-easterly direction twenty-two miles, to lat. $12^{\circ} 15'$, long. $80^{\circ} 4'$; the total length of the seacoast of this district being sixty-seven miles. Porto Novo, nine miles north of Devicottah, is at the mouth of the Vellaur, a river rising towards the base of the Eastern Ghauts, and having a considerable length of course, with an annicut or dam thrown across it in this district, by means of which its waters are rendered available for the purposes of irrigation. It is at all times too small at its mouth to admit of any but coasting craft; but ships may anchor two miles off shore in six fathoms, with good holding-ground of mud, and protected from southerly winds by the Coleroon shoal lying in that direction. The seacoast is sandy, with small hills, which, viewed from a distance, appear to be islets. About fifteen miles beyond Porto Novo, in the same direction, is Cuddalore, at the mouth of the Southern Penna. The climate is exempt from sudden vicissitudes of temperature, and storms are less frequent here than in most other places on the Coromandel coast. In the vicinity of the shore the temperature is comparatively moderate during the prevalence of the sea-breezes; but when they give place to the land-winds during spring, the heat becomes very distressing, and is accompanied by great aridity, against which neither glass nor wood is proof, the former breaking suddenly from the expansive power of the heat, and the latter from the same cause warping, cracking, and splitting. The thermometer sometimes reaches 115° in the shade, and according to some reports it occasionally rises as high as 130° . The mineral wealth of this district is small, with the exception of a rich mine of iron-ore in the south-eastern part, furnishing metal of excellent quality, which is reduced at Porto Novo by a company of European capitalists. No satisfactory information is accessible as to either the botany or zoology of the district, nor indeed as to any branch of natural history. According to the census taken in 1851, the population amounted to 1,006,005. Assuming the area at 7,600 square miles, and the population as above stated, the result will show a relative density of 132 to the square mile. The proportion of Mussulmans and others is stated to be about one twenty-fifth part of the whole; the remainder of the population being Hindoos. Cuddalore is the seat

of the civil establishment of the district; Trinomalee, and the French settlement of Pondicherry, also locally within the limits of this district, are described under their respective names in the alphabetical arrangement.

ARCOT (Northern Division).—A British district under the presidency of Madras. It is bounded on the north by the British district of Nellore, on the east and south-east by the British district Chingleput, on the south by the British district of Arcot (southern division) and Salem, and on the north-west by Mysore and the British district of Cuddapah; and lies between lat. $12^{\circ} 22'$ — $14^{\circ} 11'$, long. $78^{\circ} 17'$ — $80^{\circ} 12'$. The area is estimated by one authority at 5,571 square miles; according to another, at 5,790. The principal river is the Palar, which, rising in the territory of Mysore, pursues a direction generally easterly, and entering this district about lat. $12^{\circ} 58'$, long. $78^{\circ} 30'$, flows through it, continuing its easterly course for about 102 miles, passing close to the towns of Vellore and Arcot, and subsequently crossing into the British district of Chingleput. Though a considerable torrent during the rainy season, it is at other times dry on the surface of its channel, though water may at all times be obtained by digging therein. There are several smaller streams, such as the Poiney, the Soonarmukai, and some others, all devoid of water in the dry season, but during the periodical rains flowing freely, and replenishing the tanks and channels for irrigation. Tanks, or artificial pieces of water, are very numerous, and the dimensions of some are surprisingly great. That of Cauvery-pak is eight miles long and three broad. Besides many channels for irrigation, a canal has been made from the southern extremity of Pulikat lake to Madras, distant twenty miles; and by this communication that city receives abundant supplies of charcoal, firewood, vegetables, grain, fish, and other articles of consumption. The soil on the plains is for the most part sandy, mixed with loam and gravel: it is extensively cultivated, principally with rice and other grains; and even in the mountainous tracts there is a considerable portion of fertile ground. Cotton is the principal commercial crop. The population according to the latest official return is 1,485,873, an amount which, compared with the area furnished by the same authority (5,790-square miles), indicates a relative density of about 257 to the square mile. The language spoken in this collectorate is the Tanul. The lines of the Madras Railway Company traverse this district. The other routes are—1. From east to west, from Madras through Arcot to Bangalore. 2. From north-east to south-west, from Madras through Arcot to Coimbatore. 3. From north to south, from Chittoor to Arcot. Arcot, the principal place, Vellore, Chittoor, are described under their respective names in the alphabetical arrangement.

ARCOT, the principal place of the northern division of the British territory bearing the same name, is situated on the right side of the river Palar, and on the line of railway from Madras to Beyppoor. The site is advantageous and salubrious, being on a gentle eminence, sloping down to the bank. The bed of the river is about half a mile wide; but in the dry season the stream is not sufficient to turn a mill, and the channel is sometimes even totally dry. Water of good quality can, however, always be obtained by sinking pits into the sands which form the bed. The military cantonment can accommodate three regiments; one of European, and two of native cavalry. There is an extensive barrack for Europeans, built of brick and lime mortar; and contiguous are three hospitals, well constructed, well ventilated, and in all respects commodious; besides other buildings requisite for such an establishment. There is a neat Protestant Episcopal church adjoining. The old fort has been nearly demolished; but its outline can still be traced almost throughout its entire extent, which was once very considerable. In the town are the ruins of the palace of the nawab of Arcot, besides the remains of various buildings erected by Mussulmans, and some mosques, still in a state of repair. The town, with the talook or subdivision annexed, is stated officially to have a population of 53,474, inhabiting 10,042 houses.

Arcot occupies a prominent place in the history of the contests waged in this part of India during the earlier part of the eighteenth century. Here Clive confirmed the military reputation which he had previously acquired by some adventurous exploits in other quarters. The English having previously taken but feeble measures to support their ally, the well-known Mahomet Ali, Clive suggested an attack upon Arcot, then held by a rival power, and offered himself as the commander of the expedition. His suggestion and offer were accepted; but the force placed at his disposal was altogether disproportioned to the service for which it was destined. It consisted but of 300 sepoys and 200 Europeans, with three field-pieces; and with this small force an attack was to be made upon a fortress garrisoned by 1,100 men. On approaching the place, a violent storm of thunder and rain fell; an event which might certainly be regarded as a misfortune rather than an advantage. It proved, however, the latter; for Clive, marching his small force through this war of the elements, a thing regarded as unparalleled in India, was looked upon as an assailant whom it would be vain to resist; the garrison accordingly abandoned the fort, and Clive took possession of it. The enemy, however, having received large reinforcements, under Rajah Sahib, son of the celebrated Chunda Sahib, became in turn the assailants, and Clive was called upon to defend the place which had so remarkably passed into his hands. This task he performed with consummate skill, though his force was so

small that he was obliged to husband his resources with the greatest care. Being summoned to surrender, he replied in terms of haughty defiance. At length, on the 14th November, 1751, the enemy commenced the attack long threatened, and from which nothing short of complete success was anticipated. This attempt, and its results, are thus recorded in a modern historical work :—"The day of attack was one among the most distinguished in the Mahometan calendar. Happy was the Mussulman to whom it brought death from the sword of the unbeliever, for his fall was regarded as but a sudden introduction to the highest paradise. By this belief the enthusiasm of the enemy's troops was wrought up almost to madness, and it was further increased by the free use of an intoxicating substance called bang. The morning came, and with it the expected movement. Clive was awakened, and found his garrison at their posts, according to the disposition which he had previously made. On the enemy's side a vast multitude were in motion, bringing ladders to every part of the wall that was accessible. Besides these desultory operations there were others in progress, all directed to the same end. Four principal divisions of the enemy's troops marched upon the four points where an entrance to the fort seemed the more likely to be effected—the two gates and the two breaches which had been made in the wall. The parties who attacked the gates drove before them several elephants, armed with plates of iron on their foreheads, with which it was expected they would beat down the obstacles which stopped the course of the assailants; but the device was more disastrous to those who employed it than to those against whom it was directed. The elephants, wounded by the musketry of the British force, turned and trampled upon those who were urging them forward. At the north-west breach, as many as it was capable of admitting rushed wildly in, and passed the first trench before their opponents gave fire. When given, it was with terrible effect. A number of muskets were loaded in readiness, which those behind delivered to the first rank as fast as they could discharge them. Every shot did execution, while three field-pieces contributed effectually to thin the number of the assailants. In a few minutes they fell back; but the attempt was only suspended, not abandoned. Another and another party followed, and were driven off as had been those who preceded them. To approach the south-west breach, the enemy embarked seventy men on a raft, who thus attempted to cross a ditch, and had almost gained their object, when Clive, observing that his gunners fired with bad aim, took the management of one of the field-pieces himself. This he worked with such precision and effect that a few discharges threw the advancing party into confusion. The raft was upset, and those on board thrown into the water, where some were drowned. The

remainder saved themselves by swimming back, abandoning the unfortunate raft which was to have borne them to the breach. These various attacks occupied about an hour, and cost the enemy in killed and wounded about 400 men. After an interval employed by the assailants in endeavouring, under much annoyance, to carry off their dead, the firing upon the fort was renewed, both with cannon and musketry. This was again discontinued. A formal demand of leave to bury the dead was complied with, and a truce of two hours agreed upon. At the expiration of the prescribed time the firing once more recommenced, and lasted until two o'clock on the following morning, when it ceased, never to be renewed. At daybreak the gallant defenders of the fort learned that their besiegers had precipitately abandoned the town. The garrison immediately marched into the enemy's quarters, where they found several pieces of artillery and a large quantity of ammunition. These spoils were forthwith transferred to the fort, and thus ended a siege of fifty days. Military history records few events more remarkable than this memorable siege. Its conduct at once placed Clive in the foremost rank of distinguished commanders. Justly has it been said that he was 'born a soldier.' At the time when with a handful of men, most of them unpractised in the operations of war, he defended the fort of Arcot against a force several thousand strong, his military experience was small, while of military education he was entirely destitute. His boyhood had passed in idleness, or in the reckless perpetration of mischief, while the few years which he had numbered of manly life had, for the most part, been occupied with the details of trade. Deprived of all the means by which, in ordinary cases, men are gradually prepared for the duties of military service or command, he showed himself a perfect master of the arts of war. Like all other eminent commanders, he communicated to those under him a spirit of devotedness and self-abandonment, which is among the most graceful as well as the most valuable qualities of a soldier. An instance of this occurred among the native troops employed in the defence of Arcot, which is alike honourable to them and to their commander. When provisions became scarce, and there was ground for apprehending that famine would compel a surrender, the sepoys proposed that their diet should be restricted to the thin gruel in which the rice was boiled, and that the whole of the grain should be given to the Europeans, as they required more nourishment. With such a spirit pervading his little garrison, Clive might well look forward to a successful termination of his brave defence of Arcot; but that spirit his own military virtues had fostered and called forth." On the evening of the memorable day, reinforcements, dispatched from Madras for the support of Clive, entered the town, and a few days afterwards Clive left the place, for a field where his

services were more pressingly required. Arcot was taken by Hyder Ali when that invader ravaged the Carnatic; and beyond these facts there is little in its history of interest or importance. Distance from Madura, N.E., 220 miles; Tanjore, N., 145; Cuddalore, N., 88; Bangalore, E., 118; Vellore, E., 14; Madras, W., 65. Lat. 12° 54', long. 79° 24'.

ARCULGODE.—A town in Mysore, under the administration and control of the government of India, distant N.W. from Seringapatam 49 miles. Lat. 12° 46', long. 76° 7'.

ARDANJI, in the British district of Tanjore, presidency of Madras, a town on the route from Tripattor to Negapatam, twenty-eight miles east of the former. Lat. 10° 11', long. 79° 3'.

ARDYSIR.—A town in the native state of Cutch, under the political superintendence of the presidency of Bombay, distant N.E. from Bhooj seventy-five miles. Lat. 23° 38', long. 70° 50'.

AREEJAW, in Sinde, a large village on the route from Schwan to Larkhana, in the fertile island inclosed between the Indus and its offshoot the Narra. It is situate eight miles south from Larkhana, the same distance west of the Indus, and one mile east of the Narra. Lat. 27° 24', long. 68° 9'.

AREENG, or **AURUNG**.—The principal place of the pergunnah of the same name, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a small town on the route from Muttra to Deeg, and nine miles west of the former. Here the army of Holkar, the Mahratta chief, was encamped Oct. 7, 1804, and being attacked by the British under General Lake, sought safety in a precipitate flight, in which their chief led the way. About thirty of their number were killed, and several made prisoners. Lat. 27° 29', long. 77° 26'.

AREEPADGAH, in the British province of Arracan, lieut.-gov. of Bengal, a town 63 miles N.W. of Arracan. Lat. 21° 6', long. 92° 33'.

AREEPORE, or **HAREEPOOR**, in the British district of Ghazeepeer, lieut.-gov. of the N.W. Provinces, a town 32 miles N.E. of Ghazeepeer, 40 miles W. of Chupra. Areepeer has a population of 6,382. Lat. 25° 49', long. 84° 2'.

ARGAUM, in Hyderabad, or territory of the Nizam, a village near the northern frontier, towards the British territory of Saugor and Nerbudda, some distance southward of the range of mountains bounding the valley of the Taptee on the south. This place is rendered memorable by having been the site of an action which took place on the 28th November, 1803, between the British army commanded by Major-General Wellesley (afterwards duke of Wellington), and that of the Mahrattas commanded by Scindia and Munny Bappoo, brother of the rajah of Bernar, in which the

latter was defeated with great loss. A medal in commemoration of the victory was struck in London, in 1851, and presented, under the sanction of the Queen, to the surviving officers and soldiers who were engaged in the action. It is situated in a plain much cut up by water-courses, and on the route from Ellichpoor to Aurungabad. Distance 40 miles S.W. of the former, 135 N.E. of the latter. Lat. 21° 2', long. 77° 2'.

ARIANCOOPAN.—See **PONDICHERRY**.

ARKAIRY.—A town in Hyderabad, or dominions of the Nizam, distant S.W. from Hyderabad 104 miles. Lat. 16° 50', long. 77° 6'.

ARMEGON, in the British district of Nellore, presidency of Madras, a village situate on the coast opposite to a shoal of the same name, between "the inner edge of which and the coast there is a space from three to four miles wide, now called Blackwood Harbour." One of the earliest settlements of the East-India Company in the Carnatic was founded at this place, where a factory was erected in 1628, defended by twelve pieces of cannon. Distance N. of Madras 66 miles. Lat. 14° 2', long. 80° 12'.

ARMOREE.—A town in the territory of Nagpore, distant S.E. from Nagpore 74 miles. Lat. 20° 28', long. 80° 2'.

ARMOYAMCOTTA, in the British district of Madura, presidency of Madras, a town situate twenty miles N. from Ramnad, and fifty-three miles S.E. of Madura. Lat. 9° 40', long. 78° 56'.

ARNALLA.—An island off the coast of the Northern Concan, presidency of Bombay, situate one mile from the mainland, the intervening channel being navigable for vessels of considerable burthen. On the island is a fort, which, in 1781, was taken by the British army under General Goddard. Distant N. from the city of Bombay thirty-five miles. Lat. 19° 28', long. 72° 47'.

ARNEE.—A town in Hyderabad, or dominions of the Nizam, distant S. from Omrawuttee fifty-five miles. Lat. 20° 4', long. 78° 4'.

ARNEE, in the British district of Arcot, northern division, a town with British cantonment. Its site is rather low and flat, yet with a sufficient declivity towards a small river about a quarter of a mile distant, to carry off the rain thither even during the monsoon. The river being fed by springs, affords an unremitting supply of excellent water. The country round is open, the nearest hills, which consist of granite and syenite, being six miles distant; and there is scarcely any vegetation, except a few straggling palms and some patches of stunted jungle. The soil of the plain consists of disintegrated granite, mixed with sand or clay, and in many places is impregnated with impure saline matter, chiefly salts of soda, which during the dry season cause a

white efflorescence on the surface. This place, formerly a strong fortress, is now much decayed. It is a station for European troops, the cantonment of which is within the now dilapidated rampart, but for some years past has only been occasionally occupied as a temporary depôt. Immediately opposite to it are two bomb-proof ranges of buildings, forming the officers' quarters; behind these, and about three hundred yards distant, are the barracks, calculated to accommodate one European regiment. These are also bomb-proof, and are spacious and strongly built, forming three sides of a square; the fourth side being occupied by a wall with a gateway. Contiguous is a commodious hospital. Elevation above the sea 400 feet. Distance from Madura, N.E., 207 miles; Tanjore, N., 131; Bangalore, E., 119; Vellore, S.E., 20; Arcot, S., 17; Madras, S.W., 74. Lat. 12° 40', long. 79° 21'.

AROOA.—See OOMRAWUH.

AROUL, in the British district of Mynpoore, lieutenant-gov. of the N.W. Provinces, a small town or village on the route from Muttra cantonment to that of Mynpoore, and twenty-three miles west of the latter. Water is plentiful, and supplies may be collected from the surrounding country. The road in this part of the route is tolerably good in dry weather, but during the rains in the latter part of summer, is in many places under water to the depth of from one to three feet: the country is level and partially cultivated. Lat. 27° 8', long. 78° 45'.

ARPEILLEE.—A town in the territory of Nagpore, distant S. from Nagpore 110 miles. Lat. 19° 44', long. 79° 58'.

ARRACAN PROPER.—See AKYAB.

ARRACAN, a province of India, situate to the east of the Bay of Bengal, is bounded on the north by Chittagong, from which it is divided by the Naaf river and the Wailli hills; on the east by the Yoomadoug range of mountains, which separates it from Ava; on the south by a portion of the British province of Pegu; and on the west by the Bay of Bengal. It lies between lat. 18° and 21° 33', long. 92° 10'—94° 50'. Its extreme length from the Kintalee pass to its northern extremity is about 290 miles. Its greatest breadth is at the north, where it measures ninety miles from Ramoo to the central ridge of the Yoomadoug mountains; eighty miles further south it is seventy miles broad, measuring from the mouth of the Kuladyne river to the summit of the mountains. For some leagues south of this, the coast is very much interrupted by bays and creeks; and thence onward to its most extreme point at Cape Negrais (beyond the recently-defined boundaries of Arracan), the mainland is a very narrow strip, measuring rarely more than twenty miles, and on an average not more than fifteen miles across. The area of the province is 13,484 square miles. The coast is skirted by many islands, the more important of which are

Ramree, Cheduba, and Shapurce. That part of the coast lying between the Naaf and Arracan rivers is lined by shoal banks, stretching in some parts two or three miles from the shore. Further south the coast is lined by a number of rocky islands, of which those called the Broken Islands and the Terribles are the larger; but neither of these groups has the slightest appearance of cultivation. The remainder of the coast from Ramree to Kintalee is excessively rugged and rocky, indented by bays which afford no shelter for ships, studded by islands, and beset by various sources of peril. "Between the Kuladyne and Sandoway rivers," says Pemberton, "the whole coast consists of a labyrinth of creeks and tide-nullahs, all of which terminate at the foot of the lower ranges, and receive the contributions of numerous small streams." The physical aspect of this country is very diversified; hilly, but having extensive flats and valleys, the latter of which are generally fertile and highly cultivated, being intersected by numerous small rivers. There is, however, abundance of low marshy land, overrun with thick jungle, and so much cut up by rivers and tide-nullahs, as to render communication by land very difficult, in some instances almost impracticable; the principal intercourse between the stations and villages being carried on by water. Along the whole line of the eastern frontier, the boundary between Arracan on the one side, and Ava and the newly-acquired British province of Pegu on the other, is formed by the Yoomadoug mountains. This range is a portion of the great chain which, running from the south of Assam, in lat. 26° 30', extends to Cape Negrais. The height of the mountains varies, averaging at this part from three to four thousand feet. The Blue Mountain, in lat. 22° 37', long. 93° 11', is said to be upwards of 8,000 feet above the level of the sea. The inhabitants of these mountainous tracts consist of several independent tribes, who have never submitted to any government. They lead a life of hardship and danger, especially the women, who are stoutly made, though diminutive in size. The cultivation consists in clearing away the thick forests and shrubs which clothe the mountainsides, and preparing the ground for the seed. Rice and cotton are the principal productions; but tobacco and some esculent vegetables are planted by the sides of streams. Over this range there are several passes; but that called the Aeng route is superior to all others, and is an excellent road, by means of which, before the Burmese war of 1825, a great trade was carried on between Arracan and Ava, in which it is said 40,000 men were annually employed. Subsequently, however, this commerce declined, on account of the want of confidence in the Burmese government and people. There are several low ranges of hills stretching along the coast, but all are considered ramifications of the great chain. They abound in forests. The principal rivers of Arracan are

the Myoo, Kuladyne or Arracan river, Lemyo, Talak, and Aeng. The sources of the three former are among the mountains to the north of Arracan, about lat. $22^{\circ} 30'$. They flow in a southerly direction, and are on an average not more than twenty miles distant from each other; after a course of about 150 miles they disembogue into Hunter's Bay, where they are connected by numerous creeks, and by which the communication in this part is carried on. The Talak river is for many miles nothing more than a mountain torrent, and is only navigable for the last twenty-five miles of its course. The Aeng river during the spring tides is navigable up to the town of that name, which is forty-five miles from its mouth. Both this river and the Talak take their rise in the Yoomaloung mountains, and empty themselves into Combermere Bay, twenty-five miles east of the town of Khyouk Phyoo. There are no lakes in the province. The climate of Arracan has generally been considered very injurious to Europeans, as well as to the natives of other parts of India; and the great mortality of the troops engaged in the first Burmese war afforded melancholy illustration of the truth of this belief. It is only the interior, however, which is characterized by the great degree of unhealthiness; Akyab, Sandoway, and Khyouk Phyoo, situate on the seashore, have long been known to be far more favourable to the retention of health than most parts of the province, while the town of Arracan and the village of Talak, situate inland, are peculiarly injurious. There are various indications of a volcanic nature in Arracan. Along the coast, and in the islands of Ramree and Cheduba, are situated "earthy cones covered with a green sward," from which issue springs of muddy water, emitting bubbles of gas. Two severe earthquakes have taken place in the province; one in 1763, the other in 1833. By the latter four hills were rent asunder to the width of from thirty to sixty feet; and in the plains its effects were shown by "the earth opening in several places and throwing up water and mud of a sulphurous smell." From Nayadong mountain, near Khyouk Phyoo, in the island of Ramree, vapour and flame were seen to issue to the height of several hundred feet. Of the mineral resources of this country very little is known. In some parts, however, iron-ore is found, and in Ramree some iron-mines were once worked; but the working has long been discontinued, the quality and price of the product rendering competition with that imported from Great Britain hopeless. In the island of Cheduba iron is found, but in such small quantities as to be of no value. Coal has been found in the Sandoway district, and in the island of Ramree, near Khyouk Phyoo. Favourable reports have been made of its quality, but it has not been extensively worked. There are several petroleum-wells in the islands of Ramree and Cheduba, and the oil found is of excellent quality, though not produced in

great quantities. A profusion of fine forests deck the summits and sides of the mountains; the principal trees are the oak and teak, masses of which clothe those forming the northern and eastern frontier. The creeks and nullahs which intersect the numerous valleys and alluvial plains, being dammed up, and turned to the purposes of irrigation, render the country peculiarly suited for the cultivation of rice, its staple produce, and of which it yields the richest crops in India, and affords a large surplus for exportation. No manure enriches the ground, the irrigation it receives rendering its application unnecessary. There are various other products in Arracan. The chief of these are tobacco, sugar, cotton, indigo, and black and red pepper. Arracan possesses no manufacture of any importance; but salt is produced to some extent in parts of the province near the coast, and in the island of Ramree, especially at the harbour of Khyouk Phyoo. It is obtained entirely by solar evaporation, is of excellent quality, and forms an article of exportation. A kind of coarse cloth is woven by the women, but it is worn only by the people of the province. One of the many advantages accruing to this province from British administration is the steady increase of commerce since it has come into the possession of that government. Rice and salt constitute the chief articles of exportation; the others are tobacco, sugar, wood-oil, betel-nut, buffalo-hides and horns, elephants' teeth, dried fish, and edible bird-nests. Akyab is the principal port of the province, and the trade is there considerable. The province is divided into three districts. The first and largest is Akyab, or Arracan proper. It consists of a valley running parallel to the seashore, and is very low and flat. The second, Sandoway, comprehending the mainland between the eighteenth and nineteenth degrees of latitude, is mountainous, and intersected by rivers running across from west to east. The capital town is Sandoway, and is considered the most healthy station of the province. The third, Ramree, which includes Aeng and the islands of Ramree and Cheduba. The first of these is considerable, and is separated from the mainland by a narrow and navigable channel. Cheduba is separated from Ramree by a channel some miles broad, and its capital, Khyouk Phyoo, is situate on the northern extremity of the island. It is considered healthy. The aboriginal inhabitants of Arracan are termed Mughs. When the province came into the possession of the British, the population was only about 100,000. In 1831 it had increased to 173,000, and in 1839 to 248,000. It is now upwards of 321,000. In 1839 the Mughs amounted to more than half the population. This is probably the case still, though the comparative numbers must have been in some measure affected by the immigration consequent on the increase of commercial prosperity. Education to a certain extent is very general

throughout the province; and there are few persons to be found who cannot read. The instruction of the children is part of the duty of the priest, who is employed in this description of labour a great part of the day. The boys assemble in the monasteries, and go generally at the age of ten years. They are taught reading, writing, and arithmetic. There is no difference between the education of the rich and the poor. The alphabet contains thirty-six letters, which are written from left to right; they use either the palm-leaf or a kind of paper manufactured from the bark of a tree. The vernacular language of the Mugh is similar to the Burmese. The character is just the same. Seven government English schools have been established in the province; three in the town of Akyab, and four in that of Ramree. Several youths have recently been placed in the Medical College at Calcutta. Previous to admission into this institution, they undergo a course of instruction in the English language, and are then drafted into the college, where they receive the necessary training, with a view to future employment in the medical service in their native country.

The history of Arracan, till the year 1184, comprises an account of the reigns of 120 princes. We are informed by the only document possessed by the Mughs which pretends to be an historical record (called by them *Ra-dzawang*,—History of Kings), that the first of these rulers died after a long and happy reign, in the Mugh era 63, corresponding with A.D. 701. The period of which this history treats does not fail to exhibit those scenes of treachery, usurpation, dethronement, and assassination so characteristic of the history of an Indian native state, and there can be no reason for doubting that in this respect at least the picture bears some resemblance to the truth, whatever degree of authenticity it may display in general. In 1783 Arracan was invaded and conquered by the Burmese. Thenceforward the history of the country becomes part of that of Ava, under which head its continuation will be found. The first war between that state and the British government ended in the transfer to the latter of certain portions of the Burmese territory, of which Arracan was one. The annexation of this province was considered necessary, not so much from its resources or the fertility of its soil (for a large part was swamp and jungle), as from the barrier afforded by the Yoomadoun mountains against any aggression upon the British territory in that quarter. Since, however, this province has been included in the catalogue of British possessions, a sterile and unprofitable tract has been transformed into a highly-cultivated country, trade has increased to an extent that could not be contemplated, and the variety and quality of the productions of Arracan have been found to equal those of almost any other part of India. The benefits accruing to the inhabitants from

these changes may be truly estimated by considering that, instead of being engaged in incessant feuds and quarrels, they are now a peaceable, contented, and happy people, engaged in the ordinary operations of life.

ARRACAN.—Formerly the capital town of the province of the same name, but which, long decreasing in importance, is now comparatively of little consequence, and only interesting on account of its old associations. It is situate in a valley on the banks of a small branch of the Arracan or Kuladyne river, and is about fifty miles from the sea. This valley is intersected by numerous streams and nullahs, all of which overflow, and “convert it into a noisome swamp.” It is surrounded on all sides by hills varying in height from 200 to 500 feet: the hollows between them consist of swamps and jungles. On the summits of these hills many temples and pagodas have been erected, which at a distance give a lively and picturesque appearance to the scene. None are of any importance, except to the worshippers of Gautama, of which deity each contains an image. The town is straggling, and the houses are poor and small, constructed of bamboo, and raised several feet from the ground, to protect them from the water, which in the time of inundation flows under them. The principal street lies along the bank of the stream which divides the town, and over which several ill-constructed wooden bridges are thrown. Before the war the place was much larger, and contained at one time, it is said, 18,000 houses; but the number of those inhabited must be fearfully decreased, for, according to Pemberton, the population in 1835 amounted only to 8,000 or 10,000. The town contains but one place of any particular interest, and that is the ancient fort of Arracan, which is now in a state of ruinous decay. The British succeeded in taking this fort by assault, on the 1st April, 1825. There is one bazaar in the town, where provisions of all kinds are procurable, and the shops are well supplied with muslins, cloths, and other articles of British manufacture, including glass, crockery, and cutlery; which articles are generally imported from Calcutta. The position of Arracan, in a swampy valley, and surrounded with hills, is “particularly calculated to engender that condition of the surrounding atmosphere which long experience has shown to be productive of febrile disease.” Arracan has been the grave of many of the British troops, who fell victims to the insalubrity of the climate. From this cause, and from its inconvenient situation in a commercial point of view, it is matter neither of surprise nor regret that it should have been superseded by the towns of Akyab and Khyouk Phyoo. This place was taken by the Burmese in 1783; and its capture, in 1825, by the British under General Morrison, was followed by the subjugation of the whole province. Lat. 20° 42', long. 93° 24'.

ARRACAN RIVER.—A large stream discharging the waters of the Coladync, and other rivers of Arracan, into the Bay of Bengal. "The entrance of this river is low, and has some rocks near it called the 'Fakiers,' covered at high water." Lat. 20° 5', long. 92° 57'.

ARRAH, in the British district of Shahabad, lieut.-gov. of Bengal, a town on the route from Dinapore to Ghazee-pore, 25 miles W. of former, 75 E. of latter. Supplies and water are abundant, the surrounding country being fertile and well cultivated, and a large and beautiful lake being close to the town. There is a government school here. According to Buchanan, the town contains 2,775 houses. Lat. 25° 31', long. 84° 43'.

ARRIATOR, in the British district of Trichinopoly, presidency of Madras, a town on the route from Tanjore to Cuddalore, 24 miles N. of the former. Lat. 11° 8', long. 79° 8'.

ARRULL.—A town in the native state of Cutch, under the political superintendence of the presidency of Bombay, distant N.W. from Bhoj 39 miles. Lat. 23° 26', long. 69° 11'.

ARUL, in Sindé, is a watercourse, or channel, proceeding from the south-eastern part of Lake Manchur (an expansion of the Narra), and discharging its water into the Indus, on the western side, about four miles below Sehwan, after a course of about twelve miles. At Sehwan it is a deep, sluggish stream 200 feet wide. The Narra, the lake, and the Arul form a continuous channel communicating at both extremities with the Indus, and running for above 100 miles nearly parallel to it on the western side. As the current is very moderate in this channel during the inundation, it is then more frequented than the main stream. It falls into the Indus in lat. 26° 24', long. 67° 55'.

ARUN, the principal tributary to the Coosy river, rises in Thibet, in several streams, situate between lat. 87° and lat. 88°, and about long. 28° 45', and flows upwards of 200 miles through Thibet, first in a south-easterly, and then in a westerly direction, to the great snowy range of the Himalayas, where, in lat. 28° 12', long. 86° 53', "it passes between their mighty peaks, and receives the torrents which rush from their northern face." The Arun then flows in a southerly direction for 110 miles through Nepal, to its junction with the Coosy, in lat. 26° 58', long. 86° 57'.

ARUNDAWULL.—A town in the native state of Jeypoor, one of the hill zemindaries, under the political superintendence of the government of Madras, distant W. from Vizianagrum 85 miles. Lat. 18° 24', long. 82° 12'.

ARUNG.—A town in the territory of Nagpoor, distant E. from Nagpoor 184 miles. Lat. 21° 11', long. 82°.

ARWAL.—See URWUL.

ARWAPULLY.—A town in Hyderabad, or dominions of the Nizam, distant E. from Hyderabad 70 miles. Lat. 17° 20', long. 79° 34'.

ARWEE.—A town in the territory of the rajah of Nagpore, distant W. from Nagpore 48 miles. Lat. 20° 57', long. 78° 27'.

ASAMOW, or HUSESMOW, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Cawnpore to that of Calpee, and thirteen miles north-east of the latter. The road in this part of the route is excellent; the country well cultivated, and studded with small villages. Lat. 26° 15', long. 79° 55'.

ASHTA, in the British territory of Sattara, presidency of Bombay, a town on the route from Meeruj to Sattara, 20 miles N.W. of former. Lat. 16° 57', long. 74° 28'.

ASHTA.—A town in Hyderabad, or dominions of the Nizam, distant N.W. from Hyderabad 203 miles. Lat. 19° 22', long. 76° 19'.

ASHTA, in Malwa, in the territory of Bhopal, a town on the route from Saugor to Mhow, 158 miles S.W. of former, 79 N.E. of latter. It is situate on the right or east bank of the river Parbutty, crossed near the town by ford. Here is a fort with a large tank, and supplies are abundant. Malcolm states the number of houses at 500, an amount which assigns a population of about 2,500 persons. It is the chief place of a pergunnah, stated to contain 244 khalsa villages, or such as belong to the government, and seventy-three allotted as jagirs or fiefs. When Hunter passed in 1792, it was held by a Mahratta chief; but having been subjugated by the British government, was by treaty, in 1818, granted, with four other pergunnahs, to the nawaub of Bhopal, to mark the approbation of his zeal and fidelity, and to enable him to maintain the contingent force, as he had stipulated. Distant S.E. from Oojein 59 miles, S.W. from Allahabad 373, S. from Agra 310. Lat. 23°, long. 76° 41'.

ASHTEE, or ASHTA, in the British collectorate of Sholapore, presidency of Bombay, a small town or village near the eastern frontier, towards the territory of the Nizam. Here, in February 1818, the Peishwa, in his hopeless flight after the battle of Poona, was surprised by a British force commanded by General Smith; and though Gokla, the Mahratta commander, made a gallant and skilful attempt to secure the fortune of the day by turning the right flank of the British, and charging their rear, he was overthrown and slain, and the Peishwa compelled to hasten his flight. The titular rajah of Sattara and some of his family were thereupon rescued from the thrall of the Peishwa, and subsequently invested with a limited dominion. Ashtee is distant S.E. from Poona 112 miles. Lat. 17° 50', long. 75° 29'.

ASHTEH.—A town in Hyderabad, or dominions of the Nizam, distant S.E. from Ahmednuggur 39 miles. Lat. $18^{\circ} 49'$, long. $75^{\circ} 15'$.

ASHWAPOOR.—A town in Hyderabad, or dominions of the Nizam, distant E. from Hyderabad 160 miles. Lat. $17^{\circ} 50'$, long. $80^{\circ} 54'$.

ASHWAROWPETTA.—A town in Hyderabad, or dominions of the Nizam, distant E. from Hyderabad 175 miles. Lat. $17^{\circ} 15'$, long. $81^{\circ} 11'$.

ASKOT, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a town 42 miles E. of Almora. Lat. $29^{\circ} 48'$, long. $80^{\circ} 22'$.

ASMAH, in the British district of Mymensing, lieut.-gov. of Bengal, a town 52 miles E. from Jumalpoor, 61 miles W. of Silhet. Lat. $24^{\circ} 53'$, long. $90^{\circ} 53'$.

ASOPHGURH, in the British district Bijour, lieut.-gov. of the N.W. Provinces, a village and fort on the route from Moradabad to Hurdwar, and fifteen miles south of the latter. It is situate on the left bank of the Ganges, in a site which is described by Mundy as very unfavourable. "Asofghur, which must be the depôt of malaria and jungle-fever, is hemmed in on all sides by forests, intersected by spacious swampy plains, covered with the rankest and most luxuriant grass and rushes. The appearance of the country, and the very smell of the air, were enough to give a fit of the ague." Nearly opposite the village is a ferry over the Ganges, there 300 yards wide, rapid, and with a stony bottom. Lat. $29^{\circ} 45'$, long. $78^{\circ} 15'$.

ASPOOR, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Pilleebheet, and seven miles N.E. of the former. Lat. $28^{\circ} 26'$, long. $79^{\circ} 33'$.

ASSAM.—An extensive province at the north-eastern extremity of British India. It is bounded on the north-west and north by Dhotan; on the north-east by Thibet; on the south-east by Burmah and the Naga tribes; on the south by Cachar, Tuleram Senaputtee's country, Jynteah, and the country inhabited by the Cossyah tribes; and on the west by the British zillah Goalpara. It may be stated to extend from lat. $25^{\circ} 49'$ to $28^{\circ} 17'$, and from long. $90^{\circ} 40'$ to $97^{\circ} 1'$. The area is returned as 21,805 square miles. On the north, south, and east, Assam is bordered by mountains of great elevation. The face of the country within presents to the eye an immense plain, studded with numerous clumps of hills rising abruptly from the general level. In the number of its rivers Assam is said to exceed every country in the world of similar extent. The existence of sixty-one has been ascertained, and there are many others of less importance. The chief among them is the Brahmapootra, which traverses the entire

length of the valley, and divides it into two parts, the northern and the southern. The climate is said to bear some resemblance to that of Bengal, but its local position, and other modifying circumstances, render it far more temperate and equal. The degree of heat, even at the warmest season, is but moderate, and the nights are cool and refreshing throughout the year. The mean annual temperature is about 67° ; the mean temperature of the four months when the heat is greatest, about 80° ; that of the winter about 57° . The rains are of long continuance, commencing in March, and lasting until the middle of October. Earthquakes are frequent in Assam: few months pass without one or two shocks being experienced; but as in most countries where such occurrences are common, they are little regarded, and soon forgotten. The remembrance of one, apparently of extraordinary severity, in 1607, is preserved. By this convulsion a number of hills are stated to have been rent asunder, leaving wide and open chasms, and a few entirely disappeared; the earth opened in various places, throwing up water and mud; in other parts tracts of ground suddenly sunk, and a number of lives were lost. One of much less violence was officially reported to have taken place in 1847 at Nowgong, when several government buildings sustained considerable injury. Of the geology of Assam, it is said little is known in detail. Among the most useful of the mineral productions of the country, coal must be noticed. It has been discovered in a great variety of places on the north side of the Brahmapootra, and is believed to exist to a very great extent all along the southern side of the valley. The quality has not been sufficiently tested; but much of a tolerably fair character has been found, and it is believed that some much superior may be expected to reward the labour of further search. Iron-ore is met with in various places. In certain parts of Assam are brine-springs, from which salt is manufactured. The produce is said to be superior to that imported from Bengal; but, from various causes, it is fully as expensive. Gold-dust is washed down the rivers from the neighbouring hills; the deposits are richer in the upper parts of their respective courses, and fresh supplies are found at every monsoon. Most of the streams yield this much-valued produce in greater or less degree. Upon the zoology of Assam, it may be observed that the forests and mountains abound with wild animals. Elephants wander in large herds, and are very destructive. Many are killed in the forests, for the sake of the ivory which they furnish; and it is calculated that not less than 500 are annually caught in the province, and transported to different parts of India. Still their numbers are stated not to be perceptibly diminished. The mode of catching the wild elephant differs from that pursued in Chittagong. There large herds are surrounded by a mass of hunters, and a barri-

cade of trees being formed, with the addition of a trench, a number of tame elephants are sent into the inclosure, which is called a keddah, and the wild elephants are secured with ropes. In Assam a single elephant is selected from the herd, and fairly run down, when the animal is entangled by ropes attached to tame elephants, and thus rendered helpless. The rhinoceros inhabits the denser parts of the forest; it is also found in high grass-jungle, near miry swamps, where it is sought by the huntsman for the sake of its skin and horn. These animals are easily tamed, and may be seen at Gowhatty, harmless as cows, attended by a single man. Tigers abound, notwithstanding the large sums paid by government in the form of rewards for their destruction. Bears are numerous, as are also leopards, wild buffaloes, and wild hogs. The fox and the jackal are met with. Wild game is abundant, and the rivers teem with fish. The tea-plant was known to be indigenous in Upper Assam before that country was in our possession. It subsequently became an article of culture and preparation, under the management of natives of China skilled in those arts, and brought from that country at the instance of government. The subject naturally attracted notice in England, the great centre of commercial enterprise; and the formation of the Assam Tea Company, now some years in operation, was the result. The intercourse between Assam and Bengal proper is almost entirely maintained by water, the facilities afforded by the Brahmapootra and Ganges, with their connecting branches, being available throughout the year. The voyage upward, hitherto tedious, is about to be rendered prompt and facile by the establishment of river-steamers on the Brahmapootra. The population of Assam is returned at 710,000. They are chiefly Hindoos; but there is a proportion of Mussulmans, which has been estimated at a sixth of the whole. A commixture of various tribes and races seems to have composed the aggregate; irruptions of the hill people, and stragglers from other districts, aiding to form the mass. Education was little known previously to the efforts of the British government to extend it. There are now government schools, where English is taught as well as the vernacular. The schools devoted solely to the latter are rather numerous. There are considerable differences in the state of the different schools; but on the whole they appear tolerably efficient. The cost for each pupil is far less than in Bengal; but this is certainly a minor consideration in comparison with the successful results of expenditure. In addition to what is done by government, the American Baptist missionaries appear to have taken up the business of education with energy and success.

That the Assamese were a warlike people may be inferred, not only from their conquest of the country, but from their successful resistance of various attempts made on their independence by the rulers of the Mogul

empire while in the height of its vigour and military renown. The decline of the country dates from the latter part of the last century. In 1770 a rebellion broke out, which terminated in the expulsion of the rajah. Through the intervention of the British government, the rajah recovered his territories, and a British detachment was located in Assam, with the view of preserving the peace of the country. But the endeavour to effect a reconciliation between the prince and his disaffected chiefs proving fruitless, the force was withdrawn after the expiration of a few months. The government was then seized by the minister, who for a time permitted the nominal sovereignty to remain with the royal family. From this period Assam seems to have been abandoned to anarchy. In 1815 the minister expelled the rajah and usurped his dominions. In this emergency the ex-rajah sought the aid of the Burmese, who replaced him upon the throne, but after a brief reign again deposed him, and made Assam a dependency of Ava. On the breaking out of the first Burmese war, Assam was conquered by the British, and under the treaty with Ava, dated in February, 1826, the possession of the province was confirmed to them. A portion of Upper Assam was then constituted into a separate principality, and conferred upon Poorunder Singh, the rajah who had been expelled by the Burmese, and the remainder of the country became incorporated with the British dominions. The misgovernment, however, of Poorunder Singh, and his utter incapacity for the duties of his position, shortly led to the resumption of his territory, and in 1838 the whole province was placed under British administration. Under British rule the country has decidedly improved, and there can be no doubt that the arts of civilization will gradually extend. The cultivation of the tea-plant will give occupation to the industry of the people, and conduce to their increased prosperity. The government, however, have been constantly annoyed by the hill tribes, whose apparently irreclaimable habits of marauding have furnished occasion for very serious discussions on the means of restraining them. In dealing with such persons, severe measures would obviously be the first to present themselves to the mind; but the home authorities, always reluctant to resort to such measures, have recommended the exercise of that personal influence which has been so successful in similar cases occurring in other parts of India, and the adoption of a course of conciliation, tempered, however, by a judicious firmness, that will not suffer crime to be perpetrated with impunity.

ASSAPOOR.—A town in the native state of Indoor, or possessions of Holkar, distant S.W. from Indoor 30 miles. Lat. 22° 18', long. 75° 39'.

ASSAYE, in Hyderabad, or territory of the Nizam, a village on the south or right

bank of the Juah, in the doab or tongue of land inclosed between that river and the Kaitna, flowing more to the south. Both rivers are fordable, except in the height of the rainy season. Here on the 23rd September, 1803, Major-General Wellesley, subsequently duke of Wellington, gained a brilliant victory over a combined Mahratta force of immense superiority in point of numbers. The British troops engaged amounted only to about 4,500 men, while the Mahratta force, in addition to 10,500 men disciplined and commanded by European officers, consisted of irregular infantry of about the same amount, and a body of cavalry estimated at not less than 30,000; the whole constituting an army of upwards of 50,000 men. A medal, struck in commemoration of the victory, was presented in 1851, with the sanction of the Queen, to the surviving officers and soldiers who took part in the action. Distance from the city of Hyderabad N.W. 261 miles, from Aungabad N.E. 43. Lat. 20° 18', long. 75° 55'.

ASSEAGAUM.—A town in Hyderabad, or dominions of the Nizam, distant S. from Ellichpoor 75 miles. Lat. 20° 9', long. 77° 22'.

ASSEERGURH.—A hill-fort at the north-eastern angle of the presidency of Bombay. It is situate on an isolated mountain, detached from the Satpoora range, dividing the valley of the Taptee from that of the Nerbudda, and its site is estimated to be 750 feet above the base of the mountain. The extreme length of the fortified summit from east to west is about 1,100 yards, the breadth from north to south about 600. In consequence of the great irregularity of the outline, the area is small in proportion to those dimensions, being not more than 300,000 square yards. According to Ferishta, Asseergurh was first made a place of strength in the fourteenth century, by Asa, a zemindar, surnamed Ahir, or "cow-herd," from his great wealth in cattle; and that author adds, that the family had previously possessed the mountain for nearly seven centuries. The troops of Nasir Khan, sovereign of Candeish, having by a base stratagem obtained entrance to the fort, murdered Asa and all his family; and the rulers of Candeish retained possession until 1599, when it was blockaded by Akbar, to whom it was surrendered. Subsequently to the dismemberment of the empire of Delhi, it fell into the power of Madhaje Scindia, from whom it was taken by the British, under Colonel Stevenson, in 1803; but in the same year was restored by the treaty of Serji Anjengaum. In 1819 it was besieged by a British force under Brigadier-General Doveton, to whom it surrendered on the 9th April, after a vigorous resistance; and has ever since remained in the occupation of a British garrison. A medal, struck in commemoration of its capture in 1803, was in 1851 presented, under the sanction of the Queen, to the surviving officers and soldiers who took part in the siege. Distant S.E. from Mow 90

miles, N.E. from Bombay 290. Lat. 21° 26', long. 76° 26'.

ASSOORILLEE.—A town in Hyderabad, or dominions of the Nizam, distant N.E. from Hyderabad 142 miles. Lat. 18° 40', long. 80° 13'.

ASSYE.—See **ASSAYE**.

ASUN, a small river of the British district of Dehra Doon, has its source from a spring rising close under a temple a short distance north-west of the town of Dehra. This source is in lat. 30° 20', long. 78° 4', and at the elevation of 2,148 feet above the sea. The Asun, collecting several rivulets, the greater part from the south-western declivity of the mountains of Gurwhal, holds a north-westerly course of about twenty-six miles, and falls into the Jumna on the left side, a short distance below Rajghat, and at the elevation of 1,469 feet above the sea; thus falling a little more than twenty-six feet a mile. The confluence is in lat. 30° 26', long. 77° 43'.

ASUN, or **AHSIN**, in the territory of Gwalior, a small river rising about lat. 25° 59', long. 77° 38'. It takes a direction generally north-east, and in lat. 26° 36', long. 78° 28', joins the Kooaree, a small river, which, sixty-five miles lower down, or farther to the S.E., falls into the river Sindh. The total length of course of the Asun is about eighty miles. At thirty miles from its source, and in lat. 26° 28', long. 78° 6', it is crossed by means of an easy ford on the route from Agra to Gwalior.

ATALMALICA.—A town in the native state of Keunjur, one of the Cuttack mehals, under the political superintendence of the government of India, distant E. from Sumbulpoor 80 miles. Lat. 21° 14', long. 85° 12'.

ATER, in the territory of Gwalior, a town on the right bank of the Chumbul, 46 miles N.E. of the fort of Gwalior. It is situate among quicksands and jungly ravines, and is consequently difficult of access. Before its subjugation by the Mahrattas, it was the residence of a petty rajah, whose dwelling was a castle on the west of the town, inclosed with a rampart having towers. Lat. 26° 44', long. 78° 43'.

ATHGATH, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town on the route from Etawah to Agra, 20 miles W. of the former. Lat. 26° 47', long. 78° 47'.

ATKA, in the British district of Ramgurh, lieutenant-gov. of Bengal, a town on the route from Calcutta to Sherghotty, 70 miles S.E. of the latter. Lat. 24° 6', long. 85° 49'.

ATORNI, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to that of Muttra, and ten miles north-east of the former. The road in this part of the route is wide and in general good; the country level, and well cultivated. Lat. 27° 13', long. 77° 58'.

ATPAREE, in the British district of Sattara, presidency of Bombay, a town 65 miles S.E. from Sattara, and 65 miles S.W. of Sholapur. Lat. $17^{\circ} 26'$, long. 75° .

ATROWBA TELHENE, in the British district of Azimgurh, lieutenant-gov. of the N.W. Provinces, a town the principal place of the pergunnah of the same name, is situated on the route from the town of Azimgurh to Faisabad, in Oude, and 24 miles N.W. of the former, in lat. $26^{\circ} 20'$, long. $82^{\circ} 56'$.

ATROWLEE, the principal place of the pergunnah of the same name, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, on the route from Futteghur to Meerut, by Bolundshuhur, and 101 miles N.W. of the former. It is a large open town, with a bazaar; and water and supplies may be had in abundance. Population 12,722. Lat. $28^{\circ} 2'$, long. $78^{\circ} 20'$.

ATROWLEEA, in the British district of Azimgurh, lieutenant-gov. of the N.W. Provinces, a town on the route from Azimgurh to Sultanpur, 25 miles N.W. of the former. Lat. $26^{\circ} 17'$, long. $83^{\circ} 1'$.

ATTA, in Bundelcund, in the British territory of Jaloun, a town on the route from Calpee to Jhansi, 11 miles S.W. of the former. It has a bazaar, and supplies and water are abundant. Lat. $26^{\circ} 3'$, long. $79^{\circ} 40'$.

ATTAIA, in the British district of Mymensing, lieutenant-gov. of Bengal, a town on the route from Dacca to Bograh, 49 miles N.W. of the former. Lat. $24^{\circ} 11'$, long. $89^{\circ} 53'$.

ATTANAGAR, in the district of Salon, territory of Oude, a town situated on the river Sai, 65 miles S.E. of Lucknow, 55 N.W. of Allahabad. Butter estimates the population at 6,000, all cultivators, of whom two-thirds are Mussulmans. Lat. $26^{\circ} 6'$, long. $81^{\circ} 20'$.

ATTARAN, a river in the Amherst district of the Tenasserim provinces, formed by the junction of two streams, the Zimme and the Weingo, in lat. $16^{\circ} 8'$, long. $98^{\circ} 9'$. The united current flows for forty-five miles in a north-westerly direction, and falls into the Moulmein river about three miles above the town of Moulmein, and in lat. $16^{\circ} 31'$, long. $97^{\circ} 44'$.

ATTARAN, in the British district of Amherst, Tenasserim provinces, a town 39 miles S.E. from Moulmein, and 30 miles N.E. of Amherst. Lat. $16^{\circ} 9'$, long. $98^{\circ} 10'$.

ATTAUREE.—A village in the Punjab, five miles from the right bank of the Sutlej. Lat. $30^{\circ} 34'$, long. $73^{\circ} 56'$.

ATTOCK.—A fort and small town in the Punjab, on the left or east bank of the Indus, 92 miles from the sea, and close below the place where it receives the water of the Kabul river, and first becomes navigable. The name, signifying *obstacle*, is supposed to have been given to it under the presumption

that no scrupulous Hindoo would proceed westward of it; but this strict principle, like many others of similar nature, is little acted on. Some state that the name was given by the emperor Akbar, because he here found much difficulty in crossing the river. The river itself is at this place frequently by the natives called Attock. Here is a bridge, formed usually of from twenty to thirty boats across the stream, at a spot where it is 537 feet wide. In summer, when the melting of the snows in the lofty mountains to the north raises the stream so that the bridge becomes endangered, it is withdrawn, and the communication is then effected by means of a ferry. The banks of the river are very high, so that the enormous accession which the volume of water receives during inundation scarcely affects the breadth, but merely increases the depth. The rock forming the banks is of dark-coloured slate, polished by the force of the stream, so as to shine like black marble. Between these "one clear blue stream shot past." The depth of the Indus here is thirty feet in the lowest state, and between sixty and seventy in the highest, and runs at the rate of six miles an hour. There is a ford at some distance above the confluence of the river of Kabool; but the extreme coldness and rapidity of the water render it at all times very dangerous, and, on the slightest inundation, quite impracticable. On the right bank, opposite Attock, is Khyrabad, a fort, built according to some by the emperor Akbar, according to others by Nadir Shah. The fortress of Attock was erected by the emperor Akbar in 1581, to command the passage; but though strongly built of stone on the high and steep bank of the river, it could offer no effectual resistance to a regular attack, being commanded by the neighbouring heights. Its form is that of a parallelogram; it is 800 yards long and 400 wide. The town, which is inclosed within the walls of the fort, was formerly considerable, but has now gone greatly to decay. The population is estimated by Burnes at 2,000. Runjeet Singh obtained possession of Attock with his characteristic trickery, having by a bribe induced the Afghan commander to surrender it to him. Lat. $33^{\circ} 54'$, long. $72^{\circ} 20'$.

ATTREE.—A large watercourse sent off by the Teesta, in the British district of Dinajepore, presidency of Bengal, in lat. $26^{\circ} 22'$, long. $88^{\circ} 48'$. The great stream of the Teesta, deriving its origin from the mountains of Nepal, separates in two branches, the Attree proceeding south; the other, continuing to bear the name of Teesta, flows south-east. The Attree, proceeding from the point of divergence for forty-seven miles, through the districts of Dinajepore and Rungpoor, throws off at that distance a branch termed the Purnababa. Thence it continues its course in a southerly direction through Dinajepore for sixty miles, when it forms the boundary be-

tween this district and Bograh for twenty miles. It then passes into the British district Rajshahye, through which it flows south and south-east for seventy-five miles, before passing into the British district Pubna, through which it continues to flow S.E. for fifty miles, expanding into numerous marshes and jhils, or small lakes, and ultimately falling into the Konaie (an offset of the Brahmapootra), in lat. 23° 59', long. 89° 45', having had a total length of course of about 252 miles. Like other Indian rivers, it is differently denominated in different parts of its course, and towards its mouth is known by the name of Balasar. It communicates right and left with many other rivers; and so gentle is the slope of its waterway, from the alluvial level character of the tract which it traverses, that it may justly be compared to a channel through the Soonderbunds. It is navigable throughout during the rainy season for boats between thirty and forty tons burthen, but in the dry season the navigation is much impaired.

ATUK.—A town in the native state of Bhawalpoor, distant W. from Bhawalpoor 28 miles. Lat. 29° 25', long. 71° 20'.

ATUVA, in the British district of Vizagapatam, presidency of Madras, a town 23 miles S.W. from Vizianagrum, and 23 miles N.W. from Vizagapatam. Lat. 17° 59', long. 83° 10'.

AUCKLAND BAY.—A bay on the coast of the district of Mergui, in the Tenasserim provinces. The entrance is surrounded by islands and rocks, forming the Mergui Archipelago. The centre of the bay is in lat. 12° 5', long. 98° 40'.

AUKLAH.—A town in Hyderabad, or dominions of the Nizam, distant S.W. from Nagpore 90 miles. Lat. 20° 8', long. 78° 19'.

AULAPOLAY, or **ALEPPI**, in the native state of Travancore, a town on the seacoast, having a considerable trade in timber, betelnut, coir or cocoanut-fibre, pepper, cardamoms. There is no shelter for shipping, but large ships may anchor in five or five and a half fathoms, and smaller in four fathoms, about four miles from the shore. The land has here encroached on the sea, and having in front a soft mud-bank, a ship may ride in this locality with less risk than on any other part of the coast. Bartolomeo describes this place, about 1788, as "of considerable size, inhabited by a large number of Pagans, Mahometans, and Christians of St. Thomas." It communicates southward with Quilon and Trivandrum, the capital of Travancore; northwards with the town of Cochin, by means of canals dug parallel to the sandy seacoast, and connecting the series of lakes or backwaters. Between these and the sea is a communication by a wide creek or inlet, through which is floated the timber for exportation, as hither is conveyed for disposal the produce of the rajah's forests, extending over the valleys and declivities of the Western Ghauts. The rajah has also here an establish-

ment for building small craft. Distance from Cochin city, S., 33 miles; Cannanore, S.E., 178; Mangalore, S.E., 255; Bangalore, S.W., 255; Madras, S.W., 366. Lat. 9° 30', long. 76° 24'.

AULATODDY, in the British district of South Canara, presidency of Madras, a town 46 miles S.E. from Mangalore, and 36 miles N. of Cannanore. Lat. 12° 20', long. 75° 16'.

AURAG RIVER.—A feeder of the Mahanuddy, rising in lat. 21° 20', long. 82° 43', in the native state of Phooljer, on the south-west frontier of Bengal, and flowing in an easterly direction for 100 miles through the native states of Bora Samba, Patna, and Sonopoor, falls into the Tell Naddes on the left side, in lat. 20° 51', long. 83° 54', seventeen miles before its junction with the Mahanuddy.

AURUNG.—See **ARENGO**.

AURUNGABAD, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a town on the route from the city of Agra to the cantonment of Muttra, and four miles south-west of the latter. Here, October 4th, 1804, a British convoy, consisting of a party of sepoys in charge of a hundred camels loaded with grain, were surrounded by a large detachment of Mahratta horse, who made booty of the cattle and grain, and made prisoners of the troops and camp-followers. The road in this part of the route is heavy and sandy in parts; the country is cut up by ravines, and partially cultivated. Lat. 27° 26', long. 77° 47'.

AURUNGABAD, in the British district of Moorsheadabad, lieut.-gov. of Bengal, a town on the route from Burhampore to Rajmahal, 31 miles S.E. of the latter. Lat. 24° 37', long. 88° 2'.

AURUNGABAD, in the territory of Oude, a town on the route from Seetapoor cantonment to that of Shahjehanpoor, 28 miles N.W. of the former, 34 E. of the latter. Tieffenthaler describes it as having a brick-built palace, inclosed with a wall, and adjoining a fort of quadrangular ground-plan, and having low hexagonal towers. At present it has a bazaar, and is supplied with water from wells. The road in this part of the route is bad, the country open and waste. Lat. 27° 47', long. 80° 27'.

AURUNGABAD, in Hyderabad, or the territory of the Nizam, a city near the north-western frontier, towards the British district Ahmednuggur. It is situate on the river Doodna, a tributary of the Godavery. Approached from the east, the view is pleasing, trees being interspersed among the houses, and a tall mausoleum rearing its dome and minarets above the other buildings. There is a wall of the kind common in India, low, but strengthened with round towers. The palace, built by Aurungzebe, originally a structure of no great dimensions or architectural beauty, is now in so decayed a state that it is unsafe to pass through the ruins. The chief ornament

of the city is the mausoleum, also built by Aurungzebe, to receive, it is said, the remains of a favourite daughter. It bears some resemblance to the famous Taj Mahal of Agra, but is in every respect greatly inferior. Aurungabad was formerly the capital of the extensive *sobah* or province of the same name, comprehending a considerable proportion of the ancient Deccan kingdom of Ahmednuggur. It is now described as an expanse of ruined buildings. The town is amply supplied with water, and has been selected for one of the stations of the army of the Nizam. Of the present amount of population there is no correct account; but in 1825 it was estimated at 60,000; at the present time it most probably falls far short of that number. Distance from Ahmednuggur, N.E., 68 miles; Poona, N.E., 188; Bombay, N.E., 175; Hyderabad, N.W., 270; Nagpur, S.W., 263. Lat. $19^{\circ} 51'$, long. $75^{\circ} 21'$.

AUTANCURRAY, in the British district of Madura, presidency of Madras, a town on the seacoast of Palk Strait, 11 miles S.E. of Ramnad. Lat. $9^{\circ} 20'$, long. $79^{\circ} 4'$.

AUTERIAH.—A town in the territory of Nagpore, distant S.E. from Ramgurn 40 miles. Lat. $22^{\circ} 23'$, long. $81^{\circ} 26'$.

AUTGAWN.—A town in the native state of Patna, one of the petty states on the south-west frontier of Bengal, distant S. from Sumbulpoor 60 miles. Lat. $20^{\circ} 40'$, long. $83^{\circ} 39'$.

AUTGURH.—One of the petty native states on the south-west frontier of Bengal, known as the Cuttack Mehals, which became tributary to the British government upon the conquest of the province of Cuttack in 1804. Autgurh, the principal town, is situate 20 miles W. of Cuttack. Lat. $20^{\circ} 31'$, long. $85^{\circ} 40'$.

AUTMALLIK.—A petty native territory on the south-west frontier of Bengal, forming one of the group of districts known as the Cuttack Mehals. It extends from lat. $20^{\circ} 34'$ to lat. $21^{\circ} 4'$, and from long. $84^{\circ} 16'$ to long. $84^{\circ} 50'$. It contains an area of 648 miles, with a population amounting to 29,160.

AUTOOR, in the British district of Madura, presidency of Madras, a town 31 miles N.W. from Madura, and 10 miles S.E. of Dindigul. Lat. $10^{\circ} 18'$, long. $77^{\circ} 55'$.

AUTUNKULL.—A town in the native state of Travancore, distant S.E. from Quilon 20 miles. Lat. $8^{\circ} 41'$, long. $76^{\circ} 52'$.

AVA, the capital of the Burmese empire, is situate on the left bank of the Irrawaddy, and on an island formed by that river, which flows along the northern face of the city, and two of its confluent, the Myit-nga and the Myit-tha; the former joining it above the town, at the north-eastern angle, and the latter below it, at the western extremity. In addition to the natural defences presented by these broad and rapid streams, the city is surrounded by a brick wall, fifteen feet in height and ten in thickness, strengthened by an in-

terior bank of earth, on the top of which is a *terre-plein*. The wall, however, except at certain points, is stated to be ill constructed and out of repair. Between the wall and the river is a ditch, which, though broad and deep in some places, is fordable in the dry season. Within the walls, which measure five and a half miles in circumference, are comprised the larger and the lesser town. The latter occupies the north-eastern quarter, and contains the royal palace, the hall of justice, the council-chamber, the arsenal, and the houses of several officers of distinction; the whole being inclosed by a strong, well-constructed wall, twenty feet in height, and defended on the exterior by a *teak-wood stockade*, of equal elevation. The palace is of modern date, and, as might be expected, is less remarkable in its architecture for harmony of proportion, or grandeur of design, than for richness and beauty in details. In the larger town the houses of the better class are, for the most part, constructed of planks, and tiled, few being built of brick; while those of the lower orders are mere huts: but even these, in point of airiness, elevation, and mode of construction, are represented as constituting better habitations for the poor than are to be met with in other Asiatic countries. In Bengal the sleeping-apartments of the larger portion of the population are level with the ground, while throughout the Ava territories the dwelling of every man is elevated in proportion to his means; and even those of the poorer classes are raised three feet above the ground. Though the country round Ava is well cultivated, there is little of bustle or activity within the town; and its stillness and tranquillity indicate no great extent of industry or amount of population. The latter has been estimated at from 25,000 to 30,000. Distant from Promé, N.E., 221 miles. Lat. $21^{\circ} 52'$, long. $96^{\circ} 1'$. For an account of the territory of which this place is the capital, see BURMAH.

AVANJAH.—A town in Hyderabad, or dominions of the Nizam, distant S.W. from Hyderabad 48 miles. Lat. $16^{\circ} 42'$, long. $78^{\circ} 19'$.

AVINASI, in the British district of Coimbatore, presidency of Madras, a town on the route from Coimbatore to Salem, 24 miles N.E. of the former. Lat. $11^{\circ} 11'$, long. $77^{\circ} 19'$.

AVUDERCOVIL, in the British district of Tanjore, presidency of Madras, a town 50 miles S. of Tanjore, and 50 miles N. of Ramnad. Lat. $10^{\circ} 5'$, long. $79^{\circ} 5'$.

AWEIN, in the British district of Amherst, one of the Tenasserim provinces, a town nine miles N.W. of the town of Ye, and 63 miles S.E. of Amherst. Lat. $15^{\circ} 20'$, long. 98° .

AWUN.—A town in the Rajpoot state of Jeypoor, distant S. from Jeypoor 80 miles. Lat. $25^{\circ} 48'$, long. $75^{\circ} 47'$.

AYA—AZU.

AYAGUDY, in the British district of Coimbatore, presidency of Madras, a town 29 miles N.W. from Dindigul, and 20 miles S. of Darapooram. Lat. $10^{\circ} 28'$, long. $77^{\circ} 38'$.

AYAH, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a town which with that of Sah gives name to the pergunnah of Ayah Sah. It is miscalled Teah by Rennell, and is situate nine miles S.W. of the town of Futtehpore. Lat. $25^{\circ} 51'$, long. $80^{\circ} 42'$.

AYEWARRA.—A town in the territory of Nagpore, distant N. from Nagpore 96 miles. Lat. $22^{\circ} 33'$, long. $79^{\circ} 20'$.

AYNOOR.—A town in Mysore, distant N.W. from Seringapatam 139 miles. Lat. 14° , long. $75^{\circ} 31'$.

AYRWA, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a town 33 miles S.W. from Futtighurh, 28 miles N.E. of Etawah. Lat. $26^{\circ} 54'$, long. $79^{\circ} 30'$.

AZEEMABAD, in Sirhind, a town on the route from Kurnal to Lodiana, and nine miles N.W. of the former place. Its site is slightly elevated above the neighbouring plain, which is under water in the rainy season. The town is surrounded by a high brick wall, pierced with loopholes for musketry, and having bastions surmounted with towers. Water is at all times obtainable from a large tank, rendered accessible by a flight of brick-built stairs. At the north of the town is a large caravansera, inclosed with a lofty embattled wall, having a handsome tower at each corner, and surrounded by a deep ditch capable of being filled with water. Azemabad is often in the maps mentioned with the alias of Tirowlee. Distant N.W. from Calcutta 1,098 miles. Lat. $29^{\circ} 48'$, long. 77° .

AZEZPOOR, a village in Sind, lies on the route from Subzulcote to Shikarpoor, and 18 miles a little south of west of the latter place. It is situate on the east bank of the Indus, over which is a ferry called Azezpoo Patan. By treaty of November, 1842, it was ceded, together with Subzulcote and several other towns, to Mahomed Bhawlkhan, and in the following February it was transferred accordingly. Lat. $27^{\circ} 52'$, long. $69^{\circ} 2'$.

AZGURPOOR, in the British district of Bolundshuhur, lieut.-gov. of the N.W. Provinces, a village on the route from Meerut to Muttra, and 54 miles N.E. of the latter. The road in this part of the route is good, the country open and partially cultivated. Lat. $28^{\circ} 12'$, long. $77^{\circ} 55'$.

AZIMGHUR.—A British district subject to the lieut.-gov. of the N.W. Provinces, and named from its principal place. It is bounded on the north west by the territory of Oude; on the north by the British district of Goruckpore; on the north-east by Sarun; on the south-east by the British district of Ghazepore, and on the south-west by the British

district of Jounpore. It lies between lat. $25^{\circ} 36'$ — $26^{\circ} 24'$, long. $82^{\circ} 45'$ — $84^{\circ} 12'$, and has an area of 2,520 square miles. The principal rivers are the Gogra, the Tons (north-eastern), and the Chota or Lesser Surjoo. The population is returned at 1,653,251. Populous towns are unknown. There are only three within the district containing more than 10,000 inhabitants. The principal routes through the district are—1. From north to south, from Goruckpore to Ghazepore. 2. From north-east to south-west, from Goruckpore to Azimghur, and continued thence to Jounpore cantonment. 3. From south-east to north-west, from Ghazepore to Azimghur, thence, in the same direction, to Faizabad, and from that place to Secora. 4. From south-east to north-west, from Ghazepore to Lucknow. The country was early subdued by the Rajpoots: an inscription at Deogana proves that in the middle of the twelfth century it was subject to the sovereign of Canouj, and on the subversion of that kingdom by the defeat and slaughter, in 1194, of Jaya Chandra, by Mohammed of Ghor, became part of the Patan kingdom of Delhi, with which, in 1528, it was by the conqueror Baber transferred to the Timurian or Mogul dynasty founded by him in Hindostan. On the dismemberment of the empire consequent on the invasion of Hindostan, in 1760, by Ahmed Shah Dooranee, the tract comprised within the present district of Azimghur was, with Oude and some other possessions, appropriated by Shooja-ud-dowlah, the nawaub vizier of Oude. By the treaty of the 10th November, 1801, it, with other districts, was ceded in commutation of subsidy, by the nawaub vizier Saadut Ali, to the East-India Company.

AZIMGHUR.—The principal place of the district of the same name, a town situate on the river Tons (north-eastern), here traversed by a bridge of boats, and navigable downwards to its confluence with the Surjoo. Azimghur was founded about 1620, by Azim Khan, a powerful zemindar, inheriting an extensive tract of country conferred on one of his ancestors by the imperial court of Delhi. Little respecting the town is stated by any European except Hamilton, who mentions that "a considerable quantity of cotton goods are manufactured and exported from this place and its vicinity." Population, including the cantonment, 13,322. Distant from Calcutta, N.W., *via* Ghazepore, 448 miles; from Benares, N., by Jounpore, 81; from Allahabad, N.E., 109; from Lucknow, S.E., 171. Lat. 26° , long. $83^{\circ} 14'$.

AZOEZPOOR, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Muttra to Delhi, and 27 miles N.W. of the former. The road in this part of the route is good. Lat. $27^{\circ} 46'$, long. $77^{\circ} 31'$.

AZUMPOOR.—A town in the British district of Bijnaour, lieut.-gov. of the N.W. Pro-

vinces, distant N.W. from Calcutta 890 miles; E. from Meerut 28 miles. Lat. 29°, long. 78° 14'.

R.

BABOOBUND, in the British district of Sumbulpoor, on the south-west frontier of Bengal, a town on the route from Sumbulpoor to Nagpoor, 11 miles W. of the former. Lat. 21° 22', long. 83° 52'.

BABRA.—A town in the province of Guzerat, or territory of the Guicowar, distant S.W. from Deesa 70 miles. Lat. 23° 50', long. 71° 8'.

BABRIAWAR, in the peninsula of Kattywar, province of Guzerat, a district named from the Babria tribe of Coolies, who formerly possessed the adjacent districts of Kattywar and Gohilwar, but have latterly been driven by the invading Kattis into this comparatively small tract. It is bounded on the north-west and north by the district of Kattywar; on the east by that of Gohilwar; on the south-east and south by the Arabian Sea; and on the south-west and west by the district of Sorath. It lies between lat. 20° 47'—21° 10', long. 71° 8'—71° 33'. The district contains thirty-three tallooks or subdivisions, seventy-one towns and villages, and a population estimated at 18,468, paying annually to the Guicowar a tribute of 10,677 rupees; besides which sum, the nawab of Joonaagurh, in consequence of a claim made by him over the district, extorts considerable sums as a sort of black-mail. Jaafarabad, the only collection of dwellings which can with propriety be denominated a town, is described in its place in the alphabetical arrangement.

BABRIGOTE, in the British district of Hyderabad, province of Sind, a town on the left bank of the main branch of the river Indus, 30 miles S. of Tatta. Lat. 24° 20', long. 67° 55'.

BACHMEYEE, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Mynpooree, and forty-nine miles south-east of the former. The road in this part of the route is bad, the country level, and partly covered with jungle, partly cultivated. Lat. 27° 42', long. 78° 50'.

BACHOONDA.—A town in the Rajpoot state of Joudpore, distant S. from Joudpore 55 miles. Lat. 25° 31', long. 73° 10'.

BACKERGUNGE (including Deccan Shahzapore).—A British district named from the town formerly the locality of its civil establishment, and within the limits of the lieutenant-gov. of Bengal. It is bounded on the north by the British districts Deccan, Jelalpoor, and Dacca; on the north-east and east by the British district of Bulloa, from which it is separated by the Meghna; on the south by the Bay of Bengal; on the south-west by the Sunderbunds; and on the west by the British

district of Jessore. It lies between lat. 22° 2'—23° 13', long. 89° 49'—91°, and has an area, according to official return, of 8,794 square miles. It is throughout a level alluvial country, watered by the two great rivers the Ganges and the Meghna, or Lower Brahmapootra, and by many streams or watercourses, offsets from those main rivers. The climate is regarded as generally healthy, being cooled by the numerous streams, so that the thermometer has not been known to rise above 88° in the shade. To guard against the widely-extending inundations, the houses of the natives are built on mounds, raised by excavating the ground for materials; and the depressions thus made serve as tanks, which in some parts of the district are very numerous and useful, as the water of the rivers is brackish. The soil is in general a rich alluvial mud, deposited by the streams, which often produce very violent effects, sweeping away land in some places and depositing it in others, where it is soon cultivated, and yields rich and abundant crops of rice. The jungles abound in wild beasts, including the rhinoceros, wild buffalo, tiger, leopard, wild swine, deer of various kinds, monkeys, and birds in vast variety and numbers. Besides rice, the principal crops are sugar-cane, cotton, wheat, pulse, mustard-seed, other oil-seeds, pease, and other pulses. The population, according to official statement, is 733,800, an amount which, compared with the area, shows a relative density of 193 to the square mile. It embraces a small number of native Christians, descendants from persons of half-blood between Portuguese and Hindoos. These Christians are of the Romish persuasion, and have a church at Seebpore. There are also some converts recently made by Baptist missionaries.

BACKERGUNGE, a town in the British district of the same name, lieutenant-gov. of Bengal, is situated on the offset from the Ganges called Backergunge Creek. It was the seat of the civil establishment of the district previously to its removal to Burrisol, the present locality. Distance from Burrisol, S., 12 miles; Calcutta, E., 125. Lat. 22° 33', long. 90° 22'.

BACOTEE, or **BUKOTHE**, in the British district of Cawnpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Futteghur to that of Cawnpoor, and 36 miles N.W. of the latter. Lat. 26° 53', long. 80° 6'.

BADAMEE, in the British district of Belgaum, presidency of Bombay, a town and hill fort on the route from Kuladgee to Bellary. The fort was taken by storm in 1818, by a detachment under Sir Thomas Munro. Distant 22 miles S.E. of Kuladgee. Lat. 15° 55', long. 75° 45'.

BADANPOOR.—A town of Central India, in the native state of Meyhar, distant S.W. from Rewah 40 miles. Lat. 24° 9', long. 80° 54'.

BADAPULLY.—A town in Hyderabad, or the dominions of the Nizam, distant S.W. from Hyderabad 49 miles. Lat. $16^{\circ} 45'$, long. $78^{\circ} 11'$.

BADARKA, in the district of Bainswara, territory of Oude, a town situate four miles east of the left bank of the Ganges, distant five miles E. of Cawnpore, 42 S.W. of Lucknow. Butter estimates the population at 8,000, of whom only fifty are Mussulmans. Lat. $26^{\circ} 28'$, long. $80^{\circ} 30'$.

BADERHAT, in the British district of Moorsheadabad, lieut.-gov. of Bengal, a town 11 miles W. from Moorsheadabad, 52 miles S. of Rajmahal. Lat. $24^{\circ} 16'$, long. $87^{\circ} 59'$.

BADHEE, or **BUDDEEA**, in the Pinjor Dhoon, a village on the Baladh, a small stream tributary to the Sursa. It is situate on an excellent military road leading from Pinjor to Malown and Belaspoor. Lat. $30^{\circ} 55'$, long. $76^{\circ} 53'$.

BADINOO, in the Rajpoot state of Bikaner, a village on the route from Rutungurh to the town of Bikaner, and 30 miles E. of the latter. It contains 200 houses, supplied with tolerably good water from a well 271 feet deep. Lat. $27^{\circ} 54'$, long. $73^{\circ} 51'$.

BADLEE, in the jaghire of Juhur, lieut.-gov. of the N.W. Provinces, a village on the north-eastern frontier, towards the British district of Delhi. Lat. $28^{\circ} 33'$, long. $76^{\circ} 51'$.

BADOWAS.—See BHARAWAS.

BADRAJ, a summit of the mountain bounding the Dehra Dun on the north, rises over the left bank of the Jumna, a short distance above its confluence with the Tons. It was a station in the trigonometrical survey of the Himalaya. Elevation above the sea 7,510 feet. Lat. $30^{\circ} 29'$, long. $78^{\circ} 1'$.

BADRAJ DEVI, in the British district of Jaunsar, a halting-place on the ascent to the fort of Bairat, in the mountains between the rivers Jumna and Tons. It was a station in the trigonometrical survey of the Himalaya. Elevation above the sea 6,043 feet. Lat. $30^{\circ} 33'$, long. $77^{\circ} 56'$.

BADRAJ MASRAS, in Gurwhal, a summit on a ramification from the great Manin Peak between the Jumna and Bhageerettee. It was a station in the trigonometrical survey of the Himalaya. Elevation above the sea 7,344 feet. Lat. $30^{\circ} 32'$, long. $78^{\circ} 7'$.

BADRINATH, in the British district of Gurwhal, lieut.-gov. of the N.W. Provinces, a town on the route from Serinagar to the Mana Pass, 25 miles south of the latter, and 55 north-east of the former. It is situate on the right bank of the Bishengunga, or Vishnugunga, a feeder of the Aluknunda, in the middle of a valley about four miles long and one broad; and is equidistant from two lofty mountains, one rising to the east, the other to the west. The bank on which it stands is sloping; that opposite is bolder, its brow being

on a level with the top of the temple of Badrinath, situate in the highest part of the town, and rising between forty and fifty feet from the ground. The building is of conical form, with a small cupola, covered with plates of copper, and surmounted by a golden ball and spire. The original establishment is reported to be of very great antiquity; the present temple has, however, a modern appearance, several former ones having been overwhelmed by avalanches, and an earthquake having shaken the present erection so seriously as to render necessary an almost entire restoration. A short distance below the temple is the Tapta Kund, a tank about thirty feet square, covered with a roof of planks, supported on wooden posts. It is supplied from a thermal spring, by means of a subterraneous communication, terminated by a spout in the form of a dragon's head. A thick smoke or steam, of a strong sulphureous smell, is sent forth by the water, which is so hot as to be scarcely endurable to the feet until the temperature is reduced by the admixture of cold water from another spring. In this manner a bath is formed, in which the sexes bathe indiscriminately. The ablution, accompanied by due adoration of the idol, and liberal fees to the attendant Brahmins, is considered so efficacious in cleansing from past offences, that from forty-five to fifty thousand pilgrims visit the shrine every twelfth year, when the Kumbh Mela is celebrated. They assemble at Hurdwar, and as soon as the fair there is closed, towards the middle of April, proceed on their round of pilgrimage in the mountains, by Devaprayag, Rudraprayag, Kedarnath, Badrinath, and home by Nana-prayag and Karnprayag. In ordinary years the number of pilgrims is considerably less. Much attention is ostensibly paid to the comforts and enjoyments of the deity, who is daily provided with a dinner, which is placed before the idol, and the doors of the sanctuary then closed, to leave him uninterrupted during his meal and subsequent repose. The doors are opened after sunset; and at a late hour, his bed being prepared, he is again inclosed, and left in solitude. The vessels in which he is served are of gold and silver, and a large establishment of servants is kept up. The temple is closed in November, and the treasure and valuable utensils buried in a vault beneath; and every human being connected with the establishment then proceeds to Josimath, or some other more genial wintering-place, Badrinath and its vicinity being at that season covered with deep snow. Some mountaineers once took advantage of a sudden thaw, and making their way to the treasury, plundered it of 900 pounds weight of gold and silver. They were, however, discovered and put to death. In former times the rajahs of Gurwhal frequently made free with the treasure, borrowing sums, and making over villages as security, which were never subsequently redeemed. From this and other sources, the institution obtained possession of 226 villages in Gurwhal

BAD—BAG.

and Kumaon, which, however, according to Traill, yield collectively an annual income of only 200*l.*; and as the annual expenditure sometimes exceeds the income derived from the offerings of votaries and the rents of the assigned lands, the deficiency is supplied by loan, to be repaid in years when the offerings of the pilgrims prove unusually large. The priests (Brahmins from the Deccan) are under the control of one of their own caste, called Rawul. As there are no women of their caste here, they live in a state of perfect celibacy, but are in truth a very profligate set; notwithstanding which, it is believed that through their mediation the deity holds forth an unqualified remission from transmigration. West of the temple about twelve miles is a group of six summits, called the Badrinath Peaks, having the elevations respectively of 23,441, 22,236, 22,934, 22,754, 22,556, and 21,895; and six miles to the south-west is a summit having an elevation of 21,385 feet above the sea. Elevation of the temple above the sea 10,294 feet. Lat. 30° 44', long. 79° 32'.

BADROOAH.—A town in the province of Guzerat, or dominions of the Guicowar, distant N. from Baroda 19 miles. Lat. 22° 30', long. 73° 10'.

BADSHAHNAGUR, in the British district of Shahjehanpore, lieutenant-gov. of the N.W. Provinces, a town on the route from Futtygurh to Shahjehanpore, seven miles S. of the latter. Lat. 27° 48', long. 80°.

BADSHAPOOR, in the British district of Jounpore, the principal place of the pergunnah of the same name, a town on the route from Allahabad to Jounpore, 30 miles N.E. of the former, 36 S.W. of the latter. It has a large bazaar and water, and supplies are abundant and good. Lat. 25° 40', long. 82° 10'.

BADULWALA, in the British district of Hurriana, lieutenant-gov. of the N.W. Provinces, a village near the southern frontier, towards Shekhawati. Lat. 28° 49', long. 75° 54'.

BAGAPAR, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a town 32 miles N. of Goruckpore. Lat. 27° 9', long. 83° 35'.

BAGEHWAREE, in the British district of Sholapore, presidency of Bombay, a town on the route from Beejapoor to Moodgul, 26 miles S.E. of the former. Lat. 16° 33', long. 76° 8'.

BAGESUR, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a small town at the confluence of the rivers Surjoo and Gaomati. It has a bazaar containing forty-two shops, all belonging to merchants permanently residing in the town of Almora, and frequenting this place for two months only in the year during the briskness of the trade with Tartary. There are two considerable fairs in the year for the purposes of that trade, which has latterly been greatly

on the increase. According to native tradition, the inhabitants of this place and its vicinity are the descendants of Moguls, left in Kumaon by Tamerlane's orders; and numerous tombs, substantially formed of large flat tiles, are, according to Traill, the memorials of that race. The elevation is something more than 3,000 feet above the sea. Distance N.E. of Almora 17 miles; N.W. from Calcutta, by Almora, 911 miles. Lat. 29° 50', long. 79° 49'.

BAGHAT, or **BUGHAT**, a district among the Cis-Sutlej hill states, is bounded on the north by a detached portion of Pateecala and by Burrowlee; on the east by Keyonthul; on the south-east and south by outlying possessions of Pateecala; and on the west by Beja, Kothar, and Subatoo. It is about nine miles long in a direction from south-east to north-west, and six in breadth; its area being about thirty square miles. Its centre is in lat. 30° 55', long. 77° 7'. On the expulsion of the Goorkhas, in 1815, the British government sold six pergunnahs of the ten which it comprised, to the rajah of Pateecala, for 13,000*l.*, and conferred the remaining four on the rana, or chief, although from his unfriendly conduct he had little claim to consideration. The population, assuming the average of the neighbouring country (114 to the square mile), would be about 3,420. On the death of the rana without heirs, in 1839, his territory was regarded as having escheated to the East-India Company, and the rajah of Pateecala offered to purchase it for 15,000*l.* Between 1839 and 1842, allotments of land were granted to individuals for locations, and a cantonment for an European regiment built on the hills. The annual land revenue was estimated at 285*l.*, out of which 128*l.* was paid to the relatives of the late rana. Doubts, however, were expressed at home as to the propriety of the resumption; and the question was referred by the then governor-general, Lord Ellenborough, to Sir George Clerk, at that time envoy at the court at Lahore, on whose report the escheat was set aside, and a younger brother of the deceased formally recognised as successor. This prince died in the beginning of the year 1849, and a claim to the succession was then preferred by a first cousin of the last two chiefs. The claim was not allowed; but a discretionary authority was given to the local government, either to resume the estate, or if more expedient, to bestow it on the claimant by a new sunnud, under proper conditions. The former alternative was adopted, and Baghat is now a British possession.

BAGHEL, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a small town near the south-eastern frontier, towards British district Sarun. According to Buchanan, it contains 100 houses, an amount which would assign it a population of about 600 persons. Distant S.E. from Goruckpore cantonment 45 miles. Lat. 26° 22', long. 83° 57'.

BAG.

BAGHIN.—A small river rising in Bundelcund, in the table-land surmounting the range of Panna, and in lat. $24^{\circ} 45'$, long. $80^{\circ} 23'$. It takes a course north-east for about twenty miles, and falls over the brow of the ridge in a cascade, the elevation of which is estimated by Jacquemont at 100 yards. Running north it enters the British district of Banda, and flows along the western base of Kalleenjur; a few miles beyond which it turns N.E., in which direction it continues until its fall into the Jumna on the right side, in lat. $25^{\circ} 33'$, long. $81^{\circ} 5'$. Its total length of course is about ninety miles. It is called Bagun by Garden, who mentions that it is crossed forty miles from its source by the route from Banda to Kalleenjur.

BAGHONDEE, in the Rajpoot state of Joudpore, a village on the route from Balmer to the town of Joudpore, and forty-nine miles east of the former. It is situate in the fertile low country on the north or right bank of the Loni, and near the confluence of the Leek, a torrent flowing from the north. Lat. $25^{\circ} 56'$, long. $72^{\circ} 12'$.

BAGHPUT, in the British district of Meerut, lieut.-gov. of Agra, a town the principal place of the pergunnah of the same name, with a population of 6,494 persons. Lat. $28^{\circ} 56'$, long. $77^{\circ} 17'$.

BAGLUNG CHAUR.—A town in the native state of Nepal, distant N.W. from Katmandoo 137 miles. Lat. $28^{\circ} 23'$, long. $83^{\circ} 15'$.

BAGMUTTEE.—A river rising in Nepal, and, according to Kirkpatrick, on the northern declivity of the mountain Shipuri, in lat. $27^{\circ} 53'$, long. $85^{\circ} 29'$, about eighteen miles direct N.E. from the city of Katmandoo. Taking a winding course, but generally south-west, it passes along the east side of Katmandoo, separating it from the contiguous town of Patn, situate on the left or east bank; and in this part of its course it assumes the appearance of a "respectable stream." Its meandering course in the mountain-gorges between the source and those towns is probably double the direct distance. Continuing its course generally southerly, it passes from the valley of Nepal into the Terrai, or jungly plain, at the foot of the mountains, and thence becomes navigable. Continuing its course in the same direction, it traverses or bounds in its course the British districts of Sarun, Mongheer, and Tirhoot; when, passing from the latter, it proceeds to its confluence with the Ganges, in lat. $25^{\circ} 23'$, long. $86^{\circ} 34'$, and about eight miles below Mongheer, but on the opposite side of the river. Its total length of course is about 285 miles. In its course through the plain it receives numerous streams right and left, and among them the lesser Gunduck; whence the united stream is frequently denominated the Gunduck.

BAGNAN, in the British district of Hooghly, lieut.-gov. of Bengal, a town on the

route from Calcutta to Midnapoor, 25 miles W. of the former. Lat. $22^{\circ} 28'$, long. $88^{\circ} 1'$.

BAGNEE.—A river of Bhotan, rising to the north of the main range of the Himalayas, about lat. $28^{\circ} 5'$, long. $89^{\circ} 31'$, and flowing in a southerly direction through Bhotan for 150 miles, joins the Guddada in lat. $26^{\circ} 18'$, long. $89^{\circ} 50'$; the joint streams finally falling into the Brahmapootra.

BAGNUGGUR.—See BAKHIRA.

BAGNUGOUR, in the British district of Goruckpore, lieut.-gov. of the N.W. Provinces, a town on the route from Goruckpore to Bansee, 21 miles N.W. of the former. Lat. $26^{\circ} 54'$, long. $83^{\circ} 8'$.

BAGORE.—A town in the Rajpoot state of Oodeypoor, distant N.E. from Oodeypoor 67 miles. Lat. $25^{\circ} 20'$, long. $74^{\circ} 30'$.

BAGROD, in territory of Gwalior, or possessions of Scindia's family, a town on the route from Saugor to Asseergurh, 39 miles S.W. of former, 245 N.E. of latter. It has a bazaar, and is provided with water from wells. Lat. $23^{\circ} 44'$, long. $78^{\circ} 13'$.

BAGUL, or **BHAGUL.**—A small hill state, bounded on the north by Sooket, from which it is separated by the Sutlej; on the east by Bhugee and Dhamee, and an outlying portion of Patceala; on the south-east by Koonear, and on the west by Hindoor, Kuhlloor, and Mangul. It is about eighteen miles long from north to south, and ten in breadth from east to west; containing probably a hundred square miles. The central part is situate about lat. $31^{\circ} 13'$, long. $77^{\circ} 1'$. Its surface has in general considerable elevation, especially in the west, which consists of a mountainous tract, containing the summit of Bahadurgarh, 6,233, and Bara Devi, 7,003 feet above the sea. The drainage of Bhagul is principally to the southward, in which direction several small streams and torrents flow and discharge themselves into the river Gunbur. A stream, called in the trigonometrical survey the Seer, flows in a north-westerly direction, and discharges itself into the Sutlej. Bhagul comprises twelve pergunnahs or districts, and has a population estimated at 40,000, and an annual revenue computed at 5,000*l.* sterling; out of which a tribute of 360*l.* is paid to the British government. This state was, on the expulsion of the Ghoorkas in 1815, restored by the British to the hereditary rajah, subject to the condition of maintaining 100 beegarrees, of making roads through the district, and in case of war, of joining the British troops with his forces. His armed retainers are about 3,000.

BAGULKOTA, in the British district of Belgaum, presidency of Bombay, a town on the route from Belgaum to Moodgul, 50 miles W. of the latter. Lat. $16^{\circ} 10'$, long. $75^{\circ} 46'$.

BAGUR.—A hilly tract comprising the eastern part of Guzerat and the western of Malwa, and containing the small states of

Banswara and **Doongurpoor**, and their numerous petty tributaries. It is a very rough country, consisting of numerous ranges running N. and S., and covered with thick jungle; yet its general elevation is inferior to that of Malwa, though greater than that of Guzerat. The boundaries are probably not very accurately defined; but this tract is laid down in Walker's Map of Western India as lying between lat. 23° 10'—24° 10', long. 73° 45'—74° 58'.

BAGURPOOR, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Meerut, and 23 miles W. of the former. Lat. 28° 54', long. 78° 29'.

BAH, in the British district of Agra, lieut.-gov. of the N.W. Provinces, giving with Pinnahut name to the pergunnah of Bah Pinnahut. It is situate three or four miles from the right bank of the Jumna, 40 miles S.E. of Agra. Lat. 26° 52', long. 78° 40'.

BAHA, in the British district of Agra, lieut.-gov. of the N.W. Provinces, a town 16 miles S.W. of the city of Agra. Lat. 27° 2', long. 77° 53'.

BAHADERPOOR, in Guzerat, or territory of the Guicowar, a town on the route from Dhuboi to Mow, six miles N.E. of former, 150 W. of latter. Lat. 22° 9', long. 73° 34'.

BAHADERPOOR, in the British district of Mirzapoor, lieut.-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 14 miles N.W. of Mirzapoor, or, higher up the stream, 735 N.W. of Calcutta by water, or 912 if the Sunderbund passage be taken. Lat. 25° 16', long. 82° 22'.

BAHADERPOOR, in the Rajpoot territory of Alwur, a village on the route from Delhi to the town of Alwur, and 11 miles N.E. of the latter. The road to the north, or towards Delhi, lies through the Kishengurh Pass, and is bad; to the south-west it is good. Lat. 27° 40', long. 76° 48'.

BAHADERPOOR.—A town in the province of Guzerat, or territory of the Guicowar, distant S.E. from Baroda 20 miles. Lat. 22° 10', long. 73° 30'.

BAHADOORGANJ, or **BAHADOORPOOR**, in the British district of Ghazeepeer, lieut.-gov. of Agra, a town on the route from Ghazeepeer cantonment to that of Gornuckpoor, 26 miles N. of the former, 75 S. of the latter. It is situate on the right bank of the Tons (north-eastern), called in this part of its course the Surjoo. Lat. 25° 48', long. 83° 21'.

BAHADOORGANJ, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from Bareilly to Peto-ragarh, and 42 miles N.E. of the former. Lat. 28° 44', long. 79° 53'.

BAHADOORGUNJE, in the British district of Purneah, lieut.-gov. of Bengal, a town 36 miles N.E. from Purneah, 69 miles

N.W. of Dinajepore. Lat. 26° 12', long. 87° 51'.

BAHADOORGURH.—A jaghire, or feudal possession under the political superintendence of the lieut.-gov. of the N.W. Provinces. It is bounded on the east and south by the British district of Delhi, and on the north and west by that of Rohtuk, and extends from lat. 28° 37' to 28° 49', and from long. 76° 54' to 77° 1'. The length of the estate from north to south is fourteen miles, and its breadth from east to west six miles, containing an area of forty-eight square miles. The population, if assumed at the average of the adjacent state of Rohtuk (300 to the square mile), would amount to 14,400. This jaghire, though comprehended in the grant made by the British government to the nawaub of Jhujur in 1806, was specified in the schedule thereto annexed as the portion conferred upon Mohummud Ismael Khan, the brother of the nawaub. For a time it constituted the sole possession of Bahadoor Jung Khan, the present nawaub of Bahadoorgurh; the separate pergunnah of Dadur, which was held by his father on the condition of military service, having been retained by the nawaub of Jhujur, who agreed to furnish the quota of horse for whose maintenance the fief had been bestowed. By recent accounts it appears, however, that Dadur has again reverted to Bahadoor Jung Khan. The nawaub of Bahadoorgurh is a Mahometan. His revenue amounts to 13,000*l.* per annum, and the military force maintained by him consists of 150 horse and foot.

BAHADOORGURH, on the route from Delhi to Hansi, and 18 miles W. of the former, is a considerable walled town, the capital of the jaghire or feudal territory of the same name. Lat. 28° 40', long. 76° 58'.

BAHADOORGURH, in the Cis-Sutlej hill state of Hindoor, a fort on a ridge forming the boundary between that state and Bagul. Elevation above the sea 6,233 feet. Lat. 31° 13', long. 76° 56'.

BAHADOORPOOR, in the territory of Gwalior, or possessions of Scindia's family, a fortified village on the route from Etawah to Gwalior fort, 67 miles S.W. of former, 17 N.E. of latter. Lat. 26° 16', long. 78° 23'.

BAHADOORPOOR, in the British district of Budayon, lieut.-gov. of the N.W. Provinces, a village on the route from Allyghur to Moradabad, and 33 miles S.W. of the latter. Lat. 28° 29', long. 78° 28'.

BAHAR.—See **BEHAR**.

BAHAR.—A town in the territory of Oude, distant S. from Lucknow 41 miles. Lat. 26° 17', long. 80° 52'.

BAHAWULPORE, a state of Western India, is bounded on the north-west for a short distance by Sind, and for the rest of the long frontier in that direction by the Punjab; on the east, south-east, and part of the south, by the British district of Bhut-

teeans and the Rajpoot states of Bickaneer and Jessulmere; and on the south-west angle by Sinde. It is a long narrow tract, of shape approaching to that of an elongated oval, lying between lat. $27^{\circ} 41'$ — $30^{\circ} 25'$, long. $69^{\circ} 30'$ — $73^{\circ} 58'$. It is 310 miles in length from north-east to south-west; 110 in breadth at the widest part, measured at right angles to the line of its length; and 22,000 square miles in superficial extent; of which, however, only about a sixth part is capable of cultivation. The north-western frontier is formed by a river-line, consisting in its successive parts of the Ghara, the Punjau, and the Indus. Bahawulpore is a remarkably level country, there being no considerable eminence within its limits, as the occasional sand-hills, seldom exceeding fifty or sixty feet in height, cannot be considered exceptions. The cultivable part extends along the river-line for a distance of about ten miles in breadth, from the left or eastern bank. In the sandy parts of the desert beyond this strip of fertility, both men and beasts, leaving the beaten path, sink as if in loose snow. The transition from the desert to the cultivated tract is very abrupt and striking. In the course of half a mile, or less, the country changes from a howling wilderness to a scene where thick and verdant groves, green fields, and luxuriant crops delight the eye, and offer supplies for all the wants of man. The population of Bahawulpore consists chiefly of Jets of Hindoo descent; of Hindoos of more recent settlement in the country; of Beloochees, and Afghans. The large admixture of the blood of the hardy mountaineers of the west causes the people to differ widely in appearance and constitution from the more eastern Hindoos. They are bulky, strong, dark-complexioned, and harsh-featured, with long hair and beards. The upper classes use the dress and language of Persia. The language of the bulk of the people is a *patois* of Hindostani, mixed with Pushtoo and Belooche, and is rendered disagreeable to strangers by the nasal drawing tone in which it is uttered. The khan and a great majority of the inhabitants are Mahomedans, but Hindoos are treated with much toleration. The dominant race is that generally known in the country by the name of Daudputrees, or sons of David; having been first collected, as is supposed, by David, a man of note, though of the weaver caste, at Shikarpore, in Sinde, who, being driven thence, found refuge in the present location of those who bear his name. Bhawl Khan, one of his descendants, founded the capital, and called it after himself, Bahawulpore. The present khan is the lineal descendant of the founder of the race. The annual revenue is about a million and a half of rupees.

The rulers of Bahawulpore were, during the flourishing state of the Durani monarchy, nawaubs, or deputy-governors, for that power. On its dismemberment, consequent on the expulsion of Shah Shoojah, the nawaub of

that time, without a struggle, became independent, and assumed the title of khan. On the rise of Runjeet Singh, the late ruler, Mahomed Bhawl Khan, in alarm for his own safety, tendered his allegiance to the British, and solicited their protection. It being the policy of the British government to make the Sutlej the boundary of Runjeet Singh's dominions, the khan's request was complied with as regarded his Cis-Sutlej territories. In 1838, upon the proposed restoration of Shah Shoojah to the throne of Cabool, it became expedient to fix the future relations of the nawaub, both with respect to the British and the restored king; and a treaty was accordingly concluded, by the terms of which Bahawulpore was released from allegiance to Cabool, and placed under the protection of the British government. The khan invariably acted as the steady friend of the British, and the support given by him to their troops in the wars in Sinde and Afghanistan was rewarded in February, 1843, by the annexation to his territories of a portion of the northern part of Sinde, including Subzulcote and the fertile district of Khoong Bara. At the commencement of the Mooltan rebellion in 1848, the khan volunteered to the British government the services of the whole of his military force. At the latter end of May, his troops, amounting to about 9,000 horse and foot, crossed the Sutlej, and effecting a junction with Capt. Edwardes and General Courtlandt, sustained an attack at the village of Kineyree from the army of Moolraj, amounting to 8,000 men with ten guns, which resulted in the complete discomfiture of the latter. For this service the khan, in addition to the reimbursement of his military expenditure, received a pension for life of 10,000*l.* per annum. In 1844 the nawaub readily ceded a strip of land on the Sutlej which was essential to the British for the continuance of a frontier customs-line to that river. Bhawl Khan died in 1852, and his eldest son Hajee Khan having been disinherited and imprisoned, the vacant throne fell to a younger son, Sadik Khan. Hajee subsequently escaped from prison, and being joined by many of the chiefs and people, and ultimately by the troops, succeeded in possessing himself of the country, and of the person of his brother. No part was taken in the contest by the British government. Upon its termination in favour of Hajee, they recognised the title of the candidate who, it appeared, was most acceptable to the population, and interfered no further than to obtain for the deposed nawaub a fitting stipend, with permission to reside within the British dominions. The total population of Bahawulpore has been rated at 600,000, but this estimate probably errs in excess. The principal towns are Bahawulpore the capital, Ahmedpoor, Ooch, and Khanpoor.

BAHAWULPORE, the capital of the state of the same name, is situated on a branch of

BAG—BAH.

Banswara and **Doongurpoor**, and their numerous petty tributaries. It is a very rough country, consisting of numerous ranges running N. and S., and covered with thick jungle; yet its general elevation is inferior to that of Malwa, though greater than that of Guzerat. The boundaries are probably not very accurately defined; but this tract is laid down in Walker's Map of Western India as lying between lat. 23° 10'—24° 10', long. 73° 45'—74° 58'.

BAGURPOOR, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Meerut, and 23 miles W. of the former. Lat. 28° 54', long. 78° 29'.

BAH, in the British district of Agra, lieut.-gov. of the N.W. Provinces, giving with Pinahut name to the pergunnah of Bah Pinahut. It is situate three or four miles from the right bank of the Jumna, 40 miles S.E. of Agra. Lat. 26° 52', long. 78° 40'.

BAHA, in the British district of Agra, lieut.-gov. of the N.W. Provinces, a town 16 miles S.W. of the city of Agra. Lat. 27° 2', long. 77° 53'.

BAHADERPOOR, in Guzerat, or territory of the Guicowar, a town on the route from Dhuboi to Mow, six miles N.E. of former, 150 W. of latter. Lat. 22° 9', long. 73° 34'.

BAHADERPOOR, in the British district of Mirzapoor, lieut.-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 14 miles N.W. of Mirzapoor, or, higher up the stream, 735 N.W. of Calcutta by water, or 912 if the Sunderbund passage be taken. Lat. 25° 16', long. 82° 22'.

BAHADERPOOR, in the Rajpoot territory of Alwur, a village on the route from Delhi to the town of Alwur, and 11 miles N.E. of the latter. The road to the north, or towards Delhi, lies through the Kishengurh Pass, and is bad; to the south-west it is good. Lat. 27° 40', long. 76° 48'.

BAHADERPOOR.—A town in the province of Guzerat, or territory of the Guicowar, distant S.E. from Baroda 20 miles. Lat. 22° 10', long. 73° 30'.

BAHAADOORGANJ, or **BAHAADOORPOOR**, in the British district of Ghazeepeer, lieut.-gov. of Agra, a town on the route from Ghazeepeer cantonment to that of Goruckpoor, 26 miles N. of the former, 75 S. of the latter. It is situate on the right bank of the Tons (north-eastern), called in this part of its course the Surjoo. Lat. 25° 48', long. 83° 21'.

BAHAADOORGANJ, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from Bareilly to Petoagarh, and 42 miles N.E. of the former. Lat. 28° 44', long. 79° 53'.

BAHAADOORGUNJE, in the British district of Purneah, lieut.-gov. of Bengal, a town 36 miles N.E. from Purneah, 69 miles

N.W. of Dinajepore. Lat. 26° 12', long. 87° 51'.

BAHADOORGURH.—A jaghire, or feudal possession under the political superintendence of the lieut.-gov. of the N.W. Provinces. It is bounded on the east and south by the British district of Delhi, and on the north and west by that of Rohtuk, and extends from lat. 28° 37' to 28° 49', and from long. 76° 54' to 77° 1'. The length of the estate from north to south is fourteen miles, and its breadth from east to west six miles, containing an area of forty-eight square miles. The population, if assumed at the average of the adjacent state of Rohtuk (300 to the square mile), would amount to 14,400. This jaghire, though comprehended in the grant made by the British government to the nawaub of Jhujur in 1806, was specified in the schedule thereto annexed as the portion conferred upon Mohummud Ismael Khan, the brother of the nawaub. For a time it constituted the sole possession of Bahadoor Jung Khan, the present nawaub of Bahadoorgurh; the separate pergunnah of Dadur, which was held by his father on the condition of military service, having been retained by the nawaub of Jhujur, who agreed to furnish the quota of horse for whose maintenance the fief had been bestowed. By recent accounts it appears, however, that Dadur has again reverted to Bahadoor Jung Khan. The nawaub of Bahadoorgurh is a Mahometan. His revenue amounts to 13,000*l.* per annum, and the military force maintained by him consists of 150 horse and foot.

BAHADOORGURH, on the route from Delhi to Hansi, and 18 miles W. of the former, is a considerable walled town, the capital of the jaghire or feudal territory of the same name. Lat. 28° 40', long. 76° 58'.

BAHADOORGURH, in the Cis-Sutlej hill state of Hindoor, a fort on a ridge forming the boundary between that state and Bagul. Elevation above the sea 6,233 feet. Lat. 31° 13', long. 76° 56'.

BAHADOORPOOR, in the territory of Gwalior, or possessions of Scindia's family, a fortified village on the route from Etawah to Gwalior fort, 67 miles S.W. of former, 17 N.E. of latter. Lat. 26° 16', long. 78° 23'.

BAHADOORPOOR, in the British district of Budayon, lieut.-gov. of the N.W. Provinces, a village on the route from Allyghur to Moradabad, and 33 miles S.W. of the latter. Lat. 28° 29', long. 78° 28'.

BAHAR.—See **BEHAR**.

BAHAR.—A town in the territory of Oude, distant S. from Lucknow 41 miles. Lat. 26° 17', long. 80° 52'.

BAHAWULPORE, a state of Western India, is bounded on the north-west for a short distance by Sind, and for the rest of the long frontier in that direction by the Punjab; on the east, south-east, and part of the south, by the British district of Bhut-

BAH.

teesana and the Rajpoot states of Bickaneer and Jessulmere; and on the south-west angle by Sinda. It is a long narrow tract, of shape approaching to that of an elongated oval, lying between lat. $27^{\circ} 41'$ — $30^{\circ} 25'$, long. $69^{\circ} 30'$ — $73^{\circ} 58'$. It is 310 miles in length from north-east to south-west; 110 in breadth at the widest part, measured at right angles to the line of its length; and 22,000 square miles in superficial extent; of which, however, only about a sixth part is capable of cultivation. The north-western frontier is formed by a river-line, consisting in its successive parts of the Ghara, the Punjnad, and the Indus. Bahawulpore is a remarkably level country, there being no considerable eminence within its limits, as the occasional sand-hills, seldom exceeding fifty or sixty feet in height, cannot be considered exceptions. The cultivable part extends along the river-line for a distance of about ten miles in breadth, from the left or eastern bank. In the sandy parts of the desert beyond this strip of fertility, both men and beasts, leaving the beaten path, sink as if in loose snow. The transition from the desert to the cultivated tract is very abrupt and striking. In the course of half a mile, or less, the country changes from a howling wilderness to a scene where thick and verdant groves, green fields, and luxuriant crops delight the eye, and offer supplies for all the wants of man. The population of Bahawulpore consists chiefly of Jets of Hindoo descent; of Hindoos of more recent settlement in the country; of Beloochees, and Afghans. The large admixture of the blood of the hardy mountaineers of the west causes the people to differ widely in appearance and constitution from the more eastern Hindoos. They are bulky, strong, dark-complexioned, and harsh-featured, with long hair and beards. The upper classes use the dress and language of Persia. The language of the bulk of the people is a *patois* of Hindostani, mixed with Pushtoo and Belooche, and is rendered disagreeable to strangers by the nasal drawing tone in which it is uttered. The khan and a great majority of the inhabitants are Mahomedans, but Hindoos are treated with much toleration. The dominant race is that generally known in the country by the name of Daudputrees, or sons of David; having been first collected, as is supposed, by David, a man of note, though of the weaver caste, at Shikarpoor, in Sinde, who, being driven thence, found refuge in the present location of those who bear his name. Bhawl Khan, one of his descendants, founded the capital, and called it after himself, Bahawulpore. The present khan is the lineal descendant of the founder of the race. The annual revenue is about a million and a half of rupees.

The rulers of Bahawulpore were, during the flourishing state of the Durani monarchy, nawaubs, or deputy-governors, for that power. On its dismemberment, consequent on the expulsion of Shah Shoojah, the nawaub of

that time, without a struggle, became independent, and assumed the title of khan. On the rise of Runjeet Singh, the late ruler, Mahomed Bhawl Khan, in alarm for his own safety, tendered his allegiance to the British, and solicited their protection. It being the policy of the British government to make the Sutlej the boundary of Runjeet Singh's dominions, the khan's request was complied with as regarded his Cis-Sutlej territories. In 1838, upon the proposed restoration of Shah Shoojah to the throne of Cabool, it became expedient to fix the future relations of the nawaub, both with respect to the British and the restored king; and a treaty was accordingly concluded, by the terms of which Bahawulpore was released from allegiance to Cabool, and placed under the protection of the British government. The khan invariably acted as the steady friend of the British, and the support given by him to their troops in the wars in Sinde and Afghanistan was rewarded in February, 1843, by the annexation to his territories of a portion of the northern part of Sinde, including Subzulcote and the fertile district of Bhoong Bara. At the commencement of the Mooltan rebellion in 1848, the khan volunteered to the British government the services of the whole of his military force. At the latter end of May, his troops, amounting to about 9,000 horse and foot, crossed the Sutlej, and effecting a junction with Capt. Edwards and General Courtlandt, sustained an attack at the village of Kineyree from the army of Moolraj, amounting to 8,000 men with ten guns, which resulted in the complete discomfiture of the latter. For this service the khan, in addition to the reimbursement of his military expenditure, received a pension for life of 10,000*l.* per annum. In 1844 the nawaub readily ceded a strip of land on the Sutlej which was essential to the British for the continuance of a frontier customs-line to that river. Bhawl Khan died in 1852, and his eldest son Hajee Khan having been disinherited and imprisoned, the vacant throne fell to a younger son, Sadik Khan. Hajee subsequently escaped from prison, and being joined by many of the chiefs and people, and ultimately by the troops, succeeded in possessing himself of the country, and of the person of his brother. No part was taken in the contest by the British government. Upon its termination in favour of Hajee, they recognised the title of the candidate who, it appeared, was most acceptable to the population, and interfered no further than to obtain for the deposed nawaub a fitting stipend, with permission to reside within the British dominions. The total population of Bahawulpore has been rated at 600,000, but this estimate probably errs in excess. The principal towns are Bahawulpore the capital, Ahmedpoor, Ooch, and Khanpoor.

BAHAWULPORE, the capital of the state of the same name, is situate on a branch of

the Ghara, about two miles from the main stream, and fifty miles above its confluence with the Chenaub. It is surrounded by a ruinous wall of mud, which is about four miles in circuit; but part of the inclosed space is occupied by groves of trees. The houses are built, some of burnt, some of sun-dried bricks, but they are in general mean. The residence of the khan, like the rest, is in a very plain style of architecture. Population about 20,000. A good road has been recently constructed from this town through the territory of Bikaner to Sirsa, in Bhutteana. Lat. 29° 24', long. 71° 47'.

BAHILI, in the native state of Bussahir, a mountain-ridge proceeding in a north-westerly direction to the left bank of the Sutlej from Moral-ke-kanda, a lofty range stretching south-westward from the Himalaya. On the summit is situate a fort, which, at the time of Fraser's visit, was a square redoubt, surrounded by an excellent stockade. Below it, but at a great depth, runs the Nowgurreekhola, a considerable stream, flowing from the east, and falling into the Sutlej on the left side. Lat. 31° 22', long. 77° 42'.

BAHMEIR, in the British district of Candesh, presidency of Bombay, a town 92 miles E. from Surat, 40 miles N.W. of Malligaum. Lat. 21° 4', long. 74° 17'.

BAHMINGAWN.—A town in the native state of Nepal, distant N.W. from Khatmandoo 240 miles. Lat. 29° 7', long. 81° 40'.

BAHNSDI, in the British district of Ghazepoor, lieutenant-gov. of the N.W. Provinces, a town six miles S.W. of the right bank of the river Ghogra, 47 N.E. of Ghazepoor cantonment. Lat. 25° 53', long. 84° 12'.

BAHR.—A village in the petty hill state of Beja, at the base of the range of hills bounding the Pinjor Dun on the north-east, and consisting in this part of slate, clay, sandstone, and trap. It is situate on the route from Pinjor to Subathu, and six or eight miles north of the former place. When visited by Lloyd, in 1822, it was a small hamlet, with one shop and a storehouse. It is now, however, more considerable, being the station where, in the road from the plains to Subathu, Simla, and Kotgurh, wheeled carriages, tents, and similar bulky articles are deposited, previously to resuming the journey with the aid of jampans, or mountain-sedans. The ascent to Bahr from Pinjor commences about three miles from the former place, and is very gradual and by a good road. From Bahr, in the direction of Subathu, there is an excellent road, originally made for military purposes. It is impracticable, however, for beasts of burthen loaded as in the plains; yet even camels, which are those least suited for hill-service, can proceed as far as Subathu with half-loads. Bahr is supplied with water by means of a small artificial channel cut from a mountain-stream. Elevation above the sea

2,500 feet. Distance N.W. from Calcutta 1,060 miles. Lat. 30° 53', long. 77°.

BAHREH.—See BARA RIVER.

BAHUL, in the British district of Haryana, lieutenant-gov. of the N.W. Provinces, a town on the route from Beekaneer to Hansee, 40 miles S.W. of the latter. Lat. 28° 38', long. 75° 40'.

BAICULL, in South Canara, within the territories subject to the presidency of Madras, a town and fort, the latter situate on a high point projecting southwards into the sea. The town, which stands to the northward of the fort, is very small and irregularly built. The tract within which this place is situate, is supposed at the remotest period of its history to have formed part of the realm ruled by the Cadumba dynasty, which was overthrown, it has been conjectured, in the second century of the Christian era. It subsequently became part of the great realm of Vijayanagar, on the destruction of which by the Mussulman confederacy at the battle of Telikot, in 1565, it was seized by the rajah of Bednor. On the conquest of that state by Hyder Ali, in 1763, it fell to that adventurer, and on the overthrow of his son Tippoo, in 1799, was incorporated with the dominions of the East-India Company. The town of Baicull is distant S.E. from Mangalore 37 miles; S.E. from Bombay 480; W. from Bangalore 177; W. from Madras 358. Lat. 12° 24', long. 75° 6'.

BAIJNATHI.—A town of the Punjab, in the native state of Mundi, one of the hill states north of the Sutlej, distant N.W. from Mundi 29 miles. Lat. 32°, long. 76° 43'.

BAILA.—A town in the territory of Nagpore, distant S. from Berar 25 miles. Lat. 20° 48', long. 79° 5'.

BAILA, or **BYLA**, in the British district of Jaunsar, a village on a high mountain close to the left bank of the Tons. Here was a secondary station during the great trigonometrical survey of the Himalayas. Elevation above the sea 6,318 feet. Lat. 30° 45', long. 77° 47'.

BAILAMAN.—A town in the native state of Mohurbunge, situate on the south-west frontier of Bengal, distant W. from Midnapore 85 miles. Lat. 22° 29', long. 86° 4'.

BAILEY ISLAND.—One of the group of islands forming the Mergui archipelago, off the Tenasserim coast. Lat. 12° 9', long. 97° 50'.

BAILGAON.—A town in the territory of Nagpore, distant N.E. from Nagpore 91 miles. Lat. 21° 58', long. 80° 16'.

BAIMLEY.—A town in Hyderabad, or the dominions of the Nizam, distant N.E. from Sholapoor 40 miles. Lat. 18° 9', long. 76° 16'.

BAING, a river of the Tavoy district of the Tenasserim provinces, rises in lat. 13° 27', long. 98° 51', and flowing in a northerly direction for sixty-five miles, falls into the river Tenasserim in lat. 14° 14', long. 98° 35'.

BAI—BAJ.

BAINPORE, in the British district of Midnapore, lieut.-gov. of Bengal, a town 29 miles N.W. from Midnapore, 46 miles S. of Bancoora. Lat. $22^{\circ} 35'$, long. 87° .

BAINROH, in Sirhind, a village on the route from Hansi to Ludiana, and 45 miles S. of the latter town. Distant N.W. from Calcutta 1,067 miles. Lat. $30^{\circ} 20'$, long. $75^{\circ} 57'$.

BAINSWARA, an extensive district of Oude, is bounded on the north-west and north-east by the district of Lucknow; on the south-east by the districts of Sultanpore, Salon, and Ahladganj; on the south-west by the Ganges, dividing it from the British districts Allahabad, Futtehpore, Cawnpore, and Furrukhabad—lies between lat. $25^{\circ} 55'$ — $26^{\circ} 48'$, long. $80^{\circ} 20'$ — $81^{\circ} 35'$, and is about seventy-five miles in length from east to west, and fifty-eight in breadth. It contains the following pergunnahs or subdivisions:—1. Ranjit Pura; 2. Harha; 3. Ateba; 4. Maulranwa; 5. Kunranwa; 6. Daundia-khera; 7. Hasanganj; 8. Majranow; 9. Haidargarh; 10. Rae Barali; 11. Dalama; 12. Sarendi; 13. Bardar.

BAINTGHUR, in the British district of Hijelie, lieut.-gov. of Bengal, a town on the river Russoolpore, 43 miles S.E. of Midnapore. Lat. $21^{\circ} 55'$, long. $87^{\circ} 47'$.

BAIRAT, in the British district of Jaunsar, N.W. Provinces, a fort on a summit of the range between the Tons and Jumna, and near the right bank of the latter river. It was a station of the large series of triangles in the great trigonometrical survey of the Himalayas. Elevation above the sea 7,599 feet. • Lat. $30^{\circ} 35'$, long. 78° .

BAIRCHUE.—A town in the native state of Gwalior, or possessions of the Scindia family, distant E. from Oojein 34 miles. Lat. $23^{\circ} 14'$, long. $76^{\circ} 20'$.

BAIREA, or **BYRIAH**, in the British district of Ghazeepeer, lieut.-gov. of the N.W. Provinces, a town on the left bank of the Ganges, six miles by water S. of Ghazeepeer cantonment, N.W. of Calcutta 607 by water, or 784 taking the Soonderbund channel. Lat. $25^{\circ} 29'$, long. $83^{\circ} 32'$.

BAIRKAIRA, in the British territory of Saugor and Nerbudda, under the lieut.-gov. of the N.W. Provinces, a town on the river Nerbudda, 39 miles W. of Jubbulpore. Lat. $23^{\circ} 6'$, long. $79^{\circ} 26'$.

BAIROOR.—A town in Hyderabad, or dominions of the Nizam, distant S.E. from Hyderabad 71 miles. Lat. $16^{\circ} 46'$, long. $79^{\circ} 26'$.

BAIRSEAH.—A district in Central India, bounded on the north, north-east, and east by Scindia's territory; on the south by Bhopal, and on the west by Omutwarra. It extends from lat. $22^{\circ} 26'$ to $23^{\circ} 52'$, and from long. $77^{\circ} 10'$ to $77^{\circ} 40'$, and has an area of 456 square miles. It was formerly a dependency

of Dhar, but overrun by the Pindarries previously to the dispersion of those plunderers by the British government under the administration of the marquis of Hastings. At the termination of the war it was ostensibly restored to Dhar by the treaty of 1819, but was to remain in the possession of the British for a term of five years, for the purpose of liquidating a loan; after which period it was still to continue under the management of the British government, which was thenceforward to account to the Dhar state for the revenue and produce of the district. This arrangement was probably suggested by the remoteness of Bairseah from the territory of Dhar and the seat of its government. In 1821 the district was ceded to the British government on condition of the annual payment of a lac of rupees; but the bargain being found a losing one, the state of Dhar was prevailed upon to take it back. This step was not approved by the home authorities, who expressed an opinion that Dhar had not been liberally dealt with. In consequence, the former relations were reverted to, and Bairseah is now a British possession, subject to the payment above mentioned.

BAIRSEAH.—A town in Malwa, the chief place of the British district of the same name. Lat. $23^{\circ} 37'$, long. $77^{\circ} 27'$.

BAITMUNGALUM.—A town in the native state of Mysore, under the administration and control of the government of India, distant N.E. from Seringapatam 110 miles. Lat. 13° , long. $78^{\circ} 16'$.

BAITOO, or **BEITOO**, in the British territory of Saugor and Nerbudda, lieut.-gov. of the N.W. Provinces, a town the principal place of the pergunnah of the same name, on the route from Nagpore to Mhow, 112 miles N.W. of former, 185 S.E. of latter. It is situated on the small river Machna, a tributary of the Towa, and in a pleasant valley at the south base of the Satpura range. There is a fort here. The pergunnah of Baitool contains seams of coal, but of no very good quality. The population of the pergunnah, by the last returns, was 93,441. The town of Baitool, originally under the dominion of the Guond rajah of Kerla, appears to have been subjugated about a century ago by the Bhonsla rajah of Nagpore or Berar; and in 1818 was, with the rest of Saugor and Nerbudda territory, ceded to the British government. Distant S.E. from Saugor 150 miles; S. from Agra 370; S.W. from Allahabad 356; W. from Calcutta 677; N.E. from Bombay 390. Lat. $21^{\circ} 50'$, long. $77^{\circ} 58'$.

BAJAROW, or **BUGREE**, in the Rajpoot state of Jeypore, a large village with a fort built on a rock, 59 miles S.E. of the city of Jeypore. Lat. $26^{\circ} 25'$, long. $76^{\circ} 27'$.

BAJEE, in Bussahir, a ruined fort on a summit of a ridge stretching north-eastward from the peak of Whartoo to the outer Hima-

laya. Elevation above the sea 9,105 feet. Lat. $31^{\circ} 15'$, long. $77^{\circ} 37'$.

BAJETPORE, in the British district of Mymensing, lieutenant-gov. of Bengal, a town 46 miles N.E. of Dacca, and 75 miles S.W. of Silhet. Lat. $24^{\circ} 12'$, long. $90^{\circ} 56'$.

BAJPOOR, in Guzerat, or the territory of the Guicowar, a town on the right bank of the river Taptee, distance from the city of Surat, N.E., 60 miles. Lat. $21^{\circ} 22'$, long. $73^{\circ} 48'$.

BAJUNI, in the hill state of Hindoor, a village on the route from Subathu to Bilaspoor, and 22 miles N.W. of the former town. It is situate near the Gamrara river, at the eastern base of the ridge of Malown; the fortress of which is built on the summit, 2,000 feet above it. Lat. $31^{\circ} 12'$, long. $76^{\circ} 52'$.

BAKAH,—A town in the territory of Nagpore, distant E. from Nagpore 104 miles. Lat. $21^{\circ} 2'$, long. $80^{\circ} 47'$.

BAKHIRA, or **BAGNUGGUR**, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a small town on the western bank of the Bukra lake. Buchanan, describing its condition nearly fifty years ago, states, "Bakhira contains 250 houses, surrounded by a ditch, rampart, and bamboo hedge, still very inaccessible, although not in repair." Allowing six persons to each house, the population may be estimated at 1,500 persons. It has a market. Distance N.W. from Goruckpoor cantonment 19 miles. Lat. $26^{\circ} 55'$, long. $83^{\circ} 4'$.

BAKHIRA JHIL, or **BUDANCH TAL**, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, so called from the small town of Bakhira, situate on its western bank, is thus described by Buchanan. "It is certainly the finest piece of fresh water that I have seen in India, but it will not bear a comparison in beauty with European lakes." He adds, that though generally known to Europeans by the name of Bakhira Jhil, the natives generally call it Parachi; and a nawab of Oude, accustomed to hunt on its bank, called it Moti Jhil, or "Pearl of Lakes." Distant 13 miles N.W. of the cantonment of Goruckpoor. Lat. $26^{\circ} 53'$, long. $83^{\circ} 5'$.

BAKRA,—A town in the Rajpoot state of Joudpore, distant N.W. from Joudpore 73 miles. Lat. $26^{\circ} 44'$, long. $72^{\circ} 3'$.

BAKROO,—A town in the Rajpoot state of Joudpore, distant S.W. from Joudpore 83 miles. Lat. $25^{\circ} 18'$, long. $72^{\circ} 30'$.

BAKUH,—A town in the territory of Nagpore, distant N. from Nagpore 74 miles. Lat. $22^{\circ} 12'$, long. $79^{\circ} 2'$.

BAKUL, or **PAKUL**, in the British district of Georagan, lieutenant-gov. of the N.W. Provinces, a village situate at the eastern base of a low rocky range of hills, partly of sandstone, partly of quartzose formation. Distance S. from Delhi 20 miles. Lat. $28^{\circ} 21'$, long. $77^{\circ} 17'$.

BALA,—A town in the Rajpoot state of Joudpore, distant E. from Joudpore 35 miles. Lat. $26^{\circ} 10'$, long. $73^{\circ} 41'$.

BALABET,—A town in the native state of Gwalior, or possessions of Scindia's family, distant N.W. from Saugor 40 miles. Lat. $24^{\circ} 20'$, long. $78^{\circ} 30'$.

BALAGHAT DISTRICTS.—This name designates a large tract of elevated country in the south of India, extending from the rivers Toombuddra and Krishna in the north, to the extremity of Mysore in the opposite direction. The area, excluding that part which forms the state of Mysore, is 28,669 square miles. The name Balaghat implies "above the ghauts," as Payenghat indicates "below the ghauts." The district formed part of the ancient Hindoo kingdom of Bijyanagar, or Carnata. It was conquered by the Mahomedans, and upon the fall of the Mogul empire was split into various states, more or less powerful and independent; some of them originating in the claims of official rank, some in local possession, and others in undisguised usurpation. The notorious Hyder Ali conquered, but did not tranquillize the country; the petty chiefs, called poligars, continuing to disturb it; these men, while exacting from the cultivators all that they could, being engaged in constant struggles with the government, to evade or withhold any payment on their own part. Hyder was succeeded by his son Tippoo Sultan, whose headstrong perverseness led him into hostilities with the British, which subjected him in the first instance to the deprivation of half his dominions, and ultimately to the loss of the whole. On his defeat and death, the country was partitioned. The chief of Kurnool was permitted to retain his patrimony, which was of ancient tenure. The remainder was shared among the rajah of Mysore (restored by the conquerors), the British, and the Nizam; but the whole is now either nominally or actually British. In 1800 the Nizam ceded his portion in commutation of subsidy. In 1841, the nawab of Kurnool, by misconduct, incurred the penalty of forfeiture; and Mysore, though not formally British territory, has long been under British management. Excluding Mysore, the country is divided into three districts, Bellary, Cuddapah, and Kurnool. Under the above heads more detailed information will be found.

BALAGUTCH, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town on the route from Mongheer to Hajepoor, 50 miles W. of the former. Lat. $25^{\circ} 29'$, long. $85^{\circ} 43'$.

BALAHARA, in the Rajpoot state of Jey-pore, a village with a fort, on the route from Agra to Ajmere, 78 miles W. of former, 150 E. of latter. It is situate close to a pass through a chain of rocky hills running north and south. At the close of the last century the fort was bombarded, and partially demolished by Duboisne, the general of Scindia. Lat. $26^{\circ} 57'$, long. $76^{\circ} 47'$.

BALAN.—A town in the Rajpoot state of Joudpore, distant S.E. from Beekaneer 51 miles. Lat. $27^{\circ} 19'$, long. $73^{\circ} 44'$.

BALANA, in the Rajpoot state of Jessulmer, a town in the desert, 35 miles N.E. of the city of Jessulmer. Lat. $27^{\circ} 18'$, long. $71^{\circ} 29'$.

BALAONEE, in the British district of Sattara, presidency of Bombay, a town 45 miles S.E. from Sattara; 29 miles N.W. of Meeruj. Lat. $17^{\circ} 11'$, long. $74^{\circ} 32'$.

BALAPOOR.—A town in Hyderabad, or dominions of the Nizam, distant S. from Hyderabad four miles. Lat. $17^{\circ} 18'$, long. $78^{\circ} 33'$.

BALARAMPOOR.—See **BULRAMPOOR**.

BALASINORE.—A petty native state or jaghire in the province of Guzerat, politically connected with the government of Bombay. It is bounded on the north by the Myhee Caunta; on the south-east by the Rewa Caunta; on the south-west and west by the British district of Kaira. It extends from lat. $22^{\circ} 53'$ to $23^{\circ} 17'$, and from long. $73^{\circ} 17'$ to $73^{\circ} 40'$, and contains an area of about 258 square miles. The jaghire is held by a Musulman nawaub, a scion of the powerful family of Babi. Joonaghur, in the peninsula of Kattywar, and Theraud, in Guzerat, are in the possession of other branches of the same family. The nawaub of Balasinore has an income of £1,541, out of which he pays annually a tribute of 1,000*l.* to the British government. The population is about 19,000. The jaghire was originally a grant from the government of Delhi, but in 1768 it became tributary to the Peishwa, by whose fall, in 1818, the claim passed to the British government. The estate was some years ago placed under attachment, in consequence of the murder of a state creditor, whose debt had been guaranteed by the British government, and was retained under British management pending the minority of the rajah, but restored to him in a flourishing condition in the year 1846, upon his attaining the age of nineteen. The nawaub maintains a small military force, consisting of fifty peons and eight horsemen, who are employed indiscriminately in revenue, police, and miscellaneous duties.

BALASINORE.—A town the chief place of the petty state bearing the same name. It lies on the route from Neemuch to Baroda, and supplies and water are abundant. It is surrounded by a wall, and is rather a thriving place. Distant from Neemuch, S.W., 147 miles; from Baroda, N., 49; from Ahmedabad, E., 49; from Mhow, W., 160; from Bombay, N., 280. Lat. $22^{\circ} 58'$, long. $73^{\circ} 20'$.

BALASORE, in the British district of Cuttack, within the lieut.-gov. of Bengal, a town situate near the Boorabullung, a small river falling into the Bay of Bengal a short distance to the eastward. The sea rises on the bar from twelve to fifteen feet in common spring tides, but there is not more than a depth of

two or three feet on the bar at low water in the dry season. Balasore is provided with dry docks, to which vessels can be floated during the spring tides. It is frequented chiefly by vessels from the Maldives, and by craft engaged in taking rice and salt to Calcutta. The situation of the town is unfavourable, being on a low dreary plain, deformed by numerous unsightly ridges and sandhills. The trade of the place was formerly extensive and important, but is now much decayed. The Portuguese and Dutch, in the early period of European intercourse, held possessions here, and a factory belonging to the Danes, with adjoining lands, was ceded to the British government in 1846 for a pecuniary consideration. As large ships cannot enter the river, they must be anchored in Balasore Roads, where they are in some degree sheltered, and may lie over good holding-ground five or six miles off shore. Balasore Roads form an extensive bay, which stretches from Point Palmyras to the south-westernmost banks at the mouths of the Hooghly. This town is the locality of the civil establishment of the northern division of Cuttack. Distance from Madras, N.E., 730 miles; Cuttack, N.E., 100; Nagpore, E., 507; Calcutta, S.W., 116. Lat. $21^{\circ} 30'$, long. 87° .

BALBFEGA, in the British district of Behar, lieut.-gov. of Bengal, a town on the route from Calcutta to Shergotty, 15 miles E. of the latter. Lat. $24^{\circ} 30'$, long. $85^{\circ} 6'$.

BALCHA, a pass on the frontier separating Gurwhal from Bussahir, lies over a crest of the ridge dividing the valleys of the rivers Tons and Pabur. This ridge is covered with lofty and dense forests, abounding in the celebrated deodar, considered identical with the cedar of Lebanon. Elevation of the pass above the sea 8,898 feet. Lat. $31^{\circ} 4'$, long. 78° .

BALCHORAH.—See **BALZORA**.

BALCONDAH.—A town in the native state of Hyderabad, or dominions of the Nizam, distant N. from Hyderabad 100 miles. Lat. $18^{\circ} 51'$, long. $78^{\circ} 20'$.

BALDHI, in Thibet, a town on the northern shore of the great lake of Yarbrough Youmtso, distant N. from Durrung 191 miles. Lat. $29^{\circ} 3'$, long. $91^{\circ} 14'$.

BALDOOM CHITTY, in the British district of Chota Nagpore, lieut.-gov. of Bengal, a town 95 miles E. from Sirgoojah, and 63 miles S.E. of Palamow. Lat. $23^{\circ} 4'$, long. $84^{\circ} 37'$.

BALEHBA.—A town in the Rajpoot state of Joudpore, distant W. from Joudpore 139 miles. Lat. $25^{\circ} 56'$, long. 71° .

BALIBANG.—A town in the native state of Nepal, distant W. from Khatmandoo 120 miles. Lat. $27^{\circ} 49'$, long. $83^{\circ} 21'$.

BALING, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a village on the right bank of the river Dhoul. Eleva-

tion above the sea 11,000 feet. Lat. 30° 12', long. 80° 35'.

BALIYA, in the district of Sultanpore, territory of Oude, a town 87 miles S.E. of Lucknow. It is situated in an extensive jungle, seven miles north of the left bank of the river Sai. Butter estimates the population at 6,000, all Hindoos and cultivators. Lat. 25° 55', long. 82° 5'.

BALKISSEN, in the British district of Burdwan, lieutenant-gov. of Bengal, a town 11 miles N. from Burdwan, and 27 miles W. of Nuddya. Lat. 23° 22', long. 87° 56'.

BALLAIRAI DROOG.—A town in Mysore, distant N.E. from Seringapatam 100 miles. Lat. 13° 9', long. 75° 29'.

BALLAMGARH.—See **BULBEGURH**.

BALLAPOOR.—A town in Mysore, distant N. from Bangalore 23 miles. Lat. 13° 17', long. 77° 36'.

BALLAPOOR.—A town in Mysore, distant N.E. from Seringapatam 99 miles. Lat. 13° 26', long. 77° 47'.

BALLAPOOR, in the territory of Oude, a town on the route from Cheetapoor to Sekrora, 30 miles S.E. of the former, 50 N.W. of the latter, 35 N. of Lucknow. Lat. 27° 22', long. 81° 6'.

BALLARY.—See **BELLARY**.

BALLASAR.—See **ATTREK**.

BALLAVEDDER.—A town in Mysore, distant N.W. from Seringapatam 152 miles. Lat. 14° 27', long. 75° 52'.

BALLEABERA, in the British district of Midnapore, lieutenant-gov. of Bengal, a town situate to the south of the route from Midnapore to Sumbulpore, 27 miles S.W. of the former. Lat. 22° 16', long. 87°.

BALLIAPUDDA, in the British district of Cuttack, lieutenant-gov. of Bengal, a town on the river Mahanuddy, 24 miles E. of Cuttack. Lat. 20° 27', long. 86° 19'.

BALLIAREE, in the British district of Hyderabad, province of Sind, a town on the northern boundary of the great western Runn of Cutch, 108 miles S.E. of Hyderabad. Lat. 24° 21', long. 69° 46'.

BALLPOOR, in the territory of Oude, a town on the route from the cantonment of Sekrora to that of Sultanpore, seven miles S.E. of the former, 76 N.W. of the latter, 50 N.E. of Lucknow. Lat. 27° 3', long. 81° 45'.

BALMER, in the Rajpoot state of Joudpore, a town of about six hundred houses, built principally of stone, with a small fort occupying the summit of a conical hill three hundred feet high, at the foot of which is the town. Distant S.W. from Joudpore 119 miles. Lat. 25° 47', long. 71° 22'.

BALAMOODRUM, in the British district of Madura, presidency of Madras, a town 31 miles W. from Dindigul, 54 miles N.W. of Madura. Lat. 10° 25', long. 77° 34'.

BALÓTRA, in the Rajpoot state of Joudpore, a town on the route from Balmer to the city of Joudpore, and 62 miles S.W. of the latter. It is situate on the right bank of the Loonwa, and on the high road from Joudpore to Dwarka, a celebrated place of pilgrimage at the western extremity of Guzerat. There is, consequently, a great thoroughfare of pilgrims and other devotees, and of those requisite to minister to their wants; so that the bazaar is crowded with passengers, and filled with goods of various kinds. The town is supplied with good water from 125 wells, lined with masonry. The population consists of 6,750 Hindoos and 525 Mussulmans. Lat. 25° 52', long. 72° 21'.

BALOUN.—A river rising in lat. 26° 41', long. 86° 22', in the Terai or marshy lands at the base of the Sub-Himalaya range. At the distance of eight miles from its source, it flows over the northern boundary of the British district of Tirhoot, and holding a course southerly for sixty miles, falls into the Gogaree in lat. 25° 50', long. 86° 16'.

BALOWAL, in the Sungurh district of the Damaun division of the Punjab, a town 60 miles N. of Dera Ghazee Khan, 70 miles S.W. of the town of Dera Ismael Khan. Lat. 30° 53', long. 70° 31'.

BALUMBA, in the peninsula of Kattywar, province of Guzerat, a town in the north-eastern quarter of the district of Hallar, and eight miles from the coast of the Gulf of Cutch. Distance from Ahmedabad, W., 139 miles; Baroda, W., 180. Lat. 22° 42', long. 70° 30'.

BALUNG.—A town of Bonei, one of the petty native states on the south-west frontier of Bengal, under the political superintendence of the government of India, distant N.E. from Sumbulpore 50 miles. Lat. 21° 42', long. 84° 46'.

BALWA.—See **BAUTWA**.

BALZORA, or **BALCHORAH**, in the territory of Oude, a fort and trading station near the northern frontier, towards Nepal. For two months every summer a mart is held at Balzora, the mountaineers bringing their native products to exchange for the wares of the plains. Distant N. from Lucknow 120 miles. Lat. 28° 34', long. 81° 12'.

BAMANWALA, or **BUNYAWALA**.—A village, with a Hindoo temple, in the British district of Dehra Doon. Here was one of the stations for the series of small triangles in the great trigonometrical survey of the Himalaya. Elevation above the sea 2,220 feet. Lat. 30° 19', long. 78° 1'.

BAMBHOLA, or **BOMBOLA**, in the native state of Kishengurh, in Rajpootana, a town on the route from Agra to Nusseerabad, 195 miles S.W. of former, 28 N.E. of latter. It has a bazaar, and water is abundant. Lat. 26° 27', long. 75° 12'.

BAM—BAN.

BAMBHORA, or **BHANIBORA**, in Busahir, a fort in the district of Chocora, on a lofty summit rising about two miles north of the right bank of the Pabur. Elevation above the sea 9,844 feet. Lat. $31^{\circ} 14'$, long. $77^{\circ} 50'$.

BAMINGOLAH, in the British district of Dinajepore, lient.-gov. of Bengal, a town 36 miles S.W. from Dinajepore, 15 miles N.E. of Maldah. Lat. $25^{\circ} 7'$, long. $88^{\circ} 21'$.

BAMNEE.—A town in Hyderabad, or dominions of the Nizam, distant E. from Janlnah 49 miles. Lat. $19^{\circ} 47'$, long. $76^{\circ} 41'$.

BAMO MYO, in Burmah, a town situated on the left or eastern bank of the Irawaddy river, 174 miles N.E. of Ava. Lat. $24^{\circ} 14'$, long. 97° .

BAMOULLI, or **BAMBOLEE**, in the Rajpoot state of Alwur, a village on the route from Muttra to the town of Alwur, and 12 miles S.E. of the latter. Lat. $27^{\circ} 29'$, long. $76^{\circ} 48'$.

BAMOURI, or **BUMBOUREE**, in the British district of Pillibheet, lient.-gov. of the N.W. Provinces, a police and trading station on the route from Bareilly to Almora, and 42 miles south of the latter. It is situate near the right bank of the Goula, or Bullea, which here passes from the mountains to the plain by an extensive ravine. The road, though a much-frequented channel of communication between the district of Kumaon and the plains, is, according to Heber, so difficult as not to be passable for horses accustomed only to the plain. Bamouri has an elevation above the sea of upwards of 1,700 feet. Lat. $29^{\circ} 13'$, long. $79^{\circ} 35'$.

BAMRA.—See **BOMBRA**.

BAMSARU, in Gurwhal, a pass over a mountain proceeding from the cluster of the Jumnotri peaks, separating the Ganges from the Jumna. Its summit enters within the limit of perpetual congelation, as a British party, which crossed it at the end of August, found it then covered with deep snow. Elevation above the sea 15,447 feet. Lat. $30^{\circ} 56'$, long. $78^{\circ} 36'$.

BAMUNGAON.—A town in the native state of Indore, or the possessions of the family of Holkar, distant S.W. from Mhow 41 miles. Lat. $22^{\circ} 6'$, long. $75^{\circ} 20'$.

BAMUNGAON.—A town in the Rajpoot state of Boondée, distant N.E. from Boondée 33 miles. Lat. $25^{\circ} 46'$, long. $76^{\circ} 5'$.

BAMUNHATEE.—A town of Mohurbunge, one of the petty native states on the south-west frontier of Bengal, under the political superintendence of the government of India. Distant W. from Midnapore 80 miles. Lat. $22^{\circ} 16'$, long. $86^{\circ} 10'$.

BAMUNWAS, in the Rajpoot state of Jeypore, a town on the route from Agra to Nussarabad, 102 miles S.W. of former, 118 N.E. of latter. It is of considerable size, has a bazaar, and water and supplies, except fire-

wood, are abundant. Lat. $26^{\circ} 34'$, long. $76^{\circ} 37'$.

BANAAR, an offset of the Brahmapootra river, leaving the parent stream opposite the town of Jamalpoor, in lat. $24^{\circ} 51'$, long. $90^{\circ} 4'$, and flowing in a southerly direction for 120 miles, to lat. $23^{\circ} 37'$, long. $90^{\circ} 31'$, where it falls into the Dulaseree river, about seven miles above its junction with the Megna.

BANAGANPILLY, in the British district of Cuddapah, presidency of Madras, a town on the route from Bellary to Guntoor, 90 miles E. of the former. Lat. $15^{\circ} 19'$, long. $78^{\circ} 17'$.

BANAIRA.—A town of Rajpootana, in the native state of Oodeypoor, distant N.E. from Oodeypoor 88 miles. Lat. $25^{\circ} 30'$, long. $74^{\circ} 45'$.

BANAPOOR.—A town in the territory of Nagpore, distant N.E. from Nagpore 92 miles. Lat. $22^{\circ} 10'$, long. $78^{\circ} 14'$.

BANAS (Eastern).—A river of Rajpootana, rising on the western frontier of Mewar, amidst a cluster of summits of the Aravulli range, five miles S.W. of the station or encamping-ground of Saimur, and in lat. $24^{\circ} 47'$, long. $73^{\circ} 28'$. The word is significant in Sanscrit, and means "Hope of the forest;" having been, according to the local legend, originally the name of a "chaste shepherdess, who, while disporting in the waters of this natural fountain, espied to her horror an intruder gazing on her charms," and praying for aid to the guardian divinity of the place, was metamorphosed into the stream. Holding its course through Mewar for 120 miles, it is joined by the river Beris, or Beruch. Having received the Beris on the right, and a few miles beyond that confluence the Botasari on the left, it continues its north-easterly course, receiving on the left the river of Ajmcir, and subsequently several torrents flowing from the territory of Jeypore in the rainy season. At the town of Tonk, and about 235 miles from its source, its direction changes, first to south-east, and sweeping round the hills in which are situate the stronghold of Rintambor, it falls into the Chumbul, in lat. $25^{\circ} 54'$, long. $76^{\circ} 50'$, after a total course of about 320 miles. The route of the British army under Monson, flying before Holkar, in 1804, lay across the river in this part of its course; and on the 22nd of August the stream was so swollen from flood as to be for two days impassable for the army.

BANASA, in Gurwhal, a village in the valley of the Jumna, and seven miles below the source of that river. It is situate on the left bank of the Jumna, at the confluence of the Banasa torrent, and on a natural ledge of rock, a series of which, in that part of the valley, rise over each other on the side of the mountain. The site is picturesque and sublime in the highest degree. The Banasa is at the confluence about two-thirds the size of the Jumna. In 1816, half the village of Banasa was overwhelmed and destroyed by the fall of a preci-

pice. In the vicinity are numerous thermal springs, the waters of which are too hot to be borne by the touch. Lat. 30° 56', long. 78° 27'.

BANAWARAM, in the territory of Mysore, a town situate in a fine open country on the side of a large tank, which, when visited by Buchanan, was dry. After various vicissitudes, it was, in 1694, taken in a night assault by Chika Deo, rajah of Mysore. Hyder Ali, in establishing his ascendancy over the posterity of that prince, made himself master of Banawaram in the latter part of the eighteenth century. At the time of his making this acquisition, it is said there were about two thousand houses in the place, but most of the inhabitants were removed, with those of five other towns, to Nagapuri, which Hyder had recently founded in the vicinity. The new town, however, being found extremely unhealthy, the surviving inhabitants, who had been drawn from Banawaram, were allowed to return home. Distance from Seringapatam, N.W., 76 miles; Bangalore, N.W., 100; Madras, W., 280. Lat. 13° 24', long. 76° 13'.

BANCANEER.—A town in the native state of Gwalior, or territory of the Scindia family, distant S.W. from Mhow 40 miles. Lat. 22° 13', long. 75° 14'.

BANCOORAH, a British district within the territories subject to the lieut.-gov. of Bengal, and having its name in common with its principal place. It is also called West Burdwan. It is bounded on the north by the British district Peerbhoom, on the east by the British district Burdwan, on the south by the British district Midnapore, and on the west by the British districts Pooralia and Pachete. It lies between lat. 22° 53'—23° 46', long. 87°—87° 39'; is 60 miles in length from N. to S., and 42 in breadth. The area is 1,476 square miles. It is generally a level tract, yet with gentle undulations, and inclining gradually towards the south-east, the streams all flowing in that direction. Among these may be mentioned the Hadjee and the Damoodah. Both streams are navigable for about ten weeks during the periodical rains of autumn, and are then the channels for the conveyance of iron and coal to Calcutta and its vicinity. The communication, however, though quick, is precarious and difficult, and will shortly be superseded by a branch from the Calcutta railway, diverging from the main line in the vicinity of Burdwan, and proceeding to Ranegunje. The Dalkisore, flowing from the British district Pachete, crosses the western boundary of Bancoorah, and flowing by the town of that name, holds through the district a course in a direction easterly, or south-easterly, for forty-five miles, to a point where it passes the eastern frontier into the British district Burdwan. The population is stated at 480,000. Bancoorah contains some Mussulmans, but the great majority are Brahmuns, divided into numerous castes and classes. This district was formerly part of

Burdwan. The northern part was obtained by the British from Meer Cossim, in 1760, the cession being confirmed by Shah Alum in 1765, at which time the southern part was also acquired from the last-named authority.

BANCOORAH.—A town, the principal place of the district of the same name, on the route from Calcutta to Benares, 101 miles N.W. of the former, and 327 S.E. of the latter. It is situate on the left bank of the river Dalkisore, has a bazaar and a spacious public building for the accommodation of travellers. Distant S.W. from Berhampore 115 miles. Lat. 23° 14', long. 87° 6'.

BAND.—A town of Bundelcund, in the native state of Tehree, distant E. from Tehree 15 miles. Lat. 24° 44', long. 79° 8'.

BANDA.—A British district in Bundelcund, under the lieut.-gov. of the N.W. Provinces, named from its principal place. It is bounded on the north by the British district Futtehpore; on the north-east by the British districts Futtehpore and Allahabad; on the south-east by the territory of Rewah; on the south and south-west by some of the petty native states of Bundelcund; and on the west and north-west by the British district of Humeerpoor. It lies between lat. 24° 53'—25° 54', long. 80° 3'—81° 35', and has an area of 2,878 square miles. The rivers which bound or intersect the district are the Jumna, the Cane or Keyn, the Runj or Baghin, and the Pysunnee. The climate is productive of ague to Europeans, who sometimes can be freed from its attacks only by removal to purer air; but the natives enjoy at least the usual average of health. The black soil of the plains is noted for fertility, producing in great abundance and perfection wheat, barley, maize, millet of various sorts, and pulse. Sugar also, and indigo, are successfully cultivated; but of commercial crops by far the most important is cotton, for which the district is so celebrated that the produce is distinguished in commerce by the prefix of its name. It is mostly exported in its raw state by way of Calpee and Chilatar, on the Jumna, there being scarcely any manufacture, except of coarse cloth, dyed red with a colour obtained from the root of a plant called al (*Morinda multiflora*). The population is officially stated to be 743,872. The towns and villages are classed as follows: Number containing less than 1,000 inhabitants, 948; more than 1,000 and less than 5,000, 192; more than 10,000 and less than 50,000, one; making a total of 1,143. Under the recent revenue-settlement of the North-West Provinces, the government demand on the lands of this district has been fixed for a term of years, and is not liable to be increased until the year 1874.

Possession of the tract comprised within this district appears to have been much contested in the struggles for dominion in Hindostan. In 1023 Kalleenjpur was in vain besieged by Mahmood of Ghizni; but in 1196 it was taken by Kotb-ood-deen, an officer of Mohammed Sultan

of Ghor. It seems to have been partially retained by the Patans, when most other parts of the possessions of Delhi had submitted to Baber, or his son Humaion; as the latter besieged Kalleenjur in 1532 without success. Its rajah probably aimed at independence; as in 1545 he defended Kalleenjur against Humaion's Patan rival, the renowned Shir Shah, who succeeded in taking it, though mortally wounded in the attack; breathing his last at the moment of its capture. About 1735 the rajah of this part of Bundelcund transferred it by will to Bajee Rao, the Peishwa; and by the treaty of Bassein in 1802, and the supplementary treaty of 1803, it was ceded to the East-India Company.

BANDA, the principal town of the district of the same name, is situate on the right side of the river Cane, or Keyn, which here is described as having steep banks, sandy bottom, and usual depth of water from November to June from one and a half to two feet. The town is of considerable size, but straggling and ill built; the houses being of mud, though there is abundance of excellent building-stone procurable. The habitation of the nawab, or titular prince of the place, is an exception; being at the time of Jacquemont's visit, in 1830, new, spacious, and built with solidity; but in vile taste, partly Indian, partly European; wretchedly furnished, and having a profusion of gross sculptures. This nominal prince has, however, an annual income equal to 40,000*l.*, which his father, the late nawab, is said to have expended in conviviality and genial enjoyment. This provision is secured to the family by an engagement with the East-India Company, concluded in 1812. In lieu of the military force maintained by his father, the present rajah has been allowed to retain only a suitable retinue. In a commercial point of view, Banda is considered a thriving place, being a great mart for cotton. The population amounted in 1847 to 33,464. Distant S.W. from Allahabad 95 miles; N.W. from Calcutta 560; S.E. from Agra 190. Lat. 25° 28', long. 80° 23'.

BANDA CHHOTA, or **BANDA THE LESS**, in the British district of Banda, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Banda to Rewa, six miles S. of the former. Lat. 25° 24', long. 80° 25'.

BANDAIR.—A range of hills to the northward of the valley of the Nerbudda, commencing about lat. 24° 30', long. 80° 48', in a south-westerly direction. Its termination does not appear to be very precisely ascertained. The formation of the range is, according to Franklin, altogether of sandstone, horizontally stratified.

BANDAJAN.—A pass over the range of the Himalaya, forming the southern boundary of Koonawar. It consists of gneiss, and is covered with perennial snow, which extends in an unbroken sheet to the river Sipun, a depth

of 1,200 feet. The summit of the pass is 14,854 feet above the sea. Lat. 31° 22', long. 78° 4'.

BANDE.—A town in the native state of Sawunt Warree, under the administration and control of the government of Bombay, distant E. from Vingoria 15 miles. Lat. 15° 49', long. 73° 56'.

BANDERPOOR, in the British district of Futtehpoor, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Ganges, 869 miles from Calcutta by the river; 61 miles above Allahabad; 32 miles S.E. of the town of Futtehpoor. Lat. 25° 48', long. 81° 18'.

BANDHUA HASNPOOR, in the district of Sultanpoor, territory of Oude, a village with a fort 78 miles S.E. of Lucknow. Lat. 26° 16', long. 82° 4'.

BANDOGURH, in the territory of Rewa, in Baghelcund, a fortified post near the south-west frontier, and 60 miles S. of the town of Rewah. Lat. 23° 41', long. 81° 6'.

BANDORA.—A town of the island of Salsette, situate at the southern point, where the island is connected with that of Bombay by the causeway and arched stone bridge constructed by the local government from funds principally contributed by the Parsee merchant Sir Jamsetjee Jejeebhoy. Distant N. of Bombay fort nine miles. Lat. 19° 1', long. 72° 55'.

BANDRA, in the Rajpoot state of Joudpore, a village two miles N. of the route from Balmer to the town of Joudpore, and 10 miles N.E. of the former place. It contains 150 houses. Lat. 25° 52', long. 71° 28'.

BANGA BAZAR, in the British district of Silhet, lieutenant-gov. of Bengal, a town 22 miles W. of Silchar, and 41 miles E. of Silhet. Lat. 24° 50', long. 92° 30'.

BANGALORE, in the territory of Mysore, a town, the principal place of the district of the same name, and the chief station of the British military force in the territory, is situate on a high ridge of primary formation, the rock being generally granite or gneiss. The fort, of an oval ground-plan, constructed of strong masonry, with round towers and powerful cavaliers, was nearly dismantled by Tipoo Sultan, on his finding it incapable of resisting the assault of a British army; but in 1802 it was put in thorough repair by Purneah, the minister of the rajah of Mysore. The town is tolerably well built, has a good bazaar, and is inclosed by a wall, a ditch, and a broad fence of thorns and bamboos. The present importance of the place results from its being the locality of the great British military establishment for the territory of Mysore. The cantonment, on an elevated ridge of ground, running longitudinally east and west, and sloping north and south, is nearly two miles and a half in length, and one mile in breadth. It is two miles east of the fort. The dragoon barracks consist of eight ranges of buildings, parallel to each other, and one hundred and twenty-six feet apart, each extending two hundred and twenty-four feet in length,

forty-three in breadth, and being twelve in height, all tiled, and built of brick, and the whole inclosed by a wall of the same material, nine feet high. The European infantry barracks are sufficient for eight hundred men. The native troops live in huts; the officers in detached bungalows or lodges, the compounds or inclosures of which are separated from each other by hedges of aloes or euphorbia; and the profusion of planting, though perhaps carried to an insalubrious excess, gives a delightful appearance to the cantonment, strikingly contrasted with the bare aspect of the surrounding country. The gardens produce the usual vegetables of Europe in great abundance, and the products of the flower-garden are remarkably varied, vivid, and luxuriant. Water is good and abundant, there being eight large tanks in and about the place, besides several of smaller dimensions. Bangalore may be considered one of the finest climates in India, being cool and pleasant throughout the greater part of the year. The sun is generally powerful; but in the shade and in the house it is always cool.

Bangalore, from time immemorial, was a place of importance; but the foundation of the present fort was laid by a descendant of Kempe Gowd, a husbandman of the neighbouring country, who, probably in the sixteenth century, had left his native village to avoid the tyranny of the wadeyar of that place, and settled on a spot a few miles to the north of Bangalore. To the peaceful occupation of a farmer he added that of a warrior, and his first exploit was the conquest of this place, where, and at Savendroog, his family subsequently erected fortresses. Bangalore, with other possessions, was, however, wrested from them by Beysapore. Somewhat later we find it enumerated among the jaghires of Shahjee, father of Sevejee, the founder of the Mahratta sway; and at an early period of his career in the service of the Beysapore state, that adventurer seems to have fixed his residence there. It appears to have passed into the possession of Vencojee, one of the sons of Shahjee; but he having occupied Tanjore, deemed Bangalore too distant, especially under the circumstances of the times, to be safe. He accordingly, in 1687, entered into a bargain for its sale to Chick Deo, rajah of Mysore, for three lacs of rupees; but before it could be completed, Kasim Khan, commander of the forces of Aurangzeb, marched upon the place, and entered it almost without resistance. This event, however, had no other result than to transfer the stipulated price from one vender to another; for that general, not coveting the possession, immediately delivered it over to Chick Deo, on payment of the three lacs. In 1758, Nuzeraj, the powerful minister of the rajah, caused Bangalore to be granted, as a jaghire or fief, to Hyder Ali, afterwards usurper of Mysore, who greatly enlarged and strengthened the fort, which, in 1760, on his expulsion from Seringapatam, served as his refuge from destruction. In 1791 it was stormed by a

British army commanded by Lord Cornwallis. Distance direct from Seringapatam, N.E., 71 miles; Mangalore, E., 185; Bellary, S., 155; Madras, W., 185. Lat. 12° 58', long. 77° 38'.

BANGAON, in the British district of Shah-jehanpore, lieut.-gov. of the N.W. Provinces, a town 29 miles S.W. from Shahjehanpore, 18 miles N. of Furruckabad. Lat. 27° 39', long. 79° 38'.

BANGAON, in the British district of Nuddea, lieut.-gov. of Bengal, a town on the route from Calcutta to Jessore, 39 miles N.E. of the former. Lat. 23°, long. 88° 50'.

BANGARAH, one of the numerous outlets by which the Ganges discharges its waters into the Bay of Bengal. Lat. 21° 50', long. 89° 42'.

BANGERMOU, in the territory of Oude, a town on the route from Lucknow to Nanamow Ghat, 48 miles W. of the former, four E. of the left bank of the Ganges. Distant N. from Cawnpore, by Nanamow Ghat, 47 miles. Lat. 26° 53', long. 80° 16'.

BANGHEYA.—A town in the native state of Nepal, distant N.W. from Khatmandoo 230 miles. Lat. 28° 55', long. 81° 46'.

BANGSEK.—See BANSER.

BANGUNGA, a river rising in the territory of Nepal, from a source which, though as yet unexplored, is probably in about lat. 27° 43', long. 82° 55'. It takes a southerly course, crosses the northern frontier of the British district of Goruckpore, through which it continues for twenty-three miles, and joins the Booree Rapti on the left side of the latter. It is probably the greater of the two; and hence the united stream often bears the name of Bangunga. Below the confluence the united stream has a channel a hundred yards wide, with a considerable volume of water, scarcely fordable even in the dry season. Above the confluence the Bangunga is navigable, and a considerable quantity of timber is floated down by it.

BANGUNGA, a river rising near the north-western frontier of the Rajpoot state of Jeypoor. For a considerable distance it is merely a channel for water in the rainy season, and quite dry at other times. At Maunpore, eighty miles from its source, it is described by Boileau, after the commencement of the rainy season in August, with a channel 600 yards wide, and nearly dry. Forty miles lower down, the same traveller, a few days later, found it, after heavy rains, fordable for camels. Twenty miles beyond this point it is joined by the torrent Gumber, and thence is called generally by the latter name. Thirty-three miles to the east of the junction, and 173 from its source, it is crossed on the route from Agra to Gwalior, and even at that point has only a small rill of clear water in the dry season; but its sandy bed, 130 yards wide, indicates that the body of water may be considerable during the rains. Its final discharge is into the Jumna, on the right side, in lat. 27°, long.

78° 32'; the total length of channel being about 220 miles. It is sometimes called the Ootungun.

BANGURSIR, in the Rajpoot state of Jessulmer, a village on the route from Bahawalpore to Bap, and 120 miles S.E. of the former. Bangursir is in lat. 27° 59', long. 72° 34'.

BANIA CHUNG, in the British district of Silhet, lieutenant-gov. of Bengal, a town 83 miles N.E. from Dacca, and 40 miles S.W. of Silhet. Lat. 24° 32', long. 91° 22'.

BANIHAL, in the Northern Punjab, is a pass over the mountains of the same name, bounding Kashmir on the south. The ascent is much more considerable on the southern than on the northern side, where it descends into Kashmir, which country has a greater elevation than that part of the Punjab lying to the south. Though by no means the highest, being but 8,500 feet above the sea, it is one of the most difficult passes into Kashmir, and is seldom attempted with horses, though Vigne passed it in that way. Forster entered Kashmir on foot through this pass. The pergunnah, or district, also bears the name of Banihal. Lat. 33° 21', long. 75° 20'.

BANKEE.—A town in the territory of Oude, distant N.E. from Lucknow 93 miles. Lat. 28° 4', long. 81° 43'.

BANKOTE, in the British district of Rutnagherry, presidency of Bombay, a town with a small haven at the mouth of the river Savitree. Fort Victoria, situate on a high barren hill of red colour, is on the south side of the entrance. On the north side is Harissa Hill. The anchorage is in five fathoms low water, abreast of the fort. Bankote is 68 miles S. of Bombay. Lat. 17° 58', long. 73° 8'.

BANKY, one of the native mehals in the district of Cuttack, lieutenant-gov. of Bengal, paying an annual tribute of 4,162 rupees to the British government. Its centre is in lat. 20° 18', long. 85° 35'.

BANMOWTEE, or **BUROTI**, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route from Meerut to Muttra, and 39 miles N.E. of the latter. Lat. 27° 59', long. 77° 55'.

BANNAWASSI, in North Canara, within the territory subject to the presidency of Madras, a town once of much celebrity, but subsequently greatly decayed. Here is a temple of Siva or Mahadeva, which had formerly very large endowments, and although a very mean building, was kept in good repair and very much frequented. Distance (direct) from Soonda, S.E., 20 miles; from Bombay, S.E., 340; Madras, N.W., 370. Lat. 14° 33', long. 75° 5'.

BANOULI.—A town in Hyderabad, or dominions of the Nizam, distant N. from Hyderabad 109 miles. Lat. 18° 50', long. 78° 5'.

BANS, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Almora to Potoragah, and 43 miles N.E. of the former. Lat. 29° 40', long. 80° 13'.

BANSDA, or **BAUNSDA**.—A petty native state, under the political superintendence of the government of Bombay. It is bounded on the west and north by the British collectorate of Surat; on the east by the Daung; and on the south by the native state of Dhurrumpore. It extends from lat. 20° 35' to 21°, long. 73° 8' to 73° 28', and contains an area of 325 square miles, and a population of 24,050. During the minority of the young chief, the management of the district was assumed by the British government, and under its auspices considerable improvement has taken place, both in regard to the increase of revenue and the diminution of crime. The British officer in charge was also assiduous in training the young rajah to such habits of business as might fit him for the administration of his affairs, when it should become expedient to intrust it to him. The present amount of revenue is 47,000 rupees, or 4,700*l.* per annum, subject to the deduction of 780*l.* per annum for chauth, or tribute, to the British government, which was transferred to it by the Peishwa in 1802, under the treaty of Bassein. A small military force is kept at the cost of the chief, but it is not superintended or controlled as to discipline by the British government. The town of Bansda, distant from Surat, S.E., 45 miles, is in lat. 22° 44', long. 73° 25'.

BANSEE, or **BANGSI**, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a town the principal place of the pergunnah of the same name, is situate on the river Raptee, having there a channel 200 yards wide, with low banks, inundated to great extent during the rainy season. It has a market, and 600 houses, and allowing six persons to each, the population may consequently be estimated at 3,600. Distant N. from Benares 130 miles, N.E. from Allahabad 136. Lat. 27° 7', long. 82° 58'.

BANSEE, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a town 23 miles S. of Allahabad, 51 miles E. of Mirzapoor. Lat. 25° 4', long. 81° 50'.

BANSKERA.—See **BAUSHKERA**.

BANSKORE, or **BYNSKORE**, in the territory of Kota, in Rajpootana, a fort situate in the angle of confluence where the river Bhamuni falls into the Chumbul. Its site is the summit of a great rock, from 300 to 700 feet above the average height of the surface of the water in the river, which is here 500 yards wide, and even in the dry season forty feet deep. The stream is very rapid and violent, there being a fall of between thirty and forty feet above the fort, and another of equal depth below. The base of the rock is washed on all

sides except the north, and is there only accessible; but the rock has been artificially scarped. The fort, however, could without much difficulty be reduced by shells; and even before the introduction of artillery, was taken by Alauddin, the Patan sovereign of Delhi, who reigned from 1295 to 1316. Distant direct from Kota, S.W., 22 miles; from Oojein, N., 127. Lat. $24^{\circ} 58'$, long. $75^{\circ} 36'$.

RANSWADDY.—A town in Hyderabad, or dominions of the Nizam, distant N.W. from Hyderabad 81 miles. Lat. $18^{\circ} 23'$, long. $77^{\circ} 57'$.

BANSWARRA.—A petty Rajpoot state in the western quarter of Malwa, bordering on the province of Guzerat, and politically under the Governor-General. It is bounded on the north by Dongurpoor and Oodeypoor, or Mewar; on the north-east and east by Pertabgurh; on the south by the dominions of Holkar and Jabooa; and on the west by the Rewa Caunta. It extends from lat. $23^{\circ} 10'$ to $23^{\circ} 48'$, and from long. $74^{\circ} 2'$ to $74^{\circ} 41'$; it is about forty-five miles in length from north to south, and thirty-three in breadth from east to west, and has an area of 1,440 square miles. The population may be assumed at 144,000. The ruling family of this petty state is a branch of that of Oodeypore. It was dependent on the empire of Delhi until the ascendancy of the Mahrattas, by whom it was fearfully oppressed. In 1812 the ruler of this principality made overtures to the British government, and sent an agent to Baroda with the draft of a treaty, offering to become tributary, on condition of the expulsion of the Mahrattas; but it was not till 1818 that a treaty was concluded. With the treaty thus negotiated the chief was dissatisfied, and about two months afterwards it was replaced by another. Most of the articles in this, the existing treaty, are of the usual character; but the advice of the British government was to be followed in settling the affairs of the principality: the British government was not only to defend the country from external attacks, but also, if necessary, to afford to the chief aid in reducing his refractory connections and relations to obedience. The chief stipulated to pay tribute to the British government. In 1829 Captain Spears proceeded to Banswarra to effect certain necessary reforms, in the course of which a certain officer of police was dismissed. After repeatedly importuning the good offices of the British agent, which that functionary deemed it proper to withhold, the wretch formed the design of destroying the man who stood, as he believed, between him and profitable employment; and the crime was effected through the instrumentality of a Mahomedan servant. No doubt, it is said, existed as to the guilt of the accused parties, yet they were sentenced only to transportation; probably because the evidence against them was altogether circumstantial. Even this lenient punishment the principal criminal found means to elude,

having succeeded in making his escape on the way to Bombay. In 1835, a large balance was due to the British government for tribute, nearly the whole of the revenues of the country having been expended by the chief and his minister in wasteful extravagance and shameless debauchery. The reiterated exhortations of the British agent for a reform of the administration had been wholly disregarded. Strong remonstrances on the part of the British government were made, and the consequences which must follow perseverance in the reckless course pursued by the rawul and his minister, distinctly pointed out. Some effect was thereby produced; part of the arrears of tribute were paid: the minister was dismissed, and an arrangement was made with the rajah of Pertabdurgh for co-operation in the suppression of plunderers. The career of the prince whose misconduct had given rise to the evils thus sought to be abated, was not long protracted; and his death raised the question, often productive of confusion in Oriental states, of the right to the succession. He left no direct male heirs; and females in Rajpoot states have no claim to succeed. The difficulty, however, was happily got over without disturbance. The chiefs were called together, with the sanction of the political agent, and proceeded in conformity with usage, as was understood, to an election. The result was the installation of Bahadoor Singh, a member of the family, who it appeared had in all respects the best claim. The tributary thakours of this state are thirty-three in number, and their forces, with those of the state, amount to about 525, inclusive of the military police establishment. The practice of suttee has been recently abolished in Banswarra.

BANSWARRA, on the route from Mhow to Beera, 123 miles N.W. of the former, 178 S.W. of the latter, a town the principal place of the small Rajpoot state of the same name. It is situate eight miles west of the left bank of the river Mahye, and has a rampart inclosing a considerable area: much, however, of the inclosed space being occupied by gardens. The palace, or residence of the rawul or chief, is a large, turreted, battlemented building, on a rising ground overlooking the town, and near a beautiful tank overhung with trees, access to the water being gained by a fine ghaut, or flight of steps. Within the town are some handsome Hindoo temples and an extensive bazaar. The majority of the inhabitants are Brahminists, but there is a considerable number of Mussulmans. Distance direct from Neemuch, S.W., 76 miles; from Nussarabad, S., 200; from Oojein, N.W., 91; from Bombay, N.E., 330; from Agra, S.W., 350. Lat. $23^{\circ} 30'$, long. $74^{\circ} 24'$.

BANTER, in the district of Bainswara, territory of Oude, a town five miles N.E. of the left bank of the Ganges, eight miles N. of

Cawnpore, 30 S.W. of Lucknow. Butter estimates the population at 5,000, of whom 150 are Mussulmans. Lat. $26^{\circ} 29'$, long. $80^{\circ} 32'$.

BAONEE, or BOWNEE, in Bundelcund, a jaghire or feudal possession held under the East-India Company. It is inclosed on all sides by the British territories, except on the south-eastern corner, where it adjoins the small state of Behree, and lies between lat. $25^{\circ} 54' - 26^{\circ} 7'$, long. $79^{\circ} 44' - 80^{\circ} 1'$. Its length from north to south is about fifteen miles, and its breadth is of similar extent. Its area is stated to be 127 miles, and it "is estimated to contain fifty-two villages, with a population of 18,800 souls, and to yield a revenue of one lac of rupees (10,000*l.*) per annum." It was originally granted about the middle of the last century to Ghaziud din Khan, at one time the vizier of Alungir II., emperor of Delhi, by the Feishwa. The grant was confirmed by the British government on obtaining possession in 1802, and the Mahomedan descendant of the original grantee still holds the jaghire. He resides at Calpee, and maintains fifty horse and 300 foot. In the large map of India published by Horsburgh, 1827, it is denominated "Bownie of Calpie."

BAP, in the Rajpoot state of Jessulmere, a small town close to the eastern frontier towards Joudpore, on the route from the town of Beekaneer to that of Jessulmere, and 100 miles N.E. of the latter. Bap is in lat. $27^{\circ} 22'$, long. $71^{\circ} 26'$.

BAPIOO.—A town in the Rajpoot state of Beekaneer, distant S.E. from Beekaneer 48 miles. Lat. $27^{\circ} 50'$, long. $74^{\circ} 8'$.

BARA.—A small but important river of Afghanistan, in the province of Peshawur. It rises in Tirah, or the hilly tract lying between Safaid Koh and the Salt Range. From the benefits which it confers on the country through which it flows, it has, in conformity with oriental feelings, become an object of veneration. The length of the river is about sixty miles. It enters the plain of Peshawur in lat. $35^{\circ} 53'$, long. $71^{\circ} 30'$. The rice grown in this plain is considered superior to any other, and so highly esteemed, that in the tripartite treaty of 1838, Runjeet Singh stipulated to supply a certain quantity of it yearly to Shah Shoojah.

BARA, or BAREH, in the British district of Ghazee-pore, lieutenant-gov. of the N.W. Provinces, a town on the route from Chupra to Ghazee-pore, 17 miles E. of the latter. It contains a population of 7,042. Lat. $25^{\circ} 30'$, long. $83^{\circ} 51'$.

BARARUTTEE.—A fort in the province of Cuttack, lieutenant-gov. of Bengal, situate about a mile from the town of Cuttack. It was stormed in October, 1803, by a British force under Colonel Harcourt, and its capture was followed by the submission of the province. Lat. $20^{\circ} 25'$, long. $85^{\circ} 56'$.

BARA DEVI, in the hill state of Hindoor, a peak, ten miles south of the left bank of the Sutlej, of the lofty range of mountains extending from north-west to south-east through the western part of that state. On the summit is a small temple. Elevation above the sea 7,003 feet. Lat. $31^{\circ} 11'$, long. $76^{\circ} 57'$.

BARAGHEE.—A town in the raj of Odeipoor, one of the petty states on the south-west frontier of Bengal, distant N. from Odeipoor seven miles. Lat. $22^{\circ} 44'$, long. $83^{\circ} 22'$.

BARAGU POINT.—The southernmost point of land on the coast of Pegu. Lat. $15^{\circ} 44'$, long. $95^{\circ} 30'$.

BARAH, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a town on the route from the cantonment of Cawnpore to that of Calpee, and 26 miles N.E. of the latter. It has a bazaar, and is well supplied with water. The road in this part of the route is excellent; the country partially cultivated. Lat. $26^{\circ} 23'$, long. $80^{\circ} 5'$.

BARAH, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Bandah to Mirzapoor, 90 miles E. of the former. Lat. $25^{\circ} 14'$, long. $81^{\circ} 49'$.

BARAHAUT, in the native state of Gur-whal, a town on the right bank of the Bhagarettee, as the Ganges is called in the upper part of its course. Barahaut is in lat. $30^{\circ} 43'$, long. $78^{\circ} 29'$.

BARAHULLY.—A town in Hyderabad, or dominions of the Nizam, distant N.W. from Hyderabad 111 miles. Lat. $18^{\circ} 34'$, long. $77^{\circ} 23'$.

BARAI, in the Punjab, a town situate in the Jetch Doob, 106 miles N.W. of the town of Lahore. Lat. $32^{\circ} 30'$, long. $73^{\circ} 40'$.

BARAK.—A considerable feeder of the Megna river, and an offset from the Jeeree, which it leaves in lat. $24^{\circ} 43'$, long. $93^{\circ} 13'$, and flowing first westerly through Cachar and Silhet for ninety miles, and then south-westerly for 110 miles, falls into the Megna in lat. 24° , long. $90^{\circ} 59'$.

BARA LACHA PASS, in the Punjab, a pass leading over the Himalaya mountains from the British district of Lahul, into the dominions of Ghelab Singh. The crown of the pass is about lat. $32^{\circ} 44'$, long. $77^{\circ} 31'$.

BARA LOHAKUR, in the British district of Bolundshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Allyghur cantonment to that of Delhi, and 40 miles N.W. of the former. Lat. $28^{\circ} 22'$, long. $77^{\circ} 49'$.

BARAMAHAL.—A subdivision of southern India, situate within the presidency of Madras. The tract was annexed to the dominions of Mysore by Hyder Ali. It was ceded to the British in 1792 by Tippoo Sultan, under the treaty of Seringapatam, and now constitutes the northern portion of the British district of

Salem. Its centre is in lat. 12° 30', long. 78° 20'.

BARAMULA, in Kashmir, is a gorge in the mountains forming the south-western boundary of the valley. Through this aperture the Jhelum flows, draining the whole of this extensive basin. The town is situate on the west or right bank of the river, here crossed by a bridge of eight piers. Baramula is in lat. 34° 10', long. 74° 30'.

BARAMUTTEE, in the British district of Poonah, presidency of Bombay, a town 55 miles S.E. from Poonah, and 50 miles N.E. of Sattara. Lat. 18° 10', long. 74° 39'.

BARANDA.—See **BURENDA PASS**.

BARASET.—A British district under the lieut.-gov. of Bengal. It is named from its principal place. On the north it is bounded by the British district of Nuddes; on the east by the British district of Jessore; on the south by the Sunderbunds; on the south-west by the Twenty-four Pargunnahs; and on the west by the river Hooghly, separating it from the British district Hooghly. It lies between lat. 22° 16'—22° 59', long. 88° 25'—89° 22'; is about sixty-three miles in length from south-east to north-west, and in breadth about thirty-one. The area is about 1,424 square miles. The population has been returned at 522,000. The rivers intersecting or bounding the district are the Hooghly, the Isamuttee or Jaboona, and the Kubbuduk. A great number of other streams and watercourses, offsets of the Ganges, traverse the country in various directions, especially during the periodical rains, and in many places lay the surface extensively under water, particularly in the south-eastern part, where the Baira jhil or lake extends over about a fifth of the district during the rains, and is at other times a mere swamp. This redundant moisture, and the pestilential atmosphere resulting from its action on the alluvial soil and decayed vegetation, appear to have prevented the full development of the natural resources of the district, which, under adequate culture, might be expected to yield more abundantly sugar, cotton, indigo, and rice. The district is traversed by the road from Calcutta to Dacca.

BARASET.—A town the principal place of a district of the same name, under the lieut.-gov. of Bengal, is situate three miles north-east of an offset from the Hooghly to the Sunderbunds, and eight miles east of the main stream. It is an insignificant place, little deserving notice. Lat. 22° 43', long. 88° 33'.

BARASHEE.—The name given to one of the numerous streams intersecting the delta of the Ganges. In the upper part of its course it bears the name of Koomar, and in lat. 28° 28', long. 89° 38', separates into two channels, the eastern branch receiving the name of Barashoe, which it retains until it divaricates into the Attara Banka and the Balisore.

BARATHOR.—A town in the native state of Nepal, distant N.W. from Khatmandoo 94 miles. Lat. 28° 30', long. 84° 4'.

BARAUNSA, in the district of Sultanpoor, territory of Oude, a village 80 miles S.E. of Lucknow. Butter estimates the population at 300, including 100 Mussulmans. Lat. 26° 21', long. 82° 12'.

BARCOOR, or **BARKURU**.—A town, the principal place of a subdivision of the same name, in the British district of South Canara, presidency of Madras. It is situate in a fertile well-watered country. The town is now much ruined, as is the fortress, which, according to Buchanan, was founded by Hari Hara, rajah of Vijayanagar, who reigned from 1367 to 1391. Lat. 13° 28', long. 74° 49'.

BARDOLEE.—A town of Wusravee, one of the petty native states of the Rewa Caunta, under the political superintendence of the presidency of Bombay, distant E. from Surat 20 miles. Lat. 21° 4', long. 73° 10'.

BARÉE, in the native state of Gurwhal, a village on the left bank of the Jumna, has belonging to it a few fertile patches of soil, yielding good crops of grain and of potatoes, the cultivation of which has recently been introduced here from the British settlements. There is here a petty manufacture of woollen cloth, the material being supplied by the native flocks and worked up by the men, the women being otherwise employed. "It is strange," as Skinner observes, "to meet in these wild passes with men, each sturdy enough to make a Hercules, armed with a distaff and a work-basket." Barée is in lat. 30° 55', long. 78° 26'.

BARÉE, in the native state of Dholpoor, a town, the principal place of a small district of the same name, situate among hills in the south-west part of the territory. The rana of Gohud, having by treaty, in 1805, relinquished Gohud and some other districts to the East-India Company, was granted the districts of Dholpoor, of Barée, and of Rajakhara, which he now holds with the title of rana of Dholpoor. It appears to have been little visited by Europeans. Distant W. of Dholpoor 18 miles, S.W. of Agra 44. Lat. 26° 38', long. 77° 42'.

BARÉE, in the territory of Bhopal, a large town, the principal place of a pergunnah of the same name. It is situate in a mountainous country on the north or left bank of the river Jamneer. Distant S.E. of the town of Bhopal 46 miles. Lat. 23° 3', long. 78° 4'.

BARÉE, in the British district of Ghazee-poor, lieut.-gov. of the N.W. Provinces, a town on the right bank of the Ganges, at the confluence of the Karamnasa. Distant N.W. from Calcutta 400 miles. Lat. 25° 32', long. 83° 52'.

BARÉE.—A town in the territory of Oude, distant N. from Lucknow 29 miles. Lat. 27° 15', long. 80° 53'.

BAREE DOOAB.—One of the natural sections into which the Punjab is divided. It lies between the river Ravee on the north-west, and the Ghara or Sutlej, and the Beas rivers, on the south-east. Its length is 370 miles, and its average breadth about forty-five. Though not the most extensive, this dooab is one of the most important of those of the Punjab, both in a commercial and agricultural point of view. It contains the towns of Lahore, Mooltan, and Amritsar, and is traversed from north-east to south-west by the great canal (now under construction), which, diverging from the Ravee at Mahadeopoor, proceeds to Tibri, a distance of twenty seven miles, whence, throwing out branches at various intervals for the supply of the adjacent districts, it pursues its course to the vicinity of Chichawutni, where it rejoins the parent stream. Its total length, inclusive of its branches, will be about 480 miles. The cost is estimated at 527,697*l*.

BAREILLY.—A British district within the jurisdiction of the lieut. gov. of the N.W. Provinces. The portion of country now included within it was formerly divided into two districts; one bearing the name of Bareilly, the other called Pillibet. The district, as at present constituted, is bounded on the north by Kumaon; on the east by Oude and the British district of Shahjehanpore; on the south by Shahjehanpore and Budaon; and on the west by Budaon, the Rampoor territory, and the British district of Moradabad. It lies between lat. 28° 2' and 29° 19', long. 79° 4' and 80° 12'; contains twenty-three pergunnahs, and has an area of 2,937 square miles. It is a level country, watered by the Western Ramgunga, the Goulah, the Gurrah or Deoha, and the Gogra or Surju, which latter for a short distance forms the north-eastern boundary towards Oude. The climate is fine, suffering little from the hot winds, though colder in winter than might be expected from the latitude and elevation. The soil is fertile, and, except in a part of the northern division, highly cultivated, producing excellent wheat, the original seed of which was brought from England, very fine rice, cotton, sugar, tobacco, barley, maize, millet, pulses, plantains, dates, walnuts, grapes, strawberries, apples, and pears. The population, according to official return, is 1,378,268. The number of towns containing less than 1,000 inhabitants is 3,152; more than 1,000 and less than 5,000, 165; more than 5,000 and less than 10,000, 3; more than 10,000 and less than 50,000, 1; more than 50,000, 1: making a total of 3,322. The union of the district of Pillibet with Bareilly was arranged in 1842. In 1846 the incorporation of the two was complete, and under the existing settlement of the North-West Provinces, the government demand on account of the land revenue has been fixed, and is not liable to increase until the year 1867.

The Rohilla Patans, formerly the ruling

race, are numerous, and are easily distinguished by their superior stature and fairer complexions, as well as by their arrogant air. In 1815 a serious riot, fomented, if not originally excited, by the more fanatical Mahometans, endangered the safety of the city of Bareilly, and was suppressed only by resorting to strong military measures. In this disturbance the Patan portion of the population were the chief actors. The principal routes are that proceeding northwards from Bareilly, by Ramouri, to Almora, in Kumaon; another, also from south to north, but east of the former, proceeding from Bareilly, by the town of Pillibet and the Birindeo Pass, to Petoragarh, in Kumaon; another, in a direction from south-east to north-west, from the town of Pillibet to Nugina; another, in a direction from west to east, and leading from Roodurpore to Birindeo. The Bareilly district forms part of the country called Rohilkund, deriving its name from the Rohilla Patans, sprung from the Yusufzai Afghans, who settled in the tract about 1720, and the character of whose descendants has been adverted to in the course of this article. Though often obliged to struggle against the supremacy of the sovereigns of Delhi, they maintained a precarious and ill-defined independence until 1774, when a body of British troops, under the command of Colonel Champion, acting in co-operation with Shujah ud Dowlah, the nawaub vizier of Oude, totally defeated the confederated Rohillas at Teesunah, a short distance from the town of Bareilly, and hence named Futtugunge, or "Place of Victory." In 1796, a disputed succession to a Rohilla jaghire again called for the interference of the British, whose army, under the command of Sir Robert Abercrombie, defeated the Rohillas close to the village of Betoura, a few miles from Bareilly. A village, now situate on the field of battle, also bears the name of Futtugunge, from the result. By these events a large tract of territory, of which Bareilly formed part, passed into the hands of the nawaub vizier. In 1801, both Bareilly and Pillibet were included in the cessions made by that prince, in commutation of subsidy, to the East-India Company.

BAREILLY, the principal place of the British district of the same name, is situate in a pleasant and well-wooded country on the left bank of the Joos, a tributary of the Western Ramgunga. It is a considerable town, and though somewhat ruinous, has a brisk and lucrative commerce, and some manufactures. The total population in 1853 was stated to be 111,332. Elevation above the sea 470 feet. Distance N.W. from Calcutta 788 miles, E. from Delhi 152. Lat. 28° 23', long. 79° 28'.

BARENGEE, in the British district of Cuttack, lieut.-gov. of Bengal, a town 40 miles W. of Point Palmyras, and 40 miles N.E. of Cuttack. Lat. 20° 40', long. 86° 30'.

BAREWELLEE.—A town in Hyderabad, or dominions of the Nizam, distant S.W. from Hyderabad 95 miles. Lat. $16^{\circ} 4'$, long. 78° .

BARGA, in Koonawur, a pass leading across the range of the Himalaya bounding that district on the south. This, with three other passes, occurs in a space of little more than a mile. Of these Barga is the lowest, and probably has not an elevation of more than 15,000 feet above the sea. Lat. $31^{\circ} 16'$, long. $78^{\circ} 19'$.

BARGAUT, in the British district of Saugor and Nerbudda, under the lieutenant-gov. of the N.W. Provinces, a town on the route from Ruttunpoor to Jubbulpoor, 60 miles W. of the former. Lat. $22^{\circ} 29'$, long. $81^{\circ} 11'$.

BARIPOOR, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Ganges, close to the frontier towards the British district of Benares, distant N.W. from Calcutta, by the river, 749 miles; S.E. from the city of Allahabad, by the same course, 77. Lat. $25^{\circ} 16'$, long. $82^{\circ} 15'$.

BARKALLOOR, in the British district of North Canara, presidency of Madras, a town once of great celebrity, but now so ruined that its name has disappeared from the maps of India. Faria y Sousa, in his *Annals* for A.D. 1581—1584, observes:—"Bracalor, a city seated on the coast of Canara, in almost 14 degrees of latitude, was once one of the most noted places of trade in India, in the form of a commonwealth, but much decayed since the Portuguese built a fort there." It is not given in the accurate and comprehensive Trigonometrical Survey Map of India; but in that work, the name of "Colloor" is set down in a site corresponding to that of the ancient town. Horsburgh mentions, "Barsalor Peak, in lat. $13^{\circ} 50'$, long. $74^{\circ} 54'$, is a round mountain, about three and a quarter leagues inland, having the high chain of Bednore mountains for its base." This site corresponds almost exactly with that of Colloor in the trigonometrical survey; so that it may be concluded that Colloor of the present maps is identical with Barkalor or Barcelor of the earlier. Colloor is distant (direct) from Mangalore, N., 68 miles; Bombay, S.E., 380; Bangalore, N.W., 195; Madras, W., 370.

BARKAROONDEE.—A town in the territory of Nagpore, distant S.E. from Nagpore 90 miles. Lat. $20^{\circ} 27'$, long. $80^{\circ} 20'$.

BARODA, a city of Guzerat, and the capital of the territory of the prince called the Guicowar, is situate near the river Biswamintri, which is there crossed by a stone bridge, consisting of two ranges of arches, one over the other. The fortifications of the town are of no great strength, consisting of slight walls, with towers at irregular intervals, and several double gateways. The town is intersected and divided into four equal quarters, by two spacious streets, meeting in the centre, at a

market-place, containing a square pavilion, with three bold arches on each side, and a flat roof, adorned with seats and fountains. The houses are in general very high, and built of wood, with sloping tiled roofs. The palace, or residence of the Guicowar, is a building of the same sort, having wooden galleries projecting one over another; and though the edifice is large, it is but of mean appearance. The house of the British resident may be characterized in like terms. The British cantonment is outside the town, and consists of "a number of small brick houses, with trellis, wooden verandahs, sloping tiled roofs, and upper stories, each surrounded by a garden with a high green hedge of the milk-bush. The church is a small, but convenient and elegant Gothic building, accommodating about 400 persons. The population some years since was reported at 140,000. The dominions of the Guicowar, over which the government of India exercise political superintendence, are described in the article on Guzerat. His annual revenue is estimated at 668,744*l*. The military establishment of this prince, in addition to his regular troops, amounting to 6,059 cavalry and infantry, comprises also the subsidiary force at the disposal of the British government, which consists of five regiments of infantry, completed to 800 men each, two regiments of cavalry, and a company of artillery. He also maintains a contingent force of 3,000 cavalry, paid and equipped agreeably to the suggestions of the British government, and a corps of irregulars, known as the Guzerat Irregular Horse, commanded by British officers. The state of Baroda was a branch of the great Mahratta confederacy, and its ruler, the Guicowar, one of the princes who acknowledged the puppet rajah of Sattara, the descendant of Sevajee, as their chief. Pelajee Guicowar succeeded his uncle Dunnajee Guicowar as second in command of the Mahratta armies in 1721, and by predatory excursions gradually extended his authority over Guzerat. Bajee Rao, the first Peishwa, conferred upon him the title of "Leader of the Royal Troops." Pelajee was murdered in 1732 by the rajah of Joudpore, and succeeded by his son Damajee, who still further extended the authority of his family. Damajee then threw off allegiance to the Peishwa, and joined a conspiracy in favour of his rival; but being treacherously made prisoner, he was not allowed to obtain his liberty but at the sacrifice of half his possessions, and under acknowledgment that he held the other half in fief to the Peishwa. Damajee dying in 1768, the succession was disputed by two of his sons, and finally decided in favour of Syajee, a prince of weak intellect, to the exclusion of Govind Rao, his elder brother. Syajee died without issue in 1792, and was succeeded by his elder brother, Govind Rao, whom he had supplanted in 1768. In 1800 the government devolved upon Annund Rao, a prince of weak intellect. His illegitimate brother Canojee usurped the administration,

but was speedily ejected by Rawjee, the minister of the late Govind Rao. Shortly afterwards Rawjee solicited the assistance of the British government, for the purpose of reducing Mulhar Row, a relative of the late prince, who, advancing with a force in support of Canojee, had commenced hostilities against the Guicowar. A body of troops was detached by the government of Bombay, to prevent the subversion of Annund Rao's authority, and Mulhar Rao professed submission; but while negotiation was in progress, he availed himself of an opportunity to make a treacherous attack upon the British detachment, which was, however, successfully repelled, and on the arrival of reinforcements under Sir William Clark, Mulhar Rao was entirely defeated, and compelled to surrender at discretion. During these proceedings, a convention was concluded between the government of Bombay and Rawjee, on behalf of Annund Rao. This was signed on the 15th March, 1802. Thus, the British government, by treating with the Guicowar as a substantive state, secured his independence of the Peishwa. Under the treaty, the Guicowar had agreed to receive a British subsidiary force; and the Arab soldiers in his service being no longer required, it was resolved to disband them. These foreign mercenaries had for some time ruled at Baroda; and, alarmed at the prospect of reduction, they placed the Guicowar in confinement, and refused to release him till their claims were satisfied. They permitted Canojee to escape from Baroda, and serious disorders were apprehended. Major Walker called in the aid of an European regiment from Bombay, which, with the subsidiary force under Colonel Woodington, invested the town of Baroda, and after a siege of ten days, a practicable breach having been made, the garrison surrendered. Other engagements between the Guicowar and the British government followed, and on the 21st April, 1805, the stipulations of the existing agreements were consolidated in a definitive treaty of general defensive alliance. The Guicowar thereby agreed to receive a permanent subsidiary force, and to provide funds for their payment, as well as the liquidation of certain advances of money made for the benefit of the Guicowar state, and the interest thereon. Henceforward there is little to notice in the history of the Guicowar state till disputes between the Guicowar and the Peishwa, in regard to certain territorial claims, gave rise to a series of events which dissolved the great Mahratta confederacy, and hurled its leader from sovereignty to captivity. To enter minutely into these disputes is here neither necessary nor practicable. It may suffice to state, that with a view to their termination, Gungadhar Shastri, an able and upright servant of the Guicowar, proceeded to Poona, whence he was seduced to Punderpore, under pretence of devotion, and there treacherously murdered by the contrivance of a wretch

named Trimbuckjee Dainglia, a prime favourite of the Peishwa. This led to a succession of hostile operations between the British government and the Peishwa, terminating first in the humiliation of the latter, and ultimately in the destruction of his state and power. When, as a result of his first discomfiture, the Peishwa yielded to the British government his rights in Guzerat, the Guicowar received an accession of territory; and a new treaty, supplemental to the former, was concluded by the resident, Captain Carnac. Annund Rao died in 1819, and was succeeded by Syajee Rao. The rite of suttee was abolished throughout the Guicowar's dominions, by proclamation dated the 12th February in the year 1840. The reigning prince has it in contemplation to connect his capital by railway with Tunkaria, on the coast of the Gulf of Cambay, a distance of about forty miles. The city of Baroda is distant from Ahmedabad, S.E., 68 miles; from Surat, N., 81; from Bombay, N., 231; from Poona, N., 263; from Mhow, W., 166; from Calcutta, W., 980. Lat. 22° 16', long. 73° 14'.

BARODA.—A town in the native state of Gwalior, or possessions of Scindia, distant S.W. from Gwalior 103 miles. Lat. 25° 30', long. 76° 49'.

BARONDA.—A town in the native state of Rewah, in the province of Bundelcund, under the political superintendence of the government of India, distant S. from Rewah 30 miles. Lat. 24° 6', long. 81° 18'.

BAROO, in the Rajpoot state of Jessulmeer, a village 71 miles N.E. of the town of Jessulmeer. Lat. 27° 20', long. 71° 59'.

BAROO BARYE, in the British territory of Saugor and Nerbudda, lieut.-gov. of the N.W. Provinces, a town 75 miles S. from Saugor, 70 miles E. of Hoshungabad. Lat. 22° 46', long. 78° 49'.

BAROWNDA, in the British district of Mirzapoor, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Mirzapoor to Rewa, and 25 miles S.W. of the former. The road in this part of the route is excellent, having been laid down under the superintendence of the East-India Company's engineers. Elevation above the sea 500 feet. Lat. 24° 57', long. 82° 12'.

BARR, in the British district of Patna, lieut.-gov. of Bengal, a town on the right bank of the Ganges, on the route from Berhampore to Dinapore, 246 miles N.W. of former, 44 E. of latter. The houses are scattered over a considerable extent. Lat. 25° 27', long. 85° 47'.

BARRA, in the British district of Tannah, presidency of Bombay, a town on the river Vytarna, 30 miles N. of Callianee. Lat. 19° 40', long. 73° 11'.

BARRABHOOM, a British district within that part of the presidency of Bengal which is under the political agent for the south-west

frontier, and named from its principal place. It is bounded on the north by the British district of Pachete; on the east and south by that of Pooralia; and on the west by Singboom and the British district of Pachete: it lies between lat. 22° 48'—23° 10', long. 86° 9'—86° 52'; is forty-six miles in length from east to west, and thirty-five in breadth. The area is 860 square miles.

BARRACKPOOR.—A town with military cantonment, in the British district of the Twenty-four Pergunnahs, lieut.-gov. of Bengal, on the left bank of the river Hooghly, here about three-quarters of a mile in width. Several regiments of native infantry are usually stationed at this place, huddled in commodious lines, and adjoining are the bungalows or lodges of their European officers. There are also other lodges, the residences of European families, "attracted hither by the salubrity of the air, the vicinity of the Governor-General's residence, or the beauty and convenience of the river." The house of the Governor-General is handsome and commodious, but not very spacious. It is situate in a park of about 250 acres, laid out with great taste and picturesque effect, the surface being artificially varied in elevation with much judgment, and offering as beautiful a display of turf, tree, and flowering shrub, as any scene in the world can produce. Distance N. from Calcutta 16 miles. Lat. 22° 46', long. 88° 26'.

BARRACKUR.—A river of Bengal, rising in lat. 24° 4', long. 85° 27', in the British district of Ramguri, through which it flows in a circuitous course for 120 miles, and, passing into the district of Beerbhoom, which it traverses for thirty-five miles, falls into the Damoodah in lat. 23° 40', long. 86° 51'.

BARRAH, in the Rajpoot state of Kotah, a town on the route from Calpee to the city of Kotah, 275 miles S.W. of former, 46 E. of latter. It has a bazaar, and supplies and water are abundant. Lat. 25° 7', long. 76° 33'.

BARREEAH, or DEOGHUR BARREEAH.—A petty Rajpoot state of the Rewa Caunta, in the province of Guzerat, under the political superintendence of the government of Bombay. The tract of country composing it stretches from lat. 22° 21' to lat. 22° 58', and from long. 73° 41' to long. 74° 18'. It is bounded on the north by the districts of Loonawarra and Soan; on the south by Oodepoor; on the east by Dohud and Jabboah; and on the west by Godra and Champanser. The area is 870 square miles. The connection existing between the British government and the Barreeah state commenced in 1803, when Scindia's districts in Guzerat were taken possession of by a British force under Colonel Murray. The success of that campaign appears to have been materially facilitated by the good-will displayed towards the British by the rajah of Barreeah, whose conduct throughout called forth the warmest praises of the com-

manding officer; and a treaty was entered into by the British, subsidizing a detachment of the Barreeah Rheals at a monthly expense of eighteen hundred rupees. This secured the friendship and co-operation of this tribe, and enabled our troops to pass through the country without molestation. In the year 1824, the sovereign of Barreeah consented to make payment of 12,000 rupees to the British government in consideration of its protection, liable to a future increase in proportion to any subsequent improvement in the amount of the revenue of the state. The arrangement was ratified by the Governor-General, under date 20th April, 1824. The amount is partly appropriated to defray the expense of maintaining a chain of police thanahs from Baroda to Neemuch; and with reference to this tribute, the expense of a military force sent a few years ago to suppress the Naikra disturbances, was borne by the British government. The revenue of the state is estimated at 57,651 rupees, or about 5,765*l*. The population, estimated at seventy-four to the square mile, would amount to 64,380. The military force at the disposal of the rajah, including the feudatory troops, amounts to 416 men, a small portion only being cavalry. Three field-guns constitute his artillery.

BARREEAH, in Guzerat, a town giving name to the small territory so called. Distance from Baroda, N.E., 50 miles; Ahmedabad, S.E., 81. Lat. 22° 42', long. 73° 51'.

BARSEE.—A town in an outlying section of the British district of Sholapoor, presidency of Bombay, entirely surrounded by the Nizam's territories. Inconvenience having been experienced from the levy of duties by the native government on goods in transit between Barsee and the British frontier, it was proposed to the Nizam to abandon his right, in consideration of a pecuniary compensation, or to cede for an equivalent a portion of territory sufficient to unite Barsee with the remainder of the collectorate. The question has been settled by the recent cessions of territory for the maintenance of the Nizam's military contingent. Distant 43 miles N. from Sholapoor, 128 miles E. of Poonah. Lat. 18° 16', long. 75° 46'.

BARUMGULA, a town in the north of the Punjab, and on the southern slope of the Pir Panjal, which bounds Kashmir on the south, is situate in the Pir Panjal, or Nandan Sar Pass from the Punjab into Kashmir. The situation is beautiful and picturesque, at the extremity of a dark and deep defile, through which the Punch river flows. The height above the sea is 6,800 feet. Lat. 33° 36', long. 74° 40'.

BARUT.—A town in Hyderabad, or dominions of the Nizam, distant N.E. from Nandair 10 miles. Lat. 18° 14', long. 77° 31'.

BARWAH, in the British district of Ganjam, presidency of Madras, a town on the seacoast, 48 miles S.W. of Ganjam, 94 miles

N.E. of Vizianagram. Lat. 18° 53', long. 84° 40'.

BASANTGANJ, in the district of Salon, territory of Oude, a walled town on the western boundary, towards the district of Bainswara, 65 miles S.E. of Lucknow, 70 S.E. of Cawnpore, 55 N.W. of Allahabad. Butter estimates its population at 6,000, of whom half are Mussulmans. Lat. 26°, long. 81° 20'.

BASANTPOOR.—A town in the territory of Oude, distant S.E. from Lucknow 29 miles. Lat. 26° 42', long. 81° 28'.

BASHTA, in the British district of Bijour, lieut.-gov. of the N.W. Provinces, a town on the route from Meerut to Chilka, 31 miles E. of the former. Lat. 29° 3', long. 78° 18'.

BASNEE, in the Rajpoot state of Joudpore, a village on the route from Pokhurn to the town of Joudpore, and 12 miles N. of the latter. It is situate on the banks of a torrent, which in the rainy season discharges itself into the river Loni. Wells are numerous; but the water which they yield is brackish. Lat. 26° 27', long. 73° 12'.

BASODA, or **BASONDA**, in territory of Gwalior, or possessions of Scindia's family, a town on the route from Tehree to Ougein, 78 miles S.W. of former, 188 N.E. of latter. It is situate on a stream tributary to the Betwa, and is the principal place of a pergunnah of the same name. Population about 10,000. Lat. 23° 51', long. 77° 58'.

BASOUDEMTSO.—A large lake in Thibet, sixty miles in circumference. The centre of the lake is about lat. 29° 40', long. 94° 35'.

BASSEIN, in the British province of Pegu, a town the principal place of the district of the same name, is situate on the left or eastern bank of one of the main arteries by which the waters of the Irrawaddy discharge themselves into the sea. The offset, which in this part of its course is called the Bassein River, leaves the parent stream in lat. 17° 45', long. 95° 14', and flowing in a southerly direction for eighty-five miles, reaches the town of Bassein, where its deep channel affords a safe passage for ships of the largest burthen. Below the town the river takes the name of Negrais, and flows in the same direction for seventy-five miles, to lat. 15° 55', long. 94° 25', where it falls into the Bay of Bengal a few miles south of Cape Negrais. Bassein occupies an important position in the military occupation of the country, from its complete command of the navigation of the river on which it is situate. It was captured by the British with trifling loss, on the 19th May, 1852, in the first campaign of the second Burmese war. Lat. 16° 45', long. 94° 50'.

BASSEIN, in presidency of Bombay, a decayed town on an island separated by a narrow channel from the mainland of the Northern Concan. The island lies between lat. 19° 20' and 19° 28', long. 72° 48' and 72° 54'; is about eleven miles in length from

south-east to north-west, and three in breadth, and has an area probably of about thirty-five square miles. It appears to be of very irregular surface, and has some rugged eminences of considerable elevation; amongst others, "one very high hill of table form, and another, not quite so elevated, rising in a conical peak." Bassein early attracted the notice of the Portuguese, as the river or strait separating the island from the mainland was a convenient rendezvous for shipping engaged in hostile operations in the neighbouring quarters. In 1534 it was ceded to the Portuguese by Bahadur Shah of Guzerat. The Portuguese, who were bound to have ceded it to the English authorities, as part of the dowry of the Infanta on her marriage with Charles II., retained it until 1765, when it was invested by the forces of the Peishwa; and, though well maintained, the defences having been rendered untenable, it was surrendered on good conditions. It was in 1780 invested by a British force commanded by General Goddard, who, "owing to the great strength of the place," made regular approaches with "a very powerful artillery, principally twenty-four pounders, and one battery of twenty mortars, at the distance of 500 yards, which did great execution;" and after a siege of twelve days the place surrendered. It was restored to the Mahrattas by the humiliating treaty of Salbye. Here, in 1802, was concluded the important treaty by which the Peishwa agreed to maintain a British subsidiary force, thus virtually and formally dissolving the Mahratta confederacy. On the final overthrow of the Peishwa in 1818, Bassein was incorporated with the presidency of Bombay. The town of Bassein is distant N. from Bombay 23 miles. Lat. 19° 20', long. 72° 52'.

BASSIM.—A town in Hyderabad, on the dominions of the Nizam, distant S. from Ellichpore 80 miles. Lat. 20° 8', long. 77° 11'.

BASSWARAJE DROOG, in the British district of North Canara, presidency of Madras, called by the British navigators Fortified Island, from the defences erected on it by an ancient Mysorean rajah. Distant direct from Mangalore, N., 105 miles; from Bombay, S., 340. Lat. 14° 18', long. 74° 29'.

BASTENDA, in the British district of Goalpara, in the north-east quarter of the lieut.-gov. of Bengal, a town on the route from Rungpore to Goalpara, 38 miles W. of the latter. Lat. 26°, long. 90° 5'.

BASTI.—See **BUSTEE**.

BASUNEE.—A town in the Rajpoot state of Joudpore, distant N.E. from Joudpore 98 miles. Lat. 27° 16', long. 74° 15'.

BASUNEE, in the Rajpoot state of Joudpore, a village on the route from Balotra to the town of Joudpore, and eight miles S. of the latter. Lat. 26° 13', long. 73° 7'.

BASUNGPEER, in the Rajpoot state of Jessulmere, a village on the route from the

town of Bikaneer to that of Jessulmere, and 11 miles E. of the latter. It is situate at the base of rocky hills rising above it on the north and west, and contains thirty houses, supplied with water from a tank. Lat. $26^{\circ} 55'$, long. $71^{\circ} 7'$.

BASUTEA, in the British district of Hijel-lee, lieut.-gov. of Bengal, a town on the route from Calcutta to Kedjeree, nine miles N. of the latter. Lat. 22° , long. $88^{\circ} 2'$.

BASWAPATAM.—A town in the territory of Mysore, distant W. from Chittel Droog 40 miles. Lat. $14^{\circ} 11'$, long. $75^{\circ} 52'$.

BATALA.—A town of the Punjab, in the Baree Doab division, situate on the left bank of the Kussoor Nullah, distance N.E. from Amritsur 24 miles. Lat. $31^{\circ} 49'$, long. $75^{\circ} 14'$.

BATCULL, in the British district of Canara, presidency of Madras, a town situate on a small stream which a mile and a half lower down falls into the Arabian Sea, or North Indian Ocean. The town has two mosques, though the majority of the inhabitants are Brahminists. The total population is estimated at 3,000. Distance direct from Mangaloor, N., 80 miles; Madras, N.W., 390. Lat. $13^{\circ} 59'$, long. $74^{\circ} 36'$.

BATE ISLAND.—See BETT ISLAND.

BATEL, in the Punjab, a town in the Daman, situate 31 miles N.W. of the town of Dera Ghazee Khan. Lat. $30^{\circ} 20'$, long. $70^{\circ} 25'$.

BATESAR, in the British district of Agra, lieut.-gov. of the N.W. Provinces, a town on the right bank of the Jumna, 35 miles S.E. of the city of Agra. It is described by Bacon as "chiefly remarkable for the exceeding beauty of the scenery around it, and the broad lake-like appearance of the river as it meanders quietly through its precipitous banks." Lat. $26^{\circ} 58'$, long. $78^{\circ} 36'$.

BATHERI, in the native state of Gu-whal, a village on the right bank of the Bhagirathi, as the Ganges is called in the upper part of its course. It is situate 300 feet above the stream, and close to the confluence of the Retal Nadi, a torrent falling into the Bhagirathi on the right side. Lat. $30^{\circ} 59'$, long. $78^{\circ} 36'$.

BATINDA.—A town in the native state of Patialah, one of the protected Sikh states, distant W. from Patialah 90 miles. Lat. $30^{\circ} 10'$, long. 75° .

BAT KOOCHEE, in the British district of Durrung, in Lower Assam, lieut.-gov. of Bengal, a town on the northern boundary of the district, 20 miles N. of Durrung. Lat. $26^{\circ} 40'$, long. $91^{\circ} 59'$.

BATTA, or **BHARAH**, in Sirmoor, a stream draining the Parda Doon, the waters of which it discharges into the Jumna. It rises seven miles S.E. of Nahun, and collecting the various currents of the Doon, holds first an

easterly and then a southerly course of about eighteen miles to its fall into the Jumna, close to the spot where that river commences its passage through the Sewalik range. The Bhutah part of its course is dry in the hot season, and then forms part of the route from Hurdwar to Nahun.

BATTANA, in the British district of Tannah, presidency of Bombay, a town on the route from Bhewndy to Damaun, 18 miles N.W. of the former. Lat. $19^{\circ} 30'$, long. 73° .

BAUG, in the raj or small state of Amjherra, a town with a fort, situate on a sandstone hill, in a wild, rugged, jungly tract, and at the confluence of the small rivers Wagrey and Girna. Here are furnaces for smelting the iron-ore raised in the neighbouring hills. It is surrounded by a low mud wall, and is stated to contain 400 houses; from which amount, according to the usual average, the population appears to be about 2,000 persons. In a range of hills extending N.E. and S.W., and in a spot about three and a quarter miles S.E. of the town, are four remarkable caves excavated in the N.W. face of the rock. According to the fabulous tradition of the Hindoos, they were excavated by the Panch Pandoos, those celebrated heroes of Hindoo mythology to whom all wonders are referred. The learned Erskine, however, has determined that the temples are Buddhist. Baug is the principal place of a pergunnah of the same name, containing seventy-six villages, twenty-seven of which are deserted. Though included within the limits of Amjherra, it appears to have fallen to the share of Scindia, who granted it, with its estimated annual revenue of 9,000 rupees, to one of his relatives. Baug is situate on the road from Guzerat to Malwa by what is termed the pass of Oodeypore. Two roads diverge from Baug; one the Tanda ghat, having a N.E. direction; the other the Tirrela ghat, leading to Indore and Oojein; this last is by far the best carriage-road. Distance S.W. from Mow 61 miles. Lat. $22^{\circ} 23'$, long. $74^{\circ} 51'$.

BAUG-CHEENE.—A town in the native state of Gwalior, in the possessions of Scindia, distant N.W. of Gwalior 27 miles. Lat. $26^{\circ} 28'$, long. $75^{\circ} 56'$.

BAUGDA, in the British district of Nuddea, lieut.-gov. of Bengal, a town 26 miles S.E. of Bishungur, and 23 miles W. of Jessore. Lat. $23^{\circ} 12'$, long. $88^{\circ} 50'$.

BAUGLEE, in the territory of Gwalior, a town in Malwa, belonging to a petty rajah tributary to the Scindia family, situate on the Kalee Sind river. It has a small well-built fort, and about 500 houses, with a population of about 3,000. Distant 54 miles S.E. from Oojein. Lat. $22^{\circ} 38'$, long. $76^{\circ} 24'$.

BAUG NUDDEE.—A small river rising in the Cuttack Mehals, in lat. $20^{\circ} 16'$, long. $84^{\circ} 14'$, and flowing north for about sixty miles, principally through the petty state of Boad,

falls into the Mahanuddy river near the town of Sonpeoor, in lat. $20^{\circ} 55'$, long. $84^{\circ} 9'$.

BAUJPOOR.—A town in the native state of Wusavee, presidency of Bombay, 58 miles N.E. from Surat, and 34 miles E. from Wusavee. Lat. $21^{\circ} 22'$, long. $73^{\circ} 48'$.

BAULAPOOR, in Hyderabad, or territory of the Nizam, a town on the route from Ellichpoor to Aurungabad, 65 miles S.W. of former, 102 N.E. of latter, on the river Mun, a tributary of the Taptee. Lat. $20^{\circ} 43'$, long. $76^{\circ} 50'$.

BAULEA, a town in the British district Rajeshahye, and the seat of the civil establishment of the district, is situate near the left bank of the Podda, or great eastern branch of the Ganges, on the route from Berhampore to Jumalpoore. It has a bazaar and considerable traffic. One of the government English schools was opened here in 1837. The civil station of the district was formerly at Nator, but as the spot was low, and very unhealthy, the establishment was, in 1822, removed to Baulea, which is built on a ridge of clay and kunkur. Distance from Calcutta, N., 122 miles; from Berhampore, N.E., 47; from Jumalpoore, S.W., 136. Lat. $24^{\circ} 22'$, long. $88^{\circ} 36'$.

BAUMEE.—A pass leading from the southern portion of Arracan into Pegu. The crown of the pass is about lat. $17^{\circ} 25'$, long. $94^{\circ} 50'$.

BAUN, or **OOTUNGHUN**.—A river rising in the Rajpoot state of Jeypoor, in lat. $27^{\circ} 20'$, long. $76^{\circ} 3'$, near the town of Munohurpoor; and flowing 215 miles, first south and afterwards west, passing in its course through the states of Bhurtpoore, Dholpoor, and the British district of Agra, it falls into the Jumna on its right side, in lat. $26^{\circ} 58'$, long. $78^{\circ} 31'$.

BAUNDA, in the neechna Dooab division of the Punjab, a town 58 miles N.E. of the town of Mooltan. Lat. $30^{\circ} 46'$, long. $72^{\circ} 3'$.

BAUNK, in the native state of Korea, on the S.W. frontier of the presidency of Bengal, a small town or village among the mountains of Gondwana, 44 miles N.W. of the town of Sirgooja, 108 S. of Mirzapoor, 360 W. of Calcutta. Lat. $23^{\circ} 34'$, long. $82^{\circ} 42'$.

BAUNSDA.—See **BANSDA**.

BAUNTWA, in Guzerat, a town of Kattywar, in the district of Soruth. It is the principal place of a tallook or subdivision containing fifty-four villages and a population estimated at 20,000. A tribute of 1,200*l.* annually is paid to the British government. The chiefs of Bauntwa, younger branches of the family of the second nawaab of Joonagurh, by whom it was alienated in 1740, have an aggregate income which has been estimated at about 100,000 rupees. Distance from Ahmedabad, S.W., 190 miles. Lat. $21^{\circ} 30'$, long. $70^{\circ} 10'$.

BAUSHKERA, in the British district of Moradabad, lieut. gov. of the N.W. Provinces,

a village on the route from the town of Moradabad to Almora, and 27 miles N. of the former. Lat. $29^{\circ} 10'$, long. 79° .

BAUSUR.—A town in the territory of Hyderabad, or dominions of the Nizam, distant N. from Hyderabad 110 miles. Lat. $18^{\circ} 53'$, long. 78° .

BAYPOOR.—See **BETPOOR**.

BAYTEE, in the British district of Allahabad, lieut. gov. of the N.W. Provinces, a village on the route by the left bank of the Ganges from Allahabad cantonment to that of Benares, 30 miles S.E. of the former, 44 W. of the latter. Lat. $25^{\circ} 18'$, long. $82^{\circ} 22'$.

BAZAAR, in the Punjab, a town of the district of Bunnoo, situate on the right bank of the Khoorum river, 60 miles N. of Dera Ismail Khan. Lat. $32^{\circ} 39'$, long. $70^{\circ} 42'$.

BAZAR, in the district of Peeshawur, a division of the Punjab, a town situate 50 miles N.E. of the town of Peeshawur. Lat. $34^{\circ} 35'$, long. $72^{\circ} 10'$.

BAZPOOR.—A town in the British district of Moradabad, lieut. gov. of the N.W. Provinces. Lat. $29^{\circ} 9'$, long. $79^{\circ} 10'$.

BEARA, in the native state of Wusavee, under the political superintendence of the government of Bombay, a town on the route from Boorhanpoor to the city of Surat, 190 miles W. of former, 39 E. of latter. Population about 4,000. Lat. $21^{\circ} 4'$, long. $73^{\circ} 28'$.

BEAS, one of the great rivers of the Punjab, rises on the southern verge of the Rotang pass, in Lahoul, a Himalayan region north-east of the Punjab, and at a point 13,200 feet above the sea, in lat. $32^{\circ} 24'$, long. $77^{\circ} 11'$. The river takes a southerly course of about eighty miles to Mundi, and has there a considerable body of water, and a width of from 150 to 200 yards, with a depth of twelve feet. The depth, however, in the warm season constantly varies, beginning to swell in the evening, attaining its maximum by morning, and declining through the day, losing about one-third of its water. This periodical change results from the melting of the snow diurnally by the heat of the sun. From Mundi the Beas takes a course of fifty miles, chiefly westerly, to Nadaun, where Vigne found it in the low season 150 yards wide, twelve feet deep, and running at the rate of three miles and a half an hour. Forster, who crossed the Beas a short distance below Nadaun, states that he found it to have a rapid stream about 100 yards wide; but the breadth frequently varies, and Moorcroft, about a quarter of a mile above the town, found it only 100 feet wide, and running at the rate of five miles an hour. B. Vor. Hügel describes it here as an unfordable clear rapid stream, running between steep and lofty banks, access being obtained to the water by large and well-constructed stairs. From Nadaun it takes a wide sweep of about eighty miles to the north-west, and having entered the plain of the Punjab, it turns southward, a

course which it holds for about eighty miles further, to its confluence with the Sutlej. A short distance below Nadam it receives the river of Kunyar, flowing from the south. Macartney measured it at the ferry of Bhyrawal, about twenty miles above the confluence, and there found it 740 yards wide, and so rapid that, in crossing, the boats were driven ten or twelve miles down the stream. This was in August, at a season when the river is at its greatest height. In the low or cold season it is fordable in most places. By the competent observer last quoted, the Beas is regarded as larger than the Sutlej, though in length of course it is greatly inferior to that river. But Burnes states, that though they have the same breadth each, about 200 yards, the Sutlej has the greater volume of water. The confluence of the Beas with the Sutlej takes place at Endreana, near the village Hurekee, and in lat. $31^{\circ} 10'$, long. $75^{\circ} 4'$, after a course by the former river of 290 miles. The Beas is considered to be identical with the *Hypasis* of Arrian, the Greek name being a corruption of *Beypasha*, given it by the natives. The united stream below the confluence bears the name of the Ghara until the confluence with the Chenab.

BEAWR, or **BEOUR**, in the British district of Ajmere, a town of Mairwara, 30 miles S.W. of Nusserehab cantonment. It is situate in an extensive valley, which is likewise the site of the cantonment of the Mhair corps, a force of 1,000 men raised from the Mhaira, a tribe inhabiting that part of the Aravalli range. The only public building at this place is the prison, a well-regulated establishment, the expenses of which are defrayed by the labour of the prisoners. Lat. $26^{\circ} 10'$, long. $74^{\circ} 26'$.

BECHORE.—See **PICHEOR**.

BECTALUNG, in the British district of Sylhet, lieut.-gov. of Bengal, a town on the left bank of a small rivulet running into the river Barak, $2\frac{1}{2}$ miles S.W. of Sylhet. Lat. $24^{\circ} 25'$, long. $91^{\circ} 12'$.

BEDER, in Hyderabad, or the territory of the Nizam, a large town near the right bank of the Manjira, a considerable tributary of the river Godavery. Its site is on a table-land 2,359 feet above the sea, and about 100 feet above the level of the adjacent country. It is surrounded by lofty walls, and is still a large city, though greatly declined from its former state, when it was the capital of a principality and the residence of kings. It is at present chiefly noted for the manufacture called Bidari ware, used particularly for the bottoms or bowls of *hookas* or tobacco-pipes, and for vessels to hand round betel to guests. The material is an alloy, consisting of twenty-four parts of tin and one of copper. The ware is coloured black with a preparation for which this place is celebrated, and which is made by mixing equal parts of muriate of ammonia and saltpetre-earth with water, compounding them into a paste. The colour is said to be very

durable; and if it become impaired, it is restored by the application of oil or butter. The sable hue of the articles thus fabricated is relieved by silver ornaments. Beder is 75 miles N.W. of the city of Hyderabad. Lat. $17^{\circ} 55'$, long. $77^{\circ} 36'$.

BEDNOR.—A town in the Rajpoot state of Oodeypoor, distant N.W. from Oodeypoor 93 miles. Lat. $25^{\circ} 51'$, long. $74^{\circ} 20'$.

BEDNORE, or **NUGGUR**, in the native state of Mysore, under the administration of the government of India, a city, the principal place of a district of the same name, situate in the midst of a basin or depression in a rugged table-land on the Western Ghats, and at an elevation estimated at more than 4,000 feet above the sea. The town does not appear to have been at any time fortified, its defence having been injudiciously intrusted to the line of posts erected on the summits of the surrounding hills. On a bold eminence within the lines of defence are the citadel and the ruined palace of the rajah. The town is favourably situate for commerce, on the road leading from Mangalore, through Hosur Angadi, one of the best passes through the Western Ghats. Originally a village, this place in 1645 became the seat of government of the rajah of Ikeri, who thenceforward was denominated rajah of Bednore, and its prosperity rapidly advanced, so that the population soon exceeded 100,000 persons. In 1763 it was taken by Hyder Ali, the usurper of Mysore, who pillaged it of property of the estimated value of 12,000,000*l.*, and subsequently made it the seat of his government, and, in honour of himself, called it Hydernuggur, or Hyder's Town, subsequently abbreviated popularly into Nuggur, by which name it is at present generally known. Early in 1783 General Matthews occupied this town, at the head of a considerable British force; but being soon after attacked by Tippoo with a vastly superior force, all attempts at resistance were quickly overpowered; and the British force having surrendered, General Matthews and the other principal officers were put to death, and the rest of the force imprisoned and very cruelly treated. Bednore is distant from Seringapatam, N.W., 150 miles; Bangalore, N.W., 183; Mangalore, N., 70; Madras, W., 360. Lat. $13^{\circ} 50'$, long. $75^{\circ} 6'$.

BEEANS, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a Bhoti subdivision or collection of hamlets on the upper part of the course of the river Kalee, bounded on the north and north-east by South-western Thibet; on the south-east by the territory of Nepal; on the south by the mehal of Choudans; and on the west and north-west by the mehal of Dharma; and situate between lat. $30^{\circ} 3'$ — $30^{\circ} 28'$, long. $80^{\circ} 42'$ — $80^{\circ} 57'$; and having an area of about 200 square miles. The pass on the northern frontier of this subdivision, forming a communication with South-western Thibet, has an elevation of about

15,000 feet. The peak of Beasas Rikhi, a summit of the Himalayas on the same frontier, rises to the height of 20,000 feet.

BEEAS, in the British district of Rajeshaye, lieutenant-gov. of Bengal, a town on the route from Dacca to Bograh, 26 miles S. of the latter. Lat. $24^{\circ} 29'$, long. $89^{\circ} 18'$.

BEEBAMEYOO, in the British district of Etawah, lieutenant-gov. of the N.W. Provinces, a town on the route from Etawah to Agra, 16 miles N.W. of the former. Lat. $26^{\circ} 56'$, long. $78^{\circ} 58'$.

BEEBEEPOOR, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Futtehghur to that of Cawnpore, and 32 miles N.W. of the latter. Lat. $26^{\circ} 49'$, long. $80^{\circ} 8'$.

BEEBREE, in the British district of Mynpoore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghur to that of Mynpoore, and 30 miles N.W. of the latter. Lat. $27^{\circ} 30'$, long. $78^{\circ} 46'$.

BEECHA KOH.—A town in the native state of Nepal, distant S.W. from Khatmandoo 82 miles. Lat. $27^{\circ} 17'$, long. $85^{\circ} 1'$.

BEEBASIR, or **BIDASIR**, in the Rajpoot state of Bikaner, a town near the south-eastern frontier, towards Joudpore. About five miles south-east of the town, during the rainy season, is a piece of water about four miles long and half that breadth, with a depth of four or five feet. It dries up in the hot season, leaving a thick crust of salt, which is taken off both for home use and exportation. The number of houses, according to Tod, is 500. The adjacent country is the least sterile part of the territory of Bikaner, in consequence of the nearness of water to the surface. Lat. $27^{\circ} 48'$, long. $74^{\circ} 26'$.

BEEGOH.—A town in the native state of Beekaneer, distant E. from Beekaneer 52 miles. Lat. $28^{\circ} 4'$, long. $74^{\circ} 13'$.

BEEGHUR, in the British district of Hurrana, lieutenant-gov. of the N.W. Provinces, a village on the route from Hansi to Bhutneer, and 42 miles N.W. of the former. It is a poor place, being scantily supplied even with water. Lat. $29^{\circ} 22'$, long. $76^{\circ} 34'$.

BEEHEE, in the British district of Shahabad, lieutenant-gov. of Bengal, a town on the route from Dinapoor to Benares, 39 miles W. of the former. Lat. $25^{\circ} 30'$, long. $84^{\circ} 31'$.

BEEHUR, a river of the district of Boghelkhand, or territory of Rewah, rises in lat. $24^{\circ} 15'$, long. $81^{\circ} 5'$, about 25 miles S.W. of the town of Rewah. The elevation above the sea, of its source, must considerably exceed 1,000 feet, as at the Chachye Fall, fifty miles farther north, or down the stream, the bed has an elevation of 990 feet. At the Chachye Fall, the stream, passing from the plateau of Rewah to the more depressed country farther to the north-east, is precipitated down the face of the bounding ledge a depth of 200 feet. Two

miles below this it falls into the Tons, on the right side, in lat. $24^{\circ} 48'$, long. $81^{\circ} 23'$. At Rewah, thirty miles from its source, it is crossed by the route from Allahabad to Sangor, and at that point is fordable in the dry season, the stream being then fifteen yards wide, and knee-deep: the bed is eighty yards wide. Jacquemont describes it in the same place as a torrent flowing down a wide and deep channel over irregular calcareous masses.

BEEHUT, in territory of Gwalior, a town on the route from Kalpee to the fort of Gwalior, 94 miles W. of former, 30 E. of latter. There is here a fort of masonry on an eminence. A small business is driven in smelting and selling the iron raised from the sandstone hills a short distance to the south. Lat. $26^{\circ} 13'$, long. $78^{\circ} 37'$.

BEEJAPOOR.—A ruined town in Sattara, near the eastern frontier, towards Hyderabad, or the territory of the Nizam. Duff gives the following account of its condition: "The walls, which are of hewn stone and very lofty, are to this day entire, and being surmounted by the cupolas and minarets of the public buildings, still present to a spectator from without the appearance of a flourishing city; but within all is solitude, silence, and desolation. The deep moat, the double rampart, and the ruins of the splendid palaces in the citadel, attest the former magnificence of the court. The great mosque is a grand edifice, and the tomb of Ibrahim Adil Shah is remarkable for its elegant and graceful architecture. But the chief feature in the scene is the mausoleum of Mohummud Adil Shah, the dome of which fills the eye from every point of view; and though in itself entirely devoid of ornament, its enormous dimensions and austere simplicity invest it with an air of melancholy grandeur, which harmonizes with the wreck and desolation that surround it. When viewed as mere ruins, the remains of that city as they at present exist are exceedingly grand, and as a vast whole, far exceed anything of the kind in Europe." Among the various wonders of this ruined capital of the extinct kingdom of Beejapoor, not the least remarkable is the vast gun called Malik i Maidan, or "the King of the Plain," one of the largest pieces of brass ordnance in the world. The muzzle is four feet eight inches in diameter, the calibre two feet four inches, the length nearly fifteen feet, the weight forty tons. Its removal to England has been suggested by the Bombay government; but as the expense of its conveyance to the coast was estimated at 30,000 rupees, the home authorities expressed an opinion, that the object proposed was not of sufficient importance to justify the expense.

The founder of the Mussulman state of Beejapoor was, according to Ferishta, a son of Murad II., the Osmanli sultan; on whose death, his successor, Muhammad II., gave orders that all his brothers should be strangled. From this fate one only, named Yusuf, escaped.

assigns five persons to each house; but it seems scarcely credible that a country so sterile should be able to furnish the necessities of life to a town having a population of 60,000 persons. Distance of Beekaneer N.W. from Calcutta 1,175 miles, from Ajmere 130 miles. Lat. 28°, long. 73° 22'.

BEEKASUR, in the Rajpoot state of Bickaneer, a village on the route from Nagor to the city of Bickaneer, and 25 miles S.E. of the latter. It contains sixty houses, supplied with water from a well. Lat. 27° 40', long. 73° 30'.

BEELARA.—A town in the native state of Marwar, or Joudpore, distant E. from Joudpore 42 miles. Lat. 26° 11', long. 73° 49'.

BEELKAW.—A town in the peninsula of Kattywar, forming part of the possessions of the Guicowar, but placed under the political management of the presidency of Bombay, distant S. from Rajkote 61 miles. Lat. 21° 27', long. 70° 40'.

BEELUN, in the Baree Doab division of the Punjab, a town situated on the left bank of the Chensab, five miles N. of the town of Mooltan. Lat. 30° 11', long. 71° 31'.

BEEMA.—A river rising about lat. 19° 5', long. 73° 33', in the table-land of the district of Poona, presidency of Bombay, at an elevation of 3,090 feet above the level of the sea. It takes a south-easterly direction, and traversing, during a course of 380 miles, the districts of Poona, Ahmednuggur, Sholapore, and the territory of Sattara, enters the dominions of the Nizam, and after a further course of 130 miles, falls into the Kistnah river in lat. 16° 24', long. 77° 20'.

BEEOR.—A village in the jaghire of Jhughur, lieutenant-gov. of the N.W. Provinces. Lat. 28° 11', long. 76° 19'.

BEERBHANWALLA, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, a village three miles from the right bank of the Ramgunga (western). Lat. 29° 32', long. 78° 42'.

BEERBHOOM, a British district in the lieutenant-gov. of Bengal, is bounded on the north by the British district of Bhaugulpore; on the east by the British districts Moorshedabad and Nuddes; on the south by the British districts Burdwan, Bancoora, and Pachete; and on the west by the British districts Ramgurih, Pachete, and Monghyr. It lies between lat. 23° 32'—24° 40', long. 86° 25'—88° 30'. The area is 4,780 square miles. The district is traversed by numerous torrents descending from the highlands, which take a direction east or south-east until, discharging themselves into the channels either of the Bhagruttee or Damooda, their contents find their way to the estuary of the Ganges. Of these torrents the chief are the Hadjee and the Barakar. Coal and iron-ore in vast quantities and excellent quality exist along the courses of the Damooda and Hadjee, in the southern and western parts of the district. The population is stated to be 1,040,876.

Beerbhoom was acquired by the East-India Company in 1765, by virtue of the firman of Shah Allum, padshah of Delhi, granting the dewanny of Bengal, Behar, and Orissa.

BEERCOOL, in the British district Midnapore, lieutenant-gov. of Bengal, a town two miles N. of the shore of the Bay of Bengal, distant from the town of Midnapore, S., 54 miles; from Calcutta, S.W., 85. Lat. 21° 38', long. 87° 32'.

BEERGUNJE, in the British district of Dinajepore, lieutenant-gov. of Bengal, a town on the route from Dinajepore to Darjeeling, 17 miles N. of the former. Lat. 25° 48', long. 88° 36'.

BEERKOOR.—A town in Hyderabad, or dominions of the Nizam, distant N.W. from Hyderabad 89 miles. Lat. 18° 28', long. 77° 52'.

BEERROOL, in the British district of Nuddes, lieutenant-gov. of Bengal, a town on the route from Hooghly to Jessore, 40 miles S.W. of the latter. Lat. 23°, long. 88° 35'.

BEERPOOR, in the presidency of Bombay, a town of Guzerat, on the route from Mow to Deesa, 180 miles N.W. of former, 146 S.E. of latter. It has a bazaar, and is well supplied with water, and belongs to the nawaub of Balasinore, a descendant of Osman Khan, who received it from Shahjehan, padshah of Delhi. Lat. 23° 16', long. 73° 29'.

BEERPOOR, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly, and 24 miles S.W. of the latter. Lat. 28° 15', long. 79° 13'.

BEERPOOR, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town on the route, along the left bank of the Ganges, from Mongheer to Patna, 19 miles E. of the latter. Lat. 25° 32', long. 85° 33'.

BEERPORE, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurih to that of Futtehgurih, and 17 miles N.W. of the latter. Lat. 27° 26', long. 79° 26'.

BEERUMSIR, a village of the Rajpoot state of Bickaneer, on the eastern frontier, towards Shekhawati, is situate on the route from Patna to the town of Bickaneer, and 97 miles E. of the latter. Lat. 28° 2', long. 74° 53'.

BEESOO, in the Rajpoot state of Joudpore, a village on the route from Pokburn to Balmer, and 43 miles N. of the latter. Lat. 26° 16', long. 71° 24'.

BEESULNUGGUR, or **BISANAGAR**, in Guzerat, or territory of the Guicowar, a town on the route from Mow to Deesa, 220 miles N.W. of former, 50 S.W. of latter. It has considerable transit trade, in sending iron and some other heavy goods to Marwar; and the manufacture of cotton cloths is carried on to a considerable extent. Population 18,000. Dis-

tance from Ahmedabad, N., 45 miles. Lat. 23° 40', long. 72° 33'.

BEEULPOOR, in the Rajpoot state of Joudpore, a town on the route from the city of Joudpore to that of Ajmeer, and 18 miles E. of the former. It contains 800 houses, and a bazaar of 100 shops, and is supplied with good water from seventy wells lined with brick, and from fifteen to twenty feet deep. Population 4,050. Lat. 26° 16', long. 73° 26'.

BEEULPOOR.—A town in the British district Bareilly, lieutenant-gov. of the N.W. Provinces, and on the route from the town of Bareilly to Seetapoor, being 25 miles S.W. of the former place. It has a good bazaar, and is abundantly supplied with water. Population 7,245. Lat. 28° 18', long. 79° 52'.

BEEHNOK.—A town in the Rajpoot state of Beekaneer, distant S.W. from Beekaneer 40 miles. Lat. 27° 50', long. 72° 46'.

BEETUREE, in the Rajpoot state of Joudpore, a village on the route from Jessulmere *via* Nagor to Nusseerabad, and 202 miles N.W. of the latter. It is supplied with good water from two wells 200 feet deep. Lat. 27° 5', long. 72° 25'.

BEEGERWAL, in Sirhind, a village on the route from Hansee to Lodiana, and 75 miles N. of the former town. It is situated in a level, fertile, well-cultivated country. Distant N.W. from Calcutta 1,051 miles. Lat. 30° 6', long. 75° 53'.

BEGH, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghur to that of Futtelghurh, and 13 miles N.W. of the latter. Lat. 27° 26', long. 79° 30'.

BEGIEGHAT, in the British district of Suharunpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from Kurnal to Suharunpoor. It is situated on the left bank of the Jumna, crossed here by ferry. Distant N.W. from Calcutta 976 miles. Lat. 29° 45', long. 77° 13'.

BEGOKÉ, in the British district of Bhutiana, lieutenant-gov. of the N.W. Provinces, a village on the route from Hansee to Bhutnair, and 80 miles N.W. of the former. Lat. 29° 31', long. 75° 3'.

BEGUMABAD, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a town on the route from Delhi to the town of Meerut, and 28 miles N.E. of the former. It has a serai, or lodge for travellers, and a bazaar. Lat. 28° 51', long. 77° 38'.

BEGUMGUNJ, in the territory of Oude, a village on the route from Azimgurh to Fyzabad, 66 miles N.W. of the former, 20 S.E. of the latter. Lat. 26° 39', long. 82° 22'.

BEGUMGUNJE, in the British district of Bulloah, lieutenant-gov. of Bengal, a town on the route from Bulloah to Tipperah, 15 miles N.E. of the former. Lat. 22° 56', long. 91° 9'.

BEGUMPOOR, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route by Rajapoor ferry from the cantonment of Allahabad to Banda, and 13 miles W. of the former. Lat. 25° 24', long. 81° 46'.

BEHADARPOOR, in the British district of Mozuffurnuggur, a village on the route from Meerut to Saharanpoor, and six miles S.E. of the town of Mozuffurnuggur. Lat. 29° 24', long. 77° 50'.

BEHAR.—A British district under the lieutenant-gov. of Bengal, so called from a town of the same name. It lies between lat. 24° 12'—25° 22', long. 83° 25'—86° 6'; is 165 miles in length from north-east to south-west, and sixty-eight in breadth. The area is 5,694 square miles. It is bounded on the north by the British district of Patna; on the east and north-east by that of Mongheer; on the south by Ramghur and Palamow; on the west by Mirzapore; and on the north-west by Shahabad. It is a well-watered tract, being traversed or bounded by numerous rivers; among which may be enumerated the Son, the Phalgu, and the two Pimpuna. With respect to the climate of Behar, it may be observed, that autumn is marked by the periodical rains usual in this part of India. The nights in winter are cool, and frosts sometimes injure the crops. The heat is excessive in the latter part of spring and early part of summer, and the annoyance resulting is increased by dust, there being then no vestige of verdure. Gaya, about the middle of the district, is considered the most sultry place within it; partly in consequence of the radiation from the extensive sands of the rivers; partly from the same effects caused by the bare rocks around the town. Rice, throughout the district, is generally the most important crop; the grain, which is very fine, is largely exported, being much in demand in the Calcutta market. Wheat is next in importance; then barley; then maruya, maize, jowar, and various kinds of millet, melons, cucumbers, and other cucurbitaceous growths of various sorts. The potato, introduced by Europeans, is now cultivated to great extent. The cabbage, cauliflower, lettuce, turnip, and most other European garden vegetables succeed well in the cold season. Of the commercial crops the most important is opium; and this article forms a productive source of revenue to government. Sugar and cotton are also extensively produced. Tobacco, indigo, and kassam or safflower, are raised, but in no great quantity; and the betel-leaf, though considered the finest in India, is not cultivated to any great extent. The manufacturing industry is rather important, being employed in producing fabrics of cotton, blankets, silk fabrics, carpets, tents, tape, thread, ropes, paper, torches, glass, coarse jewellery, coarse cutlery and hardware, tannery, leather, saddlery, shields and other fabrics in leather; fabrics of horn; ornaments in lac

and glass, and in gold, silver, and other metals; ink, soap, sugar, nitre, pottery, &c., and bricks. Ardent spirits are distilled in large quantities, especially from the Indian flowers. Perfumes from sandalwood, roses, and jasmine, are also made to a considerable extent. Dyeing is largely practised, but with no great skill. The population is estimated at 2,500,000. Of routes, first, the great trunk-road from Calcutta to the North-West Provinces traverses the south-west of the district, in a direction from south-east to north-west. Second, a route proceeds from north to south, from Patna to Gaya, where it takes a south-western direction to Shergotty, whence it is continued in the same direction to Palamow. With respect to the roads in general, Buchanan observes that he has seen no country, at all civilized, so ill provided with them. It must be observed, however, that the innumerable torrents traversing and inundating the country during the rainy season, render it very difficult either to make good roads or to keep them in repair.

The present British district of Behar comprises a portion only of the south-west half of the great soobah or province which bore the same name among the chief divisions of the empire of Delhi. Previously to the comparatively clear accounts derivable from the Moslem annals, this soobah appears in the legendary lore of the Hindoos to have been comprised within the realm of Magadha. Wilford observes, "It is universally acknowledged that the court of the kings of Magadha, now the province of Bahar, was one of the most brilliant that ever existed." Its meridian greatness has been conjectured to have continued for above two thousand years, during which "the kings of Magadha were lords paramount and emperors of India." In the time of Kutb-uddin, viceroy of Mohammed, the Mussulman sultan of Ghor, it formed part of the dominions of Jaichand, king of Kannouj. Jaichand was in 1194 defeated and slain by the Mussulman general, and Behar and Bengal added to the dominion of Delhi, from which capital governors were thenceforward appointed. One of these governors was in 1340 slain by Malek Fakhr-uddin, who assumed the title of king of Bengal and Behar. The power of the dynasty which he founded was weakened by Baber, who wrested from it Behar, and was finally overthrown by Shir Shah, the Patan, who dethroned Humayon, the son of Baber, and expelled him from India. Bengal subsequently revolted, but was again united by Akbar to the empire of Delhi, of which it thenceforward remained a part until 1765, when, being virtually in the possession of the East-India Company, it was formally granted to that body by the firman of Shah Alum, the padshah of Delhi. The tract thus conferred comprised not only the present British districts of Behar, Patna, and Shahabad, on the right bank of the Ganges, but an extent nearly equal on the left bank of that river, and at

present coextensive with the British district of Tirhoot and Sarun.

BEHAN, in the British district of the same name, lieutenant-gov. of Bengal, a place now much decayed, the original city being nearly deserted, and the present town consisting of a collection of dwellings dispersed around its remains. The whole is divided into twenty-four mahalls or wards, containing houses interspersed with fields, gardens, and groves. From the old city a bazaar extends southward. It is roughly paved, and altogether a wretched street, though there are a few good houses in the rear, right and left of it. There are some ruins of mosques originally well-built structures. During the Mahomedan sway in this part of India, the town is stated to have surrounded the old ditch on every side for at least a mile. Its ruin dated from its sack by the Mahrattas, when they invaded Bengal and Behar, about 1742, Ali Verdi Khan being nawaub of the province; and all relics of prosperity were swept away by a dreadful famine which occurred some years subsequently. The number of inhabited houses, however, was estimated by Buchanan, fifty years ago, at 5,000; which, according to the usually admitted ratio of persons to dwellings, would denote a population of 30,000 persons. Distant S.E. from Patna 37 miles, N.W. from Calcutta 255. Lat. $25^{\circ} 10'$, long. $85^{\circ} 35'$.

BEHAR.—A town in the native state of Coosh Behar, in North-Eastern India, distant N.E. from Rungpore 41 miles. Lat. $26^{\circ} 16'$, long. $89^{\circ} 29'$.

BEHAREE, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawah to that of Cawnpore, and 36 miles W. of the latter. Water is obtained from wells. Lat. $26^{\circ} 21'$, long. $79^{\circ} 55'$.

BEHAREE, in the British district of Ghaizeepoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Ghaizeepoor cantonment to Jounpore, 20 miles W. of the former, and 30 S.E. of the latter. Lat. $25^{\circ} 35'$, long. $83^{\circ} 5'$.

BEHLA, in the British district of Poona, presidency of Bombay, a town on the left bank of the Kokree river, 39 miles W. of Ahmednuggur. Lat. $19^{\circ} 8'$, long. $74^{\circ} 11'$.

BEHLAPOOR, in the British district of Ahmednuggur, presidency of Bombay, a town on the left bank of the river Paira, 35 miles N. of Ahmednuggur. Lat. $19^{\circ} 36'$, long. $74^{\circ} 39'$.

BEHRAH.—A town of Rajpootana, in the district of Godwar, distant S.W. from Ajmeer 136 miles. Lat. $25^{\circ} 4'$, long. $73^{\circ} 15'$.

BEHREE, in Bundelcund, a jaghire or feudal possession, named from its principal place. It is bounded by the British district of Hummerpore on every side, except for two or three miles on the west, where it adjoins the petty chieftainship of Bownee: its centre is in

lat. $25^{\circ} 55'$, long. $79^{\circ} 59'$; and it comprises thirty square miles, five villages, with a population of 2,500 souls, and yields a revenue of 2,300*l*. The jaghiredar or feudatory, a Bhoondela Rajpoot, maintains twenty-five horse and 100 foot. In 1811, this jaghire was granted to be held in perpetuity of the East-India Company, as a reward to the jaghiredar for services rendered to the British government.

BEHREE, in Bundelcund, the principal place of the feudal possession of the same name, is situate on the left bank of the Betwa, 20 miles S.E. of Calpee. Lat. $25^{\circ} 54'$, long. $79^{\circ} 58'$.

BEHUR, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, a town 39 miles E. from Bijnour, and the same distance N. of Moradabad. Lat. $29^{\circ} 21'$, long. $78^{\circ} 50'$.

BEHUT.—A town in the territory of Gwalior, or possessions of Scindia, distant S. from Gwalior 82 miles. Lat. $25^{\circ} 1'$, long. $78^{\circ} 30'$.

BEHUT, in Bundelcund, a small town on the right bank of the river Deesaun, 54 miles S.W. of Calpee. It is the principal place of a jaghire or feudal grant, made in 1817, by the East-India Company to a descendant of one of the Kalleenjur Cowbeys, or Brahminical possessors of that fortress, who, in 1812, surrendered it on conditions to the British arms. It is stated to comprise fifteen square miles, to contain seven villages, with a population of 2,500 souls, and to yield a revenue of 1,550*l*. per annum. The military strength of this small domain corresponds with its limited extent; amounting to only sixty-one men, ten of whom are cavalry. The jaghiredar of Behut holds the mouzah of Lohargaon under the British government, subject to the payment of a revenue of 1,400 rupees per annum. Behut is in lat. $25^{\circ} 25'$, long. $79^{\circ} 25'$.

BEIRWAL, or **BHAIRIWALA**, in Sirhind, a village on the route from Hansi to Lodiana, and 39 miles S. of the latter town. Distant N.W. from Calcutta 1,071 miles. Lat. $30^{\circ} 24'$, long. $75^{\circ} 58'$.

BEJA.—An insignificant hill state in the Cis-Satluj territory, bounded on the north by Kothar, on the east by the lapsed territory of Bughat, on the south by Pateela, and on the west by Mhilog. It is barely five miles long from north-east to south-west, and not more than two at its greatest breadth. Its centre is in lat. $30^{\circ} 56'$, long. $77^{\circ} 2'$. It comprises only three pergunnahs, supposed to contain a population of 3,000, and yields a revenue of 400*l*., out of which a tribute of 18*l*. is paid to the British government. This state was, on the expulsion of the Goorkas in 1815, conferred on the rajah, on condition of subordinate military co-operation. He employs about 200 armed retainers.

BEJAGURH.—A town in the native state of Indoor, or possessions of the Holkar family,

distant S.W. from Indoor 75 miles. Lat. $21^{\circ} 40'$, long. $75^{\circ} 32'$.

BEJAURA.—A town in the native state of Sirgoojah, on the south-west frontier of Bengal, distant N.E. from Sirgoojah 36 miles. Lat. $23^{\circ} 16'$, long. $83^{\circ} 40'$.

BEJEYGERH.—See **BIDJEYGURH**.

BEJIGURH, in the British district of Aligurh, lieutenant-gov. of the N.W. Provinces, a town with a fort on a route from the cantonment of Aligurh to that of Futtehghurh, and 18 miles S.E. of the former. Elevation above the sea 713 feet. Lat. $27^{\circ} 43'$, long. $78^{\circ} 17'$.

BEJOURA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 783 miles N.E. of Calcutta by the river route, and 25 miles S.E. of the city of Allahabad by the same. Lat. $25^{\circ} 16'$, long. $82^{\circ} 5'$.

BELA, in the British district of Behar, lieutenant-gov. of Bengal, a town on the route from Gayah to Patna, 45 miles S. of the latter. Lat. $24^{\circ} 58'$, long. $85^{\circ} 3'$.

BELAH, or **BEYLUH**, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, is a small town on the route from the cantonment of Etawa to Lucknow by Nana-mowghat, and 40 miles E. of the former. It has a bazaar, and supplies and water are abundant. Lat. $26^{\circ} 49'$, long. $79^{\circ} 44'$.

BELANOO, in the jaghire or feudal possession of Jujhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Chooroo, in Bikanere, to Kanond, and five miles W. of the latter place. Lat. $28^{\circ} 15'$, long. $76^{\circ} 8'$.

BELASPOOR, in the jaghire of Rampoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Almorah to Moradabad, by Banmouree and Rampoor, 72 miles S.W. of Almorah fort, 18 miles N.E. of Rampoor town, 35 miles E. of Moradabad cantonment. It is a place of considerable size, and has a good supply of water and provisions. Elevation above the sea 560 feet. Lat. $28^{\circ} 53'$, long. $79^{\circ} 20'$.

BELASPOOR.—The principal place of the small mountain state of Kuhlloor, and the residence of the rajah. It has a picturesque site on the left or eastern bank of the Satluj. At the time of Forster's visit in 1783 it was a flourishing town, well built, with a degree of regularity unusual in that country. The houses were constructed of stone and lime mortar, and the streets paved strongly, though roughly; but at the time of Moorcroft's visit in 1820 it was in a ruinous condition, in consequence of having been twice sacked by the Gorkhas. The bazaar is now much dilapidated, and slenderly stocked; the inhabited houses are reduced to a few hundred, and the only ornament of the town is the residence of the rajah, a building of moderate size, but neat, and decorated with flowers in fresco. The Satluj, a deep and rapid river, and running at the rate of five miles an hour, is crossed about

two miles above the town by a much-frequented ferry, forming a communication with the Punjab. Elevation above the sea 1,465 feet. Lat. $31^{\circ} 19'$, long. $76^{\circ} 50'$.

BELASPOOR.—See **BILLASPOOR**.

BELEGAON.—A town in the native state of Bhotan, distant N.E. from Behar, the capital town of Cooch Behar, 69 miles. Lat. $27^{\circ} 10'$, long. $89^{\circ} 53'$.

BELEEN, in the British district of Pegu, presidency of Bengal, a town 20 miles from the left bank of the river Sittang, 62 miles S.E. of Pegu. Lat. $17^{\circ} 22'$, long. $97^{\circ} 10'$.

BELERIAGANJ, in the British district of Aizimurh, lieutenant-gov. of the N.W. Provinces, a small town on the route from the town of Aizimurh to that of Goruckpore, and 10 miles N. of the former. Distant N. from Renares 63 miles. Lat. $26^{\circ} 11'$, long. $83^{\circ} 12'$.

BELGAUM, a British collectorate in the presidency of Bombay, is bounded on the north by the territory of Sattara, the Southern Mahratta jaghires, and the British collectorate of Sholapore; on the east by the dominions of the Nizam; on the south by the British collectorates of Dharwar and North Canara; and on the west by the Portuguese territory of Goa and the native states of Sawunt Warree and Colapore. It extends from lat. $15^{\circ} 23'$ to $16^{\circ} 39'$, and from long. $74^{\circ} 2'$ to $76^{\circ} 23'$; it is 160 miles in length from east to west, and 89 in breadth, and contains an area of 5,405 square miles, with a population of 1,025,882. Formerly the district of Belgaum constituted a portion of the collectorate of Dharwar; but in 1836, owing to the great extent of the latter, it was distributed into two divisions, the northern receiving the appellation of Belgaum, and the southern retaining its former name. The principal routes are from west to east, from the port of Vingorla, through the towns of Belgaum and Kuladgee, to Moodgul, in the Nizam's territory; and from north-west to south-east, from Colapore, through the towns of Nepanee and Belgaum, to Dharwar. Canarese is the language of the people. The district of Belgaum formed part of the territorial cession made by the Peishwa, under the treaty of June, 1817, for the maintenance of a subsidiary force to be provided by the British government.

BELGAUM.—A town, the principal place of the British collectorate of the same name, situate on the route from Dharwar to Colapore. In 1818, after the overthrow of the Peishwa, the place was invested by a British force. The fort is of an oval ground-plan, about 1,000 yards in length, 700 in breadth, and surrounded by a broad and deep wet ditch, cut in very hard ground. After a feeble resistance for twenty-one days, the garrison, consisting of 1,600 men, capitulated, having lost twenty killed and fifty wounded; while the loss of the British amounted only to eleven killed and twelve wounded. Within the last few years

considerable improvements have been made in the town. In 1848 the principal inhabitants formed themselves into a committee, and in the course of four months, aided solely by the voluntary subscriptions of the townsmen, effected a complete reconstruction of the roads and lanes of the town, extending in the aggregate to a length of between nine and ten miles. The example thus set was followed in several towns and villages of the district; and the sense entertained by the government of the public spirit of the inhabitants of Belgaum was testified by the grant of 600*l.* to be expended in the further improvement of the town. Additional importance has been conferred upon this place, from its selection as the site of the educational institution for the instruction of the sons of natives of rank. This institution is supported by subscriptions from the chiefs and native gentry of the Southern Mahratta country, amounting annually to about 600*l.* A separate grant was made by the British government for the erection of the building; and the funds required for supplying the school with furniture, books, &c., were raised by private subscription. At a more recent period it was deemed desirable to throw open the institution to the sons of the middle classes of the country; and the number of pupils rapidly increased; in February, 1853, it exceeded fifty. Great apathy was at first evinced by the higher class sirdars, none of whom availed themselves of the proffered means of instruction; this, however, has been succeeded by a better spirit, and the list of pupils now contains the names of two of the descendants of the late chief of Sanglee, while the young chief of that state has himself condescended to receive instruction from the head master. Belgaum, which is situate on the plain east of the Ghauts, is 2,500 feet above the level of the sea. It is distant N.W. from Dharwar 42 miles. Lat. $15^{\circ} 50'$, long. $74^{\circ} 36'$.

BELGRAM, in the territory of Oude, a town on the route by Shahabad from Shahjehanpore to Lucknow, 75 miles N.W. of the latter. Heber, who passed through it in 1824, describes it as a small town with "marks of having been much more considerable, but still containing some large and good, though old, Mussulman houses." At present it has a bazaar, and is well supplied with water. The road in this part of the route is very sandy and bad. Lat. $27^{\circ} 10'$, long. $80^{\circ} 5'$.

BELHA, in the district of Pertabgurh, territory of Oude, a town on the left bank of the Sai, five miles east of the town of Pertabgurh. Butler states its population to be 3,000, all Hindoos. Distant E. of Lucknow 115 miles, N. of Allahabad 33. Lat. $25^{\circ} 50'$, long. 82° .

BELHA, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town 36 miles N.E. from Durbunga, 69 miles N. of Mongheer. Lat. $26^{\circ} 18'$, long. $86^{\circ} 30'$.

BELHA, in the British district of Azimgurh, lieutenant-gov. of the N.W. Provinces, a

BEL.

town the principal place of the pergunnah called Belhabans, is situate close to the southern frontier, in a swampy tract, much cut up by watercourses, some discharging themselves into the Ganges, others into the north-eastern Tons. It is 20 miles S. of Azimghur, 26 N.W. of Ghazeepeer, 34 N.E. of Benares, and in lat. $25^{\circ} 48'$, long. $83^{\circ} 13'$.

BELHARI, in the British district of Saugor and Nerbudda, a town on the north-east frontier towards Bundelcund, on the route from Allahabad to Jubbulpoor, 220 miles S.W. of former, 52 N.E. of latter. It is situate in a plain, amidst extensive ruins, proofs of its former prosperity, from which it has miserably declined, having been almost totally ruined by the predatory attacks of the Pindarees and other freebooters. There are, however, still some fine Hindoo temples in the town and its environs. Lat. $23^{\circ} 44'$, long. $80^{\circ} 22'$.

BELHIR.—A town in the territory of Oude, distant N.W. from Lucknow 32 miles. Lat. $27^{\circ} 14'$, long. $81^{\circ} 20'$.

BELHUTTEE.—A town in the native state of Sanglee, one of the Southern Mahratta jaghires, under the political superintendence of the presidency of Bombay, distant S.E. from Dharwar 53 miles. Lat. $15^{\circ} 4'$, long. $75^{\circ} 47'$.

BELJOOREE, or **BAILJOOREE**, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a town on the route from Kasheepoor to Dehra, two miles N.W. of the former. Beljooree has a population of 7,354. Lat. $29^{\circ} 14'$, long. 79° .

BELLAMKONTA, in the British district of Guntoor, presidency of Madras, a town on the route from Guntoor to Nelgoondah, 32 miles N.W. of the former. Lat. $16^{\circ} 30'$, long. $80^{\circ} 4'$.

BELLARY.—A British district of the presidency of Madras, named from its principal place. It is bounded on the north by the territory of the Nizam, from which it is separated by the river Toongabudra or Tumbudda; on the east by the forfeited jaghire of Kurnool and the British district Cuddapah; on the south-west and south by the territory of Mysore; and on the west by the British district Dharwar. It lies between lat. $13^{\circ} 40'$ — $15^{\circ} 58'$, long. $75^{\circ} 44'$ — $78^{\circ} 19'$. Its area, according to official return, is 13,056 square miles. The country is altogether a highland, the most elevated part of which is to the west, where the surface rises towards the culminating range of the Western Ghauts, and to the south, where it rises to the elevated table-land of Mysore. The principal rivers are the Tumbudda or Toongabudra, the Vedavutty or Hugry, and the Northern Penna or Pennair. The climate is characterized by great aridity, the vapours of the ocean driven by the south-west monsoon being arrested, condensed, and precipitated in enormous quantities on the seaward or western sides, and on the summits of the Western Ghauts, so that but a small

quantity reaches the central or eastern parts of the district, which, being also remote from the Bay of Bengal on the east, is beyond the influence of the north-east monsoon; so that less rain, on an average, falls in Bellary than in any place in Southern India. The population, according to a recent official statement, amounted to 1,229,599; indicating a relative density of ninety-four to the square mile. It is composed of a great variety of castes. People of two different tongues, the Teloo goos and Canarese, meet as it were in the centre of the district. The Teloo goo language is spoken in the eastern part of the district, and the Canarese in the western; the line of separation lying half-way between Bellary and Ghooty. In addition to the lines of railway which will intersect the district, the principal routes are, first, from south-east to north-west, from Madras, through Cuddapah, to the cantonment of Bellary, and thence, through the villages of Hospett and Humpsagur, to Dharwar and Belgaum; second, from south to north, from the military cantonment of Bangalore to that of Bellary; third, from south-west to north-east, from the military station of Hurryhur to Bellary, and thence to Hyderabad; fourth, a new trunk-road from Madras, through Chittoor and Palmanair, to Bellary. The Ceded Districts came into the possession of the East-India Company in the year 1800, by a treaty entered into with the Nizam, subsequent to the fall of Tippoo Sultan and the partition of his dominions. The collectorate of Bellary forms the western division of the districts so called.

BELLARY.—The principal place of the British district of the same name, under the presidency of Madras. It is the chief seat of the judicial and revenue establishments for the district, and the head-quarters of the military force of the Ceded Districts, consisting of Bellary and Cuddapah. The fort or fortified rock, round which the cantonment is situate, is a hill of bare granite of semi-elliptical form, the length of which, in a direction from north-east to south-west, is about 1,150 feet. "It rises abruptly from the plain to the height of 450 feet, and is about two miles in circumference." At the distance of a few hundred yards to the northward, is a long ridge of bare rugged rocks of similar formation, and at a short distance to the eastward are several lesser elevations of the same character. The summit of this hill being flat, and surrounded by a rampart of granite, constitutes what is styled the Upper Fort, which might be rendered impregnable; but having no accommodations for a garrison, is unoccupied by troops, except a small guard having custody of prisoners detained there. It contains several tanks or cisterns, excavated in the rock, from its south-western to its north-eastern corner; and outside this turreted rampart are a ditch and covered way. The lower fort is half a mile in diameter, and contains barracks for a regiment.

BEL—BEN.

of the Crown and for the East-India Company's European artillery, the arsenal and commissariat stores, a Protestant church, and several bungalows, or lodges for officers. On the south-east of the lower fort is the pettah or native town, to which, at considerable expense to government, the inhabitants were removed in 1816, having previously inhabited the forts. About half a mile south-west of the base of the rock on which the fort is situate, is the cantonment, with its bazaar, native barracks, and officers' houses. The total native population, exclusive of military, is stated to have been, in 1836, 30,426. Elevation above the sea 1,600 feet. Distance from Bombay, S.E., 380 miles; Mangalore, N.E., 210; Calicut, N.E., 280; Bangalore, N., 160; Madras, N.W., 270. Lat. $15^{\circ} 8'$, long. $76^{\circ} 59'$.

BELLAT UNGADY, in the British district of South Canara, presidency of Madras, a town on the route from Mangalore to Chittel Droog, 30 miles N.E. of the former. Lat. $12^{\circ} 59'$, long. $75^{\circ} 20'$.

BELLOOD.—A town in the territory of Nagpoor, distant E. from Nagpoor 124 miles. Lat. $20^{\circ} 45'$, long. $81^{\circ} 1'$.

BELLOOR, in the territory of Mysore, a large town, with a fort strongly fortified with a mud rampart and ditch. There was formerly a similar defence round the town, but it is at present ruinous. Distant from Seringapatam, N., 28 miles; from Bangalore, W., 58. Lat. $12^{\circ} 58'$, long. $76^{\circ} 48'$.

BELLOOR, in the territory of Mysore, a town the principal place of a subdivision of the same name. It is situate a mile from the right or west bank of the river Yagachi or Bhadrj, and on the north margin of a large tank. It has a good fort built of stone, and a large temple in repair. Distant from Seringapatam, N.W., 76 miles; Bangalore, W., 118. Lat. $13^{\circ} 9'$, long. $75^{\circ} 55'$.

BELLURUTTI.—A town in Hyderabad, or possessions of the Nizam, distant E. from Bejapoor 60 miles. Lat. $16^{\circ} 46'$, long. $76^{\circ} 42'$.

BELLUNDA, in the British district of Futtehpoor, lieutenant-gov. of the N.W. Provinces, a small town with bazaar, on the route from Allahabad to Cawnpore, and 75 miles N.W. of the former. Lat. $25^{\circ} 54'$, long. $80^{\circ} 59'$.

BELMAREA, in the British district of Rajeshaye, lieutenant-gov. of Bengal, a town on the route from Pubna to Rampore, 20 miles N.W. of the former. Lat. $24^{\circ} 11'$, long. 89° .

BELOUT, in the British district of Allighurh, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allighurh to that of Muttra, and 17 miles S.W. of the former. Lat. $27^{\circ} 40'$, long. $78^{\circ} 2'$.

BELOWREE, in the British territory of Sattara, presidency of Bombay, a town on the left bank of the Kistnah river, 58 miles S.E. of Sattara. Lat. $15^{\circ} 59'$, long. $74^{\circ} 33'$.

BELOWTEE, in the British district Shaha-bad, lieutenant-gov. of Bengal, a small town on the route from Dinapoor to Ghazee-pore, 40 miles W. of former, 52 E. of latter. The town is in lat. $25^{\circ} 33'$, long. $84^{\circ} 28'$.

BELPUR VILLAPOORAM, in the British district of South Arcot, presidency of Madras, a town on the route from Trichinopoly to Madras, 98 miles N.E. of the former. Lat. $11^{\circ} 57'$, long. $79^{\circ} 33'$.

BELUN, or **BELUND**.—A small river rising in the south-western part of Boghelkhand, about lat. $24^{\circ} 35'$, long. $81^{\circ} 55'$. It first runs about twenty-five miles eastward, then about an equal length northwards, and then turning westward falls into the Pons on the right side, in lat. $25^{\circ} 5'$, long. $81^{\circ} 50'$, after a total course of about ninety miles. It traverses the plateau lying between the Tara range and the Kutra, at an elevation of between 500 and 600 feet above the sea, and is probably in the dry season a very insignificant stream, as Jacquemont, who then crossed it, classes it among the petty brooks which flow through the country.

BELUN, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a village on the route from Chunar to the city of Mirzapoor, 10 miles W. of the former, 11 E. of the latter. It is situate on the Belwin, a small river with a bed forty yards wide, and a stream in the dry season ten yards wide and knee-deep. Lat. $25^{\circ} 7'$, long. $82^{\circ} 50'$.

BENARES, under the lieutenant-gov. of the N.W. Provinces, a British district, named from its principal place. It is bounded on the north by the British district Jounpore; on the north-east by Ghazee-pore; on the south-east by Shahabad; on the south and south-west by Mirzapoor; and on the west by Mirzapoor and Jounpore. It lies between lat. $24^{\circ} 7'$, $25^{\circ} 32'$, long. $82^{\circ} 45'$ — $83^{\circ} 38'$; is fifty-five miles in length from east to west, and thirty in breadth, and embraces an area of 991 square miles. The principal rivers which touch upon or traverse the district are the Ganges, the Karamaassa, and the Goomtee. There are several smaller streams, of which the Gurohee and the Nand are the principal. Lakes and tanks are numerous, but of small size; the principal one, which is twenty miles east of the city of Benares, not exceeding a mile in circuit. The elevation of the city of Benares above the sea is estimated by James Prinsep at 270 feet; and as the surface of the district is remarkably level, probably no part of it has a greater elevation than 300 feet. The climate, though this tract is scarcely beyond the tropics and little elevated above the sea, is in winter cool and rather arid; frosts sometimes at that season occurring in such severity as materially to injure the rubber or early crop. On the whole, however, the mean temperature is greater than might be supposed. According to James Prinsep, the mean temperature is 77° . The staple products are wheat, barley,

pulse of various kinds, millet, maize, oil-seeds, tobacco, safflower, opium, and most of the esculent vegetables of Europe. The crops, sown late in the spring, and reaped in autumn, consist of rice, various descriptions of pulse, hemp, cultivated for its intoxicating products, indigo, ginger, turmeric, and maize. One of the most important exchangeable products is furnished by the sugar-cane; this district, in the article of sugar, whether regard be had to abundance of produce or excellence of quality, surpassing nearly every other part of British India. Opium and indigo are likewise cultivated with success, and the produce in these two commodities has been considered to be of equal value with that of sugar. According to the census of 1853, the population of the district, excluding the city of Benares, cantonments, and civil station, amounts to 656,111; and if that of the city, &c., be added, the number would be increased to 851,757. The population of the different places in the district is thus represented:—Number of towns containing less than 1,000 inhabitants, 1,840; ditto more than 1,000 and less than 5,000, 104; ditto more than 5,000 and less than 10,000, one; ditto more than 10,000 and less than 50,000, one; ditto more than 50,000, one. The principal routes are: 1. From south-east to north-west, from Calcutta to the city of Benares, and thence in a westerly direction to Allahabad. 2. A continuation of the Calcutta route through the city of Benares and the Sekrol cantonment, in a north-westerly direction, to Jampur. 3. From north-east to south-west, from the cantonment of Ghazepore, by that of Sekrol, to that of Mirzapore. 4. From north-east to south-west, from the city of Benares and the Sekrol cantonment to Chunar. The district is also traversed by the East Indian Railway. The tract comprised within the present district of Benares was at a very remote period the seat of an independent Hindoo state, founded, it is said, by a Kasi rajah, represented as the sixth in descent from Bindha, about 1,200 years before the Christian era. It subsequently formed part of the dominions of the Rajpoot sovereigns of Canouj, and early fell under the Mussulman yoke, having in 1193 been taken by Mahomed, the Afghan king of Ghor. About 1529 it was wrested from the Patan sovereign of Delhi by the victorious Baber. On the dismemberment of the empire, consequent upon the repeated invasions of Ahmed Shah Durani, it formed part of the prey seized by Sufdar Jung, the nawab vazier of Oude, by whose grandson, Asaf ul-Fowlah, it was ceded to the East-India Company, under Article V. of the treaty of 1775, and has since remained an integral part of the British dominions in India. At the time of the cession, the city of Benares, with a rich and extensive tract annexed to it, was held by Cheyt Singh, the grandson and successor of Munsaram, who early in the same century had by a deep-laid course of intrigue succeeded in becoming zemindar, or feudatory

holder of extensive possessions, which were greatly increased by his son Bulwunt Singh. Cheyt Singh engaged to pay to the British government the same rent for his zemindary that he had previously paid to the Nabob vazier. When the Governor-General, Warren Hastings, became pressed for pecuniary resources to carry on the extensive warlike operations in which he was engaged, he made demands on the rajah of Benares, as Cheyt Singh was styled, for contributions exceeding the stipulated payments. After repeated attempts at evasion, the demands were met by determined resistance, and Cheyt Singh, resorting to arms, cut off two companies of sepoy in Benares, and inflicted other losses and disgrace on the British. His career of success was, however, cut short by the arrival of reinforcements, the ultimate results being his overthrow, deprivation, and flight to Gwalior, where he died in 1810.

BENARES, the principal place of the British district of the same name, is situate on the left bank of the Ganges. "The depth of water in front of the town in the dry season is more than fifty feet, and the freshes of September add forty-two to this level. The breadth of the Ganges is 600 yards at low water, and a little more than half a mile in the rains. This splendid stream forms a bay indenting the front of the town, so as to display its picturesque beauties to great advantage." The measured length of the city "along the banks of the river by survey, is barely three miles, and the average depth does not exceed one mile." Access is obtained to the water by ghats or flights of broad steps, elaborately and solidly constructed of the fine freestone of Chunar and its vicinity, often in a highly ornamented style. "Upon the ghats are passed the busiest and happiest hours of every Hindoo's day; bathing, dressing, praying, preaching, lounging, gossiping, or sleeping, there will be found. Escaping from the dirty, unwholesome, and confined streets, it is a luxury for him to sit upon the open steps and taste the fresh air of the river; so that on the ghats are concentrated the pastimes of the idler, the duties of the devout, and much of the necessary intercourse of business." They extend nearly along the whole length of the river's bank in the city, though in some places interrupted by temples reaching down to the water's edge. Around these are posted hideous fakirs, and other scetics of revolting appearance, "offering every conceivable deformity which chalk, cow dung, disease, matted locks, distorted limbs, and disgusting and hideous attitudes of penance can show." Of these ghats the Ugneshwur, Ghoosla, Madhoray, Panchgunga, Munikurnika, Brukma, Rajarajeswuri, Shridar, Munshi, Dusaasumedh, and the Rajghat, are selected by Prinsep as peculiarly worthy of delineation by his pencil. A fine view of the Dusaasumedh ghat is also given by Daniell. Some narrow ghats are

appropriated to the burning of dead bodies, the ashes and unconsumed bones of which are thrown into the river; and here suttee was performed until the practice was forbidden by the British government. At the time of Heber's visit, about thirty years ago, self-immolation by drowning in the Ganges was frequent. The city rises from the line of ghats so as to form a vast amphitheatre, presenting a picturesque and noble view to spectators on the opposite side of the river. Above the numerous and crowded houses, in varied and striking styles of architecture, are seen the pinnacles of Hindoo pagodas, and above all the minarets and domes of the great mosque of Aurungzebe, the most remarkable structure in Benares, though neither of imposing dimensions or striking architectural beauty. The mosque rises from the platform over the Madhoray ghat, and was erected on the site of the temple of Bindh Madhu, or Vishnu, described by Tavernier as in his time covering a great extent of ground. This Aurungzebe demolished, and to signalize the triumph of Islam over Brahminism, employed the materials in the building of the mosque. "The minars have been deservedly admired for their simplicity and boldness of execution. They are only eight and a quarter feet in diameter at the base, and the breadth decreases to seven and a half feet, while they have an altitude of 147 feet two inches from the suhun or terraced floor of the Musjid, to the kulsar or pinnacle. The terrace is elevated about eighty feet above the river at low-water level." Though so slender, they have staircases inside; but the ascent is not devoid of hazard, as they each lean fifteen inches from the perpendicular, and one of them was in a state of very hazardous decay, until repaired some years ago under the direction of James Prinsep. There are few mosques in the centre of the city, or along the river's bank; but they are numerous in the north-eastern quarter. They are generally elegant little edifices marked by small slender minarets, and usually stand in gardens planted with tamarinds; but they seem little frequented. Most of them were, like the great mosque, constructed on the sites of demolished Hindoo fanes, and with the materials of those structures. The total number of mosques was ascertained in 1829 to be 333. The number of Sivalas, or Hindoo temples, was 1,000; which can scarcely be regarded as large, since religion "is the staple article of commerce, through which the holy city flourishes and is enriched." Benares, long regarded as the centre of Hindoo religion and science, has of late considerably declined in this respect. Prinsep says, "The schools and hallowed retirements of the Benares pundits are sought after as the fountain-heads of Brahminical learning, and are consequently filled with pupils; but from a prevailing idea that the receiving of remuneration would destroy the merit of teaching the Vedas, the pundits in most cases accept of nothing from their scholars, trusting to dona-

tions and stipends from rajahs and men of rank. In the present day encouragement from such quarters is becoming more and more precarious, and Sanscrit learning is consequently on the decline; while the great success of the new colleges in Calcutta, in which the study of European literature is united with that of India, will tend further to eclipse the *alma mater* of rigid Hindooism." A Sanscrit college was instituted by the British government at Benares in 1792, in which an English department was at a later period established. The subjects in which competitors for scholarships in the English department were required to qualify themselves in 1854, comprised English poetry and history, political economy, and mathematics. The languages taught are Persian, Hindoe, Sanscrit, and English. A new government college has just been completed in this city, at a cost of 13,200*l*. The streets of Benares, as Prinsep observes, "are confined, crooked, and so narrow that even narrow seems a term too wide." They might more properly be styled alleys; so confined are they as not to admit a wheeled carriage of any description; and they indeed scarcely afford room for the passage of any sort of beasts, whether under the saddle or bearing a burthen. The thoroughfare is sunk considerably below the basement story of the houses, which have generally an arched passage in front, behind which is a shop and a store-room. The houses are, with little exception, built of stone, and they are generally lofty; some are two stories high only, but most of them are of three, and not a few have four, five, and even six; the upper in many instances projecting beyond the lower. It is not uncommon for a house on one side of the street to be in its upper part connected with another at the opposite side. The windows are small, to exclude strong light, heat, and the inquisitive glances of strangers, of which the inmates are very impatient. Most of the fronts are stained deep red, or else are fantastically painted in gaudy colours, to represent "flowerpots, men, women, bulls, elephants, gods and goddesses, in all their many-headed, many-handed, and many-weaponed varieties." During the fine season the hours of sleep among the higher classes are passed "in light screened inclosures of carved stone, elevated on the most prominent points of the roof, open to the sky above, and to the gentle night-breeze on the four sides." The same writer adds, "The universal practice of sleeping on the roofs of houses in the hot season gives the town somewhat of a *diabole boiteux* appearance, when viewed from the summit of the minarets at daybreak." The gaudy festivals here celebrated give incredible delight to this childish people. Of these the principal is the Ram Lila, representing the triumph of the incarnate deity Ram over the gigantic demon Ravan, who is personated by a huge ogre-like figure, filled with explosive combustibles, and blown up at the conclusion of the performance. The concluding ceremony,

BEN.

styled the Bhurut Melao, is still more splendid, forming a picture to which it has been said no description can do justice. Wonderfully splendid also is the Duwallie, celebrated with a universal illumination. "The city appears like the creation of the fire-king; the view from the water affording the most superb and romantic spectacle imaginable. The outlines of a whole city are marked in streams of fire, and the coruscations of light shoot up into the dark blue sky above, and tremble in long undulations on the rippling waves below." The mercantile year finishes on this festival with much propriety, if it be devoted to the goddess of wealth; those engaged in commerce then carefully cleanse and decorate the exteriors of their houses; and the credit of a merchant who should neglect to do so would be seriously shaken. The population of the city and suburbs of Benares, but exclusive of the cantonment, amounted in 1853 to 185,984. The number of houses in Benares proper was 30,205; of which 12,000 were brick or stone: the number in Secrole was 3,000. In 1850 the city was visited by an awful calamity, attended with great destruction of life and property. A fleet of boats, laden with 3,000 barrels of gunpowder, and manned by 500 sailors, in proceeding from Calcutta to Allahabad, had been detained at Benares, and on the 1st May were lying off the Raj ghat, within a few yards of the river-bank, when an explosion took place, causing death or injury to 348 individuals, and the damage of property to the extent of 17,000*l*. Immediately preceding the accident, the powder-boats had been approached by a pinnacle, a spark from which, it was conjectured, had caused the explosion. In the suburbs of this city a tragical occurrence took place in 1799, when the British agent Mr. Cherry, and other Englishmen, were murdered by Vizier Ali, the deposed ruler of Oude, who had been permitted to reside at Benares. Benares, though its pretensions to architectural distinction are recent, is probably a town of great antiquity. It was originally known by the name of Kasi and Kasika, and, according to Hamilton, by that of Ksethra, said to be derived from Kshetra Briddha, the first rajah of Kasi of whom there is any certain notice, and who is conjectured to have reigned about sixteen centuries before the Christian era. The learned writer says, "Kasi continued to have kings of its own until the Mohammedan invasion; and considerable ruins of these princes' palaces still remain." It was first subjected to the Mohammedan sway, probably about 1193, by Mohammad Sultan of Ghor, in Afghanistan. It was subjected by Baber, taken from him by his Patan opponents in 1529, and immediately regained. Falling a prey to the Nawab vizier of Oude on the dissolution of the empire of Delhi, about 1760, it was by treaty of 1775 ceded by him to the East-India Company. The Calcutta Railway passes close to the city. Elevation above the sea 270 feet. Distant

N.W. from Calcutta 421 miles, by the Ganges 669, or 846 if the Soonderbund passage be taken; E. of Allahabad by land 74; S.E. from Delhi 466. Lat. 25° 17', long. 83° 4'.

BENCOOLEN, formerly the chief establishment possessed by the East-India Company in the island of Sumatra, on the south-western coast, but ceded to the king of the Netherlands in 1825, with all the other British possessions on the island, in exchange for the Dutch settlements on the continent of India. S. lat. 3° 47', long. 102° 19'.

BENDA, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from Allahabad to Calpee, and 24 miles E. of the latter. Lat. 26° 9', long. 80° 10'.

BENEER.—See **BOONERE**.

BENEEGUNJ.—A town in the territory of Oude, distant N.E. from Lucknow 41 miles. Lat. 27° 18', long. 80° 31'.

BENGAL.—The chief presidency of British India, containing Calcutta, the seat of the supreme government, and surpassing each of the other two presidencies in area, population, and resources. Exclusive of the native states which are retained under the control and political supremacy of the government of India, the territories embraced within the limits of this presidency have been distributed into several subdivisions, subject to the authority of separate functionaries. Among these may be mentioned the two lieutenant-governors, one of the North-West and the other of the Lower Provinces of Bengal; the commissioners of Pegu, Nagpore, the Punjab, the Tenasserim provinces, &c. In the present article it is proposed to treat only of the Lower Provinces, or that portion which has been committed to the charge of the lieutenant-governor of Bengal. The remaining subdivisions will be found noticed in their proper places in the alphabetical arrangement. The tract included within the lieutenant-governorship of Bengal extends from the northern frontier of the province of Pegu, in lat. 19° 15', to the northern frontier of Assam, in lat. 28° 16'; and west to east, from the south-eastern boundary of the district of Mirzapoor, to the western frontier of Burmah. It is bounded on the north by Nepaul, Sikkim, and Bhotan; on the north-east by Thibet; on the east by Burmah; on the south by the Bay of Bengal and Pegu; on the south-west by the petty independent states on that frontier; and on the west by the territory under the lieutenant-governorship of the North-West Provinces. The area is 195,935 square miles. The seacoast of the presidency comprises a considerable portion of the north-western shore of the Bay of Bengal, its innermost or northern recess, and a great extent of its eastern coast. Commencing at Priaghi, on the coast of Orissa, in lat. 19° 27', long. 85° 15', it proceeds thence in a direction north-east, across the openings

of the river Mahanuddy, for 180 miles, to False Point, where it is indented westward, forming a bay, terminated to the north, at a distance of thirty-five miles, at Point Palmyras. No ships of burthen can enter any of the mouths of that great river, though coasting and river craft of considerable tonnage may navigate it. From Point Palmyras the coast makes a more considerable indentation to the westward, forming the bay called Balasore Roads, the shore of which extends north-east to the mouth of the Hoogly, a distance of 130 miles. This bay, or great roadstead, is of high importance, as having excellent anchorage for shipping frequenting the Hoogly; but the coast is low, and large shipping can seldom approach it nearer than three or four miles. From the mouth of the Hoogly the coast turns nearly eastward for 180 miles along the shore of the Soonderbunds, being indented with numerous inlets, the estuaries of various offsets from the Ganges insulating many low tracts of land. Few of those inlets are frequented by shipping, though the Hooringotta estuary is large enough to admit vessels of four or five hundred tons. Off the mouth of the Hoogly, and about twenty-five miles from land, is a depression in the bottom of the sea, where are no soundings. This remarkable depression is about fifteen miles across, and is known by the name of the "Swatch of no Ground." From Itabnabad island the coast has a direction north 50 miles, and subsequently east for 65, to Chittagong, where it takes a direction south. This conformation of the coast makes a bay, which on its northern side receives the great estuaries of the main streams of the Ganges and Brahmapootra, which appear, however, to have been little explored. In its northern part this gulf is "interspersed with islands, some of which rival in size and fertility our Isle of Wight. The water at ordinary times is hardly brackish at the extremities of these islands, and in the rainy season the sea, or at least the surface of it, is perfectly fresh to the distance of many leagues out." From Chittagong the coast takes a south-east direction for 300 miles to lat. $19^{\circ} 15'$, where the coast of the recently constituted British province of Pegu commences.

With the exception of a part of Orissa and Chittagong, and other districts extending along the north-eastern and eastern coasts of the Bay of Bengal, the territories of this lieutenant-governorship are situate in the basins of the rivers Ganges and Brahmapootra, and comprise the entire of the great delta formed by the joint waters of those two rivers. From the Himalayas, stretching along its northern frontier, the general slope of the surface is southward; from the mountains of Assam, Sylhet, and Tipperah it is westward and south-westward; and from the highlands connecting the Vindhya range with the Western Ghauts, the slope is eastward and south-eastward. No tract of the same extent in the world is traversed by so great a number of rivers and water-

courses. The Ganges, flowing from the British district of Ghazeepeer, in the lieutenant-governorship of the North-West Provinces, touches on the western boundary of the Lower Provinces of Bengal at Chowssa, in lat. $25^{\circ} 27'$, long. $83^{\circ} 58'$, and for seventy miles holds a circuitous course, but generally in a direction north-east, to the confluence of the Gogra, flowing from the north-west, and joining it on the left side, with a volume of water not inferior to that of the Ganges itself. At that confluence the Ganges passes into the Bengal territory, and turning to the south-east, receives, twenty miles lower down, on the right side, the Sone, another very large river flowing from the south-west. From this confluence it assumes a direction nearly east, and at a distance of twenty miles, it on the left side, at Hajeepeer, receives the Gunduck, flowing from the north. From that confluence its course is sinuous, but generally easterly, for 160 miles, to the confluence of the Coosy, flowing from the north, which it receives on the left side, at Kuttree. This accession gives the Ganges its greatest volume of water, as at a short distance lower down it begins to send off numerous branches to the left, which by meandering courses traverse the country in various directions, and ultimately rejoin the main stream, or are lost by evaporation, or absorbed in the purposes of irrigation. Below the last named confluence, and in lat. $24^{\circ} 44'$, long. $87^{\circ} 59'$, it throws off on the right side the Bhagutter, and at this point commences the great delta of the joint streams of the Ganges and Brahmapootra, the whole country towards the sea being an extraordinary reticulation of watercourses. Below the divergence of the Bhagutter, the main stream of the Ganges, called in this part of its course the Pooda or Pudda, continues its course south-easterly, and seventy miles lower down throws off on the same side the Jellinghee, which subsequently uniting with the Bhagutter, forms the river Hoogly, which flowing southward by Calcutta, falls into the sea at Sagar Island, and is almost the only estuary, with the exception of that of the Hooringotta, frequented by large ships. The Pooda continuing its course in a direction south-east for 100 miles to Juileergunje, there unites with the Konaie, a great branch of the Brahmapootra; and the combined stream flowing in a southerly direction for 150 miles, falls into the Bay of Bengal in lat. $22^{\circ} 15'$, long. $90^{\circ} 43'$. The Brahmapootra touches the Bengal territories near Soom, at the north-east extremity of the valley of Assam, about lat. $27^{\circ} 51'$, long. $96^{\circ} 48'$. In lat. $27^{\circ} 48'$, long. $95^{\circ} 27'$, it is joined by the Dihong, the name given at this part of its course to the Sanpo, a river having its source north of the Himalayas. From this confluence the course of the river is very sinuous as far as Mehindergunje, where it divaricates into two great branches, that to the right, or south, and of the greater size, being called the Konaie, and that to the left, or east, retaining the name Brahmapootra.

The Konaie holds a course nearly due south, to its communication, by means of an offset, with the Ganges at Juffergunje, and subsequently south-east, under the name of the Dulasseree, to its reunion with the parent stream. The Brahmapootra takes a wide circuit to the south-east, as far as Bairubbazar, in lat. 24°, long. 90° 59', where it turns to the south-west, being in this part of its course denominated the Megna, and thus flows to its junction, as above stated, with the Dulasseree, and thence onward to its confluence with the Kirtynassa, a considerable offset of the Ganges. At this point it again turns south-east, and divides into three branches; the first, called the Hattia, falls into the Bay of Bengal in lat. 22° 25', long. 91° 22'; the second, known as the Shabazpore, enters the bay in lat. 22° 20', long. 91° 8'; and the third forms a junction with the Ganges. Of the other rivers which drain the waters of the southern face of the Himalaya, and of northern Bengal, into the Ganges and Brahmapootra, the principal are, the Teesta, falling into the Brahmapootra near Mehindergunje; the Ataree, falling into the Konaie four or five miles above Juffergunje. Those of less dimensions are very numerous. The hill country to the right, or south-west side of the Ganges, supplies it with few perennial tributaries; that of most considerable magnitude, besides the Sone, being the Dammoodah, which, rising in the highlands of Ramgurh, takes a course south-eastward, and falls into the Hoogly a few miles above Fort Mornington, in lat. 22° 13', long. 88° 7'. The Coossy, rising in Ramgurh, takes a south-easterly course, in some measure parallel to that of the Dammoodah, and falls into the Hoogly near Basutea, in lat. 22°, long. 88° 4'. The Soobunreeka rises in Chota Nagpoor, and taking a course south-east, falls into the Bay of Bengal a few miles below the town of Peeply, and in lat. 21° 35', long. 87° 23'. The Byeturnee, under the names of the Sunk and Coel rivers, rises in the same district, and passing through the native states on the south-west frontier, enters the district of Cuttack, and flows south-east to Point Palmyras, where, under the name of the Dumrah, it falls into the Bay of Bengal, in lat. 20° 50', long. 87° 3'. The Braminy rises in the district of Palamow, and taking a direction south-east, and, like the Byeturnee, flowing for the greater part of its course through the native states on the south-west frontier, it subsequently enters the district of Cuttack, and falls into the Bay of Bengal at Point Palmyras. The Mahanuddy enters the same district from the Cuttack Mehal states, in lat. 20° 24', long. 85° 38', and holds an easterly course to the town of Cuttack, where it parts into several branches, the principal of which falls into the Bay of Bengal near False Point, in lat. 20° 20', long. 86° 50'. The inland navigation, at all times considerable, is vastly increased during the periodical rains, when "all the lower parts of Bengal contiguous to the Ganges and Brahmapootra

are overflowed, and form an inundation of more than a hundred miles in width, nothing appearing but villages and trees, except very rarely the top of an elevated spot, the artificial mound of some deserted village, appearing like an island." A vast increase of the facilities for navigation at the same season takes place throughout the streams traversing any parts of the level alluvial tracts of the presidency. Rennell computed the number of persons employed in this inland navigation, when he wrote, about seventy years ago, at 30,000; and it is no improbable conjecture that, in consequence of the increase of traffic resulting from the greater security of property conveyed by water, and the more extensive use of that mode of conveyance for military and other purposes, the number is now quadrupled. Jhils, or extensive shallow lakes, are very numerous, but their limits are generally ill-defined; in the dry season their extent is greatly diminished, and several are totally dried up. The most extensive and remarkable are the Monda jhil, the Dulabari jhil, and the Chullum jhil, in the British district of Rajeshahi; the Aka jhil, in the district Jessore; and the Great jhil, in the district Backergunge. "The boats used in this extensive commerce are of various forms and construction, influenced by local circumstances. The patella, or baggage-boat of Hindoostan, is of saul-wood, cliñker-built, and flat-bottomed, with rather slanting outsides, and not so manageable as a punt or London barge. Its great breadth gives it a very light draught of water, and renders it fittest for the cotton and other up-country products, which require little better than a dry and secure raft to float them down the stream. The oolak, or common baggage-boat of the Hoogly and central Bengal, has a sharp bow and smooth rounded side: this boat is the best for tracking and sailing before the wind, and is tolerably manageable with the oar in smooth water. The Dacca pulwar is more weatherly, although, like the rest, without keel, and the fastest and most handy boat in use for general traffic. The salt boats of Tumlook are another distinct class. The light boats which carry betel-leaf, the wood-boats of the Sunderbuns, of various forms and dimensions, from the burthen of one hundred to that of six thousand maunds; the Calcutta bhur, or cargo-boat of the port; the Chittagong boats; the light Mug boats, with floors of a single hollowed piece of timber, and raised sides, neatly attached by sewing, with strips of bamboo over the seams; and an almost endless variety of others might be enumerated, besides the small dinghee and the panswee, the common canoe, and the ketch-rigged pinnace, the budgerow, and the bauleah; the three last employed by Europeans for their personal conveyance. A native traveller, according to his degree and substance, engages a dinghee or a panswee, a pulwar or an oolak; the man of wealth puts his baggage and attendants in these, and provides a budgerow or a pinnace

for his personal accommodation. Officers of high standing in the civil or military service, travelling with a large retinue of servants and a quantity of baggage, seldom have less than five or six boats (one of them a cooking-boat, another fitted with an oven for baking bread), and sometimes as many as fifteen when they carry their horses and equipages, and the materials of housekeeping for their comfortable establishment on arrival."

No part of the great culminating ridge of the Himalaya is situate within the limits of the territory subject to the lieut. gov. of Bengal, though in the extreme north-eastern corner of Assam, a spur from it, closing in the northern branch of the Brahmapootra for a short distance, forms the northern boundary of the British territory. The greatest elevation probably within the presidency is Dupha Boom, separated from the spur just mentioned by the valley of the Brahmapootra, to the south of which it rises. Its summit is 14,540 feet above the level of the sea. Some of the summits of the mountainous tract on the east of Bengal are stated to have an elevation of 5,000 feet. The geological formation there appears to be granite overlaid with carboniferous sandstone, abounding with coal and iron-ore, intermixed with limestone of excellent quality. In the great mountain-tract in the west (where in some localities it attains an elevation of about 3,000 feet above the sea), granite is found to be overlaid with carboniferous sandstone, containing iron and coal in great abundance, the localities of this last mineral being found at wide intervals through a tract probably of no less extent than the whole of England, extending from the vicinity of Rajmahal on the north-east, about lat. 25° 5', long. 87° 45', to the banks of the river Son on the north-west, about lat. 24° 30', long. 83° 20', and southward as far as Talcher, in Orissa, lat. 21°, long. 85° 10'; and throughout the tract the distribution of iron appears to be equally extensive. Gold is obtained in the form of dust at Sumbulpore, in Orissa, which locality moreover contains diamonds. Gold is also met with in considerable quantity in the sand of streams in Assam; but altogether lower Bengal does not appear to be very rich in the precious metals. Rennell, describing the alluvial nature of the soil of the delta, observes, "There is no appearance of virgin earth between the Tiperah hills on the east and the province of Burdwan on the west, nor on the north till we arrive at Dacca and Baulaah. In all the sections of the numerous creeks and rivers in the delta nothing appears but sand and black mould, in regular strata, till we arrive at the clay that forms the lower part of their beds. There is not any substance so coarse as gravel, either in the delta, or nearer the sea than 400 miles, where a rocky point, a part of the base of the neighbouring hills, projects into the river." The enormous depth of alluvial deposit at Calcutta was ascertained in the unsuccessful attempt to form,

by boring, an Artesian well, between the years 1835 and 1840, when the borer, after penetrating through alternating strata of peat, sand, and clay, reached a depth of from 400 to 481 feet, when "fine sand, like that of the seashore, intermixed largely with shingle, composed of fragments of primary rocks, quartz, felspar, mica, slate, limestone, prevailed; and in this stratum the bore has been terminated."

The climate is characterized by great humidity, in consequence of the moisture swept over it from the ocean and the Bay of Bengal, and precipitated in the form of the periodical rains. These prevail in summer and autumn, and in some seasons are very heavy, the annual rain-fall at Calcutta ranging from fifty to eighty-five inches. In the office of the surveyor-general at Calcutta, a register of meteorological facts is carefully kept, and the following is an abstract of the mean annual summaries for the ten years commencing 1841 and ending 1850:—

Annual Mean Temperature—Fahrenheit.

Years.	At Sunrise.	At 2 40 P.M.	At Sunset.
	Degrees.	Degrees.	Degrees.
1841	72.7	89.0	82.4
1842	73.3	88.0	82.1
1843	73.3	87.6	82.5
1844	72.7	87.6	82.3
1845	73.7	86.9	82.3
1846	74.3	86.3	81.9
1847	73.2	86.1	81.1
1848	74.1	87.4	82.5
1849	73.6	86.7	81.8
1850	73.1	86.1	81.4
Mean	73.4	87.2	82.0

The stormy weather of the south-west monsoon, a strong aerial current, sets in early in June, and continues with little intermission until the middle of September, bringing with it the periodical rains of that time of the year. The north-east monsoon follows, setting in either in October or early in November; and in the course of December is followed by more settled weather, which continues through January, and brings the cold marking that season. During February, March, and April, the prevailing wind is from the south. In May the air is for the most part still, there being little steady wind, though at the commencement there are occasionally violent unsteady gusts.

The zoology of Bengal is extensive, varied, and interesting: wild elephants are numerous in the forest zone along the southern base of the Sub-Himalaya, and in the extensive uncultivated wilds of Assam and Chittagong. The rhinoceros frequents the same locality, and both are found in small numbers in the British district of Bhaugulpore, on the right or south-west side of the Ganges. The rhinoceros is also found in the southern part of Bengal, toward the Sunderbunda. Bears are numerous and very dangerous; both the black bear (*Ursus indicus*) and the species analogous to

the ursine sloth of tropical America. The tiger infests the dense jungle, and checks the increase of herbivorous quadrupeds, as those mark by their surprising abundance the extraordinary luxuriance of the vegetation. The leopard and lynx are also of common occurrence; as is the wild buffalo in close marshy coverts. The gaur, a huge bovine quadruped, is met with in the range of mountains that form the eastern boundary of the provinces of Arracan, Chittagong, Tipperah, and Sylhet. The stag, elk, antelope, and deer of various kinds, are abundant; as are also wild swine. Monkeys and lemurs, and some other quadrumanous creatures, harbour in most of the woods; and the former, favoured by popular superstition, infest many of the habitations and some of the towns. The canine genera are numerous, and comprise the hyena, wolf, jackal, fox, and wild dog of two varieties.

The Sunderbunds produce great quantities of wood, but seldom of very large growth or first-rate quality; but the sal (*Shorea robusta*) and some other trees attain great size, and afford excellent timber in the belt of the forest which extends along the base of the Sub-Himalaya. An abundance of fine timber is produced in the western highlands and in Orissa; but in most places the distance from navigable streams diminishes its value.

The principal alimentary crop is rice, though wheat and other cerealia are grown largely in the more elevated and northern parts. In the fertile and irrigated tracts, two crops of rice are usually produced from the same ground in one year. The other grains most commonly cultivated are bajra (*Holcus spicatus*) and jowar (*Holcus Sorghum*). Oil-seeds are largely cultivated; the consumption of oil among the natives being very great. The principal crops of this kind are mustard, til or sesame, and ricinus or castor-oil plant. Ginger, turmeric, capscicum, and chillies, are largely grown for condiments. The esculent vegetables comprise most of those usual in Europe. Of fruits the principal are the mango, jak (*Artocarpus integrifolia*), orange, lime, shaddock, citron, cocoanut, tamarind, plantain, betelnut, guava, and mulberry, which is cultivated more for the sake of its leaves, used in feeding silkworms, than on account of its fruit.

The principal commercial crops are cotton, indigo, coffee, safflower, hemp, flax, tobacco, sugar, rice, and the opium poppy. In Assam the genuine tea-plant abounds, and some of its produce of fine quality has found a ready market in London; but the dense population, indefatigable industry, and long experience which the Chinese tea-districts possess, must for a long time insure them a superiority in supplying this important article, unless political events should arrest their prosperity. The manufacturing industry of the country has everywhere waned before the influence of British competition. The extensive manufactures of muslins of Dacca, formerly so much prized, have nearly ceased, and that of the

cotton goods of Balasore has had a similar fate. The principal manufactures are now conducted in Calcutta and its vicinity, and consist of coarse cottons, sailcloth, rope-making, iron-work, sugar-refining, tanning, and distillation of rum. The Cossipore iron-foundry, on the left bank of the river Hoogly, three miles north of Calcutta, when in full work, annually turns out 200 pieces of ordinance. Nearly all the export and import trade of the presidency is conducted through the port of Calcutta. The principal articles of export are cotton, indigo, sugar, rum, rice, saltpetre, lac, silk, opium, and limited quantities of coffee and tobacco; those of import are British cotton goods, salt, iron, copper, and hardware. The value of the foreign export trade in 1834-35 amounted to 4,158,598*l.*, and in 1853-54 to 10,571,216*l.* The value of the foreign import trade at the same periods was 2,645,355*l.* and 7,759,352*l.* Six principal sources supply the government revenue, amounting to ten millions sterling per annum. These are the land, opium, salt, stamps, excise, and customs. A list of the government colleges and schools, and an account of the number and religion of the pupils receiving instruction therein at the date of the latest returns, are contained in the following statement:—

Bengali, Hindostanee or Oordoo, Ooriya, Assamese, and the Burmese, are the languages spoken.

On the early history of Bengal little is known, and not only is fact mixed with fable, but, as is the case with the early history of every part of India, the fabulous portion is by far the larger. In passing to the period when India

began to attract the attention of Mahomedan invaders, we come to firmer ground. At the death of Shahab-oo-Deen, which took place in 1206, Bengal, if not entirely subdued, was in the process of absorption into the dominions of that conqueror. The commander, however, by whom it was reduced, took the not unusual course of disclaiming the authority under which he had served. He was, however, compelled to succumb, and deprived of the province of Behar, but was allowed to retain that of Bengal in feudal subordination. Making, however, an attempt to recover what he had lost, he perished in battle in 1225. A subsequent governor, named Togral, commenced resistance by refusing to share with the throne of Delhi booty which he had acquired in a successful expedition, and pursued his contumacious course by assuming in 1279 the title of king. Having defeated two armies sent against him in succession, he was compelled to fly before a third, led by the emperor in person, and being overtaken, paid the price of his ambitious daring with his life. A son of the emperor appears to have succeeded to the government, and to have held it for a very long series of years. In 1340, during the reign of Mohammed Toghluik, the province again revolted from the empire, and thenceforward almost every ruler claimed independence, but rarely enjoyed it for any lengthened period, the kings of Delhi from time to time asserting their supremacy by the despatch of an army to overrun the country; the only measure by which they could enforce recognition of their superiority. In 1356, Feroze the Third of Delhi received an embassy from Bengal, an act which would seem an acknowledgment of the independence of its monarch. War was renewed, however, with his successor, and the Delhi sovereign marched an army to the extreme south-eastern point of Bengal. Amicable relations, or at least relations apparently amicable, after a time were again established, by the revival of the treaty concluded with the predecessor of the then reigning monarch of Bengal. In 1528 we find the king of Bengal engaged in hostilities with Baber. Shortly after Bengal was conquered, and its king expelled by the bold and adventurous Shir Khan, who assumed the title of king, and being opposed by Humayon, son of Baber, compelled that sovereign to retire; a movement which was attended by the loss of the greater part of that prince's army. The subsequent fortune of Shir Khan, or Shir Shah, brought Bengal again under the rule of the throne of Delhi. Under the emperor Moham-med Shah Sur Adili, who usurped the throne in 1553, the governor of Bengal, Mohammed Sur, like former governors, revolted. He was successfully opposed by Hemu, the able minister to whom Adili had intrusted his affairs, and perished in the conflict which terminated his rule. Another pretender, however, appeared, and in contest with him the emperor Adili lost his life. A few years later the good fortune of Akbar reunited the province to the

empire. A mutiny, caused by the introduction of financial reforms, followed, and was not suppressed without difficulty. An insurrection of the Affghan settlers, who were very numerous, and were naturally attached to the Affghan chiefs who had in succession held sway in Bengal, succeeded the mutiny; and it was not till after fifteen years of disturbances that the royal authority was finally established. In 1624, Shah Jehan, flying from his father Jehangir, against whom he had rebelled, possessed himself temporarily of Bengal, but was speedily driven out. The eighteenth century was marked in India by the breaking up of the empire of Delhi; the progress of the Mah-rattas, who had risen into notice in the preceding century; the wars between the French and English, and the final triumph of the latter. Among the factories established by the English East-India Company for carrying on their trade, was one at Hooghly, and another at Cosimbazar. That of Hooghly in the year 1700 was transferred to Calcutta, then a new British settlement, and destined shortly to become the capital of British India. In 1756, the nabob of Bengal having taken possession of the factory at Cosimbazar, proceeded to attack Calcutta, which surrendered after a brief siege. The Company's servants became prisoners, and were treated with barbarous cruelty. The details are too well known to require notice. Calcutta was retaken by Clive, and peace restored; but subsequent disputes led to a renewal of hostilities, which terminated in the battle of Plassey. From this time the fortunes of the British rose in the ascendancy, and in the year 1765 the emperor of Delhi conferred upon the East-India Company the provinces of Bengal, Behar, and Orissa. Thus did this part of India become British, and in this manner originated that mighty dominion which in less than ninety years has been matured into the British empire in the East.

BENGSOOLLEE.—A town in the native state of Bhotan, distant N.W. from Goalpara 36 miles. Lat. $26^{\circ} 36'$, long. $90^{\circ} 23'$.

BENKAR, or TASS-GONG.—A town in the native state of Bhotan, distant N.E. from Goalpara 95 miles. Lat. $27^{\circ} 19'$, long. $91^{\circ} 29'$.

BENKYPPOOR.—A town in the territory of Mysore, distant N.W. from Seringapatam 120 miles. Lat. $13^{\circ} 50'$, long. $75^{\circ} 46'$.

BENNOOR.—A town in Hyderabad, or possessions of the Nizam, distant E. from Bejapoor 60 miles. Lat. $16^{\circ} 56'$, long. $76^{\circ} 41'$.

BENTINCK ISLAND.—One of the group forming the Mergui archipelago. It is about twenty miles in length from north to south, and six in breadth: its centre is in lat. $11^{\circ} 45'$, long. $98^{\circ} 9'$.

BEOUR.—See BRAUR.

BERAH, or BURAH, in the British district Budaon, lieut.-gov. of the N.W. Pro-

vinces, a village on the route from the city of Agra to Bareilly, and 39 miles S.W. of the latter. Lat. $28^{\circ} 5'$, long. $79^{\circ} 6'$.

BERAHERAPOOR, in the British district of Mynpoorie, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Mynpoorie, and 33 miles N.W. of the latter. Lat. $27^{\circ} 35'$, long. $78^{\circ} 42'$.

BERAI GUNGA, in the native state of Gurwhal, a feeder of the Jumna, rises on the south-western foot of the great snowy peak of Banderpuch, in lat. $30^{\circ} 59'$, long. $78^{\circ} 35'$, and at the elevation of 12,489 feet above the sea. It holds a circuitous course first in a southerly direction, for about four miles, and then westerly for nine more, and unites with the Jumna on its left side, in lat. $30^{\circ} 55'$, long. $78^{\circ} 27'$.

BERANAH, in the Baree Doab division of the Punjab, a town situated on the route from Lahore to Ludhiana, 22 miles S.E. of the town of Lahore. Lat. $31^{\circ} 29'$, long. $74^{\circ} 30'$.

BERAR.—See NAGPORE.

BERAR.—A valley of Hyderabad, or the dominions of the Nizam, bounded on the north by the Santpoora range of mountains, dividing it from a detached portion of Scindia's territory and the Nerbudda provinces; on the south by the Maiker Bassim and Mahur districts of the Nizam's country; on the east by the territory of the rajah of Nagpore; and on the west by Candeish. It lies between lat. $20^{\circ} 15'$ and $21^{\circ} 40'$, long. 76° and $78^{\circ} 2'$, with an area estimated at from 8,500 to 9,000 square miles. The Poornah river, a branch of the Taptee, running from east to west, affords with its numerous tributary streamlets an ample supply of water to the valley, the soil of which is peculiarly suitable to the cultivation of cotton. Ellichpore is the chief town, but as a place of trade, Oomrawuttee, the depôt for the raw cotton of the district, is the most flourishing town in this part of India. The valley of Berar is included in the territory recently assigned by the Nizam to the British for the maintenance of the military force termed the "Nizam's Contingent." Under the new administration, the district lands will be subjected to a moderate assessment, and the trade at once relieved from the oppressive system of transit-duties in force throughout the remainder of Hyderabad. If to these encouragements be added facility of transport to the western coast, —and this boon also is about to be conceded by the construction of a railway from the cotton districts to the port of Bombay,—no further interference by the government in the agriculture or trade of the country can be needed, and sanguine expectations may be entertained that the produce of the great cotton-field of India will at length be enabled to compete with America for the supply of cotton to the British market.

BERARU, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from Bareilly to Petragurh, and 49 miles N.E. of the former. Supplies may be had from the neighbouring country, and water is abundant, though unwholesome in the hot season. Lat. $28^{\circ} 50'$, long. $79^{\circ} 57'$.

BEREE, in the British district of Rameshwar, lieut.-gov. of the N.W. Provinces, a town having a population of 9,397, on the route from Hansi to Goorgaon, and 50 miles S.E. of the former. It was comprehended in the grant made by the Mahrattas to the adventurer George Thomas, whose occupation of it was resisted by a strong garrison, principally of Rajpoots and Jats. It was, however, after an obstinate resistance, stormed, and the defenders put to the sword, except a few who escaped into the neighbouring jungles. Thomas states that the petty district of Beree, before it was desolated by the Mahrattas, had twenty-four villages and a revenue of 3,000*l.*; at the time of its acquisition by him, sixteen villages, and a revenue of 1,000*l.* Water and supplies may be obtained, and there is good encamping-ground. The road in this part of the route is good. Lat. $28^{\circ} 40'$, long. $76^{\circ} 40'$.

BERGANWAN, in the British district of Hummerpore, lieut.-gov. of the N.W. Provinces, a small town on the route from Calpee to Jhannoe, 46 miles S.W. of the former. Lat. $25^{\circ} 53'$, long. $79^{\circ} 13'$.

BERGAWAH, in the territory of Gwalior, a village on the route from Etawa to the fort of Gwalior, 23 miles S.W. of former, 60 N.E. of the latter. It is situate on the small river Coharry, on the right bank of which is room for encampment, though rather rough. Lat. $26^{\circ} 39'$, long. $78^{\circ} 44'$.

BERHAMPOOR.—A town in the native state of Nepal, distant S.E. from Khatmandoo 60 miles. Lat. $26^{\circ} 54'$, long. $85^{\circ} 40'$.

BERHAMPORE.—See **BURHAMPORE**.

BERHAMPORE, in the British district of Ganjam, presidency of Madras, a town with military cantonment; the latter situate on a rocky ledge of ground, in the midst of a cultivated plain of considerable extent to the south and east, but on the west and north bounded by hills at the distance of from five to ten miles. The western hills, which are of considerable height, are covered with jungle of bamboos and brushwood, and have a bold continuous outline. Those to the north are less elevated, and have an undulating outline. The plain is studded with numerous tanks; but there are no perennial streams, though several nullahs, usually dry, become torrents during the rainy season, when they convey the water from the Western Hills to the Ganjam river. Water, however, is abundant throughout the year, being readily obtainable from wells of the depth of ten or twelve feet. The soil of the cantonment is dry and gravelly, and in many places granite rocks protrude from

the surface. The native town is adjacent to the sepoy's lines, but lies somewhat lower. It is reputed to have a population of 20,000. The streets are narrow, and, like those of the majority of Indian towns, dirty. The houses are mean, a few constructed with bricks, but mostly of mud only. There are, however, well-supplied bazaars, in which the necessaries of life and some of its luxuries are met with in abundance. Silk and cotton cloths are manufactured here to some extent, and sugar and sugar-candy in large quantities. The south-western monsoon sets in at the beginning of June, and continues until September, when it is succeeded by the north-east, which usually terminates its visitation by the close of October. The weather from that time until the end of February is both pleasant and healthy, the sky being clear and the air cool and bracing; the dews at night are heavy. The thermometer at this season ranges from 50° to 75° . April and May are hot and unhealthy; the thermometer then ranges from 75° to 90° , and fevers and rheumatism prevail. Distance from Chicakol, N.E., 90 miles; Vizagapatam, N.E., 150; Masulipatam, N.E., 325; Madras, N.E., 525; Ganjam, S.E., 20; Cuttack, S.E., 108; Calcutta, S.E., 325. Lat. $19^{\circ} 20'$, long. $84^{\circ} 50'$.

BERIS, BERUCH, or BAIRAS, a river tributary to the Banas, rises in Mewar, in the Aravulli range, a few miles west of the town of Gogonda, in lat. $24^{\circ} 34'$, long. $73^{\circ} 42'$, and flowing first north-east and subsequently in a south-easterly direction, during which it receives the waters of two small streams issuing from the tank at the city of Oodeypoor, it passes that city, and enters the artificial lake of Udaia on the west, and emerging from the south-east angle of its embankment, pursues a very sinuous course, but principally north-easterly, to the town of Chittorgurh, receiving in this interval several small streams, the chief of which is the Western Gumbhir, falling into it on the right side. From Chittorgurh it takes a course rather more northerly, and finally falls into the Banas on the right side, in lat. $25^{\circ} 18'$, long. $75^{\circ} 6'$, having flowed 120 miles. Jacquemont, who crossed it near the confluence of the Gumbhir, mistakes it for the Banas, and Blumenthal's map to the work is still more incorrect. Heber, who also crossed it at the same place, erroneously designates it the Bunass. He states that in this place it "runs with a considerable stream of very bright and beautiful water. On our left hand were the ruins of a long, lofty, and handsome bridge, of eight Gothic arches, and one semi-circular one in the centre, with a ruined tower and gateway at each end. The ford was deep, with a sharp gravelly bottom." He does not mention what we learn from Garden, that the ruined bridge which he describes was not over the stream which he crossed, but over the Gumbhir, the confluence of which is close to the ford.

BERLO.—A village in the jaghire or feudal possession of Jajhur, lieut.-gov. of the N.W. Provinces. Lat. $28^{\circ} 32'$, long. $76^{\circ} 5'$.

BERMA.—A river rising in the states of Bundelcund, in lat. 25° , long. $79^{\circ} 26'$, near the town of Logassi, and flowing in a north-easterly direction for about eighty miles, principally through the British district of Humnappore, falls into the Betwa on the right side, in lat. $25^{\circ} 53'$, long. $79^{\circ} 59'$.

BERMYA, in the British district of Dacca, lieut.-gov. of Bengal, a town 35 miles N. of the city of Dacca. Lat. $24^{\circ} 13'$, long. $90^{\circ} 30'$.

BEROUNDA, or **BURROUNDA**, in Bundelcund, a town or stronghold at a difficult ghat or pass, by which lies a route from Banda to Rewa, 35 miles S.E. of the former, 77° N.W. of the latter. It is the principal place of a chieftainship, "possessed by a family of the Rajbunsee caste, and totally unconnected with the chieftains of the province. How the family obtained the raj is not ascertainable, and the succession does not seem to have descended in a direct line." On obtaining supremacy in Bundelcund, in 1802, by the treaty of Bassein, the British government found the present family in possession; and in 1807 confirmed its claims by a sunnud, or written grant. "The raj is estimated to yield 45,000 rupees per annum. It comprises 275 square miles, and contains seventy-five villages, with a population of 24,000 souls," and maintains a force of forty horse and 200 foot, with one gun. Berounda is in lat. $25^{\circ} 4'$, long. $80^{\circ} 43'$.

BERUMBAAH.—One of the petty native mehals of Cuttack which became tributary to the British upon the conquest of that district in 1803. Berumbah Gurh, the principal place, is distant W. from Cuttack 38 miles. Lat. $20^{\circ} 23'$, long. $85^{\circ} 22'$.

BESSERAH, or **BINEORA**, in the British district of Mirzapoor, lieut.-gov. of the N.W. Provinces, a small town on the route, by the right bank of the Ganges, from Allahabad cantonment to that of Mirzapoor, 45 miles S.E. of the former, 16 W. of the latter. It has a bazaar, and is well supplied with water. Lat. $25^{\circ} 15'$, long. $82^{\circ} 20'$.

BESSONA, or **BUSSOAH**, in the native state of Macherry, a small town on the route from Delhi to the Rajpoot town of Jeypore, 50 miles N.E. of latter. It is situated amongst some isolated rocky hills rising from a sandy plain, and is surrounded by a strong mud rampart. Lat. $27^{\circ} 9'$, long. $76^{\circ} 40'$.

BESTHAR, in the district of Bainswara, territory of Oude, two miles N.E. of the left bank of the Ganges, 12 S.E. of Cawnpore, 40 S.W. of Lucknow. Butler estimates its population at 4,000, of whom 600 are Mussulmans. Lat. $26^{\circ} 25'$, long. $80^{\circ} 30'$.

BESULEE.—A river of Gwalior, rising in lat. $26^{\circ} 9'$, long. $78^{\circ} 21'$. It flows in a circuitous but generally north-easterly direction

for 63 miles, to lat. $26^{\circ} 24'$, long. $79^{\circ} 1'$, when it falls into the Sinde river.

BETAUL.—A town in the native state of Nepal, distant W. from Khatmandoo 107 miles. Lat. $27^{\circ} 37'$, long. $83^{\circ} 34'$.

BETAWUD, in the British district of Khandeish, presidency of Bombay, a town on the left bank of the river Panjur, 20 miles N.E. of Dhoolia. Lat. $21^{\circ} 8'$, long. $74^{\circ} 52'$.

BETHYAN.—A town in the native state of Kashmir, or dominions of Ghelab Singh, distant N.W. from Jamoo 33 miles. Lat. $33^{\circ} 4'$, long. $74^{\circ} 43'$.

BETIGANOW, in the district of Alhadvani, in the territory of Oude, a village on the left bank of the Ganges, 88 miles S.E. of Cawnpore, 90 S. of Lucknow. Butler states it to be the unhealthiest spot in Southern Oude. Lat. $25^{\circ} 42'$, long. $81^{\circ} 24'$.

BETOULA, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Moradabad, and 13 miles N.W. of the former. The road in this part of the route is good; the country open, flat, and cultivated. Lat. $28^{\circ} 28'$, long. $79^{\circ} 22'$.

BETTADAPOOR.—A town in the territory of Mysore, distant W. of Seringapatam, 41 miles. Lat. $12^{\circ} 29'$, long. $76^{\circ} 9'$.

BETTIAH, or **BETIYA**, in the British district of Sarun, lieut.-gov. of Bengal, a town on the route from Goruckpoor to Muliye cantonment, 82 miles E. of former, 67 W. of latter. It is the principal place of Champaran, or the north-east division of the district, and that portion is thence frequently denominated Bettiah. Supplies are abundant here; and a mile and a half E. of the town is an encamping-ground, on a grassy plain. Tiefenbaler, mentioning its state about eighty years ago, describes it as a populous town, having a large fort of masonry, with a ditch and towers, and containing several tanks within its circuit. Distant N.W. from Patna 95 miles. Lat. $26^{\circ} 46'$, long. $84^{\circ} 34'$.

BETWA, or **BETWANTI.**—A river rising in Malwa, in the raj or principality of Bhopal, one mile and a half S. of the large tank at the town of Bhopal, and in lat. $23^{\circ} 14'$, long. $77^{\circ} 22'$. From its source it flows in a south-easterly direction, parallel to the road leading from Bhopal to Hosingabad, for twenty miles, to Suttapoor, whence it takes a north-easterly course through the raj for about thirty-five miles, and in lat. $23^{\circ} 28'$, long. $77^{\circ} 48'$, near Bhilsa, crosses the northern frontier into the territory of Gwalior, through which it continues to flow nearly in the same direction for about 115 miles, to lat. $24^{\circ} 53'$, long. $78^{\circ} 17'$, where it arrives in the province of Bundelcund, which it does not leave for the rest of its circuitous course of 196 miles to its junction with the Jumna at Humnappoor, in lat. $25^{\circ} 57'$, long. $80^{\circ} 17'$; its total length of course being about 360 miles, generally in a north-easterly

direction. It receives many small streams right and left. Of these, the Dhasan, the principal, falls into it on the right side, in lat. $25^{\circ} 48'$, long. $79^{\circ} 28'$; the Jamni eighty miles higher up, on the same side; and still higher up, the Beena. The route from Neemuch to Saugor crosses it near Bhilsa by a good ford; fifty miles lower down, or more north-east, it is also crossed by the route from Goonah to Saugor, and it has there a "bed 220 yards wide; bottom rock and stone; banks sloping at the ghat (ford); stream thirty yards wide, and two deep;" again, ninety miles further down, and in lat. $25^{\circ} 23'$, long. $78^{\circ} 46'$, by the route from Agra to Saugor, where it has a bed 600 yards wide, full of rocks and loose stones; and 110 miles farther down, by the circuitous course of the river, and in lat. $25^{\circ} 52'$, long. $79^{\circ} 52'$, by the route from Banda to Calpee, where it has a "bed 550 yards, and stream in the dry season 180 yards wide; bottom sand and gravel." Jacquemont, who saw it in the beginning of spring, or dry season, states it to be then, at its junction with the Jumna, half a mile wide, and in some parts not fordable. He styles it an enormous river, being during the periodical rains from one to two miles wide, with a current of six, seven, or nine miles an hour. It is, however, not navigable in any part of its course. Baber erroneously states that it falls into the Ganges.

BEWAR, in the British district of Hummerpore, lieutenant-gov. of the N.W. Provinces, a town on the route from Banda to Calpee, 35 miles N.W. of former. It has a bazaar, and is well supplied with water. Lat. $25^{\circ} 46'$, long. 80° .

BEWUR, in the British district Mynpooree, the principal place of the pergunnah of the same name, is a small town half a mile from the right bank of the Kali Nadi (east), on the route from the cantonment of Futehgurh to that of Mynpooree, and 15 miles E. of the latter. It has a bazaar, and water is plentiful. The country is low, level, and cultivated. Lat. $27^{\circ} 13'$, long. $79^{\circ} 21'$.

BEYLA.—A town in the native state of Cutch, under the political superintendence of the presidency of Bombay, distant N.E. from Bhoj 75 miles. Lat. $23^{\circ} 50'$, long. $70^{\circ} 40'$.

BEYLA, in British district Sarun, lieutenant-gov. of Bengal, a town on the route from Dinapor to Khatmandoo, 106 miles N. of former, 91 S. of latter. Lat. $26^{\circ} 52'$, long. $84^{\circ} 52'$.

BEYLUH.—See **BELAH**.

BEYPOOR, or **BAIPOOR**, in the British district of Malabar, presidency of Madras, a seaport, situate at the north side of the estuary of the Sharapoya, or river of Beypoor, which rises in the Western Ghata. Vessels drawing fourteen feet water may, when the tide is in, be floated over the bar by means of casks; and within there is good depth of water. The situation of the town is very beautiful, but it

has little trade, except in timber, the greater part of the teak, the growth of the forests on the ghats to the eastward, being floated down the river for exportation at this place. This circumstance induced some projectors to prepare accommodations for building ships of war here; but the small depth of water on the bar rendered the selection absurd for such a purpose. With similar views saw-mills were constructed here, but wind, which was employed as the motive power, was found too precarious and feeble for the purpose. From the great abundance of wood for fuel, steam might obviously be advantageously employed for this purpose; and competent judges are of opinion that there are encouraging indications of coal on the banks of the river below high-water mark. Iron-ore is found in the neighbourhood, and smelted at the iron-works established here. Purchases of the article have recently been made by the government for the service of the gun-carriage department, and favourable reports of its quality transmitted to the home authorities. When connected with the city of Madras by the railway now under construction, Beypoor will doubtless become a thriving port. Distance S.E. from Cannanore 56 miles, from Bombay 570, from Calicut six. Lat. $11^{\circ} 10'$, long. $75^{\circ} 51'$.

BEYPOOR.—A river deriving its origin from the Neilgherry Mountains. The head of this stream is formed by the drainage of the elevated tabular mass of hills which occur to the north-west of the group at Neddiwuttum; and though it descends the face of the hills at no great distance from the fall of the Moyaar, the intervention of a sharp spur diverts its course into an exactly opposite direction, forcing it over the ridge called the Carcoor or Yellamullay Hills, to find its way to its embouchure on the western coast at Beypoor, near Calicut.

BEYREAH, in the British district of Ghazee-poor, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Ganges, 58 miles N.E. of Ghazee-poor. Lat. $25^{\circ} 44'$, long. $84^{\circ} 32'$.

BEYRUDONI.—A town in Hyderabad, or territory of the Nizam, distant S.W. from Hyderabad 120 miles. Lat. $16^{\circ} 16'$, long. $77^{\circ} 10'$.

BEYT, or **BET**, in Guzerat, or territory of the Guicowar, an island at the entrance of a bay, an inlet of the Gulf of Cutch, and indenting the north-east coast of the district of Okamundul, in the peninsula of Kattywar. The castle or fort, formerly called Kullorkot, is on the west side of the island, and is compact and imposing, having lofty massive towers mounted with iron ordnance, and with its narrowest and most efficient face towards the water. It formerly belonged to a Rajpoot pirate, but now belongs to the Guicowar. The whole island singularly abounds with temples and shrines in honour of Krishna; and the population, principally consisting of Brahmans, is mainly

supported by the resort of pilgrims. The place is also called Sankhodwara, or "the Door of the Shell;" a great number of fine conch shells being obtained from the various banks off the shore, and exported to all parts of the world, principally for the purpose of being carved into ornaments. The fort is distant from Ahmedabad, W., 225 miles; Baroda, 265. Lat. 22° 28', long. 69° 10'.

BEZWARRA, in the British district of Masulipatam, presidency of Madras, a town on the route from Guntoor to Ellore, 20 miles N.E. of the former. The trunk-road from Madras to Calcutta is by the ferry of Bezwarra, which is well provided with the means of transit. Lat. 16° 31', long. 80° 41'.

BHADARSA, in the district of Pachhamrat, territory of Oude, a town nine miles S. of Faizabad, 75 E. of Lucknow, situate on the river Tons (eastern). Here is an eleemosynary establishment with an annual income of 15,000 rupees, the endowment of the nawaub vizier Asaf ud Daulah. The establishment is under the care of a Seiad, or descendant of Fatima, and the proceeds of the endowment are distributed indiscriminately among Mussulman and Hindoo religious mendicants. According to Butter, the population of the place is 5,000, of whom 2,000 are Mussulmans. Lat. 26° 38', long. 82° 8'.

BHADER.—A river rising in the peninsula of Kattywar, province of Guzerat, about lat. 22° 10', long. 71° 18', and flowing in a south-westerly direction for 135 miles, falls into the Indian Ocean near the town of Poorbunder, in lat. 21° 38', long. 69° 46'.

BHADINYA, in the district of Sultanpoor, territory of Oude, a town on the right bank of the river Gomtee, 15 miles S.E. of Sultanpoor cantonment, 98 S.E. of Lucknow. Here is a ruined fort, formerly held out, by a refractory zemindar or landholder, against the officers of the Oude government, two of whom were killed in the attempt to take it. The British troops under Colonel Faithfull subsequently captured it, and gave it up to the government of Oude, through the supineness of which the zemindar was allowed to reoccupy and repair it. An officer of the Oude government succeeded in taking it in 1836, when it was dismantled; and since that time it has remained in ruins. After the destruction of the fort, the cultivators of the surrounding country emigrated in great numbers. Butter estimates the population at 2,000, including 100 Mussulmans. Lat. 26° 10', long. 82° 18'.

BHADOWRA.—A town in the native state of Gwalior, or possessions of Scindia, distant S.W. from Gwalior 110 miles. Lat. 24° 47', long. 77° 28'.

BHADREZ, in the Rajpoot state of Joudpore, a village on the route from Pokhurn to Balmeer, and 12 miles N.W. of the latter. It is situate at the eastern base of a range of rocky hills, stretching about twenty miles in a

direction from north-west to south-east. The road in this part of the route is sandy and uneven. Lat. 25° 52', long. 71° 18'.

BHADRI, in the district Ahladganj, territory of Oude, a town close to the south-east frontier, towards the British district of Allahabad. Jag Mohun Singh, the zemindar or landholder of this place and of the surrounding country, held out against the Oude government, until in 1834 all the disposable forces of the kingdom, with 100 pieces of artillery, were brought against him. Attempting to escape with ten cannon across the Ganges, he was overtaken, killed, and his head carried off in triumph: the estate, however, was given to his son. Distant N. of Allahabad 22 miles, S.E. of Lucknow 90. Lat. 25° 47', long. 81° 45'.

BHADRINATH.—See **BADRINATH**.

BHADU.—A town in the native state of Kashmeer, or possessions of Gholab Singh, distant E. from Jamoo 36 miles. Lat. 32° 30', long. 75° 36'.

BHAGA PURANA, in Sirhind, a village on the route from Ferozpoor to Simla, and 43 miles S.E. of the former town. It is supplied with water from three wells, each 150 feet deep. The surrounding country is wild, and overrun with jungle. The road is in general good, but in a few places sandy and heavy. Distant N.W. from Calcutta 1,081 miles. Lat. 30° 40', long. 75° 5'.

BHAGEERETTEE.—The name by which the Ganges is designated in the upper part of its course. The stream first issues from the mountains of Gurwhal, in lat. 30° 54', long. 79° 7', and holds a direction north-west to Gangotri, and thence to Bhairogati, where it receives the Jahnuvi. The course of the united stream is then south-westerly to Sookhee, where it breaks through the "Himalaya Proper." After a further course of ninety miles, during which it is joined by the Julkar and the Bhilling, it unites at Deoprag, in lat. 30° 8', long. 78° 39', with the Aluknunda, and from this confluence the stream is called the Ganges. Upwards of 1,000 miles below Hurdwar, where the Ganges first enters the plains, it throws off an extensive branch, which is regarded by Hindoos as the genuine stream of the sacred river; for the particulars of which see **BHAGRUTTEE**.

BHAGELKHUND.—See **REWA**.

BHAGMARA, in the British district of Durrung, province of Assam, lieut.-gov. of Bengal, a town on the route from Bisnath to Luckimpoor, 10 miles N. of the former. Lat. 26° 49', long. 93° 12'.

BHAGRUTTEE.—A large branch of the Ganges, and regarded by the natives as the genuine stream of the sacred river, which at Jagotnathpur, in lat. 24° 40', long. 88° 7', separates into two branches, the right, or western, being denominated the Bhagruttee, the eastern bearing the name of Podda, and

conveying the greatest volume of the water to form a junction by various channels with the Brahmaputra. Taking a course very sinuous, but generally south, for 135 miles, it at Nad-dya, in lat. $23^{\circ} 25'$, long. $88^{\circ} 22'$, unites with the river of Jellinghee, an offshoot of the Ganges, sent off from the main stream more to the east. The united stream flowing by Calcutta to the sea is called the Hooghly. Through this channel the passage made to Rajmahal and the North-West Provinces is 177 miles less than that by the Sunderbunds passage, more to the east; and hence is followed for the greater part of the year; but in spring, the depth of water being reduced to one foot, navigation of large craft through this channel is at that season precluded. It is by Rennell denominated the Cossimbazar river, from the circumstance of its flowing by that place.

BHAGUL.—See BAGUL.

BHAGULPORE.—A British district under the lieut.-gov. of Bengal, and named from its principal place. It is bounded on the north by the kingdom of Nepal and the British district of Purnea; on the east by the districts of Purnea and Maldah; on the south by the British district of Beerbhoom; and on the west by the British districts of Monghyr and Tirhoot. It lies between lat. $24^{\circ} 17' - 26^{\circ} 20'$, long. $86^{\circ} 15' - 88^{\circ} 3'$; is 150 miles in length from north to south, and 108 in breadth, and has an area of 5,506 square miles. The district is intersected by the Ganges, which, running west and east, divides it into two parts, the northern division being in extent about a fourth of the whole. The other rivers which intersect or skirt the district are the Gogaree, and the Douse or Ejara. On the south side of the Ganges, numerous torrents of great size rush down from the hills during the rains, and discharge themselves into that river; but though their channels are in general of great width, they become devoid of water during the dry season. Bhagulpore being nearly inter-tropical, and the elevation above the sea inconsiderable, the heat in the dry season, comprising spring and the early part of summer, is great, and more so in the hills than in the plains, the reflection of the sun's rays, and radiation of heat from the rocks of the highlands, greatly increasing the temperature. The winters are mild, though slight frosts sometimes occur, and ice is occasionally obtained by exposing boiled water to the night air. The winds prevailing from February to June bring aridity; those which prevail during the remainder of the year are moister; but, altogether, the climate is drier here than in the tracts more to the north and east. The periodical rains of the close of the summer and early part of autumn are heavy. Wild elephants infest the woods and jungly valleys of the hills in the eastern and south-eastern parts of the district, and issuing thence, commit great ravages among the crops. The rhinoceros is sometimes met with. Wild hogs are most numerous and troublesome on

the northern side of the Ganges. The gaur, or gayal, a great bovine quadruped, is sometimes met with. There are besides, the wild buffalo, the nylgau (*Antelope picta*), various other species of antelopes, deer, porcupines, monkeys in great numbers, and bares. The beasts of prey are tigers, leopards, bears, hyenas, wolves, jackals, foxes. Of birds there are cranes, peafowl, parrots, paroquets, partridges, quails, ortolans, ducks, teal, and snipes. The boa constrictor, or some other huge snake, lurks in the rocky recesses of the jungles, but it is not dreaded by the natives, who state that it preys on deer and wild swine. Venomous serpents are, however, very numerous, and, if native report may be trusted, destroy annually a very considerable number of individuals. In the Ganges, and other large streams, both the blunt-snouted crocodile and the long-snouted are numerous. Large tortoises abound, some being five or six feet in length. Fish are abundant, and many are of fine quality. The trade of the fisherman is pursued by numbers, according to Buchanan amounting to many thousands. Honey-bees abound in the woods, and their produce is largely gathered, but consumed by the people on the spot, and not made an article of commerce. Rice is the staple crop; next in importance is wheat; then barley, maize, maruya (*Eleusine corocana*), various kinds of millet, jowar (*Holcus sorghum*), bajra (*Holcus spicatus*), oil-seeds and pulse in great abundance and variety, and cucurbitaceous plants. The potato is cultivated to a considerable extent, as also are carrots, onions, asparagus, and some other European esculent vegetables during the cool season. The sugar-cane is widely cultivated, and thrives remarkably well; cotton and indigo are grown largely, and are of good quality; the opium-poppy and tobacco receive little attention; kumum or safflower, for dyeing, is an important object of culture, as is the jujube, being used as food for the lac-producing insect. Iron-mining and smelting are carried on. The principal manufactures are glass, pottery, works in gold, silver, copper, and iron, tanning and shoemaking, cotton-spinning and weaving, dyeing to considerable extent, silk-winding and weaving; but much of the manufacturing industry of the district has decayed before the competition of British manufactures. A few years since, search was made for coal, and though some was found, it was of such inferior quality as to discourage the pursuit. The population is stated at 2,000,000, of whom the Mussulmans are reputed to be about twenty-three in the hundred, the remainder being Brahmmins. The civil establishment is located at the town of Bhagulpore, and comprises about eleven Europeans, with a considerable staff of native functionaries. The eastern portion of the district is traversed by the East-Indian Railway.

The territory of Bhagulpore, considered to have been originally part of the great realm of Magadha, became part of the Mahomedan

kingdom of Gour, and, subsequently subjugated nominally by Akber, was by him declared part of the dominions of the monarch of Delhi. In 1763, Cossim Ali attempted to make a stand against the British forces at Udanala, in the south-eastern part of this province; but his intrenchments were forced with great slaughter, and all within them fell into the hands of the victors. It passed to the East-India Company by the grant of Shah Alum, emperor of Delhi, in 1765.

BHAGULPORE.—The principal place of the British district of the same name, a town on the right bank of the Ganges, here seven miles in width during the rains. It lies on the route from Berhampore to Dinapore, 150 miles north-west of the former, 143 east of the latter. Though represented to be two miles in length, and a mile in width, it is a poor place, consisting of scattered market-places, meanly built, and, owing to the declivities of the ground, very inconveniently situated. It is, however, ornamented by many handsome houses of European residents, and also by mosques. There is also a Romish chapel. The cavalry barracks are now only occasionally occupied; but four miles from them are the barracks of a native corps formed of the highlanders of the Rajmahal wilds. There are also a court of justice and a jail, "a very neat and creditable building," and which has lately been well ventilated and otherwise improved. An educational institution, in which English instruction is afforded, has been established in the town by the British government. The number of pupils in 1852 amounted to 115. Adjacent to the town are the Cleveland monuments, erected to the memory of a meritorious civil functionary of that name, who filled the office of judge and magistrate about the year 1780; one in the Hindoo style, raised by native subscription; the other erected at the cost of the East-India Company. In the vicinity are two round towers, each about seventy feet high. The names of their founders are unknown, as are also the era and object of their erection; but they closely resemble the *pyrethra*, so numerous in Afghanistan, Persia, and Syria, as well as the round towers of Ireland. The site of the ancient Palibothra has been conjectured to be contiguous to this town. Bhagulpore is distant N.W. from Calcutta, by Berhampore and Moorshedabad, 268 miles; by the course of the Ganges, 326. Lat. $25^{\circ} 11'$, long. 87° .

BHAGULPORE, in the British district of Goruckpore (N.W. Provinces), a small town which formerly gave name to a pergunnah or subdivision. It is situate on the left bank of the river Ghoghra, and was reported by Buchanan to contain a hundred and twenty-five huts, but to be neater, cleaner, and more thriving than most native towns of its size. One of the streets is wide, and has a row of sheds for the hucksters on the market-days. Many of the huts are very neatly roofed with

tiles. It is said to have been the birth-place and residence of Parasu Rama, an incarnation of Vishnu, and highly famed in Hindoo legendary lore. In the neighbourhood are several ruins, but none that would seem worthy of so extraordinary a personage. A stone pillar, attributed by some to Parasu Rama, by others to Bhim, the son of Pardu, is generally popularly known by the name of the Staff (ath). Bhagulpore is 50 miles S.E. of the cantonment of Goruckpore. Lat. $26^{\circ} 10'$, long. $83^{\circ} 52'$.

BHAGWANGOLA.—See ROGWANGOLA.

BHAGWEE, in Central India, in the jaghire of Jujhur, lieut.-gov. of the N.W. Provinces, a town on the route from Rohtuk to Narnol, and 25 miles S. of the former. Lat. $28^{\circ} 35'$, long. $76^{\circ} 27'$.

BHAINEE, in Sirhind, a village on the route from Ferozpoor to Simla, and 72 miles S.E. of the former place. Distant N.W. from Calcutta 1,098 miles. Lat. $30^{\circ} 35'$, long. $76^{\circ} 36'$.

BHAIROGATI, in Gurwhal, the confluence of the river Jahnevi with the Bhageerettee, as the Ganges is called in the upper part of its course. Hodgson describes it as "a most terrific and really awful-looking place," and adds, that he had seen nothing to be compared with it in horror and extravagance. Both rivers are confined within high perpendicular walls of solid granite, and in the acute angle formed by the confluence a lofty massive rock projects downwards between the streams like an enormous wedge. The Jahnevi, the larger stream, is beautifully clear, with a bluish tinge; the Bhageerettee of a dingy hue. Hodgson compares this scene of terrific sublimity to "the appearance that the ruins of a Gothic cathedral might have to a spectator within them, supposing that thunderbolts or earthquakes had rifted its lofty and massy towers, spires, and buttresses; the parts left standing might then, in miniature, give an idea of the rocks of Bhairoghati." The Bhageerettee, where forty-five feet wide and rather deep, is traversed by a sanga or wooden bridge, sixty feet above the stream. Hence is the name of the place, signifying the ghat or pass of Bhairo, some mythological personage, worshipped in a small temple near the spot. Elevation above the sea 8,511 feet. Lat. $31^{\circ} 2'$, long. $78^{\circ} 54'$.

BHAIROWAL, in the Baree Doab division of the Punjab, a town situated on the right bank of the Beas river, 31 miles S.E. of the town of Amritsir. Lat. $31^{\circ} 26'$, long. $75^{\circ} 14'$.

BHAKURI, in the British district of Allygurh, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Delhi, seven miles N.W. of the former. The road in this part of the route is in many places heavy, and confined between sand-drifts; the country is open, sandy, and partially cultivated. Lat. $27^{\circ} 59'$, long. $78^{\circ} 3'$.

BHALKEE, in Hyderabad, or territory of the Nizam, a town on a stream a feeder of the river Manjera, distant from the city of Hyderabad, N.W., 98 miles. Lat. $18^{\circ} 3'$, long. $77^{\circ} 17'$.

BHALOD, in Guzerat, or territory of the Guicowar, a town on the left or south bank of the river Nerbudda, 35 miles S. of Baroda, 55 N. of Surat. Lat. $21^{\circ} 48'$, long. $73^{\circ} 15'$.

BHALOT.—A town in the Rajpoot territory of Shekawutee, distant S.W. from Delhi 82 miles. Lat. $28^{\circ} 10'$, long. $76^{\circ} 6'$.

BHALTHA.—A town in the Rajpoot state of Jhalawar, distant E. from Neemuch 100 miles. Lat. $24^{\circ} 17'$, long. $76^{\circ} 30'$.

BHAMANIKHERA, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to Muttra, and 47 miles S. of the former city. The vicinity, now ill cultivated, appears to have been once populous and prosperous, as it abounds in the remains of small mosques and ornamented tombs. Water is supplied from tanks and wells, and supplies are procurable from the surrounding country. The road in this part of the route is good. Lat. $28^{\circ} 4'$, long. $77^{\circ} 24'$.

BHAMGURH.—A town in the native state of Gwalior, or Scindia's possessions, distant S.E. from Mhow 72 miles. Lat. $21^{\circ} 48'$, long. $76^{\circ} 35'$.

BHAMONCALLEE, in the British district of Jessore, lieutenant-gov. of Bengal, a town on the route from Jessore to Fureedpore, 12 miles N.E. of the former. Lat. $23^{\circ} 15'$, long. $89^{\circ} 21'$.

BHAMON, or **BHAMUNNAGRA**, in the British district of Budaon, lieutenant-gov. of the N.W. Provinces, a village on the route, by Khasgunj, from Bareilly to Allyghur cantonment, and 30 miles S.E. of the latter, 56 N.E. of Delhi. The road in this part of the route is generally good, but in some places heavy; the country open and partially cultivated. Lat. $27^{\circ} 51'$, long. $78^{\circ} 34'$.

BHANDUK.—A town in the territory of Nagpoor, distant S. from Nagpoor 70 miles. Lat. $20^{\circ} 8'$, long. $79^{\circ} 12'$.

BHANEYRUH, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route from Meerut to Muttra, and 33 miles N.E. of the latter. The road in this part of the route is tolerably good, the country open and well cultivated. Lat. $27^{\circ} 54'$, long. $77^{\circ} 54'$.

BHANGURH.—A town in the Rajpoot state of Alwur, distant S.W. from Alwur 38 miles. Lat. $27^{\circ} 7'$, long. $76^{\circ} 22'$.

BHANPOOR, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a small town 58 miles N.W. of the cantonment of Goruckpoor. Buchanan states the number of its houses at 100; and consequently, allow-

ing five persons to each, the population may be estimated at 500. Lat. $27^{\circ} 6'$, long. $82^{\circ} 37'$.

BHANPOORA, in territory of Indore, or possessions of Holkar's family, a town on the route from Neemuch to Kota, 60 miles E. of former, 60 S. of latter. It is situate on the river Rewa, at the base of a ridge of hills, and has a fort built of stone, but not finished. "There is a fine palace in the inside, which is also unfinished. Both of these were commenced by Jeswunt Row Holkar, of whom there is a beautiful cut-marble statue in the palace; and on the walls and gateway are several figures of animals of various descriptions. The city is surrounded by a wall." It is the principal place of a pergunnah containing seventy villages. Population 20,000. Elevation above the sea 1,344 feet. Lat. $24^{\circ} 30'$, long. $75^{\circ} 45'$.

BHANPOOR THANA, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Koana river, 49 miles N.W. of Goruckpoor. Lat. $26^{\circ} 59'$, long. $82^{\circ} 43'$.

BHANRA, in the district of Sooltanpoor, territory of Oude, a village a mile from the right bank of the river Goomtee, five miles N.W. of Sooltanpoor cantonment, 77 S.E. of Lucknow. Butter estimates its population at 400, all Hindoos. Lat. $26^{\circ} 20'$, long. $82^{\circ} 4'$.

BHANSTON.—A town in the Rajpoot state of Kotah, distant E. from Kotah 60 miles. Lat. $25^{\circ} 7'$, long. $76^{\circ} 49'$.

BHAOON, in the British district of Rooldundshuhur, lieutenant-gov. of the N.W. Provinces, a town on the route from Anoopshuhur to Meerut, and 26 miles S.E. of the latter. Lat. $28^{\circ} 38'$, long. $78^{\circ} 1'$.

BHAPOORUH, or **BOPRU**, in the British district of Paneeput, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Delhi to Kurnool, and 46 miles N.W. of the former. The road in this part of the route is good. Lat. $29^{\circ} 14'$, long. $77^{\circ} 4'$.

BHARATGANJ, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a small town on the route by the Kuttra Pass, from the cantonment of Allahabad to Rewa, and 40 miles S.E. of the former city. It has a bazaar, and supplies and water are abundant. The road in this part of the route is rather good, the country level, well cultivated, and studded with small villages. Lat. $25^{\circ} 4'$, long. $82^{\circ} 15'$.

BHARAWAS, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a town on the route from Delhi to Rewari, and 50 miles S.W. of the former. It has a small bazaar; there is water from wells, and supplies are procurable from the vicinity of Rewari, five miles distant. The old cantonment of Rewari is a mile N.W. of Bharawas. The road in this part of the route is good, the adjacent country open. Lat. $28^{\circ} 8'$, long. $76^{\circ} 39'$.

BHARERA, in the British district of Shah-jehanpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Futtehgarh to the cantonment of Shah-jehanpore, and 15 miles S.W. of the latter. The road in this part of the route is indifferent, the country open, level, and partially cultivated. Lat. 27° 46', long. 79° 50'.

BHAROLE, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a small town or village on the route from the city of Agra to the cantonment of Mynpooree, and 23 miles W. of the latter. The road in this part of the route is laid under water to the depth of from one to three feet during the periodical rains in the latter part of summer, at other times it is tolerably good. The country is flat and partially cultivated. Lat. 27° 8', long. 78° 46'.

BHASEYPOOR, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town 28 miles N.E. from Mozufferpore, 32 miles N.W. of Durbunga. Lat. 26° 30', long. 85° 39'.

BHASOUR, in Sirhind, a village on the route from Hansee to Lodiana, and 36 miles S. of the latter town. It is situate in a country with a slightly undulating surface, moderately fertile and partially cultivated. The road in this part of the route is generally good, but liable to become miry in heavy rains. Distant N.W. from Calcutta 1,074 miles. Lat. 30° 25', long. 76°.

BHATGONG, in the native state of Nepaul, one of the chief towns of the kingdom, and the favourite residence of the Brahmins of the country. "Its palace and buildings in general are of more striking appearance; and its streets, if not much wider, are at all events much cleaner than those of Khatmandoo." Lat. 27° 37', long. 85° 22'.

BHATNEER.—See **BHUTNEER**.

BHATTIES.—See **BHUTTERANA**.

BHAUBEIR.—A small district in the north-west of Guzerat, having a population composed entirely of coolies. It is bounded on the north by Deodur; on the south by Radhuipore; on the east by Therwarra; and on the west by Soorgaun. It is about fourteen miles long and twelve broad, and consists of a flat jungle-country; the soil being principally sandy, and producing only one crop of the commoner grains yearly. The population does not exceed 500; and the revenue is little more than 1,200 rupees. Four-fifths of the population are described as armed men. The district pays no tribute to any government. It became connected with the British government in 1819, upon the expulsion of the Kosas from Guzerat; and a further agreement was entered into in 1826. The policy observed towards it is that of non-interference with its internal affairs, but control in its external relations, which are superintended by the government of Bombay. The town of Bhaubeir

is distant W. from Deesa 39 miles. Lat. 24° 7', long. 71° 30'.

BHAUBRA.—A town of Malwa, in the native state of Jabboah, distant S.W. from Jabboah 18 miles. Lat. 22° 33', long. 74° 25'.

BHAUGULPORE.—See **BHAGULPORE**.

BHAUL, in the British district of Khan-deish, presidency of Bombay, a town on the left bank of the Girna, 31 miles E. of Malligaum. Lat. 20° 35', long. 75°.

BHAWALPOOR, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawa to Allahabad, and 24 miles S.E. of the former. Lat. 26° 34', long. 79° 22'.

BHAWULPOOR.—See **BAHAWULPOOR**.

BHAWUR.—See **JAUNSAH**.

BHAYNSEEA, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route by Nanakmath and Ruderpoor, from the town of Pillibheet to that of Kasheepoor, 23 miles S.E. of the latter. Lat. 29° 2', long. 79° 19'.

BHEEMAW, or **BETIMOW**, in the British district of Futtehpoor, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Ganges, 10 miles N. of the town of Futtehpoor. Lat. 26° 3', long. 80° 51'.

BHEEGA, in the British district of Ramgur, lieutenant-gov. of Bengal, a town on the main trunk-road from Calcutta to Benares, 30 miles N. of Hazareebagh. Lat. 24° 24', long. 85° 20'.

BHEEKUNGHAM.—A town in the native state of Indoor, or territory of Holkar's family, distant S. from Indoor 60 miles. Lat. 21° 51', long. 76° 8'.

BHEELS.—See **CANDEISH**.

BHEELWARA.—A town in the Rajpoot state of Oodeepoor, distant S. from Ajmeer 80 miles. Lat. 25° 20', long. 74° 44'.

BHEEMAR, in the Rajpoot state of Joudpore, a village on the route from Pokhurn to Balmer, and 56 miles N. of the latter. It is a prosperous little place, inhabited by Charuns, a singular Rajpoot tribe, combining the avocations of priesthood and trade, and retaining by their artifices a wonderful influence over their superstitious countrymen. Water is obtained from two wells about 180 feet deep. The road eastward, or towards Pokhurn, is good, but in the other direction indifferent. Lat. 26° 19', long. 71° 33'.

RHEEM GHORA, in the British district of Saharanpore, a place of Hindoo pilgrimage, about a mile north-east of Hurdwar. It is in a small recess of the mountain bounding the Dehra Doon on the south, and in a perpendicular rock about 350 feet high. Here is a kunda or pool supplied with water from a small branch of the Ganges, and frequented by

pilgrims to practise the ablution which they consider efficacious to wash away their sins. According to the legend, Bheema was posted here to prevent the Ganges from taking another course. Immediately above the bath is a small cave or artificial excavation in the rock. It is pointed out as a miraculous indenture made by the kick of the horse on which Bheema was mounted, and though only five feet square, affords shelter to a fakir. Raper states that his associate, Webb, took the height of Bheema Ghora, and found it to be 407 feet; but as the Kunda is supplied with water from one of "the small channels of the river," it must be almost exactly on the same level as the Ganges, if by the expression of "the river" that great stream be meant. Perhaps the elevation ascertained by Webb is that of the summit of Bheema Ghora above the river. Hurdwar is 1,024 feet above the sea. Lat. 29° 58', long. 78° 14'.

BHEENDAH.—A town in the Rajpoot state of Oodeypoor, distant S.E. from Oodeypoor 30 miles. Lat. 24° 23', long. 74° 16'.

BHEENMAL.—A town in the Rajpoot state of Joudpore, distant S.W. from Joudpore 100 miles. Lat. 25° 5', long. 72° 20'.

BHEENPOOR.—A town in Hyderabad, or dominions of the Nizam, distant N. from Hyderabad 167 miles. Lat. 19° 46', long. 78° 35'.

BHEER.—A town in Hyderabad, or dominions of the Nizam, distant N.W. from Hyderabad 206 miles. Lat. 19°, long. 75° 55'.

BHEERJORA, in the British district of Goalpara, lieutenant-gov. of Bengal, a town 21 miles N.W. from Goalpara, 95 miles N.E. of Rungpore. Lat. 26° 27', long. 90° 32'.

BHEERNAGUR, in the British district of Purneah, lieutenant-gov. of Bengal, a town on the right bank of the river Cooisy, 29 miles N.W. of Purneah. Lat. 25° 59', long. 87° 19'.

BHIEETAH, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Mirzapore to Banda, 11 miles S. of Allahabad. Lat. 25° 17', long. 81° 52'.

BHEKORAE, in the Rajpoot state of Joudpore, a village on the route from Pokhurn to Balmer, and 32 miles S. of the former. It is inhabited by Charans, a tribe of Rajpoots, who by priestcraft have acquired an extraordinary influence over their countrymen. There are about a hundred houses, generally supplied with water from a large tank, which fails in the dry season, and then recourse is had to two wells, one of fresh, the other of brackish water. There is a small fort or tower for the defence of the village. The road is tolerable on the north, or towards Pokhurn, but in the other direction sandy and bad. Lat. 26° 30', long. 71° 50'.

BHENTPOOR, in the British district of Pooree, lieutenant-gov. of Bengal, a town nine miles

W. of Juggurnaut, 47 miles S. of Cuttack. Lat. 19° 50', long. 85° 47'.

BHERACOLE.—One of the petty native states on the south-west frontier of Bengal. It contains an area of about 200 square miles, and its centre is in lat. 21° 5', long. 84° 20'.

BHEREE.—A village in the British district of Hurriana, lieutenant-gov. of the N.W. Provinces. Lat. 29° 29', long. 75° 56'.

BHETAE.—A town in the native state of Nepal, distant W. from Khatmandoo 132 miles. Lat. 27° 46', long. 83° 10'.

BHEWANEE, or **BOWANI,** in the British district of Rohtuck, lieutenant-gov. of the N.W. Provinces, a town with a fort, which was taken by the British in 1809, in consequence of hostile acts committed by the chief who possessed it. The population is returned at 29,442. Lat. 28° 45', long. 76° 14'.

BHEWNDY, in the British district of Tannah, presidency of Bombay, a town on the route from Bombay to Nassick, 29 miles N.E. of the former. The town is supplied with water by means of an aqueduct constructed by the inhabitants, the government having contributed 500*l.* in aid of its cost. The population and mercantile importance of this place are officially stated to be on the increase. Lat. 19° 19', long. 73° 9'.

BHIDANWALA, in Sirhind, a village situate on a high bank, beneath which flows a large offset of the Sutlej, issuing from that river on the left, a short distance below its junction with the Beas. About three miles below the junction is a ghat, communicating with Harikepatan, in the Panjab, and distinguished as being an important channel of traffic. Lieutenant Mackeson thus describes the scene:—"Thirty-two boats, with three men to each, were unceasingly employed from morn to night in transporting loaded hackeries and beasts of burthen of every description across the river. I observed little difference one day from another; it was a scene of constant activity and bustle." Bhidanwala is within the territory formerly belonging to the Alawala Sikh chief, one of those under the control and protection of the British, but who, failing in his allegiance, incurred the penalty of forfeiture of his dominions. Distant N.W. from Calcutta 1,167 miles. Lat. 31° 10', long. 75°.

BHIKAREEPOOR, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to Potoragurh, and 40 miles N.E. of the former. Water and supplies for troops are here abundant. The road in this part of the route is bad; the country level, open, and cultivated. Lat. 28° 42', long. 79° 52'.

BHILKHET, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a halting-place on the route from Pilibheet to Potoragurh cantonment, 62 miles N.E. of the

former. It is situate on the river Ludhia, here fordable, and on the bank of which is encamping-ground for a regiment. Supplies must be collected from the adjacent country, as there is no village. The road to the south-west, or towards Pillibheet, is bad, stony, and has a steep declivity; in the other direction, or towards the north-east, it is better, but with steep ascent. Lat. $29^{\circ} 11'$, long. $80^{\circ} 6'$.

BHILLUNG, in the native state of Gurwhal, a considerable feeder of the Bhageerettee, as the Ganges is called in the upper part of its course. It rises in lat. $30^{\circ} 46'$, long. $78^{\circ} 55'$, and taking a south-westerly course of about fifty miles, falls into the Bhageerettee on the left side, in lat. $30^{\circ} 23'$, long. $78^{\circ} 31'$. The elevation of the confluence is 2,278 feet above the sea. Raper, who crossed it by means of a jhula or rope-bridge, about five miles above the mouth, found the stream there, in the beginning of May, between sixty and seventy feet wide. It abounds with fish, called by Moorcroft trout, which are taken by snaring. Herbert estimates the length of course of the continuous stream of the Bhilling and the part of the Bhageerettee below the confluence, measured from the source of the former to the point at which the latter passes into the plains near Hurdwar, at a hundred and fifty miles. More recent information leads to the conclusion that this estimate is in excess of the true distance, which may be computed at one hundred and twenty miles. The Bhilling is considered a sacred stream by the Hindoos.

BHILSA, in the territory of Gwalior, or the possessions of Scindia's family, a town the principal place of a pergunnah of the same name. It is situate on a trap rock on the right or eastern bank of the river Betwa, and has a fort, inclosed by a wall of stone, furnished with square towers and a ditch. The suburb outside has some spacious streets, containing good houses. Here is a gun, "measuring nineteen feet and a half in length, with a bore of ten inches, in elegant proportions, and highly ornamented. It is of the finest brass, and cast with the appearance of a network over it, and has on it large rings held by dolphins." It is alleged to have been made by order of Jehangir. At Sanchi Kanckhera, four miles and a half south-west of Bhilsa, on a detached hill on the left bank of the river Betwa, are some vast monuments of antiquity. The principal is a hemisphere, constructed of thin layers of freestone, arranged in steps, without any cement, and overlaid with a coat of mortar four inches thick. It has on the summit a level horizontal area, thirty-five feet in diameter, and was formerly surmounted by a cupola, the fragments of which remain. The hemisphere stands on a base twelve feet high, and extending all round seven feet from the termination of the hemisphere to the outside. The circumference of the building, measured round the base, is 554 feet. A line drawn

from the base to the centre of the crown measures 112 feet; the height from the ground to the summit is between seventy and eighty feet. Facing each of the cardinal points is a vast gateway. The north, east, and west gateways are forty feet high; their sides and upper parts being masses of stonework, carved in the most elaborate manner into the forms of elephants, human beings, and other shapes. Opposite each of these gateways, and resting against the face of the circular basement, is a figure of Buddha. The southern gateway is plain. Around are scattered numerous ruins and shattered sculptures; and at a short distance is a hemisphere similar to that already described, but unornamented, and of less dimensions, being only 246 feet in circumference. These buildings have been conjectured to be monuments raised to enshrine some relic consecrated by Buddhist superstition. From a shaft sunk lately from the summit, thirty feet below the foundation, it has been ascertained that the inner part of the building is solid brickwork, without any chamber. On many parts of these buildings are numerous inscriptions in the Pali character, commemorating gifts made by various parties, for the raising, decoration, or maintenance of the work. Bhilsa was taken in 1230 from the Hindoos by Samsuddin Altamsh, sovereign of Delhi. It appears, however, to have soon again fallen into the power of the Hindoos, as in 1293 it was wrested from them by an officer of Jelaluddin Feroze, sovereign of Delhi; and it must have again passed to the Hindoos, as in 1528 Baber states that it belonged to Pagans. It was a few years after taken by his son Humayoon, and subsequently seized by his successful Afghan rival Shur Shah. It was finally (A.D. 1570) incorporated with the empire of Delhi by Akbar. Bhilsa and its annexed pergunnah are stated to yield a present an annual revenue of 325,000 rupees. The tobacco produced in the vicinity of the town is considered the finest in India. The space, however, producing the very fine sort is very circumscribed, not exceeding three acres. "The chief, if not the only cause of the goodness of the tobacco of this single spot, is the very careful and high cultivation applied." The sorts produced in the neighbouring fields are of ordinary quality. Population about 30,000. Distant E. from Oojin 134 miles, S. from Gwalior 190. Lat. $23^{\circ} 30'$, long. $77^{\circ} 50'$.

BHIMBUR, in the Punjab, a town on the route from Lahore to Kashmir, through the Baramula Pass. It is situate on a small stream, which falls into the Chenab, from which river the town is distant about forty miles. The houses are low and flat-roofed. Their number is estimated at 1,000, and that of shops at 150. Lat. $32^{\circ} 59'$, long. $74^{\circ} 6'$.

BHIM TAL, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a small lake near the southern frontier, about ten miles above Bhunowree, on the Almorah

road. It is situate in the bottom of a valley about three miles long, and is itself 3,000 feet in length and 2,400 in breadth, and the depth in the middle has been ascertained by sounding to be sixty-four feet. It is described by Heber as "a very beautiful place. It is a little mountain valley, surrounded on three sides by woody hills, and on the fourth by a tract of green meadow, with a fine lake of clear water. A small and very rude pagoda, of grey stone, with a coarse slate roof, under some fine peepul-trees, looked like a little church; and the whole scene, except that the hills were higher, so strongly reminded me of Wales, that I felt my heart beat as I entered it." Near, and connected with it by a stream, is a piece of water of considerable extent, but shallow and overgrown with aquatic vegetation. Both appear to be in course of being filled up by detritus brought down by streams from the higher grounds. Their waters are emptied by a torrent falling into the Goula, a feeder of the Ramgunga. Elevation above the sea 4,271 feet. Lat. 29° 19', long. 79° 41'.

BHINAY.—See **BUNAE.**

BHIND, in the territory of Gwalior, a town on the route from Etawa to Gwalior fort, 29 miles S. W. of former, 54 N. E. of latter. Though now much decayed, it was once important and populous, with a fort surrounded by a double rampart, the inner of masonry, the outer of mud, and strengthened by towers. In an inclosed pleasure-ground, near the town, are three fine buildings, supported on columns and arches of stone. Lat. 26° 33', long. 78° 52'.

BHINDUS, in the jaghire of Jujhur, lieutenant-gov. of the N. W. Provinces, a village situate on the left bank of the Hansouttee Nullah, a torrent dry for a great part of the year, but spreading widely during the rains. Lat. 28° 32', long. 76° 37'.

BHINGA.—A town in the territory of Oude, distant N. from Oude 61 miles. Lat. 27° 40', long. 82° 1'.

BHINGREE, in the British district of Goruckpore, lieutenant-gov. of the N. W. Provinces, a small town on the south-eastern frontier, towards the British district of Sarun, situate equidistant between the rivers Ohota Gunduk and Jhuraie, and about six miles from each. According to Buchanan, it contains 100 houses, an amount which would assign it a population of 600. Distant S. E. from Goruckpore cantonment 50 miles. Lat. 26° 22', long. 84° 4'.

BHIRANUH.—A village of the British district Hurriana, lieutenant-gov. of the N. W. Provinces. Lat. 29° 33', long. 75° 33'.

BHITARGANAW, in the district of Bainswara, territory of Oude, a town 25 miles S. of Lucknow, 34 E. of Cawnpore. Butter estimates the population at 4,000, of whom fifty are Mussulmans. Lat. 26° 29', long. 80° 54'.

BHITREE, in the British district of Ghazepore, lieutenant-gov. of the N. W. Provinces,

the principal place of the pergunnah of the same name, a small town or village on the route from Benares to Ghazepore, 28 miles N. E. of the former, 17 W. of the latter, and four N. of the left bank of the Ganges. Lat. 25° 35', long. 83° 17'.

BHOEELEE, in the British district of Mirzapore, lieutenant-gov. of the N. W. Provinces, a town the principal place of the pergunnah of the same name, on the river Karamnasa, 10 miles E. of Chunar, 15 S. of Benares. Lat. 25° 6', long. 83° 3'.

BHOGNEEPOOR, in the British district of Cawnpore, the principal place of the pergunnah of the same name, a small town with a bazaar, on the route from Calpee to Cawnpore, and eight miles N. E. of the former. The road in this part of the route is good, the country well cultivated and studded with villages. Lat. 26° 12', long. 79° 51'.

BHOGPOOR, or **BAUGPOOR**, in the British district of Saharunpoor, lieutenant-gov. of the N. W. Provinces, a village on the route from Moradabad to Hurdwar, and 13 miles S. of the latter. It is situate on the right bank of the Ganges, which here, according to Davidson, "is split up into innumerable small and rapid streams, each perhaps eighty yards wide." About three miles below the village is a ferry over the river, there 300 yards wide, rapid, and with a stony bottom. Nearly opposite the village, the Ganges becomes in February fordable for elephants and camels; and in 1828, the laden cattle of Lord Combermere's army forded it there. Bhogpoor was formerly fortified, and three ruinous bastions are yet remaining. Lat. 29° 48', long. 78° 13'.

BHOJPOOR, in the district of Bainswara, territory of Oude, a town five miles from the left bank of the Ganges, 50 S. of Lucknow. Butter estimates its population at 9,000, of whom 150 are Mussulmans. Lat. 26° 8', long. 81° 6'.

BHOJPOOR, in the British district of Moradabad, lieutenant-gov. of the N. W. Provinces, a town on the route from the town of Moradabad to Almora, and nine miles N. of the former. It has a bazaar and a mosque; a proportion of the inhabitants being Mahometans. It was once a flourishing place, but was ruined in the Rohilla war, though still cottons are manufactured and dyed here to a considerable extent. The surrounding country is open, level, and fertile, producing the sugar-cane in perfection. Lat. 28° 57', long. 78° 53'.

BHOJPOOR, in the British district of Shahabad, lieutenant-gov. of Bengal, a town a mile to the right of the route from Dinapore to Ghazepore, 59 miles W. of former, 40 E. of latter. It has 200 houses; and assuming the usually received average of five inmates to each, the population appears to be about 1,000. It is the principal place of a pergunnah of the same name. Lat. 25° 32', long. 84° 11'.

BHOKAREREE, in the British district of Muzaffurnugur, lieutenant-gov. of the N.W. Provinces, a village on the route from Moradabad to the town of Muzaffurnugur, and 14 miles E. of the latter. It is situate near the right bank of the Ganges, in a country partially cultivated. The road in this part of the route is bad. Distant N.W. from Calcutta 942 miles. Lat. $29^{\circ} 30'$, long. 78° .

BHOKUR.—See **KERIAL**.

BHONGAON, the principal place of the pergunnah of the same name, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, is on the route from Futehgurh cantonment to that of Mynpooree, and seven miles E. of the latter. It has a bazaar, and "the remains of a mosque, bespeaking the once respectability of the place," and is well supplied with water. The road in this part of the route is good; the country level, open, and but partially cultivated. Lat. $27^{\circ} 15'$, long. $79^{\circ} 14'$.

BHONTA, in Rajpootana, a town in the native territory of Godwar, distant S.W. from Ajmeer 91 miles. Lat. $25^{\circ} 36'$, long. $73^{\circ} 39'$.

BHONTEE.—A town of Central India, in the native state of Jhansee, distant W. from Jhansee 31 miles. Lat. $25^{\circ} 20'$, long. $78^{\circ} 11'$.

BHOOL.—The capital of the native state of Cutch, a town situate at the base of a fortified hill, and containing about 20,000 inhabitants. Macmurdo observes, that "the town, when viewed from the north, has an imposing appearance; and the number of white buildings, mosques, and pagodas, interspersed with plantations of date-trees, give a stranger an idea of the respectability of the town, which is removed on entering the gates." A Chinese appearance is communicated to the rajah's palace, which is a castle of good masonry, by a coat of enamel which is spread over the cupolas and roofs. A large tank has been excavated to the west of the city. In 1819 a dreadful earthquake took place, which destroyed the fort and principal buildings, and occasioned great loss of life. Lat. $23^{\circ} 13'$, long. $69^{\circ} 44'$.

BHOOM.—A town in Hyderabad, or dominions of the Nizam, distant N.W. from Hyderabad 200 miles. Lat. $18^{\circ} 29'$, long. $75^{\circ} 42'$.

BHOOMPOORA.—A town in the native state of Gwalior, or possessions of Scindia, distant W. from Gwalior 49 miles. Lat. $26^{\circ} 23'$, long. $77^{\circ} 30'$.

BHOOMPUH, in the British district of Muzaffurnugur, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, situate in lat. $29^{\circ} 16'$, long. 78° .

BHOON, in the British district of Ghurwhal, lieutenant-gov. of the N.W. Provinces, a town 38 miles S. of Sreenugur, and 41 miles W. of Almora. Lat. $29^{\circ} 44'$, long. $79^{\circ} 1'$.

BHOONAGEER, or **BHONGIR**, in the territory of Hyderabad, a town at the south-west base of a mountain, distant N.E. from the city of Hyderabad 32 miles. Close to the westward of it is a tank of considerable size, and in the same direction beyond the tank extends a well-cultivated, populous country. Lat. $17^{\circ} 30'$, long. $78^{\circ} 58'$.

BHOONG BARA.—A pergunnah or district of Sindh, in the vicinity of Suhsulcote. It contains fifteen villages, and when subject to the Talpoor amcers of Khyerpoor, yielded an annual revenue of 60,000 rupees. This territory had been wrested by the amcers from the khan of Bhawalpoor, but in the beginning of 1843 the British authorities in Sindh transferred it to Mahomed Bhawl Khan, the ruler of Bhawalpoor, as a reward for his zealous and long-trying friendship. The principal place, Bhoong, is situate on the left bank of the Indus, in lat. $28^{\circ} 24'$, long. $69^{\circ} 50'$.

BHOORA.—A town in the British territory of Nagpoor, distant N.E. from Nagpoor 85 miles. Lat. $21^{\circ} 50'$, long. $80^{\circ} 17'$.

BHOORPAH, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village in the Bhotia subdivision of Juhahir, on the route to Himdies, and 17 miles S. of the Juhahir Pass. It is situate on the left bank of the river Goree, which runs 140 feet below, and is crossed by a bridge close to the village. Elevation of the village above the sea 10,836 feet. Lat. $30^{\circ} 22'$, long. $80^{\circ} 13'$.

BHOORS PEAK, in Sirmoor, a summit of the lower Himalayas, commanding an extensive prospect. On the top is a small Hindoo temple. Elevation above the sea 6,439 feet. Lat. $30^{\circ} 46'$, long. $77^{\circ} 12'$.

BHOOSKEE, in the British district of Patna, lieutenant-gov. of Bengal, a town on the route from Bhagulpore to Patna, 15 miles S.E. of the latter. Lat. $25^{\circ} 27'$, long. $85^{\circ} 27'$.

BHOOSNUGRA, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Allyghur cantonment, 28 miles N. of the former. The road in this part of the route is excellent, the country highly cultivated. Lat. $27^{\circ} 34'$, long. $78^{\circ} 6'$.

BHOPAL.—A native state in Malwa, presidency of Bengal, under the political superintendence of the Governor-General. It is bounded on the north by Gwalior, or the possessions of Scindia, and the British district of Bairsaah; on the north-east and south-east by the Saugor and Nerbudda territory; on the south-west by the possessions of Holkar and of Scindia; and on the north-west by Scindia's districts and Omutwarra. It lies between lat. $22^{\circ} 32'$ and $23^{\circ} 46'$, and long. $76^{\circ} 25'$ and $78^{\circ} 50'$; is 157 miles in length from east to west, and 76 in breadth from north to south. The area is estimated at 6,764 square miles. The extreme southern part of the territory is

a portion of the valley of the Nerbudda, from which river the ground rises northward to the Vindhya range. The greater part of Bhopal lies on the other side of the range, and is a table-land sloping northward from it. The principal rivers which intersect or skirt this territory are the Nerbudda, the Dhasan, the Betwa, the Parbutti, and the Newuj. A considerable portion of the population, as well as the nawaub or sovereign, are of Patan lineage, descended from a colony settled in the territory in the time of Aurungzebe. With these are intermixed Patans, but the great mass of the population is Hindoo. If the relative density of the population be taken at the rate assumed by Malcolm for Central India generally—ninety-eight to the square mile,—the aggregate will amount to 662,872. Bhopal is ruled by a sovereign having the title of nawaub; his revenues in 1843 amounted to 220,000*l*. A school has been established at Sehore, a town distant 20 miles from Bhopal, in which a number of youths now in public employ have been educated. It is proposed to introduce into it the study of English literature.

The state of Bhopal was founded by Dost-Mahammad Khan, an Afghan adventurer, who, having obtained the government of a district in Malwa by the favour of Aurungzebe, succeeded, in 1723, in expelling several Hindoo proprietors. Thereupon he fortified the town of Bhopal, built for his residence the fort of Futtyghur adjoining it, and on the death of Aurungzebe he assumed the title of Nawaub. In 1778, when the British army commanded by General Goddard marched across the greater part of Hindostan, the state of Bhopal was the only Indian power which manifested a friendly spirit; and in 1809, when another British expedition, commanded by General Close, appeared in that part of India, the nawaub of Bhopal earnestly, but in vain, petitioned to be received under British protection. The siege of Bhopal, which followed in 1813, by divisions of Scindia's and the Nagpore army, amounting to fifty or sixty thousand men, is one of the most remarkable in later days; and the conduct of the chief, whose garrison at the commencement of the siege did not exceed eight or ten thousand men, is the theme of praise and the admiration of the Mahomedans of India. The siege lasted nine months, and after it was raised the state appeared destined to enjoy but little repose. In the same year a movement by the disciplined Mahratta battalions of General Baptiste was directed against Bhopal; but the meditated attack was abandoned, and it is believed through the intervention of the British government. These friendly offices led the way to the treaty of 1818. Most of the articles of this treaty are of the usual character,—protection by the British government, and acknowledgment of its supremacy by that of Bhopal, with an understanding for subordinate co-operation. By the last article, excepting that formally announcing its conclusion, and containing the

engagement for the ratification, the British government, on account of the zeal and fidelity of the nawaub, gratuitously bestowed on him in perpetuity the district of Ashta and four others. These districts, which had been taken from the Peishwa, were of considerable value. The prince with whom this treaty was negotiated lived but a short time after its conclusion, having met his death from a pistol accidentally discharged by a child. His nephew, an infant, was thereupon declared his successor, and betrothed to the infant daughter of the deceased prince. An attempt subsequently made to disturb the succession was put down by an intimation that the British government was prepared to maintain his claim, if necessary, by force. "During the minority of the prince," says Sutherland, "the form of administration was somewhat remarkable. The widow of the late nawaub was considered the head of the administration; the other influential persons being a Mahomedan, a Hindoo, and a Christian." Of the last Sir John Malcolm thus speaks:—"Shahzed Musseah, or Belthazzar Bourboun, with whom I am well acquainted. This person, who is an able man and a brave soldier, is the descendant of a Frenchman called Bourboun, who had come to India in the time of the emperor Akber." By the treaty of 1818, article six, it was stipulated that the state of Bhopal should furnish a contingent of 600 horse and 400 infantry, for the service of the British government. In 1824, an arrangement was effected, by which the proportions of the contingent were altered to 300 cavalry and 673 infantry, with two six-pounders manned by twenty gunners. This change was made with the view of operating as an inducement for allowing the force to be placed under European command. According to the latest returns, the contingent at present consists of three troops of cavalry, numbering 259 men; six companies of infantry, 522 men; forty-eight artillerymen, and four European officers. In addition to the contingent, the military force at the disposal of the state, inclusive of the quotas of the jaghiredars, or feudal chieftains, consists of 4,246 men of all arms of the service. In 1827 a new dispute arose. The nawaub had attained an age when he might expect to be admitted to the unrestricted exercise of his authority, but the begum (widow of the late nawaub) refused to surrender it, on the ground, that as the right of the claimant resulted from her adoption of him, it remained in abeyance during her life. She also refused to sanction his marriage with her daughter, and declared the betrothal void, assigning a reason not necessary to be here discussed. The British government expressed an opinion in favour of the claim of the young nawaub, and in opposition to that of the begum, but did not attempt to enforce it, as the only arguments which seemed likely to be effective. The result was, that the begum triumphed, and the once adopted, but now rejected heir, was compelled to forego his pretensions both

to the government and to the begum's daughter, resigning them in favour of a younger brother. When this new candidate attained an age to assert his claims, the begum appeared as unwilling to yield to them as to those of the unfortunate aspirant who had preceded him. On various pleas she postponed the intended marriage of the prince with her daughter, and was evidently determined to retain him as long as possible in a state of pupilage. The marriage, however, at length took place; but this event wrought no change in the feelings of the begum, or, if any, it was that of inflaming her animosity towards the young nawaub. The contest for power continued until the ultimate mode of arbitration was resorted to, and the collision ended in favour of the nawaub. Under this prince an additional sum was set apart for the support of the contingent. But his reign was brief, and on his death the succession passed to his daughter, a child then only six years of age, but who has recently been recognised as the eventual ruler of Bhopal. A regency was of course appointed, and was subsequently replaced by another, including the begum, under which various useful reforms have been effected.

BHOPAL.—The principal place of the territory of the same name. The town is surrounded by a wall of masonry about two miles in circuit, within which is a fort also of masonry, but all much dilapidated. Outside the town is a large gunge or commercial quarter, with wide straight streets, but manifesting like appearances of decay. On the south-west of the town, and on a huge solid rock, is a fort called Futtygurb, having a rampart of masonry with square towers, all much dilapidated, though the residence of the nawaub, the sovereign of the state. On the south-west of the fort is a lake about four miles and a half in length, and a mile and a half in breadth; and on the east of the town another, two miles in length. Both appear to be artificial, yet have considerable depth, and abound in fish and alligators. From the former issues the Bess river; from the latter the Patra. Bhopal is the seat of the British political residency. The place is said to have derived its name from its Rajpoot founder, the minister to the celebrated Hindoo rajah Bhoj. Being noted for its fine tank, it is often denominated Bhopal Tal, or Bhopal's Lake. Distant S.W. from Ailabad 325 miles; S. from Agra, by Saugor, 335; N.W. from Calcutta, by Sumbulpore and Nagpore, 790. Lat. $23^{\circ} 14'$, long. $77^{\circ} 33'$.

BHOPALPOOR.—A town of Omutwarra, in Malwa, tributary to Scindia, situate on the route from Neemuch to Saugor, 157 miles E. of former, 149 W. of latter. It is situate on the right or east bank of the river Newuj, and appears to have been a British cantonment, subsequently done away with, as Garden styles it "old cantonment." Lat. $23^{\circ} 48'$, long. $76^{\circ} 58'$.

BHOPAWAR, in the territory of Gwalior, or possessions of Scindia, a ruinous town containing about 130 houses. It is held by the petty rajah of Amjerrah, who pays an annual tribute of 2,000 rupees. Distant S.W. of Oojein 64 miles, S.W. of Gwalior 330. Elevation above the sea 1,836 feet. Lat. $22^{\circ} 35'$, long. $75^{\circ} 1'$.

BHOPRA, in the British district of Hyderabad, province of Scinde, a town on the left bank of the river Seer, 42 miles S.E. of Tatta. Lat. $24^{\circ} 12'$, long. $68^{\circ} 19'$.

BHOPRA.—See BARPOORUH.

BHORANEE.—A town in the Rajpoot state of Joudpore, distant S.W. from Joudpore 56 miles. Lat. $25^{\circ} 37'$, long. $72^{\circ} 43'$.

BHORASO, in the native territory of Gwalior, a considerable town on the left or west bank of the river Betwa, facing the town of Koorwae, on the opposite bank. Lat. $24^{\circ} 8'$, long. $78^{\circ} 1'$.

BHOREE.—A town in the British province of Nagpore, distant S. from Nagpore 15 miles. Lat. $20^{\circ} 56'$, long. $79^{\circ} 3'$.

BHORE GHAUT, in the North Concan, or collectorate of Tannah, presidency of Bombay, a pass, through the ghauts on the route from Bombay to Poona, 40 miles S.E. of the town of Bombay, and about the same distance N.W. of the town of Poona. It was considered the key of the Deccan in the early wars of the East India Company with the Mahrattas of Poona; and in 1781, General Goddard, under such an impression, proposed to fortify it; but the proposal fell to the ground, being disapproved by the governor and council of Bombay. The pass is now traversed by an excellent road connecting the cities of Bombay and Poona. Sir John Malcolm, to whom the merit of this work is due, observes, "It is impossible for me to give a correct idea of this splendid work, which may be said to break down the wall between the Concan and the Deccan. It will give facility to commerce, be the greatest convenience to troops and travellers, and lessen the expense of European and other articles to all who reside in the Deccan." Tolls are levied at this pass according to rates prescribed by law, and which are to be limited to the amount necessary for keeping the road over the ghaut in good repair. Lat. $18^{\circ} 48'$, long. $73^{\circ} 24'$.

BHOREKPOOR, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a town on the route from Etawa to Futtehghurb, and 14 miles S.W. of the latter. The road in this part of the route is very bad; the country fertile and highly cultivated. Lat. $27^{\circ} 12'$, long. $79^{\circ} 34'$.

BHORUH, in the British district of Goorgaon, lieut.-gov. of the N.W. Provinces, a town on the route from Delhi to Rewaree, 35 miles S.W. of the former. Lat. $28^{\circ} 17'$, long. $76^{\circ} 54'$.

BHORUNPOOR, in the British district of Ghazepoor, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Ganges, 522 miles N.W. of Calcutta by water, or by land 425; E. of Ghazepoor cantonment 50. Lat. 25° 45', long. 84° 33'.

BHOTAN.—A native territory on the north-eastern frontier of Bengal, situate among the mountains forming the southern slope of the Himalayas. It is bounded on the north by Tibet; on the east by tracts inhabited by uncivilized mountain tribes; on the south by the British districts of Assam and Goalpara, and by the native state of Cooch Behar; and on the west by the native state of Sikkim. It extends from lat. 26° 18' to lat. 28° 2', and from long. 88° 32' to long. 92° 30'. Its greatest length from east to west is 230 miles, its breadth 120, and it contains an area of 19,000 square miles. Little appears to be known regarding the political existence of this native state until late in the last century. In 1772, the territory of Cooch Behar being invaded and ravaged by the Booteahs, its ruler had recourse to the British government for military aid, which being granted, the Booteahs were expelled, pursued, and attacked within their own dominions. The Booteahs in their turn solicited the mediation of the authorities of Tibet, who, proposing a cessation of hostilities, a treaty of peace was in 1774 concluded between the British and the rajah of Bhotan. From this period little intercourse appears to have taken place with Bhotan, until the occupation by the British of Assam. In the interim, the Booteahs, taking advantage of the weakness of the native government of Assam, had seized upon several tracts of low lands lying at the foot of the mountains, called *Dooars* or *Passes*; and these were used as the means of committing depredations within the British territories. The mission of Captain Pemberton, for the purpose of putting an end to these grievances, having failed in its object, and all other means of obtaining redress and security proving alike unsuccessful, it became necessary to attack the Dooars, and measures were accordingly taken, by which they were brought under British management.

BHOTIYA COOSY.—One of the principal tributaries of the river Coosy. It rises on the southern face of the main Himalaya range, about lat. 28° 28', long. 86° 15', and flowing through Nepal in a southerly direction for 100 miles, falls into the San Coosy about lat. 27° 28', long. 85° 41'.

BHOUNPAHA, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Seetapoor, and 17 miles S.W. of the former. It is situate on the right bank of the river Gurra, the bed of which is 250 yards wide, and fordable from November to June; the depth of water in that interval being usually about two feet. After the rains have set in, the passage must be made by ferry. The road

in this part of the route is good; the country open, fertile, and cultivated. Lat. 28° 18', long. 79° 49'.

BHOUPURUH, or **BHOPERA**, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to the town of Meerut, and nine miles N.E. of the former. Lat. 28° 42', long. 77° 24'.

BHOUROOPOOR, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 38 miles N.W. of the city of Mirzapoor. Lat. 25° 12', long. 82° 15'.

BHOVANI.—A river taking its rise amongst the southern spurs of the Koondah group of the Neilgherries, about lat. 11° 15', long. 76° 4'. At the Madoor, or Shoondaputty Ghaut, it receives a considerable tributary, and swelling into a large stream, continues an easterly course, and forming a junction with the Moyar near Danaikencotta, it flows into the Cauvery near the town of Bovankudal, after a course of about 120 miles.

BHOWANEETPORE, in the British district of Purneah, lieutenant-gov. of Bengal, a town five miles from the right bank of the Coosy river, 30 miles S.W. of Purneah. Lat. 25° 34', long. 87° 9'.

BHOWANEETPORE.—One of the southern suburbs of Calcutta, and the locality of the asylum in which destitute European and country-born lunatics are maintained at the expense of government. In sanctioning the establishment of a new public asylum of this character, the home authorities have suggested the selection of a more convenient and salubrious site for the building. Lat. 22° 31', long. 88° 25'.

BHOWANNY.—See **BHEWANNEE**.

BHOWAPAR, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a town, the principal place of a pergunnah, on the eastern route from Azimgurh to Goruckpore cantonment, 53 miles N. of the former, 12 S. of the latter. It is situate on the river Raptée, here crossed by ferry. Buchanan, in his report, made forty years ago, states, "Bhowapar, where the office of police stands, contains 125 houses, huddled together, and buried in a thicket, the remains of a hedge by which the town was defended." It has a market; and, allowing six persons to each house, the population appears to be 750. Lat. 26° 40', long. 83° 20'.

BHOWDA, or **BHOURA**.—A jaghire or feudal dependency of Colapore, within the presidency of Bombay. Its centre is in lat. 26° 33', long. 73° 53'. The climate is unhealthy, and the country wild and rugged, a great part being over-run with thick jungle. The people are hardy, and of a warlike temperament; and until lately, travelling through the tract was attended with danger. A line of road intended to traverse it will materially conduce to its improvement.

Where cultivated, the products are rice and the inferior grains. The forests supply the adjacent parts with wood, which is floated down the streams after the monsoon. The revenue is something more than 50,000 rupees, and the military force of the chief amounts to about 500 men.

BHOWGAON, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Ganges, six miles N. of Mirzapoor, or lower down the stream; 714 N.W. of Calcutta by water, or 891 if the Sunderbund passage be taken. Lat. 25° 14', long. 82° 32'.

BHOWNUGGUR, in the British district of Ahmedabad, in the peninsula of Kattywar, a town near the west coast of the Gulf of Cambay. It is situate on a small stream which falls into the gulf at a few miles' distance, and is converted by the tide into a good and safe harbour for shipping; and in consequence is a place of extensive trade. Though under the jurisdiction of the British district of Ahmedabad, it is the residence of the rana or chief of Gohilwar, hence called thakoor of Bhownuggur. Distance from Ahmedabad, S.W., 90 miles; Bombay, N., 200. Lat. 21° 45', long. 72° 10'.

BHOWPOOR, in the British district of Agra, a village on the route from the town of Agra to Jeypore, and 27 miles W. of the former. The road in this part of the route is generally good, though in a few places heavy; the country rather fertile, and highly cultivated. Lat. 27° 3', long. 77° 40'.

BHOWRA.—A town in the native state of Bhopal, distant S.W. from Bhopal 44 miles. Lat. 22° 55', long. 76° 50'.

BHOWREH, in the British district of Poonah, presidency of Bombay, a town on the right bank of the river Beema, 85 miles S.E. of Poonah. Lat. 17° 58', long. 75° 1'.

BHOWURGURREE.—A town in Nagpoor, distant S.E. from Nagpoor 170 miles. Lat. 18° 11', long. 80° 43'.

BHUBEEGHUR, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a town with a fort close to the left bank of the Kalee Nuddee (east), 10 miles E. of Allyghur cantonment, 52 miles N.E. of Agra. Lat. 27° 57', long. 78° 18'.

BHUDDAWUR.—Formerly the designation of a jaghire on the banks of the Chumbul, from which the rajahs of that name derive their title. During the disastrous retreat of Colonel Monson before Holkar, in 1804, the chief of Bhuddawur afforded valuable assistance to Lord Lake's division; and in acknowledgment of past services, the family hold several grants of rent-free land in the district of Agra. The present chief, being a minor, is a ward of the British government, under whose arrangements a suitable education is being bestowed upon the young prince.

BHUDDUR, or **PUDHOR**, in Sirhind, a town thirty-six miles from the left bank of the Sutlej. It belongs to a Sikh chief, who has been deprived of independent authority in consequence of non-performance of feudatory obligations; and with the annexed territory, yields him an annual revenue estimated at 5,000*l*. Distant N.W. of Calcutta, by way of Delhi, 1,060 miles. Lat. 30° 27', long. 75° 19'.

BHUDLEE.—A town in the peninsula of Kattywar, or territory of the Guicowar, under the political management of the presidency of Bombay, distant S.E. from Rajkote 46 miles. Lat. 22°, long. 71° 30'.

BHUDOEE, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a town 20 miles N. from Mirzapoor, 29 miles W. of Benares. Lat. 25° 23', long. 82° 38'.

BHUDOUSA, in the British district of Banda, lieutenant-gov. of the N.W. Provinces, a small town situate on the Bhagee, a tributary of the Jumna, 32 miles S.W. of the right bank of the latter river, 25 miles S.E. of the town of Banda, 80 miles W. of Allahabad. Lat. 25° 15', long. 80° 42'.

BHUDOWLEE, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Ganges, on the route from the cantonment of Mirzapoor to that of Benares, six miles N.E. of the former, 21 S.W. of the latter. The route here crosses the river by ferry. Distant N.W. from Calcutta by water 705 miles. Lat. 25° 13', long. 82° 40'.

BHUDRUCK, in the British district of Balasore, lieutenant-gov. of Bengal, a town on the route from Balasore to Cuttack, 41 miles S.W. of the former. Lat. 21°, long. 86° 39'.

BHUDWAS, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Mynpooree to that of Allyghur, and 34 miles S.E. of the latter. It has water from wells. Lat. 27° 38', long. 78° 35'.

BHUIJEE, or **BEEJEE**, a small hill state, is bounded on the north by Sooket, in the Punjab, from which it is separated by the Sutlej; on the east by the petty chieftainship of Goond, tributary to the state of Keonthal; on the south by Kothee Dhami and a detached district of Pateela; and on the west by Bhagul. It is about twenty miles in length from east to west, and seven in its greatest breadth from north to south. Its area is about seventy miles, its centre lying in about lat. 31° 13', long. 77° 16'. It is a long narrow strip of land, extending along the left bank of the Sutlej, and up the declivity of the mountains which rise south of that river. Previously to the invasion of the Goorkhas, it was one of the twelve lordships occupying the country between the rivers Tonse and Sutlej; and on the expulsion of those aggressors, was by the British government conferred on the

present family. It comprises ten pergunnahs, having a population, estimated, perhaps too highly, at 25,000, and a revenue of 3,000*l.*; out of which a tribute of 144*l.* is paid to the East-India Company. The rana has about 1,000 armed retainers.

BHUGOO, or **BHUGGU**, in the Rajpoot state of Joudpore, a village on the route from Nagor to Bickaneer, and 22 miles N.W. of the former. Lat. 27° 27', long. 73° 37'.

BHUGWANPOOR, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Shahjehanpore, and 15 miles S.E. of the former place. Lat. 28° 10', long. 79° 38'.

BHUGWAN TALAO, in the British district of Mirzapoor, lieut.-gov. of the N.W. Provinces, a village on the route from Mirzapoor cantonment to Saugor, 13 miles S.W. of the former, 74 N.E. of the latter. The route in this part is an excellent made road. Lat. 25° 4', long. 82° 27'.

BHUGWUNPOOR, in the British district of Suharunpore, lieut.-gov. of the N.W. Provinces, a town on the route from Suharunpore to Hurdwar, and 18 miles E. of the former town. Distant N.W. from Calcutta 963 miles. Lat. 29° 56', long. 77° 53'.

BHUGWUNTGURH, in the Rajpoot state of Jeypore, a village on the route from Agra to Boondee, 130 miles S.W. of former, 67 N.E. of latter. It is situate at the base of a hill, on the top of which is a fort. Lat. 26° 9', long. 76° 24'.

BHUKRA, in the British district of Allygurh, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Muttra, and five miles S.W. of the former. Lat. 27° 49', long. 78° 7'.

BHUMAL, in Sirhind, a village on the route from Ludiana to Ferozpoor, and 23 miles W. of the former town. It is situate a mile and a half from the left bank of the Sutlej, in an open country, partially cultivated, and having in general a sandy soil. Distant N.W. from Calcutta 1,125 miles. Lat. 30° 56', long. 75° 32'.

BHUMREE.—A town in the territory of Oude, distant N. from Oude 53 miles. Lat. 27° 34', long. 82° 22'.

BHUNDRI, in Sirhind, a village on the route from Ludiana to Ferozpoor, and 20 miles W. of the former town. It is situate on the left bank of the Sutlej, and seems likely soon to be swept away by the violence of the current. It is mainly built of mud, the roofs of the houses being either of the same material or of thatch. There are a few shops and a mosque; most of the population consisting of Mussulmans, of Rajpoot descent. The population is about 600. Distant N.W. from Calcutta 1,122 miles. Lat. 30° 58', long. 75° 38'.

BHUNEEANA, in the Rajpoot state of Joudpore, a small town on the route from

Pokhurn to Balmeer, and 22 miles S. of the former. It is situate in a depressed tract, traversed by a torrent, the bed of which is devoid of water in the dry season; but in the rainy season there is a considerable current, which was formerly collected by an embankment, so as to form a very large tank. In 1822 the violence of the stream made a breach in the embankment, so that the tank was emptied, and though repaired in the following year at an expense of 400*l.*, it was again, in 1824, rendered useless by a fresh flood, which, making its way through all obstacles, swept over the country and destroyed a village several miles lower down. The tank has not since been repaired; but an abundant supply of good water is obtained from twenty-four wells, most of which are twenty feet deep, and some not more than ten. There is a fort thirty yards long and twenty yards broad, with four bastions, the whole being built of sun-dried brick. The population is about 2,000. Lat. 26° 39', long. 71° 53'.

BHUNGAR, or **MINUS**, in Sirmoor, a stream rising on the eastern declivity of the Chur Peak, in lat. 30° 44', long. 77° 38'. After a course of about fifteen miles in a north-easterly direction, it falls into the Tons, in lat. 30° 46', long. 77° 46'.

BHUNOOR.—A town in the territory of Hyderabad, or dominions of the Nizam, distant S.W. from Hyderabad 128 miles. Lat. 15° 59', long. 77° 6'.

BHURHILA, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Shahjehanpore, and four miles S.E. of the former. Lat. 28° 17', long. 79° 33'.

BHURKHORA, in the British district of Sarun, lieut.-gov. of Bengal, a town six miles W. of the route from Chupra to Bettiah, 22 miles N. of the former. Lat. 26° 5', long. 84° 45'.

BHURMSUR, in the Rajpoot state of Jessulmeer, a considerable village in the great desert, 100 miles N.E. of Jessulmeer. Lat. 27° 42', long. 72° 10'.

BHUROKHAREE, in the British district Kumaon, lieut.-gov. of the N.W. Provinces, a fort on the route from Almora to Bareilly, and 30 miles S. of the former. It is situate on the right bank of the river Bullea or Goula, which here flows to the plain down a beautiful and well-wooded valley. Elevation above the sea 1,709 feet. Lat. 29° 15', long. 79° 36'.

BHUROLE.—A town in Guzerat, or dominions of the Guicowar, distant N.W. from Deesa 40 miles. Lat. 24° 31', long. 71° 30'.

BHURTAPOOR, in the territory of Oude, a town near the northern frontier towards Nepaul. It is situate in a low swampy expanse or island, at the confluence of some large streams, which, flowing from Nepaul, fall into the Gogra at this place. Tieffenthaler mentions, that in his time (eighty years ago) it was

surrounded by a wall. Distant 100 miles N. of Lucknow. Lat. 28° 20', long. 81° 5'.

BHURTPUR, in the British district of Tirhoot, lieut.-gov. of Bengal, a town on the left bank of the river Byar, 24 miles S. of Mozufferpore. Lat. 25° 44', long. 85° 32'.

BHURTPUR.—A native state, named from its principal place, and politically connected with the government of India. It is bounded on the north by the British district Goorgaon; on the north-east by Muttra, and on the east by Agra; on the south and south-west by the Rajpoot states of Kerowlee and Jeypore; on the west by that of Macherry or Alwur; and lies between lat. 26° 43'—27° 50', long. 76° 54'—77° 49'. It is about seventy-seven miles in length from north to south, and fifty in breadth. The area is stated to be 1,978 square miles. The northern part of the territory appears to be for the most part depressed, so as to form an extensive irregular and shallow basin, bounded by low hills, and receiving torrents from Alwur, terminating in the jhils or small lakes of Deeg and its vicinity. The only perennial streams appear to be the Maniani in the north, and the Baun river, with its tributary the Gumir, in the south; but the two latter are mere rills during the dry season. The country suffers from want of water; yet the soil, though in many places sandy, is rendered highly productive by the indefatigable industry of the inhabitants in promoting its irrigation from numerous wells, some of them very deep. Heber says, "The crops of corn now on the ground were really beautiful; that of cotton, though gone by, showed marks of having been a very good one; what is a sure proof of wealth, I saw several sugar-mills and large pieces of ground whence the cane had just been cleared." He adds, that the whole presented a picture of prosperous industry superior to anything which he had been led to expect, or which he had seen in the British territories since leaving the southern parts of Rohilkund. A far less favourable account is, however, given by Sleeman of the aspect and productiveness of the territory; but he appears to have believed that the immediate vicinity of the town of Bhurtpore was improving. The population may be estimated at 600,000 souls. The rajah and most of his people are Jauts, professing Brahminism, with considerable latitude. The revenue of the rajah is stated at about 170,000*l.* per annum. The military force maintained by the rajah consists of 1,500 cavalry, armed with matchlock and sword, 200 artillery, and 1,500 infantry, with a subsidiary corps of about 2,200, maintained for purposes of police and revenue. A few field-pieces in addition complete the military strength of the state.

Probably the first authentic information respecting the remote ancestors of the present possessor of Bhurtpore is to be found in Ferishta, who states, that in 1026 a horde of Jauts or Juts molested Mahmood of Ghuznee

on his return from Guzerat, and was nearly exterminated by him. In 1397, Tamerlane, marching towards Delhi, fell in with and massacred a horde of the same race, then, as well as others of their lineage long after, noted freebooters. In 1525, the army of Baber was harassed by them in his march through the Punjab. Perhaps no race more distinctly exhibits the physical traits of Hindoo lineage, and they may with probability be regarded as the aboriginal population of the plains lying along the Indus and its tributaries. Tod, in *Journal Asiatique*, May, 1827, maintains that the Jauts are of the same stock as the Getas and Massagetæ of the classical writers, the Jutes of Jutland in Denmark, and, consequently, as the Anglo-Saxon conquerors of England. He does not, however, adduce any even slightly plausible grounds for so improbable a notion. In the reign of Muhammad Shah, of Delhi, and in the year 1720, Chooraman, the elected leader of the Jauts, supported the cause of the Seids Husan Ali Khan and Abdullah, who had revolted. He was rewarded for his aid with 200,000 mohurs; but the Seids being overcome, Chooraman incurred the enmity of the padshah. After the death of Chooraman, his son, growing in audacity, disdained to preserve any semblance of subordination towards the court of Delhi. A considerable army was despatched against him, but it was utterly defeated, and a rich booty gained by the Jaut victor. Sooraj Mal, grandson of Chooraman, was favoured by the rajahs of Jeypore, by whose aid the forts of Deeg and Koombher were built, probably about the year 1730. Bhurtpore is noticed as a place of strength about the same time, or perhaps a few years later. Sooraj Mal bore an important part in the distraction which marked the fall of the empire of Delhi. In 1754 he was enabled, by the strength of his forts, to baffle the confederated forces of the Vizier Ghazi-uddin, the Mahrattas, and the Rajpoots of Jeypore, but thought it expedient to soothe his enemies by a payment equal to 70,000*l.* In 1756 he received the title of rajah. Subsequently the power and resources of the Jauts became so considerable, that in 1760, their ruler, Sooraj Mal, rajah of Bhurtpore, as he was now called, joined with 30,000 men the great army of Hindoos, confederated under Sedasheo Bhao, to oppose Ahmed Shah Durranee in his invasion of Hindostan. Alarmed at the misconduct, and irritated at the insolence of Sedasheo Bhao, Sooraj Mal seceded from the confederacy, and thus escaped the carnage of the ensuing defeat at Paniput. It was during the confusion resulting from this battle, and probably in 1761, that Sooraj Mal obtained possession of Agra, by bribing the commander of the garrison; and having thus brought the power of the Jauts to the greatest height which it ever attained, he was soon after killed in action against Nujeeb ad Dawlah, commander of the forces of Delhi. Agra was in 1774 wrested from Nawal Singh, the son of Sooraj Mal, by

Nujeef Khan, nominally the commander-in-chief of the army of Delhi, but in reality an independent potentate. Rennell observes, that previously to this reverse, the Jauts of Bhurt-pore "appear to have possessed a tract of country along both sides of the Jumna river, from the neighbourhood of Gwalior to that of Delhi, in length about 160 miles, and fifty broad." After a period of great distraction, in which several rulers rose and passed away by assassination or casualty, Runjeet Singh, one of the offspring of Sooraj Mal, became rajah of Bhurt-pore about the close of the eighteenth century. The first political relations between the British government and Bhurt-pore appear to have commenced under the rule of this rajah, with whom, in September, 1803, a treaty offensive and defensive was concluded, with proviso, that no tribute should be demanded from him, neither should there be any interference with the internal affairs of his raj; and in the same year the favourable feeling of the British government towards the ruler of Bhurt-pore was shown by a gratuitous grant of twenty pergunnahs in the district of Agra. They were ill bestowed; for in 1804, after some less overt acts of hostility, the artillery of the rajah mounted on the fortifications of Deeg opened on the British troops engaged beneath its walls against the Mahratta army of Holkar. The cavalry of the rajah had also joined that of the Mahratta chief. In consequence of this hostile demonstration, the fortress of Deeg was, towards the close of the year, besieged by the British army under General, afterwards Lord Lake, and carried by storm. In January, 1805, Lake invested the fort of Bhurt-pore, in which, according to native report, were 8,000 men. A breaching-battery of six eighteen-pounders, and one of four eight-inch and four five-and-half-inch mortars, were the means of offence with which operations were commenced against defences of vast size, massive proportions, and singular tenacity. Four successive attempts at storming were with little difficulty repelled by the well-prepared Jauts; and the British army, after a loss of 388 killed, 1,894 wounded, and fifty-two missing,—a total of 2,334, was compelled to retire. Though victorious, the rajah was obviously alarmed by the pertinacity of the besiegers, and his success was followed by overtures for peace. A treaty was accordingly concluded on the 17th April, 1805. The rajah's territory was guaranteed to him; mutual aid was stipulated for, when required by either government; the rajah was bound to pay to the East-India Company twenty lacs of rupees (200,000*l.*), of which three lacs were to be paid immediately, two more in two months, three more in April, 1806, the same amount in the succeeding year, four in 1808, and the remaining five in 1809. As a bonus on good behaviour, the payment of the last instalment was to be remitted in case the rajah's conduct should prove satisfactory; but the territory granted in 1803 to the rajah was

resumed by the British government. In 1825, the death of Rajah Buldeo Singh gave occasion to a dispute respecting the succession. The more powerful party maintained the claim of Doorjun Sal, the deceased rajah's brother. Sir David Ochterlony, the British political agent for Rajpootana, favoured the supporters of Buldeo Singh, the infant son of the late rajah, and to carry his views into effect assembled a well-appointed army of 15,000 men, with a train of 100 pieces of artillery, and marched towards Bhurt-pore; but his operations were peremptorily countermanded by the chief government, though subsequently, towards the close of the same year, indications of hostile feelings in Doorjun Sal appeared to point out the expediency of his depose and the establishment of the infant Buldeo Singh in his place. To effect this purpose, Lord Combermere, commander-in-chief, invested the town with an army computed to exceed 20,000 men, with 112 pieces of ordnance, besides fifty belonging to the horse-artillery. The fire of the besieging batteries, though maintained with great vigour, being found not to make a satisfactory impression on the defences, which were constructed of mud, supported and bound by beams and logs, recourse was had to mining; and on the 18th January, 1826, a mine of great dimensions having been sprung with good effect, the place was stormed and taken, after a desperate resistance made for an hour by the garrison, of whom 6,000 are reported to have been killed. The garrison was computed at the commencement of the siege to amount to 20,000 men; and all who escaped the carnage were made prisoners. The total loss on the part of the British was 103 killed, 466 wounded, and nine missing. Doorjun Sal, attempting to escape, was taken prisoner, with his wife and two sons. The ordnance captured amounted to 133 serviceable pieces, and two broken and dismantled. The amount of prize-money distributed was 481,100*l.* The other Jaut forts, Biana, Waer, Koombher, Deeg, and Kama, were forthwith surrendered. The fortifications of the city of Bhurt-pore were completely dismantled, the infant Bulwunt Singh was established as rajah, and a treaty concluded, by which the indemnification of the British government for the expenses of the war was stipulated for, and the admission of a resident political agent agreed to. Doorjun Sal was deported to Benares, where, until his death, which occurred in 1851, he received from the British government an allowance of 50*l.* per month, his mother and son having an allowance of the same amount for their support. Some years after these transactions, the rajah, Buldeo Singh, on attaining competent age, was admitted to the exercise of the sovereign authority. The British troops were withdrawn; but the reconstruction of the fortifications of Bhurt-pore was interdicted. Buldeo Singh, who was conspicuous for the efficiency of his administration, and for the personal kindness which he manifested in his

intercourse with his subjects, died in 1854, when arrangements were made by the British government for carrying on the administration during the minority of his infant son.

BHURTPORE, the principal place of the territory of the same name, is a rather large town, being three miles in length, one and a quarter in breadth, and about eight in circumference. Its site is somewhat depressed; and this circumstance, in a military point of view, contributes to its strength, as the water of a neighbouring jhil, or small lake, being higher than the ditch of the town, can be discharged into it in such a volume as to render it unfordable. This precaution having been taken on the occasion of Lord Lake's attack in 1805, the difficulty of gaining the breaches was one of the main causes of the ill success of that attempt. A movement to flood the ditch at the commencement of the siege by Lord Combermere in 1825, was rendered abortive by the promptness of a British detachment, which took post so as effectually to prevent the opening of a passage for the flow of water from the jhil. The defences of the town and of the fort within it having been dismantled, those celebrated works are now shapeless piles of mud, and the town itself is merely a great collection of hovels, presenting nothing interesting to the traveller. The dismantled fort, or citadel, contains the palace of the rajah, consisting of "three detached buildings; one for the chief, another for the females of his family, and the third for his court of justice." Tieffen-thaler, writing of its state about seventy years ago, describes it as a town recently built by the Jat ruler, who in a short time converted it from an insignificant place into a populous city, inclosed with a wall and ditch. Notwithstanding the prejudicial effects produced by its capture in 1826, and the meanness of its buildings, Bhurtpore is considered to be still a thriving place, owing probably to its having considerable transit-trade, especially in the salt of the Sambur Lake, in Rajpootana. The population has been estimated at 100,000, which seems a large number for the capital of so small a state, yet may appear the less improbable when the great extent of the town itself is taken into consideration. The place was, after Lord Lake's attack, much enlarged, so that the fort, of which one side then overlooked the country, was subsequently quite inclosed within the city walls. Bhurtpore was probably founded in the early part of the eighteenth century, when the Jats of this part of India were becoming powerful, and was perhaps named after Bharat, a legendary character of great note in Hindoo lore. It is considered to be under the tutelary influence of Krishna, and during the first siege, in 1805, some of the native soldiers in the British service declared that they distinctly saw the town defended by that divinity, "dressed in yellow garments, and armed with his peculiar weapons, the bow, mace, conch, and pipe." Distant W.

from Agra 34 miles, S.W. from Muttra 22, S. from Delhi 119, N.W. from Calcutta by Agra 817. Lat. $27^{\circ} 12'$, long. $77^{\circ} 33'$.

BHURWAREH, in the British district of Tirhoot, lieut.-gov. of Bengal, a town six miles N. of the route from Mozufferpoor to Purneah, 23 miles N.E. of the former. Lat. $26^{\circ} 12'$, long. $85^{\circ} 49'$.

BHURWAROO, in the British district of Humerpore, lieut.-gov. of the N.W. Provinces, a town on the route by Keitha from Jubbulpore to Calpee, 65 miles S. of the latter. Lat. $25^{\circ} 23'$, long. $79^{\circ} 37'$.

BHUTEURA, a village in the hill state of Joobul, Cis-Sutlej territory, is situate on the route from Chepal to Deohra, and four miles N. of the former place. It is laid down in the trigonometrical survey under the name of Briteowry. Lat. $30^{\circ} 58'$, long. $77^{\circ} 40'$.

BHUTNEER, or **BHUTNAIR**.—A town at present belonging to the rajah of Bikaner, but formerly the principal place of Bhuttiana, or the country of the Bhattis or Bhuttis. Tod gives it as his opinion, that "to a colony of this race Bhutnair owes its name, though not its existence." This emigration of the Bhatti Rajputs is stated by Thomas to have taken place about six centuries ago. They permanently established themselves as the predominant class, though the majority are Jats, supposed to be the aboriginal population of the country. Though the surrounding country is now a desert, and water can seldom be met with outside the town at a less distance than twelve miles, it was formerly well watered, cultivated, and populous, as appears from the numerous sites of towns and villages built of excellent brick. The universal desolation and depopulation is attributed by Colvin to the want of water, caused by the inhabitants of the protected Sikh states further north, who, for the purposes of irrigation, dam up the Gagur and other rivers, and cause them to spread over the country, where they are lost by absorption and evaporation. Sharifuddin, however, describing its attack by Tamerlane in 1397, mentions that the surrounding country was then a desert, and that the town was supplied with water from a great lake filled by inundations. He adds, that the transit-trade had rendered it very wealthy. It surrendered to the invaders, who, however, finding occasion for quarrel, began to plunder and massacre the inhabitants; and they in despair having slaughtered their women and children, rushed on the Moguls, great numbers of whom fell, until the Bhattis were slain to a man, and the place so utterly demolished, that no trace remained of human habitation. It was subsequently rebuilt and fortified, and belonged to the maharajah of Bikaner in 1800, when it was attacked by the bold adventurer George Thomas, to whom it capitulated after the rampart had been breached. The Bhattis at that time formed a collection of herds of free-

booters, who held the tract now forming the northern part of Bahawalpore and of Bickaner, the southern of Sirhind, and that part of the British district of Hurriana west of Hansee. Thomas reported them as "cruel in their nature, savage and ferocious in the highest degree; that they have an utter abhorrence of all the usages of civilized life, are thieves from their birth, and scruple not, in their predatory incursions into the neighbouring districts, though unresisted, to add murder to robbery." The greater part of Bhuttiana is now comprised in the British district of that name. Bhutneer is distant N.W. from Calcutta 1,094 miles, N.W. from Delhi 207. Lat. $29^{\circ} 34'$, long. $74^{\circ} 26'$.

BHUTORA, or BETOURA, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Ganges, eight miles N. of the town of Futtehpore. It is a place of some note, and is mentioned by Heber as the station of the civil magistrate of the district at the time when he wrote, about thirty years ago. Distant N.W. from Calcutta, by land 592 miles, by the course of the Ganges 906. Lat. $26^{\circ} 2'$, long. $80^{\circ} 56'$.

BHUTOWLAH, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Allypore to the town of Moradabad, and 29 miles S.W. of the latter. Lat. $28^{\circ} 33'$, long. $78^{\circ} 32'$.

BHUTTEAREE, in the British district of Chittagong, lieutenant-gov. of Bengal, a town on the route from Chittagong to Tipperah, 12 miles N.W. of the former. Lat. $22^{\circ} 30'$, long. $91^{\circ} 49'$.

BHUTTIANA.—A British district in Northern India, subject to the jurisdiction of the lieutenant-gov. of the N.W. Provinces, and so called from having been the possession of the Bhuttis or Bhattis, of Rajpoot descent. It is bounded on the north by the territories of Bahawalpore and the protected Sikh states; on the east by the British district of Hurriana; on the south by the state of Bickaner; and on the west by that of Bahawalpore. It lies between lat. $29^{\circ} 12'$ — $30^{\circ} 29'$, long. $73^{\circ} 1'$ — $75^{\circ} 22'$, and extends from the borders of Hurriana to the river Sutlej. Its outline, which is very irregular, incloses an area of 3,017 square miles. The western part, being the northern skirt of the great sandy desert, is nearly waste and uninhabited. In the middle and eastern parts, the soil, when properly watered, is very productive. The numerous ruins of towns and villages throughout Bhuttiana prove it to have been once prosperous and populous, probably when the river Guggur, flowing by the town of Bhutneer, made its way to the Sutlej above Bahawalpore. That this tract was formerly less arid, is proved by the fact stated by Sharifuddin, that at the time of Tamerlane's invasion, at the close of the fourteenth century, Bhutneer was supplied with water from an extensive lake. George Thomas, when at Bhutneer, was informed that

the Guggur formerly ran along the north side of that place, but that "its channel had been choked up by vast quantities of earth forced down from the mountains; and, according to the prevailing opinion of the natives, though now lost in the sands west of the city, it formerly extended as far as the Sutlej, which it joined in the vicinity of Ferozepore." Measures are in progress for the improvement of the irrigation of the district, by means of channels connected with this river. The Chitang, a river running in some measure parallel to the Guggur, but a little farther east, formerly united with it near Raneah; and a few years ago a canal was made by British engineers, to draw from the canal of Feroz Shah a supply of water to replenish the Chitang, which in this part of its course had been nearly obliterated. The population of this thinly-peopled tract is reckoned at 112,974, of whom 65,363 are Hindoos, and 47,611 Mahometans and others.

The cessions made by Scindia in 1803, under the treaty of Serjee Anjengaum, brought the British into immediate and intimate connection with this country, which they made great efforts to improve; but the lawless and predatory habits of the people long resisted all their attempts. In 1810 it became necessary to march into the country a military force, under Colonel Adams, when the chief, Bahadur Khan, was expelled; but his son, Zabeta Khan, having submitted unconditionally, the greater part of the country was placed under him. It however remained in an unquiet and unsettled state, and within a very few years it became necessary formally to undertake the task of defining its boundaries and those of the neighbouring states; disturbance and confusion having produced their usual effects in obliterating them. A strip of land on the Sutlej, required for the continuation of the British customs line to that river, was readily ceded by the rajah of Bahawalpore in 1844, and constitutes the north-western angle of Bhuttiana.

BHYNIS, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly, and 19 miles N.E. of the former. Lat. $27^{\circ} 22'$, long. $78^{\circ} 15'$.

BHYNTHUREE, in the native state of Nepal, a fort on the summit of a mountain two miles E. of the left bank of the Kalee (eastern), 14 miles E. of Potorabgureh cantonment. Elevation above the sea 5,615 feet. Lat. $29^{\circ} 34'$, long. $80^{\circ} 30'$.

BHYRAH, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town on the route from Patna to Carrace, 64 miles N.E. of the former. Lat. $25^{\circ} 51'$, long. $86^{\circ} 16'$.

BHYROWALAH.—A village in the Punjab, at a ferry over the Beas river, here found to be 740 yards wide when crossed by the British mission under Elphinstone, in the end of July, at which season the water is highest. The current was so rapid on that occasion, that several of the boats employed were swept ten

BHY—BIG.

miles down the stream. Though the river is so formidable, the boats are wretched craft, no better than small rafts, with a plank one foot high all round, and draw only six inches water. Lat. $31^{\circ} 25'$, long. $75^{\circ} 13'$.

BHYRVEE.—A river of Nepal, rising in lat. $29^{\circ} 16'$, long. $81^{\circ} 58'$, and, flowing in a south-westerly direction for about seventy miles, falls into the Kurnalli in lat. $28^{\circ} 38'$, long. $81^{\circ} 17'$, on the borders of Oude.

BHYS, or **BHAIS**.—A small river, the head-water of which is supplied from the tank of Bhopal, in lat. $23^{\circ} 14'$, long. $77^{\circ} 22'$. Flowing north-east for forty-five miles, it falls into the Betwa, on the left side, near the town of Bhilsa, and in lat. $23^{\circ} 32'$, long. $77^{\circ} 50'$.

BHYSONDAH.—See **BYNSONT**.

BIANA, in the territory of Bhurtpore, a town on the route from Agra to Mhow, 50 miles S.W. of the former. It is situated on an eminence in a small plain, between two ranges of hills, running in some measure parallel to each other, and in a direction from north-east to south-west. The town contains many temples, and the whole ridge of the hill is covered with the remains of large buildings; among which, the most remarkable is a fort containing a high pillar of stone, called Bhim Lat, or the Staff of Bhim, conspicuous for a great distance through the country. This place was formerly of much greater importance; its downfall was hastened by the rajah of Bhurtpore, who, in the middle of the last century, expelled from it a considerable number of its Mussulman inhabitants of Afghan descent. Latterly, however, it appears to have revived; it is now of considerable size, and possesses some large well-built houses of stone. It is mentioned by Ferishtah as a place of importance in 1491, when it stood a siege against Sikandar Lodi, the Patan monarch of Delhi. Baber describes it in 1526 as one of the most famous forts in India. It was at that time held by an Afghan chief, who surrendered it to Baber. In the following year a very sanguinary and obstinately-contested battle was fought near this town, between Baber and Rana Sanka, the Rajpoot prince of Oodeypoor, who was ultimately defeated with great slaughter. Biana is distant N.W. from Calcutta 851 miles. Lat. $26^{\circ} 57'$, long. $77^{\circ} 20'$.

BIANS.—See **BEEANS**.

BIARMI, or **BEARMA**.—A river rising amidst the Vindhya range, in the Saugor and Nerbudda territory, at an elevation of 1,700 feet above the sea, and in lat. $23^{\circ} 20'$, long. $79^{\circ} 3'$, and taking a north-east course of about 110 miles, falls into the Sonar, on the right side, in lat. $24^{\circ} 20'$, long. $79^{\circ} 55'$. About ten miles lower down, or farther north-east, the united stream falls into the Cane. The slope of its channel is 700 feet.

BICCAVOLE, in the British district of Rajahmundry, presidency of Madras, a town

18 miles E. from Rajahmundry, 16 miles N.W. of Coringa. Lat. $16^{\circ} 57'$, long. $82^{\circ} 6'$.

BICHNEE.—See **BIKAIRI**.

BICHOLIM, in the Portuguese territory of Goa, a town on the route from the seaport of Agoada to Belgaum, distant N.E. from the former 14 miles, N. from Goa 8 miles. Lat. $15^{\circ} 36'$, long. $74^{\circ} 1'$.

BICKANEER.—See **BEEKANEER**.

BICKRAMPOOR, in the British district of Southern Cachar, lieutenant-gov. of Bengal, a town 52 miles E. from Sylhet, 13 miles N.W. of Silchar. Lat. $24^{\circ} 55'$, long. $92^{\circ} 42'$.

BIDDREE.—A town in the Southern Mahratta jaghire of Jamkunder, presidency of Bombay. It is situated on the north or left bank of the river Kistnah, 14 miles E. from the town of Jamkunder. Lat. $16^{\circ} 32'$, long. $75^{\circ} 31'$.

BIDHNOO, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a town on the route from the cantonment of Banda to that of Cawnpore, and 11 miles S. of the latter. Lat. $26^{\circ} 20'$, long. $80^{\circ} 19'$.

BIDJEY GURH, or **BIJGARH**, in the British district of Mirzapore, lieutenant-gov. of the N.W. Provinces, a ruinous fortress "on the top of a high mountain, covered from its base to its summit with wood," and most difficult of access. In the autumn of 1781, Cheyt Singh, the refractory zeminder of Benares, took refuge in this fort, where he had previously placed his family and the greater part of his treasure; but Major Popham having advanced to invest it, the zeminder took to flight, with everything valuable which he could remove. The place was, however, defended for a time in the names of the wife and mother of the fugitive, who remained, but finally surrendered. The fort is situated nine miles N. of the left bank of the river Son, and 50 S. of Benares. Lat. $24^{\circ} 34'$, long. $83^{\circ} 9'$.

BIDJWASIN, in the British district of Delhi, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to Rewari, and 15 miles S.W. of the former. Lat. $28^{\circ} 30'$, long. $77^{\circ} 7'$.

BIDOULEE, a small town in the British district of Muzaffernuggur, lieutenant-gov. of the N.W. Provinces, is situated on the route from Kurnal to Meerut, and 13 miles S.E. of the former. It has a bazaar, and is abundantly supplied with water. Lat. $29^{\circ} 34'$, long. $77^{\circ} 10'$.

BIGAHPPOOR, in the district of Bainswara, territory of Oude, a town four miles N.E. of the left bank of the Ganges, 40 S.W. of Lucknow. Butler estimates the population at 6,000, including 100 Mussulmans. Lat. $26^{\circ} 24'$, long. $80^{\circ} 33'$.

BIGANBAREE, in the British district of Mymensing, lieutenant-gov. of Bengal, a town on the left bank of the Kunkas river, 19 miles N. of Jumalpoor. Lat. $25^{\circ} 10'$, long. 90° .

BIGGAREE.—A canal of irrigation, in the Shikarpoor district of the province of Sind, issuing from the Indus in lat. $28^{\circ} 3'$, long. $69^{\circ} 6'$, and having a course of about thirty miles.

BIGHEURA, in the British district of Purneah, lieutenant-gov. of Bengal, a town on the right bank of the river Nagore, 32 miles S.E. of Purneah. Lat. $25^{\circ} 32'$, long. 88° .

BIGROULI, in the hill state of Joohul, Cis-Sutlej territory, under British protection, a considerable village on the route from Chepal to Deohra, and five miles N. of the former. It has a romantic site on the right bank of a stream called the Nar, and is inhabited by Brahmins. Lat. $31^{\circ} 1'$, long. $77^{\circ} 38'$.

BIHAR, or **BAHADURGANJ**.—A town and fort in the territory of Oude, 75 miles S. from Lucknow, and 44 miles N.W. from Allahabad. Population 10,000. Lat. $25^{\circ} 50'$, long. $81^{\circ} 24'$.

BIHTA, in the district of Bainswara, territory of Oude, a village on the left bank of the river Sai, 55 miles S.E. of Lucknow, 60 N.W. of Allahabad. It is noted for its manufacture of salt. Lat. $26^{\circ} 10'$, long. $81^{\circ} 20'$.

BIJAHUREE, in the British district of Allygurb, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Allygurb cantonment, and 15 miles S. of the latter. Lat. $27^{\circ} 42'$, long. $78^{\circ} 9'$.

BIJAWUR, in Bundelcund, the principal place of the small territory of the same name, is situate in a mountainous tract 23 miles S. of Chutterpore, 70 N.E. of Saugor, and in lat. $24^{\circ} 37'$, long. $79^{\circ} 31'$. The small raj or state of which it is the capital lies between lat. $24^{\circ} 22'$ and 25° , long. $78^{\circ} 58'$ and $79^{\circ} 50'$, and was supposed, in 1832, to contain 920 square miles and 344 villages, with a population of 90,000 souls. In 1849 it was reported to yield a revenue of 22,500*l*. This state pays no tribute, but maintains a force of 100 horse and 1,300 foot. The right of the rajah, a Boondela Rajpoot, results from his descent from Dewan Beer Singhe Deo, natural son of Juggut Raj, son of Chuttur Sal, the founder of the short-lived independence of Bundelcund. After the acquisition of Bundelcund by the East-India Company, a grant was made in 1811, confirming the right of Rutten Singh, then rajah; on whose death without issue, in 1833, his nephew succeeded.

BIJAYANAGAR.—A ruined city, formerly the metropolis of the Brahminical realm of Bijayanagar, or Carnata, the power of which was destroyed in 1565, at the battle of Talicot, by a confederacy of the Mussulman kings of the Deccan. Lat. $15^{\circ} 19'$, long. $76^{\circ} 32'$.

BIJBAHAR, or **VIGIPARA**, in Kashmir, the largest town in the valley, after the capital, is situate on the banks of the Jailum, about 25 miles S.E. of the city of Kashmir. Over the river here is one of those singular and simply-constructed timber bridges, which, notwith-

standing the apparently frail nature of their fabric, have endured for centuries, in consequence of the exemption of the country from storms or inclement weather. There is nothing else worthy of notice except a considerable bazaar. Lat. $33^{\circ} 47'$, long. $75^{\circ} 13'$.

BIJEYPOOR, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a town three miles S. of the route from Mirzapoor to Allahabad, 15 miles W. of the former. Lat. $25^{\circ} 8'$, long. $82^{\circ} 24'$.

BIJIPOOR.—A town in the native state of Gwalior, or possessions of Scindia, distant S.W. from Gwalior 52 miles. Lat. $26^{\circ} 2'$, long. $77^{\circ} 28'$.

BIJNA, in Bundelcund, a town on the route from Banda to Jhansi, 95 miles W. of the former, 40 E. of the latter. It is the principal place of a jaghire or feudal possession, which, despoiled of several villages by the state of Jhansi, is now comprised within an area of twenty-seven miles, containing six villages, with a population of 2,800 souls, and yields a revenue of 8,000 rupees (800*l*). This jaghire was formerly tributary to Jhansi, but in 1821 the obligation for the annual payment of 2,500 rupees was cancelled in consideration of the value of the resumed villages. The military force maintained consists of 125 foot and fifteen horse, with two guns. The grant was made by the East-India Company in April, 1823, in favour of the Dewan Soorjun Singh and Dewan Beeje Bahadoor. Bijna is in lat. $25^{\circ} 27'$, long. $79^{\circ} 5'$.

BIJNEE.—A town in the native state of Bhotan, the principal place of a subdivision of territory of the same name, distant N.E. from Goalpara 20 miles. Lat. $26^{\circ} 23'$, long. $90^{\circ} 50'$.

BIJNOUR, in the territory of Oude, a town on the route from Allahabad to Lucknow, 114 miles N.W. of the former, 14 S. of the latter. Lat. $26^{\circ} 44'$, long. $80^{\circ} 59'$.

BIJNOUR, a British district, lieutenant-gov. of the N.W. Provinces, is bounded on the north-east by the British district of Gurhwal; on the east and south-east by the British district of Moradabad; on the west by the British districts Meerut, Mozuffurnugur, and Saharunpore; and lies between lat. $28^{\circ} 54'$ — $29^{\circ} 58'$, long. $78^{\circ} 1'$ — $78^{\circ} 53'$. The area is stated to be 1,904 square miles. The soil and climate are well suited to the growth of the sugar-cane, the produce of which is in much demand, and is considered little inferior to that of the West Indies. Cotton is cultivated to considerable extent, as is also wheat for exportation, especially to the west. Under the existing revenue settlement of the North-West Provinces, no increase of the land assessment in this district can take place until the year 1866. The rivers are the Koh and the Ramgunga. The amount of population, according to the returns of 1853, is 695,521.

Bijnour is part of the territory bearing the name of Rohilcund, from the Rohilla Patans, who in the last century held sway there. In 1774 their power was broken by the defeat which they received from the British, and the country became subordinate to the nawab of Oude. Finally, in 1802, it was ceded to the East-India Company by the ruler of Oude, and embodied with the British territories.

BIJNOUR, the station of the civil authorities in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, is situated on the route from Moradabad to Mozuffurnugur, and 31 miles S.E. of the latter town. Distant N.W. from Calcutta 800 miles. The population is returned at 11,745 inhabitants. Lat. 29° 22', long. 78° 11'.

BIJOLEE, in the territory of Gwalior, a village on the route from Calpee to the fort of Gwalior, 16 miles E. of latter, 112 W. of former. Lat. 26° 13', long. 78° 24'.

BIJOLLEE.—A town in the Rajpoot state of Oodeypore, distant N.E. from Oodeypore 101 miles. Lat. 25° 7', long. 75° 20'.

BIJOWLEE, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Ganges, 774 miles N.W. of Calcutta by the river route, 34 S.E. of the city of Allahabad by the same. Lat. 25° 18', long. 82° 11'.

BIJOWLEE, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawa to Calpee, and 12 miles S.E. of the former. Lat. 26° 41', long. 79° 13'.

BIKAIRI, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a village on the route from Mirzapoor to Saugor, 235 miles S.W. of former, 27 E. of latter. Elevation above the sea 1,263 feet. Lat. 23° 53', long. 79° 13'.

BIKANPOOR, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to the town of Meerut, and 18 miles N.E. of the former. Lat. 28° 45', long. 77° 31'.

BIKARAH, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a town on the route from Lucknow, in Oude, by Nannamow Ghat, to Etawa, and 30 miles E. of the latter. Lat. 26° 45', long. 79° 39'.

BIKEEAKEE SYN, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Ramgunga river, 22 miles N.W. of Almora. Lat. 29° 42', long. 79° 20'.

BIKONTPORE, in the British district of Dinajepore, lieutenant-gov. of Bengal, a town on the right bank of the Teesta river, 78 miles N. of Dinajepore. Lat. 26° 43', long. 88° 36'.

BIKRAMPPOOR, in the British district of Beerbhoom, lieutenant-gov. of Bengal, a town on the route from Burhampoor to Kishnugur, 32

miles S. of the former. Lat. 23° 37', long. 88° 23'.

BIKUMPOOR, in the Rajpoot state of Jessulmere, a fort in the sandy desert, 95 miles N.E. of the town of Jessulmere. It has a wall of rubble-stone twenty-five feet high and a hundred yards square, with very small bastions, and occupies the whole of an eminence in such a manner that the flat summit is level with the terre-plein of the rampart, and the exterior acclivity of the eminence gives the defence a rather stiff section. On the north-east angle is a round tower of considerable height, extensively overlooking the surrounding country. There are four guns mounted in various parts of the fort, which is garrisoned by a force not exceeding 100 men, in the service of the rawul of Jessulmere. The place, though having a rather imposing appearance, has little real strength, being completely commanded by sandhills at a short distance. At the south-east of the fort is a small town, containing about 220 houses. Population 965. Lat. 27° 43', long. 72° 16'.

BILAREE, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Coel to Moradabad, 14 miles S. of the former. Lat. 28° 36', long. 78° 53'.

BILARIMOW, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawa to that of Cawnpore, and 39 miles W. of the latter. Lat. 26° 21', long. 79° 51'.

BILGY, in the British district of North Canara, presidency of Madras, is situated on a stream a tributary of the river Tudri. The surrounding country is mountainous, being a rugged plateau formed by an expansion of the ghats, here of less elevation than in most other parts. Contiguous to the town is a difficult part of the route from Canara to Mysore, and hence denominated the Passes of Bilgy. The area of the talook of Bilgy is 256 square miles, and the population, according to official return, 17,345, indicating a relative density of 67 to the square mile. The town of Bilgy is distant from Bombay, S.E., 340 miles; from Madras, W., 380. Lat. 14° 23', long. 74° 52'.

BILHAWALLA, or BILLABAREE, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Almora, and 20 miles N. of the former. Heber, who mentions it under the name of Belagary, observes, "I was pleased with the appearance of the houses, which, though very humble, were all in good repair, showed abundance of buffaloes in their little courtyards, and were kept with a degree of cleanliness and smartness." Lat. 29° 5', long. 78° 58'.

BILHEKI, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a town on the route by the Bhurindeo Pass from Bareilly to Pitoragurh, and 43 miles S. of the

latter. Its elevation above the sea is 740 feet. Lat. 28° 59', long. 80° 5'.

BILHOUR, or **BILOUR**.—A considerable town in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, on the route from Cawnpore to Futtehghurh, and 34 miles N.W. of the former. The town contains a population of 5,045. Lat. 26° 50', long. 80° 9'.

BILLASPOOR, in Sirhind, a village on the route from Suharunpoor to Subathoo, and 33 miles N.W. of the former place. It is a poor collection of mud-built houses, though the principal place of a small district yielding an annual revenue of 1,300*l.*, which has lately escheated to the East-India Company, in consequence of the failure of heirs to the late Sikh proprietor. Distant N.W. from Calcutta 991 miles. Lat. 30° 20', long. 77° 22'.

BILLOWNAN, in the British district of Aligurh, lieut.-gov. of the N.W. Provinces, a village on the route from Futtehghurh to Meerut, and 83 miles N.W. of the former. Lat. 27° 52', long. 78° 32'.

BILLOWTEE, or **BILOTHE**, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a village on the route from Muttra cantonment to Delhi, and 17 miles N.W. of the former. Lat. 27° 40', long. 77° 36'.

BILOHI, or **BOWLEE**, in the British district of Mirzapore, lieut.-gov. of the N.W. Provinces, a village on the route from Mirzapore to the town of Rewa, and 48 miles S.W. of the former. It is remarkable for a cascade of the Sunpaira, a small river, which, tumbling over the brow of the Kutra range, falls nearly perpendicularly from a height of 398 feet in its course, to discharge itself into the Adh, a tributary of the Bilund. Elevation above the sea 1,128 feet. Lat. 24° 41', long. 82° 19'.

BILRAM, or **BILGRAM**, in the British district of Budaon, lieut.-gov. of the N.W. Provinces, a town on the route from Futtehghurh to Meerut, and 70 miles N.W. of the former. Lat. 27° 49', long. 78° 39'.

BILSEE, in the British district of Budaon, lieut.-gov. of the N.W. Provinces, a town on the route from Futtehghurh to Moradabad, containing a population of 5,206. Distant 13 miles N.W. of Budaon. Lat. 26° 9', long. 79°.

BILWA, or **BELAWA**, in the British district of Goruckpore, lieut.-gov. of the N.W. Provinces. Buchanan describes it as a small, poor place, with a petty fort, consisting of a ditch and an earthen rampart, with a strong hedge of thorny bamboos on the counterscarp. Distant S.E. of Goruckpore cantonment 20 miles. Lat. 26° 38', long. 83° 43'.

BIMCHUTUR, in Buassahir, a halting-place on the southern declivity of the Yoo-soo Pass. It is situate amidst groves of pine, oak, and birch trees, in a beautiful sequestered glen, sheltered from the chilling winds, and ending on the north-east in a bare, rocky, and steep

mountain. Elevation above the sea 11,950 feet. Lat. 31° 20', long. 78° 6'.

BIMLIPATAM, in the British district of Vizagapatam, presidency of Madras, a town on the coast of the Bay of Bengal, 16 miles N.E. of Vizagapatam. Lat. 17° 52', long. 83° 30'.

BINDACHAL, in the British district of Mirzapore, lieut.-gov. of the N.W. Provinces, a town on the route from Allahabad cantonment to that of Mirzapore, 53 miles S.E. of the former, and eight W. of the latter. The town is situate on the right bank of the Ganges, 456 miles N.W. of Calcutta. Lat. 25° 10', long. 82° 30'.

BINDACHAL.—A range of mountains in and adjacent to Bundelcund, of the locality of which Franklin gives the following description:—"They commence at Kesogar, five miles north of Seunda, on the Sindh river, and making a circuitous sweep by Narawar, Chandri, Hirapur, Rajghar, Ajeyghar, and Calanjara, they cease near Barghar to belong to Bundelcund, and continue their course by Bindhyavasini and Tara, until they approach the Ganges at Surajghara, and again at Rajmahal." The appearance of the plain of Bundelcund, partially inclosed by these barriers, is said to be highly picturesque, resembling a vast bay of the sea indenting the land, but bounded and restrained by the heights by which it is skirted. Towards the south-east, the south, and south-west, the table-land is bounded by mountains rising above it to a moderate height, and denominated the Panna range.

BINDIA NOWAGURH.—See **NOWAGURH**.

BINDKEE KHAS, in the British district of Futtehpoor, lieut.-gov. of the N.W. Provinces, a small town on the route from Futtehpoor to Calpee, and 17 miles N.W. of the former. The surrounding country is level and cultivated. Lat. 26° 3', long. 80° 40'.

BINDORE, in the British district of Dinajepore, lieut.-gov. of Bengal, a town on the route from Dinajepore to Purneah, 30 miles N.W. of the former. Lat. 25° 43', long. 88° 10'.

BINDOUR, in the British district of Futtehpoor, lieut.-gov. of the N.W. Provinces, a town on the left bank of the Jumna, at the confluence of the small river Kind, 17 miles W. of the town of Futtehpoor. Lat. 25° 54', long. 80° 34'.

BINDRABAN, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a town beautifully situate on the right bank of the Jumna, and four miles E. of the route from Muttra to Delhi. The water of the river being held sacred by the Hindoos, numerous devotees visit it for the purpose of ritual ablution, access being afforded to the stream by numerous fine ghats or flights of steps, constructed of red stone, brought from Jeypore,

nearly 150 miles distant. These ghats extend for nearly a mile along the river, and are provided with numerous dewasthans, or fanees, for the more convenient performance of rites by the devotees. The ground-plan of the principal temple is cruciform, resembling that of a Gothic church, but of no great dimensions. From its vaulted roof depend numerous idols, rudely carved in wood, and the supporting pillars and walls are covered with coarse sculptures. Two other buildings, being cylindrical towers rounded off at the top, resemble in shape the celebrated black pagoda of Juggernath and the temples of Bhobaneser, but are inferior in dimensions to those extraordinary structures. There are a great number of other edifices connected with Hindoo mythology; and these become continually more numerous, as various rajahs, or other wealthy persons, from time to time build and dedicate fanees of costly and elaborate workmanship to the varied objects of their superstitious reverence. Crowds of pilgrims from all parts of India frequent this town to offer their devotions, especially to Krishna, who, according to the legend, here slew the great serpent Kaliya Naga, which, lying across the Jumna, stopped its course and poisoned the water. Here also he spent his youthful years, sporting with the Gopis or milkmaids, and playing on musical instruments. A tree is still pointed out, at the foot of which he sat, and among the branches of which the marks of his flute are said to be seen. In honour of the divinity, a festival is held from the tenth day of the light half of Kuar (September and October) to the day of the full moon, at Bindabran, where a stone platform or stage has been built for the exhibition of the mimic dance, in a square near the river-side. Here also was a favourite resort of Rama, who conquered Ravana, the giant tyrant of Lanka, or Ceylon, with the aid of Hanuman, the monkey-shaped divinity, and his grotesque followers; and in recognition of those auxiliary services, the monkeys which crowd the luxuriant groves around the town are regularly fed and protected by the Brahmins, principally from a fund provided from an endowment made by the celebrated Mahratta chieftain Madhajee Scindia. One of those creatures was treated with peculiar attention, as its lameness, caused by an accidental hurt, was considered a point of resemblance to their benefactor Madhajee, who, in his flight from the battle of Paniput, was overtaken by an Afghan, who with a battle-axe gave him so severe a cut on the right knee, that he was for life deprived of the use of the leg of that side. The population of the town has been returned at 19,776 inhabitants. It was sacked in 1757 by a detachment of 25,000 Afghan cavalry, sent by Ahmed Shah Durranees, under the command of Jahan Khan, who put many of the inhabitants to the sword, burned many in their houses, drove off others into slavery, and slaughtering kine, defiled the temples of the Hindoos with the blood of those animals, regarded sacred by

them. *Distant N.W. from Calcutta 823 miles, S. from Delhi 92. Lat. 27° 34', long. 77° 45'.

BINEKA, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Saugor to Shahgurb, 20 miles N.E. of the former. Lat. 24° 4', long. 78° 55'.

BINJOLEE.—A town in the British territory of Nagpore, distant N.E. from Bustar 15 miles. Lat. 19° 18', long. 82° 10'.

BINOA, a river in the Northern Punjab, rises near the southern bank of the Ravee, and, flowing south-east for about fifty miles, falls into the Beas, east of Tira, and opposite Kumla Gurb, in lat. 31° 48', long. 76° 38'. Like all the streams of the Himalaya, it varies greatly in volume, according to the season, being fordable in cold weather, but in the hot season, in consequence of the melting of the snow, becoming a deep and rapid stream.

BINSUR PEAK, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a summit of the Sub-Himalaya, or range south of the main chain. Distant N.E. of Almorah nine miles. Elevation above the sea 7,969 feet. Lat. 29° 42', long. 79° 48'.

BIRAHNA, in the British district of Aligurb, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Aligurb to that of Muttra, and 12 miles N.E. of the latter. Lat. 27° 34', long. 77° 54'.

BIRCHIGUNG, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, an elevated pass on the route from Almorah and fort to the course of the river Goree and route Dhura Pass, to South-western Tibet, 114 miles N.E. of Almorah. It lies over the skirts of two great summits of the main range of the Himalaya, designated in Webb's survey peaks Nos. 16 and 17, and having respectively the heights above the sea of 18,166 and of 19,225 feet. The elevation of the crest itself of the pass is estimated by Manson at 15,000 feet. He describes the conformation of the rock as clayslate, talc, slate, and greywacke, and near the top of the pass a few blocks of quartz, all totally bare of vegetation. Lat. 30° 12', long. 80° 17'.

BIRIMDEO, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the river Kalee, 47 miles S.E. of Almora. Elevation above the sea 798 feet. Distant N.W. from Calcutta, by Bareilly, 842 miles. Lat. 29° 7', long. 80° 18'.

BIRJOO, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village in the Bhotia subdivision of Juwahir, on the route to Hiundes, and 14 miles S. of the Juwahir Pass. It is situated on the left bank of the Goree, about a mile below its confluence with the Gunkha. Elevation above the sea 11,314 feet. Lat. 30° 23', long. 80° 12'.

BIRKOOTE, in the British district of Beerbhoom, lieutenant-gov. of Bengal, a town on the line of railway now under construction from Burdwan to Rajmahal, 83 miles N. of the former. Lat. 24° 24', long. 87° 48'.

BIRMEE, in the British district of Ramgur, lieutenant-gov. of Bengal, a town on the left bank of the Barrachur river, 42 miles N.E. of Hazareebagh. Lat. 24° 17', long. 86°.

BIRMSIR.—A town in the Rajpoot state of Jessulmeer, distant N.W. from Jessulmeer 11 miles. Lat. 27° 3', long. 70° 53'.

BIRSILPOOR, in the Rajpoot state of Jessulmere, a small town on the route from Bahawalpoor to Bap, and distant 90 miles S.E. of the former. It has a fort situate on a small eminence, rising to the height of about twenty feet. The town, situate at the south and east faces of the fort, contains 400 houses, many shops, and eleven wells sixty feet deep, but with water so salt as to be scarcely usable; so that the inhabitants are generally supplied from reservoirs of fresh water on the north-west side of the town. A high sandhill, a mile south-west, completely commands the whole place. On the top of it the emperor Humayun is said to have encamped nearly 400 years ago, but was refused admission into the fort. The place is of great antiquity, having been built, according to native report, in the second century of the Christian era. The chief professing a nominal subjection to the emperor, in 1835 civilly received Boileau, a British officer of engineers engaged on a mission in those regions. Birsilpoor has a population of 2,005 persons. Lat. 28° 11', long. 72° 20'.

BIRSINGPOOR, in Bundelcund, a town on the route by the Kuttra Pass and Rewa, from Mirzapoor to Loharganow, 100 miles S.W. of Mirzapoor. It belongs to the rajah of Punnah. Elevation above the sea 1,064 feet. Lat. 24° 48', long. 81° 1'.

BIRSINGPOOR, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the river Rind, 17 miles S. of the cantonment of Cawnpore. Lat. 26° 13', long. 80° 21'.

BISALA, in the Rajpoot state of Joudpore, a small town on the route from Pokhurn to Balmer, and 16 miles N. of the latter. It is situate at the base of a rocky ridge of considerable height, stretching southward for about twenty miles. It has a small hill-fort, and contains above two hundred houses, supplied with water from wells. Lat. 25° 55', long. 71° 23'.

BISANUH, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Allyghur cantonment, and 25 miles N. of the former. Lat. 27° 29', long. 78° 7'.

BISARO, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on

the route from Meerut to Muttra, and 42 miles N.E. of the latter. Lat. 28° 1', long. 77° 57'.

BISAUT, in the native state of Gurwhal, a village on the western declivity of the mountain bounding the fertile valley of Banal on the eastern side. Lat. 30° 50', long. 78° 16'.

BISENTAUR, in the Peshawur division of the Punjab, a town situated on the route from Jhelum to Rawul Pindee, 30 miles N.W. of the town of Jhelum. Lat. 33° 24', long. 73° 20'.

BISEORA.—See **BESSERAH**.

BISHENPORE, in the British district of Bancoora, lieutenant-gov. of Bengal, a town on the route from Berhampore to Midnapore, 95 miles S.W. of former, 48 N. of latter. It is a large town, and has a bazaar, and is situate on the right bank of the river Dalkisore, 20 miles S.E. of the town of Bancoora. Lat. 23° 4', long. 87° 21'.

BISHWUR.—A town in Hyderabad, or dominions of the Nizam, distant N.W. from Hyderabad 212 miles. Lat. 19° 59', long. 76° 51'.

BISKOHR, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Goruckpoor to Buraech, 66 miles N.W. of the former. Lat. 27° 19', long. 82° 38'.

BISNATH, in the British district of Durrung, lieutenant-gov. of Bengal, a town on the right bank of the Brahmapootra, on the route from Durrung to Luckimpoor, 70 miles N.E. of the former. Lat. 26° 40', long. 93° 10'.

BISOWLEE.—A town in the British district of Budaon, lieutenant-gov. of the N.W. Provinces, 22 miles N.W. of Budaon. Lat. 28° 18', long. 79°.

BISRAMGUNGEE, in Bundelcund, a village in the native state of Punna, on the route from Banda to Jubbulpore, 50 miles S. of the former, 181 N. of the latter. It is beautifully situate in a wooded gorge, through which the ascent commences from the plains of Bundelcund to the plateau on the summit of the range styled by Franklin the Pannah Hills. Lat. 24° 50', long. 80° 19'.

BISSEE.—A town in the British territory of Nagpore, distant S.E. from Nagpore 42 miles. Lat. 20° 38', long. 79° 29'.

BISSEMCUTTACK.—A town in the hill zemindary of Jeypoor, on the north-east frontier of the presidency of Madras, distant N. from Ryaguddah 23 miles. Lat. 19° 30', long. 83° 35'.

BISSLY, in the territory of Mysore, a small town on the south-west frontier, towards Coorg, situate in a pass through the Western Ghats, on the route from Bangalore to Mangalore, 136 miles W. of former, 60 E. of latter. Lat. 12° 45', long. 75° 45'.

BISSOWER, or **BUSAWUR**, in the territory of Bhurtpoor, a town on the route from

Agra to Ajmer, 63 miles W. of former, 165 E. of latter. Heber, who calls it Peshawer, describes it as very prettily situated on the side of a little rocky eminence, with a ruinous palace on its summit. There is a bazaar. The transit-trade is considerable, especially in cottons sent from Malwa and Rajpootana eastward, towards the Jumna. Lat. 27° 2', long. 77° 7'.

BISSOWLEE.—See **BISULI**.

BISTH JULINDER.—See **JULINDER DOAB**.

BISULI, or **BISSOWLEE**.—A town in the north-east of the Punjab, and on one of the southern ranges of the Himalaya, situate on the river Ravee, which is here about eighty yards wide. There is a large irregularly-built bazaar, but the place is chiefly remarkable for the huge palace of the rajah, regarded by Vigne as the finest building of the kind in the East; "exhibiting in its square turrets, open and embattled parapets, projecting windows, Chinese-roofed balconies, and moat-like tank in front," a striking likeness to the great baronial mansions which in some parts of Europe remain as memorials of the feudal ages. Lat. 32° 33', long. 75° 28'.

BISWAH, in the territory of Oude, a town on the route from Seetapoor to Sekrora, 20 miles S.E. of the former, 60 N.W. of the latter, 45 N. of Lucknow. Lat. 27° 29', long. 81° 5'.

BISWUK, in the British district of Patna, lieutenant-gov. of Bengal, a town on the route from Behar to Gayah, 20 miles W. of the former. Lat. 25° 8', long. 85° 18'.

BITHOOR, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, is situate on the right bank of the Ganges, 12 miles N.W. of Cawnpore cantonment. It has numerous Hindoo temples, and several ghats or flights of steps, giving access to the sacred stream, to which the Brahmans and their followers frequently resort for the purpose of ritual ablution. Brahma is particularly revered here. At the principal ghat, denominated Brahmavertta Ghat, he is said to have offered an aswamedha on completing the act of creation. The pin of his slipper, left behind him on the occasion, and now fixed in one of the steps of the ghat, is still worshipped there; and on the full moon of Agrahayana (November-December), a very numerous-attended mela or meeting, that mixes piety with profit, is annually held at that place. Upon the death of Maharajah Bajee Row, in 1851, the jaghire, situate close to the town, which had been bestowed upon him during pleasure, lapsed to the government, and was subjected to the general regulations in force in Cawnpore. The population of Bithoor is returned at 13,580. Lat. 26° 37', long. 80° 20'.

BITTER STREAM.—A torrent rising in the Sulicman range, lat. 31° 30', long. 69° 58', and flowing through Daman about forty miles,

loses itself in the sands before reaching the Indus.

BLACK ROCK.—Situate a few miles off the shore of Arracan, and to the north of Cape Negrais. Lat. 16° 11', long. 94° 16'.

BLACKWOOD'S HARBOUR, on the coast of Coromandel, situate to the north of Point Pondy, and sheltered by the Arnegon Shoal. According to Horsburgh "between the inner edge of the shoal and the coast is a space from three to four miles wide, called Blackwood Harbour, with soundings from four and a half fathoms near the shore, to six or seven fathoms contiguous to the edge of the shoal." Lat. 14° 1', long. 80° 14'.

BLUVANUGIRI, in the British district of South Arcot, presidency of Madras, a town on the route from Tranquebar to Vicravandy, 32 miles N.W. of the former. Lat. 11° 28', long. 79° 43'.

BLUE MOUNTAIN.—A lofty peak rising to the height of 8,000 feet above the level of the sea, and forming part of the range of the Youmadoung Mountains. Lat. 22° 37', long. 93° 10'.

BLUFF POINT.—A bold headland on the coast of Amherst, one of the districts of the Tenasserim provinces. Lat. 15° 47', long. 97° 45'.

BOAD.—One of the Cuttack mehals, in the district of Cuttack, under the political control of the government of India. It became subject to British supremacy upon the conquest of the province in 1804. Its area is 1,377 square miles, and its population has been estimated at 61,965 persons. The town is situate on the river Mahanuddy, navigable for river craft of considerable burthen from the sea to this place, a distance of 190 miles. It was formerly a more important place than at present; as there are numerous ruined temples; but it is still the residence of a petty rajah tributary to the British government, and is described as a large fenced village. Distant from Cuttack, W., 100 miles; Nagpore, E., 330; Calcutta, S.W., 285. Lat. 20° 53', long. 84° 20'.

BOANUH, in the British district of Delhi, lieutenant-gov. of the N.W. Provinces, a town on the Western Jumna Canal, 17 miles N.W. of Delhi. Lat. 28° 48', long. 77° 5'.

BOBEENA.—A town of Bundelcund, in the native state of Jhansi, distant S.W. from Jhansi 18 miles. Lat. 25° 15', long. 78° 33'.

BOBILEE.—See **DOBBILL**.

BODEGAUM.—A town in Hyderabad, or dominions of the Nizam, distant N.E. from Ahmednuggur 50 miles. Lat. 19° 20', long. 75° 30'.

BODEN.—A town in Hyderabad, or dominions of the Nizam, distant N.W. from Hyderabad 100 miles. Lat. 18° 40', long. 77° 57'.

BODWUR, in the British district of Khandesh, presidency of Bombay, a town on the route from Aurungabad to Boorhanpoor, 80 miles N.E. of the former. Lat. $20^{\circ} 51'$, long. $75^{\circ} 59'$.

BODYNAIKENOR, in the British district of Madras, presidency of Madras, a town 52 miles W. of Madras, 49 miles S.W. of Diindigul. Lat. $10^{\circ} 1'$, long. $77^{\circ} 24'$.

BOENCHIE, in the British district Hooghly, under the lieut.-gov. of Bengal, a town on the route from Calcutta to Burdwan. It has a bazaar, and water may be obtained in abundance from a large tank. Distant from Calcutta, N.W., 46 miles; from Burdwan, S.E., 35. Lat. $23^{\circ} 6'$, long. $88^{\circ} 15'$.

BOGAREA, in the British district of Bhagulpore, lieut.-gov. of Bengal, a town on the route from Burhanpoor to Bhagulpore, 22 miles S. of the latter. Lat. $24^{\circ} 54'$, long. $86^{\circ} 55'$.

BOGOORAH, or **BOGRAH**, within the territory subject to the lieut.-gov. of Bengal, a district named from its principal place. It is bounded on the north by the British districts Dinajpore and Rungpore; on the east by the river Kosi, a branch of the Brahmapootra, separating it from the British district Mymensing; on the south by the British districts Mymensing and Pubna; on the south-west by the British district Rajshaye; and on the west by the British district Dinajpore. It lies between lat. $24^{\circ} 36'$ — $25^{\circ} 19'$, long. $88^{\circ} 45'$ — $89^{\circ} 48'$, and has an area of 2,160 square miles. It is traversed or skirted by numerous rivers, among which may be mentioned the Konaie, the Gogot, the Kurateea, the Jamuna, and the Atteea. The climate is extremely hot before the rains set in, about the middle of June. They continue until October, when the cool season commences, during which warm clothing and fires at morning and evening are indispensable to comfort. Bogoorah is, throughout, a level alluvial tract. Rice is the principal crop; the sugar-cane is also grown to considerable extent in the north-western quarter of the district. Mulberry plantations are extensive, and the trees constitute a great ornament of the country, besides yielding the food of the silkworm, the produce of which, though coarse, is strong and durable, and finds a ready market, at remunerating prices. Hemp is cultivated on account of the narcotic and intoxicating qualities of its resinous sap. Cotton is grown to some extent; indigo to a still greater. The amount of the population will be found under the article **BENGAL**. The district was acquired in 1765 by the East-India Company, by virtue of the firman or grant from Shah Allum, of the dewanny of Bengal, Behar, and Orissa.

BOGOORAH, or **BOGRAH**, in the British district of the same name, a town on the route from Berhanpoor to Jumalpoor, 129 miles N.E. of the former, and 54 S.W. of the latter.

It is situate on the Kuratiea, a large river, navigable for craft, during the rainy season, of the largest size employed in inland navigation. It has a bazaar, and supplies are abundant; but it is a place of no importance otherwise than as the seat of the civil establishment. Distant N.E. from Calcutta 247 miles. Lat. $24^{\circ} 50'$, long. $89^{\circ} 22'$.

BOGSADALLEE.—A town in the native state of Bhotan, distant N.W. from Behar 41 miles. Lat. $26^{\circ} 32'$, long. $88^{\circ} 53'$.

BOGWANGOLA, in the British district Moorshedabad, lieut.-gov. of Bengal, a town on the right bank of the Ganges, the channel of which is here subject to such great and sudden changes as sometimes to sweep away the towns situate on its banks. From this circumstance, Bogwangola, though a thriving place, and a great mart for grain, with which it supplies the neighbouring town of Moorshedabad, has "more the appearance of an encampment than a town." It has, however, a pleasing aspect, consisting of neat though humble cottages, with sides of matting, and "scattered very prettily over a large green common, fenced off from the river by a high grassy mound." Distance N. from Calcutta 120 miles. Lat. $24^{\circ} 20'$, long. $88^{\circ} 20'$.

BOHAN DEVI, in the native state of Curwhal, a village amidst the mountains near the south-western frontier, and between the Jumna and Bhagirathi, as the Ganges is called in the upper part of its course. The village is so called from a temple dedicated to a deity named Bohan. Lat. $30^{\circ} 30'$, long. $78^{\circ} 18'$.

BOHANEENGUNJ, in the district of Ahladganj, territory of Oude, a town 32 miles N.W. of Allahabad, 77 S.W. of Oude. Butler estimates the population at 6,000, of whom a third are Mussulmans. Lat. $25^{\circ} 48'$, long. $81^{\circ} 34'$.

BOHAURY, in the British district of Broach, presidency of Bombay, a town on the route from Surat to Baunada, 36 miles S.E. of the former. Lat. $20^{\circ} 56'$, long. $73^{\circ} 22'$.

BOHELLAH.—A town in Nagpore, distant W. from Konkeir 40 miles. Lat. $20^{\circ} 18'$, long. $81^{\circ} 9'$.

BOHROOPAH, in the British district of Cuttack, lieut.-gov. of Bengal, a town on the route from Ganjam to Cuttack, five miles S. of the latter. Lat. $20^{\circ} 24'$, long. $85^{\circ} 53'$.

BOILCOONTLA, in the British district of Kurnool, presidency of Madras, a town on the route from Kurnool to Ongole, 48 miles S.E. of the former. Lat. $15^{\circ} 24'$, long. $78^{\circ} 40'$.

BOIRONEE, in the British district of Ganjam, presidency of Madras, a town situate 25 miles N.W. of Ganjam. Lat. $19^{\circ} 35'$, long. $84^{\circ} 50'$.

BOJAPOMAH.—A town of Eastern India, situated in the territory inhabited by the Naga tribes, 60 miles N. from Muneepoor, 81 miles

S.E. from Nowgong. Lat. $25^{\circ} 40'$, long. $98^{\circ} 50'$.

BOKER, BILUND, or BEYLUN.—A river rising in the British district of Mirzapore, lieut.-gov. of the N.W. Provinces, among the mountains of Gondwana, and about lat. $24^{\circ} 40'$, long. $83^{\circ} 20'$. It takes a westerly course, and, passing from the frontier of the district of Mirzapore into that of Allahabad, falls into the river Tons (south-western), in lat. $25^{\circ} 2'$, long. $81^{\circ} 53'$, after a total length of course of about 138 miles. It is the Belund of the surveyor-general's map; Bailan of Franklin; Belun of Garden, who mentions it as crossed in lat. $24^{\circ} 57'$, long. $82^{\circ} 18'$, by the route from Allahabad to Jubbulpore, by the Kutra Pass.

BOKERDHUN.—A town in Hyderabad, or dominions of the Nizam, distant N.E. from Aurangabad 42 miles. Lat. $20^{\circ} 18'$, long. $75^{\circ} 50'$.

BOKOWLI, in territory of Bhurtpore, a village on the route from Agra to Mow, 32 miles S.W. of former. Indifferent water may be had from wells, and supplies may be collected from the surrounding country. Lat. $27^{\circ} 1'$, long. $77^{\circ} 36'$.

BOKPYN CREEK.—An inlet of the sea on the coast of Mergui, one of the Tenasserim provinces. Its mouth is in lat. $11^{\circ} 17'$, long. $98^{\circ} 50'$.

BOKRAWALI, in the British district of Allypore, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Delhi, and five miles N.W. of the former. Lat. $27^{\circ} 56'$, long. $78^{\circ} 5'$.

BOKUR.—A town in Hyderabad, or dominions of the Nizam, distant E. from Nandair 23 miles. Lat. $19^{\circ} 12'$, long. $77^{\circ} 43'$.

BOLACOLE, in the British district of Pubna, lieut.-gov. of Bengal, a town on the right bank of the river Konaie, 36 miles E. of Pubna. Lat. $24^{\circ} 6'$, long. $89^{\circ} 45'$.

BOLAN PASS, in Beloochistan, on the great route from Northern Sindh, by Shikarpore and Dadur, to Kandahar and Ghuznee. It is not so much a pass over a lofty range, as a continuous succession of ravines and gorges, commencing near Dadur, and first winding among the subordinate ridges stretching eastward from the Hala chain of mountains, the brow of which it finally cross-cuts, and thus gives access from the vast plain of Hindostan to the elevated and uneven tract extending from the Hindoo Koosh to the vicinity of the Indian Ocean. Its commencement on the eastern side, from the plain of Cutch Gundava, is about five miles west of Dadur, and in lat. $29^{\circ} 30'$, long. $67^{\circ} 35'$; the elevation of the entrance being about 800 feet above the level of the sea, and that of its outlet at the western extremity, 5,793 feet. There is no descent on the western side, as the route opens on the Dasht-i-Bedowlut, a plain as high as the top of the pass. The total length is between fifty-four and fifty-five miles; the average ascent

ninety feet in the mile. The Bengal column of the Army of the Indus in 1839 spent six days in marching through the pass, entering it on the 16th, and leaving it on the 21st of March. Its artillery, including eight-inch mortars, twenty-four-pounder howitzers, and eighteen-pounder guns, was conveyed without any serious difficulty. The eminences bounding the pass have in general no great height above it, in most places not exceeding 500 feet; but at Beebee Nanee, twenty-six miles from the entrance, they are very lofty. The Bolan Pass, though very important in a military point of view, as forming the great communication between Sindh and Khorasan, is inferior in a commercial interest to the Gomul, farther north, through which the Lohani Afghans, in their annual migrations, conduct the main portion of the traffic between Hindostan on the one point, and Afghanistan and Central Asia on the other. The western extremity and highest point of the Bolan Pass is in lat. $29^{\circ} 56'$, long. $67^{\circ} 6'$.

BOLAPILLY, in the British district of Cuddapah, presidency of Madras, a town 80 miles N. of Cuddapah, 61 E. of Kurnool. Lat. $15^{\circ} 40'$, long. 79° .

BOLARUM, in the territory of the Nizam, a military cantonment for the troops in the service of that prince, a short distance from the city of Hyderabad. It is situated on an elevated ground of granitic formation, six or eight miles in circumference, and having on its summit an open plain extending to the east of the cantonment. The lines can accommodate two battalions of infantry, a risalah or troop of irregular horse, and 250 artillery. There is a well-constructed hospital in an airy situation, having accommodation for 150 patients. The gardens produce in abundance and excellence the usual kinds of European vegetables, besides the common Indian fruits. Mangoes attain great perfection. Grapes, pine-apples, and strawberries, also thrive well; and a few peaches have been grown, but not of good quality. No rank vegetation is permitted to spring up in the cantonment; the hedgerows are annually cut down to a certain height: the place is consequently open, and thus rendered in a great measure free from the sources of noxious exhalations. It is one of the healthiest stations in the Deccan, and invalids resort to it from various places. The medical school formerly existing in this place was abolished in 1847, and a new school of medicine substituted at Hyderabad, in which are taught anatomy, chemistry, pharmacy, the practice of medicine and surgery. On the 21st September, 1855, a mutiny broke out in one of the cavalry regiments of the Hyderabad force, when Brigadier Colin Mackenzie, commanding the southern division of the contingent, was desperately wounded, and narrowly escaped with his life. Elevation above the sea 1,890 feet. Distance from Hyderabad, N., 11 miles; Secunderabad, N., six. Lat. $17^{\circ} 30'$, long. $78^{\circ} 34'$.

BOLAVY, in the British district of North Canara, presidency of Madras, a town on the left bank of the Cauhy Nuddy, 41 miles N. of Honahwar. Lat. $14^{\circ} 58'$, long. $74^{\circ} 22'$.

BOLEPORRA, in the British district of Cuttack, lieut.-gov. of Bengal, a town on the left bank of the Mahanuddy river, 50 miles E. of Cuttack. Lat. $20^{\circ} 24'$, long. $86^{\circ} 40'$.

BOLIMA, a town in the native state of Kashmere, or dominions of Gholab Singh, distant N. from Jhelum 41 miles. Lat. $33^{\circ} 37'$, long. $73^{\circ} 38'$.

BOLL GHUR, in the British district of Pooree, lieut.-gov. of Bengal, a town 44 miles S.W. from Cuttack, 45 miles N.W. of Juggernaut. Lat. $20^{\circ} 10'$, long. $85^{\circ} 20'$.

BOLONGO, or **BORONGO ISLAND**.—The most westerly of a group known by the name of the Broken Islands, lying at the entrance of the Arracan river. Between this island and Middle Bolongo there is good anchorage, sheltered from all winds but the south. The island is mountainous, woody, rugged, and without any appearance of inhabitants or cultivation: its centre is about lat. 20° , long. 93° .

BOMBAY.—One of the three British presidencies of India, and so denominated from its principal place, the city of that name. Exclusive of the subordinate territories of native princes, over which the East-India Company exercises paramount political sway, and of Sind, which, though recently placed under the government of Bombay, may properly be regarded as a distinct territory, the tracts subject to the Bombay presidency form a narrow strip, of irregular outline, stretching for a considerable distance from north to south. This territory is bounded on the north by the possessions of the Guicowar and by Indore, belonging to the family of Holkar; on the east by part of the possessions of the Scindia family, by Indore, by the dominions of the Nizam, and by the territories subject to the presidency of Madras; on the south by the Madras territories, by the Portuguese possessions attached to Goa, and by Mysore; and on the west by the Arabian Sea, the Gulf of Cambay, and Guzerat. Its greatest length, in a direction nearly from south-east to north-west, is about 660 miles; its greatest breadth, from Oolpar, in the district of Surat, to a point near Boorhanpoor, on the Taptee, 240. The area of the country within the above limits which is directly subject to the British government, is 67,945 square miles: if the territories administered by or on behalf of native princes, including those of the Guicowar, be included, the area will be 124,265 square miles: if Scinde be added, the entire area will be 176,365. In proportion to its area, the Bombay territory has the advantage of an extensive seacoast, reaching from south to north, from near Vingoria, adjoining the Goa frontier, in lat. $15^{\circ} 44'$, to Cambay, at the

head of the gulf of the same name, in lat. $22^{\circ} 16'$, a distance of 480 miles; in addition to which, along the western side of the Gulf of Cambay, is a seacoast of eighty miles. This large extent of coast is well supplied with havens, including Dewghur, Geriah, Jygurh, Rajapur, Choul, Bombay, Bassein, Damaun, Surat, Broach, and several others of less importance. None of these, however, with the exception of that of Bombay, can be approached or quitted with safety during the prevalence of the south-west monsoon. A continuation of that bold lofty range of mountains known by the name of the Western Ghats, though that name is appropriated more peculiarly to the southern part of the range, the more northern being called by the natives the Siadri Mountains, runs in some measure parallel to the coast, and, on an average, about forty-five miles from it.

The climate at Bombay Island, and generally along the coast, is sultry, the average temperature of the whole year being about 80° , and the lowest not under 70° . The greatest heat, however, falls considerably below that of many other parts of India, and seldom exceeds 100° . The quantity of rain is for the most part very great; in one year (1831) it amounted at Bombay to 99.64 inches. This, however, is considerably in excess of the usual amount. In 1838 the fall was only 50.78 inches; and the result of a series of observations, commencing with the former year and terminating with the latter, was to exhibit various fluctuations between the two extremes which have been quoted. In some later years, however, the fall seems to have been much greater than an average framed upon such data, and even considerably beyond the highest amount in the above series. A statement more recently published gives the fall in one year at Mahabulshwar at 248 inches; at Rutnagherry, 130; and at Tanna, 106 inches. A statistical memoir, published some years ago, gives the average fall of rain at Bombay at 80 inches. The zoology of this part of India appears to have received but little attention. A curious species of maneless lions is found in Guzerat, along the banks of the Saburmuttee, near Ahmedabad: tigers and leopards are numerous in various parts, and very destructive. There are also wolves, hyenas, jackals, wild swine, wild buffaloes, porcupines, the nylgau, monkeys, and other quadrumanous animals. Among domestic animals the horse formerly held a high place. The horses of Kattywar shared the celebrity of those of the Deccan, whence the supplies for mounting the vast cavalry establishments of the native princes were obtained. The extinction of the authority of some of those princes, together with the decline of others, and the establishment of general peace under the paramount influence of the British government, have probably been the cause of the declension which has taken place in the quality of the native horses, which are now of an

inferior description. The East-India Company have made various efforts to restore their character, especially by the establishment, in the year 1827, of a stud at Alligaum; but the experiment having been carried on for some years, at great expense, and without any advantage, it was ultimately abandoned, and the stud establishment abolished. The other domestic animals to be enumerated are buffaloes, camels, kine, swine, and sheep. A series of experiments, extending over several years, were carried on by government for the improvement of this last description of animal, by the introduction of the superior breeds of Europe and the Cape; but with little effect. Wool, however, is one of the exports of Bombay. The staple crops are rice, bajra, jowar, barley, gram, kodroo, and some inferior grains. Cotton of the indigenous species is extensively grown in various parts of the presidency. The American varieties have been introduced with much advantage, especially in the collectorate of Dharwar and other parts of the Southern Mahratta country. The native sugar-cane flourishes in some of the collectorates. In the zillah of Poonah the cultivation of the Mauritius cane has greatly diminished, the cause being attributed to the poverty of the Deccan soil north of the Krishna. Wheat is produced generally in the northern parts of the presidency, and is extensively cultivated in the provinces of Guzerat, where it may be seen even to the border of the sea. It is stated, however, to deteriorate during a sea-voyage, and to be unsuitable to the English market. Coffee flourishes in Belgaum; but for its successful culture neither the soil nor climate of the Deccan north of that collectorate is well fitted. The other products are chiefly tobacco, oil-plants, and indigo. Complete success has attended the introduction of the potato in the collectorates of Poona and Kaira. The chief markets for the root are Bombay, Poona, Dhoolia, Aurungabad, Jaulna, and Hingolee. Experiments for the cultivation and preparation for the English market, of flax and the Syrian tobacco, have proved unsuccessful. The mulberry was some time since introduced in the elevated tract about Poona, with a view to the production of silk, but the experiment has altogether failed.

Among the trees found in the Bombay territories are the teak, bombax, *Adansonia Dalbergia*, *Suritenia febrifuga*, acacias of various kinds, especially the catechu, the *Bassia latifolia* or mhowa, bearing a vast profusion of flowers, the petals of which, when dried, resemble raisins in appearance and taste, and are largely consumed as food as well as for distillation, by which process a spirit is obtained which furnishes the most usual intoxicating beverage of the natives. The importance of trees, in so far as they furnish articles of food, or timber for the various purposes to which that article is applied, are too obvious to have been overlooked in any age, however low its rank in point of inter-

mation. The indirect advantages of those beautiful productions of nature have been ascertained and admitted only at a period comparatively modern. Humboldt, and subsequently other writers, have shown that trees perform important functions in regard to the productive powers of the soil and the character of the climate, as well in influencing the supply of one of the first and most indispensable necessities of animal existence,—water. In every place where trees have heedlessly been extirpated, the supply of water has been reduced, the fertility of the soil has been diminished, and the character of the climate has deteriorated. Their preservation is consequently an object deserving attention, not only on the ground of their direct utility, but as possessing perhaps even a stronger claim on account of the indirect blessings of which they are the instruments. The authorities of India have not been insensible to these claims upon their notice. In March, 1844, the Court of Directors authorized the unappropriated surplus of the annual grant of 5,000 rupees to the Agricultural Society of Western India to be devoted to the plantation of useful trees in different parts of the presidency. In June, 1845, a scheme was drawn up for carrying out the measure under the above sanction, and operations were commenced in April, 1846. A public notice was also issued, in which, after assuring the people of the interest taken by the government in the promotion of measures tending to their amelioration and comfort, rules were promulgated pointing out the evils arising from the scarcity of trees, and encouraging individuals, by the offer of rewards and other marks of public approbation, to plant trees on their own lands. Besides roadside trees and scattered plantations, the Bombay territory possesses many wooded tracts of sufficient magnitude to be termed forests. The position of the port of Bombay as a great naval depôt would naturally direct attention to such descriptions of timber as might be beneficially employed in shipbuilding; and the conservation of the forests within the presidency was formerly deemed an object of importance, and officers were appointed for this duty by the local government. About the year 1824 the conservator's establishment was broken up, probably in consequence of the discontinuance at Bombay of building line-of-battle ships for the Crown. After the lapse of twenty years, however, the want of such an institution became apparent; an establishment for the conservation and management of the forests of the Bombay presidency was then organized, and Dr. Gibson, superintendent of the Botanical Gardens, was in 1847 appointed conservator of forests.

Manufactures, of which there were formerly some of importance, have generally yielded to the competition of the cheaper fabrics of Britain. Surat, long celebrated for its cotton goods, now produces scarcely any. Boorhan-

poor has from the same cause lost the silk manufacture, which it formerly carried on to a considerable extent. Paper is made at Poona. The manufactures of the presidency may, however, be regarded as of slight importance in a commercial point of view, being restricted to such branches as are indispensable in each locality; and cotton and other raw materials being shipped for Britain to be manufactured, and sent back for the use of those inhabiting the place where the article was raised.

The trade with other parts of India, as well as with Great Britain and foreign countries, is considerable. The principal articles of export are cotton, wool, Cashmere shawls, opium from Malwa, coffee, pepper, ivory, and gums. The chief imports are piece-goods, thread, twist, and yarn (of all which the quantities imported from Great Britain are very large), metals, raw silk from China and the eastward, tea, wine, and beer. The value of the foreign export trade of Bombay has more than doubled in the last twenty years, and now amounts to about 7,000,000*l.* sterling. Several sources contribute to the supply of the government revenue; among these the principal are the land assessment, customs duties, salt-excite, and opium passes or permits for the transit of the drug from Malwa to Bombay. The government revenue from all sources is returned at about four millions and a half sterling.

Considerable efforts have been made of late years by the government to improve the means of communication. The principal roads are—1. From Bombay over the Bhor Ghaut to Poona, and thence diverging in various directions, to Sattara, Sholapore, Ahmednuggur, and Narrayangaum. 2. The Bombay and Agra road, traversing the presidency in a north-easterly direction, and affording facilities for the exchange of the produce of Berar and the northern parts of the Deccan for that of the more western districts. 3. The route northward from Bombay to Surat, Broach, and Baroda. 4. From the port of Vingorla, *vid* Belgaum, to Dharwar, and continued thence to Hooblee, one of the great cotton marts of the Southern Mahratta country; beyond which it joins the road leading to the port of Coomta, in North Canara. In furtherance of the comprehensive system of railways which has been projected for India, a line was some time since commenced from Bombay in a north-easterly direction, under the auspices of the Great Indian Peninsula Company. A portion of the line has been opened. It proceeds towards the Ghauts, where it crosses the mountains by two separate branches, one of which is destined to join the line from Calcutta, and the other that from Madras. The former will communicate by a branch line with the cotton district of Berar. A second line is also under construction, under the superintendence of the Bombay, Baroda, and Central India Railway Company. The works are at present confined to the section between Surat, Baroda, and Ahmedabad, but it is contemplated to extend

this line southerly to Bombay, and northerly to Delhi. Mordee Bay, now inundated by the sea, has been pointed out as the most eligible site for the terminus of the railway at Bombay. A project has been accordingly sanctioned for recovering this locality from the sea; and a portion of the space reclaimed is to be appropriated for the purposes of the railway.

The population of the southern part of the presidency of Bombay is principally Mahratta, and consists generally of cultivators of the soil. The branches of the Ghauts, stretching out to the eastward from the main range south of the town of Sattara, are held by Ramosees, a hill-tribe more civilized and subdued than the Bheels. They do not extend further south than Colapore, or further east than Beejapoor, and have no language but that of the Mahrattas, whom they resemble in dress and manners. In the Southern Concan the majority of the population is Mahratta; that tract, and a portion of the Ghauts and Deccan to the east of it, being the original and peculiar seat of the race. The north-eastern portion of the Bombay dominions, comprising the greater part of the valley of the river Taptee, including the extensive basin or valley of Candesh, is partly inhabited by the Bheels, who are considered to be an eighth of the whole population of that district. Farther west and north-west, in the collectorates of Broach, Ahmedabad, Surat, and Kaira, this aboriginal population is found intermingled with some other rude tribes, denominated Coolies, Doonjas, Chowdrias, Dooblas, and Koonbies, besides Grasias, sunk still lower in barbarism than the original race, and Brahminists, Jains, Bhoras, a peculiar class of Mussulmans; Mussulmans of other descriptions, generally descended from Arabians; Sindhians, Beloches, or Mekranis. In the city of Bombay and its vicinity, besides the Brahminists and Mussulmans constituting the bulk of the population, there are Christians of the Romanist, Protestant, and Armenian persuasions; a considerable number of Parsees, and some Jews.

For the superintendence and good government of the ministers of the United Church of England and Ireland, in the presidency of Bombay, the Crown was empowered, under the act of 3 & 4 Wm. 4, c. 85, to constitute the bishopric of Bombay, subject to the ecclesiastical jurisdiction of the bishop of Calcutta as metropolitan of India. The ecclesiastical establishment of this presidency consists of a bishop, an archdeacon, who is also a chaplain, seven chaplains, inclusive of the archdeacon, and sixteen assistant chaplains, stationed in various parts of the presidency. The ecclesiastical jurisdiction of the bishop of Bombay extends over all places under the control of the governor of Bombay and his political agents, including Cutch, Sind, and Aden. There are two ministers of the Church of Scotland at the presidency, appointed and paid by the East-India Company under the provisions of the act of Parliament above noticed. Mahratta

and Canarese are the two languages prevailing in the south and south-eastern parts of the presidency; Guzeratti in the northern. Persian and Oordoo are employed to some extent as the languages of business and of etiquette. Marwari, Portuguese, and Arabic, are also in use. The government is vested in the governor and three councillors, styled "the Governor in Council of Bombay," subject, however, to the "superintendence, direction, and control" of the Governor-General of India in Council. Civil and criminal justice are both administered in the territories subject to the government of Bombay by the courts of the East-India Company, in addition to the Supreme Court, in which the judges are appointed by the Crown. In the former class the functionaries are appointed by the local government, and the law administered is embodied in the regulations of that government, and the legislative acts of the government of India; in the latter, the modes of procedure are assimilated to those of the courts at Westminster. The jurisdiction of this court is, however, limited to the presidency town, except in regard to British subjects. The most convenient mode of considering the details of area and population will be to follow the revenue division into collectorates, which are as follows:—

	Area in Square Miles.	Population.	
Surat	1,629	492,664	
Broach	1,319	296,984	
Admedabad	4,356	656,223	
Kaira	1,909	586,631	
Khandeish	9,311	778,112	
Tannah or North- ern Concan	5,477	815,849	
Poonah	5,208	666,006	
Ahmednuggur, in- cluding the sub- collectorate of			
Nassick	9,931	995,543	
Sholapore	4,991	675,115	
Belgaum	5,445	1,425,982	
Dharwar	3,837	754,385	
Rutnagherry, or South Concan ..	3,964	665,238	
Bombay Island, in- cluding Colaba ..	18	566,119	
Kolaba Territory ..	318	58,721	
Sattara	10,222	1,065,771	
	67,945	10,621,306	
<i>Sinde:—</i>			
Shikarpore	6,120	350,401	
Hyderabad	30,000	851,811	
Kurrachee	15,000	183,550	
	52,120	1,067,762	
<i>Native States with- in the Bombay Territories:—</i>			
Baroda (Guicowar) ..	4,399	325,536	
Rhyrporc (Sinde) ..	5,000	165,000	
Kattywar	19,850	1,450,900	
Kolapore	3,445	500,000	
Sawant Warree ..	800	120,000	
Cutch	6,764	500,536	
Mahratta jaghire- dars	2,775	419,025	
Petty States in Gu- zerat	16,617	1,030,938	
	60,660	4,469,925	
	100,715	15,578,992	

An armed maritime force has long been maintained at this presidency, such a provision

being peculiarly called for by the necessity of being prepared to quell and overawe the native pirates, as well as those of Arabia. This force is maintained at an annual cost of about a quarter of a million sterling. Several steam-vessels are employed in maintaining the semi-monthly communication between Bombay and Suez. It may be here stated, however, that the East-India Company are about to relinquish the duty of conveying the mails between Suez and India so soon as arrangements can be made for its transfer to other hands.

The military force of the presidency consists of a regiment of artillery, comprising one brigade of horse and four battalions of foot, a corps of engineers, three regiments of native light cavalry, three regiments of European infantry, twenty-nine regiments of native infantry, and a marine battalion, affording an aggregate, according to a recent parliamentary return, of something more than 34,000 regular troops. There are, besides, a regiment of Poona irregular horse, a Guzerat provincial battalion, the Guzerat irregular horse, Candcish Bheel corps, Kolapore local corps, Rajpootan field force, Sawuntwaree local corps, the Belooch battalions (two), the Scinde irregular horse (two regiments), Cutch irregular horse, Southern Mahratta irregular horse, Ratnagherry Rangers, the native veteran battalion, and two police corps, furnishing an aggregate of nearly 18,000 men, the whole constituting a standing force of nearly 52,000. The forces of the Crown at the same period, placed under the control of the military authorities in the presidency, were something above 6,000, making a grand total of military force in the East-India Company's service in this presidency, exclusive of 3,711 Madras troops then serving within it, of more than 59,000 men. The educational institutions are divided into two principal classes: the first comprises all the vernacular schools, in which elementary instruction is conveyed through the medium of the native languages; the second class embraces the Elphinstone Institution and the various schools in which the English tongue and the literature and sciences of Europe are imparted.

The wonderful cave-temples, excavated in the rocks at Karli, Elephanta, Bag, Ellora, and some other places, indicate, from their characteristics, that formerly the population and rulers of this part of India were of the Buddhist persuasion. At the commencement, however, of the Mussulman invasion, Brahminism appears to have been universally prevalent; and the wealth and flagrant idolatry of the Sivaists of Somnath Patan drew down upon them, in the year 1024, the exterminating attack of Mahmood of Ghuzni. The Concan appears to have first been conquered by the Mussulmans, under Mahomed Shah, the Bahmany king of the Deccan, in the year 1470; forty years having been spent in the obstinately-resisted conquest of that rugged tract, which, after all, remained but imperfectly subjugated. The tract more to the east

and south-east, comprising the present collectorates of Dharwar and Belgaum, and the province of Sattara, was part of the Brahminical realm of Bijayanagar, whose resources in an expedition against the king of Beejapoor, in the early part of the sixteenth century, are described with more than oriental exaggeration by the annalist of the Portuguese. This power was in 1565 destroyed by a confederacy of Mussulman kings of the Deccan; and the districts of Belgaum, Dharwar, Colapore, and Sattara, incorporated with the dominions of Beejapoor, the ruler of which was one of the confederated princes. The more central part of the presidency, comprising the present collectorates of Ahmednuggur and Poona, was first invaded by the Mussulman armies, by the command of Alla-ood-Deen Khilji, the Patan monarch of Delhi, about the year 1308; and its conquest appears to have been completed in 1318, by his immediate successor Mobarik Khilji. The general revolt of the Deccan against Mahomed Toghluk occurred in 1350, and towards the close of the following century (1490), upon the extinction of the Bahmany dynasty, this tract was formed into a Mussulman state, under the denomination of Ahmednuggur, by Ahmed, the founder of the Nizam Shahi dynasty. Candelaish, in the valley of the Tapi, appears to have been first reduced under the sway of the Mussulmans by Alla-ood-Deen, about the commencement of the fourteenth century, and, after various vicissitudes and struggles, formed into an independent state by Malik Raja. The remainder of the territory of the East-India Company under this presidency, or that portion lying about the Gulf of Cambay, formed part of the ancient kingdom of Guzerat, which, invaded, overrun, and immediately relinquished by Mahmood of Ghuzni in the early part of the eleventh century, was conquered, in 1297, by the troops of Alla-ood-Deen, of Delhi. Subsequently to the general revolt of the Deccan, it became the scene of anarchy and bloodshed, until 1391, when it was formed into an independent Mussulman state by Muzuffur Khan, a Rajpoot converted to Islam. The islands of Bombay and Salsette formed part of the dominions of Guzerat in 1429, and though temporarily lost, were recovered and retained to the time of the arrival of the Portuguese in India at the close of the fifteenth century. The Portuguese appear to have commenced their commercial and warlike operations on the coast of this presidency about 1508. Diu seems to have been their earliest permanent settlement, and there, by leave of the native sovereign, they built a factory, which was fortified in 1534. Bombay was first visited by the Portuguese in 1509, when they took a Mussulman ship; and it appears to have soon become one of their permanent possessions, as in 1581 the Portuguese expedition destined against Goa rendezvoused thereat. In 1584, Bahadur Shah, king of Guzerat, ceded the island of Basscin to the Portuguese in per-

petuity. The first British establishment within the limits of this presidency was made at Surat in 1601. In the latter part of the sixteenth century, the territories now subject to the presidency of Bombay were, in a great measure, reunited to the realm of Delhi, by the power of Akbar; but the resumption was not completed until 1637, under the reign of Shah Jehan. The East-India Company in the mean time pushed its commercial concerns in western India; its affairs being under the management of a governor and council residing at Surat, and whose jurisdiction was styled "the Presidency of Surat." In 1661, the island of Bombay was by the crown of Portugal ceded to the crown of England, as part of the portion of the infanta Catherine of Portugal on her marriage with Charles II. The Portuguese local authorities, however, for some time evaded the transfer, and at length but partially complied; and Charles, either from vexation or some worthier motive, in 1669 granted the island to the East-India Company; but the Portuguese, who continued to retain the islands of Salsette and Karanja, long pursued a course of annoyance and hostility highly prejudicial to the British settlement. In 1676, the English crown granted to the East-India Company authority to establish a mint at Bombay, and, notwithstanding many adverse circumstances, the prosperity of this settlement was rapidly on the increase. In 1683, Bombay was declared by the Court of Directors the seat of the presidency, and also their principal station in the East Indies. In the same year Captain Keigwin, the commander of the East-India Company's military forces in the island, revolted, and repudiating the local authority of the East-India Company, proclaimed that of the Crown. The state of the settlement at this time bore testimony to the great efforts made for its improvement by the East-India Company, during the short time which had elapsed since its acquisition. They "had expended the large sum of 300,000*l.* on fortifications and improvements; had constructed an excellent harbour, to become the resort of English trade. The garrison of Bombay consisted of 505 men, and the island was supported by its own revenue." Next year arrived the mandate of the Crown, that the island should be forthwith restored to the Company, who accordingly resumed possession; but the precarious state of their affairs and the strength of the mutineers caused an unconditional pardon to be granted. The intended change was now, in 1685, carried into effect, and the seat of the presidential government transferred from Surat to Bombay. In the succeeding year, the president was declared Governor-General of India, and the establishment at Surat reduced to an agency. The ambition of the sovereigns of Delhi had overthrown the Mussulman kingdoms of the Deccan, which had been the bulwarks of their faith against the Brahminists in that part of India; and the tyranny and intolerance of Aurungzebe ex-

cited a spirit of resistance and retaliation among the Mahratta Brahmmins, which, fomented and directed by their notorious leader Sevajee, ultimately overthrew the Musulman sway, and in its place established the various Mahratta powers that have in turn succumbed beneath British supremacy. During this struggle, from the middle to the close of the seventeenth century, the Mahrattas extended their dominion over nearly the whole of the tract governed by the presidency of Bombay; and the managers on behalf of the East-India Company having the sagacity to foresee the probability of the ultimate success of the Mahrattas, on being more immediately exposed to their hostility, adopted the perilous policy of forming treaties with Sevajee and his successor; thus incurring the enmity of Aurungzebe, whose forces in 1688 invaded the island of Bombay, and besieged the town, but soon after withdrew, on the payment of a sum of money. The East-India Company became, likewise, frequently embroiled with that monarch, in consequence of the outrages of English pirates, who took several ships belonging to his subjects. The extension of the dominions of the East-India Company on this side of India was long very slow, being almost confined to Bancoote and Fort Victoria, acquired in 1756 from the Mahrattas in exchange for Gheriah, to the island of Bombay and the factories of Surat, Broach, and Ahmedabad, until 1774, when the British authorities, taking advantage of disputes among the Mahrattas, captured the islands of Salsette and Karanja, having stormed the fort of Tanna, the main defence of the former island. Both were formally ceded to the British by the treaty concluded on the 6th March, 1775, with Ragoba, who was recognised by the Bombay government as Peishwa. In virtue of this treaty, Ragoba had been supported with a force of 1,500 men of all arms, including 450 Europeans, and at Arrass a battle was fought, the result of which, though little decisive, inclined to the British. The supreme government disapproved of the treaty and connection with Ragoba, and deputed their agent to Poona to treat with the ministerial party without the intervention of the Bombay government. The treaty of Poorunder, concluded on the 1st March, 1776, was the result. Ragoba was now left to his fate. Peace was concluded with his enemies, the ministers at Poona conducting the regency during the minority of Maderow Narrain, the infant Peishwa, who was a posthumous son of Narrain Rao, one of the nephews of Ragoba. By this treaty the British obtained possession of the pergunnah and city of Broach. In 1777, war with France impending, a ship belonging to that nation put into Choul, a port of the Concan, about thirty miles south of Bombay, and in the territory of the Mahrattas, whose views appeared so unequivocally hostile to the British, that the supreme government determined on reinstating Ragoba in power, and vigorously prosecuting

the war against his rivals, the party at Poona opposed to the British interests. In 1779, a force consisting of 3,900 men, destined to act against Poona, was despatched from Bombay. It entered the Deccan through the Bhore Ghat, and advanced to Tullygaon, within eighteen miles of Poona. There being encountered, harassed, and nearly surrounded by a Mahratta force reputed to consist of 50,000 men, the British army became panic-struck, destroyed the greater part of their stores, threw the heavy guns into a tank, and took to flight, closely urged by their active enemies. The managers of this wretched expedition concluded at Wargaum, about ten miles above the Bhore Ghat, a convention, by which, as the price of the release of the forces from their hopeless position, Salsette, the adjacent islands, and some other places, were to be ceded to the Mahrattas. These concessions were disavowed by the governor of Bombay, and a force, consisting of six battalions of infantry, a proportionate detail of artillery, and some cavalry, which had been despatched by the Bengal government, and placed under the command of Colonel Goddard, continued its course from the vicinity of the Jumna across Northern Hindostan to Surat. In the commencement of the year 1780, Colonel Goddard took Dubhoy and Ahmedabad, while other portions of the British force made acquisitions in the Concan. In the close of the same year, Bassein was taken by Goddard in person. That officer, in 1781, advanced on the road to Poona to the foot of the Bhore Ghat; but the movement appears to have been merely with a view to intimidation, and, being vigorously attacked by the Mahrattas, he made a disastrous retreat to Panwell, the port at which troops were generally embarked for Bombay. Both parties being tired of those harassing and indecisive operations, a treaty was, in 1782, concluded at Salby, on terms somewhat humiliating to the British government, which engaged to abandon the interests of Ragoba, and surrendered Bassein and the acquisitions in Guzerat, with the exception of Broach, which was subsequently made over to the Mahratta chief Scindia. On the death of the nawaub of Surat, in 1799, the British authorities at Bombay obtained from Govind Rao Guicowar a grant of the town of Surat and the adjacent territory belonging to it, guaranteeing to the family a competent pension for the relinquishment of their claim. At the same time a British subsidiary force was formed for the support of the Guicowar, whose authority was established against his opponents, after a few smart actions. In 1790, a treaty of offensive and defensive alliance against Tippoo Sultan had been concluded between the English government, the Peishwa, and the Nizam; and the Peishwa was also a party to the treaty of peace concluded with Tippoo in 1792. In 1795, the young Peishwa, Maderow Narrain, died. To secure a continuance of his own power, Nana Furnavese (one of the Mahratta ministers)

endeavoured to exclude the legitimate heir, Bajee Rao, the son of Ragoba. But Nana's views were frustrated by Scindia, who arrived at Poona with a large force, and placed Bajee Rao upon the vacant throne. Scindia's influence became paramount at Poona, and he soon annihilated the independence of the Peishwa's government. In 1802, a contest took place between Scindia and Holkar. The Peishwa joined the former, whose army sustained a signal defeat near Poona, on the 25th October. The Peishwa fled to Bassein, having previously intimated to the British resident at his court his desire to enter into a defensive alliance with the Company on the basis of that of Hyderabad, and his readiness to cede territory for the maintenance of a subsidiary force. These overtures were favourably received by Lord Wellesley, and after a short negotiation a treaty was concluded at Bassein, by which the Peishwa engaged to receive, and the East-India Company to furnish, "a permanent subsidiary force of not less than six thousand regular native infantry, with the usual proportion of field-pieces and European artillerymen attached, and with the proper equipment of warlike stores and ammunition," to be stationed in perpetuity in his highness's dominions. The charge for maintaining this force was estimated at 25,00,000 rupees, or 250,000*l.* annually. To meet possible deficiencies, an additional annual sum of 100,000 rupees was allowed, the whole charge being defrayed by ceding to the British lands estimated to yield a revenue to that amount. "The conclusion of this treaty is to be regarded as an important step in the extension of the salutary influence of the British government in India." By a supplemental article, it was agreed that a native cavalry regiment should be added to the subsidiary force, and that the province of Bundelcund, belonging to the Peishwa, should be made over to the British, in lieu of the southern districts of his dominions which had been ceded by the treaty of Bassein. In 1803, certain districts were ceded by Scindia, under the treaty of Serji Anjengaum, to the allies engaged in the war against him; and by the partition treaty of Poona, a portion of the cession, comprehending the fort and territory of Broach, was assigned to the British. By the treaty of Baroda, in 1805, explaining, confirming, and consolidating former treaties, the Guicowar ceded to the British various districts now forming constituent parts of the collectorates of Ahmedabad and Kaira. In 1812, the island and harbour of Malwan, or Sindidroog, were obtained by treaty from the rajah of Kolapore, and in the same year the fort of Vingorla, and that of Gunaramo Tembe, with their respective ports, were similarly obtained from the rajah of Sawuntwarree. In 1815, the murder at Punderpoor of Gungadhur Shastree, the Guicowar's minister and envoy, who had repaired thither under the sanction and protection of the British government, and with the view of forwarding some political

objects entertained by it, was a prominent indication of the hostile intentions of Bajee Rao, the Peishwa, by whose minister, Trim-bukjee, the atrocity was perpetrated. On this supervened, in 1817, the general confederacy of the Mahratta states against British supremacy, and the Peishwa entering into it, was in the same year defeated in the engagement at Kirkee, and in 1818 at Ashti. He was subsequently deposed and pensioned by the East-India Company, and the greater part of his dominions incorporated with the presidency of Bombay. The territory acquired on that event comprises the present collectorates of Tannah and Rutnagherry, Poona, Candesh, Dharwar, Belgaum, Sattara, and the southern jagheers, containing collectively an area of 47,214 square miles. A portion of this territory, lying within the general line of the territory of the Nizam, was conveyed to that prince in exchange for his acquisitions under the treaty of Serji Anjengaum and the partition treaty of Poona. These were situated on the right bank of the river Seena, and in the district of Ahmednuggur, and being transferred to the Company, formed another addition to the Bombay presidency.

BOMBAY.—The principal place of the presidency of the same name. The island on which the city is situate, extends from north-east to south-west eight miles, with an average breadth of three, and landlocks the harbour lying between it and the mainland, protecting it from the violence of the Arabian Sea. To the south, this natural seaward bulwark is continued and strengthened by a couple of rocky islets. The more northern, which is joined to the island of Bombay by a causeway overflowed at high water, is called Old Woman's Island; the other, or more southern, is called Colaba, or Lighthouse Island; and this is united to Old Woman's Island by a causeway overflowed at high water spring tides, as the latter island is connected with Bombay. Thus the three islands, linked by causeways, form a continuous breakwater, extending from north-east to south-west a distance of nearly ten miles. Bombay is likewise connected with the large island to the northward, called Salsette, by a causeway and arched stone bridge from Mahim to Bandora, more recently constructed by government, aided by a munificent contribution from Sir Jamsetjee Jejeebhoy, a Parsee merchant of immense wealth, but of far greater liberality; the latter of which, indeed, appears almost boundless. Bombay owes him so much, that it would be almost criminal to pass over his name in any account of that settlement. His case affords an illustration of the value and utility of honorary distinctions. Wealth he needed not; but the honour of knighthood, conferred on him by the British sovereign, was an evidence to himself and to all his fellow-citizens, that his public spirit was neither overlooked nor disregarded. The honour could not fail to be the

more gratifying, from the fact that he was the first native of India who ever received it. On approaching Bombay from the seaward, the view is very beautiful; the background in the distance beyond the harbour being formed by the range of Western Ghats, and exhibiting the boldest, most picturesque, and varying outlines imaginable. Bombay "is formed by two ranges of rock of unequal lengths, running parallel to each other on opposite sides of the island; and these ranges are united at their extremities by hills of sandstone, which are only a few feet above the level of the sea. The interior of the island was formerly liable to be overflowed by the sea, which is now prevented by substantial works and embankments. The lower parts of the island are, however, still subject to the influence of the heavy rains, which in their season reduce them to a swamp; so that, during the continuance of the rainy monsoon, the houses are separated from each other by water, sometimes for several months. Bombay Island in coming from seaward appears very low, excepting Malabar Hill, which is of middling height, having a regular oblong appearance sloping a little towards the sea, and is covered with trees. Among these some white buildings are interspersed, with a signal-post and flagstaff at the point near Mazagon Hill, which is situated to the northward of Bombay town, and is of middling height, not easily known until well up the harbour. Parell Hill, farther northward, is a round mount, having on it a flagstaff; but this and an oblong hill near it, covered with trees, are not perceived until far up the harbour. Suree Fort is on a point of land near these hills." The area of the island is estimated at eighteen and a quarter square miles. The harbour is probably as large an expanse of water as is found anywhere landlocked; and its area may be estimated with tolerable safety at about fifty square miles, or if the shallow bight running towards the north of Salsette be included, at about eighty. On its east side this noble sheet of water is rendered picturesque by the islands Karanga, Elephanta, and Derwedi, called by British sailors Butcher Island. The lighthouse is situate at the southern extremity of Colaba island: its lantern is 150 feet above the level of the sea. There are six or seven fathoms water at the entrance of the harbour, and the tide rises sufficiently for the supply of wet docks which have been constructed at the pier or causeway connecting Colaba with Old Woman's Island. The greatest height which the tidewater in 1832 was seventeen feet eleven inches. Several excellent line-of-battle ships have been built here. Independently of its advantageous position with respect to the rest of India, as well as to Persia, Arabia, Africa, and more remotely Europe, the great excellence of the harbour of Bombay and its facilities for ship-building, as well as for commerce, give it a superiority over any other in India. An authority intimately acquainted with the subject thus testifies:—"In Bombay alone two ships

of the line, or one ship and two frigates, can be produced to the British navy every eighteen months. The docks of Bombay are capable of containing ships of any force. Situated as Bombay is, between the forests of Malabar and Guzerat, she receives supplies of timber with every wind that blows. Flax of good quality is also the produce of our territories in India. It is calculated that every ship in the navy of Great Britain is renewed every twelve years. It is well known that teakwood-built ships last fifty years and upwards. Many ships Bombay-built, after running fourteen or fifteen years, have been bought into the navy, and were considered as strong as ever. The *Sir Edward Hughes* performed eight voyages as an Indian-man before she was purchased for the navy." The *Wellesley*, a seventy-four gun ship, the fire of which in 1839 destroyed the defences of Kurrachee, and which was in other instances instrumental in gaining important successes in India, was built at Bombay. More recently the *Mecanee*, of eighty guns, and the brigs *Jumna* and *Nerbudda*, have been built at this port for her majesty's government.

It has been remarked, that "the advantages of Bombay consist in its commercial site, importance, and resources, its unequalled harbour and means of naval accommodation, and its situation on the western coast, considered relatively to Europe and to the Poona Mahrattas." The old town or fort is situate on the southern extremity of the island, towards Old Woman's Island, and is about two miles in circuit, strongly fortified, "battery above battery completely commanding the harbour." On the land side it was formerly incapable of being defended against an attack made by regular approaches, as a bombardment of a few hours must have fired the whole town; the houses being arranged closely together, generally built of wood, and lofty; and in such a conflagration the magazines must have inevitably exploded. The formation of an extensive esplanade, and some other precautionary measures, have, however, of late years greatly added to the security of the place. Still more recently, the increase of the calibre of the guns employed has completed the means of defence, rendering them adequate to an effectual resistance of an attack likely to be made from any quarter. In the old town or fort the streets are very narrow; but great improvements have been lately made, and more are contemplated. New streets are projected; a better system of drainage has been introduced, and a plan devised for securing to the town an ample supply of wholesome water. Among the remarkable buildings is the Government House, extending along one side of a square planted with trees: it has a fine colonnade, and contains the government offices, a saloon, and library. There is a large and handsome church within the fort, and a Presbyterian place of worship; and a church has been recently built on the island of Colaba, where there are considerable cantonments. About a mile north-west of the fort is the

Black Town, the situation of which is so low that during the monsoon rains it is in many places flooded, and the communication between the houses cut off. Few Europeans inhabit either of those towns, their residences being for the most part dispersed over the island. Besides the Government House within the fort, there are two other government residences in the island; one at Parell, six miles north of the fort, and another at Malabar Point.

Like most Eastern towns, Bombay has suffered severely from the casualty of fire. A very destructive conflagration took place in October, 1845, commencing in the shop of a manufacturer of fireworks. Upwards of 190 houses were destroyed, and the loss of property was estimated at seven lacs of rupees (about 70,000*l.*). The extent of the conflagration and loss would doubtless have been much greater, but for the exertions of one of the magistrates, Mr. Edward Danvers, in superintending and directing, amidst much personal danger, the force at his disposal while engaged in attempts to stop the progress of the flames. The men employed in this duty were obtained by draughts from one of her majesty's regiments, from the marine battalion, and from various ships lying in the harbour. Some of the seamen distinguished themselves by one of those acts of cool and deliberate daring, in utter disregard of apparently impending death, which seem almost ordinary events to the hardy sons of the ocean. During the conflagration information was given to the police, that on the lower floor of a house, the upper part of which was on fire, there were deposited a number of barrels of gunpowder. A party of sailors immediately volunteered to remove them, and actually brought out the entire quantity, amounting to several thousand pounds weight, while fragments of burning materials were falling around them.

Bombay is the seat of a Supreme Court of justice, constituted under letters patent from the Crown, under powers granted by act of Parliament, and consisting of a chief justice and one puisne judge; from whose decision an appeal, subject to certain limitations and conditions, lies to the Queen in Council. The powers of this court are very extensive, embracing not only the civil and criminal jurisdiction exercised by the judges at home, whether in their courts at Westminster or on circuit, but also the functions of the courts of equity, the ecclesiastical and admiralty courts, and the adjudication of cases of insolvency. Such is the present constitution, and such the powers of the Supreme Court; but the act 16 & 17 Vict. c. 95, recently passed, appears to contemplate some changes in the judicial institutions of India, the nature of which cannot of course be anticipated. The chief court of the Company is termed the *Sudder Adawlut*: its functions are to hear appeals from the district courts throughout the presidency, and to exercise a general supervision over those courts. Among the public establishments at Bombay

may be enumerated the Chamber of Commerce; the Bank of Bombay; the Oriental Bank, of which the chief Indian branch is here situate, the head office being in London; a branch of the Agra and United Service Bank; the government Savings Bank; several insurance companies; the Bombay Steam Navigation Company; the Bombay branch of the Royal Asiatic Society; the native general library; the Bombay Geographical Society; the Medical and Physical Society of Bombay; the Agri-horticultural Society of Western India, and the Bombay Diocesan Library. There are also various associations for the promotion of benevolent and religious objects. Amusements, especially those of a national character, are much encouraged by Europeans; and the climate has not prevented the formation of clubs for the practice of the Scottish game of golf and the English one of cricket. A Yacht Club also furnishes opportunity for the indulgence of the nautical taste so prevalent at home. The Elphinstone Institution has already been referred to in the notice of the educational establishments given under the article "Bombay presidency."

The population is composed of various elements. According to a census of the islands of Bombay and Colaba, taken on the 1st May, 1849, the numbers of the various castes, including the military and the floating population of the harbour, were as under:—

Jains, Lingaehs, or Boodhists...	1,902
Brahmins.....	6,936
Hindoos of other castes.....	289,995
Mussulmans.....	124,155
Parsees.....	114,698
Jews.....	1,132
Native Christians.....	7,456
Indo-Britons.....	1,333
Indo-Portuguese.....	5,417
Pure European.....	5,088
Seedee, Negro, African.....	8,889
Other castes.....	7,118
Total.....	566,119

The pursuits and occupations of the people are of course various, and, as in all other great cities, there is a proportion whose avocations will not sustain minute inquiry without damage to their reputation. In 1843 an extensive and most extraordinary system of plunder was discovered, and some of those concerned in it brought to justice. This scheme was organized with all the precision that might be looked for in a plan for prosecuting any lawful object devised and conducted by men habituated to business and well acquainted with its details. The number of persons engaged in it amounted to two or three hundred, and its operations had been carried on without interruption, and down to a very late period before the discovery, without suspicion on the part of the superior officers of government, for upwards of thirty years. The chief scene of plunder was the

harbour, where the goods were unlawfully but quietly transferred from one boat to another, then landed in the ordinary way, with as much coolness as though they had been legally acquired, conveyed in open day from the shore to the godowns or warehouses of persons of apparent substance and credit, and there brought to sale without any attempt at concealment. This traffic constituted the principal business of the gang, who, however, it was believed, occasionally varied it by suggesting and encouraging piracies, though they did not actively engage in them, and by participating in the profits of robberies and burglaries committed in the town. It was feared, indeed, that crimes of deeper tinge than those against property might be charged upon the gang. Though this herd of plunderers continued to exercise their craft for nearly a third of a century without drawing upon themselves the notice of the government, their existence and occupations were known to many not associated with them, but whose silence was secured by that powerful spring of conduct in India, respect for caste, or by a resort to intimidation. These men were indeed said to be more dreaded by those who knew them and their pursuits than was the power of the government. The staff of the association was perfect and well organized. It had a chief director, superintendents under him, a cashier, and a numerous body of inferior officers afloat and ashore. A regular set of books were kept with the most scrupulous accuracy, and the division of profits was made with the strictest nicety. Such a body, united for such purposes, could scarcely in these days exist in any part of Europe for any long period; and it may be regarded as pretty certain, that those who exercise the profession of plunder in that quarter of the globe do not conduct their business or apportion their unlawful gains with the precision which marked the proceedings of this body of marauders. Its existence affords a curious illustration of the peculiar nature of Indian society as compared with that found at home. The temperature is moderate in proportion to the latitude, being diminished by the sea-breezes. The climate was formerly considered very unhealthy; but it has of late years greatly improved, the proportion of deaths to the population in ordinary seasons now closely approximating to that of London. Bombay is distant from Calcutta, W., 1,040 miles; from Madras, N.W., 645; from Delhi, S.W., 730; from Hyderabad, N.W., 390; from Ahmedabad, S., 285; from Poona, N.W., 75. Lat. $18^{\circ} 57'$, long. $72^{\circ} 52'$.

BOMBRA.—A raj in the country superintended by the political agent for the south-west frontier of Bengal. It is bounded on the north by Bonie, on the south by Bheracole and Pallera, on the east by Keunjur, and on the west by Sumbhulpore. It extends from lat. $21^{\circ} 11'$ to $21^{\circ} 33'$, and from long. $84^{\circ} 11'$ to $85^{\circ} 11'$; is sixty-four miles in length from east

to west, and thirty in breadth. The area is 1,244 square miles. The value of the raj has been estimated at 10,000 rupees per annum. The tribute is nominally 340 rupees; but it is diminished by 300 rupees allowed in consequence of the Raepore road passing through the estate. The people, estimated at about 56,000, are said to be savages, and their ruler to be no better.

BOMEEGUTEH, in the British district of Dharwar, presidency of Bombay, a town five miles W. of the route from Coomta to Dharwar, 24 miles S. of the latter. Lat. $15^{\circ} 6'$, long. $75^{\circ} 8'$.

BOMINI, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route by the Kutra Pass, from Allahabad to Rewa, and 34 miles S.E. of the former city. Lat. $25^{\circ} 9'$, long. $82^{\circ} 15'$.

BOMOREE, in Bundelcund, in the raj or principality of Oorcha or Telree, a town on the route from Agra to Saugor, 180 miles S.E. of former, 93 N.W. of latter. It is situated on a rising ground, and is a rather pleasant place, the streets being wide and clean. Here is an extensive jhil or mere, formed by a vast artificial mound, constructed across the extremity of a valley, receiving the water of a stream. It is a noble sheet of water, about four miles long and two wide, deep and clear, abounding with fish, and very extensively available for the purposes of irrigation. On a rocky ridge overlooking the lake is the ruined palace of the rajah who made it. Lat. $25^{\circ} 8'$, long. $79^{\circ} 10'$.

BOMUNPILLEE.—A town in Hyderabad, or dominions of the Nizam, distant N.E. from Hyderabad 150 miles. Lat. $18^{\circ} 20'$, long. $80^{\circ} 34'$.

BONDSDORA.—A river rising in lat. $19^{\circ} 39'$, long. $83^{\circ} 27'$, in the native state of Calahandy, on the south-west frontier of Bengal, and discharging itself into the Bay of Bengal in lat. $18^{\circ} 21'$, long. $84^{\circ} 12'$.

BONHAT, in the British district of Reerbhoom, lieutenant-gov. of Bengal, a town on the route of the railroad from Burdwan to Rajmahal, 60 miles S. of the latter. Lat. $24^{\circ} 10'$, long. $87^{\circ} 47'$.

BONICUT.—A town in the native state of Cashmere, or dominions of Gholab Singh, distant N. from Sirinagur 29 miles. Lat. $34^{\circ} 28'$, long. $74^{\circ} 51'$.

BONIE.—A raj under the political agent for the south-west frontier. It is bounded on the north by Chota Nagpore, on the east by Keunjur and Singhbhum, on the west by Sumbhulpore and Gangpore, and on the south by Bombra. Its area is 1,057 square miles. The centre is in lat. 22° , long. $85^{\circ} 8'$. The people are represented to be savages, and the native government bad. The revenue of the country, as computed by the British agent, is 6,000 rupees. The annual tribute is 200

rupees. The population is estimated at upwards of 47,000.

BOONYTEE DEBEE, in Sirmour, a summit of the ridge extending from Bus Peak to Nahau. It is surmounted by a small Hindoo temple and the remains of a stone fort held by the Goorkhas during their occupation of the country, and was a station of the small series of triangles during the trigonometrical survey of the Himalayas. Elevation above the sea 5,120 feet. Lat. $30^{\circ} 38'$, long. $77^{\circ} 19'$.

BOOCHEYKEE, in the Reeschna Doab division of the Punjab, a town situated on a feeder of the Raves river, 45 miles S.W. of the town of Lahore. Lat. $31^{\circ} 18'$, long. $78^{\circ} 30'$.

BOOCHKAL, in Buzakir, a pass on the route from Rampoor to the Shatool Pass. It is the highest and most northern limit of the forest on this declivity of the Himalaya. Elevation above the sea 11,800 feet. Lat. $31^{\circ} 21'$, long. $77^{\circ} 59'$.

BOODAGAON.—A town in the territory of Nagpore, distant N.E. from Nagpore 90 miles. Lat. $21^{\circ} 52'$, long. $80^{\circ} 20'$.

BOODAWUL, or **BOORAWUL**.—The name of a district in Candeah, presidency of Bombay, formerly belonging to a native chief. In 1855 the territory escheated to the British government, from failure of heirs on the part of the late chief. Distant E. from Dhoolia 65 miles. Lat. $21^{\circ} 3'$, long. $75^{\circ} 43'$.

BOODGOWARRA, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Weingunga river, 31 miles N.E. of Seuni. Lat. $22^{\circ} 9'$, long. $80^{\circ} 9'$.

BOODHANUH, in the British district of Muzaffurnagar, lieutenant-gov. of the N.W. Provinces, a town on the route from Kurnoul to Meerut, and 43 miles S.E. of the former. It is of considerable size, has a bazaar, and supplies are abundant. The road in this part of the route is good; the country wooded and well cultivated. Population 6,750. Lat. $29^{\circ} 16'$, long. $77^{\circ} 32'$.

BOODHREYEE, or **BURURAE**, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to the cantonment of Mynpooree, and 30 miles W. of the latter. Lat. $27^{\circ} 7'$, long. $78^{\circ} 40'$.

BOODYGERRY.—A town in the territory of Mysore, distant N.E. from Seringapatam 86 miles. Lat. $13^{\circ} 9'$, long. $77^{\circ} 49'$.

BOODYHAUL.—A town in the territory of Mysore, distant N. from Seringapatam 82 miles. Lat. $13^{\circ} 36'$, long. $76^{\circ} 29'$.

BOOGODAH, in the British district of Ganjam, presidency of Madras, a town 10 miles S.E. of Goomsoor. Lat. $19^{\circ} 50'$, long. $84^{\circ} 51'$.

BOOJAN, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Almora to Kashheepoor, 12 miles S.W. of the former. Lat. $29^{\circ} 30'$, long. $79^{\circ} 31'$.

BOOKAPATAM, in the British district of Bellary, presidency of Madras, a town on the right bank of the Chittrawutty river, 90 miles S.E. of Bellary. Lat. $14^{\circ} 12'$, long. $77^{\circ} 58'$.

BOOLEE, or **BUDI**, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Ascot, up the valley of the river Kales, to the Beas Pass, into Hiundes or South-western Tibet. Boolee is in lat. $30^{\circ} 6'$, long. $80^{\circ} 52'$.

BOOLUNDSHUHUR.—A British district under the lieutenant-gov. of the N.W. Provinces, bounded on the north by the British district Meerut, on the east by the British districts Moradabad and Budaon, on the south by the British district Allygurh, and on the south-west and west by the British districts Gurgaon and Delhi and the jaghire of Bulubgurh. It lies between lat. $28^{\circ} 3'$ — $28^{\circ} 43'$, long. $77^{\circ} 28'$ — $78^{\circ} 32'$; is eighty miles in length from south-east to north-west, and fifty-seven in breadth from north-east to south-west. The climate is liable to considerable extremes, as rather sharp frosts are not unknown in winter, the thermometer falling a few degrees below the freezing-point, and water becoming congealed under shelter of a tent; yet in the latter part of spring and the beginning of summer, when the hot winds set in from Rajpootana and Southern Sirhind, the temperature becomes very high. The surface of the country has a general slope from north-west to south-east, as indicated by the descent of the slopes of the Jumna and Ganges in that direction, and also of those of the Hindun and East Kali Nuddee, the courses of which lie between those two great rivers, and in some measure parallel to them. The country, though remarkably level, has a gradual and very gentle elevation about midway between the Ganges and Jumna, rising in that part into a slight ridge, along which the channel of the Ganges Canal holds its course. Cotton appears to be the staple production of the soil, for commercial purposes, and might, it is believed, become a rich source of profit to the cultivator, merchant, and manufacturer. As in other parts of the Doab, the soil here produces indigo, sugar, tobacco, wheat, barley, millet, and various kinds of pulse. Domestic quadrupeds are scarcely one half the size of those in Bengal and Behar. Under the existing revenue settlement of the North-West Provinces, the demand of the government on the lands of this district has been fixed for a term of years, and is not liable to be increased until 1859. The population of the district is returned at 778,342. It appears, moreover, that by far the largest portion of the people are Hindoo; the respective numbers being Hindoos, 623,696; Mussulmans and others, 144,646. The follow-

ing is a classification of the towns and villages in the district :—

Number containing less than 1,000 inhabitants..	1,345
Ditto more than 1,000 and less than 5,000	121
Ditto more than 5,000 and less than 10,000	6
Ditto more than 10,000 and less than 50,000....	5
Total.....	1,478

This district formed part of the territory acquired by Perron, a French adventurer in the service of Scindia, who, arriving in India in no higher capacity than that of a common sailor, succeeded, by a series of fortunate intrigues, in obtaining the chief command under the Mahratta chief above named, and ultimately in elevating himself to the rank of a petty sovereign. The Franco-Mahratta state thus formed was marked by the sagacious policy of the Marquis Wellesley as an excrescence on the face of India, to be extirpated with the least possible delay, and Lord Lake was ordered to regard its annihilation as a primary object. Perron, who seems to have been more anxious for the preservation of his moveable property than of his dignity or power, after a feeble attempt at resistance, abandoned both his territory and his troops, and made his peace with the British government. The victory gained by Lord Lake in the vicinity of Delhi over the fragmentary remains of the French force, gave the final blow to the short-lived state which had sprung up and been cut down with almost unparalleled rapidity. The territory was included in the cessions made by Scindia to the East-India Company, under the second article of the treaty of Serjee Angengaum, concluded 30th December, 1803.

BOOLUNDSHUHUR, or BURRUN, the principal town of a pergunnah in the British district of the same name, is situate on the right bank of the Kali Nuddi, there passed in the dry season by a good ford, and during the rains by ferry. It lies on the route from Bareilly to Delhi, and 40 miles S.E. of the latter. There is a bazaar here, and supplies are abundant. The town contains a population of 15,005 inhabitants. Elevation above the sea 7⁴ feet. Distance N.W. from Calcutta 780 miles. Lat. 28° 24', long. 77° 56'.

BOOMIDAIRAH.—A town in the territory of Nagpore, distant N.W. from Bustur 46 miles. Lat. 19° 33', long. 81° 23'.

BOONDEE, in Rajpootana, a small territory named from its principal place, and under the political superintendence of the Governor-General. It is bounded on the north by the state of Jeypore; on the east by the state of Kotah; on the south by Scindia's dominions; and on the west by the state of Oodeypoor. It is eighty-five miles in length, and fifty in breadth, and lies between lat. 24° 58' and 25° 55', long. 75° 23' and 76° 30'. The area is 2,291 square miles. A range of mountains, running from north-east to south-west, divides

it into two nearly equal portions of level expanse; that on the south-east extending to the river Chumbul, and that on the north-west reaching to the base of the mountains towards Ajmere. The only river of importance is the Chumbul, which first touches on the territory in lat. 25° 17', long. 75° 58', holds a course north-east for sixty miles, forming for that distance the boundary between this state and that of Kotah, and is navigable during the rains for craft of considerable burthen. The Mej or Nej, a small river flowing from the Oodeypore territory or Mewar, takes a course in a direction north-east, through Boondée, for about eighty miles, and falls into the Chumbul. The other streams are unimportant. Iron abounds in the neighbourhood of the town of Boondée, which is celebrated for its manufactures in this metal. The climate is deemed unhealthy; fevers and rheumatism, ophthalmic and bronchial affections, are said to prevail in most parts. The sovereign, his feudatories, and the dominant portion of the people, are Rajpoots of the Hara tribe; but the greater part of the population, especially in the mountains, are Meenas, considered to be the indigenous inhabitants. These are indefatigable freebooters, and when Scindia overran this part of India in 1809, so incessantly harassed his army, that he found it necessary to march away, though no regular resistance was offered in the field. The military force at the disposal of the state, including the troops of the feudal chiefs and the police force, amounts to 6,170 men. The only fort of importance in Boondée is Nynwah. Bulwunt Sing obtained possession of it in 1806 by bribery, and retained it for several months, though many fruitless attempts were made for its reduction. The amount of the revenue of Boondée from land-assessment, transit-duties, and a few minor sources, has been computed to be five lacs of rupees, or 50,000*l*. The population may probably be assumed, at the average of British Rajpootana, 100 to the square mile; at which rate it would be 229,100. The rajah of Boondée, by lineage of the Hara subdivision of the Chauhan tribe of Rajpoots, originally ruled over the whole of Haraoti, so named from its population. According to Tod, the city and state of Boondée were founded in the year 1342, by Rao Dewa, in a site which he wrested from the indigenous Meenas, a great number of whom he ruthlessly put to the sword. In 1569, Rao Soorjun, the sovereign of Boondée, held the celebrated fortress of Rintimpoor for the rajah of Mewar, and surrendered it to Akbar on condition of receiving an extensive government, and a high command in the army of the Padshah. The territory of Boondée was dismembered by Jehangir, the son and successor of Akbar, who granted the portion south-east of the Chumbul to Madhu Singh, the great-grandson of Rao Soorjun, and declared him Rao of Kota, the capital of that tract. Chutter Sal, the ruler of Boondée at the time of the contest between Dara and Aurungzebe,

espoused the cause of the former, and was slain in the battle of Samaghar. At the battle of Jajau, in 1707, where Azim and Moazzim, the sons of Aurungzebe, contended for the succession, the Haras of Boondée supported the cause of the latter, and succeeded in placing him on the throne. In 1804, during the disastrous retreat of the British force under Colonel Monson before Holkar, the rajah of Boondée showed himself a firm supporter of the British cause; not only giving the retiring force unmolested passage through his territory, but aiding them to the extent of his ability, and thus drawing on himself the determined enmity of Holkar, to which he was given up by the pusillanimous policy of that period, the Mahrattas taking military occupation of his capital. On the commencement, in 1817, of the Mahratta and Pindarree wars, the ruler of Boondée came forward with alacrity to further the British views, and at the conclusion of peace was rewarded by a remission of the tribute previously paid to Holkar, and which by the result of the war had fallen to the disposal of the British government. At the same time the lands held by Holkar within the state of Boondée were restored; the fidelity of the rajah being thus tardily acknowledged. The tribute paid to Scindia was continued, but transferred to the British government. This tribute amounted to 80,000 rupees; but 40,000 of the sum were on account of two-thirds of the pergunnah of Patun, which was to have been recovered from Scindia. The recovery was not, however, effected, and the claim of the British government to tribute was on this account reduced to one-half the contemplated amount. By the treaty of Gwalior, in January, 1844, the management of Scindia's share of Patun was made over to the British government. The treaty between Boondée and the East-India Company was made in 1818. The rajah, who had so strongly and repeatedly manifested his regard for British alliance, died in 1821, about three years after the conclusion of the treaty, and was succeeded by his son, then about eleven years of age. A council of regency, consisting of four persons of station and influence, was named, but did not long maintain its authority. The mother of the infant rajah intimated her opinion, that "the system would not work; that four English gentlemen might conduct state affairs in concert, but that four natives never could." Upon this lady the exercise of the powers of the regency was thereupon conferred; but it soon became evident that the choice was an unfortunate one. The interests of the country were neglected; the training of the young prince for the duties of his position was unattended to, and the queen-mother was even suspected of ministering to his vices, with the view of prolonging the period of her own power. The evil influences of this woman were to some extent counteracted by an able and sincere minister, who extricated the state from a mass of financial difficulties, and by

regularity of payment rendered the military force efficient and contented. The useful life of this valuable state-servant was, however, cut short by assassination. The young rajah had married a sister of the rajah of Joudpore, who was about twice his own age. Some points in the treatment of this lady gave offence to her family, and a band of conspirators from Joudpore perpetrated the dark deed above related. Having accomplished their object, they fortified themselves in their house, and prepared for defence. There they were cannonaded from the hill-fort. A party of their friends outside the walls made demonstrations of an intention to relieve them, but took no effectual steps for the purpose. Other parties from Joudpore were approaching; but two leaders of the conspiracy were captured in an attempt to make their escape, and publicly executed. A third met death in a less formal mode; and these disheartening circumstances, combined with the firmness and energy displayed by the British representative, who had proceeded to the spot, probably averted a war between Boondée and Joudpore, which might readily have become general among the Rajpoot states.

BOONDEE.—The capital of the Rajpoot state of the same name, a town situate in a valley, or rather basin, nearly surrounded on all sides by rocky hills. The palace is situate on the slope of the hill above the town, with which it communicates by a road running in a zigzag direction on the face of the steep acclivity. According to Tod, this splendid residence "is an aggregate of palaces, each having the name of its founder; and yet the whole so well harmonizes, and the character of the architecture is so uniform, that its breaks or fantasies appear only to arise from the peculiarity of the position, and serve to diversify its beauties. The Chuttermahl, or that built by Rajah Chuttersall, is the most extensive and most modern addition. It has two noble halls, supported by double ranges of columns of serpentine." Indeed it seems generally admitted, that the palace is well entitled to the distinction which it has acquired in Rajpootana of unsurpassed beauty; and though some structures have been erected in imitation of it, such as the Castle of Indarghur, none, it is said, can compete with the original. The town contains few edifices of any size or beauty; but the two principal bazaars are of good width, clean, and occupied by many traders. As Boondée, however, has no pretensions to commerce, it offers no inducement to merchants on a large scale. A wall environs the town, the entrances to which are by three several massive gates, which continue closed from sunset to sunrise. The population consists principally of native Haras, a few leading Hindoo foreigners, and a small proportion of Mahomedans. Distant direct from Kotah, N.W., 22 miles; Bombay, N.E., 490; Agra, S.W., 195; Delhi, S.W., 245. Lat. 25° 26', long. 75° 43'.

BOONDEE KA GOTRA.—A town in the Rajpoot state of Boondee, distant N. from Boondee 15 miles. Lat. $25^{\circ} 40'$, long. $75^{\circ} 46'$.

BOONEERE, in Northern Afghanistan, is the tract lying north-west of the Indus, and north of the Kabool river, and bearing the general name of the Eusufzai country. It is inclosed by the Indus on the south-east, the Hindoo Koosh on the north; on other sides by mountains separating it from Suwat on the west, and on the south from the country held by the Khuttuk and Eusufzai tribes, on the lower course of the Kabool river. In its general character it is rugged, being composed of a number of small valleys, opening into one larger, through which flows the Burrindoo, a stream falling into the Indus on the west side, a little below Torbela. Booneere lies between lat. 34° — $34^{\circ} 40'$, long. 72° — 73° .

BOONGUL.—A town in Hyderabad, or dominions of the Nizam, distant S.W. from Hyderabad 31 miles. Lat. $16^{\circ} 59'$, long. $78^{\circ} 17'$.

BOORAH, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to the cantonment of Mynpooree, and 34 miles W. of the latter. Lat. $27^{\circ} 7'$, long. $78^{\circ} 36'$.

BOORAHBULLUNG.—A river rising in Mohurbunge, one of the Cuttack mehals, in lat. $22^{\circ} 7'$, long. $86^{\circ} 30'$, and, flowing in a south-easterly direction, falls into the Bay of Bengal in lat. $21^{\circ} 28'$, long. $87^{\circ} 7'$, eight miles S.E. of the town of Balasore.

BOORAI, in the British district of Midnapoor, lieutenant-gov. of Bengal, a town five miles E. of the trunk road from Midnapoor to Cuttack, 40 miles S. of the former. Lat. $21^{\circ} 50'$, long. $87^{\circ} 24'$.

BOORAINEE, in the British district of Ghazeeppoor, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Ganges, 620 miles N.W. of Calcutta by water. Lat. $25^{\circ} 25'$, long. $83^{\circ} 30'$.

BOORBARORE, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to the town of Meerut, and nine miles S.W. of the latter. Lat. $28^{\circ} 54'$, long. $77^{\circ} 42'$.

BOOREAH, in Sirhind, a town on the right bank of the canal or watercourse of Firoz Shah. The population consists principally of Sikhs. It has a bazaar, and is of some importance on account of the ferry in the vicinity over the Jumna, by which the route proceeds from Ambala to Saharunpoor. The canal of Firoz, two and a half or three feet deep, is crossed by a ford. The territory of which this is the principal place, constitutes one of the protected Sikh states. It contains an area of 80 square miles and a population of 11,920 persons. The town is distant N.W. from Calcutta 1,005 miles. Lat. $30^{\circ} 9'$, long. $77^{\circ} 25'$.

BOOREE DEHING.—A river of Assam, and a considerable feeder of the Brahmapootra; it is an offshoot of the Noh Dihing, from which it diverges in lat. $27^{\circ} 29'$, long. $96^{\circ} 11'$, and flowing in a westerly direction through Assam for 121 miles, during which course it receives several smaller rivers, falls into the Brahmapootra in lat. $27^{\circ} 15'$, long. $94^{\circ} 41'$.

BOOREE LOHIT.—The name of one of the two streams into which the Brahmapootra divides in its passage through the valley of Assam. It diverges from the main stream about lat. $21^{\circ} 7'$, long. $94^{\circ} 30'$, and flowing south-west for fifty-nine miles, rejoins it about lat. $26^{\circ} 45'$, long. $93^{\circ} 42'$.

BOORHATH, in the British district of Seebpoor, in Upper Assam, a town on the left bank of the Disang river, 43 miles N.E. of Seebpoor. Lat. $27^{\circ} 9'$, long. $95^{\circ} 50'$.

BOORHAUNPOOR, in the territory of Gwalior, or possessions of Scindia's family, a town situate on the north or right side of the river Taptee, the banks of which are here bold, and rise sixty or seventy feet above the average height of the stream. It is surrounded by a weak rampart of brickwork, which is highest along the lofty bank of the river; and, seen from the south bank, the place has a striking appearance. The ground-plan of the rampart is a semicircle, the diameter extending along the Taptee, and half-way between the extremities is a palace built by Akbar. This edifice is styled the Lal Kilah, or Red Fort, from the colour of its bricks. Though much dilapidated, it still contains a ruinous mosque, halls embellished with white marble, gardens or pleasure-grounds, and other relics of imperial magnificence. A rampart, separating it from the town, gave it the character of a fortress. The only other building worth notice is the Jamamasjit, or great mosque, built by Aurangzebe. Notwithstanding that the Brahminical population is numerous, they have no temples, their rudely-sculptured idols being placed under trees, or in ill-built niches. A few of the wealthier merchants have good and commodious houses, built of teak, profusely decorated with carvings. The most wealthy and influential of the trading community are the Borahs, a Mahomedan tribe, descended from the Hassannee, so dreaded in the time of the crusades. The Borahs, with their families, inhabit a distinct ward, which they shut up at night, excluding all other persons; and they have a peculiar mosque. There are still here, principally in the hands of Borahs, considerable manufactures of muslins, flowered silks, and brocades, for which the place was formerly so famous, that in the time of Tavernier, about the year 1665, they were exported in great quantities to Persia, Egypt, Turkey, Russia, and Poland; but even at that time the place was much decayed. In 1849 this town was the scene of a desperate and sanguinary affray, which took place between the Mahomedans

and the Hindoos, upon the occasion of one of the religious festivals of the latter.

Boorhanpoor is mentioned in the Ayeen Akbery as a large city. Its governor was one of the greatest officers of the court of Delhi, and usually an uncle, a brother, or a son of the Padshah. Previously to its subjugation by Akbar, in 1599, it was a place of much importance, being the capital of the sovereigns of Candeish, one of whom, Malik Nasir, founded it about A.D. 1414. Hence the sovereigns of Candeish are often denominated sultans of Boorhanpoor. It was visited in 1611 by Sir Thomas Roe, on his embassy to the Great Mogul; in 1685, under the reign of Aurungzebe, it was plundered by the troops of Sumbajee, the Mahratta leader under the command of Humbee Rao; and in 1720 was wrested from the government of Delhi by Asaf Jah, or Nizam-ul-mulk, who there defeated the army brought against him by the Padshah's officer. It appears to have been subjugated by Madhajeo Scindia in his rapid course of aggrandisement in the latter part of the eighteenth century, and was occupied in 1803 by the British under Colonel Stevenson, but was restored in the same year by the sixth article of the treaty of Serji Anjungaum. Its present assessment to the exchequer of Scindia is 45,000 rupees annually. Distant N.E. from Bombay 280 miles, S.E. from Oojein 132, N.E. from Poona 250. Lat. 21° 18', long. 76° 20'.

BOOROO, in the British district of Ahmedabad, presidency of Bombay, a town on the route from Cambay to Rajkote, 22 miles N.W. of the former. Lat. 22° 24', long. 72° 19'.

BOOSUN, in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to Narnol, and five miles E. of the latter. Lat. 28° 2', long. 76° 16'.

BOOTEA.—A petty native state on the north-west frontier of the presidency of Bengal. Its centre is in lat. 21° 55', long. 82° 45'.

BOOZKONK.—A town in Hyderabad, or dominions of the Nizam, distant W. from Hyderabad 122 miles. Lat. 17° 13', long. 76° 42'.

BOPALPUTNAM.—A town in Nagpoor, distant S.E. from Nagpoor 180 miles. Lat. 18° 51', long. 80° 30'.

BOPLER, in the British territory of Sangor and Nerbucka, lieutenant-gov. of the N.W. Provinces, a town 18 miles S.E. from Seoni, 63 miles N.E. of Nagpoor. Lat. 21° 50', long. 79° 51'.

BORAI.—See **BOREE**.

BORAI.—A river rising in lat. 21° 8', long. 74° 5', at the northern extremity of the Syadree range of mountains, and, flowing through Khandeish for 64 miles, falls into the Taptee river on its southern or left bank, in lat. 21° 20', long. 74° 51'.

BORARA.—A town in the Rajpoot state

of Kishengurh, distant S.E. from Ajmeer 30 miles. Lat. 26° 16', long. 75° 10'.

BORA SAMBA.—A small raj within the jurisdiction of the political agent for the south-west frontier of Bengal. It is bounded on the north by Phooljee, on the east and south by the petty state of Patna, and on the west by that of Kerial. Its central point is in lat. 20° 55', long. 83° 10'. Its form is angular and very regular; being nearly oblong. Its area is 622 square miles. The country is wild, and the people savage, even beyond their neighbours. When visited by the British agent, the rajah and his relations lived in an almost inaccessible valley, where they afforded refuge to many lawless plunderers. The agent compelled the surrender of some rebel subjects of the rajah of Nagpore, and the restoration of a number of cattle stolen by them. On an elevated table-land in this country the temperature is said to be so moderate that the orange-tree grows well. The annual revenue of the country was estimated at about 4,000 rupees. The tribute, which is only 160 rupees, was regularly paid. The population is estimated at about 28,000.

BORE, or **BHORE**.—A town in one of the Southern Mahratta jaghires of the same name, in political connection with the presidency of Bombay, distant S. from Poona 25 miles. Lat. 18° 9', long. 73° 53'.

BOREE.—A river of Khandeish, rising in lat. 20° 47', long. 74° 18', and flowing first east for fifty miles, and then north for forty more, falls into the Taptee opposite the town of Thal-nair, in lat. 21° 14', long. 75° 4'.

BOREE, or **BORAI**.—A petty district, the patrimony of a Bheel chief, in the territory of Malwa, under the political superintendence of the Governor-General's agent at Indore. The revenue of the rajah amounts to 14,000 rupees, or 1,400*l.* per annum, and a small body of infantry and cavalry, consisting of about forty-five men in the whole, is maintained in his service. The town of Borai is in lat. 22° 30', long. 74° 44'.

BOREE.—A town in Nagpoor, distant N.W. from Nagpoor 96 miles. Lat. 22° 21', long. 78° 23'.

BOREE, in the British district of Tannah, presidency of Bombay, a town on the route from Bombay to Damaun, 79 miles N. of the former. Lat. 20° 6', long. 72° 46'.

BOREGAUM.—A town in Nagpoor, distant S.W. from Nagpoor 60 miles. Lat. 20° 40', long. 78° 24'.

BOREGAUM.—A town in the native state of Gwalior, or Scindia's possessions, distant N.E. from Boorhanpoor 21 miles. Lat. 21° 35', long. 76° 30'.

BORENAR, in the British district of Khandeish, presidency of Bombay, a town on the right bank of the Girna river, 42 miles E. of Dhoolia. Lat. 20° 50', long. 75° 25'.

BORI GUNDUK.—The most considerable feeder of the Gunduck river. Rising on the northern face of the great snowy range of the Himalayas, about lat. $28^{\circ} 58'$, long. $85^{\circ} 50'$, it flows in a south-westerly direction for fifty miles, during the latter part of which it passes through a gorge in the Himalayas, and enters the territory of Nepal, which it traverses for sixty miles, and then takes the name of Trisul Gunga. From this point, turning south-west, it holds a course of seventy miles, and joins the Gunduck near the town of Nayacot, in lat. $27^{\circ} 30'$, long. $84^{\circ} 5'$.

BORKHEREE.—A town in the native state of Joura, in Central India, distant N.E. from Joura 30 miles. Lat. $23^{\circ} 50'$, long. $75^{\circ} 29'$.

BOSOMPOEE-MAH.—A town on the south-eastern borders of Assam, inhabited by the Naga tribes, situated 54 miles N.W. of Muncceepoor, and 79 miles S.E. of Nowgong. Lat. $25^{\circ} 29'$, long. $93^{\circ} 32'$.

BOTEH, in the British district of Poonah, presidency of Bombay, a town on the right bank of the Moola river, 18 miles E. of Jooneer. Lat. $19^{\circ} 16'$, long. $74^{\circ} 10'$.

BOUME KEUNE.—A town of Pegu, in the British district of Bassein, on the route from Cape Negrain to Sandoway, 60 miles N.E. of the former. Lat. $16^{\circ} 52'$, long. $94^{\circ} 30'$.

BOUNLEE.—A town in the Rajpoot state of Jeypoor, distant S.E. from Jeypoor 50 miles. Lat. $26^{\circ} 20'$, long. $76^{\circ} 21'$.

BOUTI, or BOULEE, in Bundelcund, in the territory of Rewa, a village near the route from Mirzapoor to the town of Rewa, and 58 miles S.W. of the former. It is remarkable for a very picturesque cascade, formed by a small river flowing some miles farther north into the Chutenea, a tributary of the Bilund. The fall is 400 feet down a rock, the base of which is of sandstone of a green colour, having above it a variegated or mottled stratum, overlaid by a purple stratum, which becomes more and more light-coloured, so as to approach salmon-colour before reaching the surface. Elevation above the sea 1,000 feet. Lat. $24^{\circ} 41'$, long. $81^{\circ} 59'$.

BOVANIKUDAL, or BHAWANI, in the British district of Coimbatore, presidency of Madras, a town situate at the confluence of the rivers Bhawani and Cauvery. It has a ruinous fort and two very celebrated temples, one sacred to Siva, the other to Vishnu, built by the poligar of the place, who held it as a feudatory to the rajahs of Madura. Distance from the town of Coimbatore, N.E., 58 miles; Madras, S.W., 213. Lat. $11^{\circ} 26'$, long. $77^{\circ} 44'$.

BOWAH, or BAOOHA, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a town on the route from Banda to the town of Futtehpore, and 15 miles S.W. of the latter. It has a bazaar, and is supplied

with water from wells and a tank. Lat. $25^{\circ} 52'$, long. $80^{\circ} 40'$.

BOWAL, in the British district of Dacca, lieutenant-gov. of Bengal, a town on the route from Dacca to Jumalpoor, 18 miles N. of the former. Lat. $23^{\circ} 57'$, long. $90^{\circ} 30'$.

BOWANA.—See BURANA.

BOWANEEGUNJE, in the British district of Rajeshaye, lieutenant-gov. of Bengal, a town on the route from Rampore to Dinajepore, 20 miles N.E. of the former. Lat. $24^{\circ} 55'$, long. $88^{\circ} 50'$.

BOWANNEE, in the Reechna Doab division of the Punjab, a town situated on the left bank of the Cheenaub river, 80 miles W. of the town of Lahore. Lat. $31^{\circ} 37'$, long. $72^{\circ} 50'$.

BOWARA, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town on the left bank of the river Baloun, 18 miles N.E. of Durbunga. Lat. $26^{\circ} 17'$, long. $86^{\circ} 10'$.

BOWERGURH, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town 33 miles S. of Hoshungabad, 30 miles N. of Baitool. Lat. $22^{\circ} 16'$, long. $77^{\circ} 51'$.

BOWLEE.—See BILOHI.

BOWNEE.—See BAONKE.

BOWPHUT, in the British district of Backergunje, lieutenant-gov. of Bengal, a town on the right bank of the Ganges, 20 miles S.E. of Backergunje. Lat. $22^{\circ} 23'$, long. $90^{\circ} 38'$.

BOWRA.—See BROWNA.

BOWRI, or BHUOREE, in the British district of Mozuffurnugur, lieutenant-gov. of the N.W. Provinces, a village on the route from Kurnoul to Meerut, and 30 miles S.W. of the former. Lat. $29^{\circ} 24'$, long. $77^{\circ} 26'$.

BOWUR.—A division of the native state of Gurwhal, situated in the north-west corner of that district: its centre is about lat. $30^{\circ} 55'$, long. $78^{\circ} 10'$.

BRAHMAPOOTRA.—One of the principal rivers of Hindostan, rising in Thibet, at the eastern extremity of the snowy range of the Himalayas, about lat. $28^{\circ} 30'$, long. $97^{\circ} 20'$. Taking a south-westerly direction for about sixty-three miles to the village of Soom, it touches upon the British provinces of Assam, whence flowing in a direction generally west for forty-three miles, it for that distance forms the boundary between the British territory and Thibet. It then enters Assam, and continuing a westerly course, divides the province into two nearly equal portions, the districts of Luckimpoor, Durrung, and the greater portion of Camroop lying to the north, and those of Seebpoor and Nowgong to the south. In this part of its course it is joined by many tributary streams. Among these may be noticed the Digaroo, a small river flowing from the north-east, and somewhat lower down

two others,—the Dibong and the Dihong. The last-mentioned river, which is known through the greater part of its course as the Sanpoo, and which is the remotest feeder of the Brahmapootra, rises on the northern face of the Himalayas, in lat. $30^{\circ} 25'$, long. $82^{\circ} 5'$, a few miles to the eastward of the sources of the Sutlej and Indus, and pursuing a course in a reverse direction, winds its way through Thibet, and washes the borders of the territory of Lassa. After a total course of about 1,000 miles, it turns suddenly to the south, and enters Assam at the north-eastern angle, where, under the name of the Dihong, it falls into the Brahmapootra, as above mentioned. From the point of junction, the river flows for seventy-five miles to lat. $27^{\circ} 10'$, long. $94^{\circ} 30'$, where it diverges into two streams, the northern denominated the Booree Lohit, the southern bearing the name of the Dihing. These again unite, after a separate course of about sixty-five miles. The Brahmapootra thence flowing for the distance of 220 miles, during which it passes the towns of Durrung and Gowhatty, finally leaves the province of Assam near the town of Goalpara. From Goalpara, the river, keeping a south-westerly direction, traverses the district of the same name for about sixty miles, when making a circuit round the western point of the Garrow Mountains, it forms for fifty miles the boundary between the British district of Rungpore on the west, and the districts of Goalpara and Mymensing on the east. In lat. $25^{\circ} 10'$, long. $89^{\circ} 45'$, it throws off the Konaie, and after a further course in a south-easterly direction of 130 miles, changes its name of Brahmapootra to that of Meghna. Proceeding thence south-west for fifty miles, it recovers a portion of the waters of its offset the Konaie, through the channel of the Dulaserree, and twenty-five miles lower down it receives a considerable portion of the waters of the Ganges through the channel of Kirtynassa. Then flowing east for ninety miles, it falls into the Bay of Bengal through three mouths; the Hattia river to the east, the Shabazpore in the centre, and the Ganges to the west. The total length of this river, from its source in the north-eastern range of the Himalayas to its discharge into the Bay of Bengal, measures 933 miles. Its branches, together with those of the Ganges, intersect the territory of Bengal in such variety of direction as to form a complete system of inland navigation.

BRAHMINY.—A river rising in the district of Palamow, about lat. $23^{\circ} 25'$, long. $81^{\circ} 13'$. Taking a south direction for 240 miles, and easterly for sixty more, during which it flows through the petty native states in Orissa to the western boundary of the British district of Cuttack, which it touches in about lat. $20^{\circ} 50'$, long. 86° , and continuing its direction south-east for about 110 miles, falls into the Bay of Bengal near Point Palmyras, and in lat. $20^{\circ} 43'$, long. $87^{\circ} 6'$.

BREMAHDASUM, in the British district

of Tinnevely, presidency of Madras, a town 17 miles W. from Tinnevely, 49 miles E. of Anjengo. Lat. $8^{\circ} 45'$, long. $77^{\circ} 30'$.

BRITEOWRY.—See BRUTURA.

BROACH, a British collectorate subject to the presidency of Bombay, is bounded on the north by the Myhee river and the Guicowar's territories; on the east by the Guicowar's and the Rajpeela rajah's territories, and by Wusaravee; on the south by the Keem river, which separates it from the Surat collectorate; and on the west by the Gulf of Cambay. Its length from north to south is about fifty-seven miles, and its breadth from east to west forty-one miles. It lies between lat. $21^{\circ} 22'$ — $22^{\circ} 11'$, and long. $72^{\circ} 30'$ — $73^{\circ} 10'$, and contains an area which is calculated at 1,319 square miles. Two rivers intersect this collectorate; viz., the Nerbudda, running from east to west from the Rajpeela territory, along the walls of the town of Broach, to the sea, and which is always navigable for boats of fifty tons burthen; and the Bhadiur, which runs in a similar direction, and empties itself in the sea at Tunkaria Lunder. The chief products are jowaree (Holcus Sorghum) and cotton, the former being the principal food of the cultivators, and is only sold when their cotton crop is inadequate to meet their expenses. The principal crop of jowaree is sown in August and reaped in February. Cotton is sown in June, and the first picking takes place in March; the second picking succeeds in about fifteen days, and the whole crop is not cleared off till the end of April. From its value in the market, it has become a primary object of cultivation in this collectorate, and the prices would, it is said, be much increased if the cultivators could be persuaded to devote more attention to the picking, and to divest themselves of some prejudices in regard to the storing of it. The government experiments for improving the cultivation of cotton in Broach are stated to have been unsuccessful; the American species (New Orleans and Georgian) having been found to degenerate in the course of a few seasons. Wheat is grown to some extent. In some parts of the district rice is cultivated; but its quality is coarse, except in the Hansote pergunnah, where, by the aid of irrigation, in a few villages a very superior grain is produced; in other parts of the district the produce is dependent entirely on the rains to bring it to maturity. Tobacco thrives upon the alluvial grounds.

The climate of Broach is considered as healthy as any part of Guzerat. The rains are moderate; the average fall being thirty-three inches, while the quantity at Bombay is computed at eighty. According to Colonel Williams, it is so cold in the months of December, January, and February, that Fahrenheit's thermometer sometime falls to 40° in the open air at daybreak. Before the beginning of March until the rains commence, there are hot winds from the north-east, and east, but

only occasionally; perhaps once a fortnight: during their prevalence the barometer will rise to 108° in the house. From the middle of April the prevailing wind is from the westward or southward. The population is given under the article BOMBAY.

In regard to the means of communication, it may be observed that there are no macadamized roads in the district, nor any material wherewith to construct them; yet so little is the want of these felt, that nowhere throughout the presidency is communication so well kept up. The level of the district, observes the collector, favours a partiality for wheeled vehicles; and during nine months of the year the whole zillah is intersected with rough but practicable lines of communication, so perfect that it would be difficult to devise a mode of improvement in so far as the requirements of commerce are concerned. There is a small manufacture of leather in Broach, which is considered superior to that of the adjoining districts. Coarse native paper is made in the town of Unklesur; and these articles, with the fabrication of cotton cloths, so far as it has not been superseded by that of Britain, seem to form the whole of the manufactures of the zillah.

BROACH, in the British collectorate of the same name, presidency of Bombay, is a large and ancient town, the principal place in the collectorate, and the seat of the civil establishment. It is situate on the north or right side of the river Nerbudda, about thirty miles from its mouth. The river is here a noble sheet of water, two miles wide at ebb-tide, but shallow for the most part even at flood-tide, when, however, there is a deep but intricate channel, admitting vessels of considerable burthen. The state of the river is such, however, as to prevent the town from becoming an extensive port for large vessels, it appearing that it is at all times navigable only for boats of fifty tons burthen. Broach was formerly a flourishing town, with a large population. Subsequently its commerce and manufactures fell away, and it became a poor and dilapidated place. More recent returns, however, show a considerable increase in its exports and imports, and indicate a revival of its former prosperity. Broach is situate on an elevated mound, supposed to be artificial, raised about eighty feet above the level of the sea, on the banks of the river. The town itself is surrounded by a wall, which on the river-face has been placed in repair, but on every other side is very much dilapidated. It contains about 3,341 houses, inhabited by 12,971 souls of different castes. The most substantial and spacious of the houses are occupied by the Muzmoodars of the Broach district, Hindoo bankers and merchants, a few Parsees and Mahomedans. The suburbs are extensive, and the number of the inhabitants is calculated to be about 18,361. They chiefly consist of shopkeepers, artisans of every kind, Dhobees, and fishermen; and the houses

are generally of an inferior order to those in the town. The suburbs have a bazaar, and on the outskirts are the cotton-warehouses. The town of Broach was long famous for its manufacture of cloth, consisting of fine dotees and doreens, chequered cloths, table-cloths, &c. The weavers were capable of imitating almost any pattern of Scotch plaid. Coarse piece-goods were also made up in considerable quantities, and still continue to be produced; but the manufacture of the finer description of cloths has fallen off largely, in consequence of the importation of English goods. Many of the weavers were Parsees, which class are known to have been located in Broach for six centuries. The destruction of that branch of manufacture has greatly affected their numbers and prosperity; but those who remain, though most of them poor, retain their character for industry. A few of the more opulent are ship-owners and brokers. One remarkable vestige of the former commercial importance of Broach is a Dutch burying-ground, in which the members of the factory belonging to that nation were interred. The tombs are yet in good preservation, and the inscriptions on them legible. They date back as far as 1610, and come down to 1770. Here is an hospital for animals, containing horses, dogs, cats, monkeys, peacocks, as well as a variety of insects. It is ostensibly attended by certain religionists, who derive a good income from lands devoted to the purpose. Few places are better supplied with provisions than Broach. Meat of all kinds is excellent and cheap; there is no want of poultry; the bazars are well supplied with fruits and vegetables from the neighbouring villages; and the Nerbudda affords a variety of fish, exclusive of that brought in by the fishing-boats from the sea. The carp in the river are uncommonly large, sometimes weighing fifty pounds. One of the government English schools has been established in this place. This town is thought, with some appearance of probability, to have been the Barygaza of Ptolemy and Arrian. After the subjugation of Guzerat by the Mussulmans, and the subsequent formation of the state of that name, Broach formed part of the new kingdom. On its overthrow by Akbar, in 1583, this place became included within the kingdom of Delhi, and was governed by a petty nawaub. It was taken in 1685 by the Mahrattas. The nawaub held it subordinate to the Peishwa until 1772, when it was captured by a British force under General Wedderburn, who was killed in the assault. In 1783, it was by the treaty of Poona ceded to Scindiah, in acknowledgment of certain services. It was stormed in 1803 by a British force commanded by Colonel Woodington, and finally ceded to the East-India Company by Scindiah, under the treaty of Serji Anjengaum. Distance of the town N. from Bombay 190 miles, S. from Ahmedabad 95, S.W. from Mhow 188, S.W. from Delhi, by Mhow, 624. Lat. 21° 42', long. 73° 2'.

BROANG, in Bussahir, a village in the district of Koonawur, is situate on the left bank of the Buspa, two miles from its confluence with the Sailuj. It gives name to the Broang, or Burenda Pass, distant about eight miles south; the intervening tract being a wood principally of luxuriant plane-trees, horse-chestnuts, birches, and rhododendrons. Broang is 7,411 feet above the sea. Lat. $81^{\circ} 28'$, long. $78^{\circ} 14'$.

BROKEN POINT.—A prominent headland on the coast of Arracan, 90 miles N.E. of Cape Negrais. Lat. $17^{\circ} 19'$, long. $94^{\circ} 35'$.

BRUMMAWARA, in the British district of South Canara, presidency of Madras, a town on the route from Mangalore to Bednore, 40 miles N. of the former. Lat. $13^{\circ} 26'$, long. $74^{\circ} 49'$.

BUBEROO, in the British district of Banda, lieut.-gov. of the N.W. Provinces, a town 24 miles E. of Banda, 72 miles W. of Allahabad. Lat. $26^{\circ} 33'$, long. $80^{\circ} 47'$.

BUBOORA, in the British district of Mirzapoor, lieut.-gov. of the N.W. Provinces, a village on the right bank of the Ganges, nine miles N.W. of the city of Mirzapoor, or higher up the stream. Lat. $25^{\circ} 12'$, long. $82^{\circ} 26'$.

BUBREE.—A town in the territory of Oude, distant N.E. from Lucknow 11 miles. Lat. 27° , long. $81^{\circ} 8'$.

BUCHOWRA, in the British district of Furruckhabad, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghurh to that of Futtehghurh, and 35 miles N.W. of the latter. Lat. $27^{\circ} 30'$, long. $79^{\circ} 11'$.

BUCHRAON, in the district of Bainswara, territory of Oude, a town 28 miles S.E. of Lucknow, 85 N.W. of Allahabad. Butter estimates the population at 5,000; of whom only 100 are Mussulmans. Lat. $26^{\circ} 28'$, long. $81^{\circ} 7'$.

BUCKEA.—A river rising in lat. $27^{\circ} 6'$, long. $85^{\circ} 40'$, on the northern face of the Sub-Himalayas: it flows in a southerly direction for thirty-five miles through Mrckwanee, a district of Nepal, and for twenty miles forms the boundary between Nepal and the British district of Tirhoot, which latter district it traverses for fifty miles previous to its fall into the Bagmuttee river, in lat. 26° , long. $85^{\circ} 56'$.

BUCKRANEE.—A village in Sinde, on the route from Sehwan to Larkhana, and seven miles south of the latter place. It is situate in the extensive island contained between the Indus and its offset the Narra, being distant four miles from the left bank of the former, and about half a mile from a ferry over the latter, known as the ferry of Buckranee. From this ferry to the ford opposite Tonia Hassem, the distance is about a mile and a half. The neighbourhood is fertile and well cultivated. Lat. $27^{\circ} 25'$, long. $68^{\circ} 12'$.

BUDAON.—A British district in the Rohilcund division of the lieut.-gov. of the N.W. Provinces. It is bounded on the north by the British district of Moradabad; on the north-east by the British district of Bareilly; on the south-east by that of Shahjehanpore; on the south by Furruckhabad and Mynpore; and on the west by Allyghurh and Bolundshuhur. It lies between lat. $27^{\circ} 38'$ — $28^{\circ} 29'$, long. $78^{\circ} 21'$ — $79^{\circ} 35'$, and contains an area of 2,368 square miles. It is a low, level, and in general fertile tract, watered in its south-western part throughout its whole length by the Ganges, in its eastern for some distance by the Ramgunga, and in the intermediate space by the Yaruuffadar, or Sote, and the Muhawa. That portion of the district situate south-west of the Ganges will participate in the benefits of navigation and irrigation to be derived from the branch canal proposed to be made from the Ganges Canal to the river Ganges above Furruckhabad. The official returns show the population to amount to 1,019,161, of which number 877,509 are Hindoos, and 141,652 Mahometans and others. Hence it appears that nearly six-sevenths of the whole are Hindoo. The following classification of the towns and villages in the district is also furnished by the official returns:—Number containing less than 1,000 inhabitants, 2,050; ditto more than 1,000 and less than 5,000, 173; ditto more than 5,000 and less than 10,000, 5; ditto more than 10,000 and less than 50,000, 3; total, 2,231. The principal routes are—1. From Furruckhabad, in a north-westerly direction, to Suhuswan, whence a route proceeds northerly to Moradabad, and another north-westerly to Hurdwar. 2. From Agra to Bareilly, in a direction from south-west to north-east. 3. From Allyghurh cantonment to Moradabad, and in a direction nearly parallel to the last. 4. Nearly from east to west, from Delhi to Bareilly. Under the revenue settlement of the North-Western Provinces, the government demand on the lands of this district has been fixed for a term of years, and is not liable to be increased until the year 1866.

BUDAON.—A town giving name to a British district under the lieut.-gov. of the N.W. Provinces. The population is not inconsiderable, having, in 1848, been officially ascertained to amount to 21,369. Lat. $28^{\circ} 2'$, long. $79^{\circ} 11'$.

BUDDAPOODY, in the British district of Nellore, presidency of Madras, a town five miles E. of the route from Nellore to Guntoor, 48 miles N. of the former. Lat. $15^{\circ} 9'$, long. 80° .

BUDDAUM PUHAR.—A town in Mohurbunge, one of the native states on the south-west frontier of Bengal, distant S.W. from Midnapoor 76 miles. Lat. $22^{\circ} 5'$, long. $86^{\circ} 14'$.

BUDDOOR.—A town in Hyderabad, or dominions of the Nizam, distant N.E. from

Ellichpoor 53 miles. Lat. $21^{\circ} 30'$, long. $78^{\circ} 19'$.

BUDDUNPOOR, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Meerut to that of Muttra, and 25 miles N. of the latter. Lat. $27^{\circ} 47'$, long. $77^{\circ} 51'$.

BUDEEAR, in the native state of Gurwhal, a considerable feeder of the Jumna, rises on the south-eastern declivity of Kedar Kanta, in lat. 31° , long. $78^{\circ} 17'$, and, after a course of about eighteen miles, falls into the Jumna on the right side, in lat. $30^{\circ} 49'$, long. $78^{\circ} 19'$, at an elevation of 4,000 feet above the sea. The Budeear, at the confluence, is as wide as the Jumna, but not so deep.

BUDEENA, in the British district of Hyderabad, province of Scinde, a town 56 miles S.E. from Hyderabad, 57 N. of Luckput, in Scinde. Lat. $24^{\circ} 39'$, long. $68^{\circ} 52'$.

BUDGE BUDGE, in the British district known as the Twenty-four Pergunnahs, lying within the jurisdiction of the lieut.-gov. of Bengal, a town on the left bank of the Hooghly, and on the route from Calcutta to Midnapore, 12 miles S.W. of the former, 56 E. of the latter. The fort, formerly occupying an important site here, as commanding the river, is now completely in ruins. Lat. $22^{\circ} 28'$, long. $88^{\circ} 15'$.

BUDHAN DHOORA, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a mountain of the Sub-Himalaya, and forming part of the Ghagar range. Elevation above the sea 8,502 feet. Lat. $29^{\circ} 28'$, long. $79^{\circ} 24'$.

BUDHAORA, in the Rajpoot state of Jessulmeer, a village on the route from the town of Bikaner to that of Jessulmeer, and 100 miles N.E. of the latter. Lat. $27^{\circ} 20'$, long. $72^{\circ} 22'$.

BUDL—See **BOOLEE**.

BUDLAPOOR, in the British district of Tannah, presidency of Bombay, a town on the route from Tannah to Poonah, 20 miles E. of the former. Lat. $19^{\circ} 10'$, long. $73^{\circ} 21'$.

BUDLAPOOR, in the British district of Jounpore, lieut.-gov. of the N.W. Provinces, a town on the route from Jaunpore cantonment to that of Sultanpore, in Oude, 17 miles N.W. of the former, 37 S.E. of the latter. Lat. $25^{\circ} 52'$, long. $82^{\circ} 32'$.

BUDLEGOOSSEE, in the British district of Bograh, lieut.-gov. of Bengal, a town on the route from Dinagepoor to Pubna, 30 miles N.W. of Bograh. Lat. $24^{\circ} 59'$, long. $88^{\circ} 55'$.

BUDNAWUR, in Malwa, in the raj or territory of Dhar, a town the principal place of a pergunnah of the same name. It is surrounded by a mud wall in bad repair, and has a fort. In 1820 it contained 734 houses and 2,654 inhabitants, and the pergunnah contained 7,735 houses and 31,119 inhabitants. It had been usurped by Daulat Rao Scindia; but on

occasion of the pacification with him in 1817, the British government insisted on its restoration to the rajah of Dhar. Distance N.W. from Mow 46 miles, S.W. from Oojein 36. Lat. $23^{\circ} 3'$, long. $75^{\circ} 18'$.

BUDOERCOOT, in the British district of Ganjam, presidency of Madras, a town on the southern shore of the Chilka Lake, 14 miles N.E. of Ganjam. Lat. $19^{\circ} 31'$, long. $85^{\circ} 18'$.

BUDOKHUR, or **BEROKHERA**, in the British district of Banda, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Banda to Rewa, seven miles S. of the former. Lat. $25^{\circ} 21'$, long. $80^{\circ} 26'$.

BUDRA.—A river rising in Mysore, about lat. $13^{\circ} 15'$, long. $75^{\circ} 14'$. Its course is at first easterly, in which direction it flows for about thirty miles, thence northerly for forty-three more, and subsequently north-easterly for thirty-eight miles, when it unites with the Tum, or Tunga, in lat. 14° , long. $75^{\circ} 45'$; the total length of course being 111 miles. From the confluence the united stream bears the name of Tunga Budra, or Tumbudra.

BUDRAWAR.—A town in the Northern Punjab, on the southern slope of the Himalaya, near the left bank of the river Chenab, and on one of its feeders. The neighbouring country is beautiful, picturesque, fertile, and well cultivated. There is a large and well-supplied bazaar. The population is probably about 2,000, of whom a considerable portion are Kashmirian weavers of shawls, employing about 250 looms. There is a large square fort, built of stone. It is about 5,000 feet above the sea. Lat. $33^{\circ} 3'$, long. $75^{\circ} 45'$.

BUDROL, or **BOODRA**, in Bunnahir, a peaked summit of a mountain proceeding in an easterly direction from the great range connecting Wartoo and the Chaur. There is a ruined fort on its declivity. This peak was one of the stations for the series of small triangles in the trigonometrical survey of the Himalaya. Elevation above the sea 8,762 feet. Lat. $31^{\circ} 8'$, long. $77^{\circ} 45'$.

BUDUREA, in the British district of Budaon, lieut.-gov. of the N.W. Provinces, a town on the route from Budaon to Allypore, 26 miles S.W. of the former. Lat. $27^{\circ} 54'$, long. $78^{\circ} 50'$.

BUDVAIL, in the British district of Cuddapah, presidency of Madras, a town on the route from Cuddapah to Ongola, 24 miles N.E. of the former. Lat. $14^{\circ} 44'$, long. $79^{\circ} 8'$.

BUFFALO MOUNTAINS.—In the Amherst province of Temasserim, the highest ridge of the sandstone range of hills running through the plain in a direction N.N.W. to S.S.E., and attaining a height of 1,543 feet. They are about seventy miles from Moulmein.

BUGCHOOR.—See **BUGDIYAR**.

BUGDOWDEE, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of

Cawnpore to that of Futtehgurh, N.W. of the former. Lat. 80° 16'.

BUGGAUR, in Sind, is one of the two western branches of the Indus, diverging a little below Tatta, at the head of the delta, the Sata being the eastern branch. In 1699, when visited by Hamilton, it was a very great stream, navigable as high as Lahorebunder, twenty miles from the mouth, for vessels of 200 tons; but now, except during the inundation, it has scarcely any stream, in consequence of a sand-bank five or six feet above the level of the water stretching across the channel at the place of divarication. Where forded by the British army during the season of low water, in 1839, it was two feet and a half deep, and fifty yards wide; lower down, the channel was completely dry. When the stream was greater, it parted into four branches, entering the sea by the Pittee, the Pintianee, the Joah, and the Richel mouths. These have all become merely inlets of the sea, containing salt-water, excepting during the inundation. The word Buggaur signifies *destroyer*, a name given in consequence of the effect of the river on the lands through which it flowed. Its main course is generally westerly, extending about eighty miles from the place of divergence, in lat. 24° 40', long. 68° 1', to the Pittee mouth, in lat. 24° 42', long. 67° 12'.

BUGGELWARA.—A town in the native state of Bhopal, distant S.E. from Bhopal 60 miles. Lat. 22° 53', long. 78° 15'.

BUGGHOO CHEK, in the Reechna Doab division of the Punjab, a town situated on the route from Amritsir to Wazeerabad, eight miles S.E. of the latter. Lat. 32° 23', long. 74° 2'.

BUGGREEA.—A town in the native state of Talcheer, one of the Cuttack mehals, distant N.W. from Cuttack 90 miles. Lat. 21° 3', long. 84° 41'.

BUGGUSRA, in the peninsula of Kattywar, province of Guzerat, a town in the vicinity of the Gir or wild highlands in the middle of the district of Kattywar. It is the principal place of a subdivision containing sixteen villages and a population estimated at 7,452, and paying the Guicowar an annual tribute of 3,114 rupees. Distance from Ahmedabad, S.W., 152 miles; Baroda, S.W., 160; Surat, W., 127; Bombay, N.W., 212. Lat. 21° 30', long. 70° 59'.

BUGHA.—A town in the territory of Oude, distant N. from Lucknow 18 miles. Lat. 27° 5', long. 80° 56'.

BUGHAT.—See BAGHAT.

BUGHRUH, in the British district of Muzfurngur, lieutenant-gov. of the N.W. Provinces, a town on the route from Meerut to Roorkee, 32 miles N. of the former. Lat. 29° 28', long. 77° 40'.

BUGLOH, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a

miles village on the route from Delhi to Muttra, and long. 36 miles S. of the former. Lat. 28° 12', long. 77° 22'.

BUGRA.—A town in the native state of Sirgoojah, on the south-east frontier of Bengal, distant N. from Sirgoojah 51 miles. Lat. 23° 50', long. 88° 20'.

BUGRAEE.—See BIGROULI.

BUGRAYUH, or **BUGGIHAR**, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghur to that of Etawa, and 24 miles S. of the former. Lat. 27° 35', long. 78° 15'.

BUGREE.—See BAJAROW.

BUGROH, or **BUGROO**, in the Rajpoot state of Jeypoor, a town with bazaar, on the route from Agra to Ajmere, 174 miles S.W. of former, 65 N.E. of latter. Lat. 26° 49', long. 75° 38'.

BUGUDYAR, or **BUGDWAR**, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, an encamping-station at a sangha or spar-bridge over the Bugdwar torrent, on the route up the course of the Goree, by the Oonta Dhooora pass, from Almorah fort to Hiundes, or South-eastern Tibet, 114 miles S.E. of Almorah. Elevation above the sea 8,028 feet. Lat. 30° 13', long. 80° 15'.

BUGUR.—A town in the Rajpoot state of Shekawtee, distant N.E. from Jboonjhnoo 10 miles. Lat. 28° 13', long. 75° 38'.

BUGWA, in Bundelcund, a town in the native state of Bijawur, distant S.W. from Bijawur 21 miles. Lat. 24° 32', long. 79° 12'.

BUGWAH, in the British district of Rungpore, lieutenant-gov. of Bengal, a town on the right bank of the Brahmapootra, on the route from Rungpore to Goalpara, 30 miles E. of the former. Lat. 25° 40', long. 89° 44'.

BUGWARA, in the British district of Surat, presidency of Bombay, a town on the route from Bombay to Surat, 50 miles S. of the latter. Lat. 20° 25', long. 72° 59'.

BUGWATPOOR, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route by Rajapoor ferry from the city of Allahabad to that of Banda, and 11 miles W. of the former. Lat. 25° 24', long. 81° 44'.

BUHADOORGURH, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a small fortified town on the route from Gurmuktesar to Anopshuhur, and 10 miles S. of the former. Lat. 28° 41', long. 78° 13'.

BUHADOORGURH, in the hill state of Hindoor, a fort on a lofty summit of the range stretching in the Cis-Sutlej territory from north-west to south-east, in the eastern part of that state. Elevation above the sea 6,283 feet. Lat. 31° 13', long. 76° 56'.

BUHADOORGURH.—See BAHADOORGURH.

BUHADRA, in the Rajpoot state of Jessulmeer, a village on the route from the town of Bickaneer to that of Jessulmeer, and 45 miles N.E. of the latter. A mile south-west of it, the British mission deputed to the western states of Rajpootana crossed in the middle of March the dry bed of a river 100 yards broad. Buhadra is in lat. $27^{\circ} 6'$, long. $71^{\circ} 38'$.

BUHADURPOOR.—A town in the native state of Gwalior, or possessions of Scindia's family, distant S. from Gwalior 130 miles. Lat. $24^{\circ} 19'$, long. 78° .

BUHAOWPOOR, or **BHOWPOOR**, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Allahabad to Etawa, and 51 miles S.E. of the latter. Lat. $26^{\circ} 25'$, long. $79^{\circ} 38'$.

BUHEREE, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Moradabad to Almora, and 17 miles N. of the former. Lat. $29^{\circ} 2'$, long. $78^{\circ} 56'$.

BUHEREE, or **BUHOREE**, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a small town, with fort, on the route from Moradabad cantonment to Kasheepoor 10 miles N. of the former. It is situated two miles east of the left bank of the small river Dhundi, and a mile west of the right bank of the Dhela, both feeders of the Kamunga. Lat. $28^{\circ} 59'$, long. $78^{\circ} 51'$.

BUHIRWA, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a town on the route from Allahabad to the city of Benares, 59 miles E. of the former, 15 W. of the latter. Lat. $25^{\circ} 16'$, long. $82^{\circ} 42'$.

BUHLAPOOR, in the British district of Booldanduhur, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Aligurh to that of Moradabad, and 12 miles N.E. of the former. Lat. $28^{\circ} 4'$, long. $78^{\circ} 11'$.

BUHNDERA, in the territory of Bhurtpoor, a village on the route from Agra to the city of Bhurtpoor, 30 miles W. of the former, 9 S.E. of the latter. It has a few shops, and water may be obtained from wells. Lat. $27^{\circ} 9'$, long. $77^{\circ} 37'$.

BUHOONAH.—A village in the British district of Hurriana, lieutenant-gov. of the N.W. Provinces. Lat. $29^{\circ} 33'$, long. $75^{\circ} 42'$.

BUHORUNPOOR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Almora, and 22 miles N. of the former. Lat. $29^{\circ} 6'$, long. $78^{\circ} 58'$.

BUHRAECH.—The principal place of the district of that name, in the territory of Oude. Tieffenthaler, describing it about the year 1770, states it to be "an ancient town of considerable extent, of greater length than breadth, the houses being built of mud and covered with thatch, except the mausoleums, mosques, and residences of the merchants, which are of brick

and lime-mortar." It is situated in a pleasant wooded plain, on the left bank of the Sarju (eastern). North-east of the town is the tomb of Selar, a reputed Mussulman saint. In May there is a great concourse of pilgrims to his tomb, the small town close to which is, in honour of the deceased, called Great Buhraech, while the principal town is called Little Buhraech. Buhraech is 65 miles N.W. of Faizabad, 65 N.E. of Lucknow. Lat. $27^{\circ} 34'$, long. $81^{\circ} 33'$.

BUHREABAD, in the British district of Ghazeepee, lieutenant-gov. of the N.W. Provinces, a town on the north-west frontier towards Azimgarh, 20 miles N.W. of Ghazeepee cantonment. Lat. $25^{\circ} 43'$, long. $83^{\circ} 15'$.

BUHUL, in the British district of Hurriana, lieutenant-gov. of the N.W. Provinces, a town in lat. $28^{\circ} 38'$, long. $75^{\circ} 35'$.

BUHURIABAD, in the British district of Ghazeepee, lieutenant-gov. of the N.W. Provinces, a town 20 miles N.W. of Ghazeepee, 38 miles E. of Jounpoor. Lat. $25^{\circ} 49'$, long. $82^{\circ} 20'$.

BUJANA.—See **BIANA**.

BUJEE.—See **BUJER**.

BUJHERA, in the British district of Shahjehanpoor, lieutenant-gov. of the N.W. Provinces, a town six miles W. of the route from Shahjehanpoor to Bareilly, 24 miles N.W. of the former. Lat. $28^{\circ} 3'$, long. $79^{\circ} 37'$.

BUJJAUNA, in the peninsula of Kattywar, province of Guzerat, a town in the subdivision of Jhalawur or Jitpote. It is situated on the southern border of the Runn, or great Salt-marsh, and is the principal place of a subdivision containing twenty-six villages and a population estimated at 4,320. The chief of Bujjauna is by descent of the Jat tribe, but the family has for some generations conformed to Islam. He pays an annual tribute of 8,615 rupees to the British government. Distance from Ahmedabad, W., 55 miles. Lat. $23^{\circ} 3'$, long. $71^{\circ} 43'$.

BUJRUNGURH, in the territory of Gwalior, or possessions of Scindia's family, a town on the route from Goomah to Mow, 11 miles S. of the former. It was formerly a place of greater importance than at present, having been the stronghold of Jai Singh, rajah of Raghwarah, the redoubted enemy of Doulut Rao Scindia. In A.D. 1816 Bujrungurh was taken by Baptiste, an officer of Doulut Rao Scindia. It is by some denominated Jainagar Bujrungurh. Lat. $24^{\circ} 34'$, long. $77^{\circ} 18'$.

BUKERAH, in the territory of Oude, a village on the route from Lucknow to Shahjehanpoor, 30 miles S. of the latter. Lat. $27^{\circ} 27'$, long. $80^{\circ} 3'$.

BUKEYWAR, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a town on the route from Calpee to the cantonment of Etawa, and 14 miles S.E. of the latter. Lat. $26^{\circ} 40'$, long. $79^{\circ} 15'$.

BUK—BUL.

BUKHOREE, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town 30 miles N.W. of Durbuiga, 22 miles N.E. of Mozufperpoor. Lat. $25^{\circ} 25'$, long. $85^{\circ} 37'$.

BUKKUR.—A town of the Punjab, in the Sinde Sagur Doab, situated on a water-course running parallel with the Indus, 19 miles S.E. of the town of Dera Ismael Khan. Population 5,000. Lat. $31^{\circ} 35'$, long. $71^{\circ} 1'$.

BUKKUR, in Sinde, a celebrated fortress on an island in the Indus, between the towns of Roree on the eastern, and Sukkur on the western bank. The eastern channel, dividing it from Roree, on the left bank, is 400 yards wide and thirty feet deep in the middle, with a current of four miles an hour; the western, dividing it from Sukkur, on the right bank, is ninety-eight yards wide, and fifteen feet deep in the middle, with a current of three miles an hour. Such is the measurement when the river is lowest, and made in a right line across the island from the eastern to the western shore of the Indus; but at some distance to the north of this right line, a spit of land from the island of Bukkur projects westward into the river, leaving between its extremity and the western shore a channel only fifty yards wide, seven feet deep in the middle, and with a current of four miles an hour. In the beginning of 1839, the engineers of the Bengal army, marching to Afghanistan, threw here a bridge of boats over the Indus. The number of boats employed for this purpose was nineteen for the western or narrower channel, and fifty-five for the eastern; and on this the army, with its baggage and lattering-train, passed over. Soon afterwards the bridge was swept away. Macmurdo states that the water in the western channel disappears in the season when the river is lowest; and Burnes, that the eastern is said to have been once forded in the same season. Wood, however, found the former seven feet deep, and the latter thirty, in the dry season. The island of Bukkur is a rock of limestone interspersed with flint, of an oval shape, 800 yards long, 300 wide, 1,875 in circuit, and about thirty feet high. Almost the whole of it is covered by the fortress, which, in 1839, was ceded by the ameer of Khyerpoor to the British, to remain occupied by their garrison during the then existing war. Its ultimate destination was determined by the battle of Meeanee, and the consequent annexation of Sinde to the British dominions. Lat. $27^{\circ} 39'$, long. $68^{\circ} 56'$.

BUKLAHUR.—A town in the native state of Nepaul, distant W. from Khatmandoo 47 miles. Lat. $27^{\circ} 38'$, long. $84^{\circ} 31'$.

BUKLANA.—A village in the British district Hurriana, lieutenant-gov. of the N.W. Provinces. Lat. $29^{\circ} 8'$, long. $76^{\circ} 18'$.

BUKOLEE, or **BUTULI**, in the hill state of Bussahir, a fort on the right bank of the Pabur, situate on a lofty rock prominently standing out from a mountain rising behind it.

Elevation above the sea 5,607 feet. Lat. $31^{\circ} 13'$, long. $77^{\circ} 54'$.

BUKRA, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a town four miles N. of the route from Patna to Goruckpoor, 20 miles E. of the latter. Lat. $26^{\circ} 37'$, long. $83^{\circ} 43'$.

BULAHRA, in the Rajpoot territory of Shekhawatee, a town with a fort, and a place of some importance before the establishment of British supremacy. The fort is of masonry, sixty yards long and thirty broad, with very high bastions, and a fausse-braye of masonry, with a narrow but deep ditch. Being a stronghold of freebooters, it was dismantled by the British in 1835. Distance S.W. from Delhi 140 miles. Lat. $27^{\circ} 53'$, long. $75^{\circ} 15'$.

BULAMEEN, in the Bunnoo division of the Punjab, a town situated on the route from Peshawur to Ghuznee, 103 miles S.W. of the former. Lat. $33^{\circ} 14'$, long. $70^{\circ} 11'$.

BULBUDDURPOOR, in the British district of Pooree, lieutenant-gov. of Bengal, a town on the south-eastern shore of the Chilka lake, 25 miles S.W. of Juggurnaut. Lat. $19^{\circ} 40'$, long. $85^{\circ} 32'$.

BULBUDDURPOOR, in the British district of Pooree, lieutenant-gov. of Bengal, a town 19 miles N.W. from Juggurnaut, 39 miles S.W. of Cuttack. Lat. $19^{\circ} 59'$, long. $85^{\circ} 40'$.

BULCHA.—A pass over a high ridge, extending nearly east and west, and appearing to be the last or most northern of the ridges forming the mountainous tract which extends northwards or north-eastwards from the main range of the Himalaya, and beyond which the plains of Tibet stretch in the direction of Central Asia. Bulcha is situate within the Chinese frontier, and about eight miles north of the parallel range of Oonta Dhura, within the British frontier. The road from Almorah fort, in Kumaon, by the Juwahir valley to Tibet, lies over the Oonta Dhura and Bulcha passes. Bulcha is distant 164 miles N. of Almorah. Lat. $30^{\circ} 38'$, long. $80^{\circ} 14'$.

BULCHEEA GHAT, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a ferry over the river Kalee (eastern), forming a communication between the territory of the East-India Company and that of Nepal. Lat. $29^{\circ} 21'$, long. $80^{\circ} 20'$.

BULDEO MUNDIT, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a town on the route from the cantonment of Muttra to Mynpooree, and 12 miles S.E. of the former. It has a bazaar, and supplies are abundant. Lat. $27^{\circ} 25'$, long. $77^{\circ} 54'$.

BULKOONREA, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a town 43 miles N.E. of Goruckpoor, 39 miles S.W. of Bettiah. Lat. $26^{\circ} 57'$, long. $84^{\circ} 1'$.

BULLARY, in the British district of South Canara, presidency of Madras, a town on the

BUL.

route from Mangalore to Mercara, 40 miles S.E. of the former. Lat. $12^{\circ} 40'$, long. $75^{\circ} 27'$.

BULLEA, in the British district of Purneah, lieutenant-gov. of Bengal, a town a mile from the left bank of the Gonor river, 23 miles S.E. of Purneah. Lat. $25^{\circ} 34'$, long. $87^{\circ} 52'$.

BULLEEA, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a town on the route from Budson to Bareilly, 12 miles S. of the latter. Lat. $28^{\circ} 13'$, long. $79^{\circ} 26'$.

BULLIAH, in the British district of Ghazepore, lieutenant-gov. of the N.W. Provinces, a town situate on the left bank of the Ganges, on the route from Ghazepore cantonment to Chuprah, 42 miles E. of the former, 40 W. of the latter. It is situate on the river Kutehur, a branch of the Tons, traversed by ferry during the rains, and at other seasons by a bridge of boats. Supplies and water are abundant here, and the road in this part of the route is good. Distant N.W. of Calcutta by water 552 miles. Lat. $25^{\circ} 41'$, long. $84^{\circ} 12'$.

BULLIAH, in the British district of Ramgurbh, lieutenant-gov. of Bengal, a town four miles E. of the route from Hazareebagh to Midnapoor, 15 miles S. of the former. Lat. $23^{\circ} 49'$, long. $85^{\circ} 20'$.

BULLINGEE, in the British district of Sirgooja, lieutenant-gov. of Bengal, a village situate among the mountains of Gondwana, close to the northern frontier, towards the British district of Mirzapoor. Distant S. of the city of Mirzapoor 90 miles, N.W. of Calcutta by Hazareebagh 355. Lat. $23^{\circ} 53'$, long. $82^{\circ} 52'$.

BULLOAH.—A British district in the lieutenant-gov. of Bengal, comprising, in addition to its area on the mainland, several very considerable islands, lying at the mouth of the Megna river. It is situate between lat. $22^{\circ} 21'$ — $23^{\circ} 23'$, long. $90^{\circ} 35'$ — $91^{\circ} 41'$; is eighty miles in length from north-west to south-east, and sixty in breadth. The area of the district is included in that of Tipperah. For the amount of population see the article **BENGAL**.

BULLOAH, in the British district of the same name, lieutenant-gov. of Bengal, a town on the left bank of the Hattia river, 160 miles E. of Calcutta. Lat. $22^{\circ} 53'$, long. $90^{\circ} 56'$.

BULLOOA, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Ganges, 653 miles N.W. of Calcutta by water. Lat. $25^{\circ} 26'$, long. $83^{\circ} 10'$.

BULLOORGEE.—A town in the territory of Hyderabad, or dominions of the Nizam, distant W. from Hyderabad 143 miles. Lat. $17^{\circ} 19'$, long. $76^{\circ} 22'$.

BULODA.—A town of Phooljer, one of the native states on the south-west frontier of Bengal, distant W. from Sumbulpoor 71 miles. Lat. $21^{\circ} 11'$, long. $82^{\circ} 56'$.

BULOGEREE, in the British district of

Goalpara, lieutenant-gov. of Bengal, a town 26 miles S.W. of Goalpara, 77 miles E. of Rungpore. Lat. $25^{\circ} 47'$, long. $90^{\circ} 29'$.

BULPHAE.—A town of north-eastern India, in the native state of Bhotan, distant N. from Gowhatty 75 miles. Lat. $27^{\circ} 10'$, long. $91^{\circ} 26'$.

BULRAMPOOR.—A town in the native state of Nepal, distant W. from Khatmandoo 200 miles. Lat. $28^{\circ} 10'$, long. $82^{\circ} 9'$.

BULRAMPOOR, in the territory of Oude, near the northern frontier towards Nepal. It is situate on the river Raptée, in a pleasant plain, and is of considerable size, with mud-built houses covered with thatch. There is a noble view of Dhawalagiri, or the White Mountain of the Himalayas, probably the most elevated summit of the surface of the globe. It is distant about 120 miles N.E. of Bulrampoor. The town is situate on one of the most frequented routes from Lucknow to Nepal, and in spring and summer great numbers of traders descend from the mountains, bringing the products of Tibet to exchange for the wares of Hindustan. Distant 89 miles N.E. from Lucknow. Lat. $27^{\circ} 24'$, long. $82^{\circ} 15'$.

BULRAMPORE, in the British district of Midnapore, lieutenant-gov. of Bengal, a town on the right bank of the Coosy river, 30 miles N.W. of Midnapoor. Lat. $22^{\circ} 40'$, long. $87^{\circ} 2'$.

BULRUMMER.—A town in the native state of Bombra, on the south-west frontier of Bengal, distant E. from Sumbulpoor 16 miles. Lat. $21^{\circ} 30'$, long. $84^{\circ} 19'$.

BULSAR, in the British district of Surat, presidency of Bombay, a town on the estuary of the small river of the same name. The estuary is obstructed by a bar covered by a depth of two or three feet at low water. It is a thriving place, having manufactures of cloths and considerable commerce in salt, grain, and sugar. The population is 7,000, many of whom are weavers and sailors, some cultivators. Distance from Bombay, N., 115 miles; Surat, S., 40. Lat. $20^{\circ} 36'$, long. $72^{\circ} 58'$.

BULSUN.—A small hill state between the Sutlej and the Tonse, under the superintendence of the political agent for the Cis-Sutlej states. It is bounded on the north by Komharsin, Kothkasee, and the petty lordship of Goond; on the east by Poondur; on the south and south-west by Sirmour; and on the west by Keonthul. It extends from lat. $30^{\circ} 57'$ to $31^{\circ} 7'$, long. $77^{\circ} 26'$ to $77^{\circ} 39'$; is about twelve miles in length from south-east to north-west, and eight in breadth at the opposite angles. The area is sixty-four square miles. The population is estimated at about 5,000, and the annual revenue at about 600*l.*; out of which a tribute of 108*l.* is paid to the British government. The rana has about 500 armed retainers. Part of Burrowlee, originally a portion of this small state, was retained by the East-India Company after its conquest from

the Goorkhas, for the use of the military cantonment at Subathoo; but the greater portion of Burrowlee was conferred on the rajah of Hindoor and his heirs, in perpetuity, under a sunnud dated 20th November, 1815, in lieu of the fort of Malown, retained as a post for British troops.

BULTHAR, in the British district of Sarun, lieut.-gov. of Bengal, a town 19 miles N. of Bettiah, 81 miles N.E. of Goruckpoor. Lat. 27°, long. 84° 41'.

BULTI, or **BULTISTAN**.—A small state, north of the valley of Cashmere, forming part of the dominions of Gholab Singh, and bearing also the name of Little Tibet, by which prefix it is distinguished from Middle Tibet or Ladakh, and Great Tibet or Southern Tartary. Bulti is also sometimes called Iskardoh, from the name of its capital. It is bounded on the north by Chinese Tartary, from which it is separated by the Mustag or Mooz-Taugh (icy mountains) and the Karakorum Mountains, prolongations of the Hindoo Koosh to the eastward. On the east it has Ladakh or Middle Tibet; on the south Deotsuh and other elevated and desert tracts, which separate it from Cashmere; on the west, Ghilgit, Yessen, and Astor, small independent states. Its limits have varied with circumstances, and at no time have they been well defined; but as the result of the safest estimate of them, Bulti may be stated to lie between lat. 34° 30'—36°, long. 75°—77°. The ancestors of Ahmed Shah, the late rajah, are said to have ruled here uninterruptedly for fourteen generations; but, ten or twelve years ago, Iskardoh and the other strongholds of Bulti were seized by the present ruler of Cashmere.

BUL-TUL, or **KANTAL**, in Kashmir, a pass over the range of mountains inclosing that valley on the north-east. It forms the water-summit between Kashmir and Little Tibet, as from its northern declivity the Duras river flows northward to the Indus, and from its southern flows southward a feeder of the small river Sinde, a tributary of the Jailum. Its elevation above the level of the sea is 10,500 feet. It is also called the Shur-ji-La, generally pronounced Zoji-La; and in old maps this summit bears the name Kantal, signifying "lofty hill." Lat. 34° 14', long. 75° 33'.

BULUBURGH, or **BALLAMGARH**, is the principal place of a jaghire of the same name, called also Furreedabad, which is politically under the lieut.-gov. of the N.W. Provinces. This town is situate on the route from Delhi to Muttra, and 29 miles S. of the former city. The surrounding country is well cultivated, and has a pleasing appearance; the road-sides being planted with trees. The town, though not ill built, is small and crowded; "with narrow streets, tall houses, many temples, and a sufficient number of Brahmy bulls to show the pure Hindoo descent of the ruler." The palace of the rajah is small, but very neat, and is arranged around

a small court, with a marble fountain in the middle, and an open arched hall. The whole place is surrounded by a high brick wall, with mud bastions and a deep ditch. The rajah is of the Jaut tribe. His jaghire extends twenty-six miles along the right bank of the Jumna, between lat. 28° 13'—28° 33', long. 77° 17'—77° 36'. It is bounded on the north-west by Delhi; on the north-east and east by Boondshuhur; on the south and south-west by Goorgaon. The area is 190 square miles.

Estimating the population at the average of the adjacent district Goorgaon (300 to the square mile), its amount will be 57,000. At the period of the British entrance into Delhi, this jaghire appears to have been held by two persons, in virtue of the offices of foudjar of the environs of the imperial city, and killadar of the fort of Buluburgh. One of them was expelled in 1804, by Sir David Ochterlony; the other, named Bahadour Singh, was established in possession of the jaghire and fort, as well as the office of foudjar of the environs of Delhi. Some obscurity seems to attach to another grant, subsequently made to the same party, to cover the expense of a police establishment on the road between Delhi and Pulwul; but in 1827 this grant was resumed, the magistrate of Delhi undertaking the duties for the discharge of which it was bestowed; and the rajah of Buluburgh now holds his jaghire on the sole condition of maintaining the road-police within the limits of his jurisdiction, namely, from Boorea-ka-pool to Mooza Phuthalla, between Sikree and Pulwul, on the high Muttra road. It appears to have been intended to assign this district to the chief in perpetuity; but no sunnud was ever prepared. Notwithstanding this omission, the jaghire has been allowed to descend on the usual principles of inheritance, the son succeeding the father, except in one instance, where, the chief dying in infancy, the possession passed to his uncle. On the death of this chief, in 1829, his infant son succeeded, and during his long minority the district, through contention and mismanagement, fell into confusion. Ultimately the interference of the British government was sought, and after a modified system had been tried and had failed, the jaghire was taken under British management. The young chieftain, however, having attained majority, remonstrated against this arrangement, and the territory was given up to him. The measure of independence rightfully belonging to the chief is not by any means clearly defined; but the British government has never interfered in civil or criminal affairs, except in the instance above mentioned. The revenue of the state is estimated at 1,60,000 rupees, and the annual disbursement at 1,30,000 rupees. The chief maintains a small force, consisting of 100 cavalry and 350 infantry. The town of Buluburgh is in lat. 28° 20', long. 77° 23'.

BUMROWLEE, in the British district of Bareilly, a town on the route from Bareilly to

Seetapore, and 36 miles S.E. of the former. It has a bazaar and market. Lat. 28° 12', long. 80°.

BUMTA, a village in the Cis-Sutlej state of Poondur, a tributary of Keonthul, under British protection, is situate on the route from Chepal to Deohra, and about six miles N. of the former. Here was formerly a fort, with a strong rampart and towers, on a situation commanding the vale below, but itself commanded by a hill above it. At the time of Fraser's visit it was in ruins, having been burned some time before; but the rajah was busy in building a residence for himself, and a Hindoo temple embellished with sculptures. Lat. 31° 1', long. 77° 40'.

BUMUNGA, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village two miles W. of the right bank of the Kalee (eastern), 13 S.E. of Champawut cantonment. Lat. 29° 14', long. 80° 18'.

BUNAE, or **BHINAY**, in the British district of Ajmere, lieutenant-gov. of the N.W. Provinces, a fortress, with a village at its base, on the route from Nusseerabad to Boondee, 29 miles S. of former, 70 N.W. of latter. Its site is picturesque on the summit of an isolated steep craggy hill, covered with cactus. Here resides a chief or petty rajah of the Rahtore tribe of Rajpoots, who, according to a high authority, owes allegiance to the rajah of Joudpore, as well as to the British. The place is styled by Heber a good-sized town, containing two very elegant little temples. The pergunnah of which it is the principal place contains ninety-three villages and a population of 27,340 persons. Lat. 26° 3', long. 74° 50'.

BUNAL, in the native state of Gurwhal, a valley extending between seven and eight miles, in a direction nearly from N.W. to S.E., between lat. 30° 49'—31°, and long. 78° 9'—78° 14'. The north-western end is closed by a rocky mountain, on the declivity of which rises the Bunal stream, that waters the valley and falls into the Jumna.

BUNASS (Eastern).—A river of Rewah, in Bundelcund, rising on the south-eastern boundary, in lat. 23° 31', long. 82° 2', and, flowing in a north-westerly direction through Rewah for seventy miles, falls into the Sone, in lat. 24° 14', long. 81° 33', near the town of Rampoor.

BUNASS (Western), a river of Western India, rises in the Aravulli Mountains, on the common confines of the territories of Oodeypoor and Godwar, in Joudpore, about forty miles north-west of the city of Oodeypoor, and in lat. 24° 58', long. 73° 20'. It takes a south-west direction, and after a course of about 180 miles, is lost in the Runn of Cutch, in lat. 23° 40', long. 71° 15', terminating in several intricate and small channels. The British cantonment of Deesa is situate on its left bank.

BUNBASSA.—A town in the territory of

Oude, distant 8. from Lucknow 115 miles. Lat. 28° 30', long. 81° 7'.

BUNCHANEGAON, in the native state of Gurwhal, a village on the left bank of the Budeear, a feeder of the Jumna. It is situate in a fertile expanse, rising with gentle acclivity up the side of a mountain. Elevation above the sea 6,034 feet. Lat. 30° 52', long. 78° 19'.

BUNCHAREE, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Hansee to Muttra, and 34 miles N.W. of the latter. Lat. 27° 56', long. 77° 25'.

BUNCHOOLA FORT, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Gaomutee river, 17 miles N. of Almora. Lat. 29° 50', long. 79° 50'.

BUNDA.—A town in Hyderabad, or dominions of the Nizam, distant S.E. from Kuladgee 75 miles. Lat. 15° 20', long. 76° 12'.

BUNDARA, in the British province of Nagpore, a town on the route from Midnapore to the city of Nagpore, 612 miles W. of former, 34 E. of latter. It has a bazaar; and being situate on the right bank of the river Waingunga, water is abundant. Elevation above the sea 892 feet. Lat. 21° 11', long. 79° 41'.

BUNDARREE.—A town in the native state of Purlahkemedi, one of the Cuttack mehals, distant N.W. from Berhampoor, in Ganjam, 61 miles. Lat. 19° 39', long. 83° 59'.

BUNDELCUND, or the Bundela country, is an extensive tract, bounded on the west and north-west by Gwalior; on the north-east by the Jumna, dividing it from the British districts Etawah, Cawnpore, Futtehpore, and Allahabad, in the Doab; on the east by Bhaegelkhand, or territory of Rewa; and on the south by the British territory of Saugor and Nerbudda. It lies between lat. 23° 52'—26° 26', long. 77° 53'—81° 39'; is 200 miles in length from south-east to north-west, .55 in breadth in the direction of the opposite angles; and has an area of 18,099 square miles. The plains of Bundelcund are diversified by mountains, which have been classed into three ranges, —the Bindyachal, the Punna, and the Bandair. From these numerous streams flow towards the Jumna, among which may be enumerated the Sindh and its tributary the Pohooj, the Betwa, the Dhasan, the Berna, the Cane, the Baghin, the Paisuni, and the Tons. The mineral resources of this tract appear to be considerable, though very imperfectly developed. Punna contains diamonds, and contiguous are inexhaustible deposits of iron-ore; while farther to the north-east, towards Kalleenjer, Franklin considered that he had found indications of coal. The climate is sultry in the plains. Calpee, notwithstanding its extra-tropical latitude, has been represented as one of the hottest places in India; and the heat at Banda is also stated to be very great. That by the native climate is not found insalu-

brious, is indicated by their healthy appearance; but Europeans are frequently affected severely, and even fatally, by ague and other complaints resulting from malaria. Portions of the western part, between the Betwa and Sindh, are represented to be "notoriously unhealthy;" and there, in 1817, the British army under the marquis of Hastings experienced the ravages of cholera to a most frightful extent. There seems, however, great diversity in regard to the salubrity of particular spots, not explainable by any known laws. The British cantonments of Keita have been abandoned on account of their fatal air; but the elevated fortresses of Ajegurh and Callinger have been found uncommonly healthy, though such situations are usually throughout India the seats of deadly malaria. The principal towns of Bundelcund—Calpee, Banda, Jhansi, Duttca, Oorcha, Jaloun, Chatarpoor, Mahoba, Tehari—are noticed under their respective names in the alphabetical arrangement. Besides the British districts of Banda and Hummerpoor, the lapsed territory of Jeitpore and Jaloun, the pergunnaahs of Duboi and Gurota, ceded by Jhansi to the British government, and the confiscated jaghire of Chirgaon, the province of Bundelcund contains several native states, and a variety of petty jaghires. Those belonging to the former class are, Adjyghur, Bijawur, Churkaree, Chutterpoor, Duttcaah, Jhansi, Oorcha or Terree, Punnah, Sumpthur. The British districts in Bundelcund are—Banda, Hummerpoor and Calpee, Jaloun, Jeitpore, Churgaon, ceded pergunnaahs of Duboi and Gurota.

The several districts, British and foreign, contain in the aggregate, as already noticed, a total area of 18,099 square miles. Franklin estimated the population at 2,400,000. More recent inquiries afford a result of 2,260,714. In the British district of Banda the population was officially reported in 1847 as 552,526; in Humeerpore and Calpee the total was 452,091; in Jaloun the number was roughly returned at 176,297; in the Jhansi ceded pergunnaahs and Churgaon, the numbers were stated to be 70,000. Jeitpore is stated to have 16,000 inhabitants, and the lapsed jaghire of Khuddee 2,800. The judicial and fiscal management of the British districts appertains to the lieutenant-gov. of the N.W. Provinces. The political superintendence of the remainder forms part of the charge of the Governor-General's agent for Seindia's dominions and Bundelcund. With the principal native states of Bundelcund the British government have engagements, varying on minor points according to circumstances, but all recognising its supremacy, and binding the dependent state to the relinquishment of all political relations except with the superior. Some are tributary, some exempt from that incident. In aid of the services of the regular troops stationed in this tract, a force styled the Bundelcund Legion was formerly supported by contributions from the states of Jhansi and Jaloun. Subsequently Jaloun became a British

possession, and Jhansi ceded territory in lieu of its contribution to the support of the legion. The legion itself has now ceased to exist, the British government having resolved to restore to the army-list the number of the 34th regiment Bengal Native Infantry, which had been struck out, and to form the new regiment of the volunteers from the infantry of the Bundelcund Legion.

The earliest paramount power in Bundelcund of which there is any certain record, were the Chundel Rajpoots, deriving their origin from Muhoba and its vicinity, where their rule was established by Chandra Varma. As Parmal Deo, the twentieth ruler in succession from Chandra Varma, was, in the year 1183, overthrown by Pirithi Rajah, ruler of Ajmeer and Delhi, if fifteen years be allowed on an average to each ruler, the time of Chandra Varma will be placed in the latter part of the ninth century of our era. During the age of the supremacy of the Chundel Rajpoots was the period of the greatest splendour of this country, the dominion of those princes extending from the Jumna to the Nerbudda; and Ferishta relates, that in the year 1021 their rajah marched at the head of 36,000 horse, 45,000 foot, and 640 elephants, to oppose Mahmud of Ghuzni, whom, however, he was obliged to conciliate by rich presents. After the overthrow of Parmal Deo, the country remained in ruinous anarchy until the close of the fourteenth century, when the Bundelas, a spurious subdivision of the Garhwa tribe of Rajpoots, established themselves on the right bank of the Jumna, under the conduct of Hurdeo. Pretap Hrad, tenth in descent from that chief, greatly extended and consolidated the Bundela sway, and in 1531 founded the town of Oorcha. His great-grandson Birang Deo succeeded in still farther aggrandizing the Bundela state, chiefly through the favour of Jehangir, the padshah of Delhi, whom he had conciliated by the murder of the celebrated Abulfazi, the minister of Akbar, father of Jehangir; the latter prince hating and dreading that minister as inimical to his interests. The predatory character of the Bundela chief earned for him the name of Dangi, or robber, which has attached to all his countrymen, and to their native soil, not uncommonly known by the name of Dangaya or Thieves-land. His eldest son and successor, Jajhar Singh, revolting against the court of Delhi, was driven into exile, and disappeared finally among the wilds of Gondwana, when the country was incorporated with the empire. This arrangement, however, lasted but six years, as the violent struggles of the Bundelas for independence compelled the emperor to withdraw his forces and admit the insurgents in the western part to the relation of feudatories, on condition of military service. The eastern Bundelas, under the conduct of the rajah Chatrasal, supported by the Mahrattas, successfully made head against the forces of Delhi; but being hard pressed by Ahmed Khan Bangush, the Patan

chief of Furruckabad, in 1734, solicited the aid of the Peishwa, who, succeeding in rescuing the Bundela rajah from his perilous position, was rewarded by a fort and district in the neighbourhood of Jhansi, and by a devise of the third part of Eastern Bundelcund. The Peishwa made over his portion, subject to a moderate tribute, to a Brahmin called Kasi Pandit, whose descendants held it until it recently lapsed to the East-India Company. About the same time Jhansi was wrested by the Peishwa from the rajah of Oorcha, and intrusted to a soubahdar, whose descendant retains it. The remainder of the country, from various causes, gradually became parcelled out into numerous small chieftainships. The anarchy and incessant petty wars resulting from this circumstance, encouraged the Mahrattas, under Ali Behaudar, to attempt, in 1792, the subjugation of the province. Their purpose, however, was but partially effected. Ali Behaudar spent three years in a series of desultory and harassing exertions, and ten years more in endeavours to reduce the stronghold of Callinger. He died without attaining his object, and almost immediately afterwards the state of affairs became altogether changed by the flight of the Peishwa from his capital to Bassein, and the treaty there concluded with him on the part of the East-India Company, under which and the subsequent arrangements the latter acquired the present British districts of Hummerpore and Banda. Of the two principal chiefs, who, ostensibly yielding obedience to the Peishwa, substantially held the ceded tract, Himmat Bahadur supported the views of the British authorities. His services were acknowledged by his being permitted to retain possession of his lands during his life, and by the grant of pensions to his relatives on his death, which took place in 1804. The other chief, Shamshir Bahadur, made common cause with Scindia and his Mahratta confederates against the British; but after a brief and ill-sustained attempt at resistance, was defeated by a detachment under Colonel Pouell, at Capsah, near the left bank of the river Cane, where the Mahrattas had drawn together about 12,000 men. Shamshir Bahadur ultimately submitted, on condition of receiving an annual pension of 400,000 rupees for himself and family. Further military operations have, however, from time to time been found necessary to establish firmly the British power in Bundelcund. In 1809, in consequence of the refractory conduct of the rajah of Ajegarh, that fortress was besieged by a British force, and evacuated by the enemy after having been battered for a few hours. In 1812, the possessor of the celebrated hill-fort of Callinger having set the British authorities at defiance, his stronghold was invested by a British force, which suffered a severe repulse in an attempt to storm; but the place was surrendered a few days afterwards. In 1817 the Peishwa, by the treaty of Poona, ceded to the East-India

Company all his rights, interests, and pretensions, feudal, territorial, or pecuniary, in the province of Bundelcund. The power thus transferred has been exercised with strict regard to the just claims of those interested in the transfer, and the British possessions remain studded with a variety of petty dependencies, whose rights are rigidly respected. To this is probably to be attributed the peaceful state of the country under the present settlement. With the exception of the brief and unsuccessful revolt of the jaghiredar of Chirgaon, in 1841, Bundelcund has of late years been as tranquil as any part of British India. A valuable series of drawings of the cave-temples of Callinger, together with a memoir illustrative of the antiquities of Sanchi, near Bhilsa, have been recently prepared by Lieut. Maisey, portions of which have been published by the Asiatic Society of Bengal.

BUNDIPUR, or BUNDURPUR, in Cashmere, a village at the commencement of the route to Iskardoh, over the range bounding the valley of Cashmere on the north. Close to it two considerable streams flow into the Wular Lake from the north. The water of the lake formerly reached to the village, but at present is a mile distant, in consequence of its outlet, the river Jhelum, continually deepening its bed. Bundurpur is in lat. $34^{\circ} 25'$, long. $74^{\circ} 49'$.

BUNDOEE, or BUNDOOREE, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route, by Rajapoor ferry, from the cantonment of Allahabad to Banda, and 27 miles W. of the former. Lat. $25^{\circ} 26'$, long. $81^{\circ} 28'$.

BUNDWA, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a village near the left bank of the Jumna, on the route from Banda to the town of Futtehpore, and 20 miles S.W. of the latter. Lat. $25^{\circ} 50'$, long. $80^{\circ} 38'$.

BUNDY ATMACOR, in the British district of Kurnool, presidency of Madras, a town three miles E. of the route from Cuddapah to Kurnool, 35 miles S.E. of the latter. Lat. $15^{\circ} 35'$, long. $78^{\circ} 34'$.

BUNEHUR.—A town in the native state of Bhopal, distant E. from Bhopal 28 miles. Lat. $23^{\circ} 10'$, long. $77^{\circ} 50'$.

BUNEPPARA, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a town on the route from Hummerpore to Mynpoore, and 70 miles S.E. of the latter. Lat. $26^{\circ} 32'$, long. $80^{\circ} 57'$.

BUNGALA BUL.—A town in the native state of Cashmere, or dominions of Gholab Singh, distant N. from Sirinagur 42 miles. Lat. $34^{\circ} 41'$, long. $74^{\circ} 59'$.

BUNCANAPILLY.—A jaghire or feudal possession in the British district of Cuddapah, presidency of Madras, extending from lat. $15^{\circ} 2'$ to $15^{\circ} 29'$, and from long. $78^{\circ} 8'$ to $78^{\circ} 27'$, and containing an area of about 100

square miles. When visited by Dr. Heyne in 1808, it belonged to a feudal chief of the Nizam. In 1843 it was deemed necessary to invest a British agent with the administration of civil and criminal justice and police, and the superintendence of revenue matters in this jaghire; but in 1848 the authority of the British agent was withdrawn, and the possession restored to the jaghiredar.

BUNGBO.—A short tributary of the Teesta, rising about lat. $27^{\circ} 21'$, long. $88^{\circ} 51'$, and flowing south-west for twenty-one miles, separating the territory of Bhotan from that of Sikkim, falls into the Teesta near the town of Burmiok, in lat. $27^{\circ} 10'$, long. $88^{\circ} 36'$.

BUNGEET.—A small river rising in lat. $27^{\circ} 11'$, long. $88^{\circ} 3'$, on the eastern face of a spur of the Himalayas, uniting the Sub-Himalaya with the great snowy range. It flows in an easterly direction for about forty miles, separating the native state of Sikkim from the British territory of Darjeeling, and falls into the Teesta river in lat. $27^{\circ} 4'$, long. $88^{\circ} 35'$.

BUNGONG, in the British district of Chota Nagpore, lieutenant-gov. of Bengal, a town on the route from Lohadugga to Odeipoor, 51 miles S.W. of the former. Lat. $23^{\circ} 3'$, long. $84^{\circ} 3'$.

BUNIHAR.—A town in the native state of Cashmere, or dominions of Gholab Singh, distant W. from Sirinagur 39 miles. Lat. $34^{\circ} 7'$, long. $74^{\circ} 22'$.

BUNKOULEE, in Gurwhal, is situated on the declivity of a mountain near the right bank of the Jumna, and 3,000 feet above the bed of the river. It contains about a score of houses and 150 inhabitants. Lat. $30^{\circ} 45'$, long. $78^{\circ} 8'$.

BUNNEE.—See CURCH.

BUNNEE, in the British district of Bhutiana, lieutenant-gov. of the N.W. Provinces, a village on the route from Hansi to Bhutneer, and 23 miles E. of the latter. Lat. $29^{\circ} 31'$, long. $74^{\circ} 38'$.

BUNNEE CHOWKEE, on the eastern boundary of Keonthul, a halting-place with a wooden house for the accommodation of travellers, on the route from Simla to Kotgurb, and 11 miles E. of the former post. Elevation above the sea 8,107 feet. Lat. $31^{\circ} 5'$, long. $77^{\circ} 22'$.

BUNNOO.—A fertile plain, south-west of the Kala or Salt Range, in the Punjab. It is well watered by the river Kurum, and produces abundant crops of wheat, rice, barley, maize, and other grain, sugar-cane, tobacco, and ginger. Its centre is in lat. $32^{\circ} 40'$, long. $70^{\circ} 30'$.

BUNOWL, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town 22 miles N.W. of Durbunga, 20 miles N.E. of Mozufferpore. Lat. $26^{\circ} 21'$, long. $85^{\circ} 41'$.

BUNSHEEREE, in the British district of Dinajepore, lieutenant-gov. of Bengal, a town two miles from the west bank of the river

Tangon, 22 miles S.W. of Dinajepore. Lat. $25^{\circ} 21'$, long. $88^{\circ} 21'$.

BUNSI RIVER.—An offset of the Brahmapootra, diverging from that river about lat. $24^{\circ} 52'$, long. $89^{\circ} 53'$. It flows in a south-easterly direction through the British district of Mymensing for sixty miles: subsequently dividing the district of Dacca from that of Deccan Jelapore for eighteen miles, it falls into the Dulaserree in lat. $23^{\circ} 52'$, long. $90^{\circ} 11'$.

BUNTWALLA, in the British district of South Canara, presidency of Madras, a town the principal place of the subdivision of the same name. It is situated on the north or right bank of the river Naitravutty, a considerable stream, descending from the Western Ghats, and falling into the Arabian Sea, or North Indian Ocean, eighteen miles below the town of Mangalore. Though small, Buntwalla appears to be a place of considerable trade. During the war with Tippoo Sultan, it suffered much from the rajah of Coorg, who destroyed about two hundred houses, and led one-half of the population into captivity. Distance from Mangalore, E., 14 miles; Bombay, S.E., 445; Bangalore, W., 172; Madras, W., 355. Lat. $12^{\circ} 53'$, long. $75^{\circ} 6'$.

BUNUT, in the British district of Muzaffurnugur, lieutenant-gov. of the N.W. Provinces, a town on the route from Paneeput to Suharunpoor, 25 miles E. of the former. Lat. $29^{\circ} 28'$, long. $77^{\circ} 27'$.

BUNYAWALA.—See BAMANWALA.

BUO, in the British district of Behar, lieutenant-gov. of Bengal, a town 19 miles S. of Behar, 38 miles N.E. of Gayah. Lat. $24^{\circ} 56'$, long. $85^{\circ} 36'$.

BURADEEL, or **BURADIL.**—A station on the route from Chittagong to Akyah. It is situated near the shore, and about 20 miles N. of Tok Naaf. Lat. $21^{\circ} 2'$, long. $92^{\circ} 15'$.

BURAECH.—A town in the territory of Oude, distant N.E. from Lucknow 63 miles. Lat. $27^{\circ} 34'$, long. $81^{\circ} 40'$.

BURAE.—A town in the Rajpoot state of Shekawuttee, distant S.E. from Jhoonjhnoo 25 miles. Lat. $27^{\circ} 51'$, long. $75^{\circ} 51'$.

BURAGAON, in the British district of Jounpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Azimgurh to Sultanpoor, in Oude, 36 miles W. of the former, 42 S.E. of the latter. Lat. $26^{\circ} 1'$, long. $82^{\circ} 42'$.

BURAGAON, in the British district Shahjahanpoor, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, in lat. $28^{\circ} 3'$, long. $80^{\circ} 8'$.

BURAGAON, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a village on the route, by Khasgunj, from Futtehgurh to Meerut, and 86 miles N.W. of the former. It has a few shops. Water is obtained from wells, and from the Nim Nuddi, a

small river flowing about half a mile to the west. Lat. $27^{\circ} 53'$, long. $78^{\circ} 30'$.

BURAGAUM.—A town in the native state of Gwalior, or possessions of Scindia, distant N.E. from Oojein 52 miles. Lat. $23^{\circ} 45'$, long. $76^{\circ} 20'$.

BURAGONG, in the British district of Ghazee-poor, lieutenant-gov. of the N.W. Provinces, a town on the right of the route from Ghazee-poor cantonment to Chupra, 34 miles E. of the former, 48 W. of the latter. It is situate on the right bank of the Toms (north-eastern), here called the Surjoo, and traversed by means of ferry during the rains, and ford at other seasons. Lat. $25^{\circ} 46'$, long. $84^{\circ} 3'$.

BURAGONG, in Bundelcund, a town in the native state of Tehree, distant S.E. from Tehree 16 miles. Lat. $24^{\circ} 35'$, long. $79^{\circ} 6'$.

BURAHA.—A town in the territory of Oude, distant S. from Lucknow 56 miles. Lat. $26^{\circ} 3'$, long. $81^{\circ} 10'$.

BURAL, in the British district of Moazfur-nugur, lieutenant-gov. of the N.W. Provinces, a village near the southern boundary towards Meerut. Lat. $29^{\circ} 15'$, long. $77^{\circ} 25'$.

BURAMEE, or **BRAMEE**, in the Rajpoot state of Joudpore, a village on the route from Nusseerabad to Deesa, and 139 miles S.W. of the former. Lat. $25^{\circ} 22'$, long. $73^{\circ} 23'$.

BURANA, in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces, a small town on the route from Hansi to Neemuch, and 61 miles S. of the former. The water, which is brackish, is obtained from wells. Lat. $28^{\circ} 21'$, long. $76^{\circ} 17'$.

BURAPOORA, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, a town on the route from Bijnour to Sireenagur, 26 miles N.E. of the former. Lat. $29^{\circ} 31'$, long. $78^{\circ} 38'$.

BURA PUHARA, in the territory of Gwalior, a town on the route by Jhansi, from Calpee to Goona cantonment, 158 miles S.W. of former, 35 N.E. of latter. Water is abundant from a small stream, and supplies may be had. Lat. $25^{\circ} 4'$, long. $77^{\circ} 54'$.

BURAR, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a town 12 miles W. of the right bank of the Ganges. Lat. $26^{\circ} 33'$, long. $80^{\circ} 10'$.

BURAREE, in the British district of Etawah, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawah to Calpee, and eight miles S.E. of the former. Lat. $26^{\circ} 44'$, long. $79^{\circ} 11'$.

BURARYA, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town on the right bank of the Coosy river, 56 miles N.W. of Purneah. Lat. $26^{\circ} 31'$, long. $87^{\circ} 11'$.

BURASOO, in the British district of Boondshuhur, lieutenant-gov. of the N.W. Provinces, a town on the route from Khasganj to Meerut, and 58 miles S. of the latter. Lat. $28^{\circ} 15'$, long. $78^{\circ} 6'$.

BURASS, in the British district of Paneput, lieutenant-gov. of the N.W. Provinces, a town on the route from Kurnal to Kythul, 111 miles W. of the former. It has a population of 39,056. Lat. $29^{\circ} 45'$, long. $76^{\circ} 49'$.

BURDA, or **JAITWAR**, in the peninsula of Kattywar, province of Guzerat, a division bounded on the north and north-east by the district of Hallar; on the east by that of Soruth; on the south-west by the Arabian Sea. It lies between lat. $21^{\circ} 11'$ — $21^{\circ} 57'$, long. $69^{\circ} 30'$ — $70^{\circ} 7'$. There is no official return of the area, but 570 square miles may be regarded as a probable approximation to the fact. The seacoast extends in a direction from north-west to south-east for sixty-three miles, and in that distance comprehends the ports Meednee, at the north-western extremity, on the estuary of the Boortoo; Poorbunder, twenty miles south-east of it; and Nurvee Bunder, still further south-east, and sixteen miles from the last-mentioned port. The river Boorto flows for some miles along its northern frontier; and the Bhader, the largest in the peninsula of Kattywar, having for some distance formed its south-western boundary, subsequently enters the district, and falls into the sea at Nurvee Bunder. The district belongs to the chief denominated the Rana of Poorbunder, from his residing at that town: he is of the Jaitwa tribe of Rajpoots. Besides the three seaports mentioned above, the district contains 103 villages; and the population is estimated at 46,980. The rana is subordinate to the Guicowar, to whom, according to a recent statement, he pays an annual tribute of 8,775 rupees. To the British government he pays a tribute of 22,890 rupees; and that government receives in addition a share of the custom duties of Poorbunder, amounting to 26,001 rupees, ceded to the East-India Company in 1809, for the maintenance of a small military force at that place.

BURDAPOOR.—A town in Hyderabad, or dominions of the Nizam, distant N.W. from Hyderabad 160 miles. Lat. $18^{\circ} 39'$, long. $76^{\circ} 33'$.

BURDHEE.—A town in the native state of Rewah, situate on an abrupt eminence on the right or south bank of the river Sone, at the confluence of the Goput. The district of which this town is the principal place formerly constituted a portion of the territory of the rajah of Singrowly, a tributary of the rajah of Rewah, by whom he was dispossessed of the north-western portion of his dominions. Distant E. from Rewah 68 miles. Lat. $24^{\circ} 32'$, long. $82^{\circ} 29'$.

BURDWAN.—A district under the presidency of Bengal, named from its principal place. It is bounded on the north by the British district of Beerbhoom; on the north-east and east by the British district Nuddea; on the south by the British districts of Hoogly and Midnapore; on the west by the British district Bancoorah. It lies between lat. $22^{\circ} 52'$ — $23^{\circ} 40'$, long.

87° 21'—88° 23'; is about seventy miles in length from north-east to south-west, and sixty in breadth. The area is 2,224 square miles. The district abounds in rivers, the most important of which are the Hadjee, Bhaggruttee, Jellinghee, Damooda, and Dalkissore. The Hadjee and Damooda are navigable during the periodical rains of autumn, and serve as channels for the conveyance of coal, iron, and other bulky or heavy goods, to Calcutta. The Bhaggruttee and Hooghly are navigable at all times. The smaller watercourses and torrents are numerous; and as most of the streams of this district are subject to be greatly swollen in the periodical rains, the country suffers sometimes from dreadful inundations, "the water rushing down as from a sluice, in a body from one to three or four feet in perpendicular height." In 1823 a dreadful and general inundation took place, and in many places quite changed the aspect of the country, obliterating fine villages, tanks, and other useful monuments of industry, and converting a scene of rich cultivation into a sandy waste. Such frightful calamities are not of uncommon recurrence, notwithstanding that bunds or embankments are maintained in various places, to the total extent of 308 miles. The climate, though very sultry during the hot season, is considered not insalubrious, and the town of Burdwan enjoys a peculiarly high reputation in this respect. This is one of the most productive parts of India, yielding fine and plentiful crops of rice, sugar, potatoes, indigo, oil-seeds, tobacco, cotton, and some others of less importance. The refining of sugar is one of the most important objects of manufacture, being conducted extensively, and with considerable skill. A large proportion of the iron and coal sent down to Calcutta under the name of Burdwan is not raised here, but in the adjoining district of West Burdwan or Bancoorah, and principally at Raneegunje, in the north-west of the last-mentioned district. This coal, though incomparably cheaper, is stated to be less suitable to steam purposes than English coal. The other wares exported are coarse silks, hides, horns, lac, and timber. The population is given under the article **BENGAL**.

Many of the natives of Burdwan possess large estates. The principal among them is the titular rajah of Burdwan. The present rajah is the adopted son of his predecessor, who died a few years ago; a morose miser and very rich, having an annual income of 130,000*l.*, and a vast sum accumulated by himself and his ancestors; of which hoarded wealth he took the most extraordinary care. Soon after his decease, a pretender to the raj of Burdwan presented himself, in the person of Aluk Shah, professing to be Pertaub Chund, the rightful rajah, who died fourteen years before. Aluk Shah applied for assistance to some of the neighbouring native chiefs, and, refusing to disband his followers, was arrested as a disturber of the peace, and sentenced to imprisonment. The present rajah, who succeeded to

the title upon attaining his majority in 1840, in several instances has manifested a better spirit than his predecessor, by bestowing liberal donations for useful public objects. A gift of 25,000 rupees, made about the year 1843, was applied, under the sanction of the government, partly to the extension of a branch of the Medical College, and the remainder to the foundation of scholarships in the Hindoo College, called the Rajah of Burdwan's Scholarships. A previous sum of 12,600 rupees, contributed partly by the rajah and partly by other persons, was devoted to the establishment of a school at Burdwan.

The great military route, denominated the Great Trunk Road from Calcutta to Benares and the North-Western Provinces, proceeds through this district, passing through the town of Burdwan: the old line through Bancoora traverses the south-western corner of the district. There is also a route from north to south, from Cutwa to Hooghly, along the right bank of the Bhaggruttee; and another from north-east to south-west, from Berhampore, in Moorsheadabad, to Midnapur, through the town of Burdwan; and another from north-west to south-east, from Sooree, in the British district Beerbhoom, to the town of Burdwan. The district is bisected by the railway now under construction from Calcutta to Rajmahal, and intersected also by the branch line proceeding from the vicinity of Burdwan to the collieries at Raneegunje. The tract comprised within this district was acquired by the East-India Company, under treaty with Meer Cossim, in 1760, and confirmed by the emperor Shah Alum in 1765.

BURDWAN, the principal place of the British district of the same name, under the presidency of Bengal, is situate on the left bank of the river Damooda, and on the route from Calcutta to Benares, nearly 74 miles N.W. of the former, about 346 S.E. of the latter. Jacquemont describes it as consisting of an assemblage of crowded suburbs, of wretched huts, with walls of mud, and covered with thatch, having no temples of striking aspect, and few handsome houses. The residence of the titular rajah is a great collection of buildings of various sizes and colours, without symmetry or regularity, and surrounded by extensive gardens in equally bad taste. Contiguous to the town is an artificial piece of water of great extent, its area being estimated at thirty acres. The earth excavated from it has been formed into a causeway surrounding it, and an ornamented porch gives access to the water, which is much frequented by the natives for the purpose of bathing. The population of the town and suburbs was found in 1814 to occupy 9,805 houses. Of this number, 7,651 were then inhabited by Hindoos, and 2,154 by Mussulmans; and the average ratio of inmates to dwellings being stated at eleven to two, the number of inhabitants appears to have then been 53,927. Here is located the civil

establishment of the district, consisting of the ordinary European functionaries and native assistants. One of the government English schools has been established in the town: there is also here an English school under the direction of the Church Missionary Society. Lat. 23° 12', long. 87° 56'.

BURENDA, or **BROANG PASS**, in Busahir, across the most southern range of the Himalaya, which has a direction from east-south-east to west-north-west. It is reached from the south by travelling up the course of the Pabur river nearly to its source. Elevation above the sea 15,095 feet. Lat. 31° 23', long. 78° 12'.

BURENG.—A valley of Cashmere, extending in a direction from south-east to north-west, between lat. 33° 20'—33° 30', long. 75° 10'—75° 26'. Its upper extremity reaches nearly to the summit of the Snowy Panjal mountain, bounding Cashmere on the east; and the route by the Mirbul Pass, over that ridge, proceeds up the valley, which is drained by the river Bureng. The whole of the valley appears (as Vigne expresses it) honeycombed by caves and subterraneous water-channels, and in consequence abounds in springs of great volume and force. Of these the principal are the intermitting fountain of Sondibreri, and the vast spring of Echibul, which last is supposed to be the efflux of the engulfed water of the Bureng river.

BURENG RIVER, in Cashmere, flowing through a valley of the same name, is formed by the junction of two streams, one having its source in a large spring near the summit of the Wurdwun Pass, and flowing southwards; the other rising on the western declivity of the Snowy Panjal, and flowing north-west. After their junction, a great part of the water sinks suddenly by an opening in the rocky bed of the stream; the rest is saved by means of a canal, and conveyed north-westward toward Islamabad, beyond which, in lat. 33° 42', long. 75° 14', it joins the Lidur river, forming one of the principal feeders of the Jhelum. The length of the course of the Bureng is about forty miles.

BURGATCHEE, in the British district of Rajeshaye, lieutenant-gov. of Bengal, a town on the route from Rampore to Dinajepore, 16 miles N.W. of the former. Lat. 24° 27', long. 88° 22'.

BURGAUM, in the British district of Candesh, presidency of Bombay, a town on the left bank of the Girna river, 48 miles E. of Malligaum. Lat. 20° 40', long. 75° 12'.

BURGHAUT.—A town of Bombra, one of the native states on the south-west frontier of Bengal, under the political superintendence of the government of India, distant E. from Sumbulpoor 38 miles. Lat. 21° 30', long. 84° 36'.

BURGOONDA.—A town in the native state of Indore, or territory of Holkar, distant

S. from Indore 19 miles. Lat. 22° 26', long. 75° 49'.

BURGOW.—A town in the native state of Sirgoojah, on the south-west frontier of Bengal, distant S. from Sirgoojah 16 miles. Lat. 22° 54', long. 83° 12'.

BURGOWA, in the district of Burdhee, in the native state of Rewa, a town among the northern mountains of Gondwana, 30 miles S. of the town of Burdhee, 68 S. of Mirzapoor, 400 W. of Calcutta by Hazareebagh. Lat. 24° 10', long. 82° 30'.

BURGUDDA, in the British district of Mirzapore, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Ganges, 771 miles N.W. of Calcutta by the river route, 37 miles S.E. of the city of Allahabad by the same. Lat. 25° 16', long. 82° 12'.

BURGUDOOA.—A town in the territory of Oude, distant N.E. from Oude 55 miles. Lat. 27° 27', long. 82° 42'.

BURGUR, in the British district of Palamow, lieutenant-gov. of Bengal, a town on the right bank of the river Kunher, 30 miles S.W. of Palamow. Lat. 23° 38', long. 83° 35'.

BURGUR, in the British district of Sumbulpoor, on the south-west frontier of Bengal, a town on the route from Sumbulpore to Nagpore, 22 miles S.W. of the former. Lat. 21° 20', long. 83° 40'.

BURGURH.—A small raj within the country superintended by the political agent for the south-west frontier of Bengal. Its centre is in lat. 21° 53', long. 83° 5': its area is 399 square miles. The effect of a rebellion some years ago was to render the country a desert; but it was expected to improve under the rajah of Ryegurh, the south-western part of whose raj it adjoins, and by whom it is now held. Its annual value has been estimated at about 10,000 rupees. The tribute is 320 rupees. The population is estimated at about 18,000. Burgurh, the principal place, is in lat. 22° 1', long. 83° 9'.

BURHAMPORE, in the British district of Moorsheadabad, lieutenant-gov. of Bengal, a town situate on the left bank of the river Bhagruttee, a great offset of the Ganges, and on the route from Calcutta to Moorsheadabad. The depressed and moist site rendered it extremely unhealthy, and the prevalence of dreadful mortality was painfully brought to view by the extent and crowded state of the European burial-ground. Among the endemic diseases, cholera especially prevailed. Hence the station was regarded with great apprehension and dislike by those consigned to it by the exigencies of the civil or military service. Latterly, however, sanitary measures have been introduced with so high a degree of success, that the climate of the station, so far from proving baneful to the troops now located there, is reported to be second to none in Bengal for salubrity. Nature and art have combined to give this place an exterior in many

BUR.

respects attractive. Stately houses arise in convenient spots in the neighbourhood, for the accommodation of those whose residence partakes of the character of permanence, and give the station an air of grandeur and importance. This place is the seat of the civil establishment, consisting of the usual European and native functionaries. The want of a well-conducted public seminary in this town has long been felt; and a project is on foot to establish a college of the same character as those of Kishnaghur and Hooghly. The military cantonments command the notice of the traveller. The grand square, a spacious quadrangle, inclosing an excellent parade-ground, is particularly striking; and the quarters of the European officers are handsome edifices, built of brick, and stuccoed, and forming ranges of considerable extent. In the arrangements of the Bengal army, this place is included within the presidency division, and usually is occupied by a body of infantry and a detail of artillery. Distance N. from Calcutta by land 118 miles, by water 161; from Moorshedabad, S., five miles. Lat. $24^{\circ} 5'$, long. $88^{\circ} 17'$.

BURHAMPOREE.—A town in Nagpore, distant S.E. from Nagpore 60 miles. Lat. $20^{\circ} 39'$, long. $79^{\circ} 55'$.

BURHIAH, in the territory of Oude, a village on the route from Seetapoor cantonment to that of Shahjehanpore, 45 miles N.W. of the former, 17 miles E. of the latter. Lat. $27^{\circ} 50'$, long. $80^{\circ} 14'$.

BURHIN, or **BURHUL**, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a town on the route from Azimgurh to Goruckpore cantonment, 32 miles N.E. of the former, 33 S.E. of the latter. It has a bazaar, and is situate on the left bank of the Gogra, here a great river running in one channel, and crossed by ferry. Lat. $26^{\circ} 15'$, long. $83^{\circ} 34'$.

BURHUD.—A town in the native state of Gwalior, or possessions of Scindia, distant N.E. from Gwalior 31 miles. Lat. $26^{\circ} 28'$, long. $78^{\circ} 40'$.

BURKAGURH, in the British district of Chota Nagpore, lieutenant-gov. of Bengal, a town on the route from Hazareebagh to Midnapore, 46 miles S. of the former. Lat. $23^{\circ} 20'$, long. $85^{\circ} 19'$.

BURKAIRA, in the territory of Gwalior, or possessions of Scindia, a village on the route from Goona to Mow, 28 miles S.W. of former, 157 N.E. of latter. Water is abundant here, and supplies may be obtained. Lat. $24^{\circ} 17'$, long. $77^{\circ} 9'$.

BURKELE.—A town in the native state of Bora Samba, on the south-west frontier of Bengal, distant S.W. from Sumbulpore 75 miles. Lat. 21° , long. $82^{\circ} 59'$.

BURKOT, in Gurhwal, a village on a ridge overhanging a torrent, which about two miles

to the north-west falls into the Jumna on the left side. The scenery is of very great beauty. Skinner, who states that he visited nearly all the celebrated prospects of Europe, considers them surpassed by those of this sequestered tract. The rajah of Tirhee has a palace here, but in a style much at variance with the noble character of the scenery. Lat. $30^{\circ} 47'$, long. $78^{\circ} 17'$.

BURKUTUH, in the British district of Muzaffurnagar, lieutenant-gov. of the N.W. Provinces, a village on the route from Kurnoul to Meerut, and 47 miles S.E. of the former. Lat. $29^{\circ} 15'$, long. $77^{\circ} 22'$.

BURLUHJUT, or **BURLAH**, in the British district of Muzaffurnagar, lieutenant-gov. of the N.W. Provinces, a village on the route from Kurnoul to Meerut, and 32 miles S.E. of the former. Lat. $29^{\circ} 25'$, long. $77^{\circ} 25'$.

BURMAH.—An independent kingdom, situate between Eastern India and China. Previous to the year 1825 the Burmese empire was one of considerable extent and importance; but, stripped since that period of some of its richest provinces by the results of war, its territory now falls within very moderate limits, and its power has become proportionately circumscribed. It is bounded on the north by Assam and Thibet, from which it is separated by the Himalayas; on the east by China; on the south by the recently-acquired British province of Pegu; and on the west by mountain-ranges dividing it from Arracan, Tipperah, and Munnepore. It extends from lat. $19^{\circ} 25'$ to $28^{\circ} 15'$, and from long. $93^{\circ} 2'$ to $100^{\circ} 40'$, measuring 540 miles in length from north to south, and 420 in its greatest breadth; and contains an area of 96,000 square miles. Little more than a vague guess can be made of the number of the inhabitants. According to Mr. Crawford's estimate of twenty-two to the square mile, the population would scarcely exceed 2,000,000, and appears to be chiefly concentrated on the banks of the Irawaddy, where the principal towns are built. The general slope of the surface of the country is to the south, as indicated by the descent of its rivers. The Irawaddy, deriving its source from the snowy range of the Himalayas, in lat. $28^{\circ} 5'$, long. $97^{\circ} 58'$, and flowing in a direction for the most part due south, nearly bisects the Burmese territory, and crosses into the British district of Pegu at some distance above the town of Prome. In its course it flows by the town of Ummenapooora, and a few miles below passes the city of Ava. From this point it bends to the westward, and upon resuming its original direction, it receives on the right side its great confluent the Khyendwen, flowing also from the north. The only remaining river of any magnitude is the Salween, which has its origin in the same range of mountains as the Irawaddy, and flowing in a direction parallel to that river, but more to the eastward, enters the British territory in nearly the same latitude, after a course of equal length.

The physical aspect of the territory from its southern frontier to the latitude of the capital is characterized by unevenness and general elevation; and beyond this, to its northern limit, it is decidedly mountainous. The plains, however, and more especially the valleys near the rivers, are remarkably fruitful. The principal products are wheat, rice, sugar-cane, tobacco, indigo, and cotton. Tea is cultivated on the hills by the mountain tribes. Horticulture is almost wholly neglected among the Burmese. Green vegetables form a considerable portion of their diet; but these for the most part are collected from the forests and marshes, and are not the result of cultivation. The seasons are regular; and although the heat which immediately precedes the rains is intense, it is of brief duration. Of the general salubrity of the climate, the best evidence perhaps is afforded in the vigour and activity of the natives. Our acquaintance with the forest productions of Burmah is not proportioned to the importance of the subject. Among them teak holds a distinguished place; and the tracts covered by this timber are unquestionably the most extensive of those in India. The *Mimosa catechu*, a tree rising to the height of thirty or forty feet, is widely disseminated, and yields the drug known as the catechu, or terra Japonica. Burmah, as might be expected from its mountainous character, abounds in mineral wealth. Gold is discovered in the beds of streams descending from the Himalayas. Silver-mines are wrought in one place in the eastern territory of Lao, and the inferior minerals,—iron, tin, lead, antimony, and others,—are met with in abundance, more particularly on the eastern frontier towards China. Quarries of statuary marble are worked in the neighbourhood of Ummerapoora. Traces of coal have been discovered on the banks of the Irawaddy, in the vicinity of the petroleum-wells of Renangyaong. Precious stones, consisting of the sapphire and ruby species, abound; and so highly are they esteemed, that the ownership of the mines appears to constitute the chief glory of the sovereign. When Colonel Burney was the resident in Ava, official communications were addressed to him under the authority of the "Founder of the great golden city of precious stones; the possessor of mines of gold, silver, rubies, amber, and noble serpentine."

In a country much of which still remains to be brought under the dominion of man, wild animals may be expected to be numerous. The most remarkable are the elephant, rhinoceros, tiger, spotted leopard, and several species of wild cat. It is worthy of notice, that while the feline species abounds, none of the canine family, so frequent in the neighbouring country of Hindostan, are, so far as we are acquainted, to be met with in Burmah. According to Crawford, "there are neither wolves, jackals, foxes, nor hyænas; and this zoological feature is said to extend to all the countries of tropical Asia lying east of Bengal." Of domestic quadrupeds, the chief are the ox, buffalo, and

horse. The latter rarely exceeds thirteen hands in height: his chief use is for the saddle, being rarely employed for draught or as a beast of burthen. The camel is unknown. That so rude a people should have made little progress in the useful arts, can excite no surprise. The manufactures of the country are restricted to articles required for home-consumption, and few find their way to foreign markets. Cotton and silk goods are worked at Ummerapoora and Ava, as are also coarse species of pottery and cutlery; and if to these be added gold and silver ornaments of rude fabrication, the list of Burmese manufactures may be considered as nearly complete. Passing to the religion of the country, it may be noticed that the Burmese, though Hindoos, are not Brahmins, but Bhuddists. Their government is despotic, and their laws, like their religion, are Hindoo.

A degree of uncertainty hangs over the precise period of the arrival of the British in Burmah. It seems, however, to have been of early date, as at the commencement of the seventeenth century certain agents of the East-India Company were included in the general expulsion of Europeans from Ava. The edict of banishment did not, however, extend to the prohibition of commercial relations, its object being simply the deportation from the country of foreign residents; and trade continued to be carried on as usual by British ships with the principal ports of Burmah. In 1687 the British took possession of the island of Negrais, situate at the mouth of the western branch of the Irawaddy. Hitherto British intercourse with Burmah was purely of a commercial character; and such continued to be the case for seventy years later. Towards the close of this interval, a civil war had broken out between the Burmese and the Peguers, which in 1752 terminated in favour of the latter; but their yoke was of brief duration, and the Burmese, under their chief Alompra, succeeded in recovering their political independence. Alompra's success, according to cotemporary authority, was promoted through the covert assistance of the British factory at the entrance of the Irawaddy; and the subsequent cession of Negrais to the British, together with the grant of a piece of land at Bassein for the purposes of a factory, afford plausible grounds for accrediting the rumour. From the date of Alompra's triumph over the Peguers, every enterprise of the Burmese, for the space of more than half a century, appears to have been crowned with success. Siam felt the force of their arms in 1766. Formidable invasions of their territory by the Chinese in the three following years were triumphantly repulsed. Arracan merged into the empire in 1783. Ten years later they extorted from the Siamese the cession of the whole coast of Tenasserim; and the limits of the empire were subsequently extended by the annexation of Munneepore and Assam. About the year 1794, a party of Mugh robbers from Arracan

taking refuge in the adjoining British province of Chittagong, a military force was sent by the Burmese across the frontier, in pursuit of the fugitives, without any reference to the British government. A detachment under General Erskine forthwith proceeded to Chittagong, to repel the irruption into the British territories; and upon an amicable arrangement between the general and the Burmese commander, the troops of the latter were withdrawn. On the retirement of the aggressors, the fugitive robbers were secured by the British authorities, tried, found guilty, and delivered over to the Burmese. The act was attributed by the latter to timidity. It was followed up, on the part of the British, by successive missions, in the hope of obtaining political and commercial advantages; but in each instance the British representative experienced humiliating neglect or studied insult, and no beneficial results ensued. In 1811 a Mugh chief, named Khyrberring, who, it appears, had fled into Chittagong upon the subjugation of his country by the Burmese, collected a number of followers, and invaded Arracan, with the intention of expelling the Burmese from that province. He was joined on his arrival by several of his countrymen, who readily seized an opportunity to avenge themselves upon their conquerors for the tyranny and oppression which they had experienced from them. Success for a short time attended their efforts. They were, however, in the end completely defeated, and compelled again to seek refuge in Chittagong. This irruption the Burmese believed to have been instigated and supported by the British. In order to remove the suspicion, another mission was determined on, and Captain Canning was deputed to Ava to afford explanation. The embassy, like those which had preceded it, was exposed to insult and danger; and having experienced much contumelious treatment from the authorities at Rangoon, was compelled to return without reaching its destination. Khyrberring still continued at large; and the refusal to deliver up the chief and his associates to the Burmese, incensed the latter, and was the means of aggravating the unfriendly relations between the people and the British. At length a formal demand was preferred by the Burmese rajah of Ramree for the surrender of the Mugh fugitives. A reply was addressed to the Burmese sovereign, based upon the principle maintained by the British government, of refusing to deliver up those who had sought its protection. In a few months a second letter was received, demanding the cession of the elephant-grounds of Ramoo, together with Chittagong, Moorshedabad, and Dacca, stated to be Burmese dependencies; and the demand was accompanied by a threat to commence hostilities, if the claim were not complied with. An answer was returned to the Burmese sovereign, to the effect that the Governor-General regarded the letter as an unauthorized act on the part of the rajah of Ramree, and

trusted that such an unwarranted proceeding would receive the punishment it merited. This communication remained unnoticed, and thus matters rested. At this period Assam became the scene of civil dissension; and the Burmese, interfering on behalf of one of the candidates for power, succeeded in placing him on the throne. It was not intended, however, that he should permanently occupy this position, and he was shortly after deposed by his former supporters, who set up one of their own chiefs in his place. The Burmese thus became neighbours to the British on the northern as well as on the southern frontier; and availing themselves of their favourable position, committed several acts of aggression on villages within the British territory. Upon explanation and satisfaction for these outrages being demanded, the Burmese government affirmed that the villages had been attacked by mistake. But aggression was not restricted to the territories bordering on the newly-acquired possessions. For some time the Burmese had been gradually encroaching on the frontier of Chittagong, and had claimed jungles which were frequented by British elephant-hunters, many of whom had been detained on the pretence that they were trespassing on Burmese territory. Among other instances of outrage and treachery practised by this nation, was an assault upon a Mugh boat proceeding to the island of Shah-poorce, laden with rice; the crew of which were killed. It was considered necessary, in consequence, slightly to increase the guard on the island. Its withdrawal, and the surrender of the island, were forthwith demanded by the governor of Arracan; and the requisition being followed up by the despatch of 1,000 troops under the rajah of Ramree, the place was attacked and captured on the 24th September, 1823, three of the thirteen men who composed the guard stationed on the island being killed. It was at the same time intimated, that any attempt on the part of the British to retake the island would be resented by attacking the cities of Moorshedabad and Dacca. The island was, notwithstanding, shortly again occupied by the British; and upon the occurrence of further acts of encroachments and outrage by the Burmese, the British government, in February, 1824, declared war. In March a large force, which had been despatched from the presidencies of Bengal and Madras, reached the Burmese dominions, under the command of Sir Archibald Campbell. This officer commenced operations on the Rangoon river, and took possession of the town of that name on the 12th May. He afterwards attacked and reduced the principal forts at the mouth of the Irawaddy. In January of the following year a force of 11,000 men was assembled in Chittagong, under the command of General Morrison. Its first object was to be the reduction of the province of Arracan; after which it was intended to form a junction with the army of Sir Archibald Campbell on the Irawaddy. One of these objects was accom-

plished by the capture of the capital, and the occupation of the entire province of Arracan; but the junction with the main army was frustrated by the impracticability of crossing the Yoomadoug Mountains, the Aeng route being then unknown to the British. In the early part of May the rains set in, and with them commenced a season of sickness, privation, and distress. Fever and dysentery broke out to an alarming extent, and many, both officers and men, who had escaped the sword of the enemy, were struck down by disease. At length the maladies which had afflicted the troops became universal, and it was evident that the only chance of preventing the whole force from falling a sacrifice to the climate was to withdraw it from the pestiferous influence to which it was subjected. A few divisions were readily transferred to more salubrious situations on the islands of Cheduba, Ramree, and Sandoway, and the remainder of the troops were recalled to Calcutta. In the mean time Sir Archibald Campbell, who had been twice disappointed in the hope of bringing affairs to an amicable and satisfactory termination, was prosecuting the war with vigour. He had taken possession of Promé; Mellore had been carried by force; and several brilliant and successful exploits were achieved under circumstances of great difficulty and discouragement. The Burmese proved by no means contemptible enemies; it was only when beaten at every point that they became alarmed for the safety of their capital, which the British army was rapidly approaching; and under the influence of this feeling they at length consented to terms of peace. A treaty was concluded at Yandaboo on the 26th of February, 1826, in which, among other stipulations, it was provided that the coast of Tenasserim, together with the province of Arracan, and its dependencies the islands of Ramree, Cheduba, and Sandoway, which had been conquered by the British, should be retained by them; that the king of Ava should renounce all claims upon the principality of Assam and the adjoining states of Cachar, Jyntea, and Munneepore, and that an accredited minister from each nation should reside at the court of the other.

Amicable relations being thus restored between the two countries, a British resident was deputed to the court of Ava. No indisposition appears to have been manifested on the part of the Burmese to the maintenance of these friendly arrangements during the reign of the king by whom the treaty had been ratified; but in 1837 this potentate was deposed, and his brother, Prince Therawaddi, usurped the throne. The new monarch evinced great repugnance to the residence of a British officer at his court; and in deference to the royal prejudice, the British minister obtained the permission of his government to remove to Rangoon. But the change of locality effected no alteration in the unfriendly conduct of the king, and it was ultimately determined altogether to withdraw the British residency

from Burmah. This took place in 1840. Twelve years later, intelligence reached Calcutta that the commanders of two British vessels had been exposed to certain unwarrantable and oppressive acts by order of the governor of Rangoon; and Commodore Lambert was deputed to the place to demand reparation for the injuries which had been sustained. The Burmese authorities met the requisition by a refusal of compensation, accompanied by marked indignities towards the British officers; whereupon Commodore Lambert placed the principal ports in a state of blockade, and returned to Calcutta. There was now little room for hesitation in choosing the course which the British government ought to pursue. The question was, whether it should abandon its subjects and acknowledge its inability to protect them, or seek redress by force of arms; and there can be no doubt that it decided rightly in preferring the latter branch of the alternative. It was determined, however, not to have recourse to war except in the last resort, and only when all other means for the peaceable arrangement of existing differences had been tried and failed. Accordingly, the ultimatum of the British government was formally laid before the governor of Rangoon, in which compliance with three conditions was declared indispensable to the preservation of peace: the transmission of an apology for the insult offered to the British officers acting under Commodore Lambert; prompt payment of the sum of 990*l.* as compensation to the commanders of the two British vessels whose rights had been outraged; and the reception of a British agent under the provisions of the existing treaty. These terms being rejected, war was declared. This took place in 1852, and no want of energy was evinced in its effective prosecution. Early in April Martaban fell an easy conquest. The storming of Rangoon, which occurred a few days later, afforded a better opportunity for the display of British valour; but its capture was not effected without considerable loss both of officers and men. Bassein was the next in succession of the Burmese towns which fell to the arms of the British, and with Rangoon and Martaban constituted an excellent base for future operations. Promé followed, falling into the hands of the British almost without subjecting them to the necessity of an effort. The city of Pegu, previously taken and abandoned, was a second time occupied, and with more permanent success. A determined attempt on the part of the Burmese was made to recover it once more; but it was met by the officer in command (Major Hill, of the Madras fusiliers) with a union of decision and skill which enabled him to maintain it, though under great difficulties, until relief arrived. The lower portion of the Burmese territories was now actually in the hands of the British, and the formal annexation of the conquest was announced in the following proclamation:—"The court of Ava having refused to make amends for the injuries and

insults which British subjects had suffered at the hands of its servants, the Governor-General of India in Council resolved to exact reparation by force of arms. The forts and cities upon the coast were forthwith attacked and captured; the Burman forces have been dispersed wherever they have been met; and the province of Pegu is now in the occupation of British troops. The just and moderate demands of the government of India have been rejected by the king; the ample opportunity that has been afforded him for repairing the injury that was done, has been disregarded; and the timely submission, which alone could have been effectual to prevent the dismemberment of his kingdom, is still withheld. Wherefore, in compensation for the past, and for better security in the future, the Governor-General in Council has resolved, and hereby proclaims, that the province of Pegu is now, and shall be henceforth, a portion of the British territories in the East. Such Burman troops as may still remain within the province shall be driven out; civil government shall immediately be established; and officers shall be appointed to administer the affairs of the several districts. The Governor-General in Council hereby calls on the inhabitants of Pegu to submit themselves to the authority, and to confide securely in the protection of the British government, whose power they have seen to be irresistible, and whose rule is marked by justice and beneficence. The Governor-General in Council, having exacted the reparation he deems sufficient, desires no further conquest in Burmah, and is willing to consent that hostilities should cease. But if the king of Ava shall fail to remove his former relations of friendship with the British government, and if he shall recklessly seek to dispute its quiet possession of the province it has now declared to be its own, the Governor-General in Council will again put forth the power he holds, and will visit with full retribution aggressions which, if they be persisted in, must of necessity lead to the total subversion of the Burman state, and to the ruin and exile of the king and his race." The ruler of Ava declined acceding to any formal treaty, but it was understood that he professed to abstain from active hostilities.

BURMIOK.—A town in the native state of Sikhim, distant N.E. from Darjeeling 19 miles. Lat. 27° 10', long. 88° 34'.

BURNAH.—A small river rising in the British district of Allahabad, about 13 miles E. of the city of that name, and in lat. 25° 23', long. 82° 8'. It takes a north-easterly course through the district for about twenty-five miles, when, turning south-east, it for fifty miles forms the boundary between the districts of Mirzapore and Jounpore; continuing its course in the same direction, it enters the district of Benares, through which it flows for thirty miles, passing the cantonment of Sikraul, and along the north side of the city of Benares, and falls into the Ganges on the left

side, in lat. 25° 18', long. 83° 7'; its total length of course being about 105 miles. During the periodical rains it is navigable for boats of considerable tonnage.

BURNAH, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Kalee Nuddee, 38 miles W. of Furruckabad. Lat. 27° 26', long. 79° 2'.

BURNAWA, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, on the right bank of the Hindun. Lat. 29° 7', long. 77° 29'.

BURNUGGUR, in Guzerat, or territory of the Guicowar, a town 52 miles N. of the city of Ahmedabad. It has considerable trade, conducted principally by wealthy Brahmans, of whom many reside here. Population 12,000. Lat. 23° 48', long. 72° 38'.

BUROD.—A town in the native state of Gwalior, or possessions of Scindia's family, distant N. from Oojein 40 miles. Lat. 23° 44', long. 75° 43'.

BURODA, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Jeypore, and 11 miles W. of the former. The road in this part of the route is good, the country highly cultivated. Lat. 27° 8', long. 77° 55'.

BUROOA, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Almora to the town of Moradabad, and 58 miles N. of the latter. It is situate on the Dubha river, at the northern frontier of the district, towards Kumaon. Lat. 29° 21', long. 79° 12'.

BUROONDA, in the Rajpoot state of Joudpore, a village on the route from the town of Joudpore to that of Ajmere, and 59 miles N.E. of the former. It contains 350 houses, supplied with good water from a tank and four wells, and is situate in an open grassy country; population 1,645. Lat. 26° 20', long. 74° 4'.

BUROREE, or **BUROWA**, in the territory of Gwalior, or possessions of Scindia's family, a town one mile to the W. or right of the route from the fort of Gwalior to Saugor; nine miles S. of former, 178 N.W. of latter. Lat. 26° 8', long. 78° 10'.

BUROSI, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Allypore, and 15 miles N. of the former. Lat. 27° 20', long. 78° 6'.

BUROTA, in Gurhwal, a village on the right bank of the Bhagirathi, as the Ganges is called in the upper part of its course. It is situate eighty feet above the stream, in a country cultivated to a considerable extent, especially for opium. Lat. 30° 36', long. 78° 23'.

BUROTL.—See **BANMOWTEE**.

BUROULUH, in the British district of

BUR.

Goorgaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to Muttra, and 45 miles S. of the former. Lat. $28^{\circ} 5'$, long. $77^{\circ} 25'$.

BUROUN, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Aligurh to that of Futtehgurh, and eight miles N.W. of the latter. It has water from wells. Lat. $27^{\circ} 25'$, long. $79^{\circ} 30'$.

BUROUR, or **BURHOUL**, in the territory of Oude, a village on the route from Bareilly to Seetapoor, 71 miles S.E. of the former, 34 N.W. of the latter. Water is plentiful there, and supplies are procurable. The road in this part of the route is rather good, the country open and cultivated. Lat. $27^{\circ} 50'$, long. $80^{\circ} 24'$.

BUROUR, or **BUROURAH**, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly, and 27 miles S.W. of the latter. It is situate in a level, fertile, well-watered, and well-cultivated country. Lat. $28^{\circ} 12'$, long. $79^{\circ} 10'$.

BUROUT, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Allahabad to Benares, and 28 miles E. of the former. Lat. $25^{\circ} 21'$, long. $82^{\circ} 15'$.

BUROUTH, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a town the principal place of the pergunnah of the same name. It contains a population of 12,350. Lat. $29^{\circ} 6'$, long. $77^{\circ} 20'$.

BUROUTUH, in the British district of Panceput, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Delhi to Kurnoul, and 20 miles N.W. of the former. Lat. $28^{\circ} 54'$, long. $77^{\circ} 8'$.

BUROWLA, in the British district of Boondshuhur, lieutenant-gov. of the N.W. Provinces, a town on the route from Khasganj to Meerut, and 64 miles S.E. of the latter. Lat. $28^{\circ} 11'$, long. $78^{\circ} 10'$.

BUR PANEE.—A river rising in lat. $25^{\circ} 46'$, long. 92° , in Kyrin, one of the Cossya states. It flows in a north-easterly direction for sixty miles, principally through the British territory of Jynteah, shortly after leaving which, it turns north-west, and flows for twenty miles to its junction, near Raha, with the Kullung river, a considerable offset of the Brahmapootra.

BURPETA, in the British district of Camroop, Lower Assam, a town 12 miles S.E. of Bijnee, in Bhotan, 48 miles W. of Gowhaty. Lat. $26^{\circ} 18'$, long. 91° .

BURPOORA, or **BURREYPOORA**, in the British district of Etawa, lieutenant-gov. of Agra, a town, the principal place of the pergunnah of the same name, in lat. $26^{\circ} 44'$, long. $78^{\circ} 58'$.

BURPOORA, in the jaghire of Rampoor,

lieutenant-gov. of the N.W. Provinces, a town on the north-eastern route from the city of Rampoor to Nugina, and nine miles N. of the former. Lat. $28^{\circ} 55'$, long. $79^{\circ} 5'$.

BURRABOOM, in the British district of the same name, lieutenant-gov. of Bengal, a town 48 miles W. of Bancoora, 80 miles N.W. of Midnapoor. Lat. $23^{\circ} 4'$, long. $86^{\circ} 24'$.

BURRADOOM.—See **BARRABHOOM**.

BURRA CHACHUR, in Sind, a thriving village on the route from Hyderabad to Sehwan, and 62 miles N.W. of the former place. It has a large mosque, in front of which are numerous tombs. The village is situate in a well-cultivated country, on a small watercourse discharging itself into the Indus a mile to the east. Lat. $26^{\circ} 10'$, long. $68^{\circ} 6'$.

BURRAGAON, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Jumna, 42 miles S.E. of the city of Agra. Lat. $26^{\circ} 52'$, long. $78^{\circ} 42'$.

BURRA GURRAWARRA, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town 76 miles W. of Jubbulpoor, 71 miles E. of Hoosungabad. Lat. $22^{\circ} 55'$, long. $78^{\circ} 50'$.

BURRA LAMBA, in the Rajpoot state of Jeypoor, a town on the route from Nussarabad to Gwalior, 29 miles E. of former, 212 W. of latter. It is of considerable size, and is surrounded by a mud wall and ditch. Lat. $26^{\circ} 20'$, long. $75^{\circ} 14'$.

BURRAN.—A river in Sind, which takes its rise in the Keertar Mountains, in lat. $25^{\circ} 56'$, long. $67^{\circ} 45'$, and, after a south-easterly course of sixty-five miles, falls into the Indus, in lat. $25^{\circ} 14'$, long. $68^{\circ} 21'$. In the upper part of its course it is called the Dhurwal. For a mile before its confluence with the Indus it has a large body of water.

BURRAPUDDA.—A town in the native state of Mohurbunge, one of the Cuttack mehals, under the political superintendence of the government of India, distant N.W. from Balasore 35 miles. Lat. $21^{\circ} 59'$, long. $86^{\circ} 48'$.

BURREE MUTTANA, in the British district of Shahjehanpore, lieutenant-gov. of the N.W. Provinces, a small town on the route from Bareilly to the cantonment of Futtehgurh, and 38 miles S.E. of the former. It has a bazaar, and water and supplies for forces may be obtained in abundance. Lat. $27^{\circ} 53'$, long. $79^{\circ} 45'$.

BURREYPOORUH.—See **BURPOORA**.

BURRISOL, in the British district of Backergunje, lieutenant-gov. of Bengal, a town situate on the right bank of a large offset of the Ganges, with which it also communicates by means of a channel called the Chittagong Passage, distant 11 miles N. of Backergunje, 82 miles S.E. of Jessore. It is the seat of the civil establishment of the district, which, in

BUR—BUS.

1801, was removed to this place from the town of Backergunje. Lat. 22° 44', long. 90° 23'.

BURROD.—A town in the Rajpoot state of Kotah, distant N.E. from Kotah 40 miles. Lat. 25° 21', long. 76° 28'.

BURROUND.—See **BEROUND**.

BURSANA, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a town on the route by way of Kosy from Delhi to Deeg, and 14 miles N. of the latter. Lat. 27° 39', long. 77° 26'.

BURSANKER, in the raj of Burrounda, in Bundelcund, a ghat or pass on the route from Banda to Rewa, 43 miles S.E. of the former, 69 N.W. of the latter. The route here passes from the plains of Bundelcund to the plateau on the summit of the hills styled by Franklin the Bindachal Range. Lat. 24° 56', long. 80° 36'.

BURSEE, or **BURSAK**, in the British district of Allypore, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to Allypore cantonment, and 20 miles S. of the latter. Lat. 27° 40', long. 78° 8'.

BURSOOAH, in the British district of Budaon, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly, and 41 miles S.W. of the latter. Lat. 28° 4', long. 79° 5'.

BURUJ, in the British district of Goruckpore, lieut.-gov. of the N.W. Provinces, a small town near the south-eastern frontier, towards the British district of Sarun. According to Buchanan, it contains 200 houses, an amount which would assign it a population of 1,200 persons. Distant S.E. from Goruckpore cantonment 40 miles. Lat. 26° 16', long. 83° 43'.

BURWALLA, in the British district of Ahmedabad, presidency of Bombay, a town on the left bank of the Oolowtee river, 79 miles S.W. of Ahmedabad. Lat. 22° 10', long. 71° 50'.

BURWALLA, in the British district of Hurreana, lieut.-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, distant N. from Hannee 20 miles. Lat. 29° 22', long. 75° 59'.

BURWANEE, in the province of Nimar, territory of Malwa, a hilly district, the patrimony of a Bheel chief. Politically, it is under the superintendence of the Governor-General's agent at Indore. This tract extends along the left or south bank of the river Nerbudda, and is situate within the Sautpoora range of mountains. It lies between lat. 21° 41' and 22° 9', long. 74° 29' and 75° 22'. Its length from east to west may be computed at sixty miles, and its breadth from north to south at thirty. Its area is about 1,380 square miles. The country abounds in fine timber; it is well watered by mountain-streams; but, notwithstanding this advantage, is only partially cultivated. The principality pays no tribute, and there are but few dependent thakoots or feudatories within

its limits. The population is scanty. A small force (not exceeding seventy-five men, infantry and cavalry) is kept up by the rajah, and the revenues of the country are estimated at 30,000 rupees, or 3,000*l*. per annum. The chief town, which bears the same name with the district, is situate two miles from the south or left bank of the Nerbudda. It is surrounded by a double wall, with a ditch to the outer one. Lat. 22° 5', long. 75°.

BURWANNUGUR, in the British district of Chota Nagpore, lieut.-gov. of Bengal, a town on the route from Oodeepoor to Lohadugga, 36 miles S.W. of the latter. Lat. 23° 9', long. 84° 19'.

BURWAY.—A town in the native state of Gwalior, or possessions of Scindia's family, distant S.E. from Mhow 39 miles. Lat. 22° 13', long. 76° 7'.

BURWUR SAGAR, in Bundelcund, a town with bazaar on the route from Banda to Gwalior, 121 miles W. of former, 83 S.E. of latter. It is situate at the base of a long and high ridge of rocks, on the extremity of which is a picturesque old fort overlooking the town. East of this is a fine jhil or small lake, about two miles long and one and a half wide. In the middle are two rocky wooded islets of strikingly picturesque appearance. This piece of water is formed by closing up the lower gorge of an extensive valley by a mound of masonry sixty feet broad and a mile in length, having several ghats or flights of steps to the water's edge. It abounds with fine fish, and a stream which flows from it extensively diffuses the benefits of irrigation. Lat. 25° 23', long. 78° 48'.

BUSAI, or **BUSSYE**, in the British district of Agra, lieut.-gov. of the N.W. Provinces, a town on the route from Agra to Etawah, 40 miles E. of the former. Bussai has a population of 12,754. Lat. 27° 8', long. 78° 9'.

BUSALEE, in the Peshawur division of the Punjab, a town situated on the route from Wazeerabad to Rawul Pind, 16 miles S. of the latter. Lat. 33° 27', long. 73° 6'.

BUSAOO.—A town in the Rajpoot state of Shekawtee, distant N.W. from Jhoonjhnoo 22 miles. Lat. 28° 14', long. 75° 11'.

BUSSE, in the British district of Rooldundshuhur, lieut.-gov. of the N.W. Provinces, a town on the right bank of the Ganges, E. of Delhi 60 miles. Lat. 28° 36', long. 75° 15'.

BUSEENAGUR.—A town in the district of Singboom, on the south-west frontier of Bengal, distant N.W. from Chaibassa 40 miles. Lat. 22° 49', long. 85° 11'.

BUSHEY, in the British territory of Saugor and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the right bank of the Johila river, 37 miles S.E. of Sohagpore. Lat. 22° 55', long. 81° 47'.

BUSKARIE, in the territory of Oude, a town on the route from Azimgurh to Faizabad,

34 miles N.W. of the former, 52 S.E. of the latter. Lat. $26^{\circ} 25'$, long. $82^{\circ} 45'$.

BUSPA, a river in Koonawur, and a feeder of the Sutlej, rises in Tartary, on the north-east declivity of the outer range of the Himalaya, in about lat. $31^{\circ} 13'$, long. $78^{\circ} 11'$. It is a fine stream, running smoothly down a romantic valley, bounded on the south-west by the outer range of the Himalaya, and on the north-east by the huge Ruldung range. According to native tradition, this valley was formerly a lake; and present appearances render the statement probable. The channel of the river is wide, and the stream forms many islands of sand and pebbles, overgrown with barberries and willows. The level space of the valley is frequently almost a mile wide, and is beautifully laid out in fields, and diversified with groves of apricot, peach, and walnut trees. The mountains inclosing it on the north-east and south-west are very abrupt, and for the most part formed of a bare rock. At Chekool bridge, about eighteen miles from the source, and where the elevation of the bed of the river is 11,275 feet above the sea, its width is sixty-six feet; at some bridges lower down, the width is from seventy-seven to eighty-three feet. It receives numerous feeders on both the right and left side, and after a course of about forty-five miles in a north-westerly direction, falls into the Sutlej in lat. $31^{\circ} 29'$, long. $78^{\circ} 15'$, at an elevation of 5,945 feet above the level of the sea. The valley of the Buspa is productive in grain and pulse. The vine, though successfully cultivated in parts farther north, does not bring its fruit to maturity in this valley, in consequence of its position within the limits of the periodical rains.

BUSSAHIR, in Northern India, a considerable hill state, bounded on the north by the British district of Spiti; on the east by Chinese Tartary; on the south by Gurwhal; and on the west and south-west by various districts of the adjacent hill states. It is about ninety-five miles in length from north-east to south-west, and fifty-five miles in breadth from south-east to north-west; has an area of about 3,000 square miles, and is situate between lat. $30^{\circ} 56'$ — $32^{\circ} 8'$, and long. $77^{\circ} 34'$ — $78^{\circ} 52'$. It is one of the most mountainous and elevated countries in the world. Nirt, on the left bank of the Sutlej, is 3,087 feet; Raien, on the left bank of the Pabur, 4,932 feet above the sea: and these two places, being respectively situate at the points where the rivers cross the frontier, are the lowest positions in the territory, most parts being from 7,000 to 12,000 feet above the sea. The Sutlej intersects the country from east to west, and divides the territory into two parts, that on the north being called Koonawur, and that on the south Bussahir.

Very extensive and rich deposits of copper-ore have been discovered in Koonawur. Iron is very abundant, both in the form of ironstone and in numerous and extensive beds of the

better-defined ores. These ores are extensively extracted and reduced in the pergunnah to Nawa, and at the village of Sheel, both near the south-west frontier. The ore appears to be of the sort called in England "specular iron," and has the appearance of shining metallic particles, like mica, interspersed through sandstone. The mines are in the form of adits and galleries, some of which extend half a mile into the mountain, but have no perpendicular shafts. The ore is at once reduced to the state of wrought iron without previous casting, by means of charcoal of oak or pine. That of Sheel is considered the finest, being much valued for making sabres, knives, and hatchets. The ore, as extracted from the mine, yields from thirty to fifty per cent. of the particles of specular iron, and about two-thirds of the weight of these are found to be waste in the process of reduction.

The climate varies from the nearly inter-tropical character of that of the banks of the Sutlej at Rampoor, 3,260 feet above the sea, and near the southern frontier, to that of regions untrodden by human foot, and rising above the limit of perpetual congelation. The most genial climate is that of the Choora district, or the valley of the Pabur, having an elevation varying upwards from about 4,800 feet, and which is described as a beautiful and fertile tract. The productions of the earth vary from the intertropical character of those on the banks of the Sutlej at Rampoor, where bamboos and some of the tropical fruits thrive, to that of the expiring vegetation on the borders of perpetual snow. The very rapid elevation of the surface of the Sub-Himalaya and Himalaya greatly circumscribes this portion of the territory, which is stated by Dr. Royle to terminate at the height of between four thousand and five thousand feet above the sea. That scientific botanist observes: "In proportion as we ascend these mountains, the plants of India disappear, and we are delighted at finding the increase in number and variety of those belonging to European genera. At first we see only a few straggling, towards the plains, which in a more temperate climate would be their favourite resort; and it is not until we have attained a considerable elevation, that, having apparently lost all traces of tropical vegetation, we enter a forest of pines or oaks, and lofty rhododendrons, where none but European forms are recognisable." Dr. Royle, writing before Moorcroft's Travels had appeared, hoped to see the slopes of the Himalaya covered, and the edges of the terraced flats surrounded with plantations of the tea-plant. Moorcroft, however, in the course of his inquiries respecting the tea-trade of Ladakh, ascertained that a vegetable product used as tea is imported largely into that district from Bussahir, where it grows most abundantly on the banks of the Sutlej, and near Lipi, in the valley of the Pejur. Both the black and green sorts are gathered, dried, and rolled, in imitation of the Chinese teas. About eight thou-

sand pounds weight are annually brought to Le, the capital of Ladakh, where, however, it is not so much esteemed as the Chinese tea, with which it is mixed by the poorer people. Moorcroft adds, "It was the opinion of Mohsin Ali, a wholesale dealer in tea to a large extent, that the teas of Bussahir differed from the coarser teas of China only in the mode of preparing them for the market." In Koonawur, beyond the limit of the periodical rains, the vine is an important object of rural economy, the grapes being sometimes consumed when fresh, sometimes dried in the sun for future use, and sometimes converted into wine or spirits. The great productiveness of the vine in these parts is proved by the extraordinary cheapness of both raisins and fresh grapes; the former being sold at the rate of from thirty to forty pounds for a rupee (about two shillings), the latter at from sixty to seventy pounds for the same sum. There are eighteen different kinds: some are rich and luscious; some, when neglected and ill supplied with water, produce small berries without stones, somewhat resembling the currants of Europe. Fraser draws a very gloomy picture of the character of the population of the lower or southern part of Bussahir at the time of its liberation from the Goorkha yoke. "They are revengeful and treacherous, deficient in all good qualities, abandoned in morals, and vicious in their habits. As a proof of the savage indifference with which they look on the life of another, and on the act of shedding human blood, it is said that mere wantonness or a joke will induce the crime of putting a fellow-creature to death, merely for the satisfaction of seeing the blood flow, and of marking the last struggles of their victim; and some facts, which came under our observation, of a tantamount nature, give too much reason for believing the assertion to be founded in truth. Female chastity is here quite unknown; and murder, robbery, and outrage of every kind are here regarded with indifference." The more frightful of these traits of character are said to be no longer observable; and there can be no doubt that some amelioration has resulted from British influence. European travellers have repeatedly, either singly or in small and defenceless parties, traversed the wildest parts of the country without molestation. Something, indeed, is to be attributed to the *prestige* of the European name; but Gerard, a veteran in adventurous travels, says of those persons whom he employed, "they looked not unlike banditti, which, indeed, they formerly were; but we knew well that they could be trusted;" and they were found invariably trustworthy. The people had the good sense to appreciate the advantages of their liberation from Goorkha tyranny; and such is the testimony of Fraser, who passed the severe judgment on their character just quoted. "They hail the success and coming of the British as a revolution in the world, as the dawn of their civil happiness. The people

think that they will become good, free, and happy, as by inspiration; that it is the necessary result of the British power and government." "From the rajah to the peasant, there was not one who did not talk thus with confidence and enthusiasm, and uniformly concluded with saying, 'Now we shall live and improve, and be raised from beasts to men.'" In physical character they form a transition-step from the Hindoo of the plains southwards, to the vast Mongolian family farther north. "All the inhabitants of this region," observes Fraser, "as well as those near the plains, are Hindoos; their features for the most part, although gradually altered by the climate as we leave the low country, and also perhaps by country customs, and possibly by the remaining mixture of an ancient indigenous race, still retain traces that point to the chief original stock in the plains." The inhabitants of Koonawur, north of the Indo-Gangetic range, are sometimes of strongly-marked Mongolian features; and travellers agree in representing them as hardy, brave, persevering, honest, frank, and hospitable. "Thieves and robbers are unknown, and a person's word may be implicitly relied upon in anything regarding money matters. They have not the least distrust or suspicion." The inhabitants of that district, of all the highlanders, offered the only serious resistance to the warlike Goorkhas, whom they defeated in battle, and baffled by destroying the bridges and manning the fastnesses, so that the invading general was glad to make a convention, and consent to receive an annual tribute of about 750*l.*, on condition of abstaining from entering the district. They thus secured the safety of the ruling family, who had taken refuge with them. Gerard, speaking of the Tartar or Mongolian population on the northern frontier, says, "They are muscular, well made, and tall. I saw few under five feet ten, and many were six feet or more. Their strong, athletic forms were remarkably contrasted with the puny, diminutive figures of my attendants, several of whom were inhabitants of the plains; their countenance is ruddy, and they have small oblong eyes, high cheek-bones, thin eyebrows, and very few have either moustaches or beards, which they admire much." Of their moral character his report is highly favourable. "Cheating, lying, and thieving are unknown, and they may be trusted with anything. They have the nicest notions of honesty of any people on the face of the earth." He elsewhere states, that "the Tartars of Spiti were the finest fellows he ever met with."

The Bussahir females are fond of loading themselves with trinkets; wearing the nath depending from the cartilage of the nose, earrings, heavy circlets of brass, pewter, or more precious metals round the ancles; bangles or bracelets of similar materials; numerous rings on the toes and fingers, and round the neck; and on the breast a profusion of glass beads and trinkets, of every description of metal

within their means. The bridegroom purchases the bride from her father, the price varying according to the station and means of the parties; the customary charge to a peasant or small landholder being from one to two pounds. Fraser gives the poverty of the population as the cause of polyandry, so universal in this country. "The difficulty of raising this sum, and the alleged expense of maintaining women, may in part account for, if it cannot excuse, a most disgusting usage which is universal over the country. Three or four or more brothers marry and cohabit with one woman, who is the wife of all. They are unable to raise the requisite sum individually, and thus club their store and buy this one common spouse." The surplus female population left unmarried from this abominable system, in the northern part of the country, take refuge in the Lamaic convents, becoming anis or nuns; in the southern part they are frequently without ceremony sold to the best bidders, who convey them to the plains and there dispose of them as slaves. According to Jacquemont, polyandry is so prevalent in Koonawur, that no man, except among the most wealthy, has a wife exclusively to himself. He inquired frequently how the offspring of the woman living in polyandry was affiliated, and was invariably answered that she never made a mistake in that respect. Jealousy, he was assured, was unknown. Indeed, a feeling necessarily implying some degree of attachment, could scarcely find place under circumstances which must annihilate every feeling which in the intercourse of the sexes raises man above the level of the brute creation. This accursed spot on the character of the people must tend greatly to lower the effect of the panegyric estimates of their morals which have been quoted.

The rajah and upper classes in the southern part are Rajpoots; the other principal classes are Brahmins, Kunnoits, and Coolies, or Chumars; but notwithstanding their Hindoo origin and partial observances of Brahminism, the diet of all is very indiscriminate, consisting of wild hogs and other game, sheep, goats, and every sort of fish or flesh, except that of the cow, which is strictly prohibited in all parts of the territory of Bussahir. The people indulge in spirituous liquors, and in smoking tobacco; and the northern mountaineers are remarkably fond of tea, which they drink flavoured with salt and butter. They burn their dead on the summits of hills, commemorating the rite by raising a pile of stone on the spot. Before the British conquests in the hills, human sacrifices to the goddess Kalee, and the practice of burning the living with the corpses of the dead, were not uncommon; but (at least in the instance related by Fraser) that horrible cruelty was not perpetrated exclusively on the gentler and more helpless sex. He says, "At the death of the late rajah of Bussahir, twenty-two persons of both sexes burnt themselves along with his body: of

these twelve were females, including three ranees (lawful consorts of the rajah); one or two of his wuzzeers and his first chobedar (mace-bearer) were also among the number." The religion of the more southern mountaineers is a corrupt Brahminism. They worship, under innumerable names, the chief Hindoo deities, as Siva, Ganesa, and Kalee; but have an infinite variety of deities of their own, to whom they erect shrines and altars on the hill-tops. In proceeding northwards, Brahminism is found to give way to Lamaic Buddhism, which is the exclusive faith in the northern part. According to Gerard, "there are no fewer than five distinct tongues spoken in Koonawur." In Hengrung, the most northern district, the language is Tibetan. Bussahir is governed by a rajah of Rajpoot extraction, which origin is also claimed by all the men of rank. He holds the dignity by virtue of a grant from the East-India Company, made on the expulsion of the Goorkhas in 1815, and dated the 6th of November in that year. The late rajah died in 1850. An arrangement was then made by the British government for the administration of the country during the young rajah's minority, differing in some degree from the ordinary form of government, which consisted of three hereditary ministers of equal rank, having subordinate to them a number of local magistrates. Hutton states that "there is no standing army, or any regular soldiery, since the British government extended its protection to Bussahir; and even before that time it resembled a half-armed mob, rather than a military force, having no uniform, and each man being armed according to circumstances; some with matchlocks, some with swords, and others, who possessed neither, arming themselves with sticks and branches of trees." A considerable proportion bear bows and arrows. The force which Bussahir brought forward in 1815, to aid in the expulsion of the Goorkhas, amounted to about 3,000 men; of whom probably 1,000 had matchlocks. The tribute from Bussahir to the Goorkha government was equal to 8,000*l.*; that at present paid to the East-India Company is 1,500*l.* The revenue enjoyed by the rajah, paid principally in kind, and consisting of agricultural produce, metals, blankets, and other coarse manufactures, is estimated at 150,000*l.* a year. The population is computed at 150,000; an amount probably rather above than below the reality. On the expulsion of the Goorkhas in 1815, the East-India Company conferred the territory, as at present constituted, on Mohender Singh, the reigning chief, though his legitimacy was questioned. On the occasion of the grant, the thakoors of Koteghur and Koomharsain were dismembered from the state, and declared dependent on the East-India Company, who, moreover, reserved the forts of Ramghur, Suludan, Wartoo, Bagee, and Kurangool, as convenient military posts, together with the pergunnahs of Raden and Sundoch, on the left bank of the Padur river. By existing

BUS—BUT.

arrangements, the rajah is bound to co-operate in military affairs, and to supply labourers for making roads.

BUSSANA.—A village in the British district Rohtuk, lieutenant-gov. of the N.W. Provinces. Lat. $28^{\circ} 53'$, long. $76^{\circ} 26'$.

BUSSEAH, in the British district of Chota Nagpoor, lieutenant-gov. of Bengal, a town on the left bank of the river Coel, 40 miles S. of Lohadugga. Lat. $22^{\circ} 51'$, long. $84^{\circ} 54'$.

BUSSEAN, in Sirhind, a small town on the route from Ferozpoor to Simla, and 70 miles S.E. of the former place. This place belongs to the British. Lat. $30^{\circ} 38'$, long. $75^{\circ} 33'$.

BUSSEE.—A town in the Rajpoot state of Shekawuttee, distant S.E. from Jhoonjhnoo 31 miles. Lat. $27^{\circ} 58'$, long. $76^{\circ} 1'$.

BUSSEE, in Sirhind, a small town near the base of the Sub-Himalaya. It has a fort, which "consists of a large square, with lofty towers at the angles; the whole beautifully built of a very small hard brick." It belongs to a Sikh sirdar, and is usually garrisoned by twenty or thirty men. Distance N.W. from Calcutta, by way of Meerut and Saharanpoor, 1,075 miles. Lat. $30^{\circ} 35'$, long. $76^{\circ} 55'$.

BUSSEKHAT, in the British district of Baraset, lieutenant-gov. of Bengal, a village, with police-station, near the southern frontier, towards the Sunderbunds. Distance from Calcutta, by Baraset, 40 miles. Lat. $22^{\circ} 40'$, long. $88^{\circ} 54'$.

BUSSEYE, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Etawah, and 40 miles S.E. of the former. Lat. $27^{\circ} 20'$, long. $78^{\circ} 26'$.

BUSSOMBA, or **RYSOOMUH**, in the British district Mozuffurnuggur, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Meerut to that of Bijour, and 22 miles N.E. of the former. Lat. $29^{\circ} 12'$, long. $78^{\circ} 2'$.

BUSSUNDAR, or **DOOLOO**.—A town in the native state of Nepal, distant S.W. from Jemlah 36 miles. Lat. $28^{\circ} 59'$, long. $81^{\circ} 13'$.

BUSSUNTPOOR, in the British district denominated the Twenty-four Pergunnahs, lieutenant-gov. of Bengal, a town, with a police-station. Distance from Calcutta, S., 30 miles. Lat. $22^{\circ} 10'$, long. $88^{\circ} 27'$.

BUSTAR, or **JUGDULPOOR**, in the British territory of Nagpoor, a town near the eastern frontier, towards Orissa, on the river Inderowty, the bed of which at that place is very rocky, and the stream at no time fordable. The fort is situated in a peninsula, formed by the winding of the river; and a deep ditch having been dug across the narrow neck of land, it is considered a strong situation; but in the rainy season the river overflows its banks, and forms a very extensive lake on all sides. The zemindar or landholder of Bustar, who is improperly called rajah, has an exten-

sive territory, containing forty-eight pergunnahs or subdivisions. The rajah, though often refractory, had been ostensibly tributary to the ruling power, and assessed nominally at 10,000 rupees annually; but as this sum could never be actually realized, the British authorities, after they had undertaken the temporary management of the revenues of Nagpoor, in 1818, reduced the amount to 5,000 rupees annually. Bustar is also called Jugdulpoor. Distance from Nagpoor city, S.E., 225 miles; Masulipatam, N., 220; Madras, N., 440. Lat. $19^{\circ} 13'$, long. $81^{\circ} 58'$.

BUSTEE, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, the principal place of the pergunnah of the same name, on the route from Goruckpoor cantonment to Lucknow, 43 miles W. of the former, 123 E. of the latter. It has a bazaar, and is well supplied with good water. Distant N.E. from Allahabad 110 miles, N. from Benares 105. Lat. $26^{\circ} 49'$, long. $82^{\circ} 44'$.

BUSWA.—A town in the Rajpoot state of Jeypoor, distant N.E. from Jeypoor 50 miles. Lat. $27^{\circ} 7'$, long. $76^{\circ} 40'$.

BUSWAR, or **BUSSOHUR**, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route by Rajapoor ferry from the cantonment of Allahabad to Banda, 23 miles W. of the former. Lat. $25^{\circ} 23'$, long. $81^{\circ} 32'$.

BUSWUNTHUGGUR.—A town in Hyderabad, or dominions of the Nizam, distant S.E. from Jaulnah 91 miles. Lat. $19^{\circ} 20'$, long. $77^{\circ} 14'$.

BUTCHER ISLAND.—A low island in the harbour of Bombay, situate between the town of Bombay and the island of Elephanta. It has recently been selected as the site of a school for teaching gunnery to the men and officers of the Indian navy. Lat. $18^{\circ} 56'$, long. $72^{\circ} 58'$.

BUTCHITHULLY.—A town in the territory of Mysore, under the control and management of the government of India, distant N.E. from Seringapatam 110 miles. Lat. $13^{\circ} 31'$, long. $77^{\circ} 56'$.

BUTCHOW.—A town in the native state of Cutch, territory of Bombay, distant E. from Bhooj 44 miles. Lat. $23^{\circ} 29'$, long. $70^{\circ} 23'$.

BUTHULPOOR FORT, in the British district of Gurhwal, lieutenant-gov. of the N.W. Provinces, a town on the route from Bijour to Sireenuggur, 50 miles N.E. of the former. Lat. $29^{\circ} 49'$, long. $78^{\circ} 49'$.

BUTORA, in Bhugee, a village on the left bank of the Sutlej, at the confluence of a small feeder of that river. Elevation above the sea 2,281 feet. Lat. $31^{\circ} 15'$, long. $77^{\circ} 21'$.

BUTROWLEE, in the British district of Mynpoorie, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to the cantonment of Mynpoorie, and 10 miles W. of the latter. Lat. $27^{\circ} 13'$, long. $78^{\circ} 57'$.

BUT—BYE.

BUTSURA, in the British district of Sarun, lieutenant-gov. of Bengal, a town on the left bank of the river Gunduk, 36 miles N.W. of Bettiah. Lat. $27^{\circ} 7'$, long. $84^{\circ} 9'$.

BUTTATO, or BHUTTA THOWA, in Sirhind, a village on the route from Loodiana to Ferozpoor, and 14 miles W. of the former town. It is situate two miles from the left bank of the Sutlej, in an open country, well supplied with water, but scantily cultivated. Distant N.W. from Calcutta 1,116 miles. Lat. $30^{\circ} 56'$, long. $75^{\circ} 41'$.

BUTTEGUAM.—A town in Nagpore, distant N. from Jeypoor, in Orissa, 20 miles. Lat. $19^{\circ} 20'$, long. $82^{\circ} 20'$.

BUTTELLY.—A town in the native state of Jeypoor, on the south-west frontier of Bengal, distant S.E. from Ryaguddah 29 miles. Lat. 19° , long. $83^{\circ} 52'$.

BUTWA.—A river rising in Nepal, in lat. $26^{\circ} 42'$, long. $87^{\circ} 45'$, on the southern slope of the Sub-Himalaya, and, flowing in a southerly direction through Nepal for twenty miles, and the British district of Purneah for fifty-four miles, it falls into the Mahananda river, a tributary of the Ganges, in lat. $25^{\circ} 45'$, long. $87^{\circ} 50'$.

BUXAR.—A town in the British district of Shahabad, lieutenant-gov. of Bengal, situate on the right bank of the Ganges. It is a large town, and has several handsome mosques, a large and neat bazaar, and some respectable European bungalows. The fort is still in good order, and strong enough to resist any native force. The view from the summit is very fine. Buxar is remarkable in Indian history for having been the scene of the victory gained here by Sir Hector Munro over the allied forces of Meer Cossim and the vizier of Oude. Munro arrived at Buxar from Patna on the 22nd October, 1764, and found the enemy intrenched before the village, with the Ganges on their left. He immediately encamped for the night beyond range of the enemy's guns. The next morning, about eight o'clock, the enemy were found advancing; preparations were then made to receive them, and a general action ensued, which lasted about three hours, and ended in the defeat of the enemy, who retreated leisurely, blowing up several tumbrils and magazines of powder as they proceeded. Upon an attempt being made by the British to pursue them, the vizier ordered a bridge of boats which had been constructed over a stream two miles from the field of battle to be destroyed before his rear had passed over, so that 2,000 were drowned or lost. By this sacrifice, however, the remainder of his army was preserved, as the English could continue the pursuit no farther. The British force amounted to 7,072 men; consisting of 857 Europeans, 5,297 sepoy, and 918 native cavalry; also a train of artillery and twenty field-pieces. The enemy's force was estimated by some at 66,000, by others at only 40,000. Of these 2,900 were left dead on

the field, and as many more perished in the nullah: they also lost 133 pieces of cannon. The British loss was not inconsiderable, amounting to 347. The population, some years since, was estimated at 3,000. Distance from Dinapore, W., 70 miles; Benares, N.E., 62; Calcutta, N.W., by Hazareebagh and Sasseram, 398; by the river, 566. Lat. $25^{\circ} 32'$, long. $84^{\circ} 3'$.

BUXA DWAR.—A town in the native state of Bhotan, distant N. from Coosh Behar 36 miles. Lat. $26^{\circ} 48'$, long. $89^{\circ} 34'$.

BUXEE, in the British district of Silhet, lieutenant-gov. of Bengal, a town on the left bank of the Barak river, 22 miles S.W. of Silhet. Lat. $24^{\circ} 37'$, long. $91^{\circ} 41'$.

BUXEPOOR, in the British district of Nudden, lieutenant-gov. of Bengal, a town on the left bank of the Jellinghee, 30 miles N. of Kishnugur. Lat. $23^{\circ} 50'$, long. $88^{\circ} 30'$.

BUXEPORE, in the British district of Jessore, lieutenant-gov. of Bengal, a town on the right bank of the Koomar river, 46 miles N.W. of Jessore. Lat. $23^{\circ} 47'$, long. $88^{\circ} 58'$.

BUXWAHO, in Bundelcund, in the territory of Punnah, a town on the route from Calpee to Jubbulpore, 159 miles S. of the former. It has a bazaar, and supplies and water are abundant. Lat. $24^{\circ} 15'$, long. $79^{\circ} 20'$.

BYANG, in the British district of Balasore, lieutenant-gov. of Bengal, a town five miles S.E. of the route from Balasore to Cuttack, 46 miles S.W. of the former. Lat. $20^{\circ} 55'$, long. $86^{\circ} 39'$.

BYANGKHOLA.—A town in the native state of Nepal, distant N.W. from Khatmandoo 150 miles. Lat. $28^{\circ} 39'$, long. $83^{\circ} 9'$.

BYAR RIVER rises in the British district of Tirhoot, in lat. $26^{\circ} 8'$, long. $85^{\circ} 1'$, through which it flows in a south-easterly direction for eighty miles. Crossing from that district into that of Mongheer, which it traverses for the distance of twenty-five miles, it falls into the Ganges in lat. $25^{\circ} 20'$, long. $86^{\circ} 6'$.

BYDESSUR, or BIDISSUR.—A town in the British district of Pooree, or southern division of Cuttack, lieutenant-gov. of Bengal. It is situate at the foot of a steep mountain, at the top of which is a plain, to which, before the occupation of the district by the British, the inhabitants were wont to retire with their effects upon any alarm. Distant 32 miles W. of Cuttack. Lat. $20^{\circ} 22'$, long. $85^{\circ} 36'$.

BYDOOR, in the British district of North Canara, presidency of Madras, a town on the route from Mangalore to the port of Coompta, 70 miles N. of the former. Lat. $13^{\circ} 52'$, long. $74^{\circ} 41'$.

BYE DERU, in the Baree Doob division of the Punjab, a town situated on the left bank of the river Ravee, 39 miles S.W. of the town of Lahore. Lat. $31^{\circ} 10'$, long. $73^{\circ} 45'$.

BYETURNEE.—A river of Orissa, inconsiderable in size, but sacred in the Hindoo mythology, more especially at its source, near Lobadugga, in lat. $23^{\circ} 29'$, long. $84^{\circ} 55'$. After a course of about two hundred and seventy-five miles, it crosses the western boundary of the British district of Cuttack, in lat. $21^{\circ} 3'$, long. $86^{\circ} 13'$, and communicating with the Mahanuddee and Brahmune, flows through that district for seventy miles, for the last ten of which it assumes the name of the Dhumrah river, when it falls into the Bay of Bengal, in lat. $20^{\circ} 49'$, long. $87^{\circ} 2'$.

BYETURNEE.—A town in Keunjur, one of the petty states on the south-west frontier of Bengal, distant W. from Balasore 90 miles. Lat. $21^{\circ} 35'$, long. $85^{\circ} 39'$.

BYGHOO, or BHAGUL.—A river rising at the southern base of the Sub-Himalaya, in lat. $29^{\circ} 5'$, long. $79^{\circ} 45'$, in the British district of Pilleebheet, lieutenant-gov. of the N.W. Provinces. It holds a southerly course of 130 miles, and falls into the Western Ramgunga, on the left side, in lat. $27^{\circ} 43'$, long. $79^{\circ} 40'$. The route from Bareilly to Pilleebheet crosses it by ford eighteen miles north-east of the former. At certain periods of the year the stream is dammed up, to throw the water over the adjacent cultivated grounds, and must then be crossed by ferry.

BYGONBAREE, in the British district of Mysnusing, lieutenant-gov. of Bengal, a town on the right bank of the river Brahmapootra, 19 miles S.E. of Jumalpoore. Lat. $24^{\circ} 47'$, long. $90^{\circ} 18'$.

BYJOOA, in the British district of Sarun, lieutenant-gov. of Bengal, a town on the left bank of the Gunduck, 11 miles S.W. of Bettiah. Lat. $26^{\circ} 40'$, long. $84^{\circ} 26'$.

BYLA.—See **BAILA**.

BYNSONT, or BLYSONDAH, in Bundelcund, a petty jaghire, containing an area of eight square miles, the patrimony of a Boondela Rajpoot chief. The population is about 2,000. This jagheer, comprising twelve villages, was divided in 1817 between the original jaghiredar and the widow of Bherit Jee Chobey. The first grant from the East-India Company took place in 1812, and the deed of partition is dated in 1817. The estate is now held by the son of Chowbey Nowul Kishore, and is estimated to yield 9,000 rupees, or 900*l.* per annum. A force of about 136 men is maintained by the jaghiredar. Bynsont, the chief town, is in lat. $25^{\circ} 17'$, long. $80^{\circ} 53'$.

BYNSROLE.—A town in the Rajpoot state of Kotah, distant S.W. from Kotah 22 miles. Lat. $24^{\circ} 49'$, long. $75^{\circ} 37'$.

BYNSROLE.—See **BANSROLE**.

BYRAGPOOR, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route, by the Rajpoot ferry,

from the cantonment of Allahabad to Banda, and 24 miles W. of the former. Lat. $25^{\circ} 25'$, long. $81^{\circ} 22'$.

BYRAM GHAT, in the territory of Oude, a ferry-station on the right bank of the river Ghogra, and abreast of the town of Nawaub-Gunj, situate on the left bank, on the route from Lucknow to Sekrora, 19 miles N.E. of the former, 37 S.W. of the latter. Lat. $27^{\circ} 8'$, long. $81^{\circ} 28'$.

BYRAMNUGUR, in the British district of Boolundshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Allygurh cantonment to Moradabad, and 16 miles N. of the former. Lat. $28^{\circ} 7'$, long. $78^{\circ} 13'$.

BYRAMPORE, in the British district of Jessore, lieutenant-gov. of Bengal, a town on the southern boundary of the district, 40 miles S. of Jessore. Lat. $22^{\circ} 37'$, long. $89^{\circ} 20'$.

BYRAN DROOG.—A town in the territory of Mysore, distant N.E. from Seringapatam 56 miles. Lat. $13^{\circ} 6'$, long. $77^{\circ} 13'$.

BYRAT.—A town in the Rajpoot state of Jeypoor, distant N.E. from Jeypoor 41 miles. Lat. $27^{\circ} 27'$, long. $76^{\circ} 14'$.

BYREE.—A town in the Rajpoot state of Jeypoor, distant S.E. from Jeypoor 50 miles. Lat. $26^{\circ} 17'$, long. $76^{\circ} 14'$.

BYRIAH.—See **BAIREA**.

BYROD, in the Rajpoot territory of Alwur, a small town on the route from Delhi to Mhow, and 32 miles S.W. of the former. It is situate at the southern extremity of a ridge of hills, among which the road winds to the N.E., and is in consequence rough and much cut up with ravines. There is a bazaar in the town, and water is obtainable from wells. Lat. $27^{\circ} 55'$, long. $76^{\circ} 27'$.

BYRONDA, in Malwa, a town in the native state of Bhopal, distant S. from Bhopal 40 miles. Lat. $23^{\circ} 40'$, long. $77^{\circ} 15'$.

BYRUMPOOR, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route by the Rajpoot ferry from Allahabad to Banda, and 43 miles W. of the former city. Lat. $25^{\circ} 24'$, long. $81^{\circ} 12'$.

BYSAH.—A town in Hyderabad, or dominions of the Nizam, distant N. from Hyderabad 128 miles. Lat. $19^{\circ} 7'$, long. $78^{\circ} 1'$.

BYZAPOOR.—A town in Hyderabad, or dominions of the Nizam, distant W. from Aurungabad 40 miles. Lat. $19^{\circ} 56'$, long. $74^{\circ} 47'$.

BYZNATH, in Kumaon, a village with a Hindoo temple of considerable celebrity, in a valley about twenty-two miles north of Almora. Byznath is situate on the left bank of the Gaomuttee, which lower down joins the Surjoo, a principal feeder of the Kallee. Elevation above the sea 3,800 feet. Lat. $29^{\circ} 54'$, long. $79^{\circ} 39'$.

C.

CABEGHERRY, in the British district of Nellore, presidency of Madras, a town 50 miles S.W. from Ongole, 35 miles N.W. of Nellore. Lat. $14^{\circ} 53'$, long. $79^{\circ} 46'$.

CABOSSA, in the Mergui Archipelago, "a moderately high island, having a small islet or rock near it on the north side." It is one of the first of the cluster met with on approaching Mergui from the north-west. Lat. $12^{\circ} 48'$, long. $97^{\circ} 58'$.

CACHAR.—A British district of Eastern India, presidency of Bengal, bounded on the north by the Nowgong division of Assam; on the east by Munneepoor; on the south by independent Tipperah; and on the west by Jyntea and Silhet. It extends from lat. $24^{\circ} 13'$ to $26^{\circ} 50'$, and from long. $92^{\circ} 24'$ to $93^{\circ} 28'$, and is 110 miles in length from north to south, and sixty-five in breadth. The district is traversed by a navigable river, the Barak, flowing in a westerly direction, and receiving in its course the Juru and other tributaries. Tigers infest the plains to a serious extent, and large rewards are offered by government for their destruction. The principal crops are coffee and sugar. Large tracts are covered by the mulberry. Upon the death of Kishen Chunder, in 1813, his brother, Rajah Govind Chunder, succeeded to the chief power in Cachar. Subsequently the province became the arena of contention between the princes of the neighbouring principality of Munneepoor, one of whom, Gumber Singh, obtaining the ascendancy, expelled the reigning prince. Cachar was afterwards invaded by the Burmese, who in their turn were expelled by the British, when the legitimate rajah, Govind Chunder, was restored, and his country placed under British protection. This took place in 1824. Govind Chunder's authority was, however, resisted in the northern part of the province by Toola Ram Senaputtee; and with a view to the speedy pacification of his dominions, the rajah was induced to assign to that individual the hilly tracts of which he was already in possession. In 1830 Govind Chunder was assassinated; and there being no descendants, either lineal or adopted, Cachar lapsed to the British, who conferred a portion upon the rajah of Munneepore, and annexed the remainder to their own dominions. Toola Ram Senaputtee's territory has subsequently lapsed to the British.

CADAVAUD, or **CARWAR**, in the British district of North Canara, presidency of Madras, a ruined city on the south side of the estuary of the Cauly Naddy, "a very wide and deep inlet of the sea. The passage into it is intricate, but at the height of the tide contains twenty-five feet water." Outside the river's mouth is Carwar Bay, a roadstead sheltered by islets, called by our sailors Oyster Rocks, but

by the natives Coormagur, and having depths from four to seven fathoms. At the south side of the bay the shelter is best, and the bottom is of soft mud; and running from that part is a small but safe cove, with a bottom of soft mud, where Indianmen used formerly to careen. This town was once an important place of commerce, where the East-India Company had a factory in the year 1663, from which a contribution was levied in the year 1665 by Sevajee, the renowned founder of the Mahratta sway. During the time that it was subject to Hyder Ali and his son Tippoo, it progressively fell into its present ruinous state. Distance direct from Goa, S.E., 50 miles; from Bombay, S.E., 295; from Bangalore, N.W., 260. Lat. $14^{\circ} 50'$, long. $74^{\circ} 15'$.

CAKAJA.—A town in the native state of Odeipoor, on the south-west frontier of Bengal, distant N.E. from Odeipoor 35 miles. Lat. $22^{\circ} 58'$, long. $83^{\circ} 49'$.

CAKSA, in the British district of Bancoorah, lieut.-gov. of Bengal, a town situate on the line of railway from Calcutta to Ranee-gunje, 26 miles S.E. of the latter. Lat. $23^{\circ} 26'$, long. $87^{\circ} 30'$.

CALAHANDY.—One of the hill zemindaries belonging to a Khoond rajah, bounded on the north-west by the petty state of Patna, on the south-west frontier of Bengal; on the east by that of Boad, the independent hill tribes of Cuttack, and by the petty hill state of Jeypoor, which also bounds it on the south-west; and on the west by Berar and Keriall. It lies between lat. $19^{\circ} 8'$ — $20^{\circ} 30'$, and long. $82^{\circ} 49'$ — $83^{\circ} 50'$; is 105 miles in length from north to south, and forty-six in breadth.

CALASTRY, in the British district of North Arcot, presidency of Madras, a town on the right bank of the river Sornamooky, 60 miles N.W. of Madras. Lat. $13^{\circ} 45'$, long. $79^{\circ} 47'$.

CALCAUD, in the British district of Tinnevely, presidency of Madras, a town 16 miles S.W. from Tinnevely, 40 miles E. of Trivandrum. Lat. $8^{\circ} 32'$, long. $77^{\circ} 36'$.

CALCUTTA.—The principal place of the presidency of Bengal, and the metropolis of British India. It is situate on the left bank of the river Hoogly, a branch of the Ganges, regarded by Hindoos as the continuation of the sacred stream, and is distant by the river's course about a hundred miles from the sea. Its extent along the river-bank from north to south is about four miles and a half, and its breadth from thence to the Circular Road measures about a mile and a half; the entire site, which comprises an area of nearly eight square miles, being inclosed between the river and the line of the old intrenchment known as the Mahratta Ditch. This circumvallation, now almost obliterated, was intended as a defence against the incursions of the Mah-

rattas, and was commenced in 1742. It issued from the river on the north, and proceeding in an easterly course for the distance of half a mile, curved to the south-east, in which direction it was carried for about three miles and a half, when, taking a south-westerly direction, it was designed again to communicate with the river, and thus entirely to invest the city on the land side. The section of the ditch at the south-western angle was, however, never completed. Beyond the Mahratta Ditch, running parallel with the present Circular Road, the environs of Calcutta are studded with numerous suburbs, the principal of which are Chitpore, on the north; Nundenbagh, Bahar-Simlah, Sealdah, Entally, and Ballygunge, on the east and south-east; and Bhowanepore, Allipore, and Kidderpore, on the south. On the opposite side of the river lie the villages of Seebpore, Howrah, and Sulkea, containing the salt-golahs or warehouses of the government, and several extensive manufactories, but depending for their prosperity chiefly upon their dockyards and ship-building establishments.

The approach to Calcutta by the river from the sea is marked by a series of elegant mansions at Garden Reach, surrounded by lawns which descend to the water's edge. Off this point anchorage is afforded to the magnificent steamers plying between Suez and Calcutta, by means of which the semi-monthly communication with Europe is carried on. A little to the north of Garden Reach are situate the government dockyards; above these, the canal designated Tolly's Nullah forms a junction with the river. To this succeeds the arsenal, and still higher up is Fort William. From this point the appearance of Calcutta becomes grand and imposing. Heber, writing thirty years ago, describes the scene from the fort as striking, "having on the left the Hoogly, with its forest of masts and sails seen through the stems of a double row of trees. On the right is the district called Chowringhee, lately a mere scattered suburb, but now almost as closely built as, and very little less extensive than Calcutta. In front is the Esplanade, containing the Town Hall, the Government House, and many handsome private dwellings, the whole so like some parts of Petersburg that it was hardly possible to fancy myself anywhere else." Above the Esplanade, on the river-bank, is Chandpaul Ghaut, the principal landing-place of the city; and from this point a noble strand extends northwards, along which are many fine buildings, including the Custom-house, the New Mint, and other government offices. Many ghauts, or landing-places, communicate with various parts of the town, and finally the Circular Canal bounds the metropolis at its northern extremity, and separates it from the suburb of Chitpore. A line intersecting the city eastward from Bebea Ross Ghaut, on the river-bank, to the Upper Circular Road, may be regarded as the boundary between the native and the European divisions; the northern portion including the area appropriated to

the native population, and the southern comprehending the space occupied by the European community. One point of difference, however, observable in the two localities is, that a considerable part of the European division is inhabited by "natives, chiefly Mussulmans and the lower castes of Hindoos, while very few Christians have their abode in the native quarter." In this last-mentioned division the streets, as in most oriental towns, are narrow, though the houses of the wealthier classes are lofty. Some few are built in the form of a hollow square, with an area of from fifty to a hundred feet each way, which, when lighted up on the occasion of festivals, has a handsome appearance. The other division is European in character and appearance, as well as in population. It has its city and its court end, the one intersected by several noble streets, and the other adorned with the residences of government functionaries and opulent merchants. In this latter quarter, which is called Chowringhee, the houses are constructed in the Grecian style of building, ornamented with spacious verandahs; and from their imposing exterior Calcutta has not unusually been dignified by the appellation of "The City of Palaces." Between Chowringhee and the river an extensive space intervenes, designated the Esplanade, on which is situate Fort William. This fort is stated to surpass every other in India in strength and regularity. Its form is octagonal, five of its sides being landward, and three facing the river. Its foundations were laid by Clive, who commenced the works soon after the battle of Plassey; and its completion dates from the year 1773. The fort mounts 619 guns. Owing to its brackish character, the water of the river is generally unfit for general use, and the chief dependence for a wholesome supply of this necessary of life rests upon artificial tanks, which obtain their stores from the periodical rains. The number of these reservoirs, public and private, which have been constructed in various parts of the city, amounts to 1,043. Fifteen of them are public tanks. The largest and best of this class is situate in Tank Square, and is replenished from the river during the freshes, in the month of September, when the water is sweet to the sea: the majority of the remainder are filled during the rains. The supply required for watering the streets, and other purposes, is raised from the river by means of a steam-engine. Attempts have been made, from time to time, to obtain water by boring through the strata in search of subterranean springs, but none were reached at a depth of 481 feet; and at this point the boring operations terminated.

No accurate census of the population appears to have been taken until the year 1850. Various estimates were made from time to time, differing widely from each other, and bearing in no instance even a tolerable approximation to the truth. According to the census of May, 1850, taken by order of

the chief magistrate, the population is as follows:—

Europeans	6,233
Eurasians (progeny of white fathers and native mothers) }	4,615
Americans	892
Chinese	847
Asiatics	15,342
Hindoos	274,335
Mahomedans	110,918
	<hr/>
	413,182

The number of residences amounts to 62,565; consisting of 5,950 one-storied houses, 6,438 of two stories, 721 of three, ten of four, and one of five stories; and 49,445 huts. Among the public buildings are the Government House, erected by the Marquis Wellesley in 1804, at a cost of 130,000*l.*; the Town Hall on the Esplanade, built in the Doric style of architecture; the Supreme Court of Judicature; the Madrassa and Hindoo colleges; La Martinière, an institution in which twenty boys and thirty girls are educated from funds bequeathed by General Claude Martin, originally a common soldier in the French army, but subsequently a major-general in the East-India Company's service; Metcalfe Hall, erected by subscription, as a public testimonial of the estimation in which the character of the late Lord Metcalfe was held by the population of Calcutta; the Ochterlony Monument, raised in honour of Sir David Ochterlony, and designed in the Saracenic style, to mark the friendly feeling which the general always showed towards the followers of the Prophet. At the south-west angle of the fort is a ghat, erected to perpetuate the memory of James Prinsep, one of the most eminent men of his age; and at a short distance from it is the monument commemorative of the victories of Maharajpore and Punniar, constructed from the cannon captured on those fields. There are also the rooms of the Asiatic Society, an institution founded in 1784 by Sir William Jones; St. Paul's Cathedral, recently erected, through the exertions and munificence of Bishop Wilson, aided by the grant of 15,000*l.* from the East-India Company; the Scotch church in Tank Square; Writers' Buildings in the same locality; and the theatre in Park Street, Chowringhee. In Calcutta are also located the Bank of Bengal, the Union Bank, and the Bengal Chamber of Commerce. On the opposite side of the river, and facing Garden Reach, is Bishop's College, situate to the north of the Botanical Gardens. This institution was founded for the purpose of instructing native youths and others in the doctrine and discipline of Christianity, in order to their becoming preachers, catechists, and schoolmasters, under the Society for the Propagation of the Gospel in Foreign Parts. The Hindoos have 167 buildings devoted to their religion; the Mahomedans 74. There is also a Chinese temple. Other religious denomina-

tions, holding a faith and practising worship more or less pure, have also places of assemblage. The Jews have a synagogue; there is one Greek and one Armenian church, three Baptist chapels, and two belonging to Independents not Baptists; while the adherents to the Church of Rome have five. Of the places of worship connected with the national churches, the Church of England has eight, the Established Church of Scotland one, and the Free Church of the latter country one. Among the charitable institutions are St. James' Schools, instituted by Bishop Middleton; the European Female Orphan Asylum, established for the education of female European orphans; the Benevolent Institution, designed for the instruction of indigent Christian children; the Free School and Church; the Church Missionary Almshouses; the Leper Asylum; and the General Assembly's Institution. About three miles below Calcutta are situate the Botanical Gardens, occupying the north-west bank of the Hoogly at Garden Reach. These gardens were established in the latter part of the last century, for the purpose of improving the botanical productions of India and promoting the interchange of plants with other countries.

The highest spring tide in the Hoogly at Calcutta, between the 1st November, 1844, and the 30th November, 1847, appears to have occurred on the 28th August, 1847, when it rose twenty-three feet and a quarter above the silt of the entrance-dock at Kidderpore. Under the influence of storms and hurricanes, the tide in the Hoogly has occasionally greatly exceeded its ordinary level. An instance occurred on the 20th and 21st May, 1833, when the embankments of the river were destroyed, and great devastation ensued. In the beginning of March the river is at its lowest; and the freshes are at their height in September, when the tides are scarcely visible, and the river-water is sweet to the sea. Should there be any foundation for the suspicion that the channel of the Hoogly is gradually silting up, and will ultimately cease to be navigable, it has been suggested that the river Mutwal, flowing about twenty-five miles more to the eastward, is well calculated to supply its place, and might be connected with Calcutta by a ship-canal or railway. The most elevated part of Calcutta is in Clive Street, where it is thirty feet above the sea-level at low water. Immediately opposite Clive Street and the Custom-house, but on the opposite bank of the river, and in the suburb of Howrah, is the terminus of the East-India Railway. At this point the width of the river barely exceeds that of the Thames at Waterloo Bridge, and a ferry has been found to suffice for the maintenance of the more limited communication which has hitherto subsisted between the city and its western suburbs. But a different state of things is about to spring up. A section of the railway has been opened, and a stream of population daily pours into Calcutta, while

another seeks egress from the city; and a less tedious mode of crossing the river has been found indispensable. Railways and a ferry are not links of the same chain. The latter is to give way, and its place is to be shortly occupied by a substantial bridge thrown over the river Hoogly in the immediate vicinity of the terminus. A company has been formed for the purpose of providing the chief cities of India with gas. Calcutta is to be the starting-point for its operations; and it may be confidently expected that a very brief period will be permitted to elapse before the present defective system of lighting the city with oil-lamps is entirely superseded. The mean temperature at Calcutta is about 66° in January, 69° in February, 80° in March, 85° in April and May, 83° in June, 81° in July, 82° in August and September, 79° in October, 74° in November, and 66° in December. The annual fall of rain during six years, commencing with 1830, averaged sixty-four inches. In 1852 an act was passed, authorizing an assessment on the owners of houses and landed proprietors, and directing the appointment of commissioners, to be elected by the rate-payers, to apply the proceeds in cleansing, improving, and embellishing the town.

Calcutta owes its origin to Governor Charnock, who transferred the Company's factory from the town of Hoogly to the opposite side of the river. In 1700, certain villages, occupying the site whereon Calcutta now stands, were assigned to the Company, in recognition of a present made by them to Azim, a son of Aurungzebe. They were forthwith fortified, and the new British settlement, in compliment to the then reigning king of England, received the name of Fort William. Calcutta was the name of one of the villages transferred; and hence the appellation by which the capital of British India has since been known: thus humble was its origin in the last year of the seventeenth century. At the commencement of the succeeding century, it was the place whence strangers from a far-distant country gave law to a large part of India, and half a century more brought the entire country under their control. For a long period no one expected such a result, and circumstances gave little promise of it. In 1756, Sooraj-oo-Dowlah, the then soubahdar or nawab of Bengal, whose hatred of the English was extreme, having captured the English factory at Cossimbazar, proceeded to attack Calcutta, which, little prepared for such an assault, and abandoned by some who ought to have been foremost in its defence, yielded after two days' siege. The Company's servants of course became prisoners of war, and were treated with a degree of barbarity hardly to be expected from such a ruler as was the soubahdar of Bengal. It will be unnecessary to give details; the horrors of the Black-hole have obtained a place in Indian history, which will not allow of their being forgotten. Vengeance, however, followed from Madras, though some-

what tardily. Clive had just arrived there from England, and on him happily devolved the duty of commanding the force despatched for the recovery of Calcutta, it being no less happily aided by a squadron under the command of Admiral Watson. Calcutta was retaken, and peace with the soubahdar restored. The disputes between the English and French, however, caused the renewal of war not long after, and the well-known battle of Plassey terminated in a manner fatal to the hopes of the soubahdar. From this time the English continued to increase in power and influence. In 1765 the emperor of Delhi conferred upon the East-India Company the dewanny of the three provinces of Bengal, Behar, and Orissa. The duties of dewanny consisting in the collection and management of the revenues, the gift of the dewanny was substantially the gift of the provinces. Thus did this part of India become absolutely British, and in this manner originated that mighty empire which in less than ninety years has been matured into that which it is now seen to be. Calcutta is in lat. 22° 34', long. 88° 25'.

CALICUT, in the British district of Malabar, a seaport town. It is situate on the open beach, there being neither river nor haven, and ships must anchor in the open sea; large ones two or three miles from land, in five or six fathoms water; smaller ones within a rocky bank abreast of the town, having on it three fathoms water. Formerly a place of great importance, few vestiges of its grandeur remain. The successors of the Tamuri rajah or zamorin, who once lived here in great splendour, are no longer independent princes, but stipendiaries of the East-India Company. The haven, said to have been once capacious, has been filled up by drifted sand. It was visited by Vasco de Gama in 1498, being the first place in India touched at, either by him or any other European navigator. It then contained many stately buildings, especially a Brahminical temple, not inferior to the greatest monastery in Portugal. In 1510, the Portuguese, commanded by Albuquerque, landed, burned the town, and plundered the palace of the zamorin, who, however, rallying his followers, put them to flight, and made them sail away, having suffered heavy loss. In 1513 the zamorin concluded a peace with the Portuguese, and permitted them to build a fort, or rather a fortified factory here. In 1616 the English East-India Company established a factory at Calicut.

According to native tradition and accounts, a prince called Cheruman, having divided Malabar among the ancestors of the present chieftains, had nothing remaining to bestow on Tamuri, from whom descended the chief whom the Portuguese found in possession. Thereupon he gave that personage his sword, "with all the territory in which a cock crowing at a small temple here could be heard. This formed the original dominions of the Tamuri, and was called Colicodu, or the Cock-

crowding." Notwithstanding this scanty domain, the Tamuri rajah or zamorin became by far the most powerful chieftain of Malabar; and the family enjoyed great prosperity until the Mysorean invasion of the country, in 1766, when the individual who was zamorin at that juncture, having endeavoured to propitiate Hyder Ali by submission, but finding, subsequently, that no reliance could be placed on that unprincipled adventurer, barricaded his house, fired it, and perished in the flames. Calicut, having with other parts of Malabar cast off the yoke of Hyder, was, in 1773, reconquered by the Mysorean ruler, whose forces were, however, in 1782, driven out by the British. Tippoo Sultan retook the place in 1789, and treated the inhabitants with a studied and detestable cruelty, thus described by Bartolomeo, who was then in the vicinity:—"He was preceded by 30,000 barbarians, who butchered every person who came in their way, and by his heavy cannon, under the command of General Lally, at the head of a regiment of artillery. Then followed Tippoo Sultan himself, riding on an elephant, and behind marched another corps, consisting of 30,000 men also. The manner in which he behaved to the inhabitants of Calicut was horrid. A great part of them, both male and female, were hung. He first tied up the mothers, and then suspended the children from their necks. The cruel tyrant caused several Christians and heathens to be brought out naked, and made fast to the feet of his elephants, which were then obliged to drag them about till their limbs fell in pieces from their bodies." Such of the men as were not immediately massacred, whether Brahminists or Christians, were forcibly subjected to the initiatory rite of Mahomedanism, or at best had the option of submitting thereto or being hanged. The foreign merchants and factors were expelled; and with the view of utterly ruining it, the cocoanut-trees and sandal-trees in the adjoining country were cut down, and the pepper-vines torn up by the roots. The city was almost completely demolished, and most of the materials taken to Nellura, six miles to the south-eastward, where they were used to build a fort and town called by Tippoo Sultan, Furruckabad, or Fortunate Town, "a fancy," says Colonel Wilks, "which afterwards nearly proved fatal to his troops, by leaving them the choice of a ruin or an unfinished work as points of retreat and rendezvous." In the latter part of 1790, the Mysorean force, having been concentrated in the neighbourhood of Calicut, was attacked by a British detachment commanded by Colonel Hartley, and totally defeated; Tippoo's general was made prisoner with 900 of his men, and 1,500 more laid down their arms at the "fortunate town," whither they had been pursued by the conquerors. Under the treaty concluded in 1792, which deprived Tippoo of half his dominions, Calicut fell to the share of the East-India Company, and was formally incorporated with the British dominions. After

this event the scattered survivors of the population returned and rebuilt their dwellings; and Buchanan, at the time of his visit in 1800, found the number of houses considerable, and the prosperity and population rapidly on the increase. Distance from Bombay, S.E., 566 miles; Mangalore, S.E., 130; Cannanore, S.E., 50; Cochin, N.W., 96; Bangalore, S.W., 170; Madras, S.W., 335. Lat. 11° 15', long. 75° 50'.

CALIMERE POINT.—A headland, forming the south-eastern extremity of the British district of Tanjore. "It is low, and covered with cocoanut-trees." Distant 50 miles S. of Tranquebar. Lat. 10° 17', long. 79° 56'.

CALLIAN DROOG, in the British district of Bellary, presidency of Madras, a town six miles W. of the route from Madras to Bellary, 41 miles S. of the latter. Lat. 14° 34', long. 77° 9'.

CALLIANEE, in the British district of Tannah, presidency of Bombay, a town situate on the line of the Great Indian Peninsula Railway, distant 28 miles N.E. of Bombay. Lat. 19° 14', long. 73° 12'.

CALLIAUD, in the British district of Malabar, presidency of Madras, a town on the route from Cannanore to Seringapatam, 20 miles N.E. of the former. Lat. 12° 1', long. 75° 40'.

CALLINGER.—See **KALLANKUR**.

CALLWA, in the British district of Kurnool, presidency of Madras, a town 19 miles S.E. of Kurnool, 90 miles N.W. of Cuddapah. Lat. 15° 33', long. 78° 16'.

CALPANNEE, in the British district of Rungpore, lieut.-gov. of Bengal, a town on the left bank of the Goggot river, 30 miles N.W. of Rungpore. Lat. 26° 1', long. 89°.

CALPEE, the principal place of the pergunnah of the same name, a town on the right bank of the Jumna. The channel of the river is here a mile and a half wide; but during the dry season the width of the stream, which then flows under the right bank, is only half a mile, the remainder of the bed being a heavy sand. The town, situate among rugged ravines, is in general meanly built, the houses being chiefly of mud, though some of a better kind are of kunkur or calcareous conglomerate. A small fort is situate between the river and town, above which its elevation is about fifty feet. The site of the fort is naturally strong, having on all sides precipitous ravines, but the works are weak and ill-contrived, and could not resist a serious attack. No slight is the opinion entertained by the natives of the strength of the place, that in 1825, a zemindar in the vicinity, arming his tenants and labourers to the number of about 500 men, attempted to take it, in the hope of carrying off a considerable treasure there, belonging to the British authorities. The attempt was, however, defeated, with the loss of a few lives on the side of the assailants, and the zemindar taken

prisoner. Calpee was formerly a more considerable place than at present, and had a mint; now its principal business is the receipt of the cotton of Bundelcund, to be transmitted by the Jumna to the lower provinces. Efforts have not been wanting on the part of the government to extend the cultivation of the American species of cotton to this part of India, but the experiments were unsuccessful. Paper is manufactured here, and the refining of sugar carried on to such perfection, that the natives boast, with some reason, that it is the finest in the world, and so pure, as to resemble the diamond in appearance. It is, however, too high-priced to be in general demand. The temperature of the atmosphere during the hot winds in the early part of summer is very great, probably in consequence of the stagnation of air in the deep, narrow ravines, and the powerful radiation from the calcareous rocks inclosing them. The population in 1853, as ascertained by actual enumeration, amounted to 21,812. Calpee is recorded to have been founded by Bando or Vasudeva, who reigned at Cambay from the year 330 to 400. The Mussulmans took it in 1196, under the conduct of Kutbuddin Aibak, the viceroy of Muhammad, the sovereign of Ghor; and in 1527 it passed, by surrender, from the Patan dynasty of Delhi to Baber. On the dissolution of the empire of Delhi, consequent on the invasion of Ahmed Shah Durrane in 1761, it appears to have been in the hands of the Mahrattas, from whom, in 1778, it was taken by the British, but subsequently relinquished by them. It was transferred to the East-India Company in 1802 by the Peishwa, under the treaty of Bassein; but Nana Govind Rao, the jaghiredar of Jaloun, who possessed the place, assuming an attitude hostile to the British government, Calpee was besieged on the 4th December, 1803, and, after a few hours' resistance, yielded. By subsequent engagement in 1806, Nana Govind Rao surrendered all claim on Calpee to the East-India Company. Distance S.E. from Agra 130 miles, S.W. from Cawnpore 46, N.W. from Allahabad 153, N.W. from Calcutta 648. Lat. 26° 7', long. 79° 48'.

CALPEE.—See KULPEE.

CALVENTURA ISLANDS, off the coast of Arracan, consist of two divisions. The centre of these groups is about lat. 16° 53', long. 94° 20'.

CAMAPURAM.—A town in the native state of Travancore, in political connection with the presidency of Madras, distant N. from Quilon 30 miles. Lat. 9° 18', long. 76° 30'.

CAMBAY.—An ancient city, the capital of a small compact territory in the province of Guzerat, comprehended between the rivers Myhee and Saburnutty on the east and west, and bounded by the British collectorate of Kaira on the north, and the Gulf of Cambay on the south. The district extends from lat. 22° 9' to 22° 41', and from long. 72° 20' to

78° 5', and contains an area of about 500 square miles. The population is 37,000. It is under the political superintendence of the government of Bombay. The city is situate at the head of the gulf of the same name, on the north or right side of the estuary of the river Myhee, here having from two to four fathoms water, and a tide so rapid, that if a vessel take the ground, it must inevitably overset. This decayed city is now only three miles in circumference, surrounded by a brick wall perforated for musketry, flanked with fifty-two irregular towers, without fosse or esplanade; the works are out of repair, and the cannon of the towers of little consequence. The palace of the nawaub is in good repair, but built in a style of architecture little attractive to the eye of taste. The Jumna Mosseid, or principal mosque, a handsome building, was formerly a Brahminical temple, and was converted to its present purpose when the Mussulmans subjugated Guzerat.

Cambay was formerly a place of great trade, and Tieffenthaler in 1751 reckoned seventy vessels at anchor here. It was long celebrated for its manufactures of chintz, silk, and gold stuffs; but when the place was visited by Forbes, the weavers were few and poor, and no merchants or traders of consequence, except the English brokers, were to be found there. Its decline is attributed partly to the oppression of the nawaub, and partly to the fact of access to it by water having become more difficult. It, however, still has some celebrity for agates, cornelians, and onyxes, which are wrought into a great variety of ornaments. The best agates and cornelians are found in peculiar strata, about thirty feet below the surface, in a small tract among the Rajpeepla hills, on the banks of the Nerbudda. They are not met with in any other part of Guzerat, and are generally cut and polished in Cambay. The following account of the processes to which they are subjected is given by a writer of the latter part of the last century:—"On being taken from their native bed, they are exposed to the heat of the sun for two years (the longer they remain in that situation, the brighter and deeper will be the colour of the stone); fire is sometimes substituted for the solar ray, but with less effect, as the stones frequently crack, and seldom acquire a brilliant lustre. After having undergone this process, they are boiled for two days, and sent to the manufacturers at Cambay. The agates are of different hues: those generally called cornelians are black, white, and red, in shades from the palest yellow to the deepest scarlet." Cambay is a very ancient place, and has had a variety of names at different periods. "Its last transition was to Cambayet or Khumbavati," the origin of which name is ascribed to a tradition too trivial to be mentioned. After the erection of the Mussulman kingdom of Guzerat, at the close of the fourteenth century, it became the principal place of the surrounding district. Early in the sixteenth century it appears to

have been a remarkably well-built city, in a fertile country, filled with merchants of all nations, and with artisans and manufacturers like those of Flanders. The present nawaub of Cambay is a descendant of Momin Khan, the second of that name, who was chief of Cambay in 1746, and who, about ten years afterwards, seized upon Ahmedabad, from which, however, after sustaining a long siege, he was expelled by the Maharrattas. That marauding nation established in Cambay, as in various other places, their claim to chouth. This tribute seems to have been a subject of dispute between the Guicowar and the Peishwa, the latter of whom, however, succeeded in appropriating it; but by the treaty of Bassein it was ceded to the East-India Company. The Company are also entitled to half the customs-duties of the port. The revenue of the nawaub is estimated at 3,00,000 Company's rupees, or 30,000*l*. The Company's tribute was rated in the schedule annexed to the treaty at 60,000 rupees, or 6,000*l*., and their share of the customs realized in 1825 34,096 rupees, or 3,409*l*. The military establishment of the nawaub consists of 1,700 peons and horsemen, who are employed indiscriminately in revenue, police, and miscellaneous duties: a few pieces of ordnance complete the return of military strength. The city of Cambay is distant from Bombay, N., 230 miles; from Ahmedabad, S., 62; from Mhow, W., 202. Lat. 22° 18', long. 72° 39'.

CAMBAY, GULF OF, extends between lat. 21°—22° 10', long. 71° 50'—72° 40', having a length from north to south of about eighty miles, and a breadth, on an average, of twenty-five. It is shallow, and abounds in shoals and sand-banks. Numerous and considerable rivers flow into it. Of those, the Sabarmuttee, running in a south-westerly direction from the Aravulli Mountains, enters the gulf at its head, in lat. 22° 10', long. 72° 23'; the Myhee, flowing from the same range, and having a direction south-westerly, enters the gulf in nearly the same latitude as the former river, but more to the east. Lower down, and also on the east side, in lat. 21° 33', the gulf receives the great river Nerbudda; still lower down, on the same side, in lat. 21° 3', the Taptee; and on the west side the less considerable streams of the Gooma, Oolowtee, Gelya, and Setroonjee, flowing from Kattywar. The tides, which are very high, rising upwards of thirty feet, rush in with great rapidity, causing much danger to shipping; and this hazard is greatly increased by the continually shifting shoals, caused by the frequent inundations of the rivers. It is, however, an important inlet, being the channel by which the abundant and valuable produce of central Guzerat, and the districts of Ahmedabad and Broach, is exported.

CAMROOP.—A British district, one of the divisions of Lower Assam. It lies between lat. 25° 47'—26° 39', long. 90° 40'—92° 10'; is ninety-two miles in length from east to west,

and fifty-two in breadth; and contains an area of 2,788 square miles, with a population of 300,000. Limestone has been recently found in the Ranska Dooar, within this district. The discovery is regarded as important, and experimental measures for testing its quality are in progress, under the authority of the government.

CAMULAPOOR, in the British district of Cuddapah, presidency of Madras, a town on the right bank of the river Pennar, 13 miles N.W. of Cuddapah. Lat. 14° 36', long. 78° 43'.

CANACON.—A town in the Portuguese territory of Goa, on the route from Goa to Honahwar, 32 miles S.E. of the former. Lat. 15° 2', long. 74° 8'.

CANARA, a British district under the presidency of Madras, is a tract of territory of some length, but of inconsiderable breadth. The name applied to this country is unknown to the natives, and is considered to be a European corruption of Carnata, the name of one of the ancient Hindoo kingdoms of the Deccan. The district now denominated Canara is bounded on the north by the Portuguese territory of Goa and the Bombay presidency; on the east by the Bombay presidency, the territory of the rajah of Mysore, and the British district of Coorg; on the south by Coorg and the British district of Malabar; and on the west by the Indian Ocean and the territory of Goa. It lies between lat. 12° 11'—15° 30', long. 74° 9'—75° 44', and has an area of 7,720 square miles. It is popularly divided into North and South Canara.

NORTH CANARA may be regarded as that part of the district lying between lat. 13° 35'—15° 30', long. 74° 9'—75° 10'. The seacoast of North Canara has scarcely any sinuosities, and is a hundred miles in length, but within its whole extent there is hardly a landlocked or tolerably safe station for square-rigged vessels. There are, however, numerous creeks and inlets. The sheet of water forming the estuary or backwater of Mirji or Mirjan, by which the Toodry passes to the sea, is represented as capable of being formed into a useful harbour. The advantages of the place are thus enumerated by the collector of the district and Captain F. Cotton, of the engineers:—"It presents a large natural harbour, forming the mouth of a considerable river, which runs down from the Western Ghate, and is navigable for about fifteen or twenty miles, as far as a place named Openputten. Its entrance, which is protected by high hills on each side, has a depth of water over the bar, which, as far as could be judged by two measurements, is about sixteen or seventeen feet at high tide, and may be increased during the spring tides to about nineteen or twenty feet. The depth inside the harbour is much greater, being about twenty-five feet, and in some places more; and this so close to the shore, that vessels of a large size might lie so near as to be laden from the bank without the use of boats at all; and

there is ample room for almost any number of vessels to ride in deep water." Captain Cotton seems to consider that it presents greater natural advantages as a port than any one on this coast, between Bombay and Cochín.

SOUTH CANARA is the portion lying between lat. $12^{\circ} 11'$ — $13^{\circ} 39'$, long. $74^{\circ} 45'$ — $75^{\circ} 42'$. It has the advantage of a seacoast of upwards of a hundred miles in length, with numerous inlets available for fishing-boats, and one seaport, Mangalore, now accessible only to vessels of small burthen, but capable of being improved so as to admit ships of large draught. There is great diversity in the classes of the population of this district, of which the Brahminists are supposed to be the most numerous. The Jaina, who have nearly vanished from many other parts of India, are here still numerous. The residue is composed of natives professing Christianity, descendants of those converted by the Portuguese, and of course of the Romish church, and Mussulmans and a few Jews. There were formerly many slaves by birth, adscripti glebe, and considered as a sort of live-stock inseparable from the soil. Of those oppressed beings the principal were the Corars, who, like the Helots of Laconia, were the descendants of those who once possessed and ruled the country. British India, however, by a recent act of its government, has abrogated slavery throughout every part of its widely-spread dominions. The population of the two tracts constituting the district will be found under the article **MADRAS**.

The early history of the country known as Canara is obscure. Soon after the middle of the last century, it fell into the hands of the adventurer Hyder Ali; and on the fall of his son Tippoo, in 1799, it passed to the East-India Company. The principal towns, viz., in North Canara, Condapor, Batculi, Honahwar, Coomta, Mirjan, Unkola, Sedashevagurh; in South Canara, Mangalore, Buntwalla, Oodapee, Barkoor, Karkull, and Jamalabad, are noticed under their names in the alphabetical arrangement.

CANARAC, in the British district of Pooree, or southern division of Cuttack, presidency of Bengal, a town on the north-western coast of the Bay of Bengal, in this part called the Orissa coast. The land here is rather low, having a level and barren aspect, with a steep sandy beach, which may be approached to within one and a half mile by large ships. Five or six miles south from Canarac are the remains of the celebrated temple of the sun, popularly denominated by the British the Black Pagoda. This extraordinary structure will, however, probably soon be quite demolished, as the rajah of Koorda has lately been employing workmen to pull down the finest sculptures, and remove them to embellish the temple of Juggernauth at Pooree. Distance from Pooree, N.W., 19 miles; Cuttack, S., 43; Calcutta, S.W., 235. Lat. $19^{\circ} 54'$, long. $86^{\circ} 10'$.

CANCANHULLY.—A town in Mysore, distant E. from Seringapatam 48 miles. Lat. $12^{\circ} 33'$, long. $77^{\circ} 28'$.

CANCOOPA.—A town in Mysore, distant N. from Seringapatam 150 miles. Lat. $14^{\circ} 33'$, long. $76^{\circ} 22'$.

CANDEISH.—A British collectorate of the presidency of Bombay. It is bounded on the north by the Akraunee pergunnah, the native state of Burwanee, and by Holkar's territory; on the east by a detached portion of Scindia's dominions, and one of the recently sequestered districts of the Nizam; on the south by the Nizam's dominions and the Ahmednuggur collectorate; and on the west by various petty states, forming the southern portion of Guzerat. It extends from lat. $20^{\circ} 10'$ to $21^{\circ} 58'$, and from long. $73^{\circ} 37'$ to $76^{\circ} 20'$; its greatest length from east to west is 175 miles, its extreme breadth from north to south 128. The area is estimated at 9,311 square miles. This district was combined with that of Ahmednuggur until 1849, when it was detached and formed into a separate zillah. It is a great valley, or rather basin, traversed by the Taptee, flowing from east to west, and flanked on the north side throughout its whole extent by the Sautpoora range; on the south by the range on which are the fort of Chandore and the ghaut of Adjunta; and on the south-west by the expansion of the Syadree range, or Western Ghauts. On the south-east the bounding surface is but slightly elevated, sinking gradually to the more depressed territory of the valley of Berar, in the dominions of the Nizam. The lower part of Candesh is in general fertile, the soil consisting principally of a rich mould of a dark reddish-brown colour, formed, apparently, for the most part, of the disintegration of the trapezian rock. There is, indeed, a considerable portion of sand, as well as hard unkindly soil mixed with gravel; yet the better descriptions predominate. Much of the cultivable tract is now covered by jungle; but the former prosperity of the province is attested by numerous remains of tanks and buildings. In its existing condition, the collectorate presents the features of a province partially recovered from a state of depopulation; the villages being scattered and small, and the cultivated lands bearing but a very small proportion to the entire area. The scantiness of the population, and the remains of former magnificence and grandeur in decayed and ruined mansions, dismantled towns, and dilapidated walls, spread an indescribable air of desolation over the face of the country. The district, moreover, is infested by beasts of prey. Among them tigers abound in an extraordinary degree. Amidst the hills and coverts where these animals find shelter, they can rarely be attacked with success, except with the aid of elephants. An establishment is accordingly maintained by government for their extirpation, and private efforts for their destruction are stimulated by

the offer of rewards. By means of these two systems no less than seventy-three tigers were destroyed in Candeish in one year. The inhabitants are principally Mahrattas, described about thirty years ago "as peaceable and inoffensive, but timid, helpless, unenterprising, and sunk under the oppression and the multiplied calamities to which they were so long exposed." A portion of the population was at the same time represented as bold and restless, from which the predatory forces of Jeswunt Rao Holkar were formerly recruited. Still more restless and less removed from barbarism were the Bheels, a tribe of plunderers supposed to have been the aborigines of Guzerat and the adjacent quarters of Hindostan, and who have been recognised from remote ages as a distinct people. The earliest notice of the race occurs in the celebrated Hindoo poem of the Mahabharat. In the Mahomedan history of Malwa and Guzerat, they are described as a nation inhabiting the jungles and hilly districts of Meywar and Odipoor; and the ancient records of Candeish advert to the residence of the tribe in that portion of the province which lies north of the Taptee. Their settlements are still in the same localities; and in Candeish the Bheels are estimated to form one-eighth of the entire population of the province.

During the struggle between the Mahomedans and the Mahrattas, the excesses of the Bheels rose to a great height; yet it would appear that Candeish was in a flourishing condition up to the year 1798, when Bajee Rao succeeded, on the death of Nana Furnavese, to the free exercise of authority as Peishwa. The decline of this rich province is to be dated from the year 1802, when it was ravaged by Holkar's army. This blow was followed by the famine of 1803, and its ruin was subsequently consummated by the rapacity and misgovernment of the Peishwa's officers. A portion of the population abandoned the plains; organized bands of robbers started up in every direction; and the surrounding country was laid waste; and on the occupation of the province by the British government, in 1818, anarchy and oppression had reached a fearful height. Successive measures were resorted to for the pacification of the province, some conceived in a mild, others in a harsher spirit; but all proved alike unsuccessful. At length, in 1825, it was determined to adopt a conciliatory line of policy, and to make a more systematic effort for the restoration of tranquillity. A military corps was raised, into which were draughted the more unruly spirits, who disdained any occupation but that of arms. The men received five rupees per mensem, with an additional rupee as batta when on outpost duty. Clothing was furnished by government, and, armed with fusils, the levy was drilled as light infantry. At the commencement of the second season of its service, the first opportunity was afforded for testing the discipline and courage of the Bheel corps. The village of Boorwarree

had been attacked and plundered; and emissaries from the gang engaged in the work were going about among the hills to collect the disaffected, when a small detachment of the Bheel corps arrived at sunset near the scene of their operations. Captain, now Colonel Outram, who commanded this small force, arrived, after a tedious night's march, on the eminence to which the gang had retired, when he was immediately assailed by showers of arrows and stones. A jemadar and many of the recruits were wounded; but the men fought on steadily, and the enemy was eventually driven from the commanding position. Fatigued, however, with the night-march, and indisposed to subject his followers to the severe exertion of following the gang from hill to hill, a retreat was feigned by Captain Outram, and the enemy by this ruse drawn down into the open plain. Here they were charged and dispersed at the point of the bayonet; the plunder of the village was recovered; arms and other property were captured; the marauding chief, with many of his followers, killed; and the gang entirely dispersed. The subsequent reception of the corps in the camp of Malligaum, by the 23rd regiment Bombay Native Infantry, was eminently calculated to conciliate their feelings and secure their attachment. Men of high caste visited, and presented them with betelnut, to the no small amazement of the guests. The regiment was complimented by the government on this manifestation of good feeling. At the close of the monsoon of 1827, the corps was reviewed by the brigadier of the district, whose high commendation of their skill and steady performance of intricate manœuvres was announced in general orders. The results of the conciliatory and enlightened system pursued by the government have been summed up as follows:—"Roads," says Captain Graham, "formerly hazardous for armed parties, are traversed in safety at all hours by single unarmed passengers; the formidable list of crimes has dwindled down to the report of a few petty thefts; and the Bheels, from outcasts, have become members of civil society, daily rising in respectability, and becoming useful and obedient subjects of the state." As an illustration of the degree to which confidence and the sense of security prevailed, it is related by the same authority, that in a village near the Sautpoora range a petty theft had been committed by a few boys, who carried off the cooking-utensils from two houses. The patel and the inhabitants who suffered were asked how it happened that the articles had been taken without awakening them, and the answer was, "That since the government settlement had been made, none in the village ever thought of fastening up their houses at night, considering themselves in perfect security." The population of Candeish is given under the article BOMBAY.

A circumstance which can scarcely fail to attract the attention of the traveller in this district, is the frequent intersection of his

route by excellent cart-roads. Candeish in a remarkable degree enjoys the advantage of cart-traffic. Independently of the great arteries which traverse the province from the Chandore to the Sautpoora range, from Malligaum to the confines of the Daung, on the line to Surat, and from Malligaum and Dhoolia to Sowda and Asseerghur, many districts enjoy the advantage of a passable and often an excellent cart-road from village to village, throughout their entire extent. That portion of the main Bombay and Agra road which traverses this collectorate is in excellent order; that from Malligaum to Surat is in tolerable condition, though the extent of traffic on it has not been considered sufficient to warrant any great outlay in its constant repair. The road from Malligaum and Dhoolia to Sowdah, leading to Asseerghur and the Berar provinces, which has been marked out and cleared, is a good fair-weather road, though heavy after much rain. The province will also be traversed by one of the lines of the Great Indian Peninsula Railway Company. The collectorate abounds with fine cattle; and carts of an improved construction, for the transit both of goods and travellers, are in general use. The introduction of these, like the improvement of the roads, has been the work of government. Horses and camels are rare. Among the experimental sheep-farms established by government in different parts of the territory subject to the presidency of Bombay, with a view to the improvement of the native breeds, and the production of wool of superior character, was one in this province; but it shared the fate of the rest, on the results appearing unsatisfactory, and in 1847 was abolished.

The earliest mention of Candeish in authentic history is probably that by Firishtah, who states that in the year 1370 a great part of it was granted in jaghire by Feroze Toghluk, padshah of Delhi, to Mullik Raja, an adventurer, whose power so rapidly grew, that in a few years he had an army of 12,000 horse, and levied contributions extensively in Malwa and Rajpootana. Mullik, dying in 1399, was succeeded by his son Mullik Nusseer Khan, who by a vile and sanguinary stratagem acquired the strong hill-fort Asseerghur; but his ambition inducing him to enter on undertakings above his strength, his affairs were brought to utter ruin, and in 1437 he died broken-hearted. He was succeeded by his son Meeran Adil Khan, who sat on the throne till 1441, when he was assassinated by his son. Meeran Mobarik Khan then succeeded; and he dying in 1457, the throne passed to his son Adil Khan, under whose rule Candeish is said to have attained its greatest prosperity. Of this there are many monuments, and among them the remains of the citadel and of several magnificent palaces in Borehaunpoor survive. Candeish was, however, obliged to yield tribute to Mahmud Shah, of Guzerat. Adil Khan died in 1503, and was succeeded by his younger brother, Daud Khan; who dying in 1510, his

son Ghizing Khan was placed upon the throne, but fell by poison after a reign of only two days. The direct line of the family failing, a relative, named Alam Khan, was raised to the throne, but displaced by a rival, Adil Khan, the grandson of Nusseer Khan, who was supported by his maternal grandfather, the king of Guzerat. Adil Khan died in 1520. To him succeeded his son Meeran Mahomed, who, on the throne of Guzerat becoming vacant, was raised to it by the chief people of that state, but died in 1535, not long after his elevation, and was followed on the throne of Candeish by his brother Meeran Mobarik, who was, however, excluded from the throne of Guzerat. In his reign, the forces of Akbar, emperor of Delhi, expelled Baz Bahadur, king of Malwa, from that country, and pursuing the fugitive into Candeish, sacked the great and wealthy town of Borehaunpoor, but were soon after attacked and routed with great slaughter by Mobarik, who died in 1566, after a prosperous reign of thirty-two years. He was succeeded by his son Meeran Mahomed Khan, who died in 1576, after a perilous and troubled reign. His death made way for his brother Raja Ali: this prince, joining his forces with those of Murad Marza, son of Akbar, was in 1596 killed in battle waged against the king of Ahmednuggur. His son Bahadar Khan filled his place until, defying the power of Akbar, he was besieged by the forces of the emperor in Asseerghur, and after a long blockade, being obliged to surrender, was in 1599 sent prisoner to the fortress of Gwalior, and his kingdom, under the denomination of Dandis, reduced into the form of a province of the realm of Delhi. Shah Jehan in 1634 made a new arrangement, adding some districts to Candeish, and constituting the whole a *soobah* or province of his empire. During the fierce contests for power and dominion between the families of Holkar and Scindia, at the close of the eighteenth and the commencement of the present century, Candeish was reduced nearly to the state of a desert by the predatory troops of Jeawant Rao Holkar; and on the final overthrow of the Peishwa in 1818, it was annexed to the British dominions.

CANDEYAN.—A town in the territory of Mysore, under the administration and control of the government of India, distant N.W. from Seringapatam 101 miles. Lat. 13° 23', long. 75° 36'.

CANE, a river of Bundelcund, rises among the hills on the southern frontier, towards the Saugor and Nerbudda territory, at an elevation of 1,700 feet above the sea, and in lat. 23° 54', long. 80° 13'. It first takes a north-easterly course, and at Pipereah Ghaut, in lat. 24° 15', long. 80° 23', about thirty-five miles from its source, it forms a cataract falling over the northern brow of the Bandair range. It then takes a westerly direction, and, flowing parallel to the base of the range, receives in succession the Putna and the Sonar, joining it on the left

side; the Meerhausser, on the right side; and still lower down the Oormel and the Chundra-wul, on the left side. The course is generally northerly, inclining to the east; and after running 230 miles, it falls into the Jumna on the right side, at Chilata, in lat. $25^{\circ} 47'$, long. $80^{\circ} 35'$. It has numerous rapids, and in some places cataraacts; according to Jacquemont, some not less than 300 feet high; and altogether, "the bed of the river is too rocky for all the efforts of art or labour ever to render it navigable. It is well stocked with a great variety of fish, and the pebbles which are found in its bed are so exquisitely beautiful as to be in great request for ornaments." They are, however, merely water-rolled fragments of basalt. Though the river cannot be rendered navigable at all seasons, small craft of little draught proceed in the rainy season from the Jumna as far up as the town of Banda, a distance of thirty-five miles. The water of this river is by the natives considered unwholesome.

CANISTERS, the name given to three islands of the Mergui Archipelago, lying in the course of vessels approaching the harbour of Mergui from Calcutta. The Great Canister, the largest of the three, is in lat. $12^{\circ} 56'$, long. $98^{\circ} 19'$.

CANKJARA, in the British district of Goalpara, lieut.-gov. of Bengal, a town 15 miles from the right or northern bank of the river Brahmapootra, 29 miles N. W. of Goalpara. Lat. $26^{\circ} 23'$, long. $90^{\circ} 17'$.

CANNANORE, in the British district of Malabar, presidency of Madras, a seaport town and British military cantonment, situate on the north shore of a small bay, open to the south, but sheltered on the west, or towards the Arabian Sea, by a bluff headland running north and south, and surmounted by a fort and some other buildings, which render it easily distinguishable at sea. Ships may anchor abreast of the fort in five or five and a half fathoms water; but a close approach is dangerous, as the water shoals, with rocky bottom, on which some fine ships have been wrecked. It is a populous place, but very irregularly built; yet has many good houses, especially that of the Moplai or Mussulman family, proprietors of the town. This residence is described by Buchanan as large, and one of the best native houses which he had seen. The possessions of the Moplai proprietor of Cannanore are confined to the town and a small tract about two miles round it on every side. For these possessions an annual rent of 14,000 rupees is paid to the East-India Company. Some of the Laccadive islands are also subject to this family; yet so scanty withal is their revenue, that they are compelled to resort to commerce, and carry on trade with Arabia, Bengal, Sumatra, and some other places; the customs of Cannanore are, however, all received by the East-India Company. A proposal has been recently made to the Beebe for the transfer to the British government of the Laccadive is-

lands, in consideration of a pecuniary equivalent. It is a port of considerable trade, principally in pepper, grain, timber, and cocoanuts; vast quantities of the last of which are exported to the countries northwards, where none are produced. The soil and climate in the vicinity are peculiarly favourable to the growth of this species of palm, which is so abundant that the whole country in every direction appears covered with forests of it. The British cantonment is situate close to the seashore, and to the north-west face of the fort, which, since its acquisition by the East-India Company, has been improved and strengthened according to regular rules of fortification. The cantonment has barracks for a European regiment and two native regiments, and a regiment of native foot artillery, with an extensive and well-arranged hospital. There is a jail here. Cannanore is a place of great antiquity; but the present Moplai family acquired it at a comparatively late period, by purchase from the Dutch, who had wrested it from the Portuguese. On the invasion of Malabar by Hyder Ali, in the year 1768, he found ready submission and aid from Ali Raja, the Moplai chief of Cannanore. In the year 1784, in the war with Tippoo Sultan, it was garrisoned by the British; but on the conclusion of the treaty of Mangalore, was given up to the Moplai family. It soon fell into the hands of Tippoo Sultan; and in the year 1791, having been besieged by a British force under General Abercromby, it was, after a brief resistance, unconditionally surrendered; since which time it has been the principal British station in Malabar. Distance from Mangalore, S.E., 79 miles; Bombay, S.E., 615; Cochin, N.W., 148; Bangalore, S.W., 168; Madras, S.W., 345. Lat. $11^{\circ} 52'$, long. $75^{\circ} 26'$.

CANOUIJ.—See KUNNOUJ.

CANTALBAREE.—A town in the native state of Bhotan, distant N. from Rungpore 63 miles. Lat. $26^{\circ} 36'$, long. $89^{\circ} 9'$.

CAP.—An island "forming the west side of the Tavoy river's entrance. It is moderately high, bluff, covered with trees, and may be easily known by the cap, a small round bushy islet, bearing from it W. by S. about $1\frac{1}{4}$ miles." Lat. $13^{\circ} 32'$, long. $98^{\circ} 13'$.

CAP ISLAND.—A small island, or rather rock, situate about a mile from the island of Ramree (coast of Arracan), on which coal has been discovered. The rock is constituted chiefly of sandstone, and runs up to a peak. The coal is found to the seaward point of the rock, and barely above high-water mark. It has never been worked. Lat. $19^{\circ} 23'$, long. $93^{\circ} 32'$.

CAPTAINGUNJ, or **KAPTANGUNJ**, in the British district of Goruckpore, lieut.-gov. of the N.W. Provinces, a town on the route from the cantonment of Goruckpore to Bettiah, 22 miles N.E. of the former, 60 W. of the latter. According to Buchanan's description

of it at the time of his survey, forty years ago, it "contains about 250 houses, or rather huts; but some of them are tiled; and for its size it carries on a good deal of trade." Distant N.W. from Dinapore 115 miles. Lat. $26^{\circ} 56'$, long. $83^{\circ} 42'$.

CAPTAINGUNJ, or KUPTAIN GUNJ, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a small town on the route from the cantonment of Goruckpore to Lucknow, 55 miles W. of the former. Buchanan describes it as having "only twenty-five shops." Lat. $26^{\circ} 46'$, long. $82^{\circ} 34'$.

CAPTAINGUNJ, or KUPTAINGUNJ, in the British district of Azimgurh, lieutenant-gov. of the N.W. Provinces, a town on the route from the town of Azimgurh to that of Secrora, in Oude, and 12 miles N.W. of the former. Lat. $26^{\circ} 12'$, long. $83^{\circ} 4'$.

CARAGOLA, in the British district of Purneah, lieutenant-gov. of Bengal, a town on the left bank of the river Ganges, 30 miles S. of Purneah. Lat. $25^{\circ} 20'$, long. $87^{\circ} 25'$.

CARAMNASSA.—See **KURUMNASSA**.

CARANGOOLY, in the British district of Chingleput, presidency of Madras, a town on the route from Madras to Trichinopoly, 49 miles S.W. of the former. It was taken by surprise by a British force under Captain Davis, in 1780. Lat. $12^{\circ} 32'$, long. $79^{\circ} 57'$.

CARANJA ISLE.—See **KARANGA**.

CARIHULLY.—A town in the territory of Mysore, under the administration and control of the government of India, distant E. from Seringapatam 56 miles. Lat. $12^{\circ} 26'$, long. $77^{\circ} 33'$.

CARLEE.—See **KARLEE**.

CARNATIC.—A division of Southern India. Its limits were probably at no time very accurately defined. According to Rennell, it anciently comprised all that part of the peninsula which lies south of the Gundlacama river, and of the river Tumbudra, from the coast of Coromandel eastward, to the Western Ghats on the opposite coast. These limits would comprise the present territory of Mysore, Poodocottah, and the British districts of Bellary, Cuddapah, Nellore, Chingleput, North and South Arcot, Salem, Coimbatore, Trichinopoly, Madura, Tanjore, and Tinnevely. According to Wilks, the ancient name of the Carnatic was Canara; and the "Canara language is only found within a district bounded by a line beginning near the town of Beder, about sixty miles north-west of Hyderabad, waving south-east by the town of Adoni; thence by Anantpore and Nundidroog, along the Eastern Ghats, to the pass of Gujjelbutty; thence by the chasm of the Western Hills between the towns of Coimbatore, Palatchi, and Palgaut, northwards, along the skirts of the Western Ghats, to the source of the Kistna; and thence eastward to Beder." The tract thus defined appears in the first instance to have

been comprised within the boundaries of the Hindoo kingdom of Carnata or Bijjanagar. Upon the subversion of this monarchy, its territory was partitioned between the Mahomedan kingdoms of Beejapore and Golconda; and upon the annexation of these realms to the empire of Delhi, in the reign of Aurungzebe, the whole of the Carnatic merged into the soubah of the Deccan. By Hamilton, the Carnatic is said to commence at the south frontier of Guntoor, and to extend to Cape Comorin; and this writer ascribes to it an average breadth of only seventy-five miles. By Hamilton also it is divided into the Southern, the Central, and the Northern Carnatic. The first name is by him assigned to the country south of the river Coleroon, which comprises the native state of Poodocottah and the British districts of Tinnevely, Madura, part of Trichinopoly, and Tanjore. To the Central Carnatic he assigns the country between the Coleroon and the Pennar rivers, comprising the larger portion of the district of Trichinopoly, and the districts of North and South Arcot, Chingleput, and a section of Nellore. The Northern Carnatic he limits by the river Pennar on one extremity, and Guntoor on the other; including within it the remainder of Nellore. Modern custom seems to incline rather to Hamilton's view of the limits of the Carnatic, which may be understood to extend from lat. $8^{\circ} 10'$ to lat. 16° , and from the sea on the east to long. $77^{\circ} 20'$ on the west. This country was the theatre in which, during the last century, the French and English governments contended for mastery in India. The notorious Mahomed Ali bore the title of Nabob of the Carnatic; but in 1801 that title became merely nominal in his successors, the British government obtaining all actual power, of which indeed it had long exercised the chief portion. The last nabob dying in 1855 without heirs, the titular dignity of his house expired, and thus perished one more of the Mahometan dynasties of India.

CAROOR, in the British district of Coimbatore, presidency of Madras, a town situated on the left or north bank of the river Ambrawutty, and on a gentle rising ground, near which are the ruins of a considerable fort, containing a large temple. Distance from Calicut, E., 160 miles; Mangalore, S.E., 256. Lat. $10^{\circ} 58'$, long. $73^{\circ} 9'$.

CARRAREE, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town on the route from Durlunga to Purneah, 32 miles E. of the former. Lat. $26^{\circ} 7'$, long. $86^{\circ} 29'$.

CARRICAL.—See **KARICAL**.

CARUNAPALE, on the seacoast of the territory of Travancore, a small town at the northern extremity of an extensive inlet communicating with the Indian Ocean. Distance from Cochim city, S.E., 60 miles. Lat. $9^{\circ} 16'$, long. $75^{\circ} 28'$.

CARWAR.—See **CADAVAUD**.

CASHMERE.—The name now given to the extensive tract of country in Northern India, constituting the dominions of Gholab Singh. It is bounded on the north by the Karakorum Mountains, separating it from Thibet, which also forms its eastern frontier; on the south by the British districts of Spiti and Lahoul, and by the Punjaub; and on the west by the Punjaub and the Huzareh country. It extends from lat. $32^{\circ} 17'$ to lat. 36° , and from long. $73^{\circ} 20'$ to $79^{\circ} 40'$; its extreme length from east to west being 350 miles, and its breadth about 270. The area is about 25,000 square miles, and the population has been estimated at 750,000. Within its limits are included the valley of Cashmere, the provinces of Jamu, Bultir or Iskardoh, Ladakh, Chamba, and others of less consequence. The more important among them form the subject of separate articles, which will be found under their respective names. The remainder of this notice will be restricted to a description of Cashmere proper. The valley of Cashmere is a tract inclosed by lofty mountains, having in the centre a level expanse, and in all other parts a very uneven surface, formed by numerous ridges and gorges, extending from the plain to the surrounding highlands. If its limits be considered as determined by the culminating ridge of the tortuous range of mountains which on every side inclose it, Cashmere will be found to be 120 miles long, from the Snowy Panjal on the south-east, to the Durawur ridge in the north; and sixty-five miles broad, from the Futi Panjal on the south, to Shesha Nag at the north-east. The superficial extent is about 4,500 square miles, or a little less than four-fifths of the size of Yorkshire. The shape of the outline is irregular, but has a remote resemblance to an oval. The tract thus defined lies between lat. $33^{\circ} 15'$ — $34^{\circ} 35'$, long. $74^{\circ} 10'$ — $75^{\circ} 40'$. Hügel estimates the plain forming the bottom of the valley to be seventy-five miles long and forty miles broad, having a superficial extent of about 2,000 square miles. The general aspect of Cashmere is simple and easily comprehended, it being a basin bounded on every side by lofty mountains, in the inclosing range of which are several depressions, called popularly passes, as they afford means of communication between the valley and the adjacent countries. In the middle is the extensive alluvial tract intersected by the Jhelum and its numerous tributaries, which flow down from the mountains, and are fed by the abundant snow and rains falling in those elevated regions. All these streams find their way by the sole channel of the Jhelum through the Baramula Pass, to the plain of the Punjab, in their course to the ocean. With the exception of one summit south of Bultal Pass, the elevation of the inclosing range falls far short of that attained by the summits of the Himalaya or of the Hindoo Koosh. The number of the passes into Cashmere over the mountains is very variously stated; by Abul Fazel at twenty-six, Ferishta at three, Elphinstone at seven. Hügel men-

tions twelve, and adds that the four following of these are practicable at all times of the year: 1. The Nabog, on the eastern frontier; 2. the Banihal, on the southern frontier; 3. the Baramula Pass, southwards, or Punch Pass, on the western frontier; 4. Baramula Pass, westward, or Dubb Pass, on the same frontier. Vigne enumerates twenty, and adds, that "an active mountaineer could enter the valley in many places besides the regular passes." Eleven of these passes are said to be practicable for horses. There is no carriage-way into the valley, but the Mogul emperors frequently brought elephants by the Pir Panjal Pass, or that through which the Bimber road lies. These huge animals, being wonderfully sure-footed and capable of making their way in difficult places, were used to convey the females of the household. The Sikhs invaded the valley through the Baramula Pass, and took with them a six-pounder, slung on poles and borne by thirty-two men at a time. That European skill and perseverance could make these passes practicable for artillery, cannot be doubted. When the Mogul emperor Akbar visited Cashmere in 1557, he appointed seven maleks, or chieftains, as hereditary wardens, one for each of the passes considered to be the most important, and allotted to each a revenue, from lands and villages, proportioned to the support of an armed force deemed requisite to defend the post committed to his care. The descendants of these maleks retain the titles, but their revenues and powers are now little more than nominal. The grandeur and splendour of Cashmirian scenery results from the sublimity of the huge inclosing mountains, the picturesque beauty of the various gorges, extending from the level alluvial plain to the passes over the crest of the inclosing range; the numerous lakes and fine streams, rendered often more striking by cataracts; the luxuriance and variety of the forest-trees, and the rich and multiform vegetation of the lower grounds. The attractiveness of the scenery, the mildness of the climate, and the fertility of the soil, make Bernier conclude that it was actually the site of the garden of Eden: and Abul Fazel describes it "as a garden in perpetual spring."

The zoology of Cashmere does not appear to be rich. Bears, both brown and black, are very numerous. They are said at particular seasons to descend from the mountains and rob the fruit-trees. The wolf is rare. Vigne mentions the hyena, but doubts its existence. A panther, or sort of leopard, of a white colour with small black spots, is common in the mountains. The other beasts of prey are the jackal, fox, otter, mongoose or ichneumon, and stoat. A large and fine variety of stag occurs wild in the more retired valleys, and sometimes in severe weather great herds enter from the neighbouring wilds, and commit great havoc in the cultivated grounds. The gazelle, ibex, wild goat, musk-deer, and some other species of deer frequent the wilder parts. Though of inferior size, Hügel represents the

horse as strong, lively, of great bottom, and very tractable. It is represented as amusing to see one of them mounted by a native, dash at a gallop across a shallow river, over the bed of which, covered with loose stones, no other horse could venture but with the greatest caution. Hügel has known these hardy creatures carry each a weight of 300 pounds during the course of a day nearly forty miles across the elevated pass of Pir Pinjal. The climate, in its effect on vegetation, is described by Jacquemont as wonderfully resembling that of Lombardy, and we consequently are not surprised at finding its flora bearing a strong affinity to that of Europe. Of the character of the vegetation, an accomplished naturalist, Dr. Royle, remarks, that there is "so great an extension of the herbaceous parts as well as of the flowers of plants, that many of them rival in luxuriance those of tropical climates." Of trees, the *deodar*, or Himalayan cedar, merits notice. Its botanical range extends from 7,000 to 12,000 feet above the level of the sea, and in its most congenial locality attains a great height and a circumference of above thirty feet. So durable is its timber, that some used in the building of one of the wooden bridges over the Jhelum was found little decayed, after exposure to the weather for above 400 years. The forests of Cashmere also contain the *Pinus longifolia*, and two other species of pine, a species of fir, one of yew, and one of juniper. The chunar (*Platanus orientalis*) is also considered an exotic, but is probably nowhere found more abundant or luxuriant than in Cashmere. By order of the Mogul emperors, a grove, composed of chunars and poplars, was planted in every Cashmirian village; and these, now arrived at their full growth, are among the greatest ornaments of the valley. Most of these are ascribed to the philanthropic governor of Cashmere, Ali Mirdhan Khan, who exercised his office under Shah Jehan from 1642 to 1657. So tastefully have they been disposed, that, according to Hügel, a judicious landscape-gardener could scarcely wish one to be added or removed throughout the whole valley. Hügel does not mention the oak. Dr. Royle states, on the authority of Falconer, "that few, if any, oaks descend on the northern side of the Pir Panjal into the valley." The maple, willow, and white thorn are common. Birch and alder trees approach the limit of perpetual congelation.

The most celebrated manufacture of Cashmere is that of shawls. The wool used for this purpose is of two kinds: one called *pashm shal* (or shawl-wool), and obtained from the tame goat; the other, the fleece of the wild goat, wild sheep, and other animals, named *asatus*. In all instances it is a fine down, growing close to the skin under the common coat, and is found not only on the animals just mentioned, but also on the yak or grunting ox, and on the dog of the intensely cold and arid tracts of Tibet. The greater part is supposed to be produced in Chau Tian, a tract in the west of

Tibet, and is in the first instance sold at Rodokh, a fort near the frontier towards Ladakh, to which it is conveyed on the backs of sheep, there usually employed as beasts of burden. It is purchased by the Cashmirians at Le, the chief place of Ladakh, and carried thence to Cashmere, either on men's shoulders or on the backs of horses. There is also some brought by Moguls from Pamir, or from the vicinity of Yarkund. There is much division of labour in this manufacture: one artisan designs the patterns; another determines the quality and quantity of the thread required for executing them; a third apports and arranges the warp and woof (the former of which is generally of silk) for the border. Three weavers are employed on an embroidered shawl, of an ordinary pattern, for three months; but a very rich pair will occupy a shop for eighteen months. Of late years the annual value of the shawl-manufacture of Cashmere has been declining, the decay of this branch of trade being attributable to several causes. In Hindostan, British officers have to a great extent superseded the class of natives with whom this sort of manufacture was in chief demand. The reduced prosperity of the Ottoman and Persian nations has also greatly contracted the supply to those quarters. In Europe the taste for these costly articles is on the wane, and generally throughout the world shawls of British manufacture are displacing those of Cashmere. The essential oil, or celebrated attar of roses, made in Cashmere, is considered superior to any other; a circumstance not surprising, as, according to Hügel, the flower is here produced of surpassing fragrance as well as beauty. A large quantity of rose-water twice distilled is allowed to run off into an open vessel, placed over-night in a cool running stream, and in the morning the oil is found floating on the surface in minute specks, which are taken off very carefully by means of a blade of the sword-lily. When cool it is of a dark-green colour, and as hard as resin, not becoming liquid at a temperature below that of boiling water. Between 500 and 600 pounds weight of leaves are required to produce one ounce of the attar.

The greater part of the population are Mahometans, of whom the Sunis, or those considered the orthodox class, are much more numerous than the Shias, or votaries of Ali. The population of the valley is calculated at present not to exceed 200,000 persons, to which number it has been in thirty years reduced from 800,000 by the awful dispensations of earthquake, pestilence, and famine. In 1828 a dreadful earthquake destroyed 1,200 persons, and was in two months followed by the cholera, by which 100,000 perished in the course of forty days. In 1835 an unseasonable fall of snow caused the failure of four-fifths of the rice-crop. The roads were covered with the corpses of those who perished of want in attempting to emigrate. Parents frequently sold a child for a rupee, to prolong existence

for two or three days; mothers killed and devoured their own offspring. Pestilence followed; and from these successive calamities resulted the almost unexampled depopulation stated above. The population of the capital, Serinagur, which was estimated by Elphinstone at from 150,000 to 200,000, is now not more than 40,000. The other towns, besides the capital, are Islamabad, Shupeyon, Pampur, Sopur, Bijbahar, Baramula, Shabbad.

The early history of Cashmere, which lies rather within the province of the oriental antiquarian than the limits of the present work, has been drawn from darkness, and methodized by the varied learning and cultivated judgment of Professor Wilson. Still there is much uncertainty regarding it until the reign of Shumad-Din, who ascended the throne in 1315, and introduced Mahometanism. In 1586 the country was conquered by the Mogul emperor Akbar, and became an integral part of his vast empire. In 1752 it was subjugated by the Afghan Ahmed Shah, the founder of the Durani empire, and remained under Afghan sway until 1819, when it was conquered by the Sikhs. From that time it was ruled by a governor appointed by the maharajah of the Punjab until the year 1845. An unprovoked aggression on the British territory by the Sikh army, in the month of December of that year, led to hostile operations, which resulted in the occupation by the British of Lahore, where a treaty was concluded, under which the hill-country between the Beas and the Indus, including the province of Cashmere, was ceded to them as indemnification for the expenses of the war. The larger portion of this territorial cession was at once transferred, in independent possession, to its present ruler, Gholab Singh, in consideration of a pecuniary equivalent. By the terms of the treaty, Gholab Singh acknowledges the supremacy of the British government, and binds himself to assist them with troops, under certain contingencies; in return, he is to be aided in defending himself from his enemies. According to the returns of 1848, the military force maintained by the ruler of Cashmere consisted of 1,200 artillery, 1,972 cavalry, and 20,418 infantry, exclusive of an irregular force furnished by his feudal chiefs; but an intimation had been received by the British government of his intention, at a fitting opportunity, to effect a reduction in the strength of his army.

CASIMABAD, in the British district of Ghazeepeer, lieutenant-gov. of the N.W. Provinces, a town on the route from Ghazeepeer to Goruckpeer, 15 miles N. of the former. Lat. $25^{\circ} 45'$, long. $83^{\circ} 43'$.

CASSAWARUM PETTA, in the British district of North Arcot, presidency of Madras, a town five miles N. of the projected line of railroad from Madras to Menil, 10 miles N.E. of the latter. Lat. $13^{\circ} 10'$, long. $79^{\circ} 41'$.

CASSEAHGOW.—A town in the native

state of Nepal, distant N. from Jemlah 25 miles. Lat. $29^{\circ} 40'$, long. $81^{\circ} 49'$.

CASSERGURJE, in the British district of Mymensing, lieutenant-gov. of Bengal, a town on the left bank of the Brahmapootra, 25 miles S.E. of Jumbalpor. Lat. $24^{\circ} 47'$, long. $90^{\circ} 26'$.

CATCHOOA, in the British district known as the Soonderbunds, lieutenant-gov. of Bengal, a town on the route from Backergunje to Jessore, 32 miles W. of the former. Lat. $22^{\circ} 37'$, long. $89^{\circ} 52'$.

CATMANDHOO.—See **KHATMANDOO**.

CATTYWAR.—See **KATTYWAR**.

CAUDWIN.—A town in Nagpore, distant N.W. from Bustur 28 miles. Lat. $19^{\circ} 24'$, long. $81^{\circ} 36'$.

CAULY NUDDY.—A river of Western India, rising in lat. $15^{\circ} 33'$, long. $74^{\circ} 47'$, in Belgaum, twenty miles north-west from the town of Dharwar, and flowing southerly for eleven miles, through the collectorate of Belgaum, and fifty miles through that of North Canara, it turns west, in which direction it flows for thirty miles, and falls into the Indian Ocean near the town of Sedashevaghur, in lat. $14^{\circ} 51'$, long. $74^{\circ} 11'$.

CAUSERGODE, in the British district of South Canara, presidency of Madras, a town on the route from Mangalore to Cannanore, 26 miles S.E. of the former. Lat. $12^{\circ} 30'$, long. $75^{\circ} 3'$.

CAUVERIPURAM, in the British district of Coimbatore, presidency of Madras, a town on the right bank of the Cauvery, 80 miles N.E. of Coimbatore. Lat. $11^{\circ} 54'$, long. $77^{\circ} 48'$. The pass of Cauveripuram, which is thirty miles in length, winding through two lofty ranges of mountains, was traversed in 1799 by the detachment under Colonel Read on the march to Seringapatam.

CAUVERY, a river of Southern India, rises in the British district of Coorg, in lat. $12^{\circ} 25'$, long. $75^{\circ} 34'$, and taking an easterly direction for thirty-three miles, turns north-east for eight miles, at which point it touches on the territory of Mysore, and for twenty miles forms its boundary towards Coorg, still flowing north-easterly. It then enters Mysore, through which it flows in a direction generally south-easterly for ninety-five miles, to Tullacaud, from whence, its course being first north-easterly, and subsequently easterly, it becomes the bounding line between the Mysore territory and that of the British district Coimbatore for forty miles, when it finally leaves Mysore. Taking a direction south-east for forty-seven miles, it then makes its way, at the pass of Caveripuram, through the range of the Eastern Ghats, and continues to hold a course generally southerly for forty-seven miles, to Yirodu, where it turns south-east. It subsequently turns east, and after a further course of ninety miles to the vicinity of Trichinopoly, divides into several streams, embracing a delta seventy

miles in length from the apex to the sea, and having a base of eighty miles. The most considerable branch is the Coleroon, the course of which is the furthest to the north. The length of the Coleroon is ninety-two miles, and the length of course from the source of the parent river, in Coorg, to the mouth by which the Coleroon enters the sea, is 472 miles. The branch which continues to bear the name of the Cauvery is of inferior magnitude, much of its volume of water being drawn off to irrigate the neighbouring lands. The principal tributaries of the Cauvery are the Hennavutty, flowing from the north-west, and joining it on the left side close to Kistnarajpoor; the Lechman-Teert, which, flowing from the south-west, joins it about eight miles lower down, but on the opposite or right side; the Cullbany, a considerable stream, also flowing from the south-west, and joining it on the right side; the Shimsha, flowing from the north, and joining it on the left side; the Arkavati, flowing also from the north, and joining it on the left side; the Bhowani, descending from the Neilgherry group, flowing east, and falling into it on the right side; the Noyel river, running a course nearly parallel to that last mentioned, and joining the Cauvery on the right side; the Ambrawutty, which, flowing north-east, falls into the Cauvery on the right side. There are many others of less importance, and which, though large and rapid during the monsoon rains, are at other times totally or nearly devoid of water. Such is the case with the Cauvery itself in the low country during March, April, and part of May; but, replenished by the south-west monsoon, the volume of water early in July becomes considerable, and in August the inundation is great. The course of the Cauvery is over an extensive and generally barren surface of granitic rocks, with scarcely any woods or jungle on its banks. It consequently brings down no vegetable alluvium, but a rich clay, rendering the plains of Tanjore the most fertile portion of the south of India. During the inundation, the river is navigable through the low country for craft. Those in use are represented to be "circular baskets, from nine to fourteen feet in diameter, covered with buffalo leather." In these cotton, sandal-wood, saltpetre, and other wares, are brought down the river; and as the violence of the current precludes their upward navigation, they are taken to pieces, the basket-work abandoned, and the leather taken back on men's heads. The Cauvery passes from the table-land of Mysore to the low country by two falls; the upper, or that of Gungan Zooka, being 370 feet; the lower, or that of Burr Zooka, 460. During the periodical inundations, the vast body of water and enormous falls, combined with the sublime scenery adjacent, render these cataracts inferior to none in grandeur. Various public works connected with the Cauvery have of late years been undertaken by the government. An expenditure estimated at 50,000*l.* was sanctioned in 1841, for completing certain

annicuts or dams thrown across the river, to collect the waters for purposes of irrigation; and a sum of between 2,000*l.* and 3,000*l.* at a later period was assigned to the construction of a bridge over the river at Frazerpet, being on the main line of communication between Bangalore and the western coast.

CAUVERYPAUK, in the British district of North Arcot, presidency of Madras, a town situate on the route from Madras to Arcot, and in the midst of a fertile district, artificially irrigated by means of one of the most magnificent tanks in the south of India, 11 miles E. of the latter. Lat. 12° 54', long. 79° 38'.

CAUZEE, in the British district of Silhet, lieut.-gov. of Bengal, a town on the south or left bank of the Soornah river, 10 miles W. of Silhet. Lat. 24° 54', long. 91° 42'.

CAWNPORE, under the lieut.-gov. of the N. W. Provinces, a British district named from its principal town. It is entirely within the limits of the Doab, extending from the Jumna to the Ganges, the latter river forming its north-eastern boundary, and dividing it from the territory of Oude; the former, the south-western boundary, separating it from the British districts of Humeerpoor and Calpee, and from the Bundela state of Bownee. On the north-west it is bounded by the British districts Etawah and Furruckhabad, on the south-east by the British district Futtehpore. Cawnpore lies between lat. 25° 55' and 27°, long. 79° 34'—80° 37'; is seventy-five miles in length from north to south, and sixty-five in breadth; and has an area of 2,337 square miles. The population in 1853, as ascertained by actual enumeration, was 1,174,566; of whom 1,085,132 were Hindoos, and 89,424 Mahomedans. The following classification of towns and villages is furnished by official returns:—Number containing less than 1,000 inhabitants, 3,314; ditto more than 1,000 and less than 5,000, 214; ditto more than 5,000 and less than 10,000, 6; ditto more than 10,000 and less than 50,000, 1; ditto more than 50,000, 1; total, 3,536. The greater part of this district lies on the scarcely perceptible slope, extending westward or south-westward, from the slightly elevated crest of the Doab; and consequently the Urund or Rhind, and the Kurun or Singur, the only streams of much importance, flow towards the Jumna, and ultimately discharge themselves into it. The Esun flows in a direction from north-west to south-east twenty miles, through the north-eastern angle of the district. The Pandoo traverses the whole district in the same direction, and falls into the Ganges at the south-eastern corner. In addition to the means afforded by the Esun, the Jumna, and the Ganges (all of which are navigable in their course through this district), a farther channel of water-carriage will soon be opened in the prolongation of the Ganges Canal, which leaves that river on the right side, at Kan Khal, about two miles below Hurdwar, and, proceed-

ing down the Doab, is intended to rejoin the main stream at Cawnpore. Besides the inclination of the surface of the country towards the Jumna, a general slope from north-west to south-east is indicated by the direction of the courses of the two great rivers in that direction.

Rice is scarcely cultivated, though some may be observed about the cantonment of Cawnpore, in the valley of the Kaun, and a few other places; the alimentary crops being chiefly wheat, barley, maize, pulse, oil-seeds, sugar, and potatoes. Millet is cultivated, not so much for its grain, which is small and meagre, as on account of its straw, which is ten feet long, and an inch in circumference. Sugar-cane and maize thrive luxuriantly, growing to the height of eight or ten feet, and grow so closely as to exclude the light of the sun. Indigo, considered indigenous in this tract, and found wild in great luxuriance and of fine quality, is cultivated, but to no great extent; more land being now cropped for seed, which is exported, than for preparing the dye. The poppy, which has been but recently introduced, thrives well, and its culture is likely to contribute to the prosperity of the district. Safflower (*Carthamus tinctorius*) is also extensively cultivated for dyeing cottons a rose-colour. The cotton-plant thrives well, and is an important crop. An excellent judge on this subject says, "The cotton-plants which I saw in many places from Agra to Allahabad seemed more prolific than any which I have seen elsewhere." The soil and climate are well suited for producing fine tobacco, which is especially cultivated in the vicinity of Kanauj. Under the existing revenue settlement of the North-West Provinces, the lands of this district are not liable to any increased assessment on the part of government until the year 1870.

Schools in this district are numerous. The scholars are exclusively males, except in one of the missionary schools, called the Native Female Orphan Asylum, which contains fifty girls, who are maintained as well as educated. The schools are classed as Persian, Arabic, Hindoo, Sanscrit, and English. It is stated that the desire for instruction has increased. This is attributed to the general encouragement afforded to education by government, as well as to a supply of useful vernacular books from the same quarter. In facilities of communication this district has many advantages. Besides those afforded by the great rivers, and the East-Indian line of railway, it possesses others in a number of excellent roads. The great trunk road connecting the north of India with the capital passes completely across the district: it is metalled and kept in admirable repair. From the city of Cawnpore to Calpee, there is another metalled road, completed about five years since. Besides these, the district is intersected in every direction by convenient roads, annually repaired at the close of the rains. While these prevail, the roads are in some places flooded, and consequently

for a time impassable. To remedy this, bridges are gradually constructed as funds are available; the whole management of the roads (with the exception of the great trunk road) being vested in a committee composed of Europeans and natives. The great trunk road is under the charge of an officer of engineers.

The tract comprised within this district was, in 1195, subdued by the Mahomedans, under Shahabuddin Ghori. In 1529, Baber subdued and added it to his dominions; and in 1540 it was the scene of the arduous struggles of his son Humayon with the Patan chief Sher Khan, by the event of which the former was expelled from the sovereignty of Delhi, which passed over to his rival. In the dismemberment of the empire, in the eighteenth century, it came into the hands of Sufier Jung, nawaub of Oude. By the treaty of Fyzabad, concluded 1775, between the East-India Company and Asaf-ud-dowlah, the then nawaub of Oude, the former stipulated to supply a regular brigade for the defence of the latter, and Cawnpore was selected as the station of this force. Subsequently, in 1801, the subsidy stipulated by the nawaub for the maintenance of the auxiliary British force was commuted by the cession of the provinces of the Southern Doab and some others; and in virtue of this treaty, the tract comprised in the present district of Cawnpore was embodied with the territory of the East-India Company.

CAWNPORE, the principal place of the district of the same name, is situate in the pergunnah or subdivision of Janjman. The site is on the right bank of the Ganges, stated by Von Orlich to be here 600 yards wide in the season when the stream is lowest; when swollen by the periodical rains, in the latter part of summer, it was found to be about a mile wide, and very rapid; but on that occasion the river was unusually low, in consequence of the small quantity of rain which had fallen that season. The city covers an area of 690 acres, contains about 11,000 houses of all descriptions, and nearly 59,000 inhabitants. The population of the cantonments amounts to 49,975; making a total of 108,796, exclusive of the military. The commerce at the ghat or landing-place is busy and important, the Ganges being navigable downwards to the sea, a distance of above 1,000 miles, and upwards to Sakertal, a distance of 300. The scene is vividly described by Skinner:—"Every description of vessel that can be imagined was collected along the bank: the pinnace, which, with its three masts and neat rigging, might have passed for a ship; badgerows—the clumsiest of all clumsy things—with their sterns several times higher than their bows; and baulsees, ugly enough, but lightly skimming along like gondolas, compared with the heavy craft about them; the drifting haystacks, which the country boats appear to be when at a distance, with their native crews straining every nerve upon their summits, and cheering

themselves with a wild and not unfrequently a sweet song; panchways shooting swiftly down the stream, with one person only on board, who sits at the head steering with his right hand, rowing with his foot, and in the left hand holding his pipe. A ferry-boat constantly plying across the stream adds to the variety of the scene, by its motley collection of passengers—travellers, merchants, and fakirs, camels, bullocks, and horses, all crowded together. The vessels fastened to the shore are so closely packed, that they appeared to be one mass, and, from their thatched roofs and low entrances, might easily pass for a floating village." The commerce of Cawnpore must gain a great increase, on the completion of the navigable canal projected to proceed from it up the middle of the Doab, and rejoin the river on the right side, two miles below Hurdwar. The immediate environs of the place, though on a sandy plain, broken occasionally into ravines, are so much embellished by art as to have considerable picturesque beauty. "On the right bank of the Ganges, many hundred bungalows, the barracks of the troops, and the barracks, extend in a semicircle for nearly five miles, which imparts to the whole a striking and splendid appearance." The bungalows or lodges of the officers and residents are large and commodious, and though either tiled or thatched, and individually, perhaps, unsightly, have, upon the whole, a striking and pleasing appearance amidst their compounds, or inclosures, which are usually handsomely planted. These compounds or gardens, intermixed with forest-trees, give the place a very luxuriant appearance during the season favourable to verdure. The gardens are considered some of the finest in India, and produce in abundance, and of excellent quality, most European vegetables, grapes, peaches, mangoes, shaddocks, plantains, melons, oranges, limes, guavas, custard-apples. In the centre of the cantonments, and on the highest ground, are two stone buildings, of very imposing exterior—the Assembly-rooms and the theatre. A church also was built some years since, when the government granted a sum of 5,000 rupees in aid of a private subscription, and allotted a piece of ground for its erection. In the cold season horse-races are held in an extensive piece of open ground to the north-west of the cantonments. The native town is ill built and dirty, yet has a pleasing appearance as seen from without. The bazaars are well supplied with the wares of Europe, China, and India; the jewellers are considered excellent workmen, and the place is celebrated for the manufacture of leather, and of the articles fabricated from that material. Butcher's meat, poultry, fish, and vegetables, are abundant and excellent, and game abounds; the feathered kinds consisting chiefly of quails, snipes, and wild ducks. During the hot winds ortolans come in such great flights, that fifty or sixty will drop at a single shot. In midwinter the cold at night is

sufficient to freeze water exposed to the atmosphere in shallow earthen pans. The ice thus formed is carefully collected and stored in an ice-house, and the quantity obtained suffices throughout the year for the supply of the European families. In the dry season the friable nature of the soil causes the dust to be a very serious annoyance, especially during the exercising of troops. Bacon, describing a military review, observes, "Arriving upon the ground just after the evolutions had commenced, the only evidence I had of the military operations going forward was in the trampling of horses, the rattling of accoutrements, and the discharges of artillery; not one single man or horse of the whole martial array did I behold until after the display, and then a light breeze springing up, by great good-fortune, carried off the huge white curtain of dust which had hitherto hung over the scene." These exercises take place on an extensive piece of open ground adjoining the town, and on which, in the cool part of the year, corresponding to the midwinter of more northern climes, the infantry of the cantonment encamp. "Regular streets and squares of canvas stretch over an immense tract: each regiment is provided with its bazaar; in the rear and far beyond the lines, the almost innumerable camp-followers, of every description, form their bivouacs." The artillery encamp on another piece of ground, beyond some ravines. The cantonments are six miles long by about half a mile broad, and contain an area of upwards of ten square miles. These in themselves form a town, having a population of about 50,000, exclusive of the military and European gentry. There is accommodation for 7,000 troops. The climate does not appear to be complained of by the residents, as they assured Heber, "that, during the rains, it was a very desirable situation; that the cold months were remarkably dry and bracing; and that the hot winds were not worse than in most other parts of the Doab." It is said to be inferior in salubrity to Meerut, to which place it has been determined to remove the head-quarters of the artillery. Heber remarks, that "there are many handsome mosques, and the view of the town from the course gives quite the idea of a city;" and adds, "On the whole, it is in many respects one of the most considerable towns which I have seen in Northern India; but being of merely modern origin, it has no fine ancient buildings to show. The European architecture is confined to works of absolute necessity only, and marked by the greatest simplicity; and few places of its size can be named where there is so absolutely nothing to see." The importance of this place is, indeed, altogether of recent date, and resulting from its selection, in A.D. 1777, as a military cantonment by the British authorities. It does not appear to be mentioned by Baber in his narrative of military operations in the Doab, and it is passed over in the Ayeen Akbery. The first notice of it is perhaps that by

Rennell. The elevation above the sea is probably about 580 feet. The distance N.W. from Calcutta is 628 miles by land, 954 by water. From Delhi it is distant, S.E., 266 miles. Lat. $26^{\circ} 29'$, long. $80^{\circ} 25'$.

CEYLON.—A large and fertile island lying at the entrance of the Bay of Bengal, and separated from the continent of India by the Gulf of Manaar and Palk Strait. In strictness it does not fall within the compass of this work, which is intended to embrace only continental India, with such oceanic appendages as are under the government of the East-India Company. Ceylon is not under that government, but is subject to the colonial department of the British administration; an arrangement strongly opposed by that great Indian statesman the Marquis Wellesley, when it was first made. The extreme length of the island is about 270 miles; its breadth varies greatly, but the average is 100 miles. It lies between lat. $5^{\circ} 56'$ and $9^{\circ} 46'$, long. $79^{\circ} 36'$ — $81^{\circ} 58'$. The early history of Ceylon is mixed up with the mythological absurdity which distinguishes that of other eastern nations, and which, destitute of the beauty which pervades that of Greece and Rome, is not less repulsive than despicable. The Portuguese arrived here early in the sixteenth century. In the following they were succeeded by the Dutch, who contrived to expel their predecessors; but the permanent acquisitions of those nations were restricted to the maritime parts of Ceylon. During the war originating in the French revolution, the Dutch settlements fell to the British, in whose possession they have ever since remained. The centre of the island was occupied by the native kingdom of Candy. With that kingdom the British, in 1803, became embroiled; but the war was productive of neither honour nor advantage to either party engaged in it. It was most unsatisfactorily terminated by what has been termed "a tacit suspension of hostilities." A number of British prisoners had been massacred in cold blood; but all effort to obtain either redress or vengeance was discontinued. In 1815, however, the British government suddenly saw reason to change its course. A force despatched against the Candian dominions took possession of them almost without resistance, the movement being aided by the unpopularity of the ruling monarch with his subjects. Some disturbances a few years afterwards were very readily suppressed, as were others still more recent, occurring during the government of Viscount Torrington.

CHACHLA.—A town in the native state of Cutch, in political connection with the presidency of Bombay, distant N.W. from Bhooj 31 miles. Lat. $23^{\circ} 36'$, long. $69^{\circ} 26'$.

CHACHOWRA, in Gwalior, or the possessions of Scindia, a town on the route from Goonah to Mhow, 40 miles S.W. of former, 145 N.E. of latter. It has a good bazaar, and water is abundant from wells. In the early

part of the present century it was taken by Bapat, one of Doulut Rao Scindia's generals, and since that time has fallen into great decay. Lat. $24^{\circ} 10'$, long. 77° .

CHACHUR.—A town in the native state of Bahawalpore, in political connection with the government of India, distant S.W. from Bahawalpore 81 miles. Lat. $28^{\circ} 53'$, long. $70^{\circ} 84'$.

CHACHYE, in the territory of Rewa, or Baghelkund, a village on the direct route from Mirzapore to the diamond-mines of Panna, and 71 miles W. of the former. It is remarkable for a cascade of 362 feet, formed by the Beher, a stream which, three or four miles farther down, falls into the Tons. Elevation above the sea 990 feet. Lat. $24^{\circ} 47'$, long. $81^{\circ} 21'$.

CHACKI, in the British district of Mongheer, lieutenant-gov. of Bengal, a town on the route from Mongheer to Raneeggunge, 52 miles S. of the former. Lat. $24^{\circ} 35'$, long. $86^{\circ} 26'$.

CHAHIN, in the Rajpoot state of Jessulmere, a village on the route from the town of Bikaner to that of Jessulmere, and 62 miles N.E. of the latter. The inhabitants are notorious marauders, making frequent forays to carry off cattle and other plunder. It contains 100 houses, supplied with water from five wells 180 feet deep. Lat. $27^{\circ} 13'$, long. $71^{\circ} 53'$.

CHAHIR, in Sirhind, a village on the route from Hansi to Ludiana, and 68 miles N. of the former town. It is situate in a country slightly undulated in low sandy swells, and in some places overspread with jungle, but in general cultivated. Distance N.W. from Calcutta 1,044 miles. Lat. $30^{\circ} 2'$, long. $75^{\circ} 59'$.

CHAH-MAH.—A town in the British territory of Assam, inhabited by the Naga tribes, distant 90 miles S.E. from Nowgong. Lat. $25^{\circ} 34'$, long. $93^{\circ} 52'$.

CHAIRASSA, in the British district Singhbhum, lieutenant-gov. of Bengal, a town the seat of the civil establishment, and probably the only place in the district to which the name of town can with propriety be applied. There is a jail; and here also is stationed a detachment of the Rangurh light infantry and some local horse. Distant S. from Hazaribagh 100 miles. Lat. $22^{\circ} 36'$, long. $85^{\circ} 45'$.

CHAIL, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a town 13 miles W. of the city of Allahabad. It is situate in the pergunnah or subdivision of Allahabad, which from it is sometimes called that of Chail. Lat. $25^{\circ} 25'$, long. $81^{\circ} 43'$.

CHAKKI.—A river of the Punjab, rising in lat. $32^{\circ} 15'$, long. $76^{\circ} 5'$, and falling into the Beas in lat. $31^{\circ} 43'$, long. $75^{\circ} 33'$.

CHAKSOO, in the Rajpoot state of Jeypore, a town on the route from Agra to Nusseerabad, 142 miles S.W. of former, 80 E. of latter. It is of considerable size, and has a bazaar. Lat. $26^{\circ} 36'$, long. 76° .

CHALA, in the British district of Sudiya, in Assam, lieut.-gov. of Bengal, a town four miles from the left bank of the river Brahmaputra, 40 miles E. of Sudiya. Lat. $27^{\circ} 48'$, long. $96^{\circ} 22'$.

CHALADOKPO, in Bussahir, a torrent of the district of Koonawur. It rises in Chinese Tartary, about lat. 32° , and after a north-west course of between twenty and thirty miles, falls into the Li, or river of Spiti, on the left side, in lat. $32^{\circ} 2'$, long. $78^{\circ} 39'$, at an elevation of about 10,600 feet above the sea. About three miles above its mouth Gerard crossed it on a sango or wooden bridge, sixty-one feet above the stream, which is there a rapid, violent mountain-torrent.

CHALAIN MEW, in Burmah, an old town on the route from Sembew Ghewn, in Burmah, to Aeng, in Arracan. Around it are the remains of a lofty brick wall, at some places fifty feet high. This town is said to have been built above 1,500 years ago. It was almost destroyed by fire during the first war with the Burmese. It contained 10,000 inhabitants, and is the capital of the district of Chalaín. The country around is fertile, and highly cultivated, chiefly with rice. Lat. $20^{\circ} 34'$, long. $94^{\circ} 32'$.

CHAMBA.—A town in the southern division of the kingdom of Cashmere, or dominions of Gholab Singh, situate among the southern mountains of the Himalaya, on the river Ravee, at the foot of a lofty peak covered with snow. Its situation is very picturesque and beautiful. The number of houses is estimated at 1,000. They are built of wood, and ranged about a rectangular open space, 500 yards long and eighty broad. Chumba is the residence of the rajah of the neighbouring country. The population is probably about 5,000. It appears to have decayed since the time of Forster, who calls it Jumbo, and describes it as "a mart of the first note in this part of the country." The division of which this is the principal place is one of the provinces transferred by the British to Gholab Singh in 1846. Its area is 4,500 square miles. Lat. of the town $32^{\circ} 29'$, long. $76^{\circ} 10'$.

CHAMBURGOONDY, in the British district of Nassick, presidency of Bombay, a town on the route from Sholapoor to Seroor, 28 miles S.E. of the latter. Lat. $18^{\circ} 38'$, long. $74^{\circ} 44'$.

CHAMORERIL.—A lake in Ladakh, in the elevated table-land of Rupshu, situate between the valley of the Sutluj and that of the Indus, called by Trebeck, Tsummureri. It is 15,000 feet above the level of the sea, and is surrounded by mountains, which rise in some places 5,000 feet above the surface of the water. The general breadth is about two miles and a half; the length, which is in a direction from north to south, is about fifteen miles; the circumference about forty. The water is brackish, of a blue colour, and Trebeck conjectures it deep. Lat. $32^{\circ} 55'$, long. $78^{\circ} 15'$.

CHAMPAMUTTEE.—A river rising on the southern slope of the great snowy range of the Himalayas, in lat. $27^{\circ} 58'$, long. $90^{\circ} 5'$; it flows in a southerly direction for 120 miles through the native state of Bhotan, and twenty-five miles through the British district of Goalpara, and falls into the Brahmaputra on its north or right bank, in lat. $26^{\circ} 11'$, long. $90^{\circ} 22'$.

CHAMPANEER, in the British district of Ajmere, lieut.-gov. of the N.W. Provinces, a town on the route from Oodeypoor to Kishengurh, 40 miles S. of the latter. Lat. 26° , long. $74^{\circ} 58'$.

CHAMPANEER.—A hill fort of Guzerat, situate on an isolated rock of great height. The fortifications inclose a space about three-quarters of a mile in length and three furlongs in breadth; and within the inclosure are two forts, an upper and a lower. The upper is the smaller but stronger, being, according to the notions of the natives, impregnable. It contains a famous Hindoo temple, dedicated to the female divinity Kali. The lower fort is also very difficult of access, and in all respects of great natural strength, and contains some curious Hindoo monuments of remote antiquity. There are no other buildings within the fort but a small gateway, with apartments for a commanding officer; so that there appears to be no accommodation for a strong garrison; and when Captain Miles visited the place in 1812, the force holding it did not exceed 300 men. At the base of the mountain is a poor straggling town, containing about 2,000 inhabitants; but everywhere around, amidst the dense jungle, now infested with tigers and other wild animals, are the remains of temples, fine houses, good tanks, and mosques. Previously to the invasion of this part of India by the Mussulmans, Champaneer was held by a Chouhan succession of Rajpoot rajahs, the last of whom, stated to have 60,000 followers, was, after a blockade of twelve years, obliged to surrender to Mahmood, king of Guzerat, who reigned from 1459 to 1511. This event took place in 1484; and from the capture of this fort and that of Joonagarh, according to popular tradition, Mahmood received the surname of Bigarrah; "the number two in the Guzerat language being called *bi*, and the name of a fort *garrah*." The kings of Guzerat retained Champaneer until 1534, when Humayon, emperor of Delhi, in person surprised the fort, ascending the precipitous rock by means of great iron spikes driven into its face, and opening the gate, admitted the main body of his troops advancing to storm. On the dismemberment of the empire of Delhi, in the latter part of the eighteenth century, it was seized by the Mahrattas, and ultimately fell into the hands of Madhjee Scindia; but was so neglected by his successor, Dowlut Rao Scindia, that on the 17th of September, 1802, it surrendered to a small British detachment under the command of Colonel Woodington.

It was subsequently, with unaccountable facility, restored in 1803 to Dowlut Rao Scindia, by the treaty of Serjee Anjengaum. It is also called Pawangarh, from its exposure to the winds, in consequence of its elevation. Distant N. from Bombay 250 miles; E. of Mhow, *vid* Dhar, Bhopawar, and Baroda, 240. Lat. 22° 30', long. 73° 30'.

CHAMPAPORE.—A town in the British district of Bograh, *lieut.-gov.* of Bengal, 16 miles S.W. of Bograh. Lat. 24° 43', long. 89° 9'.

CHAMPAWUT, or KALEE KEMAON, in the British district of Kumaon, *lieut.-gov.* of the N.W. Provinces, a town near the south-eastern extremity of the district, containing about sixty houses. Though its elevation above the sea is considerable, it is surrounded by much higher grounds; so that it lies in a valley, which, during the rainy season, is under water for a considerable time; and hence the locality is very unhealthy at that season. On that account, the cantonment which was formerly at this place has been abolished, and the troops removed to Lohughat, six miles farther north. Elevation above the sea 5,467 feet. Distance N.W. from Calcutta, by Lucknow and Pillibit, 858 miles. Lat. 29° 20', long. 80° 8'.

CHAMTANG.—A town in the native state of Nepal, distant E. from Khatmandoo 100 miles. Lat. 27° 50', long. 85° 53'.

CHANAYAPALEM, in the British district of Nellore, presidency of Madras, a town on the route from Nellore to Ongole, 36 miles N. of the former. Lat. 14° 59', long. 80° 6'.

CHANCE ISLAND.—One of the most southern islands of the Mergui Archipelago. "It has a high peak, that may be seen ten or twelve leagues off," and may be considered as one of the Aladin group. Lat. 9° 24', long. 98° 1'.

CHANDA, in the British district of Bareilly, *lieut.-gov.* of the N.W. Provinces, a village on the route from Bareilly to Petoragarh, and 70 miles N.E. of the former. It is well supplied with water. Lat. 29°, long. 80° 5'.

CHANDAH, in the territory of Nagpore, a town on the south-western frontier, towards the territory of the Nizam, and situated on the left bank of the river Eraee, near its junction with the Wurda. It is of considerable extent, the walls being six miles round. Their direction is frequently broken, and they are surmounted by a high parapet. They are built of cut stone, are from fifteen to twenty feet high, and flanked with round towers, large enough for the heaviest guns. Within the place, and equidistant from the north and south faces, but nearer the eastern than the western wall, is a citadel; and the rest of the interior consists of straggling streets, detached houses, and plantations. Chanda is distant from the city of Nagpore, S., 85 miles; Hyderabad, N., 187; Madras, N., 480; Bombay, E., 430. Lat. 19° 57', long. 79° 23'.

CHANDAN, in the British district of Bhaugulpore, *lieut.-gov.* of Bengal, a town 43 miles S.W. of Bhaugulpore, 95 miles N.E. of Hazareebagh. Lat. 24° 39', long. 86° 41'.

CHANDAOS, in the British district of Allygurh, *lieut.-gov.* of the N.W. Provinces, a town the principal place of the *pergunnah* of the same name. It is on the route from Muttra to Meerut, and 46 miles N. of the former. It has a bazaar and a market, and is abundantly supplied with water. Lat. 28° 5', long. 77° 55'.

CHANDEORA.—See CHANDSIRA.

CHANDERI.—See CHANDHAIREE.

CHANDERNAGORE.—A French settlement, with a small adjoining territory, on the right bank of the river Hoogly, and surrounded by the territory of the British district of Hoogly, presidency of Bengal. It is delightfully situate in the extremity of a recess of a beautiful reach of the river, the bank of which on this side is considerably more elevated than on that opposite. It has an air of ruined greatness, its fine quay, and well-built streets opening on it, being now overgrown with grass, and nearly devoid of life; while the ancient residence of the governor is in ruins, the present chief officer occupying a less-assuming residence. Adjoining the French town is the native one; a collection of huts and humble dwellings huddled together; among which are many Brahminical temples, having in front ghats, or flights of stairs, giving access, for the purposes of ritual ablution, to the waters of this most revered branch of the Ganges. The Hoogly here had formerly sufficient depth of water to allow the navigation of ships of the line. The French establishment here consisted in 1840 of four juridical or police officers, a medical officer, a chaplain, two military officers, and a sort of council of management. This petty territory consists of 2,330 acres, and contains some villages, as well as the town. The authorities at Chandernagore are subject to the jurisdiction of the governor, who resides at Pondicherry, and to whom is confided the general government of the French possessions in India. The total population is estimated at 32,670; of whom 218 are Europeans, and 435 of mixed descent; the rest of unmixed native lineage. In consideration of the revenue derived by the British government from the consumption of salt in Chandernagore, an annual payment is made to the local French authorities; and under an agreement executed in Paris by the British and French authorities, the limits of this settlement have been defined, whereby sundry obstacles which retarded the construction of a portion of the Calcutta Railway have been removed.

Chandernagore appears to have been in the occupation of the French as early as 1700, the year in which Calcutta first became a British settlement. Forty years later, while the metropolis of British India continued in a state of comparative insignificance, the French settle-

ment, under the influence of Duplex, had attained a high degree of opulence and splendour, and which it retained until its capture by Clive in 1757. France recovered Chandernagore, with the rest of her factories in India, under the treaty with England of 1763. It was again taken by the British in 1793, upon the breaking out of the republican war, and finally restored to its present possessors at the general peace of 1816. Distance from Calcutta, N., 17 miles. Lat. $22^{\circ} 50'$, long. $88^{\circ} 23'$.

CHANDERPOOR.—One of the districts in the British territory of Nagpore. Its centre is about lat. $20^{\circ} 10'$, long. $79^{\circ} 40'$.

CHANDGURH.—A town in the native state of Gwalior, or possessions of Scindia's family, distant S.E. from Indore 60 miles. Lat. $22^{\circ} 16'$, long. $76^{\circ} 40'$.

CHANDHAIREE, in the territory of Gwalior, or possessions of Scindia's family, a town in Malwa, in a hilly and jungly tract, yet with a considerable quantity of fertile ground. It is at present much decayed, in consequence of Marhatta oppression, the desolations of war, and the diminution of its manufactures, undersold by the cheaper fabrics of Britain; but the extent and number of its ruins, and architectural excellence displayed in them, indicate its splendour and importance in former ages, when, according to the Ayoen Akbery, it contained "fourteen thousand stone houses, three hundred and eighty-four markets, three hundred and sixty caravanseras, and twelve thousand mosques." The fort of Chandhairee consists of a strong rampart of sandstone, flanked by circular towers, and situate on a high hill, and was formerly considered impregnable. Nearly forty years ago it was taken by blockade, by Baptiste, one of Scindia's generals. Among many remains of former greatness is a pass, cut through a solid rock 100 feet high: it bears an inscription, stating that the lofty gate of Goomtee and Keroli, near the tank, was made in 1301, by order of Ghiyasuddin, sovereign of Delhi. During the period of the independence of Malwa, it was a place of great importance; and its chief, a feudatory of Mahmood Khilji, the king, having revolted, was besieged by that prince in Chandhairee, which surrendered after a siege of eight months. Rana Sanka, the formidable Rajpoot adversary of Baber, had wrested Chandhairee from Ibrahim, the Patan sovereign of Delhi, about the year 1526, and gave it in feudal grant to one of his followers. Baber, in 1528, coveting the place, vowed to wage a holy war against it; and entering it by escalade, the Rajpoots, after performing their fearful rite of *jahar*, by the massacre of all their women and children, rushed naked and desperately on the Mussulmans, until they were slain to a man. As already mentioned, Baptiste, Scindia's general, about the year 1816, took Chandhairee from the Bundela chief who at that time held it. With the surrounding territory, it, under Marhatta sway, became a haunt of freebooters, very trouble-

some to the neighbouring tracts under British rule or protection; and on the conclusion of the treaty of 1844, it was, among other lands, assigned for the maintenance of the increased Gwalior contingent, commanded by British officers. Distant S. of Gwalior fort 105 miles, S. of Agra 170, S. of Delhi 280, S.W. of Calpee 140. Lat. $24^{\circ} 41'$, long. $78^{\circ} 12'$.

CHANDIAH.—A town in the native state of Rewah, or province of Baghelcund, distant S.W. from Rewah 72 miles. Lat. $23^{\circ} 39'$, long. $80^{\circ} 47'$.

CHANDINA KOLLI, in the Damaun division of the Punjab, a town situated on the right bank of the river Indus, 32 miles S. of the town of Dera Ismael Khan. Lat. $31^{\circ} 20'$, long. $70^{\circ} 49'$.

CHANDIPOOR, in the district of Aldemau, territory of Oude, a fort situate on the right bank of the river Ghoghra, 40 miles S.E. of Faizabad, 115 E. of Lucknow. Lat. $26^{\circ} 33'$, long. $82^{\circ} 45'$.

CHANDKOH, in Sinde, a district stretching along the right bank of the Indus, between lat. $26^{\circ} 40'$ — $27^{\circ} 20'$, and long. $67^{\circ} 25'$ — 68° . It is intersected by the Narra, the great western offset of the Indus, and several other watercourses; it is level, and extensively flooded during the season of inundation. From the latter circumstance and the nature of the soil (a rich mud deposited by the river), it has a fertility scarcely anywhere exceeded. Under the Talpoot dynasty, it belonged to the Hyderabad ameer, and yielded a considerable proportion of their revenue. It is called Chandkoh from being principally held by the Beloochee tribe of that name. Pottinger, who mentions it under the name of Chandooke, estimates the revenue derived from it by the amers at 100,000*l.* per annum; but there can be little doubt that this is an exaggeration.

CHANDKOWTA, in the British district of Sholapoor, presidency of Bombay, a town 52 miles S. of Sholapoor, 29 miles E. of Bejapoor. Lat. $16^{\circ} 56'$, long. $76^{\circ} 11'$.

CHANDNA.—A town in the Rajpoot state of Joudpore, 82 miles S.W. from Joudpore, and 80 miles N.E. from Deesa. Lat. $25^{\circ} 11'$, long. $72^{\circ} 47'$.

CHANDNUGAR, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Meerut and 27 miles W. of the former. Lat. $28^{\circ} 52'$, long. $78^{\circ} 27'$.

CHANDODE, in Guzerat, a town situate on the right bank of the river Nerbudda. Distance from Baroda, S.E., 30 miles. Lat. $21^{\circ} 58'$, long. $73^{\circ} 30'$.

CHANDORE, in the British district of Ahmednuggur, presidency of Bombay, a town on the route from Mhow to the local capital, 215 miles S.W. of the former, 148 N.E. of the latter. It is a flourishing place, and contains a population of about 7,000. Holkar holds the

patelship of the town, and some of the family appear to have formerly resided here, in a magnificent building called the Rung Muball, erected by them in the centre of the town. The fort is situate on a nearly inaccessible summit of one of the hills of the Chandore range, and commanding an important ghat or passage on the route from Candeish to Bombay. Its natural strength is thus described by the British commander Wallace, to whom it surrendered in 1804:—"The hill on which it stands, or rather which forms the fort, is naturally the strongest I ever saw, being quite inaccessible everywhere but at the gateway, where alone it is fortified by art, and where it is by no means weak. There is but one entrance of any kind." Restored by the subsequent capitulation with Holkar, it was, in 1818, surrendered to a detachment sent against it by Sir Thomas Hislop, in pursuance of its cession by Holkar, under the sixth article of the treaty of Mundisore. Distance from Hyderabad, N.W., 350 miles; from Nagpore, W., 330. Lat. $20^{\circ} 20'$, long. $74^{\circ} 14'$.

CHANDPOOR, in the British district of Bijour, lieutenant-gov. of the N.W. Provinces, a town on the route from Moradabad to Musferruggur, and 42 miles N.W. of the former place. It is of considerable size, having a population of 11,491 persons. Distant N.W. from Calcutta 930 miles. Lat. $29^{\circ} 8'$, long. $78^{\circ} 20'$.

CHANDPOOR, in Malwa, a town in the native state of Bhopal, distant E. from Bhopal 43 miles. Lat. $23^{\circ} 24'$, long. $78^{\circ} 4'$.

CHANDPOOR.—A town in the territory of Nagpore, distant N.E. from Nagpore 51 miles. Lat. $21^{\circ} 31'$, long. $79^{\circ} 50'$.

CHANDPOOR, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Saugor to Jubulpoor, 20 miles S.E. of former, 65 N.W. of latter. Elevation above the sea 1,575 feet. Lat. $23^{\circ} 36'$, long. $79^{\circ} 3'$.

CHANDPOOR, in Sirmoor, a peak in the mountains between the Giree and Tons rivers, and about four miles from the right bank of the latter. It is surmounted by a small Hindoo temple, which was a station of the large series of triangles in the trigonometrical survey of the Himalayas. Elevation above the sea 8,561 feet. Lat. $30^{\circ} 43'$, long. $77^{\circ} 43'$.

CHANDPOOR, in the territory of Gwalior, or dominions of Scindia, a small town or village on the route from Gwalior fort to Saugor, 38 miles S.E. of former, 162 N.W. of latter. It is situate on the left bank of the river Sindh, which has here a channel "about 200 yards wide, and sandy; breadth of stream in dry season forty yards, and from one and a half to two feet deep; banks steep and cut into deep ravines." Lat. $25^{\circ} 51'$, long. $78^{\circ} 27'$.

CHANDPOOR, or **CHUNDUNPOOR**, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route

from Bareilly cantonment to that of Futtshgurh, and six miles N.E. of the latter. Lat. $27^{\circ} 27'$, long. $79^{\circ} 42'$.

CHANDPORE.—A town in the British district of Bulloah, lieutenant-gov. of Bengal, 32 miles N.W. of Bulloah. Lat. $23^{\circ} 16'$, long. $90^{\circ} 39'$.

CHANDRA RIVER.—See **CHENAB**.

CHANDRAGIRI.—See **CHUNDEGGERY**.

CHANDSIRA, or **CHANDEORA**, in the Rajpoot state of Joudpore, a village on the route from Balmeer to the city of Joudpore, and 39 miles E. of the former. It is situate on the southern boundary of the Little Desert, where it is terminated by the well-watered and fertile tract along the course of the river Loonee. It contains 100 houses, supplied with water from some shallow wells rudely excavated, and unprovided with brick lining. Lat. $25^{\circ} 52'$, long. $72^{\circ} 2'$.

CHANDSUMA.—A town in the province of Guzerat, or territories of the Guicowar, distant S. from Deesa 45 miles. Lat. $23^{\circ} 37'$, long. $72^{\circ} 4'$.

CHANDUN, in the Rajpoot state of Jessulmere, a village on the route from the town of Bikaner to that of Jessulmere, and 24 miles N.E. of the latter. Lat. $26^{\circ} 59'$, long. $71^{\circ} 20'$.

CHANDWAR, in Malwa, a town in the native state of Bhopal, distant N.W. from Bhopal 26 miles. Lat. $23^{\circ} 32'$, long. $77^{\circ} 9'$.

CHANEE SOOPE, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village with a temple, on the route from Almora to Petoagarh, eight miles N.E. of the former. Lat. $29^{\circ} 39'$, long. $79^{\circ} 48'$.

CHANENI.—A town in the native state of Cashmere, or Gholab Singh's dominions, 75 miles S. from Sireenagur, and 30 miles N.E. from Jamoo. Lat. $33^{\circ} 1'$, long. $75^{\circ} 18'$.

CHANGAMAH, in the British district of South Arcot, presidency of Madras, a town 53 miles S.W. of Arcot, 61 miles N.E. of Salem. Lat. $12^{\circ} 19'$, long. $78^{\circ} 51'$.

CHANGO, in Bussahir, a collection of four hamlets in Koonawur, on the left bank of the Lee, or river of Spiti. It is situate in an alluvial plain, or rather on the level bottom of a valley, down which a stream holds its course and falls into the Lee. Lat. $31^{\circ} 58'$, long. $78^{\circ} 38'$.

CHANGREZHING, in Bussahir, a hamlet of Koonawur, near the north-eastern frontier, dividing that district from Chinese Tartary, is situate three miles east of the left bank of the Lee, or river of Spiti. It forms the remotest limit to the attempts of Europeans to penetrate into Chinese Tartary in this direction, as the Chinese population of the adjacent country to the eastward vigilantly and effectually interfere to prevent their progress. Close to this place Gerard was stopped by these people, who, however, showed a mild and hospitable

disposition, insisting on his receiving some grain and a fat sheep, as marks of their goodwill, and would receive no money in return. Elevation above the sea 12,500 feet. Lat. $28^{\circ} 3'$, long. $78^{\circ} 40'$.

CHANGSHEEL, or **CHASHIL**, in Bussahir, a lofty ridge of mountains, proceeding in a south-westerly direction from the Himalayan range, forming the southern boundary of Koonawur. Its crest forms the dividing limit between the waters of the Pabur to the west and those of the Rupin to the east. It stretches about twenty miles, between lat. $30^{\circ} 56'$ — $31^{\circ} 20'$, long. $77^{\circ} 55'$ — $78^{\circ} 12'$, and is traversed by numerous passes, having elevations of between 13,000 and 14,000 feet above the sea.

CHANIRGHUR, in the territory of Oude, a small town on the route from Allahabad to Lucknow, 24 miles N.W. of the former, 104 S.E. of the latter. Lat. $25^{\circ} 40'$, long. $81^{\circ} 35'$.

CHANMUHUN.—See **CHOMOOA**.

CHANPOOR.—A town in the native state of Nepal, distant S. from Khatmandoo 109 miles. Lat. $26^{\circ} 52'$, long. $85^{\circ} 14'$.

CHAOPOOR, in the British district of Badson, lieutenant-gov. of the N.W. Provinces, a village on the route from Allypore to Moradabad, and 37 miles N. of the former. It is situated near the left bank of the Ganges. Lat. $28^{\circ} 20'$, long. $78^{\circ} 23'$.

CHAORAS, in British Gurhwal, a village on a feeder of the Tons, and distant about six miles from the right bank of that river. It was a secondary station in the great trigonometrical survey of the Himalaya. Elevation above the sea 6,568 feet. Lat. $31^{\circ} 2'$, long. $78^{\circ} 1'$.

CHAPADONE.—A river of Tenasserim, rising in lat. $15^{\circ} 45'$, long. $98^{\circ} 10'$, and, flowing generally in a south-westerly direction for forty miles, falls into the Bay of Bengal in lat. $15^{\circ} 53'$, long. $79^{\circ} 49'$.

CHAPANER, in the British territory of Saugor and Nerbudda, a town on the right bank of the river Nerbudda, 30 miles S.W. of Hoshungabad. Lat. $22^{\circ} 33'$, long. $77^{\circ} 20'$.

CHAPEIRA.—A town in the native state of Rajpore, distant N.W. from Nursingurh 44 miles. Lat. $23^{\circ} 58'$, long. $76^{\circ} 28'$.

CHAPORA, in the Portuguese territory of Goa, a town on the seacoast, 12 miles N.W. of Goa. Lat. $15^{\circ} 36'$, long. $73^{\circ} 49'$.

CHAPRA.—See **CHYAKOT**.

CHARAMAKE, in Bussahir, a lake near the summit of the Burenda Pass, in lat. $31^{\circ} 23'$, long. $78^{\circ} 11'$, and at an elevation of 13,839 feet. It gives rise to the river Pabur, whose stream immediately precipitates itself over a ledge of rock in a curve of a hundred feet, and is instantly buried in the snows piled along its rugged course for a mile, when it reappears, gliding in crystalline brightness under arching vaults of snow. Above the lake, upon a ridge, is a massive bed of snow,

at least eighty feet in thickness, which topples over, and will eventually fall into it.

CHARCHUT.—See **CHARSHUT**.

CHARCOLLEE.—A town in the British district of Backergunja, lieutenant-gov. of Bengal, 23 miles S.W. of Backergunja. Lat. $23^{\circ} 28'$, long. 90° .

CHAREE.—A town in the native state of Bhotan, distant N.E. from Darjeeling 78 miles. Lat. $27^{\circ} 39'$, long. $89^{\circ} 23'$.

CHARGAON, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town 80 miles S.W. of Jubbulpore, 76 miles E. of Hoshungabad. Lat. $22^{\circ} 40'$, long. $78^{\circ} 55'$.

CHARRATTA, in the Punjab, a small town in the Derajat, about 12 miles W. of the Indus, and nine miles W. of Dera Ghazee Khan. It lies in a low country intersected by canals from the Indus. Population about 1,000. Lat. $30^{\circ} 3'$, long. $70^{\circ} 42'$.

CHARSHUT.—A small district of Jareegah Rajpoots, in the north-western part of the province of Guzerat, situated between lat. $23^{\circ} 45'$ and 24° , and long. $71^{\circ} 20'$ and $71^{\circ} 25'$. Charshut pays a species of black mail to Radhunpore. The population amounts to about 2,500. It depends for protection on the British government. Its connection with that government commenced on the expulsion of the numerous hordes of plunderers from Guzerat in 1819; and subsequently, in 1826, an agreement was signed between the parties. The policy observed towards Charshut is that of non-interference with its internal affairs, the protecting government exercising control over the external relations only of the protected territory. The district is divided among four chiefs.

CHL RUNG PASS, in Bussahir, traverses a mountain in the district of Koonawur. The ridge is a prolongation of the huge summit of Buldung, and rises between the valley of the Buspa river and that of the Tidung. Its passage by Gerard, in the beginning of July, appears to have been one of the most adventurous, perilous, and arduous exploits anywhere recorded. Having departed from Shulpeea, in the valley of the Buspa, and at the highest limit of vegetation, and the elevation of 14,300 feet, he held his way sometimes amidst fragments, chasms, and precipices of gneiss, sometimes through loose or half-melted snow, in which the lower limbs sank to the thighs. He reached to where, "about the height of 16,300 feet, there commenced the perpetual snow in continuous beds; the next half-mile was also on a gentle acclivity over the snow, which gave way to the depth of two feet; and lastly we ascended the steep slope to the pass. It was scarcely half a mile, but it surpassed in terror and difficulty of access anything I have yet encountered. The angle was $37\frac{1}{2}^{\circ}$, of loose stones, gravel, and snow, which the rain had soaked and mixed together, so as to make

moving laborious and miserable ; and it was so nearly impracticable, that although I spread myself on all fours, thrusting my hands into the snow to hold by it, I only reached the crest by noon, and then under great exhaustion." The danger and horror of the scene were heightened by the incessant fall of great masses of rock, one of which, of immense size, bounded down the steep within a few feet of the traveller. At the crest of the pass the mercury of the barometer gave symptoms of congelation, losing its lustre and adhering to the cup and fingers, as if amalgamated. It snowed heavily all the way, and the traveller describes his suffering as dreadful. "I actually thought at every step I should leave a foot in the snow; my hands had passed through the stages of torpor and freezing several times, and that reaction of returning warmth which you know is worse than the contact of solid ice." The crest of the pass has an elevation of 17,348 feet above the sea. Lat. 31° 24', long. 78° 35'.

CHARUNG LAMA, in Bussahir, a pass on the north-eastern boundary of Koonawur, and on the route from Chang to Changrezhing, being about six miles from each. The rock formations in the vicinity are limestone and clay-slate, but the crest of the pass itself consists of pebbles, imbedded in clay, and bearing marks of the action of water, though the bed of the Spiti or Lee, the nearest river, is 3,000 feet below it. The pass is at the elevation of 12,600 feet above the sea. Lat. 32° 1', long. 78° 38'.

CHARWAH.—A town in the native state of Gwalior, or possessions of Scindia, distant S.E. from Indore 80 miles. Lat. 22° 2', long. 76° 56'.

CHASHIL PASS, in Bussahir, over the Changshil Chashil range, has an elevation of 12,870 feet. Lat. 31° 13', long. 78° 3'.

CHASS, in the British district of Pachete, lieutenant-gov. of Bengal, a small town or village on the route from Bankoora to Hazareebagh, 71 miles N.W. of former, 67 S.E. of latter. It has a bazaar. Lat. 23° 34', long. 86° 12'.

CHATARI, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a small town on the route from the cantonment of Allygurh to that of Moradabad, and 14 miles N.E. of the former. It is supplied with water from wells; has a bazaar, and is surrounded by a mud wall and ditch. Lat. 28° 6', long. 78° 13'.

CHATELI.—A town in the native state of Sukhet (Trans-Sutlej territory), 10 miles S.W. from Sukhet, and 36 miles N.W. from Simla. Lat. 31° 28', long. 76° 49'.

CHATMAY.—A village situate on the seacoast of Arracan. About two miles from the shore are the small islands called North Round Island and Rocky Island, three miles distant from each other. Lat. 18° 50', long. 94° 10'.

CHATNA.—A town in the native state of

Nepal, distant N.E. from Khatmandoo 30 miles. Lat. 27° 58', long. 85° 39'.

CHATNA.—A town in the British district of Pachete, lieutenant-gov. of Bengal, eight miles N.W. of Bancoora. Lat. 23° 20', long. 87°.

CHATOOR, in the British district of Tinnevely, presidency of Madras, a town on the route from Tinnevely to Madura, 47 miles N. of the former. Lat. 9° 21', long. 77° 59'.

CHATRO.—A town in the native state of Cashmere, or dominions of Gholab Singh, 89 miles W. from Sirinagur, and 34 miles N.E. from Rawul Pind. Lat. 34°, long. 73° 30'.

CHATTUR, in the British district of Ramgurh, lieutenant-gov. of Bengal, a town on the right bank of the Dammoodah river, five miles S.E. of Ramgurh. Lat. 23° 39', long. 85° 36'.

CHATTWYE, or **CHETWA**, in the British district of Malabar, presidency of Madras, a town on an island or strip of land extending for twenty-seven miles, nearly from south-east to north-west, between lat. 10° 9'—10° 32', long. 76° 6'—76° 17', with a breadth varying from two to four miles. Wrested from the Portuguese by the Dutch, it was in 1776 taken from the latter by Hyder Ali, and ceded to the British, under the pacification of 1792, by his son Tippoo Sultan. Distance from Cochin, N.W., 41 miles; Calicut, S.E., 54; Madras, S.W., 340. Lat. 10° 32', long. 76° 6'.

CHATUH, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a small town on the route from the cantonment of Muttra to Delhi, and 22 miles N.W. of the former. Here is a large fortress, of fine exterior appearance, but in the interior exhibiting nothing but decay. There is a bazaar in the town. Lat. 27° 43', long. 77° 34'.

CHAUNDOO, in the Reechna Doocab division of the Punjab, a town situated on the left bank of the river Chenaub, 50 miles S.W. of the town of Ramnagurh. Lat. 31° 55', long. 72° 59'.

CHAUNG LAMA.—See **CHOUGBA PASS**.

CHAWPARRAH, in the British district of Saugor and Nerbudda, a town on the route from Jubulpore to Nagpore, 67 miles S. of former, 89 N. of latter. It is situate on the north or left bank of the Wyne-Ganga, here passed by ford. Lat. 22° 24', long. 79° 40'.

CHAWULPATA, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Nerbudda river, 60 miles S.W. of Dumoh. Lat. 23° 3', long. 79° 4'.

CHAYANAPOOR.—A town in the native state of Nepal, distant S.E. from Khatmandoo 50 miles. Lat. 27° 21', long. 85° 59'.

CHAYANPOOR.—A town the chief place of a district of the same name, in the native state of Nepaul, distant E. from Khatmandoo 115 miles. Lat. 27° 20', long. 87° 3'.

CHEBOO, in the British district of Bandah,

a town 56 miles E. of the town of Bandah, 43 W. of Allahabad. Lat. $25^{\circ} 18'$, long. $81^{\circ} 11'$.

CHEDING, CHADON, or SADING.—A village standing on a headland on the seacoast of Mergui, in lat. $11^{\circ} 23'$, long. $98^{\circ} 45'$. It has only been established of late years, and owes its origin to Commissioner Maingy, who induced a Malay chief with his followers to settle here, for the purpose of populating and cultivating the country.

CHEDOO.—A station on the top of the Youmadoung Mountains, on the road from Ramree to Burmah by the Talak Pass, distant N.E. from Aeng 50 miles. Lat. $20^{\circ} 30'$, long. $94^{\circ} 24'$.

CHEDUBA.—An island situate to the west of the coast of Arracan, and south-west of the island of Ramree. It was anciently called Inaon. When the Burmese took the province of Arracan, its name, from what reason does not appear, was changed to Mekawuddee, and it is now known by that at the head of this article. Cheduba constitutes part of the district of Ramree, and is subordinate to the jurisdiction of its functionaries. It lies between lat. $18^{\circ} 40'$ — $18^{\circ} 56'$, long. $93^{\circ} 31'$ — $93^{\circ} 50'$. It is about twenty miles from north to south, and seventeen from east to west, and contains an area of about 250 square miles. The climate of Cheduba is considered more favourable than that of Arracan; being an island, it has the advantage of the cool sea-breezes, and it is, moreover, generally free from the mists which prevail on the continent. The eastern quarter of the island is the least healthy, being less exposed to the sea, and the air being in some measure contaminated by that from the mainland. The general character of its soil is rich and productive. Rice, tobacco, cotton, sugar-cane, pepper, hemp, and indigo, are among the productions of the island; but the first-mentioned is the staple produce, being of excellent quality, and grown as well in the valleys as in the fertile plains, which extend round the hills to within a short distance of the beach. It is trodden out by buffaloes, and the husking is performed by a wooden mill, put in motion by two men, which it is said will clean about thirty maunds in a day. Hemp and indigo are cultivated to a more limited extent, as is also tobacco, which, however, is of excellent quality. The geology is said to afford some curious instances for study. Along the coast are situate numerous earthy cones, from whose summits are emitted mud and gas. The mineral productions of the island are various, but exist in small quantities. Specimens of copper, iron, and silver ore have been found; but the principal mineral production is petroleum. The mode of collecting it is remarkable. The spot where it is known to exist being fixed upon, a space of about twenty yards square is dug to a depth of two feet, which becomes filled with water. In a short time the surface of the pool is covered with

oil of a greenish colour, which is skimmed off with bamboos, and put into pots. In the dry season the water disappears, and the opportunity is then taken of turning up the soil, which by this means yields an increased quantity of the article. The oil possesses a strong, pungent smell, and is a useful ingredient in the composition of paint, as it possesses the property of preserving timber from insects, especially the white ant. Trees do not abound: those which exist are limited for the most part to the hill tracts, where they attain considerable size. The trade, as may be imagined, is not extensive, the only articles exported being oil and rice. The amount of the latter is pretty considerable, and many vessels from the western shores of Bengal, from Sandoway, Ramree, and even Bassein, return laden with this article of merchandise. The extent of the population of the island has not been ascertained, but it probably amounts to above 9,000. The inhabitants are of the Mugh persuasion. They are quiet and peaceably inclined, simple, cheerful, contented, and possess many good traits of character. Their customs and habits so closely resemble their continental neighbours, that it will be needless again to notice them. An account will be found under the article "Arracan." Its history is also comprised under that of Arracan: with that province it fell into the possession of the Burmese in the latter part of the last century, and with it, in 1824, was relieved from Burmese oppressors, by its occupation by the English.

CHEEAPUT, in Sinde, a small town between Hyderabad and Khyerpoor, and 50 miles S. of the latter place. It is important as forming, with the contiguous town of Dingee, a commanding post in the communication of Khyerpoor and Emaum-Ghur with the part of the desert adjoining this last fort. Cheeaput is in lat. $26^{\circ} 55'$, long. $68^{\circ} 20'$.

CHEEARAH.—A town in the British district of Midnapore, lieut.-gov. of Bengal, 21 miles S.W. of Midnapore. Lat. $22^{\circ} 15'$, long. $87^{\circ} 6'$.

CHEECHA WUTNEE, in the Baree Doob division of the Punjab, a town situated on the left bank of the Ravee river, 72 miles N.E. of the town of Mooltan. Lat. $30^{\circ} 30'$, long. $72^{\circ} 39'$.

CHEEHUN, in the British district of Tanah, presidency of Bombay, a town on the seacoast, 63 miles N. of Bombay. Lat. $19^{\circ} 53'$, long. $72^{\circ} 43'$.

CHEEKLEE, in the British district of Surat, presidency of Bombay, a town 34 miles S.E. from Surat, 120 miles N. of Bombay. Lat. $20^{\circ} 42'$, long. $73^{\circ} 6'$.

CHEELA, in the Rajpoot state of Joudpore, a village on the route from Jessulmer, *vid* Nagor, to Nusseerabad, and 134 miles N.W. of the latter. It is supplied with good water from three wells 300 feet deep. The surrounding country is open and barren. Lat. $27^{\circ} 2'$, long. $72^{\circ} 35'$.

CHEEMPA.—A town in the native state of Bhutan, distant N.E. from Darjeeling 80 miles. Lat. $27^{\circ} 36'$, long. $89^{\circ} 26'$.

CHEEMULGA, in the British district of Sholapoor, presidency of Bombay, a town on the left bank of the Kistnah river, 30 miles S. of Beejapoor. Lat. $16^{\circ} 22'$, long. $75^{\circ} 54'$.

CHEERAEEDOONGORREE, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town 58 miles S.E. of Jubbulpore, 58 miles N.E. of Seuni. Lat. $22^{\circ} 25'$, long. $80^{\circ} 28'$.

CHEERAKA.—A town in the native state of Cutch, presidency of Bombay, distant N.W. from Bhooj 27 miles. Lat. $23^{\circ} 30'$, long. $69^{\circ} 25'$.

CHEERTROREE.—A town in the native state of Cutch, presidency of Bombay, distant E. from Bhooj 58 miles. Lat. $23^{\circ} 25'$, long. $70^{\circ} 36'$.

CHEERUNG.—A town in the native state of Bhutan, distant E. from Darjeeling 100 miles. Lat. $26^{\circ} 57'$, long. $89^{\circ} 56'$.

CHEETAPOOR.—A town in the territory of Oude, 52 miles N. from Lucknow, and 69 miles E. from Futtygurh. Lat. $27^{\circ} 35'$, long. $80^{\circ} 45'$.

CHEETUL, in the peninsula of Kattywar, province of Guzerat, a town situated on the Tobi, a stream tributary to the river Sitronjee. Distance from Ahmedabad, S.W., 130 miles; Bombay, N.W., 220. Lat. $21^{\circ} 44'$, long. $71^{\circ} 14'$.

CHEHERUT, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a village on the route from Allyghur cantonment to Moradabad, and four miles N.E. of the former. Lat. $27^{\circ} 58'$, long. $78^{\circ} 9'$.

CHELLOOR, in the British district of Rajahmundry, presidency of Madras, a town on the route from Rajahmundry to Coringa, 19 miles E. of the former. Lat. $16^{\circ} 50'$, long. $82^{\circ} 3'$.

CHELLUMBRUM, in the British district of South Arcot, presidency of Madras, a considerable town on the seacoast, on the route from Tranquebar to Arcot, 29 miles N. of the former. It was captured by the British in 1760, during the war in the Carnatic; and in 1781, during the war with Hyder Ali, it was unsuccessfully attacked by Sir Eyre Coote. Lat. $11^{\circ} 25'$, long. $79^{\circ} 45'$.

CHEMRA.—A town in the native state of Bombra, on the south-west frontier of Bengal, 25 miles E. from Sumbulpore, and 35 miles N.W. from Bombra. Lat. $21^{\circ} 30'$, long. $84^{\circ} 25'$.

CHENAUB.—A river in the Punjab, and generally considered the largest of the five by which that country is traversed. Moorcroft, who ascended, as he conjectured, to within thirty miles of its source, supposes it to rise about lat. $32^{\circ} 48'$, long. $77^{\circ} 27'$, in Lahoul, south of Ladakh, or Middle Tibet. The source

must be very elevated, as the river holds its course through the Ritanka Pass, which is 13,000 feet high. The spot from which it proceeds is, according to Vigne, a small lake, called Chandra-Bhaga, or the Garden of the Moon, and in the upper part of its course the river is called the Chandra. At Tandi it is joined by the Surajbhagha, a stream of less magnitude, running from the north; and thenceforward the river is known by the name of the Chenaub or Chinab, and sometimes of Chandra-Bhaga. The length of the streams contributing to its formation varies from forty miles in the case of the Surajbhagha, to eighty-five in that of the Chandra-Bhaga. After their confluence, Moorcroft found the stream about 200 feet broad, with a full, steady current. It takes a north-west course of about 130 miles to Kishtawar, and there receives the Muruwurdwun, or Sinund, a considerable tributary from the north. Vigne calculates the height of Kishtawar at 5,000 feet; and consequently, the Chenaub must have descended 8,000 feet in less than 200 miles, or at the rate of above forty feet in the mile. At Kishtawar, Vigne found the Chenaub flowing in a deep rocky channel twenty-five yards wide. The river thence proceeds south-west, by a very tortuous course, through a rugged country, to Riasi, a distance of about ninety miles, where it leaves the mountains, and flows into the lower ground of the Punjab. It is here about 200 yards wide, deep and tranquil, yet rapid. At Aknur, about fifty miles lower down, it becomes navigable, at least for timber-rafts, which are despatched from it down the Punjab. It continues a south-westerly course to Vazeerabad, about seventy miles lower down, where Von Hügel found the stream unfordable, and half a mile wide. Macartney measured it there in the month of July, when nearly at the fullest, and found it one mile three furlongs and twenty perches wide, with a depth of fourteen feet, and a current running five miles an hour. From this point it holds a south-west course for about thirty miles, to Ramnuggur, where, in the middle of February, and consequently the low season, it was found 300 yards wide, and with a depth of nine feet where greatest; the current running a mile and a half an hour. Hough states that it is fordable near this place in the season; but there is much reason to question this statement. It thence pursues a south-west course for about 150 miles, to its confluence with the Jhelum, a little above the ferry of Trimu. Arrian describes the turbulence of the confluence as terrific; but Burnes, who visited it at midsummer, when the streams are usually highest, found it free from violence or danger. The total length of the course of the river to this point is about 605 miles. Below the confluence with the Jhelum, the Chenaub flows south-west for about fifty miles, to its confluence with the Ravee, a much smaller river, which joins it through three mouths, close to each other.

The Chenaub was here, at the end of June, the season of the greatest height of water, three-quarters of a mile wide, and above twelve feet deep. From this place it continues its course south-west for 110 miles, to the confluence of the Ghara. At the intervening ferry opposite Mooltan, Burnes found it 1,000 yards wide at midsummer, the season of greatest inundation. The meeting of the Chenaub and Ghara is very tranquil: the water of the former is red, that of the latter pale; and these respective colours may be distinguished for some miles downwards in the united stream, the red on the right or western, the pale on the left or eastern side. The total length of course from the source to this confluence is about 765 miles. There the united stream is called Punjnad (five rivers), a name which it bears to its fall into the Indus. The ancient name of Chenaub is admitted unquestionably to have been Acesines.

CHENDRAVADAH.—A town in Hyderabad, or dominions of the Nizam, distant S.W. from Aurungabad 14 miles. Lat. $19^{\circ} 40'$, long. $75^{\circ} 17'$.

CHENGBANG.—A town of Eastern India, in the native state of Muneeppoor, distant N.W. from Muneeppoor 26 miles. Lat. $25^{\circ} 5'$, long. $93^{\circ} 42'$.

CHENGOOR.—A town in the native state of Bhotan, distant N. from Goalpara 80 miles. Lat. $27^{\circ} 18'$, long. $90^{\circ} 31'$.

CHENNAPUTTEN, or CHINAPATAM, in the territory of Mysore, an open town, having adjacent a handsome stone fort. The town has some manufactures, especially of glass, and of steel wire for the strings of musical instruments. This ware is much esteemed, and is sent to all parts of India. Chennaputten is distant N.E. from Seringapatam 38 miles. Lat. $12^{\circ} 40'$, long. $77^{\circ} 16'$.

CHENNOOR, in the British district of Cuddapah, presidency of Madras, a town on the route from Cuddapah to Hyderabad, five miles N. of the former. Lat. $14^{\circ} 33'$, long. $78^{\circ} 52'$.

CHENNUMPULLY, in the British district of Bellary, presidency of Madras, a town 48 miles E. of Bellary, 48 miles S.W. of Kurnool. Lat. $15^{\circ} 18'$, long. $77^{\circ} 40'$.

CHEPAL, in the Cis-Sutlej hill state of Joobul, a fort on a ledge of land projecting from the south-eastern declivity of a mountain extending from the Chour to the Wartoo peak. It was surrendered to the British by the Ghoorka garrison almost immediately after being invested by the irregular troops in the service of the East-India Company, aided by the mountaineers of Joobul. Lat. $30^{\circ} 57'$, long. $77^{\circ} 39'$.

CHERACUL, a town in the British district of Malabar, presidency of Madras. The rajah of this district, formerly a powerful chief, was a scion of the Kolastris family; one of those among whom Cheruman Permal, the achiever

of the independence of Malabar, divided the country. The country was in 1789 dreadfully devastated by Tippoo Sultan, and the rajah, dreading to be forcibly circumcised by the order of that bigoted tyrant, met death by inducing one of his followers to shoot him through the head. The town is two miles from the seacoast, and three miles N. of Cannanore. Lat. $11^{\circ} 55'$, long. $75^{\circ} 25'$.

CHERAJOLEE, in the British district of Durrung, in Assam, a town on the route from Durrung to Bishnath, 29 miles N.E. of Durrung. Lat. $26^{\circ} 40'$, long. $92^{\circ} 27'$.

CHERAND, in the British district of Sarun, a town on the left bank of the river Ganges, 16 miles N.W. of Dinapoor. Lat. $25^{\circ} 42'$, long. $84^{\circ} 53'$.

CHERCHANPOOR.—A town in the territory of Nagpore, distant S.E. from Nagpore 100 miles. Lat. $20^{\circ} 40'$, long. $80^{\circ} 39'$.

CHERGAON, in Bussahir, a village on the right bank of the Pabur, immediately below the confluence of the Andrytee. Elevation above the sea 5,985 feet. Lat. $31^{\circ} 13'$, long. $77^{\circ} 56'$.

CHERGAON, called also **THOLANG,** in Koonawur, a district of Bussahir, is a small town near the right bank of the Sutluj, and on a small stream flowing into it. There are between fifty and sixty families, living in substantial houses, covered with roofs of tempered clay overlying layers of birch bark, supported on horizontal beams. Here are several temples, dedicated to various divinities. The rajah of Bussahir resided here when the Goorkhas had possession of the rest of his territory. Opposite to this place, and on the right side of the Sutluj, was fought an action between the Koonawaris and Goorkhas, in which the latter were defeated, and subsequently stipulated not to enter Koonawur as long as an annual tribute of 700*l.* was paid. Elevation above the sea 7,300 feet. Lat. $31^{\circ} 31'$, long. $78^{\circ} 7'$.

CHERPELCHERRY, in the British district of Malabar, presidency of Madras, a town 28 miles E. of Ponany, 43 miles W. of Coimbatore. Lat. $10^{\circ} 53'$, long. $76^{\circ} 23'$.

CHETEROWN, in Sirmoor, a summit of the mountains between the Tons and Giree, and about two miles from the left bank of the latter. It is surmounted by a Hindoo temple, which was a station of the series of small triangles during the trigonometrical survey of the Himalaya. Elevation above the sea 7,048 feet. Lat. $30^{\circ} 50'$, long. $77^{\circ} 24'$.

CHETKOOI, in Bussahir, a village situate in the upper extremity of the valley of the Buspa, and on the right bank of the river of that name. Chetkool is the residence of a lama or Tibetan priest, who subsists by writing and printing sacred texts and ejaculations for the praying-mills of the villagers. Those singular instruments of superstition consist of drums or hollow cylinders, each set up horizontally on an iron axle. Inside the wheel

are deposited the scrolls inscribed with prayers or pious exclamations, and the act of devotion consists in making the machine revolve, and its contents whirl about, either by the hand, by wind, or by water. Chetkool is at the elevation of 11,480 feet above the sea. Lat. $81^{\circ} 20'$, long. $78^{\circ} 81'$.

CHETPOLL, in the British district of Coimbatore, presidency of Madras, a town on the route from Darapooram to Polachy, 11 miles W. of the former. Lat. $10^{\circ} 43'$, long. $77^{\circ} 26'$.

CHETTAPORE, in the British district of Ganjam, presidency of Madras, a town on the route from Berhampoor to Ganjam, four miles S.W. of the latter. Lat. $19^{\circ} 22'$, long. $85^{\circ} 3'$.

CHETTULWANO.—A town in the Rajpoot state of Joudpore, distant S.W. from Joudpore 140 miles. Lat. $24^{\circ} 53'$, long. $71^{\circ} 37'$.

CHETTYPOLLIAM, in the British district of Coimbatore, presidency of Madras, a town on the route from Coimbatore to Dindigul, nine miles S.E. of the former. Lat. $10^{\circ} 55'$, long. $77^{\circ} 7'$.

CHEWLEE, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Jubbulpore to Sumbulpore, 22 miles S. of the former. Lat. $22^{\circ} 50'$, long. $80^{\circ} 10'$.

CHEYLAR, in the British province of Scinde, presidency of Bombay, a town on the route from Omerkote to Deesa, 29 miles S.E. of the former. Lat. 25° , long. 70° .

CHICACOLE, in the British district of Ganjam, presidency of Madras, a town with a military cantonment on the left or north bank of the river Naglaudee. The town is built in an irregular straggling manner, with narrow crooked streets, which in rainy weather are overflowed to a considerable depth. Population about 50,000. Distance from Vizagapatam, N.E., 58 miles; Madras, N.E., 435; Calcutta, S.W., 415. Lat. $18^{\circ} 18'$, long. $83^{\circ} 58'$.

CHICHACOTTA.—A town in the native state of Bhotan, distant S.E. from Darjeeling 81 miles. Lat. $26^{\circ} 32'$, long. $89^{\circ} 30'$.

CHICHEROULY, in Sirhind, a town, the principal place of a protected Sikh state of the same name, on the route from Suharunpore to Subathoo, and 27 miles N.W. of the former place. It is situate in an open, level, well-cultivated country, and is surrounded by a mud wall. There is a bazaar. Distant N.W. from Calcutta 981 miles. The petty state of Chicherouly contains an area of sixty-three square miles, with a population of 9,337. Lat. $30^{\circ} 15'$, long. $77^{\circ} 25'$.

CHICHERRY, in the British district of Palanow, lieutenant-gov. of Bengal, a town on the route from Palanow to Chaibassa, 30 miles S. of the former. Lat. $23^{\circ} 24'$, long. $84^{\circ} 12'$.

CHICHOLEE, in the British territory of

Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town 22 miles N.W. of Baitool, 50 miles S. of Hoshungabad. Lat. $22^{\circ} 1'$, long. $77^{\circ} 40'$.

CHICKA MALLINHULLY.—A town in Mysore, distant N. from Chittal Droog 21 miles. Lat. $14^{\circ} 32'$, long. $76^{\circ} 34'$.

CHICKLEE.—A petty native state in Western India, under the superintendence of the agent for the Bheel chiefs in Candesh, presidency of Bombay. The young chief was sent for education to the government college at Poona. His conduct and attention to study were at first commendable, but he subsequently became refractory and inattentive, and finally absconded. Chicklee, the principal place, is in lat. $22^{\circ} 19'$, long. $74^{\circ} 41'$.

CHICKLEE.—A town in Hyderabad, or dominions of the Nizam, distant N.E. from Jaulnah 42 miles. Lat. $20^{\circ} 19'$, long. $76^{\circ} 20'$.

CHICKMOOGLOOR.—A town in Mysore, distant N.W. from Seringapatam 88 miles. Lat. $13^{\circ} 19'$, long. $75^{\circ} 51'$.

CHICKNAIGHULLY, or **CHICA NAYAKANA HULLI**, in the territory of Mysore, a town of considerable size, distant from Bangalore, N.W., 73 miles; from Seringapatam, N., 69. Lat. $13^{\circ} 25'$, long. $76^{\circ} 41'$.

CHICKROWLEE.—See **CHICHEROULY**.

CHIKIGURH.—A town of Malwa, in the native state of Bhopal, distant E. from Bhopal 48 miles. Lat. $23^{\circ} 5'$, long. $78^{\circ} 8'$.

CHIKULDIE.—A town of Malwa, in the native state of Bhopal, distant S. from Bhopal 33 miles. Lat. $22^{\circ} 47'$, long. $77^{\circ} 20'$.

CHIKULWAHUL, in the British district of Candesh, presidency of Bombay, a town on the route from Nassick to Dhoolia, 22 miles S.W. of the latter. Lat. $20^{\circ} 35'$, long. $74^{\circ} 36'$.

CHILACULLNERP.—A town in Mysore, distant N.E. from Bangalore 58 miles. Lat. $13^{\circ} 38'$, long. $78^{\circ} 8'$.

CHILBULA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route by the Kutra Pass, from Allahabad to Rewa, and 36 miles S.E. of the former city. Lat. $25^{\circ} 10'$, long. $82^{\circ} 11'$.

CHILKA.—An extensive lake dividing the British district of Ganjam, in the Madras presidency, from that of Pooree, in the presidency of Bengal. It is forty-two miles in length from north-east to south-west, and fifteen in breadth, and bounded towards the east and south by a narrow strip of sand, and on the north-west by the mountains which extend from the Mahanuddy to the Godavery: it receives the waters of one branch of the Mahanuddy, and communicates with the sea by a very narrow and deep outlet, in lat. $19^{\circ} 42'$, long. $85^{\circ} 40'$. The lake is studded with several islands, and its waters are salt and shallow.

CHI.

CHILKALURPADU, in the British district of Guntoor, presidency of Madras, a town 23 miles S.W. of Guntoor, 41 miles N. of Ongole. Lat. 16° 6', long. 80° 13'.

CHILKANA, in the British district of Suharunpoor, lieutenant-gov. of the N.W. Provinces, a small ruinous town on the route from Suharunpoor to Sidowra, and 10 miles N.W. of the former town. The surrounding country is level, open, and slightly cultivated; and the road in this part of the route is good. Distant N.W. from Calcutta 1,000 miles. Lat. 30° 5', long. 77° 32'.

CHILKAUREE, in Guzerat, a town in the petty native state of Saunte, in the division of Rewa Caunta, presidency of Bombay. Distance from Ahmedabad, N.E., 97 miles. Lat. 23° 20', long. 74° 2'.

CHILKEEA, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a place of considerable trade on the northern frontier, towards Kumaon, situate in the Dik-kalee Pass, or gorge by which the river Kosila flows to the plain. Heber describes it, at the time of his visit, in the beginning of December, as a wretched assemblage of cottages, half-buried in high grass; and adds, "The first appearance of the inhabitants of Chilkea was not prepossessing. They had the same yellow skins; the same dull, yet fierce look; the same ragged and scanty clothing; the same swords and shields, as those in the other parts of these inhospitable plains." In summer the air is so pestilential that it is then entirely abandoned. Elevation above the sea 1,076 feet. Lat. 29° 21', long. 79° 10'.

CHILKORE, in the British district of Bhagulpore, lieutenant-gov. of Bengal, a town on the route from Bhagulpore to Calcutta, 14 miles S. of the former. Lat. 25°, long. 86° 57'.

CHILLAHTARA, in the British district of Banda, lieutenant-gov. of the N.W. Provinces, a small town on the route from the town of Futtehpore to that of Banda, and 22 miles N.W. of the latter. It is situate on the right bank of the Jumna, here crossed by ferry. Though a small place, much business is done here in shipping cotton, which is largely grown in the neighbouring districts, and conveyed down the river to the lower provinces. The river Cane empties itself into the Jumna on the right side, immediately above the town. Its water is considered unwholesome by the natives, who take much trouble to obtain their supply from the Jumna above the confluence. Distant N.W. from Allahabad 105 miles, from Calcutta 600. Lat. 25° 47', long. 80° 36'.

CHILLAKAR, in the British district of Nellore, presidency of Madras, a town on the route from Madras to Nellore, 21 miles S.W. of the latter. Lat. 14° 8', long. 79° 55'.

CHILLERA, or **CHULERA**, in the British district of Boolundshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghur to that of Delhi,

and 12 miles S.E. of the latter. Lat. 28° 34', long. 77° 24'.

CHILLIANWALLA, in the Jetch Doaab division of the Punjab, a village situate five miles from the left bank of the river Jhelum. The place has acquired celebrity from a sanguinary battle which took place there on the 18th January, 1849, between a British force under Lord Gough and the army of the Sikhs. On both sides the greatest determination and most heroic bravery were displayed; on both sides the loss was frightfully severe; and though the British remained in possession of the field, the victory was dearly purchased. The annals of Indian warfare do not record a fiercer or more arduous conflict. An obelisk erected here, by order of government, preserves the memory of those who fell in the Sutlej and Punjab campaigns. Chillianwalla is 85 miles N.W. of Lahore. Lat. 32° 40', long. 73° 39'.

CHILLOO CHUNGEE, in the Peshawar division of the Punjab, a town situated on the route from Jhelum to Attock, eight miles W. of the town of Rawul Pind. Lat. 23° 40', long. 72° 54'.

CHILMAREE, in the British district of Rungpoor, lieutenant-gov. of Bengal, a town 36 miles S.E. of the town of Rungpoor. It is situate on the right or west bank of the Brahmapootra, amidst luxuriant groves and fine gardens; but it is an ill-built place, containing no building of any importance. Lat. 25° 25', long. 89° 46'.

CHIMALI, in Gurwhal, a village on the right bank of the Bhageerettee, as the Ganges is called in the upper part of its course. It is situated in a fertile tract, cultivated principally for the growth of the opium-poppy. Elevation above the sea 2,942 feet. Lat. 30° 34', long. 78° 23'.

CHIMARY, in the British district of Ahmedabad, presidency of Bombay, a town on the route from Deesa to Rajkote, 40 miles N.W. of Ahmedabad. Lat. 23° 19', long. 72° 4'.

CHIMMAPOODY.—A town in Hyderabad, or dominions of the Nizam, distant E. from Hyderabad 116 miles. Lat. 17° 22', long. 80° 18'.

CHIMOOR.—A town in the territory of Nagpore, distant S. from Nagpore 49 miles. Lat. 20° 30', long. 79° 29'.

CHINA BUKEER.—The name given to one of the rivers forming the delta of the Irawady: it falls into the Bay of Bengal in lat. 16° 19', long. 96° 10'.

CHINALGARH, in Sirmoor, a village on a picturesque site, on the summit of a rock overhanging a feeder of the river Julal. Here, in 1814, an irregular force in the service of the East-India Company was defeated by the Goorkhas in the war with that power. Lat. 30° 42', long. 77° 16'.

CHIN AMMAPETTA, in the British district of Masulipatam, presidency of Madras, a town 29 miles N. of Ellore, 60 miles W. of Rajahmundry. Lat. $17^{\circ} 8'$, long. $80^{\circ} 57'$.

CHINAT CHOKEE, in the territory of Oude, a village on the route from Goruckpoor cantonment to Lucknow, seven miles E. of the latter. The road in this part of the route is heavy, sandy, and bad. Lat. $26^{\circ} 53'$, long. $81^{\circ} 2'$.

CHINCHLEE, in the British district of Belgaum, presidency of Bombay, a town on the right bank of the river Kistnah, 52 miles N.E. of Belgaum. Lat. $16^{\circ} 34'$, long. $74^{\circ} 53'$.

CHINDGOOR.—A town in Hyderabad, or dominions of the Nizam, distant N.E. from Hyderabad 150 miles. Lat. $18^{\circ} 33'$, long. $80^{\circ} 26'$.

CHINDWARA, in the territory of Nagpore, a town on the route from Saugor to the city of Nagpore, 82 miles S. of the former, 167 N. of the latter. It is situate in the mountainous tract called Deogur, above the Ghats, on an elevated table-land, having an open space of ground free from jungle on the summit, of about four and a half miles in circumference. In consequence of its considerable elevation, its climate is one of the most agreeable and salubrious in India; and from this advantage it has many visitors in search of health or recreation. Elevation above the sea 2,100 feet. Lat. $22^{\circ} 3'$, long. $78^{\circ} 58'$.

CHINEANE, in the Northern Punjab, on the southern slope of the Himalaya. It is situate on the Tawi river, which, about fifty miles lower down, falls into the Chenab. Chineane is a place of considerable size, is neatly built, and has a palace still belonging to the deposed rajah of the town and district, though his possessions have been seized by Gholab Singh, the present ruler of Cashmere. Chineane is in lat. $33^{\circ} 5'$, long. $75^{\circ} 22'$.

CHINEEALIE.—See **CHIMALI**.

CHINEPOOR.—A town in the native state of Bhopal, distant S.E. from Bhopal 52 miles. Lat. $23^{\circ} 3'$, long. $78^{\circ} 12'$.

CHINGLEPUT.—A British district within the limits of the presidency of Madras, named from its principal place. It is bounded on the north by the British district of Nellore; on the east by the Bay of Bengal; on the south by the British district of South Arcot; and on the north-west and west by the British district of North Arcot. It lies between lat. $12^{\circ} 14'$ and 14° , long. $79^{\circ} 35'$ — $80^{\circ} 25'$. Locally situate within its limits, is a small tract containing the city of Madras and the portion of territory within its municipal jurisdiction, extending about eight miles from north to south along the seashore, with an average breadth of four, and having an area of thirty square miles. Exclusive of this area, the district of Chingleput contains, according to official return, 2,993 square miles. In proportion to its area,

the extent of seacoast is considerable, being about 120 miles. The only considerable river is the Palar, which, rising near Jungumcotta, in Mysore, holds its course first south-eastward, subsequently eastward, through the British districts of Salem and North Arcot, and entering this district on its western frontier, continues its easterly course through it for about sixty-three miles, to its fall into the Bay of Bengal, about four miles south of Sadras. The climate during the dry season is characterized by great heat, the thermometer having been known to reach 115° in the shade. In the vicinity of the sea it is, however, considerably mitigated by the refreshing sea-breeze. The population of the district is given under the article **MADRAS**. Madras, Chingleput, Conjeveram, Sadras, Walajahabad, Pallavaram, and other of the principal towns, are described under their respective names in the alphabetical arrangement. The chief routes are—1. From east to west, from Madras, through Arcot, to Bangalore. 2. From north-east to south-west, from Madras to the town of Chingleput. 3. From north to south, from Madras to Cuddalore. 4. From south to north, from Madras to Nellore. The district is also traversed by one of the lines of the Madras Railway Company.

CHINGLEPUT.—A large town in the British district of the same name, within the presidency of Madras. The fort of Chingleput is situate at the northern extremity of a valley upwards of a mile broad, and is bounded on the eastern and greater part of the northern faces by a tank or artificial lake, two miles long and one broad, from which the ditch is supplied with water. The fort is 400 yards in length from north to south, and 280 in breadth from east to west, and is divided into two parts by a rampart and ditch. The eastern part is considerably elevated, and forms what is called the inner fort. The entire western face, and part of the northern, are bounded by rice-fields, irrigated from the lake, the water of which is retained by an embankment 1,000 yards in length. On the top of this bank runs the high road leading from Madras southward. The town of Chingleput consists of one long street, and is half a mile to the south-east of the fort, equidistant from which, in a different direction, is another town, or collection of dwellings, called Nullam. The river Palar, flowing to the south-west, affords the means of drainage, and during the greater part of the year an abundant supply of water, but during the dry season the latter totally ceases; even the tank is nearly exhausted, and the decayed weeds and slime in its bed taint the air with offensive and pestiferous exhalations. The public buildings of the district are within the rampart of the fort, and consist of the court of justice, the jail, place of arms, and hospital. The civil establishment comprises a judge, a collector, and magistrate, and an adequate number of officials, European and

CHI.

native. A detachment, consisting generally of two companies of native infantry, stationed here, live in huts on high grounds about a quarter of a mile to the south. Notwithstanding the malaria caused by the tank, it is in general considered a remarkably healthy place. There is a manufacture of pottery here, which in 1848 attracted the attention of government, with a view to its improvement: for the purpose of prosecuting experiments with this object, a grant of 2,000 rupees per annum for two years was made. Distance from Tanjore, N., 145 miles; Cuddalore, N., 65; Bangalore, E., 162; Arcot, E., 45; Madras, S.W., 36. Lat. $12^{\circ} 41'$, long. $80^{\circ} 2'$.

CHINGONG, in Bundelcund, a town in the native state of Jhansee, 19 miles N.E. from Jhansee, and 60 miles S.E. from Gwalior. Lat. $25^{\circ} 34'$, long. $78^{\circ} 54'$.

CHINI, in Bussahir, a village of the district of Koonawur, about a mile from the right bank of the Sutluj. It is situate in a slight depression on the southern slope of a lofty mountain, down which numerous rills flow, and, watering the soil, discharge themselves into the Sutluj, which runs about 1,500 feet below the village. The intervening space is covered in the season with thriving crops and vineyards, loaded with a profusion of large and finely-flavoured grapes. The cattle are generally a hybrid breed, between the yak and common kine, than which they are stronger and hardier, with longer and thicker hair, great horns, and large bushy tails. They are invariably black, and less wild than the yak. Chini is a considerable village, connected with seven or eight others of less extent, and was the favourite residence of Lord Dalhousie, the Governor-General of India, during his sojourn in the hills. Elevation above the sea 8,770 feet. Lat. $31^{\circ} 31'$, long. $78^{\circ} 19'$.

CHINNA HURRY.—A river rising in the Mysore territory, in lat. $14^{\circ} 10'$, long. $76^{\circ} 25'$, about four miles S.W. of the town of Chittel Droog. It flows in a north-easterly direction through Mysore and the British district of Bellary, and falls into the Hugry, a feeder of the Toongabudra, in lat. $14^{\circ} 56'$, long. $77^{\circ} 7'$.

CHINNA SALEM, in the British district of South Arcot, presidency of Madras, a town on the route from Salem to Cuddalore, 50 miles E. of the former. Lat. $11^{\circ} 89'$, long. $78^{\circ} 56'$.

CHINNOOR, in Hyderabad, or territory of the Nizam, a town belonging to the rajah of Palensha, a feudal holder of an extensive tract on both banks of the river Godavery, in the vicinity of the confluence of the Pranbeeta. Distance from Hyderabad, N.E., 136 miles; Madras, N., 410. Lat. $18^{\circ} 55'$, long. $79^{\circ} 47'$.

CHINRAIAN DROOG.—A town in Mysore, distant N. from Bangalore 50 miles. Lat. $13^{\circ} 36'$, long. $77^{\circ} 16'$.

CHINRAIPATAM, in the territory of Mysore, a town situate on the side of an extensive tank. It has a fort, well built of

stone and lime, and a temple dedicated to Vishnu. There is here a weekly fair, but no trade of moment. Distance from Seringapatam, N.W., 38 miles. Lat. $12^{\circ} 54'$, long. $76^{\circ} 27'$.

CHINSURA.—A town with a small annexed territory, on the right bank of the river Hooghly, formerly belonging to the Dutch, and a place of considerable trade. It was among the cessions on the continent of India made by the king of the Netherlands in 1824, in exchange for the British possessions on the island of Sumatra, and is now included within the British district of Hooghly, presidency of Bengal. It is described by Rennell, about seventy years ago, as a very neat and pretty large town; and by another authority, as requiring at the period in question three-quarters of an hour to walk round it. Its site is said to be better than that of Calcutta, and it is considered one of the healthiest places in the lower provinces of Bengal. The government has established here an extensive military dépôt for Europeans, with magnificent barracks and an immense hospital. Within the town is the government educational establishment denominated the Hooghly College; and in the vicinity is the field where Colonel Forde, under the order of Clive, defeated the Dutch troops in 1759. Forde had applied to Clive for written authority to commence the attack. Clive was playing at cards when he received the note, and without quitting his seat, wrote in pencil,—"Dear Forde, fight them immediately, and I will send you the order of council to-morrow." Distance from Calcutta, N., 20 miles. Lat. $22^{\circ} 53'$, long. $88^{\circ} 23'$.

CHINTACOONTA, in the British district of Cuddapah, presidency of Madras, a town on the route from Cuddapah to Bellary, 36 miles N.W. of the former. Lat. $14^{\circ} 42'$, long. $78^{\circ} 24'$.

CHINTALAPOODY, in the British district of Masulipatam, presidency of Madras, a town on the route from Ellore to Kummummett, 23 miles N. of the former. Lat. $17^{\circ} 4'$, long. $81^{\circ} 5'$.

CHINTAMUN, in the British district of Dinajepoor, Lieut.-gov. of Bengal, a town on the route from Dinajepoor to Bograh, 21 miles S.E. of the former. Lat. $25^{\circ} 22'$, long. $88^{\circ} 56'$.

CHINTAPILLY, in the British district of Guntoor, presidency of Madras, a town on the right bank of the Kistnah, 35 miles N.W. of Guntoor. Lat. $16^{\circ} 43'$, long. $80^{\circ} 11'$.

CHINTOLI.—A town in Hyderabad, or dominions of the Nizam, distant N. from Moodgul 49 miles. Lat. $13^{\circ} 42'$, long. $76^{\circ} 32'$.

CHINTOMNIPETT.—A town in Mysore, distant N.E. from Bangalore 43 miles. Lat. $13^{\circ} 23'$, long. $78^{\circ} 6'$.

CHIMOK.—A town in the native state of Cashmere, or dominions of Gholab Singh, 88 miles S.W. from Sirinagur, and 28 miles N.E. from Jhelum. Lat. $33^{\circ} 20'$, long. $73^{\circ} 50'$.

CHIPLOON, in the British district of Rutnagherry, presidency of Bombay, a town on the route from Kolapoor to Bombay, 108 miles S.E. of the latter. Lat. $17^{\circ} 30'$, long. $73^{\circ} 36'$.

CHIPURAPILLE, in the British district of Vizagapatam, presidency of Madras, a town on the north-west coast of the Bay of Bengal, 16 miles S.W. of Vizagapatam. Lat. $17^{\circ} 34'$, long. $83^{\circ} 10'$.

CHIRGONG, or **CHURGAON**, in Bundelcund, a small town on the route from Calpee to Goonah, 81 miles S.W. of the former, and 124 N.E. of the latter. It was formerly the principal place of a jaghire, "stated, in 1832, to comprise twenty-five square miles, and to contain ten villages, with a population of 8,800 souls, and to yield a revenue of 25,000 rupees." It was subject to a money payment of 7,500 rupees to the state of Jhansi. In 1841, the jaghiredar became contumacious; his followers committed depredations; and on remonstrance, he assumed such an attitude of defiance, that military operations were commenced against his fort of Churgaon, which he had the temerity to defend. In April in that year, the place was invested by a force amounting to about 2,000 men. The garrison assembled by the jaghiredar was conjectured by the British commander to have amounted to 4,000: native report made their numbers much greater. After cannonading the fort for two days, it was determined to attack a position without the wall, where the enemy had thrown up a stockade for the protection, as it subsequently appeared, of some wells. On the approach of the British detachment, they were received by a vigorous discharge of matchlocks, seconded by rockets and firepots. Ultimately a hand-to-hand contest decided the fate of the stockade, which was carried, though not without considerable loss. Preparations were made for establishing a breaching-battery on the captured position. These were nearly completed, when it was ascertained that the enemy had evacuated the fort, of which the British forthwith took possession. The fugitive jaghiredar lost his life in the following year, having, whilst marauding, fallen in with some British troops. His jaghire was confiscated, and transferred to the British district of Jaloun. The revenue is now estimated at from 40,000 rupees to 50,000 rupees, subject to the annual payment to Jhansi of 7,500 rupees. Lat. $25^{\circ} 34'$, long. $78^{\circ} 53'$.

CHIRING, in the British district of Gurwhal, lieut.-gov. of the N.W. Provinces, a village with small fort, formerly held by the Goorkas, at the southern base of a ridge of the Himalaya. It is situate on the right bank of the Pindur, a considerable feeder of the Aluknunda, 40 miles N.W. of Almorah fort, 39 E. of Sireenuggur. Lat. $30^{\circ} 7'$, long. $79^{\circ} 28'$.

CHIRKANWAN, in the British district of Behar, lieut.-gov. of Bengal, a town 23 miles

W. of Gayah, 19 miles N.W. of Sherghotty. Lat. $24^{\circ} 49'$, long. $84^{\circ} 41'$.

CHIRKAREE, in Bundelcund, a town the principal place of a small native state of the same name, on the route from Gwalior to Banda, 41 miles S.W. of the latter. It is rather large, and occupies a picturesque site at the base of a lofty rocky hill, surmounted by a fort accessible only by a flight of steps cut in the rock, but of such size, and of so gentle an acclivity, that they are practicable for elephants. The fort is, however, commanded by two elevations at no great distance. Below the town is a fine lake swarming with fish. The raj or territory of Chirkaree is estimated to "comprise 880 square miles, and to contain 259 villages, with a population of 81,000 souls." The estimated annual revenue is 460,830 rupees. The rajah pays to the East-India Company an annual tribute of 9,484 rupees, and maintains a force of 800 cavalry, thirty artillery, and 1,000 infantry. The Peishwa having by the treaty of Bassin, in 1803, ceded to the East-India Company his sovereign claims over a portion of Bundelcund, within which Chirkaree was comprised, the British government confirmed in the raj Bikramajit, who then occupied it in right of his descent from Chutturaj, the founder of Boondela independence. Bikramajit died in 1834, and was succeeded by his illegitimate grandson Ruttun Singh, whose claim was recognised by the British authorities. The succession was disputed by Dewan Khait Singh, the representative of a junior branch of the reigning family; and his claim appears to have been well founded. His pretensions were, however, satisfied by a grant in the first instance of 1,000 rupees per mensem, and subsequently, in 1842, by the raj of Jeitpore, which was then bestowed on him. The family is Hindoo, and claims Rajpoot descent. The practice of suttee has been abolished in Chirkaree. The town of Chirkaree is in lat. $25^{\circ} 24'$, long. $79^{\circ} 49'$.

CHIRRA POONJEE, in Eastern India, a town situate on the Cossya Hills, in lat. $25^{\circ} 14'$, long. $91^{\circ} 45'$. It was formerly the site of a British sanatorium, which, after due experiments, proving unsuccessful, was abolished in 1834. The station has an elevation of 4,200 feet above the level of the sea. Its average temperature throughout the year is stated to be twelve degrees of Fahrenheit below that of the plains of Bengal, while during the hot months the difference increases to twenty degrees. Coal exists in all parts of the hills, of superior quality and in profuse abundance. The mines have been transferred by the government to lessees, who, however, would appear to have exhibited no great amount of enterprise in the speculation. Iron-ore is equally abundant, and it is believed that works might be established in those hills for the manufacture of iron and steel on a very extensive scale, and under a favourable combination of circumstances.

CHIRTAOL, in the British district of Muzaffurnagur, lieutenant-gov. of the N.W. Provinces, a town the chief place of the pergunnah of the same name, with a population of 5,111. Lat. $29^{\circ} 33'$, long. $77^{\circ} 39'$.

CHIRWAKKUM, in the British district of South Arcot, presidency of Madras, a town on the route from Trichinopoly to Arcot, 52 miles N. of the former. Lat. $11^{\circ} 32'$, long. $79^{\circ} 3'$.

CHIT, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town 17 miles S.W. of the city of Agra. Lat. $26^{\circ} 59'$, long. $77^{\circ} 54'$.

CHITEA, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to Seetapore, and 37 miles S.E. of the former. Lat. $28^{\circ} 11'$, long. $80^{\circ} 1'$.

CHITIALLA.—A town in Hyderabad, or dominions of the Nizam, distant S.E. from Hyderabad 80 miles. Lat. $16^{\circ} 38'$, long. $79^{\circ} 30'$.

CHITMAPOOR, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Mynpooree, and 20 miles N.W. of the latter. Lat. $27^{\circ} 24'$, long. $78^{\circ} 52'$.

CHITOR, in the territory of Cochin, a town the principal place of a subdivision of the country of the same name, distant from the city of Cochin, N.E., 62 miles. Lat. $10^{\circ} 43'$, long. $76^{\circ} 48'$.

CHITRACOOTAM.—A town in the hill zemindary of Jeypoor, in Orissa, under the political superintendence of the government of Madras, distant 25 miles S. from Jeypoor, and 80 miles N.W. from Vizianagrum. Lat. $18^{\circ} 40'$, long. $82^{\circ} 24'$.

CHITRAKOTE, or **CHATARKOT**, in the British district of Banda, lieutenant-gov. of the N.W. Provinces, a town on the river Paisuni, 50 miles S.E. of the town of Banda. Though latterly scarcely noticed by any writer, it is described by Tieffenthaler, between seventy and eighty years ago, as the resort of all India, being the residence of Rama and his wife Sita, after they had left Ayodha. It is crowded with temples and shrines of Rama and his brother Lakshmana. The clear river Paisuni here expands into a small shallow lake, inclosed by a border of masonry, having numerous ghats or flights of stairs, to give votaries access to the water, ablution in which is deemed to absolve from offences. Lat. $25^{\circ} 12'$, long. $80^{\circ} 47'$.

CHITRIYA.—A town in the native state of Nepal, distant E. from Khatmandoo 101 miles. Lat. $27^{\circ} 32'$, long. $86^{\circ} 56'$.

CHITTA, in the British district of Jaunsar, lieutenant-gov. of the N.W. Provinces, a village in the hilly tract on the right of the Jumna, and four miles west of that river. Skinner describes it as situate in a most delightful country, and having to the north a sublime

view of the Himalaya. Chitta is in lat. $30^{\circ} 37'$, long. $78^{\circ} 2'$.

CHITTAGONG.—One of the districts within the presidency of Bengal, bounded on the north by independent Tipperah; on the east by the Youmadoung range of mountains, separating it from Burmah; on the south by Arracan; and on the west by the Bay of Bengal. It extends from lat. $20^{\circ} 45'$ to $23^{\circ} 25'$, and from long. $91^{\circ} 32'$ to 93° ; its length from north to south is 185 miles, and its extreme breadth 100; containing an area (irrespective of the elevated and woody tract on the eastern frontier, inhabited only by hill tribes) of 2,717 square miles. The mountainous tract is a portion of the great chain which, running from Assam southwards, extends to Cape Negrais, and attains in the Blue Mountain, on the frontier of Chittagong, an elevation of upwards of 8,000 feet above the level of the sea. Its inhabitants are wild tribes, who have never submitted to any government. It sends forth several rivers, the most important of which is the Kurrumfoolee, which, taking a westerly direction, passes the town of Chittagong, or Islamabad, and discharges itself into the Bay of Bengal. Elephants abound in the forests of Chittagong, and large numbers are annually caught for the use of government. The mode of catching them consists in surrounding a herd of these animals by a numerous body of hunters, and a barricade of trees being formed, with the addition of a trench, a number of tame elephants are sent into the inclosure, which is called a keddah, and the wild elephants are secured by ropes attached to the tame ones. Of agricultural products rice is the staple article; the other crops are sugar-cane, hemp, oats, tobacco, mustard, and betel-nut. The population of the district is given under the article **BENGAL**.

Towards the close of the seventeenth century, this district was wrested from the rajah of Arracan by Aurungzebe and added to the imperial dominions. It was ceded to the East-India Company by the nabob of Bengal in 1760, and confirmed to them by the grant of Shah Alum, emperor of Delhi, in 1765. Previous to the Burmese war of 1824, its cession was demanded by the king of Ava, on the ground of its being an ancient dependency of Arracan, then a portion of the Burmese dominions.

CHITTAGONG, or **ISLAMABAD**.—The principal place of the British district of the same name, situate on the river of the same name, about seven miles from its mouth. It was formerly a place of considerable trade, and noted for its shipbuilding establishments. This, however, is no longer the case. Rice, the great article of export, is now sought in the ports of Arracan, where it is obtained at a cheaper rate; and large vessels have ceased to be built in its marine-yard, Moulmein having supplanted it in that respect. A succession of small round hills, planted with coffee, pepper vines, and bamboos, and surrounded by the

villas of the English residents, give to the surrounding country an interesting and romantic appearance. The climate is not considered healthy. Owing to the great extent of uncleared land, and the influence of the neighbouring mountains, continual fogs prevail during the rainy and the winter season, engendering ague and asthma; but during the hot months the air is cooler than that of Calcutta. Lat. 22° 20', long. 91° 54'.

CHITTAIR.—A river rising within the presidency of Madras, in lat. 14°, long. 78° 45', and flowing in a north-easterly direction for seventy-five miles, through the British district of Cuddapah, falls into the Pennar in lat. 14° 26', long. 79° 13'.

CHITTAPET, in the British district of South Arcot, presidency of Madras, a town on the route from Arcot to Cuddalore, 30 miles S. of the former. Lat. 12° 30', long. 79° 25'.

CHITTAVAIL, in the British district of Cuddapah, presidency of Madras, a town situated 40 miles S.E. from Cuddapah, 46 miles S.W. of Nellore. Lat. 14° 10', long. 79° 24'.

CHITLEDROOG.—A town with a fort, on the summit of one of a circular range of hills inclosing a basin or plain ten miles in length and four in breadth. The range is covered with small stunted trees and jungle. Chittledroog was formerly a place of some strength, having made an obstinate, though ineffectual resistance, to the power of Hyder Ali, by whom it was taken in 1779. The town, which is situate in the plain, at the foot of the rock on which the fort is built, is of considerable size, and so strongly fortified by Hyder Ali as to be impregnable to native attack. The fort was used by Tippoo as a state prison, in which, among many other captives, native and British, General Matthews was incarcerated. A mutiny took place in 1809 among the British troops stationed in this place. Seizing the public treasure, they deserted the post intrusted to their care, and marched in the direction of Seringapatam, to join the disaffected garrison of that place, but were intercepted and completely routed by a detachment under Colonel Gibbs. Chittledroog is the principal place of a division of the same name. Distant from Seringapatam, N., 128 miles; Bangalore, N.W., 120; Bellary, S., 70; Mangalore, N.E., 141; Madras, N.W., 275. Lat. 14° 14', long. 76° 27'.

CHITTOOR, in the British district of Arcot (northern division), presidency of Madras, a town with a fort, situate on the south side of the river Puni, a feeder of the Palar. The river during the monsoon rains is four hundred yards in width, and then several tanks are replenished from it; but in the dry season the stream shrinks to a small rivulet. Elevation above the sea 1,100 feet. Distance from Bangalore, E., 104 miles; Vellore, N., 20; Arcot, N.W., 28; Cuddalore, N.W., 112; Madras, W., 80. Lat. 13° 12', long. 79° 9'.

CHITTOR, or CHITTORGURH, in Rajpootana, in territory of Oodeypoor or Mewar, an ancient town with fortress, formerly of great importance, but now much decayed. The site is conspicuous from a considerable distance, by the high rock on which the fortress stands, and which, from its scarped sides and the buildings scattered along its crest, sufficiently denotes its nature. The town is situate on the river Biruch, or Beris, here traversed by a fine bridge of nine arches, that in the middle being semicircular, having four Gothic arches at each side. Within the inclosure of the fortress are several antique buildings; one of which, called Nolakha Bindar, is a small inner citadel, with masonry and lofty walls and towers; another, a palace of the rana, is a plain building, but spacious, and in good taste, its crenated battlements having a fine effect. There are also two vast temples, dedicated to Krishna. Near those temples are two tanks or reservoirs, each one hundred and twenty-five feet long, fifty wide, and fifty deep, constructed of large blocks of stone. On the crest of the hill is a large temple, dedicated to the destroying powers, having the trident of Siva erected before the entrance. The style of architecture is good and the masonry excellent. The most remarkable building is the Kheerut Khumb, or Pillar of Victory, erected in 1439, to commemorate a victory gained over the combined armies of Malwa and Guzerat by Rana Khumbo, who reigned in Mewar from 1418 to 1468. It stands on a terrace forty-two feet square; is one hundred and twenty-two feet in height, and each of the four faces is, at the base, thirty-five feet in length. There are nine stories, and on the summit a cupola. The whole is one mass of the most elaborate sculpture, executed in white marble, and representing various subjects of Hindoo mythology. About the centre of the hill-top is a curious Jain pillar, built in 896. According to native report, there are eighty-four cisterns within the fortress; but when Heber visited the place, in an unusually dry season, but twelve retained water. One of those is fed by a perennial spring. At the south-western extremity of the hill on which the fort is built, but quite detached from it, is a small hill which would completely cover an attacking force on that side from the fire of the garrison; and in this part the hill is easiest of access. Chittoor was taken in 1803, by Alauddin, the Patan monarch of Delhi, who, however, subsequently granted it to the nephew of the former ruler, on condition of his payment of tribute, and furnishing an armed contingent of 5,000 horse and 10,000 foot. Bahadur Shah, king of Guzerat, took it in 1533, but was soon after expelled by Humoon, padshah of Delhi, who reinstated the Rajpoot prince. It was taken by storm by Akbar in 1567; the Rajpoots, when they considered their circumstances desperate, slaughtering their wives and children, and rushing on the enemy, were

almost to a man cut off. It appears to have been subsequently recovered by the chief of Mewar; but about 1676 surrendered to the forces of Aurungzebe. It reverted to the Rajpoots on the dismemberment of the empire of Delhi, in the latter part of the eighteenth century. Distance direct from Neemuch, N.W., 30 miles; Nusseerabad, S., 100; Agra, S.W., 270; Mhow, N.W., 175. Lat. $24^{\circ} 52'$, long. $74^{\circ} 41'$.

CHITTRA, in the British district of Ramgurn, lieut. gov. of Bengal, a town in a wild and hilly tract, overrun with forest and jungle. Chittra is distant from Hazareebagh, N.W., 32 miles; from Calcutta, N.W., by Hazareebagh, 250. Lat. $24^{\circ} 13'$, long. $84^{\circ} 57'$.

CHITTRAVUTTY.—A river rising in the eastern division of Mysore, in lat. $13^{\circ} 35'$, long. $77^{\circ} 54'$. It flows first in a southerly direction for twenty-two miles through Mysore, and fifty through the British district of Bellary; then turning north-east, it continues its course for fifty miles through the districts of Bellary and Cuddapah, and falls into the Pennar in lat. $14^{\circ} 47'$, long. $78^{\circ} 45'$.

CHITTUNG, in Sirhind, a small river or torrent, which passes off from the Sursooty about lat. $30^{\circ} 15'$, long. $77^{\circ} 15'$, and takes a south-west direction. It is important in an agricultural point of view, as a few miles west of Suffedun, and in lat. $29^{\circ} 23'$, long. $76^{\circ} 32'$, it is joined by the celebrated canal of Ferozshah, the water of which it conveys westward to Hissar, and thence proceeds in the same direction, "winding among the sandhills of Bhikanir, or, more properly speaking, along the northern boundary of the sandy desert," until it is lost in the plains of Bhuttiana, about thirty-seven miles west of Hissar; its total length of course being about 150 miles.

CHITTUR.—See CHITOR.

CHOBALINGAPOORAM, in the British district of Madura, presidency of Madras, a town situate 29 miles S. of Madura, 51 miles W. of Ramnad. Lat. $9^{\circ} 30'$, long. $78^{\circ} 9'$.

CHOBANA, in the Sindh Sagur Doab division of the Punjab, a town situated 30 miles S.E. of Leia, 43 miles N. of the town of Mooltan. Lat. $30^{\circ} 45'$, long. $71^{\circ} 30'$.

CHOBEE-KE-SERAI, in the British district of Futtehpore, lieut. gov. of the N.W. Provinces, a small town on the route from Allahabad to the town of Futtehpore, and 26 miles S.E. of the latter. It has a bazaar, and water from wells. The country is level and cultivated. Lat. $25^{\circ} 50'$, long. $81^{\circ} 10'$.

CHOBIPOR, in the British district of Cawnpore, lieut. gov. of the N.W. Provinces, a town on the route from the cantonment of Cawnpore to that of Futtehpore, and 16 miles N.W. of the former. There is a bazaar. Lat. $26^{\circ} 37'$, long. $80^{\circ} 15'$.

CHOCHUKPOOR, in the British district of Ghazeepeer, lieut. gov. of the N.W. Provinces,

a village on the left bank of the Ganges, 26 miles S.W. of Ghazeepeer cantonment by water, 10 by land; 625 N.W. of Calcutta by water. Lat. $25^{\circ} 30'$, long. $83^{\circ} 23'$.

CHODHON, in the Rajpoot state of Joudpore, a village on the route from the town of Joudpore to that of Ajmeer, and 27 miles E. of the former. It contains 150 houses. Lat. $26^{\circ} 19'$, long. $73^{\circ} 33'$.

CHOGDA.—A town in the British district of Nuddea, lieut. gov. of Bengal; it is situate on the left bank of the Hoogly river, 37 miles N. from Calcutta. This place was formerly celebrated for human sacrifices by drowning; it is still a famous place for burning the dead, and corpses are conveyed to it for that purpose from great distances. Lat. $23^{\circ} 5'$, long. $88^{\circ} 30'$.

CHOHAGAON.—A town in the native state of Nepal, distant S.W. from Khatmandoo 20 miles. Lat. $27^{\circ} 34'$, long. $85^{\circ} 1'$.

CHOILNA.—A town in the peninsula of Kattywar, province of Guzerat, distant S. from Rajkote 90 miles. Lat. $21^{\circ} 2'$, long. $70^{\circ} 40'$.

CHOKA, in the British territory of Saugor and Nerbudda, lieut. gov. of the N.W. Provinces, a town 20 miles S.W. from Saugor, 45 miles N.E. of Bhilsa. Lat. $23^{\circ} 40'$, long. $78^{\circ} 31'$.

CHOKHUN, in the British district of Kumaon, lieut. gov. of the N.W. Provinces, a town eight miles S.E. of Almora, 62 miles N. of Pilleebheet. Lat. $29^{\circ} 30'$, long. $79^{\circ} 49'$.

CHOLAWARUM, in the British district of Masulipatam, presidency of Madras, a town on the left bank of the river Kistnah, 20 miles S.W. of Masulipatam. Lat. $15^{\circ} 59'$, long. 81° .

CHOLUH, in the British district of Boudlshlur, lieut. gov. of the N.W. Provinces, a village on the route from Allyghur cantonment to that of Delhi, and 37 miles N.W. of the former. Lat. $28^{\circ} 20'$, long. $77^{\circ} 50'$.

CHOMOOA, in the British district of Agra, lieut. gov. of the N.W. Provinces, a village on the route from the city of Agra to that of Muttra, and 15 miles N.W. of the former. Lat. $27^{\circ} 15'$, long. $77^{\circ} 54'$.

CHONDA, in the territory of Gwalior, a small town or village 18 miles N.W. of the fort of Gwalior. This place and Maharajpore were the two keys of the position of the Maharatta army in its engagement with the British under Sir Hugh Gough, on 29th of December, 1843. The Maharattas, who probably mustered about 15,000 men, with a numerous and well-appointed artillery, were attacked by the British, little inferior in number, and being driven from all points of their position, fled to the fort of Gwalior, having lost fifty-six guns and all their ammunition-waggons. The British loss was 106 killed, 684 wounded, and seven missing. Lat. $26^{\circ} 27'$, long. 78° .

CHONGBA PASS, in Bussabir, near the north-eastern boundary of the district of Koonawur, is over a ridge rising on its eastern

side with a gentle acclivity; and on its western, sloping down to the left bank of the Lee, or river of Spiti. The river there is from 120 to 130 feet broad, but in one place narrows to ninety-two feet, and is at that point crossed by a sango or rude wooden bridge. Elevation above the sea 11,900 feet. Lat. 32° , long. $78^{\circ}37'$.

CHOOHURPOOR, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghur to that of Delhi, and 11 miles N.W. of the former. Lat. 28° , long. $78^{\circ}3'$.

CHOOKANEEPARA, in the British district of Camroop, in Assam, a town 34 miles S.E. of Goalpara, 45 miles S.W. of Gowhatty. Lat. $25^{\circ}52'$, long. $91^{\circ}5'$.

CHOLERA, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly, and 28 miles S.W. of the latter. It is situate in a well-watered, fertile, level, and well-cultivated country. Lat. $28^{\circ}13'$, long. $79^{\circ}10'$.

CHOOMBI.—A town in a slip of territory belonging to Thibet, lying between the north-western boundary of Rhotan and the eastern boundary of Sikhim, distant N.E. from Darjeeling 53 miles. Lat. $27^{\circ}30'$, long. 89° .

CHOONAPANEE, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village and small military station on the route from Birm Deo guard-house to Chumpawut, and four miles N.W. of the former. Elevation above the sea 1,500 feet. Lat. $29^{\circ}8'$, long. $80^{\circ}9'$.

CHOONGA.—A village in Bahawalpore, on the route from Subulcote to Shikarpore, and 60 miles S.W. of the former place. It is situate on the east bank of a deep and extensive *dund*, or pool of water, replenished by the inundations of the Indus. Choonga, by the draft treaty of November, 1842, was to have been transferred to Bahawalpore. Subsequently, the limits of the cession were altered, and the village was not included within them. Lat. $27^{\circ}48'$, long. $69^{\circ}4'$.

CHOONHURUH.—See **CHOLERA**.

CHOOCHIN, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a halting-place on the route, by the Unta Dhura Pass, from Almorah fort to Hiundes, or South-western Tibet, 156 miles N.E. of Almorah. The Chinese frontier is marked by a low wall, about a mile north of this place. Elevation of encampment about 15,000 feet. Lat. $30^{\circ}35'$, long. $80^{\circ}17'$.

CHOOREEA, in the British district of Chota Nagpore, lieutenant-gov. of Bengal, a town three miles from the right bank of the river Dammoodah, 23 miles N.E. of Lohadugga. Lat. $23^{\circ}31'$, long. $85^{\circ}7'$.

CHOOCHA, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly

to Seetapoor, and 18 miles E. of the former. Lat. $23^{\circ}18'$, long. $79^{\circ}45'$.

CHOOHUT.—A town in the native state of Rewah or Baghelcund, distant E. from Rewah 23 miles. Lat. $24^{\circ}24'$, long. $81^{\circ}45'$.

CHOOROO, a town in the Rajpoot state of Beekaneer, on the eastern frontier towards Shekhawuttee, lies on the route from Kanound to the town of Beekaneer, and 105 miles E. of the latter. It is situate on the eastern border of the desert, in a tract of extreme desolation. Elphinstone, who visited it in 1808, thus describes its state at that time:—"It is near a mile and a half round, without counting its large but mean suburbs; and though situate among naked sandhills, it has a very handsome appearance. The houses are all terraced, and both they and the walls of the town are built of a kind of limestone of so pure a white that it gives an air of great neatness to everything composed of it. It is, however, soft, and crumbles into a white powder, mixed here and there with shells. It is found in large beds in many parts of the desert. The chief of Chooroo is a dependant, rather than a subject, of the rajah of Beekaneer." Chooroo was formerly a flourishing place, but at the time of the British mission to Beekaneer in 1835, Boileau found that its commerce had been lost, from causes which he does not distinctly specify. Its merchants had removed, its bazaars had become desolate, and its fortifications had fallen to ruin. Lat. $28^{\circ}14'$, long. $75^{\circ}1'$.

CHOPALLA, in the Peshawur division of the Punjab, a town situated on the route from Jhelum to Pind Dadun Khan, eight miles S.W. of the town of Jhelum. Lat. $32^{\circ}57'$, long. $73^{\circ}30'$.

CHOPRA, in the British district of Candeish, presidency of Bombay, a town about eight miles from the right bank of the river Taptee, 51 miles N.E. of Dhoolia. Lat. $21^{\circ}14'$, long. $75^{\circ}27'$.

CHOPRAKOT, in the British district of Gurwhal, lieutenant-gov. of the N.W. Provinces, a town 30 miles S.E. from Sireenuggur, 39 miles N.W. of Almora. Lat. $29^{\circ}59'$, long. $79^{\circ}14'$.

CHOPRA TUCKEA, in the British district of Paneeput, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Delhi to Kurnoul, and 27 miles S.E. of the latter. Lat. $29^{\circ}19'$, long. $77^{\circ}3'$.

CHORE, in the British province of Scinde, presidency of Bombay, a town on the route from Hyderabad to Jessulmeer, 90 miles E. of the former. Lat. $25^{\circ}30'$, long. $69^{\circ}55'$.

CHORLA, a small river of Scinde, rises in the Keertar range of mountains, about lat. $25^{\circ}55'$, long. $67^{\circ}50'$. It has a course generally northerly of about thirty-five miles, and is lost in the arid tract west of Schwan, in lat. $26^{\circ}20'$, long. $67^{\circ}45'$. In the upper part of its course it is called the Mullcree, lower down, the Joorunb, and finally, the Chorla. It is dry

for the greater part of the year, but water may be always obtained by digging in the bed.

CHORWAUR, in the peninsula of Kattywar, province of Guzerat, a town lying on the south-west coast, where the small river Vridi falls into the Arabian Sea. It is stated to contain 1,500 houses, but far from being fully inhabited. Distance from Ahmedabad, S.W., 210 miles; Baroda, S.W., 215. Lat. $21^{\circ} 2'$, long. $70^{\circ} 16'$.

CHOTA BHOWANEE, in the British district of Hurriana, lieutenant-governor of the N.W. Provinces, a village on the route from Hansa to Neemuch, and 11 miles S. of the former. Lat. $28^{\circ} 56'$, long. $76^{\circ} 7'$.

CHOTA BULLEAH, in the British district of Mongheer, lieutenant-governor of Bengal, a town on the route from Mongheer to Chupra, 10 miles N.W. of the former. Lat. $25^{\circ} 24'$, long. $86^{\circ} 22'$.

CHOTADEKOTE, in the Mooltan division of the Punjab, a town situated 10 miles from the west or right bank of the river Indus, 13 miles S. of the town of Dera Ghazee Khan. Lat. $29^{\circ} 52'$, long. $70^{\circ} 49'$.

CHOTA KALLEE SIND.—The name of one of the principal feeders of the Chumbul. It rises in lat. $22^{\circ} 50'$, long. $76^{\circ} 15'$, in the territory of Dewas, and, flowing in a south-westerly direction for 104 miles through the territories of Dewas, Gwalior, Holkar's territory, and Jhalawur, falls into the Chumbul on the right side, in lat. $23^{\circ} 59'$, long. $75^{\circ} 33'$.

CHOTA NAGPORE, or **NAGPORE THE LESS**.—A British district of Bengal, under the control and management of an officer designated the Political Agent for the South-west Frontier and Commissioner of Chota Nagpore, to whose jurisdiction it was transferred in 1833, having previously been part of the zillah of Ramgurb. It is bounded on the north by the British districts Pakmow and Ramgurb; on the east by the British districts Pachete and Singhboom; on the south by the British district of Singhboom and the native states of Bonai, Gangpoor, and Jushpoor; on the west by the native states of Odpoore and Sirgoja; and lies between lat. $22^{\circ} 28'$ — $23^{\circ} 40'$, long. $83^{\circ} 54'$ — $85^{\circ} 56'$. The area is 5,308 square miles. The country is but very imperfectly known, and trustworthy notices respecting it are scanty. It is represented as for the most part being a table-land, with an elevation of about 3,000 feet above the sea; but the surface undulates. The north-eastern part of the district is drained by numerous tributaries of the Soobun Reeka, flowing to the south-east, and falling into the Bay of Bengal; the south and west parts are drained by the Coel and other tributaries of the Rytunee, holding a course nearly south. Much of this district, especially the hilly part, is overrun by jungle and forests, abounding in fine timber, among which the sal (*Shorea*

robusta) and teak are the best. There are, besides, the sissoo, various descriptions of palm, ebony, and many others. An experimental coffee-plantation was formed in this district by the British government in 1844, but was subsequently disposed of to a native planter.

The climate is little modified by the great general elevation of the surface. The range of the thermometer in the plains "may be said to be from 72° to 88° in the twenty-four hours during the rainy season; from 78° to 98° in the hot season; and from 66° to 82° in the cold season;" at which last time, in January, the thermometer has been known to fall to 28° . Coal is found in many situations in Chota Nagpore, but the veins are said to be deficient in thickness. It is conjectured that some better worth the cost of working might be discovered; but the remoteness of good markets and the want of good roads would for some time preclude any extensive or certain demand for the commodity. Iron probably exists, but the district does not appear to be rich in mineral productions. The population is given under the article **BENGAL**. The military head quarters are at Dorunda, where is stationed the principal force of the Ramgurb light infantry and four guns, together with two companies of local horse. The principal routes are: 1. From north to south, from Hazareebagh, through Kishenpoore and Dorunda, to Sundalpoore. 2. From north-east to south-west, from Hazareebagh, through Lohardugga, to the city of Nagpore.

In 1832 serious disturbances broke out in this district, and rapidly extended to the adjacent district of Palamow. A state of complete disorganization ensued, and it was only by the employment of a strong military force, and after considerable resistance, that order was at length restored. The disturbed districts, previously parts of a collectorate under the ordinary regulations, were thereupon placed under a system of administration, which, judging from the results, is better suited to their condition, and thenceforward were tranquil.

CHOTA ODEPOOR.—See **ODEPOOR**.

CHOTA ORAMPAD, in the British district of Cuddapah, presidency of Madras, a town on the route from Cuddapah to Madras, 41 miles S.E. of the former. Lat. $14^{\circ} 3'$, long. $79^{\circ} 20'$.

CHOTA SERVEE, in the territory of Gwalior, a village on the route from Agr to Gwalior fort, 40 miles S. of former, 31 N.W. of latter. It is a small place, ill supplied with water from one well, and has a mud fort at the head of deep ravines, extending north to the channel of the Chumbul. Lat. $26^{\circ} 37'$, long. $77^{\circ} 57'$.

CHOTEE, in the Mooltan division of the Punjab, a town situated 38 miles S.W. of Dera Ghazee Khan, 65 miles N. of the town of Mithun Kote. Lat. $29^{\circ} 52'$, long. $70^{\circ} 19'$.

CHOTEYLA, in the peninsula of Kattywar, province of Guzerat, a town near the northern frontier. It is situated close to a mountain of considerable elevation, denominated from the town, and is the principal place of a subdivision having a population of 1,840 persons, and paying a tribute of 252 rupees to the British government. Distant from Ahmedabad, S.W., 100 miles. Lat. $22^{\circ} 24'$, long. $71^{\circ} 11'$.

CHOTUN.—A town in the Rajpoot state of Joudpore, distant S.W. from Joudpore 141 miles. Lat. $25^{\circ} 31'$, long. $71^{\circ} 3'$.

CHOUREPOOR, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Benares to Ghazeepeer, 12 miles N. of the former, 34 S.W. of the latter. Lat. $25^{\circ} 28'$, long. $83^{\circ} 5'$.

CHOUCHUCK, in the Baree Doob division of the Punjab, a town situated on the left bank of the river Ravee, 60 miles S.W. of the town of Lahore. Lat. 31° , long. $73^{\circ} 28'$.

CHUDANS, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a small Bhoti mahall or subdivision lying between the rivers Kulee (Eastern) and Dhoule, and extending upwards from the bifurcation at their confluence. It is about twelve miles in length from north to south, and eight in breadth, and lies between lat. $29^{\circ} 57'$ — $30^{\circ} 8'$, long. $80^{\circ} 37'$ — $80^{\circ} 47'$; containing probably between eighty and ninety square miles of area, all consisting of lofty and steep mountains or rugged ravines, as it is situated among the summits of the main chain of the Himalayas.

CHODHA.—See CHODHON.

CHODWAN, in the Damran division of the Punjab, a town situated 49 miles S.W. of Dera Ismael Khan, 66 miles N.W. of the town of Leia. Lat. $31^{\circ} 26'$, long. $70^{\circ} 14'$.

CHOGUL.—A town in the native state of Cashmere, or dominions of Gholab Singh, 34 miles N.W. from Sirinagur, and 111 miles N.E. from Jhelum. Lat. $34^{\circ} 23'$, long. $74^{\circ} 31'$.

CHOUL.—See CHOWUL.

CHOUMOOH, in the Rajpoot state of Jeypoor, a town 18 miles N. of the city of Jeypoor, the principal place of a zemindary or fief estimated to yield an annual revenue of 115,000 rupees. Lat. $27^{\circ} 12'$, long. $75^{\circ} 50'$.

CHOUNTERA, in the Peshawar division of the Punjab, a town situated 26 miles N.W. of Kala Bagh, 70 miles S.W. of the town of Peshawar. Lat. $33^{\circ} 4'$, long. $71^{\circ} 10'$.

CHOUPIKHEEA, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village with a temple and a small military station, five miles E. of Petoragurh cantonment. Lat. $29^{\circ} 35'$, long. $80^{\circ} 20'$.

CHOUR, a remarkable peak on the northern boundary of Sirmoor, is the most elevated summit among the mountains rising over Hindostan to the south of the Himalayas, with which

range it is connected by a transverse ridge running nearly north and south a distance of above fifty miles. The Chour forms a striking object as seen from the plains of Sirhind, and affords a noble prospect from its summit. "Nothing," observes Royle, "could be more magnificent than the view from this culminating point, having the plains of India indefinitely extended to the southward, and on the north the snowy peaks of the Himalaya towering even above this great height." Elevation above the sea 12,149 feet. Lat. $30^{\circ} 52'$, long. $77^{\circ} 32'$.

CHOURAR.—A petty district of Jareegah Rajpoots, in the north-western part of the province of Guzerat. During the rains, when the Runa fills, Chourar is almost an island. It lies between lat. $23^{\circ} 35'$ and $23^{\circ} 56'$, and long. $70^{\circ} 53'$ and $71^{\circ} 11'$; and is bounded on the north and south by the Runn; on the east by Warye; and on the west by Cutch. It is about twenty-five miles long and seventeen broad. The country is flat and open. Salt is found in large quantities. The great road from Pallee and Hindostan, which is also the line of transit from all parts of Northern Guzerat to the Mandavie Bunder and the whole of Cutch, passes through this district. The population amounts to about 2,500. The chiefs entertain twenty-five soldiers for their own protection, but, like the neighbouring districts, look for support from foreign invasion to the British government. The revenues average about 9,000 rupees per annum. Chourar pays no tribute to any government. The connection of Chourar with the British government first took place in 1819, upon the expulsion by the latter of the marauders from Guzerat. Further engagements were entered into in 1826. In its internal affairs no interference is exercised by the protecting power.

CHOURASS, in the district of Pertalburgh, territory of Oude, a town 13 miles W. of the town of Pertalburgh, 85 S.E. of Lucknow. Butter estimates the population at 4,000, all Hindoos and cultivators. Lat. $25^{\circ} 56'$, long. $81^{\circ} 47'$.

CHOUSALLA.—A town in Hyderabad, or dominions of the Nizam, distant S. from Jaulnah 80 miles. Lat. $18^{\circ} 42'$, long. $75^{\circ} 46'$.

CHOUTHKA BUKWARA.—A town in the Rajpoot state of Jeypoor, 65 miles S.E. from Jeypoor, and 22 miles S.E. from Tonk. Lat. $26^{\circ} 3'$, long. $76^{\circ} 19'$.

CHOWBEESA, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Nerbudda river, 58 miles E. of Jubbulpore. Lat. 23° , long. $80^{\circ} 55'$.

CHOWDHERA, in the British district of Boolundshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Allygurrh cantonment to that of Moradabad, and 18 miles N. of the former. Lat. $28^{\circ} 9'$, long. $78^{\circ} 14'$.

CHOWGONG.—A town in the British district of Rajeshaye, lieutenant-gov. of Bengal, 16

miles N.E. of Natore. Lat. $24^{\circ} 33'$, long. $89^{\circ} 12'$.

CHOWHAREE, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route by the Kutra Pass from Allahabad to Rewa, and 37 miles S.E. of the former city. Lat. $25^{\circ} 9'$, long. $82^{\circ} 14'$.

CHOWKA, a tributary of the great river Ghoghra, rises in the British district of Bareilly, about lat. $28^{\circ} 59'$, long. $80^{\circ} 4'$. It takes a south-easterly direction through the districts of Bareilly and Shahjehanpore, and at the distance of forty miles from the source, and in lat. $28^{\circ} 43'$, long. $80^{\circ} 15'$, it on the left side is joined by an offset from the river Ghoghra. At the distance of 100 miles lower down, it, in lat. $27^{\circ} 41'$, long. $81^{\circ} 7'$, receives on the right side the Woel or Ool, a river of smaller size. Continuing a south-easterly course for about forty miles farther, it falls into the Ghoghra on the right side, in lat. $27^{\circ} 9'$, long. $81^{\circ} 30'$. It is navigable throughout the year. Buchanan signifies this river by the Bhakosa, which he mentions falls into the Ghoghra about forty miles below the confluence of the Setiganga.

CHOWKAAD, or **CHAUGAT**, in the British district of Malabar, presidency of Madras, a town on an inlet of the Arabian Sea, communicating with the estuary of a considerable stream descending from the Western Ghats. Distance from Chattrwy or Chitwa, N., three miles; Calicut, S.E., 51. Lat. $10^{\circ} 35'$, long. $76^{\circ} 6'$.

CHOWKY.—A town in the territory of Nagpore, distant N. from Nagpore 82 miles. Lat. $22^{\circ} 12'$, long. $78^{\circ} 31'$.

CHOWMHAN, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from Muttra cantonment to Delhi, and 13 miles N.W. of the former. Lat. $27^{\circ} 37'$, long. $77^{\circ} 39'$.

CHOWNDIA, in the Rajpoot state of Joudpore, a village containing thirty houses, on the route from the town of Joudpore to that of Ajmere, and 36 miles N.W. of the latter. Lat. $26^{\circ} 34'$, long. $74^{\circ} 15'$.

CHOWREGURH, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a fort among the Mahadeo Mountains. During the great Mahratta war in 1818, it was held by a garrison for the rajah of Benar or Nagpore, and evacuated on the approach of a British detachment, which took possession of it. In the same year it was ceded, with the rest of the Saugor and Nerbudda territory, to the British government by the treaty of Nagpore. In the close of the same year, a party of 2,000 Gonds attempted to retake it. The garrison consisted of only thirty men, commanded by a native officer. But these, maintaining a good countenance, deterred the besiegers from an assault by the constant fire of their guns, until a relief appeared, when the enemy were repulsed with

great slaughter. Distant S.W. from Jubbulpore 70 miles. Lat. $22^{\circ} 45'$, long. 79° .

CHOWRYE.—A town in the territory of Nagpore, distant N. from Nagpore 60 miles. Lat. $22^{\circ} 8'$, long. $79^{\circ} 16'$.

CHOWSA, or **CHOUNSA**, in the British district of Shahabad, lieutenant-gov. of Bengal, a town on the right bank of the Ganges, at the confluence of the Kurumnassa. Heber describes it as "a large town, with some neat mosques and the remains of a fort." It, however, appears to be at present in a ruinous state. Here, in 1539, the fate of the empire was decided in a battle between Humaion, the padshah of Delhi, and his Afghan rival Sheer Shah. Nearly the whole of the army of Humaion was driven into the river and drowned; and Humaion himself was saved from the same fate by floating upon a water-bag, which had been inflated for the purpose by one of the fugitives. Baber mentions that he visited Chowea. Distant N.W. from Calcutta 574 miles by the river's course; 399 by land, *via* Sasseram and Buxar. Lat. $25^{\circ} 27'$, long. $83^{\circ} 58'$.

CHOWUL, or **CHOUL**, in the British district of Tannah, presidency of Bombay, a town and seaport of the Northern Concan, 23 miles S. of Bombay. Lat. $18^{\circ} 34'$, long. $72^{\circ} 59'$.

CHOYAH NUDEE.—A river of Sirhind, rising in lat. $30^{\circ} 48'$, long. $76^{\circ} 50'$, and, flowing in a south-westerly direction for twenty miles through the British district of Umballa, and seventy miles through the native territories of Patialah and Nabla, becomes absorbed in Patialah, about lat. $30^{\circ} 4'$, long. $75^{\circ} 50'$.

CHRYAKOT, or **CHERIAKOT**, in the British district of Azimgurh, lieutenant-gov. of the N.W. Provinces, the principal place of the pergunnah of the same name, is on the route from the town of Azimgurh to that of Ghazee-poor, 20 miles S.E. of the former, 24 N.W. of the latter, 45 N.E. of Benares, and in lat. $25^{\circ} 53'$, long. $83^{\circ} 24'$.

CHUASI.—A town in the Trans-Sutlej hill state of Sukhet, 28 miles S.E. from Sukhet, and 20 miles N.E. from Simla. Lat. $31^{\circ} 23'$, long. $77^{\circ} 20'$.

CHUBRAMOW, in the British district of Furruckabad, a large straggling town on the trunk road from Calcutta to Delhi, and 13 miles S.W. of Futehghur. It is mentioned by Tieffenthaler under the name of Zebramao, and probably in the Ayeen Akbery under the name of Clupramow. Lat. $27^{\circ} 9'$, long. $79^{\circ} 32'$.

CHUCH, an extensive plain to the east of Attock, and, from its proximity to that place, sometimes called the Plain of Attock. Its extent from east to west is, according to Vigne, twenty miles, and from north to south about fifteen miles. Its centre is in lat. $33^{\circ} 50'$, long. $72^{\circ} 25'$.

CHUCK, in the British province of Scinde, presidency of Bombay, a town on the left bank

CHU.

of the Indus, 29 miles W. of Subzulcote. Lat. $28^{\circ} 15'$, long. $69^{\circ} 30'$.

CHUCKEREEA.—A town in the British district of Chittagong, lieut.-gov. of Bengal, 49 miles S. of Chittagong. Lat. $21^{\circ} 42'$, long. $92^{\circ} 10'$.

CHUCKURDUPOOR.—A town in the British district of Singbloom, on the south-west frontier of Bengal, 20 miles N.W. from Chai-bassa, and 69 miles S.E. from Lohadugga. Lat. $22^{\circ} 41'$, long. $85^{\circ} 28'$.

CHUCKWADEE.—A town in the British district of Ramgurb, lieut.-gov. of Bengal, 70 miles N.E. of Hazareebagh. Lat. $24^{\circ} 20'$, long. $86^{\circ} 25'$.

CHUHKOWAL, in the Peshawar division of the Punjab, a town situated on the route from Attock to Pind Dadun Khan, 60 miles S. of the town of Attock. Lat. $33^{\circ} 3'$, long. $72^{\circ} 37'$.

CHUKA.—A town in the native state of Bhotan, distant E. from Darjeeling 63 miles. Lat. $27^{\circ} 3'$, long. $89^{\circ} 23'$.

CHUKDEHA, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route by the Kutra Pass from Allahabad to Rewa, and 37 miles S.E. of the former city. Lat. $25^{\circ} 14'$, long. $82^{\circ} 11'$.

CHUKHERA, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a village on the route from Calpee to the town of Futtehpore, and seven miles N.W. of the latter. Lat. $25^{\circ} 59'$, long. $80^{\circ} 43'$.

CHUKSANA, in the native state of Bhurt-pore, a village on the route from Agra to the city of Bhurt-pore, 23 miles W. of the former, 11 E. of the latter. Lat. $27^{\circ} 11'$, long. $77^{\circ} 43'$.

CHUKUN, in the British district of Poonah, presidency of Bombay, a town on the route from Poonah to Narayungaum, 20 miles N. of the former. Lat. $18^{\circ} 48'$, long. $73^{\circ} 51'$.

CHUKURPOOR, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from Calpee to the cantonment of Cawnpore, and 12 miles W. of the latter. Lat. $26^{\circ} 26'$, long. $80^{\circ} 15'$.

CHULERA.—See CHILLERA.

CHULEYSUR, in the British district of Agra, a village on the route from the city of Agra to Mynpooree, and seven miles N.E. of the former. Lat. $27^{\circ} 13'$, long. $78^{\circ} 10'$.

CHULGULLY.—A town in the native state of Sirgoojah, 23 miles N.E. from Sirgoojah, and 51 miles S.W. from Palamow. Lat. $23^{\circ} 20'$, long. $83^{\circ} 28'$.

CHUMALARI.—A lofty peak in the snowy range of the Himalayas, having an elevation of 23,929 feet. Distant N.E. from Darjeeling 80 miles. Lat. $27^{\circ} 49'$, long. $89^{\circ} 19'$.

CHUMARPOORA, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from Bareilly to

Delhi, and 42 miles W. of the former. Lat. $28^{\circ} 27'$, long. $78^{\circ} 52'$.

CHUMATANG.—A town in the native state of Cashmere, or dominions of Gholab Singh, 205 miles S.E. from Sirinagur, and 173 N.E. from Simla. Lat. $33^{\circ} 20'$, long. $78^{\circ} 27'$.

CHUMBA, in Gurwhal, a summit in the ridge stretching from Surkanda to the right bank of the Bhagerettee, as the Ganges is called in the upper part of its course. During the time the Goorkahs occupied the country, 1,000 of their troops held the stockade constructed here. It was a secondary station in the trigonometrical survey of the Himalaya. Elevation above the sea 5,567 feet. Lat. $30^{\circ} 20'$, long. $78^{\circ} 28'$.

CHUMBAGURH, in the Cis-Sutlej hill state of Hindoor, a fort on the steep ridge which, rising over the left bank of the Sutlej, is continued in a south-east direction to Ramgurb, and joins the Sub-Himalaya. Elevation above the sea 4,400 feet. Lat. $31^{\circ} 13'$, long. $76^{\circ} 48'$.

CHUMBALLA.—A strong stockade situate on the Arracan river, about 16 miles S. of the town of Arracan. The fortification formed an object of contest during the Burmese war in 1825. Lat. $20^{\circ} 28'$, long. $93^{\circ} 20'$.

CHUMBELA, or **CHUMBLA**.—A river rising in the Vindhya Mountains, near the town of Dhar, and in lat. $22^{\circ} 40'$, long. $75^{\circ} 14'$. It holds a northerly course of about seventy miles, in some degree parallel with the Chumbul, into which it falls on the left side, in lat. $23^{\circ} 24'$, long. $75^{\circ} 28'$. It is confounded by Ritter with the Chumbul.

CHUMBUL RIVER, a considerable tributary of the Jumna, rises in Malwa, in lat. $22^{\circ} 26'$, long. $75^{\circ} 45'$, about eight or nine miles south-west of the British station of Mhow, the elevation of which above the sea is 2,019 feet. The source is four miles south-east of the town of Hasulpoor, and two miles west of Burgoonda, and on the north side of the line of waterheads which determines the flow of the streams rising on that side towards the Jumna; those rising on the south side taking their courses to the river Nerbudda. The cluster of summits of the Vindhya range, amidst which the Chumbul rises, has the local appellation of Janapaya. Malcolm considers this merely the nominal source, observing, "This part of the river is dry in the hot season, during which it owes its waters to other tributary streams." Such is probably the case but for a very short distance, as the Chumbul, where crossed by the route from Mhow to Dhar, at Aclama Munana Ghat, about fifteen miles from its source, is sixty yards wide, with steep banks, small stream throughout the year, and sandy bottom, according to Garden, who is likely to be correctly informed. Flowing northerly, it, after a course of about eighty miles, receives on the left side the Chambela, or Chumbla, a river of nearly equal length and size with itself, and which holds like it a northerly course. About ten

miles below it, on the same side, the Chumbul receives the river Wageri, flowing from the south-west. At the town of Tal, fifteen miles lower down, the river turns to the north-west, and five or six miles farther, receives on the left side the Molanee, a tributary of greater extent of course than that of the Wageri. Thence winding with a strongly-marked detour round the fortress of Nagutwara, it flows to the south-east for ten miles, at which distance it turns to the north-east, and on the right side, fifteen miles lower down, receives the Seepra, a stream like itself flowing from the Vindhya range, and little inferior in length of course or volume of water. The Chumbul, eight miles below the confluence of the Seepra, receives, also on the right side, the Chota Kallee Sind, so called in contradistinction to a more considerable river, the Kali Sind, holding its course farther east. From the confluence of the Chota Sind, the Chumbul takes a north-westerly course, and, twenty miles farther, it receives on the left side the Sow, and on the same side, five miles farther down, the Sarde, both inconsiderable streams. Thence turning to the north-east, it finds its way through the gorges of the Mokundara range to the more depressed tract of Harouti. Previously to entering this rugged tract, it is crossed at the Gujrat Ghat, on the route from Neemuch to the Mokundara Pass. It is there "fordable after the first of November, and during the rains there is a ferry-boat in attendance. The banks of the river are steep, and its bed of rock and loose stones." At the entrance into the elevated tract or irregular plateau of Mokundara, it is stated by Tod, on hearsay report, to be seventy yards wide, and confined between cliffs perfectly perpendicular. About forty miles farther down, and two hundred and nine from the source of the river, which still holds a course either northerly or north-easterly, the stream expands into a lake, from the other extremity of which it flows through a deep and narrow channel in the rock. The scene is thus described by Tod:—"Nothing seemed to disturb the unruffled surface of the lake until we approached the point of outlet, and beheld the deep bed which the river has excavated in the rock. This is the commencement of the falls. Proceeding along the margin, one rapid succeeds another, the gulf increasing in width, and the noise becoming more terrific, until you arrive at a spot where the stream is split into four distinct channels; and a little farther an isolated rock appears, high over which the whitened spray ascends, the sunbeams playing on it. Here the separated channels, each terminated in a cascade, fall into an ample basin, and again unite their waters, boiling around the masses of black rock, which ever and anon peeps out and contrasts with the foaming surge rising from the whirlpools (cheolis) beneath." The width of the stream is in one place only three yards; and consequently its depth and velocity must be very great, as a few hundred yards lower down the width is five hundred

yards, and when visited by Tod in the middle of February, during the dry season, the depth in the same part was forty feet. The fall is estimated by Tod to be "under two hundred feet" in the mile intervening between the lake and the isolated rock, the descent of the principal cascade being about sixty feet. At the city of Kotah, about fifty miles farther down than this remarkable scene, and two hundred and fifty-nine from the source, the Chumbul is at all seasons a large deep stream, which must be crossed by ferry, even elephants making the passage by swimming; but six miles lower down the stream, Hunter crossed it in the end of March by a ford, which is described as "stony, uneven, and slippery." Twenty-five miles lower down the stream, it is crossed, at the ford of Paranor, by the route from Agra to Mhow, at a point where, during part of the year, the "river is about three hundred yards wide, the bed of heavy sand, banks steep and cut into deep ravines. During the dry season, the stream is usually about thirty yards wide, and from two to two and a half feet deep." "The bed of the Chumbul, for some distance above and below the Paranor ford, is sandy, and is known to the natives by the name of Koosuk." Ten miles farther down, it receives on the right side the Kali Sind (the larger river of that name), a considerable stream, flowing from the Vindhya range; and about thirty-five miles farther down, on the same side, the Parbati, rising also in the Vindhya, a few miles to the east of the source of the Kali Sind, and flowing nearly parallel to it. From this confluence, the course of the Chumbul, hitherto northerly, turns north-east, and twelve miles farther down receives on the left side its greatest tributary, the Banas, which, rising in the Aravulli range, drains or fertilizes a large portion of Rajpootana. The Chumbul, after this junction, is a great river, probably in few places fordable; and continuing a north-easterly course forty-five miles farther down, it is crossed by a ferry on the route from Nussersabad to Gwalior. Continuing to flow in the same direction about fifty-five miles further, it passes by the city of Dholpore, situate on its north-western or left bank, where it is so deep as to be passable by ferry only, yet fordable at Khitora, nearly four miles higher up, though there three quarters of a mile broad in the dry season. "In the rainy season, when the channel is full, the prospect of such a body of running water, bounded by hills, which rise in a variety of fantastic shapes, forms a landscape peculiarly interesting."

At Dholpore the Chumbul is a beautiful clear stream, flowing gently over a bed of fine sand. In the close of April, 1805, it was forded in this vicinity, probably at Khetri, by the British army under General Lake, marching from Bhurtpore to Gwalior; and on that occasion the approaches to the stream were found so difficult, that it was necessary to make a road for the passage of the troops, who amounted to 30,000 fighting men. About forty-five miles

CHU.

below this city it takes a south-easterly direction, and forty-three miles lower down, in the vicinity of Birgowah, on the route from Etawah to Gwalior, is crossed by ferry; but is fordable for elephants and camels in December. Continuing in a south-easterly course for thirty-five miles, it falls into the Jumna on the right side, in lat. $26^{\circ} 30'$, long. $79^{\circ} 19'$. Its total length of course by the windings of the stream is 570 miles, described in a form nearly semicircular; the diameter being about 330 miles, from the source near Mhow to the mouth, forty miles below Etawah. Its average volume of water is said to be so considerable, that on its junction with the Jumna the Chumbul has been known, when flooded, to raise the united stream seven or eight feet in twelve hours. Bacon, however, who saw the Chumbul in the end of December, and during the dry season, states it then to have but a small volume of water. It does not appear to be used for navigation, which is probably incompatible with the average declivity of its bed, amounting to nearly two feet and a half per mile, and still more so with the general rugged and rocky character of its channel. In the early wars waged by the Mogul dynasty of Delhi for the establishment or extension of their power, it seems to have been an important military frontier, and is repeatedly mentioned by Baber.

CHUMKOOR, in Sirhind, a village on the route from Ropur to Ludiana, and seven miles S.W. of the former place. It is situated on the western brow of a high bank, formerly apparently the left bank of the Sutlej, which now flows four miles farther north. The tract intervening between the village and the river is level, low, much intersected by watercourses, and in consequence always moist, and covered with luxuriant grass and jungle. Lat. $30^{\circ} 54'$, long. $76^{\circ} 30'$.

CHUMMOO, in the Rajpoot state of Joudpore, a village on the route from Pokhurn to the town of Joudpore, and 46 miles N.W. of the latter. It is supplied with water from a well 150 feet deep. Lat. $26^{\circ} 40'$, long. $72^{\circ} 42'$.

CHUMMOOREA, in the British district of Camroop, in Assam, a town 39 miles E. of Goalpara, 34 miles S.W. of Gowahatty. Lat. 26° , long. $91^{\circ} 11'$.

CHUMORA, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a village near the right bank of the Ranguanga (Eastern), and on the route from Almorah cantonment to Serakot, 30 miles N.E. of the former. Lat. $29^{\circ} 47'$, long. $80^{\circ} 10'$.

CHUMPAPOOR, in the British district of Sarun, lieut.-gov. of Bengal, a town 21 miles N.E. of Bettiah. Lat. $26^{\circ} 53'$, long. $84^{\circ} 51'$.

CHUMPAWUT.—See **CHAMPAWUT**.

CHUMUR.—A town in the native state of Cashmeer, or territory of Gholab Singh, 136 miles N.E. from Simla. Lat. $32^{\circ} 40'$, long. $78^{\circ} 35'$.

CHUNAHULLY.—A town in Mysore,

under the administration and control of the government of India, distant N. from Seringapatam 50 miles. Lat. $13^{\circ} 9'$, long. $76^{\circ} 56'$.

CHUNAR, or **CHUNARGURH**, in the British district of Mirzapoor, lieut.-gov. of the N.W. Provinces, a town with fort, on a sandstone rock, close to the right or south-eastern bank of the Ganges, here at all times navigable for craft of fifty or sixty tons, completely commanded by the batteries. The rocky eminence rises abruptly from the edge of the stream to the height of 104 feet, but attains its greatest elevation about 200 yards farther south-east, where it is 146 feet high. The space inclosed by the rampart is 750 yards in length from north to south, its greatest breadth (about 300 yards) being at its northern face, fronting the Ganges: the circuit measured round the rampart is 1,850 yards. At short intervals there are many towers along the rampart, which is from ten to twenty feet high. A great part of this inclosure is generally merely an open space under grass, and a few fine trees, amongst which are the bungalows or lodges of the officers; and in some interior inclosures are the governor's house, the hospital, and the state prison, in which was confined Trimbnkji Dainglia, an active instigator and promoter of the Mahratta confederacy, in 1817-18, against the British power. In the midst of this inclosure, and on the highest point of the rocky eminence, is the antique Hindoo palace, a massy vaulted edifice, containing a well fifteen feet in diameter, sunk to a very great depth in the solid rock, and always containing water, but of so indifferent quality that is not to be used except in case of emergency. Here is also a subterranean dungeon now used only as a cellar. In a small square court overshadowed by a pipal-tree, is a large slab of black marble, on which, according to Hindoo belief, "the Almighty is seated personally, though invisibly, for nine hours every day, removing during the other three hours to Benares;" and hence the sepoys conclude, that the fort cannot be taken except between the hours of six and nine in the morning. The exterior rampart is of no strength, as was proved in the course of its siege by the British in 1764, when it was in a few hours breached by a slender battering-train. The steepness of the face of the rock would, however, make storming very hazardous; and a number of large rudely-made stone cylinders are stored in all parts of the fortress, for the garrison to roll down on storming parties. The citadel, or principal stronghold, is in the north-eastern part of the greater inclosure. It mounts many cannon, and has a fine bomb-proof powder-magazine. Outside the fortifications, and on a slope to the east of them, is the native town, with houses all of stone, generally two stories high, with verandas in front, let out into shops. The population is returned at 11,058. Behind, and lower down the slope, are the European dwellings and gardens. The English church, which be-

CHU.

longs to the Church Missionary Society, is built in a good and solid style, and embellished with a Gothic steeple. There is also here a chapel erected at the cost of the government, aided by private subscriptions, for the use of soldiers of the Roman Catholic persuasion. Chunar is a principal invalid station for European troops, though the intense heat felt here during the sultry season seems ill calculated to qualify it for such a purpose. The number of troops located here amounted in 1849 to 280, exclusive of British officers. Outside the town is the tomb of a certain Kaseem Soliman, and of his son, reputed as saints by the Mussulmans, and whose memory has been honoured by one of the sovereigns of Delhi with a splendid mausoleum and mosque. "The buildings, and the grove in which they stand, are very solemn and striking; and the carving of the principal gateway, and of the stone lattice with which the garden is inclosed, is more like embroidery than the work of the chisel."

Chunar was a place of importance as early as 1529, when it was held by a garrison of Baber, who then visited the place, and mentions that its vicinity was infested by the elephant, tiger, and rhinoceros. It soon after fell into the hands of Shir Khan, the Patan aspirant to the sovereignty of Delhi; as Ferishta mentions, that in 1532 he refused to deliver it to Humaim, the son and successor of Baber. It was taken by Humaim in 1539, but almost immediately retaken by Shir Khan; after whose death, Chunar, with the rest of the empire of Delhi, returned under the power of his rival. On the dissolution of the empire of Delhi, subsequently to the invasion of Ahmed Shah Durani, in 1760, it was seized by the nawaub of Oude. In the course of the war between the nawaub and the East-India Company, it was besieged by the troops of the latter, under General Carnac, who was repulsed in a night attack; but the rampart being breached in the south-western quarter, the garrison surrendered. In 1768, the fort, with its territory, was formally ceded by treaty to the East-India Company, and was for some time the principal dépôt for artillery and ammunition for the North-Western Provinces. Elevation above the sea 280 feet. Distant E. from Mirzapoor, by land, 21 miles; by water, along the course of the Ganges, 30; S.W. from Benares 16; N.W. from Calcutta 437. Lat. $25^{\circ} 5'$, long. 83° .

CHUNDA.—A town in the native state of Korea, on the south-west frontier of Bengal, 21 miles N. from Korea, and 53 miles N.W. from Sirgoojah. Lat. $23^{\circ} 24'$, long. $82^{\circ} 20'$.

CHUNDALLEA, in the Rajpoot state of Joudpore, a village on the route from Pokhurn to the town of Joudpore, and 34 miles N.W. of the latter. Lat. $26^{\circ} 35'$, long. $72^{\circ} 53'$.

CHUNDA PERTABPOOR, in the territory of Oude, a town on the route from the cantonment of Jounpore to that of Sultaupoor,

86 miles N.W. of the former, 20 S.E. of the latter. Lat. $26^{\circ} 5'$, long. $82^{\circ} 18'$.

CHUNDA TAL, in the British district of Goruckpore, lieut.-gov. of the N.W. Provinces, a small lake which in the rainy season attains a length of about three miles, with a breadth of two; but its dimensions somewhat contract in the dry season. Distant from the town of Goruckpore, W., 43 miles. Lat. $26^{\circ} 45'$, long. $82^{\circ} 38'$.

CHUNDA WUL, in the Rajpoot state of Joudpore, a village on the route from Nusseerabad to Deesa, and 61 miles S.W. of the former. It is of considerable size, and contains twenty shops. Lat. 26° , long. $73^{\circ} 55'$.

CHUNDEEPOOR, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a village on the route from Cawnpore to the town of Futtehpore, and five miles N.W. of the latter. Lat. $25^{\circ} 58'$, long. $80^{\circ} 46'$.

CHUNDEPOOR.—A town in the territory of Nagpore, distant N.E. from Nagpore 171 miles. Lat. 22° , long. $81^{\circ} 40'$.

CHUNDERGERRY, or **CHANDRAGIRI**, in the British district of Malabar, presidency of Madras, a large square fort on an elevated site on the south side of the Chandragiri river, the northern boundary of Malabar. It was built by Sivuppa Nayaka, who reigned in Ikeri from the year 1648 to 1670, and was the first rajah of that state who made conquests in Malabar. The Chandragiri river descends from the Western Ghats, and during the monsoon is a great torrent, but in the dry season is shallow, but very wide, and expands into an extensive estuary communicating with a salt-water lake. Distance from Cannanore, N.W., 50 miles; Mangalore, S.E., 30. Lat. $12^{\circ} 27'$, long. $75^{\circ} 4'$.

CHUNDERGHERRY, in the British district of North Arcot, presidency of Madras, a town on the route from Chittoor to Nellore, 30 miles N.E. of the former. Lat. $13^{\circ} 36'$, long. $79^{\circ} 21'$.

CHUNDERGOOTYPUTNUM.—A town in Hyderabad, or dominions of the Nizam, distant S. from Hyderabad 86 miles. Lat. $16^{\circ} 10'$, long. $78^{\circ} 58'$.

CHUNDERPOOR.—A desolated town of Burgun, one of the petty states on the south-west frontier of Bengal, situate on the left bank of the Mahanuddes. The place is memorable only as having been, sixty or seventy years since, the scene of one of those extraordinary tragedies which are not altogether unusual in India, when the females of the establishment of the rajah of Sumbhulpore, to avoid the Mahrattas, who took and sacked the town, deliberately threw themselves from the battlements of the fort (now in ruins) into the river below, having previously decked themselves with their choicest jewels and ornaments. Since that period the town has remained deserted, and the surrounding country, which is represented as extremely beautiful, and is be-

CHU.

lieved to have formerly been in a high state of cultivation, has been greatly neglected. Lat. $21^{\circ} 38'$, long. $83^{\circ} 5'$.

CHUNDITULLA.—A town in the British district of Hoogly, lieutenant-gov. of Bengal, 10 miles N.W. of Calcutta. Lat. $22^{\circ} 40'$, long. $88^{\circ} 19'$.

CHUNDKA, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Ganges, seven miles higher up the stream than Chunar; 699 N.W. of Calcutta by the river. Lat. $25^{\circ} 7'$, long. $82^{\circ} 48'$.

CHUNDLAH, in Bundelcund, a town on the route from Calpee to Adjyghurh, 77 miles S. of the former. Davidson describes it as a "thriving place, with a population of 3,000 souls, and situated exactly at the base of a jet-black granitic rock, covered with enormous masses of granite blocks and a few stunted trees." Radiation from the rocks causes the heat to be almost intolerable, even in the night-time. Lat. $25^{\circ} 4'$, long. $80^{\circ} 15'$.

CHUNDOUR, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a town 14 miles N. of Goruckpoor. Lat. $26^{\circ} 54'$, long. $83^{\circ} 25'$.

CHUNDOWSEE, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Bareilly to Delhi, and 45 miles W. of the former. It is of considerable size, has a bazaar, and is surrounded by a low mud wall. Population 29,921. Lat. $28^{\circ} 27'$, long. $78^{\circ} 50'$.

CHUNDRAGHAT BERIKOT.—A town in the native state of Nepal, 242 miles N.W. from Khatmandoo, and 136 miles N. from Lucknow. Lat. $28^{\circ} 45'$, long. $81^{\circ} 31'$.

CHUNDRAGOONDA.—A town in Hyderabad, or dominions of the Nizam, distant E. from Hyderabad 144 miles. Lat. $17^{\circ} 24'$, long. $80^{\circ} 40'$.

CHUNDRAWUL.—A river rising in Bundelcund, in lat. $25^{\circ} 18'$, long. $79^{\circ} 53'$. It holds a course generally north-easterly for about sixty miles, and falls into the river Cane on the left side, in lat. $25^{\circ} 46'$, long. $80^{\circ} 29'$.

CHUNDROWTEE, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Ganges, five miles S. of the confluence of the Goomtee, 648 miles N.W. of Calcutta by water; 16 N.E., or lower down the stream, than the city of Benares. Lat. $26^{\circ} 29'$, long. $83^{\circ} 6'$.

CHUNDUNNUGGUR.—A town in the British district of Cuttack, lieutenant-gov. of Bengal, 53 miles E. of Cuttack. Lat. $20^{\circ} 34'$, long. $86^{\circ} 44'$.

CHUNDUNPOOR.—A town in the territory of Oude, distant N. from Oude 70 miles. Lat. $27^{\circ} 48'$, long. $82^{\circ} 3'$.

CHUNDUNPOOR.—See CHANDPOOR.

CHUNDURGOOTY DROOG.—A town in Mysore, distant N. from Bedenore 44 miles. Lat. $14^{\circ} 27'$, long. $75^{\circ} 1'$.

CHUNDWUK, in the British district of Jounpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Jounpoor to that of Ghazeepoor, 23 miles S.E. of the former, 37 W. of the latter. Lat. $25^{\circ} 36'$, long. $82^{\circ} 59'$.

CHUNGRUNG, in Bussahir, a pass in the district of Koonawur, over a ridge dividing the valley of the Pejur from that of the Mulgun. Elevation above the sea 9,527 feet. Lat. $31^{\circ} 38'$, long. $78^{\circ} 25'$.

CHUNGSA KHAGO, a pass over a lofty ridge between Bussahir and Gurwhal, leads up the stream forming the most remote feeder of the river Buspa. The journey is one of great danger and difficulty, as it lies over the snow, and rain setting in during the attempt would probably cause the destruction of the travellers. Some time before the visit of Gerard to this vicinity, in 1821, eighteen people perished at once in this pass; and since that calamity few travellers venture it. Gerard tried in vain, by extravagant offers, to induce a guide to conduct him by this route, which, however, seems occasionally to be pursued by Koonawari freebooters, in their forays into Gurwhal. As that intrepid traveller, a few days after, crossed the Charing Pass, having an elevation of 17,348 feet, some notion may be formed of the great elevation of Chungsa Khago, which was at the same time deemed impracticable. In the great trigonometrical survey of the Himalaya, a cone, having an elevation of 21,178 feet, is laid down in lat. $31^{\circ} 13'$, long. $78^{\circ} 35'$; and a comparison of this position with that assigned to the pass by approximation in the Map of Koonawur by Gerard, will indicate that the cone is about two miles south-west of the pass, and, consequently, forms a strong evidence of the vast elevation of the ridge in that part. The position is laid in Gerard in lat. $31^{\circ} 14'$, long. $78^{\circ} 33'$.

CHUNNEE.—A town in the native state of Cashmere, or dominions of Gholab Singh, 11 miles S.W. from Jammu, and 19 miles N.E. from Sealkote. Lat. $32^{\circ} 37'$, long. $74^{\circ} 50'$.

CHUNSHULAPET.—A town in Hyderabad, or dominions of the Nizam, distant N.E. from Hyderabad 145 miles. Lat. $19^{\circ} 5'$, long. $79^{\circ} 49'$.

CHUPPRA, in Malwa, a town with bazaar, on the route from Nusserabad to Saugor, 197 miles S.E. of former, 153 N.W. of latter. It, with the surrounding territory, was granted to Ameer Khan by Holkar, and guaranteed to him by the East-India Company by treaty in 1818. (See *Tonk*.) It is considered to yield an annual revenue of 100,000 rupees. Lat. $24^{\circ} 37'$, long. $76^{\circ} 51'$.

CHUPPUGHATEE, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Allahabad

CHU.

to Etawa, and 74 miles S.E. of the latter. It is situate on the Seengoor, or Kurun, here crossed by ford. Lat. $26^{\circ} 10'$, long. $79^{\circ} 59'$.

CHUPRA.—The principal place of the British district of Sarun, lieutenant-gov. of Bengal, a town on the left bank of a channel of the Ganges, and on the route from Dinapore to Goruckpore, 24 miles N.W. of the former, and 124 S.E. of the latter. It contains a good many large handsome native houses. There is only one street, however, passable for wheeled vehicles; and even that is so narrow that it is difficult for small conveyances, while the other thoroughfares are scarcely practicable for palkees or litters. With the exception of the spacious dwellings of the Mahajans, or wealthy tradesmen, the houses are built of mud, with tiled roofs. The town has little breadth, but extends a mile along the river, "uniting with Sahibgunge on the east, which again joins Govingunge: this unites with Cheraied and Doonegunge, from which place to Revelgunge, a distance of fourteen miles, the appearance from the river resembles that of a long straggling town." It lies low, being but a very few feet above the level of the river, which is separated from the main channel by an extensive swampy island, and is navigable during the rains; but from October to July is impracticable for craft of any kind. The civil station is outside the town, and north of it. Chupra appears, from recent accounts, to be a populous place, well adapted for the comfortable residence of Europeans, in consequence of the salubrity of the air, the intercourse by means of the river with Dinapore, Patna, Benares, and more remotely with Calcutta and many other great towns. The population, variously reported, is, without doubt, considerable. Tiefert, about eighty years ago, describes Chupra as extending half a mile along the Ganges; consisting of straw-roofed buildings, and containing French, English, and Dutch factories. Distant N.E. from Benares 118 miles; from Allahabad, E., 180. Lat. $25^{\circ} 45'$, long. $84^{\circ} 48'$.

CHUPROULEE, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a town the principal place of the pergunnah of the same name. The town, containing a population of 13,878, is situate on the left bank of the Jumna, in lat. $29^{\circ} 12'$, long. $77^{\circ} 15'$.

CHUPROWA, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to Sectapore, and 40 miles S.E. of the former. It is situate on the Kunhout, a stream here forty yards wide and four feet deep, with muddy banks and sandy bottom. The ford, which is the only mode of crossing it, is in consequence very difficult. Lat. $28^{\circ} 10'$, long. $80^{\circ} 2'$.

CHURCH ROCKS, or **ST. JOHN'S ROCKS.**—Four rocks distant about four leagues from the coast of Arracan, the largest being about sixteen feet high. They receive their name from the circumstance of the largest

of the four, when viewed from a particular direction, very much resembling a country church. Lat. $17^{\circ} 28'$, long. $94^{\circ} 23'$.

CHURDA.—A town in the territory of Oude, 75 miles N.E. from Lucknow, and 26 miles N. from Buraech. Lat. $27^{\circ} 58'$, long. $81^{\circ} 41'$.

CHUREEDAHA, in the British district of Sarun, lieutenant-gov. of Bengal, a town 16 miles N. of Chupra, 44 miles W. of Mozufferpore. Lat. $25^{\circ} 58'$, long. $84^{\circ} 46'$.

CHURGAON.—See **CHIRGONG**.

CHURKHAREE.—See **CHIRKAREE**.

CHUROWLEE, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a village on the route from Calpee to the cantonment of Etawa, and 36 miles S.E. of the latter. Lat. $26^{\circ} 29'$, long. $79^{\circ} 32'$.

CHUSHUT.—A town in the native state of Cashmere, or dominions of Gholab Singh, 220 miles E. from Sirinagur, and 196 miles N.E. from Simla. Lat. $33^{\circ} 35'$, long. $78^{\circ} 43'$.

CHUSMA, in the Peshawar division of the Punjab, a town situated four miles from the right bank of the Indus, 11 miles N.E. of the town of Kala Bagh. Lat. $33^{\circ} 7'$, long. $71^{\circ} 41'$.

CHUTNAHULLI.—A town in Mysore, distant S.W. from Seringapatam 20 miles. Lat. $12^{\circ} 12'$, long. $76^{\circ} 36'$.

CHUTRAIL, in the Rajpoot state of Jessulmere, a halting-place on the route from Korce, in Sindh, to the town of Jessulmere, from which it is distant 15 miles N.W. Water is obtainable. The road towards Sindh is good, but stony towards the town of Jessulmere. Lat. $26^{\circ} 58'$, long. $70^{\circ} 45'$.

CHUTTERPORE, in Bundelcund, and the principal place of the territory of the same name, lies on the route from Banda to Saugor, 70 miles S.W. of the former, and 10 N.E. of the latter. It is situate to the west of a deep jhil or mere, of about two miles in breadth, and amidst high hills, forming romantic and picturesque groups. It is on the whole a thriving place, having manufactures of paper, and of coarse cutlery, made from iron mined from the adjacent hills. The rajah has lately built a handsome and extensive serae, or lodging-house for travellers, containing numerous chambers arranged along the sides of a court, into which each opens. The most striking architectural objects here, however, are the ruins of the extensive palace of Chutter Saul, the founder of the short-lived independence of Bundelcund, and in whose honour the town received its name. Adjacent is his mausoleum, a large structure, of massive proportions and elaborate workmanship, surmounted by five domes. Most of the houses in Chutterpore are low, and the streets narrow; but a few of the residences of the more wealthy inhabitants are spacious and well built, in a costly and elaborate style of architecture.

The town had formerly considerable transit-trade, but this has much decayed. It is still a good halting-place for troops, having a bazaar, and being well supplied with water. According to De Cruz, the territory of which this is the chief place contains 1,240 square miles and 354 villages, with a population of 120,000 souls. The annual revenue was stated in 1848 to be 300,000 rupees (30,000*l.*). This state maintains a military force, consisting of 100 cavalry, 1,000 infantry, and ten artillery. It pays no tribute. At the close of the last century, this raj was claimed, rather than possessed, by Sernaïd Singh, in right of his descent from Chutter Sal, who had wrested it, with the remainder of Bundelcund, from the empire of Delhi. Sernaïd Singh, at his death, left an infant son to the guardianship of Seoni, one of his officers, a man of low origin, who succeeded in usurping the raj, in which he was confirmed by the British, who found him in possession on the cession of Bundelcund by the Peishwa, under the treaty of Bassein, in 1802. The family are Hindoo, and consequently recognise the rite of suttee. Spry gives an affecting account of an instance of this occurring a few years since, in which the daughter-in-law of the rajah was the victim. The murderous rite has now, however, been suppressed in all the native states of Bundelcund. The town of Chutterpore is in lat. 24° 55', long. 79° 39'.

CHUTTRUM, in the British district of Malabar, presidency of Madras, a town on the route from Ponany to Coimbatore, 20 miles S.W. of the latter. Lat. 10° 39', long. 76° 48'.

CHYKOA, in the British district of Sudiya, in Assam, a town on the left bank of the river Brahmapootra, eight miles S.W. of Sudiya. Lat. 27° 46', long. 95° 36'.

CHYLARA.—A town in the territory of Oude, 64 miles S.E. from Lucknow, and 52 miles N. from Allahabad. Lat. 26° 8', long. 81° 38'.

CHYLUI, in the British district of Boondshuhur, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghur to that of Delhi, and nine miles S.E. of the latter, is situate close to the left bank of the Jumna. Lat. 28° 36', long. 77° 21'.

CHYNEPORE, or **CHAYANPOOR**, in the British district of Shahabad, lieut.-gov. of Bengal, a town at the northern base of the hill-tract in the south of the district. Here is a quadrangular fort, 390 feet in length from north to south, 369 from east to west. The place belongs to a family now Mussulman, but formerly professing Brahminism, having changed its profession of faith to prevent confiscation of its possessions. Distant S.E. from Benares 39 miles, N.W. from Calcutta 350. Lat. 25°, long. 83° 34'.

CHYNPORE BAREE.—See **BAREE**.

CICILLY.—A town in the British district

of South Canara, presidency of Madras, 45 miles E. of Mangalore. Lat. 12° 54', long. 75° 34'.

CIRCARS, (THE FIVE NORTHERN).

—An antiquated division of the presidency of Madras. The tract formerly comprised within the Circars lies between lat. 15° 40'—20° 17', long. 79° 12'—85° 20'. Its seacoast commences at Motapilly, in lat. 15° 40', long. 80° 17', and holds a direction north-east for 450 miles, to the vicinity of Ganjam, and lat. 19° 35', long. 85° 20'. Its greatest width is towards the south-west, where it extends about 100 miles in breadth inland, but in one part, towards the north-eastern extremity, the breadth is not more than eighteen miles. The Five Northern Circars were formerly Chicacole, Rajahmundry, Ellore, Condapilly, and Guntoor; but the tract comprised within them is at present divided into the British districts lying along the coast, and occurring in proceeding from south-west to north-east in the following order:—1. Guntoor; 2. Masulipatam; 3. Rajahmundry; 4. Vizagapatam; 5. Ganjam: detailed accounts of which are given under their respective names in the alphabetical arrangement. The Circars were obtained by the French in 1753, and continued in their possession till 1759, when they were seized by Clive, who thus deprived his adversaries of the means of carrying on the war in the Carnatic.

CIS-SUTLEJ TERRITORY.—See **SIRHIND**, and **HILL STATES**.

CIVITAL.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 22 miles N.E. from Moodgul, and 69 miles N. from Ballary. Lat. 16° 6', long. 76° 50'.

CLAIRALEA.—A town in the British district of Pachete, lieut.-gov. of Bengal, 36 miles N. of Bancoora. Lat. 23° 46', long. 87° 9'.

CLARA.—One of the islands of the Mergui Archipelago, situate about 36 miles west of the mainland. It is high, "having small peaks, the southern one very sharp, like a sugar-loaf." Its centre is in lat. 10° 54', long. 98° 4'.

CLOSEPETT.—A town in Mysore, 45 miles N.E. from Seringapatam, and 23 miles S.W. from Bangalore. Lat. 12° 44', long. 77° 21'.

COADLYPETTA.—A town in Mysore, 60 miles N.W. from Seringapatam, and 70 miles E. from Mangalore. Lat. 12° 48', long. 75° 56'.

COCHIN.—A raj, or native state, politically connected with the presidency of Madras, and so denominated from the town of the same name, formerly its capital, but now a British possession, and considered within the limits of the district of Malabar. That district bounds the Cochin raj on the west, north, and north-east sides; a small portion at the south-west angle is bounded by the Arabian Sea, and

further south is an isolated strip of territory of about thirty miles in length, bounded on the south-west by the same sea. On the south and part of the east, Cochin is bounded by the territory of Travancore: it lies between lat. $9^{\circ} 48' - 10^{\circ} 50'$, long. $76^{\circ} 5' - 76^{\circ} 58'$. The area is estimated at 1,988 square miles. A considerable portion of this raj is mountainous, extending over the Western Ghats. The most striking physical feature of the country is furnished by the series of shallow lakes called by the British backwaters, receiving the drainage of the numerous streams descending from the Western Ghats, and from this circumstance liable to rise enormously as these feeders swell, and to fall as they shrink or dry up. One of these feeders, the Alwy, has been known to rise nearly sixteen feet in twenty-four hours. This affects the backwater in the like degree, which sometimes continues swollen for months, but in the dry season shoals in many places to two feet, and even to six inches at the northern and southern extremities. The limits of the Cochin backwaters, distant north and south about 120 miles, pass considerably beyond the boundary of the state: the greatest breadth is about ten miles, but in some places the breadth is not more than a few hundred yards. The form is exceedingly irregular, branching into a great number of intricate and shallow channels, inclosing various low alluvial islands. The communication with the sea is at three points: one at the city of Cochin, another at Kodungaloor or Cranganore, and a third at Chetuvaya or Chatwye. Though in most places rather shallow, the backwater is navigable at all times from Cochin to Cranganore, and from Cochin to Aleppi or Aulapalay, both for passage and cargo-boats. During the rains it is everywhere navigable for flat-bottomed boats; but for the conveyance of small merchandise, canoes drawing little water are preferred. All the lands washed by this great estuary, whether islands or inclosing banks, are low and swampy, and liable to be flooded during the monsoon inundations. They are in general densely covered with luxuriant and productive cocoanut-palms, and in such places as are embanked great quantities of rice are grown; but this state of the land, and the sluggishness of the water, which has scarcely any current, render the atmosphere very damp, and sometimes very offensive to the smell, though it is not found particularly unhealthy. The average annual fall of rain during the prevalence of the monsoon is as much as seventy-two inches. This season is very long, beginning about the end of May, and lasting to the end of September. During its continuance, the average temperature is 78° ; in the dry season it is about 85° . Even during the latter, though called dry, the air is moist, and frequent showers of rain reduce the temperature, so that a continued drought is almost unknown. In a commercial point of view, the timber of this state is amongst the most valuable of its productions. It grows principally in Iruari, a considerable tract in the north-

east, covered with dense forests of teak of enormous size, but less durable and elastic than timber of the same kind produced in Travancore and Malabar. It is consequently more in demand for building houses than for ships, for which latter purpose it is also rendered less suitable by being cut into short junks, in order that it may the more easily be dragged to the torrents which sweep it down to the backwater, whither it is carried with such extreme violence that it is often shaken to such an extent as to be unfit for purposes requiring timber of large dimensions. Another valuable description of timber is the peon, probably a sort of pine, which furnishes excellent masts. Besides the above, there are blackwood, angely, jack, ben-teak, and bastard-cedar. The vegetable productions are rice, pepper, cardamoms, betelnut, ginger, yams, sweet potatoes, and arrowroot. Coffee of excellent quality is produced to a small extent; and it is believed that the culture might with great success be considerably increased, the chief obstacle being the apathy of the natives. Cotton is grown, but in small quantities, and is considered of inferior quality. The sugarcane is also cultivated, but only to a trifling extent: the natives, not having the skill to make sugar, convert it into jaggery or molasses.

The zoology of the country is rich, but has not been adequately investigated. The list of wild animals comprises elephants and tigers of enormous size, buffaloes, swine, deer of various kinds, monkeys and apes in great number and variety, parrots of many kinds, and other birds of several descriptions. Snakes are very numerous and deadly, and the rivers swarm with alligators. The principal exports are rice, pepper, cardamoms and timber. The rajah has the monopoly of pepper and cardamoms, which he buys at the lowest price at which they can be brought to market, and sells at a great advance. The forests belong to him, and the timber sold from them brings him an average income of 80,000 rupees annually. In consequence of the great extent and facility of water-carriage, and also, in the low country, from the impediments presented by torrents, lakes, inlets of the sea, or backwater, the construction of roads until of late has been little regarded. The longest and most important road is nearly parallel to the seashore, and on an average about a mile from it. This forms the principal military and official route between Travancore and Malabar. Its continuity, however, must be greatly broken by the numerous pieces of water which intersect its course. In the less swampy parts, about Trichoor, there are some excellent portions of road, for making which, laterite, there the prevailing formation, is well suited. The principal towns in the native territory—Trichoor, Cranganore, Chittoor, Vullarapullai, Verapoli, Vaipa, Aikota, Edapali, Tirupunatturai—are noticed under their respective names in the alphabetical arrangement.

Cochin contains eight talooks or subdivi-

sions, called respectively, Cochin, Cannanore, Moogooncaparum, Trichoor, Tallapilly, Chittoor, and Cranganore. The number of houses in 1886 was stated to be 53,720, and that of the population 288,176. The number of people, compared with the area, shows a relative density of 145 to the square mile. The population is much divided and subdivided into castes and classes, the principal of whom are, first, Namboories or Brahmins, composing the priesthood, and having wonderful influence over the Brahminical population in general. Contrary to the usual Brahminical practice, they discourage marriage in their families, only the eldest male in each being allowed the privilege of marrying. Second, Nairs, being of the Sudra or servile class, yet exclusively holding power and military station in the country, and treating all other classes except the Namboori Brahmins with great disdain. The marriage ceremony amongst this caste is very simple, and consists merely of the bridegroom, in the presence of his friends and relatives, purposely assembled, presenting a cloth to the bride, and tying a string round her neck. The engagement is as easily dissolved as formed; for on either party becoming dissatisfied with the other, they separate, and the relationship of husband and wife ceases from that moment, each being then at liberty to enter into a new engagement. The military avocations of this class having been terminated by the establishment of British supremacy, the Nairs are now maintained either by employment in the few public offices of government, or by agriculture. Third, there are several other denominations of the population, mostly outcasts of Brahminism; such as Chagowias and Kanakas, gatherers of fruit and drawers of toddy or fermented sap from the palm; Mooguas, or fishermen. This race is rather numerous, as fish abound in the backwater and the rivers, and are much in request for diet among the majority of the population. Pellers, or slaves, are either attached to the soil, and salable with it, or else unconnected with the soil, and salable at the will of those who are regarded as their owners. Fourth, Christians; of whom there are two denominations, viz., the Syrian or Jacobite Christians, who acknowledge as their spiritual head the patriarch of Antioch, and who generally adhere to a tradition that their church was founded by St. Thomas the Apostle, who landed at Cranganore, or Kotunglur, for the purpose of disseminating the gospel; and Romanist descendants of Portuguese, or of natives converted by them. Fifth, Jews; comprising Black Jews, settled in the country from time immemorial, and White Jews, descended from a colony much more recently planted here. Sixth, Musaulmans, whose number is not great. Besides those above enumerated, "there is a race of people inhabiting the mountains and jungles, called hill-people. They are regarded with abhorrence and contempt, even by the Pellers (pele or slaves),

who consider themselves defiled by coming in contact with them. These wretched outcasts from society reside altogether in jungles, and rarely visit the villages; but are often seen by travellers on the roadside. Their appearance and gestures are scarcely human, and they subsist chiefly on fruits, roots, and such animals as they succeed in entrapping." There does not appear to be any official return of the relative proportion of the respective classes of the population; but some estimate may be formed from the return of the places of worship for each class: being, Brahminical, 2,734; Musaulman, 21; Jewish, 8; Christian, 138. The number of places of education respectively are, English, 5; Malayalam, 69; Tamil, 9; Maharratta, 1; Sanscrit, 7; Hebrew, 4; total, 95.

The rajah of Cochin claims to hold the territory in right of descent from Cheruman Permal, who governed this country as viceroy about the beginning of the ninth century, and who became its independent ruler by successful revolt. Whether or not the line of succession has been interrupted, is a question neither easy of solution nor necessary to be discussed; but it is certain that neither the state nor its rulers have escaped reverses. Cochin early succumbed to the Portuguese, who built a fort there. In 1599 their archbishop of Goa convened a synod at Udiampoor, in which assembly he caused the tenets of the Syrian Christians to be declared heretical, and their condemned books to be publicly and judicially burned. In 1662 the town of Cochin was taken from the Portuguese by the Dutch, under whose management it attained a high prosperity. The rajah, who retained the rest of the country, was in 1759 attacked by the rajah of Calicut, called by Europeans the Zamorin, who was expelled by the rajah of Travancore; and as a reward for the service performed on that occasion, certain portions of territory were transferred from Cochin to Travancore. In 1776, the state of Cochin was conquered by Hyder Ali, the celebrated adventurer, who had raised himself to the sovereignty of Mysore. It remained tributary and subordinate to Hyder, and subsequently to his son Tippoo Sultan, until the peace concluded by the latter with the British in 1797, when the claims of Mysore were transferred to the East-India Company. A treaty had previously been concluded (1791) between the rajah and the East-India Company; by which he had agreed to become tributary to that body, and pay a subsidy of 100,000 rupees annually. This treaty was followed by another in 1809; by which the rajah agreed to pay annually to the East-India Company, in addition to the usual subsidy of one lac of rupees, an annual sum equal to the expense of one battalion of native infantry, or 176,037 Arcot rupees; making an aggregate payment annually, in six equal instalments, of 276,037 rupees; the disposal of the amount of subsidy, as well as the distribution of the force maintained by it, whether stationed within or without the territories of the rajah of Cochin,

being left unreservedly to the Company. The rajah engaged to hold no correspondence with any foreign state, without the knowledge and sanction of the Company; to admit no Europeans to his service, nor allow any to remain within his territory, without the consent and concurrence of the Company, which power might dismantle or garrison any fortresses or strong places in his dominions. On the other hand, the Company undertook to defend the territories of the rajah against all enemies whatever. Subsequently, the annual payment to the British government was reduced to 2,40,000 rupees, being one-half of the estimated amount of the revenue. Under the influence of the protecting power, many changes have been effected, calculated to advance the wealth and promote the happiness of the people. The inconvenient and vexatious imposts known as transit-duties were abolished in 1836; and in 1848, by the mutual consent of the British and Cochin authorities, the custom-house stations of both parties on the frontier were removed, thus, among other advantages, facilitating the passage of merchandise from Malabar and Coimbatore to the port of Cochin. The enlightened policy pursued by her majesty's government at home will doubtless afford additional stimulus to the productive powers of the country, as by a late order the trade of Cochin has been placed, as regards the United Kingdom, on the same footing, with certain specified exceptions, as that of the British possessions in India. In 1839 the misconduct of the reigning prince rendered it necessary to limit his personal expenditure, and intrust the administration of the government to a minister in communication with the British resident. The result has been highly successful. The existing difficulties were in a very short time surmounted, and the flourishing state of the revenue permitted an addition to be made to the personal income of the rajah. Improvement continues. In all the elements of prosperity Cochin is rapidly advancing; an outlay not inconsiderable has been incurred in the construction of roads, bridges, canals, and other works of public utility; yet, at the date of the latest information, the revenue had been found sufficient not only to meet all the demands upon it, but to afford an ample and increasing surplus. The abolition of predial slavery has recently been recommended by the British government, and will in all probability be effected at no very distant period. The present rajah of Cochin, who succeeded to the throne upon the death of his brother, is in the twenty-fourth year of his age: his installation took place in 1853.

Cochin.—A town which, though giving name to a small raj or native state, belongs to the East-India Company, and is included within the district of Malabar, under the presidency of Madras. It is situate at the northern extremity of a piece of land about twelve miles in length from north to south, but in few

places more than a mile, and in many not more than a quarter of a mile, in breadth, and which is nearly insulated by inlets of the sea and estuaries of streams flowing from the Western Ghats. These salt-water inlets, and the estuaries communicating with them, form what is technically called by seamen frequenting the coast the Backwater of Cochin. The river or estuary, on the southern side of which the town is situate, is the principal channel of communication between this extensive inland navigation and the sea. Outside the mouth of the river is a bar, practicable for ships drawing fourteen or fifteen feet water. Notwithstanding this depth, there is a surf on the bar in particular states of the weather. After passing the bar and entering the river under the old walls of the fort, the depth of water is about twenty-five or thirty feet. In addition to the impediment of the bar, the port of Cochin is injuriously affected by the south-west monsoon, during the prevalence of which (several months) vessels can neither enter it nor depart from it in safety. Cochin is the only port south of Bombay where large ships can be built; and here, in 1820 and 1821, were built three frigates for the royal navy. Smaller vessels for the Indian navy have also been built here; and many ships, from 500 to 1,000 tons burthen, for the merchant service. The principal material is teak, produced of excellent quality in the forests of the Western Ghats, but frequently so much injured in the passage down the torrents, rushing in numerous rapids and cataracts, as to be unfit for the construction of any but small craft of from fifty to 250 tons burthen, and called patemas, dows, or botillas.

The town of Cochin is a mile in length, and half a mile in width. It was a prosperous and fine town when in possession of the Dutch, and probably also previously, when held by the Portuguese, who, with their usual religious zeal, embellished it, among other buildings, with a fine cathedral. This, on the capture of the place by the Dutch, in 1663, was converted into a warehouse for the Dutch East-India Company. Bartolomeo, describing it about 1788, says, "This edifice is now employed for preserving the sugar which the Company obtains from Batavia, and the cinnamon they receive from Ceylon, together with nutmegs, cloves, iron, copper, cordage, rice, pepper, and various other articles of merchandise, which they bring hither from foreign countries, and sell, partly to the Indian princes, and partly to the Arabian as well as other native and foreign merchants. Cochin is intersected by beautiful streets; the arsenal is well provided with all kinds of military stores, and the citadel is strongly fortified. The latter, in the year 1778, was supplied with new ditches, bridges, batteries, and bastions." About the same time Forbes describes it as a place of great trade, "a harbour filled with ships, streets crowded with merchants, and warehouses stored with goods from every part of Asia and Europe, marked the industry, the commerce, and the

wealth of the inhabitants." This prosperity was, temporarily at least, impaired by the fall of the dominion of the Dutch. In 1796 Cochin was taken by the British, and in 1806 the fortifications and public buildings, under orders from the British authorities, were destroyed by blowing them up with gunpowder. The effects of the explosions so shattered the private houses that scarcely one of any size or value remained standing. On this severe visitation, such Dutch families as had adequate means left the place, and those who were unable to remove sunk into abject beggary, though some formerly possessed titles, and held high rank and station. Under Dutch sway, Cochin was very populous, containing, besides some Europeans, Moplas or native Mussulmans, Hindoos, Arabians, Persians, Christians, comprising Armenians, Romanists, and those denominated Syrian Christians. The Portuguese Christians are described as singularly depraved, grossly and abominably superstitious; and their clergy as corrupt, licentious, and ignorant. There was formerly a Dutch church, which, after the place, passed into the hands of the English. The Jews are of two kinds: the fair Jews, of more recent arrival and settlement in the country; and the black Jews, who reside apart in a village outside the town. The latter have a synagogue here. Distance from Calicut, S.E., 95 miles; from Cannanore, S.E., 155 miles; from Mangalore, S.E., 225 miles; from Bombay, S.E., 665 miles; from Bangalore, S.W., 230 miles; from Madras, S.W., 350 miles. Lat. $9^{\circ} 58'$, long. $76^{\circ} 18'$.

CODYCONDA.—A town in the British district of Bellary, presidency of Madras, 109 miles S.E. of Bellary. Lat. $13^{\circ} 50'$, long. $77^{\circ} 50'$.

COEL, in the British district of Allygurh, lieut.-gov. of the N.W. Provinces, a town on the route from Cawnpore to Delhi, four miles S. of Allygurh. It appears to have been a place of some importance so early as the year 1193, when it was captured by the Mussulmans, under Kutb-u-din. It is the seat of the civil establishment of the district, and has in its immediate vicinity the military cantonment and bazaar. Elevation above the sea 734 feet. Population of the town 36,181. Lat. $27^{\circ} 52'$, long. $78^{\circ} 9'$.

COEL RIVER.—See **BYETURNEE RIVER.**

COGLASS, in the British district of Seoni, Saugor and Nerbudda territory, lieut.-gov. of the N.W. Provinces, a town on the route from Nagpore to Jubbulpore, 68 miles S. of the latter. Lat. $22^{\circ} 15'$, long. $79^{\circ} 40'$.

COHUR.—A town in the native state of Sirgoojah, on the south-west frontier of Bengal, 49 miles N. from the town of Sirgoojah, and 72 miles W. from Palamow. Lat. $23^{\circ} 48'$, long. $82^{\circ} 52'$.

COILLE.—A town in the British district of Tirhoot, lieut.-gov. of Bengal, 23 miles N.W. of Durlunga. Lat. $26^{\circ} 24'$, long. $85^{\circ} 43'$.

COIMBATORE, within the territories subject to the presidency of Madras, a British district, named from its principal place. It is bounded on the north and north-west by the territory of Mysore; on the north-east by the British district of Salem; on the east by the British districts of Salem and Trichinopoly; on the south-east by the British district of Madura; on the south by Madura and the territory of Travancore; and on the west by the British district of Malabar and the native territory of Cochin. It lies between lat. $10^{\circ} 14'$ — $12^{\circ} 19'$, long. $76^{\circ} 36'$ — $78^{\circ} 16'$; and according to official return, has an area of 8,280 square miles. The general physical aspect of the district is that of a great recess opening to the east, in which direction it communicates with the vast plain of the Carnatic. The general surface is level, having at its western extremity, or towards the base of the Ghats, an average elevation of 800 or 900 feet above the sea. This district is inclosed on the north by the mazy group of mountains bordering the table-land of Mysore; on the south by the Pulnai or Vurragiri Mountains, and by the Animal range. Beyond the deep gap of Palghatcheri, it has on its north-western side the Kundah and Neilgherry groups. The gap of Palghatcheri, which divides the Animal group from that of the Kundahs, and which completely intersects the great range of the Ghats from east to west, is about twenty miles wide, having near the centre an elevation, stated, as a rough approximation, to be 970 feet above the sea. The principal rivers of the district are the Cauvery, Bhowani, Noyel, and Ambrawutty. Those principal streams receive right and left a great number of torrents, flowing briskly during the periodical rains, but at other times they are almost devoid of water. Much of the irrigation requisite for the production of crops is effected by means of wells. Near the mountains in the southern and western parts of this district are several extensive morasses, and the villages in the vicinity of such places are noted for insalubrity. The climate, in general, however, may be concluded, on scientific principles, to have greatly the advantage over the maritime parts of the Carnatic, partly in consequence of greater elevation, and partly from the volume of cool and fresh air introduced from the India Ocean through the great Palghat gap. The rains are principally brought by the north-east monsoon, which prevails from the beginning of November to the end of December; and then the Cauvery, Noyel, Bhowani, Ambrawutty, and their numerous feeders, as well as the tanks, are replenished, and the low grounds become deluged with water. For a month or six weeks after the end of the monsoon, the season is comparatively cool, delightful, and healthful, the north-east wind proving cheering and bracing to weakly constitutions. The midday temperature, however, is high; the range of the thermometer in the shade being from 62° to 80° or 82° .

Towards the end of January and throughout February, dews fall heavily, and fogs occasion intermittent fevers and catarrhs. After the end of March the north-east winds cease, and are succeeded by occasional calms and variable breezes; southerly and south-east winds succeed, and continue to about the middle of May. During April the weather gradually becomes hotter, and the average range of the thermometer for the month is from 76° to 93°. In May it rises as high as 96° or 98° in the shade, and seldom falls below 79°. From the interposition of the Ghats, the south-west monsoon is but little felt, except in the rise of the Cauvery, replenished on the tablelands of Coorg and Mysore.

The only mineral of importance is iron-ore, either a brown hematite or a black oxide, found in the form of sand. Beryl is found in considerable abundance, and some specimens are of very fine quality. Saltpetre abounds, but is considered to be of inferior quality. It is procured by washing the earth; and a coarse ordinary salt for domestic purposes is obtained by the same process.

The zoology of this district has not been described, though, from the physical circumstances of the tract, it may be inferred to be rich. Elephants are very numerous about the Ghats, and in the secluded valleys of the Ghats, as well as in the Anaimal or Anaimalai group, which has received its name, meaning Elephant Hill, from the great number of these animals which harbour in it. In the course of four years immediately preceding 1842 between 700 and 800 elephants were destroyed by the public establishment maintained for this purpose. The price of the largest and finest pair of tusks is from 8*l.* to 9*l.*, and of those of smaller size from 4*l.* to 6*l.* The vegetable productions consist chiefly of dry grains. The principal alimentary crops are gram (*Cicer arietinum*), various sorts of panic, as *Panicum miliaceum*, *Panicum italicum*, *Panicum spicatum*; various kinds of millet, *Holcus spicatus*, *Holcus saccharatus*, *Curcuma longa* or turmeric. Of commercial crops, the castor-oil plant (*Ricinus communis*) is much cultivated, and its produce consumed at home, and exported largely. Experiments have been conducted by the government for the introduction and cultivation of the Mauritius sugarcane, and favourable reports have been received of their progress. Cotton is produced, and manufactured into coarse fabrics for home wear, and for exportation to Trichinopoly, Salem, Mysore, and Malabar. One of the experimental farms established by the government, with the view of introducing the American species of cotton, was located in this district. In 1849 it was discontinued; the object for which it was formed having, it is said, been fully attained by "demonstrating that the soil and climate are capable of producing cotton suitable to the British market." The district is noted for the abundance and excellence of the tobacco which it produces.

Its superiority is "attributable to the richness and suitableness of the soil for its culture, to its being irrigated from wells containing much saltpetre, and to the attention paid to its cultivation." The sandal-tree grows freely in the jungle forests round the base of the hills, and the wood is exported in considerable quantities. The extensive forests in the neighbourhood of the Anaimali Hills contain abundance of teak and other valuable timber. The population is given under the article MADRAS. The language spoken is the Tamil. The routes, generally speaking, between Coimbatore and the adjoining districts are good, having lately been much improved. The trunk road is from north-east to south-west, from Salem, through the towns of Coimbatore and Palghat, to the western coast at Ponany. One of the lines of the Madras Railway Company will also traverse the district. The principal places are Coimbatore, Palghat, and Daranpoo.

COIMBATOOR, the principal place of the British district of the same name, is situated near the left bank of the river Noyel, a tributary of the Cauvery, in a dry and well-cultivated country, on the declivity, and near the base of the great mountain group of Neilgherry, and on the north side of the remarkable depression which traverses the Ghats from east to west. From this latter circumstance it is admirably ventilated by the currents of air incessantly sweeping that great gorge. The streets are wide, airy, and neatly built; but the salubrity of the place is impaired by the bad quality of the water, which is obtained from wells, and is for the most part brackish. The European quarter is eastward of the town, and detached from it. The advantages of education have been secured to this town through the meritorious efforts of the local community, whereby an English and vernacular school has been established. The jail for the district is situated in the south-eastern part of the town, and is a large square building, capable of containing 275 prisoners. A detachment of native infantry is stationed here. The huts of the sepoys are near the town. On its south side is a tank, never less than three miles in length, and during the rains increasing to a lake of considerable extent. In the time of Hyder Ali the town is said to have contained 4,000 houses; but it suffered much in the wars between the British government and Mysore. The railway from Madras to Poypoo passes by the town. Elevation above the sea 1,483 feet. Distance from Calicut, E., 80 miles; Mangalore, S.E., 196; Bombay, S.E., 600; Seringapatam, S., 100; Bangalore, S., 140; Madras, S.W., 268. Lat. 11°, long. 77° 1'.

COLABA. This name is given to the southern part of Lighthouse Island, the northern being called by the British Old-woman's Island. These two parts are connected by a causeway, overflowed at spring tides. Lighthouse Island is likewise connected with Bom-

bay Island by a causeway. In 1838, a spot of ground at the northern extremity of the island, which was usually covered by the sea at high water, was granted to a company of European and native merchants, for the purpose of constructing a wharf and line of warehouses for the deposit of merchandise, and of excavating a canal, to insure constant smooth water for boats lying alongside the wharf. Colaba is the seat of an observatory, one of sixty now in operation in various parts of the world, for the purpose of magnetic and meteorological observation, whereat the instruments are read hourly, day and night, without interruption. The erection of a church at Colaba was commenced in 1848. The construction of this edifice was the result of a desire to establish some permanent memorial of the gallantry and endurance of those who fell in Scinde and Afghanistan; and the model chosen, was selected on the ground of combining a record of the departed brave, with a purpose of the highest spiritual utility. The cost of the building was estimated at 70,000 rupees, or about 7,000*l*. Towards this sum the government contributed 30,000 rupees, the remainder to be supplied by private subscription. But the estimate having been considerably exceeded, the government has been authorized to contribute a further sum, equal to a moiety of the balance required. Colaba is the seat of barracks, which formerly were subject to the inconveniences arising from an unsatisfactory supply of water. To provide a remedy for this evil, was an object combined with the construction of the causeway connecting Colaba with Bombay Island; and a sufficient extent of iron pipes were forwarded from England to enable the project to be completed. The centre of the island is about lat. 18° 53', long. 72° 52'.

COLABA (Angria's lapsed territory).—See KOLABA.

COLABERA.—A town in the British district of Sumbulpoor, on the south-west frontier of Bengal, 35 miles N.E. of Sumbulpoor. Lat. 21° 54', long. 84° 18'.

COLADYNE RIVER.—See KOLADYNE.

COLAHNELLY.—A town in the British district of Coimbatore, presidency of Madras, 61 miles E. of Coimbatore. Lat. 11° 10', long. 77° 53'.

COLAIR, in the district of Masulipatam, presidency of Madras, a large lake, formed by the drainage of the three rivers Weyaro, Tumularoo, and Boolumair. It contains an area of about 160 square miles. A considerable outlay has been recently sanctioned for its drainage, by which the bed would be made available as arable land, capable of supporting a population of 7,000. Its centre is about lat. 16° 40', long. 81° 20'.

COLAPORE.—See KOLAPORE.

COLAR.—A town in the native state of Mysore, 40 miles E. from Bangalore, and 66

miles W. from Chittoor. Lat. 13° 8', long. 78° 10'.

COLEATOLI.—A town in the British district of Pooralia, lieutenant-gov. of Bengal, 56 miles N.W. of Midnapoor. Lat. 22° 51', long. 85° 40'.

COLEHAN.—A native jaghire within the British district of Singhbhum, under the jurisdiction of the political agent for the south-west frontier of Bengal. Its revenue is returned at 10,600 rupees, a portion of which is paid to the British government as tribute. Its centre is about lat. 22° 5', long. 85° 55'.

COLEROON RIVER.—See CAUVERY.

COLES.—See ORISSA.

COLONG, in the British district of Bhagulpore, lieutenant-gov. of Bengal, a town on the right bank of the Ganges, on the route from Berhampore to Dinapore, 130 miles N.W. of the former, 163 E. of the latter. It has a small bazaar, and a fort, now in a ruinous state. Abreast of it, in the river, are three insulated masses, consisting of huge blocks of rocks, having their crevices and rifts filled with stunted trees, and fifty or sixty feet above the water. Distant N.W. from Calcutta by Berhampore, 245 miles; by the course of the river, 309. Lat. 25° 13', long. 87° 17'.

COLLACHULL, in the territory of Travancore, a small town on the seacoast, in a diminutive bay. The land here is rather high and bold, differing from the generality of the coast, which is low, and in most places sandy. Distance from Trivandrum, S.E., 30 miles; Cananore, S.E., 287. Lat. 8° 10', long. 77° 18'.

COLLOOR.—See BARKALLOOR.

COMALDA, in Gurwhal, a river rising in the mountains inclosing the Rama Serai valley on the north, and in lat. 30° 57', long. 78° 7'. It has a course of about seventeen miles, generally in a south-easterly direction, to its confluence with the Jumna, on the right side, in lat. 30° 47', long. 78° 10'. It is one of the largest streams which the Jumna receives above the confluence of the Tons. Hodgson crossed it in the beginning of April, a little above its mouth, when it was seventy feet wide, two and a half deep, and very rapid.

COMAREALLWA.—A town in the British district of Cuddapah, presidency of Madras, 29 miles S.W. of Cuddapah. Lat. 14° 16', long. 78° 30'.

COMBAKONUM, in the British district of Tanjore, a town the principal place of a large and valuable talook or subdivision which bears the same name. It is situated in a low level tract between two considerable branches or outlets of the river Cauvery, and extends about two miles in length from north to south, and one mile in breadth from east to west. The houses are built in the usual native style, and some in the chief streets have two stories. The bazaar forms a long and tolerably wide street, and is well supplied with provisions.

There are several celebrated pagodas here, and consequently a considerable number of Brahmans, who live on the revenues of those establishments. Many devotees resort hither to visit the pagodas. There is also considerable traffic; but the exercise of manufacturing art is chiefly confined to weaving. The weavers are said to be very industrious, but, like those engaged in the same employment in most other places, very poor. Notwithstanding its slight elevation above the sea, this place is remarkably healthy both for Europeans and natives. The lines for the small detachment of native infantry stationed here, are situate on a sandy piece of ground near the river, where are also the court-house, the jail, and the hospital. The jail is constructed to contain three hundred prisoners. Distance from Tanjore, N.E., 20 miles; Madura, N.E., 112; Bangalore, S.E., 186; Madras, S.W., 130. Lat. $10^{\circ} 58'$, long. $79^{\circ} 26'$.

COMBERMERE BAY, situate between the mouths of the Talak and Aeng rivers, on the coast of Arracan, and abounding with shoals, rocks, and sandbanks. Its centre is about lat. $19^{\circ} 35'$, long. $93^{\circ} 35'$.

COMERCOLLY, in the British district of Pubna, licut.-gov. of Bengal, a town situate on the route from Berhampore to Dacca, 77 miles S.E. of former, 95 W. of latter. It is situate on the Gorace, a large offset flowing south-eastward from the Ganges, and often denominated by the British the river of Comercolly. The river is described by Heber as having the width of the Thames at Vauxhall. Distance from Calcutta, N.E., 104 miles. Lat. $23^{\circ} 52'$, long. $89^{\circ} 14'$.

COMORIN (CAPE), in the native state of Travancore, the most southern point of what is called the Peninsula of India. "It is formed of a circular low sandy point, not discernible above the distance of three and a half or four leagues from the deck of a large ship. Within two or three cables' length of the south-east part of the point lies a sloping rocky islet, high above water, with other rocks about it, on which the sea breaks. To the westward of this islet, the shore of the cape is sandy and barren, but to the eastward it abounds with trees, having a fort and village among them close to the sea." The land is bold and safe to approach within about a mile and a half or two miles, the depth of water in some places increasing towards the shore. "A great way out from the cape there is a lank abounding in cod, where some ships have caught considerable numbers of those fish; but it appears to be of small extent and little known." The base of the southern extremity of the Western Ghats is about a mile or a mile and a half from the sea. "These mountains rise in majestic sharp peaks, chained together, and forming a ridge;" and "a little detached from the end of the chain over the cape, on the east side, there is a sharp conical mountain by itself, like a sugarloaf." A bold summit, some

distance north of the cape, when viewed from afar, appears isolated, and has by navigators sailing at a distance been often mistaken for the cape itself. To the eastward of the rocky islet previously mentioned, and about three miles from it, is a fort. Colonel Welsh, describing the place in 1824, says, "A few fishermen's houses, some venerated temples, and a Dutch church, now form the celebrated town of Cape Comorin." Lat. $8^{\circ} 5'$, long. $77^{\circ} 37'$.

CONCAN, in the presidency of Bombay, a narrow tract stretching from the south of Sawuntwarree, on the frontier of Goa, in lat. $15^{\circ} 44'$, long. $73^{\circ} 45'$, to the Damaun river, in lat. $20^{\circ} 22'$, long. $72^{\circ} 52'$, a length of about three hundred and thirty miles, with a breadth varying from twenty-five to fifty miles. It is bounded on the west by the Arabian Sea, and on the east by the culminating ridge of the Ghats. The eastern part, stretching up the face of the Ghats, and along their summits, is extremely rugged. The mean elevation of the western, or more depressed part, is about 100 feet; but it has many isolated hills, or short ranges, some of which have a considerable elevation. Though rugged, this tract has many fertile valleys, each of which, for the most part, affords a passage to a small river or torrent holding a westerly course from the Ghats to the Arabian Sea. The geological surface-formation is volcanic, generally trap, rising in terraces from the low country to the summit of the Ghats, and in some places overlaid by ferruginous sandstone, which, when decomposed, forms a laterite, easily mouldering into a reddish fertile earth. But a country so rugged cannot but contain much land that is totally irreclaimable, though producing in its gorges and ravines dense jungle, infested by beasts of prey, especially tigers, here remarkably fierce and destructive. In some places, however, the rock is so hard and close as totally to preclude vegetation of any kind, and presents the appearance of a huge black mass overtopping the general outline of the mountain. This is in many instances surmounted by a formidable hill-fort. The rivers, in the upper or steeper part of their course, near the mountains, are clear and rapid; but after entering the level country, where they are affected by the tide, they are very deep and muddy, their estuaries forming small havens, which, before the establishment of British supremacy, afforded lurking-places for pirates. The most fertile spots are on the banks of streams. The rivers abound with fish, but they are also frequented by alligators. Venomous serpents are unfortunately very numerous. The climate is characterized by the great heaviness of the monsoon rains, the amount of which in one year has been known to be nearly 300 inches. The Concan abounds in thermal springs, the water of which has a temperature in no instance exceeding 110° , and is found very serviceable in cases of rheumatism. When

cooled, it is pleasant and salubrious to drink. The Concan comprehends two collectorates, — Tannah and Rutnaghery, which will be found more particularly described in their proper places in the alphabetical arrangement. Of the tract south of Bombay, Mhar is the principal town. There are numerous small towns or forts along the coast, at the estuaries of the small rivers, or on the creeks or small bays, which abound. Of those places the most worthy of notice are Junjera, Rutnagheryah, Vizadroog, and Vingoria, notices of which are given under their respective names.

The Concan appears to have been little noticed in Indian history until the beginning of the sixteenth century, when its seacoasts became the scene of the daring and active operations of the Portuguese. In the middle of the seventeenth century it was conquered from the king of Beejapore by the Mahratta leader Sevajes. Aurungzebe was less successful in his attempts upon it: his son Moazzim, whom he despatched against it, lost, in 1684, nearly the whole of his horses and cattle, either from want of provisions, or from the deadly effect of the climate. It thenceforward remained under the rule of the chief of Sattara, and subsequently under that of the Peishwa, until, on the overthrow of the latter in 1818, it was incorporated with the dominions of the East-India Company.

CONDAPILLY, in the British district of Masulipatam, presidency of Madras, a hill-fort, having an elevation of about 1,700 feet above the level of the sea. It was formerly noted for its strength; but of late years, according to Hamilton, "has been suffered to crumble into ruin." Distance from Madras, N., 245 miles; Masulipatam, N.W., 52; Calcutta, S.W., 658. Lat. 16° 38', long. 80° 37'.

CONDERPEE DROOG. — A fort in the British district of Bellary, presidency of Madras, 52 miles S. of Bellary. Lat. 14° 22', long. 77° 6'.

CONDRAPILLY. — A town in the British territory of Nagpoor, 67 miles S.W. from Bustur, and 91 miles N. from Rajahmundry. Lat. 18° 19', long. 81° 39'.

CONJEVERAM, in the British district Chingleput, presidency of Madras, a town on the route from Madras to Arcot. It is situated on the Wegawati, a torrent devoid of water during the dry season. The streets are wide, cross each other at right angles, and have a row of cocoanut-trees on each side. The houses are of mud; they are roofed with tiles, and are built in the form of a square, with an inclosed court in the middle: altogether they appear superior to the houses in the country towns of Bengal. The principal inhabitants are Brahmins, of whom there are about a hundred families, and a large number of dancing-girls, kept in honour of Iswara or Siva. The pagodas dedicated to that deity and his consort Kama-churna are represented as "great stone buildings, very clumsily executed both in their

joinings and carvings, and totally devoid of elegance or grandeur, although they are wonderfully crowded with what are meant as ornaments." These pagodas are highly famed in the mythological lore of the Brahmins, and are amongst the most revered and frequented in Southern India. The great gateway of the pagoda, as is usually the case with such structures, is huge and lofty, and from the top, which is reached by seven flights of stairs, there is a view "extremely fine; consisting of extensive woods intersected by a large sheet of water, with numerous pagodas rising among the trees, and a magnificent range of retiring mountains in the distance." Distance from Cuddalore, N., 81 miles; Arcot, E., 27; Bangalore, E., 145; Madras, S.W., 42. Lat. 12° 50', long. 79° 46'.

CONTAI. — A town in the British district of Hijel'ee, lieut.-gov. of Bengal, 65 miles S.W. of Calcutta. Lat. 21° 47', long. 87° 47'.

COOCH BEHAR. — See **KOOSH BEHAR**.

COODAM. — A town in the native state of Jeypoor, one of the hill zemindarries of Madras, 73 miles S. from Jeypoor, and 83 miles W. from Vizianagram. Lat. 18°, long. 82° 14'.

COOGDARRA. — A town in the British district of Mymensing, lieut.-gov. of Bengal, 5½ miles N.E. of Pubna. Lat. 24° 20', long. 90°.

COOMANDA. — A town in the native state of Kareal, on the south-west frontier of Bengal, 12 miles N. from Kareal, and 108 miles S.W. from Sumbulpoor. Lat. 20° 30', long. 82° 44'.

COOMBACOTTA. — A town in the native state of Jeypoor, one of the hill zemindarries of Madras, 10 miles S.W. from Ryaguddah, and 69 miles N. from Vizianagram. Lat. 19° 6', long. 83° 20'.

COOMBARREE. — A town in Hyderabad, or dominions of the Nizam, 93 miles S.E. from Elichpoor, and 93 miles N.E. from Naudair. Lat. 20° 4', long. 78° 23'.

COOMBLA, in the British district of South Canara, presidency of Madras, a town situated on a high peninsula, projecting into a salt-water lake, separated from the sea by a spit of sand, and receiving the water of two rivers, one flowing from the Ghauts, the other, of less size, flowing from some hills a few miles east of the town. In the rainy season, these rivers bring down a body of water, which makes the lake or inlet quite fresh; but during the rest of the year it is as salt as the external sea. The situation of the fort is very fine. The town, once considerable, but now rather decayed, was formerly joined by a bridge to the town of Kanyapoor, situated on the south or opposite side of the narrow inlet by which the lake communicates with the sea. Coombla is distant from Mangalore, S., 19 miles; Madras, W., 360. Lat. 13° 36', long. 75°.

COOMBLA. — See **COOMBLA**.

COOMSEE.—A town in Mysore, 29 miles N.E. from Bednore, and 141 miles N.W. from Seringapatam. Lat. 14° 8', long. 75° 28'.

COOMTA, in the British district of North Canara, presidency of Madras, a town on a creek on the east coast of the Indian Ocean. "It seems to have been formerly a place of some note. Its lanes are straight, and fenced with stone walls, and it has many coconut-gardens. Twice it had the misfortune of having Tippoo's army encamped in its vicinity, and on both occasions it was burned down by some of the irregulars." Salt is made on the banks of the cove, by evaporating the sea-water. Of late years, this place appears to have recovered its former prosperity, from being selected as the port of shipment for the raw cotton produced in the district of Bellary and in the Southern Mahratta country. A road from Dharwar, by Sircy, was opened some time since; but this affording but imperfect accommodation, another was subsequently constructed, opening a communication for wheeled carriages for the entire distance between Dharwar and Coomta. The town is situate about a mile from the port, which, however, is little more than an open roadstead, having a headland running out at its northern termination, which protects the anchorage from the north-west wind, being that which prevails nearly the whole of the trading season, and renders the bay comparatively calm during this part of the year; but it is entirely exposed to the south-west monsoon, and after this commences, it is unsafe for any country vessel to remain there. It is in contemplation to erect a light-house at this place, and to take measures for the improvement of the harbour. Distant N.W. from Mangalore 113 miles, S.E. from Bombay 328, N.W. from Madras 410. Lat. 14° 26', long. 74° 29'.

COOMTY.—A town in the British territory of Nagpore, 145 miles E. from Nagpore, and 22 miles S.W. from Ryepoor. Lat. 21°, long. 81° 22'.

COONDADUM.—A town in the British district of Coimbatore, presidency of Madras, 33 miles S.E. of Coimbatore. Lat. 10° 50', long. 77° 30'.

COONDAPOOR.—The principal place of a subdivision of the same name, in the British district of North Canara, presidency of Madras. It is situate on the south or left side of an estuary receiving five fresh-water rivers, flowing down from the Ghauts. Though this estuary is extensive, it is shallow, and navigable solely for boats and small vessels; and those which ply on it are only canoes. The surrounding country is remarkably beautiful; and an old fort, erected by the Portuguese a short distance inland of the town, commands a noble prospect. General Matthews, preparing for the disastrous expedition in which he perished, made lines around this fort. The town contains about 250 houses, and has long been stationary with respect to increase of size

and prosperity. Coondapoor, and some other posts on the seashore, were in the early part of the sixteenth century seized by the Portuguese, and the more inland tract was included within the great realm of Vijayanagar until its overthrow. In 1565, by a Mussulman confederacy at Telikota; subsequently to which this territory appears to have become part of the state of Bednore; on the overthrow of which by Hyder Ali, in 1763, it became incorporated with his dominions; and when his son, in 1799, fell beneath the attack of the British, it became part of the British district of North Canara. Distance from Mangalore, N., 53 miles; Bombay, S., 390; Bangalore, N.W., 205; Madras, W., 350. Lat. 13° 38', long. 74° 15'.

COONNAGOODY.—A town in the British district of Madras, presidency of Madras, 42 miles E. of Madras. Lat. 10° 7', long. 78° 47'.

COONNOOR, one of the minor sanitary stations on the Neilgherry Hills, in the district of Malabar, presidency of Madras, 6,000 feet above the level of the sea. It is situate on the crest of the hills, in the south-east angle of their summit; the residences of the Europeans, including an hotel, being placed on the rounded tops of a range of hills, which runs from a high mountain called "Coonor Betta," towards the top of the pass; while the bazaar and native residences are in the hollow below, and adjacent to a masonry bridge, which spans a wide stream flowing from the Jakatalla valley, and descending the hills at this point in a large volume of water. A church has been recently erected at this place. The south-west monsoon sets in at this station in the month of June, but with less rigour than at Ootacamund, owing to the clouds, which are charged with rain from the westward, meeting with opposition from the high spurs of the Dodabetta range which intervene. The annual fall of rain here averages fifty-five inches; that at Ootacamund sixty inches. Distant N. from Coimbatore 26 miles. Lat. 11° 21', long. 76° 56'.

COONYGUI.—A town in Mysore, 47 miles N.E. from Seringapatam, and 36 miles W. from Bangalore. Lat. 13° 1', long. 77° 5'.

COORG, a district of Southern India, and recently an independent raj, is bounded on the north by Mysore and the collectorate of Canara; on the east by Mysore; on the south by the collectorate of Malabar; and on the west by Malabar and Canara. While a separate raj, its limits were more extensive; but upon the subjugation of the province by the British, in 1834, the talooks of Pootoor and Umr Sooleay were annexed to the collectorate of Canara. The present district of Coorg lies between lat. 11° 56' and 12° 45', long. 75° 25' and 76° 13', and extends about sixty miles from north to south, and thirty-five from east to west. The area is estimated at about 1,420 square miles. Coorg is a very rugged, and altogether mountainous region, the lowest part being fully 3,000 feet above the sea. The

tract which most nearly resembles a plain, is the valley, about eighteen miles long and thirteen broad, lying between Merfara and Nahnad, which viewed from above, has a level appearance, but when examined more closely, is found to consist of a succession of low ridges, with small narrow valleys, or perhaps rather ravines, between them; the lowest being the bed of the great river Cauvery. The ridges are parallel to each other, and commence in a steep abutment, whence they proceed in a direction south-east, until they terminate in the plains of Mysore or Wynaad. Some of these ranges have on their summits very small table-lands, but in general their tops are sharp ridges. The whole country, with few exceptions, is covered with forests more or less dense, but seldom so overgrown by underwood as to qualify them to be called jungle. To the eastward, however, towards Mysore, in which direction the elevation of the surface diminishes, bamboos make their appearance, and the forest becomes thick jungle, filled with every variety of wild animals. The general declivity of the country is to the north-east and east, as indicated by the course of the Cauvery and its feeders, which flow in that direction, and receive the drainage of nearly four-fifths of the country.

The temperature of the atmosphere in Coorg is low, owing to the elevation of the country, the proximity of the ocean to the south-west and west, and the prevalence of winds from those points. The greatest ranges of temperature are in January and February, amounting to from 53° to 72°; and the weather then is not only cold, but excessively dry. In April and May the heat becomes oppressive during the day, but the nights are almost always cool. The monsoon commences in June, and towards the close of that month the rain falls very heavily, inasmuch that from the 22nd to the 27th of that month, in the year 1835, there fell twenty-seven inches. This weather continues during July, August, and September, the air being loaded with moisture, and the sun seldom seen; at the same time the temperature is wonderfully equable, the extremes in the open air being 56° and 65°. The total fall of rain in one year (1835-1836) was 119 inches, of which 44 were in June. The climate is in general healthful for Europeans, but has an unfavourable influence on those inclined to visceral congestion, asthma, or dysentery. Notwithstanding the excessive moisture, the equality of temperature causes rheumatism, catarrh, or pneumatic affections to be little known. It is a remarkable fact, however, that the climate appears decidedly inimical to the cure of cuts, wounds, and sores, which are often totally unmanageable without change of air. For so circumscribed a tract the zoology is varied and important. Elephants are numerous, and were more so until rewards were given for their destruction; since which, numbers have been shot or taken in pitfalls. Tigers are numerous, but are not so ferocious

as in less-elevated and more sultry regions. Here also are found the leopard, the chita or hunting-leopard, and the tiger-cat. Bears are rare, but exceedingly fierce and dangerous. The wild dog, as large as a greyhound, but much more strongly built, hunt in packs of a dozen or more, is very fierce and attacks and destroys even kine. The elephant attains the enormous height of seventeen hands, and the elk harbours in the secluded wilds.

Previously to the occupation of the country by the British, in 1834, the roads, or rather paths, were very rude, the people discouraging any improvement, as tending to facilitate invasion. The only route which could be considered as a road, was that commencing at Periapatan, in Mysore, proceeding through a thick jungle to Veragenderpetta, and then on by the Huggala or Hingin Ghaut, a very steep descending pass, to Cannanore, in Malabar. This is the worst ghaut in the South of India, being so steep as to be nearly impracticable for laden cattle, and totally so for wheeled carriages; neither is it capable of much improvement, the declivity being in many places one in three feet. A road, commencing also at Periapatan, proceeds westward, but to the north of that just described, through Nunjerajpet to Merkara; but this is a very bad route, and is now nearly disused. At the present time the principal road is that leading from Mysore into Coorg, and thence into Canara. It proceeds from Periapatan north-westward, through Frazerpet to Merkara, and thence by the Sulia or Sumpaji Ghaut, having an easy slope down to Canara, and terminating at Mangalore, being practicable for guns and all sorts of carriages. Another road has been more recently constructed between Canara and Mysore, which passes by the Munjerabad Ghaut, somewhat to the north of the road by the Sumpaji Ghaut. The authorities were induced to sanction the construction of this road by regard to its advantages, as connecting Canara and the important seaport of Mangalore with the towns and districts in the west of Mysore. There are several cross-roads, but these are merely very rude paths, full of large stones, intersected with deep ruts, and passing over steep declivities, which might, by the exercise of an ordinary portion of skill and care, be either avoided or reduced.

The men of Coorg are a handsome athletic race, usually above the middle size, and, with scarcely any exception, well-limbed. The women are not so tall in proportion, but are well made and well looking, though rather coarse, but fair in comparison to the men. Both sexes are laborious and industrious in the practice of agriculture, their main and almost exclusive employment; except that the men shoot and hunt, partly to destroy animals injurious to their crops, and partly for the produce of the sport. They are well clad, the men wearing a turban, and a gown reaching to the feet, and being girt round the waist with a shawl or handkerchief, to which they attach

the formidable Nair knife. The women wear a loose cotton wrapper, reaching from the shoulders to the knees, and a small white cloth tied round the head. Both sexes daily, after their labour, wash the whole body in warm water. A very singular and revolting custom prevails here, different from polyandry, in which each woman has exclusively a plurality of husbands. In Coorg the wives of several brothers are the wives of all. "On the marriage of an elder brother, his wife is considered the property of all the brothers jointly; and as the juniors successively marry, their wives in turn are common to all the brothers." This abominable custom, however, is falling somewhat into disrepute, and its practice becoming more circumscribed. The amount of the population in 1836 was officially returned at 65,437 persons; and the increase in that year was nearly ten per cent. on the total. Since the annexation of Coorg to the British dominions, the revenue has improved, cultivation has been extended, and the general prosperity of the country steadily increased. The only assemblages of dwellings which can with any propriety be denominated towns, are Merkara, Somwarpet, and Verajunderpett. The inhabitants of Coorg are Nairs, and consequently Brahmminists of the Sudra caste; yet, in some respects, they manifest little reverence for the Brahmminical code. Though a barbarous, they are an energetic and brave race, and with unflinching spirit and desperate valour they maintained their independence against the vastly superior power of Hyder Ali and his son Tippoo Sultan, severely retaliating on their oppressors in the campaign of 1791, and materially aiding in their humiliation. By the treaty of that year they were received under the protection of the British government.

In 1832, the sister of the reigning rajah, with her husband, fled from Coorg into Mysore, and claimed the protection of the British resident from the violence of their relative. Under these circumstances, it became the duty of the British authorities to afford the protection implored, without regarding the complaints of the rajah, or the military preparations which he proceeded to make. Various communications passed between those authorities and the prince, whose country, it may moreover be observed, was a prey to the most oppressive tyranny and misgovernment. At length the rajah seized and detained an emissary of the British government, who, with another native, had been despatched to Coorg, under an impression that native negotiation might be more effective than European. This act of violence the rajah defended, on the ground of reprisal for the withholding from his vengeance the fugitive victim of his tyranny. Negotiation was now relinquished; a force of 6,000 men was despatched to punish the outrage, and the government of Madras issued a proclamation to the effect, that the rajah, in consequence of oppression and cruelty to his subjects, the assumption of an attitude of

hostility and menace towards the British government, the encouragement and aid afforded to its enemies, and the imprisonment of the British emissary sent to open a friendly negotiation with him, was no longer to occupy the royal seat. In the beginning of April, the British force, commanded by Colonel Lindesay, entered Coorg from Mysore, and having found the stockades made by order of the rajah deserted, advanced to Merkara, the capital, which, having been evacuated, was occupied without opposition, and the British flag hoisted. Simultaneously with the movement under Colonel Lindesay, a column under the command of Colonel Foulis marched from Cannanore, in Malabar, and ascending the course of the Burrepollai, or Story Piver, penetrated into the heart of the country by the Horgullum Pass, and took the town of Verajunderpet, sixteen miles south of that of Merkara. The enemy made an abortive attempt at resistance, in which they lost about 250 men and four chiefs, the loss on the British side being comparatively insignificant. On the 13th, the wretched rajah surrendered unconditionally. During those operations, a weak column, under Colonel Jackson, marched from Mangalore, and attempted to penetrate the country by a route to the north of that of Colonel Foulis; but, entering a deep rocky ravine, suffered from a fire so deadly and well sustained, that it was obliged to retire, after severe loss, leaving behind the wounded and the whole of its baggage. Another column, under Colonel Waugh, entered the country by a route nearly parallel to that of Colonel Lindesay, but to the north of his line of march, and penetrated to Merkara, though not without suffering very severely in forcing the passage. The country thus subdued was incorporated with the territory of the East-India Company. The annexation of his dominions to those of the British was almost unavoidable, no male branch of the royal house remaining alive to become a claimant of sovereignty. The ex-rajah is now (1856) in England, and receives an annual stipend of 60,000 rupees, subject to the deduction of 40*l.* per mensem, which he has engaged to set apart for the education of his daughter, who has become a convert to Christianity.

COOKLA.—A town in the British district of Ganjam, presidency of Madras, 26 miles W. of Ganjam. Lat. 19° 29', long. 84° 45'.

COOSSY.—A river rising in the British district of Ramghur, presidency of Bengal, about lat. 23° 35', long. 85° 58'. It has a circuitous course, but generally S.E., of 240 miles, and discharges itself into the Hoogly on the right side, in lat. 22°, long. 88° 4'. At Ameenugur, eighty miles from its source, and in lat. 22° 56', long. 86° 45', it receives the Comaree, a considerable torrent. Close to the town of Midnapore and in lat. 22° 24', long. 87° 23', it is crossed by the route from Cuttack to Midnapore, the passage being made by ford during the dry season, and by ferry during the rains;

and at Koilaghat, yet lower down, and only forty miles from its mouth, it is crossed by the route from Calcutta to Midnapore, the passage being effected by ford in the dry season, and ferry during the rains.

COOSY.—A large river tributary to the Ganges. Its remotest source, the Bhotiya Coosy, is, according to Buchanan, in Nepal, amidst the snowy peaks of the Himalaya, and in about lat. $28^{\circ} 25'$, long. $86^{\circ} 11'$. It takes a course first south-west for about sixty miles, then winds south and south-east for 160 more, to lat. $26^{\circ} 45'$, long. $87^{\circ} 13'$, its place of exit from the mountains, from which it descends "by three cataracts, or rather violent rapids." About thirty miles above that place, it on the left side receives the Arun, a great torrent, which, rising in Thibet, flows through a valley dividing the main range of the Himalayas, thus receiving the drainage of both faces of the Snowy Mountains. About ten miles from its junction with the Arun it also receives, on the left side, the Tambur, which rises on the southern face of the Himalaya, and flows through Nepal for about 100 miles, to its confluence. At the place of its exit from the mountains, the Coosy appears to be a greater stream than the Ganges at Hurdwar, and is nowhere fordable, in ordinary years, in its course through the plains. In the upper part of its course, near the mountains, the water, even in summer, retains considerable coolness, and the stream is subject to sudden rise and fall; but it is navigable for small boats downwards from the last cataract. It there takes a southern course, and in lat. $26^{\circ} 37'$, long. $87^{\circ} 12'$, fifteen miles lower down, it touches on the British territory, and forms the boundary between it and Nepal for ten miles, when it enters the British district of Purnea, through which it holds a course due south for eighty miles, to its confluence with the Ganges, in lat. $25^{\circ} 19'$, long. $87^{\circ} 19'$; its total length of course being about 325 miles. During its course through the level alluvial tract of Purnea, it sends off numerous branches, and receives but one considerable stream—the Gogaree, which, flowing from the N.W., joins it on the right side, ten miles above its confluence with the Ganges. Notwithstanding this great loss of volume, it is everywhere a very large stream, having a channel one and a half to two and a half miles wide, with many shoals and islands, through which the river forces its way, forming many alterations among them during its inundations. Even where narrowest, Buchanan found it, when lowest, to have a stream 1,200 feet wide and fifteen deep. From those particulars it may be concluded to be larger than the Jumra, and even the Ghogra.

COOTCOTTAH.—A town in Hyderabad, or dominions of the Nizam, 82 miles S.W. from Hyderabad, and 35 miles N. from Kurnool. Lat. $16^{\circ} 20'$, long. $77^{\circ} 55'$.

COOTUL.—A town in Hyderabad, or dominions of the Nizam, 60 miles S. from Ellich-

poor, and 148 miles E. from Aurungabad. Lat. $20^{\circ} 19'$, long. $77^{\circ} 34'$.

COOTULPORE.—A town in the British district of Burdwan, lieut.-gov. of Bengal, 22 miles S.W. of Burdwan. Lat. 23° , long. $87^{\circ} 40'$.

COPPACHOOR.—The name of a tribe inhabiting a valley between the snowy range of the Himalaya and that known as the Sub-Himalayas. The centre of the territory inhabited by this tribe is about lat. $27^{\circ} 20'$, long. $93^{\circ} 20'$.

COPPA DROOG.—A town in Mysore, distant 120 miles N.W. from Seringapatam, and 29 miles S.E. from Bedenore. Lat. $13^{\circ} 31'$, long. $75^{\circ} 23'$.

COPUL.—A town in one of the recently ceded districts of Hyderabad, or dominions of the Nizam, 51 miles W. from Bellary, and 78 miles E. from Dharwar. Lat. $15^{\circ} 21'$, long. $76^{\circ} 13'$.

CORADA.—A town in the British district of Ganjam, presidency of Madras, 65 miles N.W. of Ganjam. Lat. $19^{\circ} 56'$, long. $84^{\circ} 20'$.

CORALLEA.—A town in the British district of Tipperah, lieut.-gov. of Bengal, 31 miles N.E. of Dacca. Lat. $23^{\circ} 52'$, long. $90^{\circ} 53'$.

CORINGA, in the British district of Rajahmundry, presidency of Madras, a town on the estuary of that branch of the Godavery which opens into Coringa Bay, and which is generally called the Coringa River, its mouth forming the harbour of Coringa. At the entrance is a bar, having twelve or fourteen feet of water at spring tides. Within the bar the depth of water is from two and a half to four fathoms; but measures are in progress for obtaining a greater depth by cutting through the bar. The town, which is a place of considerable trade, is situate on the south side of the estuary. It is the best place on this coast for building or repairing small vessels, there being a considerable number of shipwrights and calkers, who here find constant employment. The place, however, from its low situation, is subject to be overflowed by extraordinary rises of the sea, and in May, 1787, in consequence of a prolonged and very violent gale from the north-east, the sea rushed over the site of the town, swept away all the houses, and in a moment destroyed nearly the whole population, estimated at about four thousand. The deluge overspread the adjacent country for several miles inland, destroying, as is estimated, fifteen thousand people, and upwards of a hundred thousand head of cattle. A similar disaster occurred in 1832, when several vessels were carried into the fields and left aground in elevated situations; one new ship, on the stocks, was swept into the river and lost. Distance from Rajahmundry, S.E., 22 miles; Madras, N.E., 290; Calcutta, S.W., 562. Lat. $16^{\circ} 49'$, long. $82^{\circ} 19'$.

CORLAM.—A town in the British district

of Ganjam presidency of Madras, 11 miles N.E. of Chicacole. Lat. $15^{\circ} 24'$, long. $84^{\circ} 3'$.

COROMANDEL (COAST OF).—Part of the eastern coast of Southern India, forming the shore of the Bay of Bengal. It is considered to commence at Point Calimere, in lat. $10^{\circ} 17'$, long. $79^{\circ} 54'$, and to hold a direction nearly due north as far as Godegum, in lat. $15^{\circ} 20'$, long. $80^{\circ} 10'$. It extends across the estuaries of many rivers and the entrance to the extensive Pulicat lake or inlet; but there is no place within its whole extent where large ships can be sheltered in all weather. Blackwood Harbour, the least objectionable, is open to the north, at which point it might be sheltered by a breakwater; the construction of such a work, however, though practicable, would be enormously expensive. Of the several other places frequented by shipping, none have havens, and ships must be anchored in the open sea, where, during the closing months of the year, they are exposed to the violence of the north-east monsoon. Consequently, the coast is then nearly deserted; and the few navigators who venture to anchor, must be prepared to weigh, cut or slip anchor, and work out to sea on the first setting in of a gale. At all times a heavy sea rolls on shore from the vast expanse of the Bay of Bengal, and causes a tremendous surf, which totally precludes communication from the ships lying at anchor with the land by means of boats constructed on the European plan. These would inevitably be dashed to pieces; and resort is therefore had to the Masula boats, which are flat-bottomed, of the same shape at stem and stern, from thirty to thirty-five feet in length, ten or eleven in breadth, and seven or eight in depth. The planks which form these boats are sewed together with coir yarns, or twine spun from the cocoanut-fibre, crossing the seams over a wadding of the same fibre, which presses on the joints and prevents leakage. The places principally frequented by shipping on the Coromandel Coast are Negapatam, Nagore, Tranquebar, Cuddalore, Pondicherry, Sadras, Madras, and Pulicat. The coast throughout is, with little exception, low and sandy, and the sea shallow near the shore, with sounding gradually increasing with the distance from land. The etymology of the name Coromandel has been variously explained; but it appears that it was originally denominated Choramandal or Cholamandal, which is considered to mean the mandal or region of the Chola, an ancient dynasty of this part of India. The Coromandel Coast comprises the sea-coasts of the British districts Tanjore, Arcot, Chingleput, and Nellore.

CORONGE.—An island about two miles in length from north to south, situate close to a rocky point off the coast of Arracan, which forms a bay, having several rocks and islets. Distant from Cape Negrais, N., 32 miles. Lat. $16^{\circ} 32'$, long. $94^{\circ} 20'$.

CORYGAUM.—A village in the British

district of Poona, presidency of Bombay, on the route from Poona to Ahmedpurgur, 16 miles N.E. from the former. The place is unimportant, but is associated with interesting historical recollections. On the 1st January, 1818, a British force, under the command of Captain Staunton, comprising a detail of artillery, a battalion of infantry, and a small number of auxiliary horse, occupied the village, in which they were attacked by three divisions of the Peishwa's infantry, consisting of about 1,000 men each, supported by immense bodies of horse. The action lasted from noon till nine in the evening, during which period several buildings were repeatedly taken and retaken. On both sides the loss was terrific; but the result was most honourable to the British, who remained masters of the place. In recognition of the gallantry displayed on the occasion by Captain Staunton, a grant of 500*l.* per annum was conferred upon him by the East-India Company. Lat. $18^{\circ} 39'$, long. $74^{\circ} 8'$.

CORTAGERRY.—A town in Mysore, 47 miles N.W. from Bangalore, and 81 miles N.E. from Seringapatam. Lat. $13^{\circ} 31'$, long. $77^{\circ} 17'$.

CORTAPALEYAN.—A town in the British district of Coimbatore, presidency of Madras, 55 miles N.E. of Coimbatore. Lat. $11^{\circ} 33'$, long. $77^{\circ} 35'$.

COSSIMBAZAR, in the British district of Moorsshedabad, lieut.-gov. of Bengal, a town adjoining the city of Moorsshedabad on the south, and in fact a suburb of it. The Bhagirathi, a great offset of the Ganges, here forms, by its winding, a peninsula, at one time insulated, and thence denominated the Island of Cossimbazar. The manufactures of this town were formerly of importance, especially of silk fabrics; but they have much decayed before the irresistible competition of the cheaper wares of Britain. A considerable quantity of silk being produced in the surrounding country, it is generally here prepared for market. Here was formerly a considerable factory belonging to the East-India Company. In 1756 it was taken, without resistance, by Sooraj-oo-dowla, nawab of Bengal. By a careful census in 1820, the number of houses was stated at 1,300; of inhabitants, at 3,538; of which 1,325 Mussulman, 2,213 Brahminical. Distance N.E. from Calcutta, by land, through Berhampore, 120 miles; by water, 163. Lat. $24^{\circ} 8'$, long. $88^{\circ} 18'$.

COSSIPORE.—A manufacturing suburb of Calcutta, situate on the left bank of the river Hooghly, six miles north of Fort William. Here is located the government foundry, represented as one of the most complete and perfect to be seen in any country. During the administration of Lord Hastings, several pieces of brass ordnance cast at this place were sent to England, and submitted to the examination of a committee of artillery officers at Woolwich, who pronounced the workmanship and finish superior to those of the royal arsenal.

Young artillery officers are now required to attend at this establishment for instruction in the casting of guns. The foundry, when in full work, is capable of turning out more than 200 pieces in the year. Lat. $22^{\circ} 38'$, long. $83^{\circ} 26'$.

COSSYAH HILLS embrace the tract of country lying between Assam and Sylhet on the north and south, and Jynteah and the Garrow country on the east and west, and extend from lat. 25° to $26^{\circ} 7'$, and from long. $90^{\circ} 53'$ to $92^{\circ} 11'$. This mountainous region is considered to be advantageously situate as an almost impregnable military post for the north-eastern frontier, arising from its occupying the centre in a line of operations which might be directed against an eastern enemy, and from its possessing natural bulwarks, requiring little aid to render them impenetrable. The Cossyah Hills have been usually regarded as containing much mineral wealth; but the result of their recent geological survey by Professor Oldham does not favour this presumption; neither iron, stone, nor coal, appearing to be abundant. The great body of Cossyahs have not adopted the customs of the Hindoos; they eat beef, and have, apparently, few religious notions. They have neither idols nor temples; but many peculiarly-shaped stones and rocks, as well as streams and groves, are accounted holy; and sacrifices are made to them. Near the villages, on the hills, are likewise to be seen gigantic stone monuments, with doorways, that remind the English visitor of Stonehenge, and are conjectured to have been erected to the memory of departed chiefs and rajahs. In 1826, a direct communication between Assam and Sylhet being considered desirable, an agreement, concurred in by the Cossyah chiefs, was concluded with the chief of Nungklow, under which, in return for British protection against external enemies, and support in the event of internal insurrection, the rajah stipulated to afford a free passage to British troops passing between Assam and Sylhet; to furnish materials for the construction of a road, and to govern his subjects according to established laws. Teerut Singh, with whom this engagement was made, having caused Lieutenants Bellingfield and Burlton to be treacherously massacred, was deposed in 1829, when the district of Nungklow was conferred upon his nephew; and engagements were at the same time entered into with the rajah of Chirra Poonjee, and the other principal chiefs of the country. A few years later the complete establishment of tranquillity was effected in the Cossyah highlands; and the salutary change was ascribed to the substitution of mild for coercive measures, and especially to the restoration of the son of Teerut Singh to the principality forfeited by his father. See also JYNTTEA.

COTA POLLOOR.—A town in the British district of North Arcot, presidency of Madras, 49 miles N.W. of Madras. Lat. $13^{\circ} 45'$, long. $80^{\circ} 4'$.

COTHA, or **KOTA**, in the British district of Jaunsar, a village near the right bank of the Jumna, and about 3,000 feet above its bed. At the time of Hodgson's visit in 1817, it was a poor place, containing about a dozen houses and 190 inhabitants; but it is now much improved, being a neat village, and uncommonly clean, surrounded with thriving cultivation, and possessed of much cattle. It is also a place of great thoroughfare, being on the direct route from the plains to Jumnotri, and also to Theog and Kotgurh. Lat. $30^{\circ} 40'$, long. $78^{\circ} 6'$.

COTIOTE.—See MALABAR.

COTOOR.—A town in the British district of Cuddapah, presidency of Madras, 31 miles E. of Cuddapah. Lat. $14^{\circ} 26'$, long. $79^{\circ} 20'$.

COULY DROOC.—A town in Mysore, 10 miles S.E. from Bednore, and 140 miles N.W. from Seringapatam. Lat. $13^{\circ} 43'$, long. $75^{\circ} 10'$.

COURTALLUM, in the British district of Tinnevely, a small town at the western boundary, towards the territory of Travancore. It is situate in a small recess, in the east side of that great group of mountains in which the southern extremities of the Western and Eastern Ghauts unite; and the site of the town is surrounded on three sides by hills. At this place the group is traversed by a deep narrow valley, allowing an easy communication between the Carnatic and Malabar. The dryness of the air and its low temperature, arising from local peculiarities, have deservedly acquired for this spot a character for salubrity; and it is, consequently, much frequented by invalids during the hot weather. In addition to more substantial advantages, it may be mentioned that the scenery is described as being rich and varied, and the whole enlivened with a series of beautiful waterfalls, forming a *tout ensemble*, the contemplation of which is highly grateful to the eye and soothing to the feelings. The lowest and most conspicuous of the series of waterfalls is nearly 200 feet in height, the water of which being much broken in its descent, forms a favourite bathing-place, where the bathers enjoy the benefit of a shower-bath on the grandest scale. Elevation above the sea 700 feet. Distance from Tinnevely town, N.W., 32 miles; Madras, S.W., 350. Lat. $8^{\circ} 56'$, long. $77^{\circ} 20'$.

COVELONG, in the British district of Chingleput, presidency of Madras, a town on the Coromandel Coast. It is of dangerous approach from the south and south-east, in consequence of a rocky shoal projecting upwards of a mile into the sea in that direction. Here are the ruins of a fort, formerly belonging to the Imperial East-India Company of Ostend, but subsequently acquired by the English, who dismantled it. The locality of Covelong appears to be peculiarly favourable for the production of salt, and it is stated that a pure white description of this article may be

manufactured here at the low rate of four shillings and sixpence per ton. Distance from Cuddalore, N.E., 80 miles; Arcot, E., 62; Madras, S., 21. Lat. 12° 47', long. 80° 18'.

COVILPUTTY.—A town in the British district of Tinnevely, presidency of Madras, 36 miles N.E. of Tinnevely. Lat. 9° 12', long. 77° 56'.

COWLAPOOR.—A town in the British territory of Nagpoor, 152 miles S. from Nagpoor, and 115 miles W. from Bustur. Lat. 19° 10', long. 89° 13'.

COWREAL. in the British district of Jubulpore, Saugor and Nerbudda territory, lieutenant-gov. of the N.W. Provinces, a town on the route from Jubulpore to Punnah, 29 miles N.E. of the former. Lat. 23° 32', long. 80° 10'.

COXE BAZAR.—A town in the British district of Chittagong, lieutenant-gov. of Bengal, situate on the eastern side of the entrance to Mascal Channel, a considerable arm of the sea, flowing between the island of Mascal and the mainland. Lat. 21° 31', long. 92° 6'.

COYELBOODAH.—A town in the British territory of Nagpoor, 151 miles S.E. from Nagpoor, and 73 miles N.W. from Bustur. Lat. 19° 50', long. 81° 5'.

CRANGANORE.—A town of Malabar, with a fort. It is situate on the Cranganore River, called also the Aycotta River. The river has a bar at the entrance, with five or six feet water on it: inside, there are fourteen or sixteen. The place was taken, in 1662 or 1663, from the Portuguese, by the Dutch, who appear to have constructed the fort. In 1789, it was purchased from the Dutch by the rajah of Travancore; in the following year, possession of it was taken by Tippoo Sultan; and at the general pacification which closed the war provoked by the sultan's attack upon Travancore, it was ceded to the British. In this part of India are many Jews; and one section of that extraordinary people, termed White Jews, claim a peculiar connection with Cranganore. According to their account, their ancestors escaped from Jerusalem at the time of its final destruction, and after various migrations, the descendants of the fugitives made their way to the western coast of India, where, in the year of the world 4250, or 490 of the Christian era, the local sovereign granted them a settlement at Cranganore, where they were joined by others of their nation, and in which place they remained about a thousand years; but, as one of their number stated, "discord arising among ourselves, one of our chiefs called to his assistance an Indian king, who came upon us with a great army, destroyed our houses, palaces, and strongholds, dispossessed us of Cranganore, killed part of us, and carried part into captivity." According to tradition, a colony of Syrian Christians settled here in the year 345, and their establishment continued to prosper until the arrival of the Portuguese at the close

of the fifteenth century. By a course of cruel persecution, the greater part of the Syrian believers were constrained to acknowledge the authority of the papal see, which is exercised by the bishop of Cranganore and vicar-general of Ma'abar. Distance from Cochin, N., 19 miles; Calicut, S., 75; Cananore, S.E., 126; Mangalore, S.E., 207; Bombay, S.E., 648; Bangalore, S.W., 211; Madras, S.W., 341. Lat. 10° 14', long. 76° 16'.

CUCHEE.—A doab or narrow peninsula east of the Indus, and between it and the Funjnuud. It is embodied with Dera Ghazee Khan, and with it formed one of the districts of the late Sikh government, yielding it nine lacs of rupees annually. It is everywhere permeated by watercourses from the Indus, and is remarkably well cultivated and productive. Lat. 29° 20'—30°, long. 70° 40'—71° 10'.

CUDAMPILLY.—A town in Hyderabad, or dominions of the Nizam, 59 miles S.W. from Hyderabad, and 80 miles N. from Kurnool. Lat. 16° 56', long. 77° 47'.

CUDDABA.—A town in Mysore, 60 miles N. from Seringapatam, and 52 miles N.W. from Bangalore. Lat. 13° 14', long. 76° 55'.

CUDDABAL.—A town in the British district of Bellary, presidency of Madras, 46 miles W. of Bellary. Lat. 15° 5', long. 76° 17'.

CUDDALORE, the principal place of the southern division of Arcot, presidency of Madras, a town on the Coromandel Coast, situate at the estuary of the river Panar. The river, though having a considerable length of course, is small at its mouth, and closed up by a bar, so as only to admit coasting-craft of moderate size; but measures have been sanctioned for the improvement of the harbour and the erection of a pier. The site of the town is low, being not more than five feet above the sea; and, from this circumstance, the place might be supposed to be insalubrious; but such is not the case, and the new town especially is regarded as peculiarly healthy. The population are in general well lodged, and there are many good houses, arranged in broad regular streets. The old fort, now nearly demolished, is thus described:—"A quadrangle of unequal sides, with an indifferent rampart and ditch, and no outworks, excepting one advanced from its north-eastern angle: a bastion covers each of the other angles, and the curtains are furnished with the imperfect kind of flanking defence obtainable by means of a succession of bastions placed in a prolongation of one and the same straight line." The town is the principal civil station of the zillah or district. Distant from Madura, N.E., 170 miles; Tanjore, N.E., 77; Arcot, S.E., 84; Madras, S., 100. Lat. 11° 48', long. 79° 50'.

CUDDAPAH.—A British district under the presidency of Madras, named from the principal place within it. It is bounded on

the north by Kurnool and the British district of Guntoor; on the east by the British districts Guntoor and Nellore; on the south-east by the British district of Arcot (the northern division); on the south-west by the territory of Mysore; and on the west by the British district of Bellary. It lies between lat. $13^{\circ} 12' - 16^{\circ} 19'$, long. $77^{\circ} 52' - 79^{\circ} 48'$, and comprehends an area officially returned at 12,970 square miles. The mountains of this district form an uninterrupted chain of great extent, consisting of numerous parallel and continuous ridges, which rise abruptly from the plains, and traverse the whole length of the district, constituting part of the Eastern Ghats. The general slope of the country is to the east; the plains eastward of Bellary and Gooty having an elevation of 1,182 feet, while the depression in which the town of Cuddapah is situate, is only 507 feet above the level of the sea; and the more eastern limit of the district has an average height of 450 feet. The numerous streams which intersect the district consequently flow in that direction, discharging themselves into the Bay of Bengal. The principal river is the Northern Pennar. The most prominent characteristics of the climate are great heat during the day, and oppressive closeness and stagnation of air during the night; and from these conditions of the atmosphere results its enervating influence on the European constitution.

Of trees the most remarkable and valuable are the teak, blackwood, cocoanut-palm, date-palm, palmyra, babul or *Acacia arabica*, nim or margosa, and bamboo. The best soil is the regur, or black cotton-ground, in some places mingled more or less with calcareous matter, imparting to it a higher colour, and more open and friable texture. The principal alimentary crops are rice, ragi (*Eleusine coracana*), bajra (*Holcus spicatus*), jowar (*Holcus Sorghum*), chenna (*Cicer arietinum*), dhal (*Cytisus cajan*), wheat, oil-seeds, and sugar-cane. Amongst the principal commercial crops may be mentioned tobacco, indigo, and kusum (*Carthamus tinctorius*). "Cotton is cultivated to considerable extent in this district." The most common fruits are the mango, tamarind, plantain, and water-melon. Less abundant are the guava, peach, lime, citron, jack, pomegranate, and grape. Such manufacturing industry as is found, is employed on cotton piece-goods, muslins, blankets, and other coarse woollens; in the preparation and use of indigo and other dyes; in the working of gold, silver, and other metals; and in pottery. The exports consist of cotton piece-goods, coarse woollens, a small quantity of silken fabrics, sugar, grain, and tobacco: the imports are betel, iron, steel, copper, and some other articles of less importance. The language spoken is the Canarese. The population is given under the article MADRAS. The district is traversed by one of the lines of the Madras Railway Company. There is also a good ordinary road in a direction from south-east to north-west, and leading

from Madras to Cuddapah, and thence to Bellary. There are, besides, routes of inferior description. 1. From south to north, from the cantonment of Cuddapah to Hyderabad, through the Murkundah Pass. 2. From east to west, from Nellore to the cantonment of Cuddapah. 3. From north-east to south-west, from the cantonment of Cuddapah to Bangalore. The principal places—Cuddapah, the locality of the military and civil establishments of the district, Sidhout or Siddawattan, and Rachuti or Roychoty—are described under their respective names in the alphabetical arrangement.

In 1846 this collectorate was the scene of serious disturbances, originating, it is believed, in a feeling of distrust towards the government, occasioned by the adoption of measures affecting the prescriptive rights of landed property. These, however, were speedily suppressed; and the home authorities, upon the subject being brought before them, having directed that long undisturbed possession should be regarded as sufficient evidence of the existence of such rights, the district shortly after resumed its wonted tranquillity. The Ceded Districts, of which Cuddapah forms the eastern division, came into the possession of the East-India Company in the year 1800, by a treaty concluded with the Nizam, subsequently to the partition of the dominions of Tippoo Sultan.

CUDDAPAH, situate in the British district of the same name, under the presidency of Madras, a military cantonment five miles south-west of the right bank of the Northern Pennar or Pennaur, and immediately on the banks of the river Bogawunka. The cantonment is on a declivity, rising gently from the latter river, and contains two barracks for the accommodation of Europeans, substantially built of brick and lime-mortar, lying parallel to each other, each extending about sixty feet in length by sixteen in breadth; and spacious lines for native infantry, besides an hospital, and other requisite buildings. The military force stationed here amounts to about 1,000 men. Here are also the civil establishment for the district, and the jail, which is situate nearly in the centre of an old fort, and has a slightly elevated site, considered to be salubrious. It was erected in 1813, and consists of several buildings in separate and spacious inclosures, suited for the classification of the inmates. One of the lines of the Madras Railway Company passes close to the town. Elevation above the sea 507 feet. Distance from Bellary, S.E., 138 miles; Bangalore, N.E., 134; Vellore, N., 110; Nellore, W., 78; Guntoor, S.W., 169; Madras, N.W., 139. Lat. $14^{\circ} 28'$, long. $78^{\circ} 52'$.

CUDDAPUERUM.—A town in the native state of Travancore, 31 miles N. from Quilon, and 49 miles S.E. from Cochin. Lat. $9^{\circ} 20'$, long. $76^{\circ} 39'$.

CUDDEAPUTNUM.—A town in the native state of Travancore, 31 miles S.E. from

CUD—CUT.

Trivandram, and 19 miles N.W. from Cape Comorin. Lat. $8^{\circ} 9'$, long. $77^{\circ} 20'$.

CUDDOOR.—A town in Mysore, 90 miles N.W. from Seringapatam, and 91 miles N.E. from Mangalore. Lat. $13^{\circ} 33'$, long. $76^{\circ} 4'$.

CUDDUTURITTEE.—A town in the native state of Travancore. 21 miles S.E. from Cochin, and 61 miles N. from Quilon. Lat. $9^{\circ} 45'$, long. $76^{\circ} 33'$.

CUHMUR, in the British district of Ghazepoor, lieut.-gov. of the N.W. Provinces, a town on the route from Benares to Dinapore, 50 miles E. of the former. Lat. $25^{\circ} 26'$, long. $83^{\circ} 50'$.

CUKKOLUM.—A town in the native state of Travancore, 30 miles S.E. from Trivandram, and 20 miles N.W. from Cape Comorin. Lat. $8^{\circ} 15'$, long. $77^{\circ} 22'$.

CULDINDY.—A town in the British district of Masulipatam, presidency of Madras, 28 miles N.E. of Masulipatam. Lat. $16^{\circ} 30'$, long. $81^{\circ} 21'$.

CULLOOR.—A town in the British province of Nagpoor, or lapsed estate of the rajah of Berar, 59 miles N. from Rajahmundry, and 81 miles S.W. from Bustar. Lat. $18^{\circ} 10'$, long. $81^{\circ} 22'$.

CULLYCOTA.—A town in the British district of Ganjam, presidency of Madras, 20 miles N. of Ganjam. Lat. $19^{\circ} 38'$, long. $85^{\circ} 9'$.

CULNA, in the British district of Burdwan, lieut.-gov. of Bengal, a town on the right bank of the river Hooghly, on the route from Cutwa to the town of Hooghly, 26 miles E. of Burdwan. It is a place of considerable trade, its business having greatly increased in consequence of its being found a convenient station for steamers plying between Calcutta and the North-West Provinces. Culna is said to have 60,000 inhabitants, the chief part of whom are from different parts of the country carrying on trade there. Lat. $23^{\circ} 14'$, long. $88^{\circ} 20'$.

CULNA.—A town in the British district of Jessore, lieut.-gov. of Bengal, 32 miles E. of Jessore. Lat. $23^{\circ} 13'$, long. $89^{\circ} 42'$.

CULPETTA.—A town in the British district of Malabar, presidency of Madras, 34 miles N.E. of Calicut. Lat. $11^{\circ} 39'$, long. $76^{\circ} 10'$.

CUMBAKONAM.—See COMBAKONUM.

CUMBUM.—A town in the British district of Madura, presidency of Madras, 59 miles W. of Madura. Lat. $9^{\circ} 41'$, long. $77^{\circ} 20'$.

CUMMADA.—A town in Nagpoor, 86 miles N.W. from Rajahmundry, and 95 miles S.W. from Bustar. Lat. $18^{\circ} 1'$, long. $81^{\circ} 14'$.

CUMMUM.—A town in the British district of Cuddapah, presidency of Madras, 79 miles N. of Cuddapah. Lat. $15^{\circ} 34'$, long. $79^{\circ} 10'$.

CUNCHAKACHERLA.—A town in the

British district of Masulipatam, presidency of Madras, 49 miles W. of Ellore. Lat. $16^{\circ} 41'$, long. $80^{\circ} 27'$.

CUNCHINCULL DROOG.—A town in Mysore, 83 miles N.W. from Seringapatam, and 59 miles N.E. from Mangalore. Lat. $13^{\circ} 17'$, long. $75^{\circ} 39'$.

CUNDOOR.—A town in the British district of Cuddapah, presidency of Madras, 59 miles S. of Cuddapah. Lat. $13^{\circ} 39'$, long. $78^{\circ} 54'$.

CUNDYKAIRA.—A town in Mysore, 76 miles N. from Seringapatam, and 128 miles N.E. from Mangalore. Lat. $13^{\circ} 30'$, long. $76^{\circ} 39'$.

CURRABAGUDDY.—A town in the British district of Bellary, presidency of Madras, 81 miles S.W. of Bellary. Lat. $14^{\circ} 45'$, long. $75^{\circ} 50'$.

CURRAH.—See KURRAH.

CURREEGONG.—A town in the British district of Rungpore, lieut.-gov. of Bengal, 23 miles N.E. of Rungpore. Lat. $25^{\circ} 46'$, long. $89^{\circ} 38'$.

CURRICHPORE.—A town in the British district of Bhagulpore, lieut.-gov. of Bengal, 30 miles W. of Bhagulpore. Lat. $25^{\circ} 5'$, long. $86^{\circ} 32'$.

CURSALEE, in the native state of Gurwhal, a village, the last and highest to be met with in ascending the valley of the Jumna towards Jumnotri, from which it is distant three miles south-west. It consists of forty or fifty houses solidly built of stone, bonded with squared beams of timber, the exterior of which is grotesquely carved with images of Hindoo deities. There are a few small patches of tolerably level and fertile ground about the village, and on those is cultivated grain sufficient for the population. Lat. $30^{\circ} 57'$, long. $78^{\circ} 29'$.

CUTCH.—A native state under the political superintendence of the government of Bombay. It is bounded on the north-west and north by the province of Sind; on the east by the dominions of the Guicowar; on the south by the peninsula of Kattywar and the Gulf of Cutch, and on the south-west by the Indian Ocean. Its limits, inclusive of the great salt marsh termed the Runn, extend from lat. $22^{\circ} 47'$ to $24^{\circ} 40'$, and from long. $68^{\circ} 26'$ to $71^{\circ} 45'$. Its greatest length from east to west is 205 miles, and its breadth from north to south (which is nearly equal throughout its whole extent) 110 miles. The area, exclusive of the Runn, is 6,764 square miles, and its population is returned at 500,536. This long narrow tract, interposed between the desert and the sea, forms a connecting link between Guzerat and Sind. Two mountain-ranges intersect the country. The principal, termed the Lunkhi, nearly bisects the province from east to west; the other runs in a parallel direction, but more to the northward. Both are of moderate height. The most remarkable

hill of the range first mentioned is the Nunow, rising from the centre of the province, and well known to navigators from its height and sugar-loaf form. The northern chain is in like manner distinguished by the Judria, a hill of similar form, from the materials of which are fabricated the millstones of Cutch. Indications of volcanic action are observable along the bases of the hills, where an extensive surface is overlaid with basaltic eruptions, and the rocks bear evidence of having been rent asunder by the effects of fire. Earthquakes have, indeed, been experienced to a very recent period, showing that these operations have not yet ceased. In July, 1819, a severe shock was felt throughout Cutch, the effects of which were so violent that every fortification in the country was shaken to its foundations, and several hundreds of the inhabitants perished. Among the remarkable phenomena of this convulsion of nature, were the upheaving of an enormous mound of earth and sand many miles in extent, and the simultaneous submergence of an adjacent tract of country. Allah Band, or the Band of God, is the name which has been given by the natives to the mound, in allusion to its not being the work of man.

Though the province is of small dimensions, and sterile in its character, owing to the sandy nature of the soil, there are, notwithstanding, several fertile tracts. These are chiefly comprised in the valley between the two mountain-ranges already noticed, and in the extensive plain stretching south of the Lunkhi hills, nearly to the coast, where it is skirted by a border of sand extending from the Indus on the west, to the head of the Gulf of Cutch on the east. On the opposite, or northern side of the province, beyond the second range of mountains, the entire frontier is fringed by a broad belt of luxuriant pasture, called the Bhumi. Like Sindh, of which Cutch probably once formed part, the country is characterized by a deficiency of water. During the prevalence of the south-west monsoon, numerous torrents descend from the mountains, both in a northerly and southerly direction; but there are no permanent rivers in the province, the beds of the streams becoming dry with the cessation of the rains. No reliance, moreover, can be placed upon any considerable supply from tanks or artificial lakes, inasmuch as, owing to the porous character of the subsoil, such reservoirs are quickly exhausted by filtration. Wells, however, are abundant, and excellent water is obtained by penetrating the rock underlying the more recent formations.

Some mineral productions are obtainable in Cutch. Coal and iron have both been found, the former at Jamutra and the latter in the vicinity of Bhooj. Alum is obtained in considerable quantities by boiling the waters of the mountain springs in the neighbourhood of Lukput, whence it is exported, chiefly to Bombay, for the purposes of dyeing. There is a scarcity of timber both on the mountains and in the plains: the former are covered with

low brushwood; but the trunks of decayed trees, constantly met with in the Lunkhi range, induce the belief that its sides were formerly clothed with forests. Plantations of peepul and babool occasionally surround the villages; the date-tree is more common, but the mango, banyan, and tamarind are rare. Of commercial crops, cotton is the principal; the soil of the most productive tracts being peculiarly favourable to the growth of this staple article. Sugar-cane is cultivated, but its quality is represented as inferior. Jowar, bajree, and the common grains of India, are the chief alimentary products. Though the country boasts of no great variety of fruits, none surpass it in the excellence of its grapes and musk-melons. Among the domestic animals, the horse is held in high estimation: it is remarkable for a bony head and cheeks, a thin and long neck, and large sparkling eye, with small soft ears. Kine, though of inferior breed, are abundant, as are also buffaloes and camels. The wild animals are, the tiger, leopard, wolf, hyena, jackal, and fox. The wild ass roams in the Runn. This salt marsh consists of two principal portions, the larger bounding Sindh on the south-east, and the smaller being connected at its western extremity with the Gulf of Cutch. The Great Runn extends between lat. $23^{\circ} 23' - 24^{\circ} 42'$, long. $69^{\circ} 50' - 71^{\circ} 20'$; is about 160 miles in length from east to west, and 80 in breadth from north to south. Its area is estimated by Burnes "at the enormous space of 7,000 square miles." Throughout this wide expanse there are, however, several islands, or more elevated tracts, and some of considerable extent. Burnes does not consider the term *maria* a correct appellation for this singular tract. He points out that "it has none of the characteristics of one; it is not covered or saturated with water but at certain periods; it has neither weeds nor grass in its bed, which, instead of being slimy, is hard, dry, and sandy, of such a consistency as never gives way, unless a long continuance of water on any individual spot have converted it into clay, which is rare; nor is it otherwise foamy or swampy. It is in reality but the dried-up bottom of an extensive inland sea, which, from having once been overwhelmed with water, more readily receives what flows into it, from being lower than other parts of the country." Burnes conjectures that the desiccation of the bed of this conjectural sea has resulted from its elevation by the upheaving of the earth, caused by one of those earthquakes so common in this part of India. To such an origin he attributes the saltness of the Runn, as well as to numerous saline streams flowing into it from the north and north-east. "So salt is the Runn, that it is often encrusted with it an inch deep, the water having been evaporated by the sun; and even lumps of salt may be picked up as large as a man's fist, and beautifully crystallized." During the monsoon, the Runn is flooded by sea-water blown into it, as well as by fresh

CUT.

water derived from the rains, or discharged into it by the various swollen rivers. In the dry season, fresh water is never to be had anywhere, except on the islands or rocky elevated spots; and there it is scarce. The Runn is throughout devoid of herbage, and vegetable life is discernible only occasionally in a tamariak-bush, growing by means of the rain-water falling near it. The sirab, or mirage, prevails here very vividly, and highly magnifies objects, so that patches of shrubs sometimes resemble forests, and wild asses, the only quadrupeds to be seen in this desolate tract, appear as large as elephants. During the dry season, when the sun shines, the Runn may be mistaken for a great expanse of water, in consequence of the reflection of light from the glazed saline surface. Flies are so numerous on the Runn, that it is almost impossible to breathe without swallowing some; and though they do not bite, it is very difficult to force a horse through their swarms. The smaller Runn is situate between the territory of Cutch and that of Guzerat, and communicates with the Great Runn, at the south-east of which it lies, by a narrow strip of similar formation. It extends between lat. $23^{\circ} 5' - 23^{\circ} 45'$, long. $70^{\circ} 45' - 71^{\circ} 50'$, and in outline approaches an isosceles triangle, the base of which extends from east to west about 70 miles, the area being about 1,600 square miles. The western extremity of the base adjoins the eastern extremity of the Gulf of Cutch. These two saline wastes differ little from each other in their physical qualities, and few tracts of similar magnitude are so totally unproductive, salt being the only valuable commodity obtainable from them.

The political relations of the East-India Company and the government of Cutch first assumed a formal character in 1809. The articles of agreement then entered into were four, relating respectively to the protection of Guzerat from aggression on the part of Cutch; the settlement of certain claims of the Rao of Cutch on territory lying on the Guzerat side of the gulf; the suppression of piracy, and the exclusion from Cutch of Europeans and Americans. Some of these articles appear to have been but inadequately observed on the part of the rulers and people of Cutch, and in 1815 it became necessary for the British government to take hostile proceedings. The result was, the conclusion, in January, 1816, of a treaty, embodying and rendering more stringent the provisions of the former articles, and containing arrangements for the limitation of the employment of Arab mercenaries in Cutch, for the receipt of military aid from the British government, and for other purposes. By one article of this treaty, the fort of Anjar, with certain villages, were conveyed to the British government; besides which, the Rao bound himself to an annual payment of a stipulated sum. By another, he engaged to make good the losses sustained from the depredations of the people of Cutch in Kattywar, and also to

defray the military expenses rendered necessary by these outrages. But by a supplemental treaty, dated the 18th June, 1816, the British government released the Rao from the payment of the military charges—upwards of 80,000*l.*, and also from the annual tribute. Thus matters stood till 1819, when, in consequence of his misgovernment, the Rao was deposed, and his infant son raised to the throne. By treaty, dated the 13th October, in the last-mentioned year, the previous treaty was confirmed, so far as it was unaltered by the new one, a council of regency was appointed to act during the minority of the Rao, and, among other points, stipulations were made for the maintenance of a British force for the defence of Cutch, at the discretion of the British government; for prohibiting negotiation with any chief or state, except by permission; for the adjustment of disputes by the arbitration of the British, and for mutual freedom of trade between British ports and those of Cutch. In May, 1822, the arrangements of the treaty of 1816 were modified by a new treaty, under which the territorial cessions made by the Rao in 1816 were restored, in consideration of a pecuniary equivalent. The sum fixed, 88,000 rupees per annum, was subsequently thought too large, and in 1832 the arrears, amounting to a considerable sum, were remitted, and all future payments on this account relinquished. The subsidy thenceforward payable for the military force stationed in Cutch was fixed at 2,00,000 rupees per annum, subject to reduction in the event of a diminution of the force; and in case the latter should be altogether withdrawn, or so reduced that the charge should not exceed the amount of the Anjar compensation, viz. 88,000 rupees, then that amount only to be demandable. In December, 1835, it was discovered that a considerable traffic in slave children was carried on between Arabia and the ports of Cutch. The British government resolved to take measures for its suppression, whereupon the Rao issued a proclamation prohibiting the inhuman practice. Under the influence of British counsel, various other measures of a salutary and beneficent character have been adopted; suttee has been abolished, and the complete suppression of infanticide is anticipated. The revenue of the Rao amounts to 7,38,423 rupees, or 73,842*l.*, and the military force maintained by him consists of a body of irregular horse, in no way subject to the control of the British government. A number of feudatory chiefs, boasting descent with the Rao from a common ancestor, enjoy an amount of revenue, and exercise unlimited authority within their respective domains. Of these chiefs, the following account is given by a former governor of Bombay:—"The family of these chiefs is derived at a recent period from Tatta in Sind, and they all sprung from a common ancestor, Humeerjee, whose son, Rao Khengar, acquired the sovereignty of Cutch before the middle of the sixteenth century of our era. The number of these chiefs is at

present about 200, and the whole number of their tribe in Cutch is guessed at 10,000 or 12,000 persons. This tribe is called Jhareja. It is a branch of the Rajputa. The Rao's ordinary jurisdiction is confined to his own demesne, each Jhareja chief exercising unlimited authority within his lands. The Rao can call on the Jharejas to serve him in war; but must furnish them with pay at a fixed rate while they are with his army. He is the guardian of the public peace, and as such chastises all robbers and other general enemies. It would seem that he ought likewise to repress private war, and to decide all disputes between chiefs; but this prerogative, though constantly exerted, is not admitted without dispute. Each chief has a similar body of kinsmen, who possess shares of the original appanage of the family, and stand in the same relation of nominal dependence to him that he bears to the Rao. These kinsmen form what is called the bhyand or brotherhood of the chiefs, and the chiefs themselves compose the bhyand of the Rao."

CUTTACK, a British province, named from its principal place, lies within the presidency of Bengal, and is divided into three districts: the northern, of Balasore; the central, or Cuttack proper; and the southern, or Pooree. It is bounded on the north by the British districts of Midnapore and Hijeljee; on the north-west by the petty native states known as the Cuttack Mehals; on the west by the Mehals and the British district of Ganjam; and on the east and south-east by the Bay of Bengal. It lies between lat. $19^{\circ} 40' - 21^{\circ} 45'$, long. $85^{\circ} 8' - 87^{\circ} 31'$, and has an area of 7,635 square miles. The seacoast, forming part of the north-western boundary of the Bay of Bengal, extends in a direction generally from south-west to north-east, from Priaghy, near the southern extremity of Chilka Lake or inlet, in lat. $19^{\circ} 42'$, long. $85^{\circ} 40'$, to a point seven miles east of the mouth of the river Soobunreeka, in lat. $21^{\circ} 37'$, long. $87^{\circ} 30'$. It is by seamen called the Orissa coast. In the southern part along the shore is a low level expanse, beyond which inland appear several "saddle-hills," terminating a chain of mountains extending along the coast to the southward. Between those hills and the low sandy shore, is the extensive Chilka Lake or inlet, communicating with the sea by means of a narrow strait, in lat. $19^{\circ} 42'$, long. $85^{\circ} 40'$; at a short distance from which a sand-bank is said to project two miles into the sea, rendering dangerous the close approach of shipping to the coast. The navigator, continuing his course to the north-east, is struck by the appearance of Pooree, with its three pagodas of Juggernaut, at the mouth of the most southerly estuary of the Mahanuddee, and in lat. $19^{\circ} 49'$, long. $85^{\circ} 54'$. At this point commences the delta of the Mahanuddee, the shore of it extending north-east for eighty miles, to lat. $20^{\circ} 35'$, long. $86^{\circ} 40'$. It is low and swampy, resembling the Sunderbunds at the estuaries of the Ganges,

being intersected by numerous sluggish winding streams, influenced by the tide, and infested by innumerable alligators of great size and voracity. The soil is in general a deep mud, overgrown with coarse grass and brushwood, and containing many morasses, quagmires, and quicksands, perplexing and dangerous to travellers. The Black Pagoda, another vast monument of Brahminical superstition, is seen on the coast nineteen miles north-east of the temples of Juggernaut. Further onwards is False Bay, having at its extremity two points, the southernmost known as False Point, the other as Point Palmyras, and also called True Point. Point Palmyras is a low sandy tongue of land, covered with Palmyra palms, and having on each side a channel, each the mouth of the river Brahmunnee, that to the south being navigable for small coasting craft. It does not appear that any of the numerous estuaries of the Mahanuddee are navigable for vessels of any considerable size. Above Point Palmyras, the coast takes a direction which forms the extensive bay, terminated by the south-westernmost banks at the mouth of the Hooghly, and called by European seamen Balasore Roads. This bay "affords good anchorage, the bottom being mostly stiff blue clay, intermixed with sand at times, or small stones." Inland, or westward of the low swampy maritime tract, extends the Moghalbandi, a dry tract, with a sandy soil, in general much mixed with gravel and calcareous conglomerate. It is for the most part hungry and unproductive, and large plains occur totally unfit for cultivation, where low stunted brushwood is the only specimen of vegetation. In the more favoured parts, however, there are fine groves of mango-trees, dense thickets of luxuriant bamboos, noble specimens of the banian (*Ficus indica*), and various wild flowering shrubs. Inland, and westward of this tract, and in some measure parallel to it, is the hill country, closing down towards the seacoast, in the vicinity of Chilka Lake, in the southern part of the district, and also at its northern extremity, where, near Balasore, a group of rocky picturesque hills project boldly to within sixteen or eighteen miles of the shore. These mountains, denominated Nilgiri or Blue Hills, were, through a whimsical corruption of sounds, called by the earlier English navigators the Nelly Green Hills. In intermediate parts between those extremes, the distance of the high land from the coast increases in some places to sixty or seventy miles. The hills visible from the low country, between Point Palmyras and the Chilka Lake, occur generally in irregular, scattered groups, having peaked and waving summits, which seem to cross each other at all angles, or are isolated, conical, and wedge-shaped hills, wholly disconnected at their bases. Iron is abundantly diffused throughout the whole of the Cuttack hills, in the state of pisiform iron-ore, earthy-red iron-ore, and ochrey-red iron-stone.

CUT.

The principal rivers are the Mahanuddee, the Brahmunnee, and the Byturnee. There are many other streams and torrents flowing from the mountains, all holding a course generally south-eastward, and falling into the Bay of Bengal, into the greater streams already described, or into the Chilka Jhil or lake. This shallow but extensive piece of water stretches, in the southern part of the district, for about forty-two miles in length, from north-east to south-west, and sixteen in breadth, being for many miles divided from the sea merely by a strip of sand not more than 300 yards in width. It communicates with the sea by a narrow channel, and its water is saline, yielding, by means of solar evaporation, large quantities of culinary salt. It abounds with excellent fish. Numerous islands abridge the extent of water-surface; and where these do not intervene, the water is shallow. The general depth is only four or five feet, the greatest does not exceed six, and the lake is considered to be in the course of being rapidly filled up by the silt swept into it by the numerous torrents of which it is the reservoir.

The climate, in general, in the low alluvial tract along the seashore, is characterized by great insalubrity, resulting from the malaria of the swamps, which produces fevers and agues. The southern parts of the seacoast, however, in the vicinity of Pooree or Juggernath, and Kanarak or the Black Pagoda, having dry sandy soil, and during the greater part of the year being favoured with a brisk refreshing sea-breeze, enjoy a healthful climate, both in the hot and cold months, with a very bracing atmosphere during the latter; but in the rainy season the wind sets from the land, and renders the climate both unpleasant and unhealthy, as in most parts of India. The coast has sometimes been extensively inundated, in consequence of the level of the sea having been raised by violent hurricanes, of which one occurred in 1831, and another in the following year, when upwards of 20,000 human beings perished, and more than 50,000 head of cattle. Though the low tract along the coast is nearly devoid of timber-trees, they are numerous in the interior. The most important are the sal (*Shorea robusta*), which appears to be obtainable of useful size in any required quantity; the pyraeal (*Buchanania latifolia*), the gamhar (*Gmelina arborea*), sisu (*Dalbergia Sisu*), the mango, the bur (*Ficus indica*), the pipal (*Ficus religiosa*), together with a vast variety of trees and shrubs, yielding drugs, dyes, and wild fruits relished by the natives. The woodlands also produce lac, wax, honey, and various kinds of resins. In some parts of Cuttack there are wild elephants, supposed not to be indigenous, but to have sprung from domesticated individuals, which have escaped and relapsed into the wild state. Of other wild animals, there are the tiger, panther, leopard, hyena, bear, jackal, otter, wild dog, wild swine, wild buffalo, deer, and antelope. There is also a gigantic bovine quadruped,—the gayal, larger than the

bull, having huge horns; and a large kind of antelope, called by the natives the gloranga, and resembling the nylgau (*Antilope picta*). There are also monkeys, the porcupine, and the ichneumon. Buffaloes are the most valuable domestic animals; the others, which are kine, sheep, swine, and goats, being of diminutive breeds. The principal crops are rice, jowar (*Holcus Sorghum*), bajra (*Holcus spicatus*), raji (*Eleusine coracana*), oil-seeds, opium-poppy, tobacco, indigo, and cotton in small quantities. Some experimental attempts made to introduce improvement in the production of the last-named article failed, and were consequently abandoned. The manufactures are few and insignificant, being principally coarse cotton cloths, for the wear of the poor natives, a small quantity of fine muslins, and thick cotton quilts. The population is given under the article BENGAL. The majority consists of Brahminists, not more than a tenth of the whole being Mussulmans. From Balasore rice is said to be exported in favourable seasons. Some other exports take place, but their value is very small; and it appears that, during a period of five years, the imports greatly exceeded them. Cuttack is not one of the permanently settled districts, but a settlement has recently been effected for a term of years. Cuttack and Balasore, as well as Koordah, Pooree, and Kanarak, the principal towns, are described under their respective names in the alphabetical arrangement. The routes are—1. From north-east to south-west, from Calcutta, through the town of Cuttack to the Circars; 2. from the town of Cuttack to Kamptee and Nagpore; 3. from north to south, from the town of Cuttack to Pooree.

Cuttack was among the latest of the Mahomedan acquisitions in India. The decline of the ancient royal house of Orissa dates from the death, in 1524, of Rajah Pertab Rudra Deo, an event which the monarchy was not destined long to survive. Its downfall may be regarded as completed in 1592, when a lieutenant-governor arrived from the Mahomedan kingdom of Bengal to assume charge of the administration. From this time the province appears to have formed part of the possessions of the ruler of Bengal till 1750, when it was invaded by the Mahrattas, and became tributary to the rajah of Nagpore. The chout, or tribute, amounted to 40,000*l.* per annum. After the lapse of a few years, during which the resources of the country seem gradually to have decayed, difficulty was experienced in discharging the obligation; whereupon the Bengal chief proposed that he should be absolved from the stipulated payment, and that the rajah of Nagpore should take possession of the territory, and undertake its management through his own officers. The proposal being acceded to, the province of Cuttack, in 1756, passed to the Mahrattas. Under their administration it appears to have experienced the anarchy, and to have been subjected to the

rapacity, which were the unfailing characteristics of their rule. During the Mahratta war of 1803, the occupation of Cuttack formed part of the British plan of military operations. This service was performed by Colonel Harcourt, who, having taken possession of Juggernaut, proceeded to reduce the fort of Barabuttee, situate about a mile from the town of Cuttack. Its capture took place on the 14th October, 1803, and the victory was followed by the entire submission of the province. Among the results of the conquest was the subjection to British supremacy of the group of native states known as the Cuttack Mehals. These are eighteen in number; viz. Angool, Autgur, Banky, Berumbah, Dhenkanaul, Hindule, Kundiapurra, Neelgur, Nursingpoor, Nyagur, Runpoor, Talchur, Tiggreh, Autmalik, Boad, Duspulla, Koonjerry, and Mohurbunge. In the aggregate they contain an area of 16,929 square miles, and a population of 761,805. Within this extensive tract the land fit for tillage bears a trifling proportion to the space occupied by rock and jungle, or covered by forests producing the finest timber. The sal-tree is particularly sought after, from the size it attains, especially in the hill state of Duspulla, whence is procured the timber annually required for the car of Juggernaut. Many years since a British superintendent was appointed, with a view to establish such a control over the conduct of the rajahs as might prevent the commission of crimes and outrages. The abolition of suttee is one of the beneficial measures arising from this appointment.

CUTTACK.—The principal place of a British district of the same name under the presidency of Bengal. "The extent, appearance, and population of the town," says an observer, "are not unsuitable to its rank as the capital of a large province. Its situation on a tongue of land or peninsula near the bifurcation of the Mahanuddee is commanding in a political and commercial point of view, though these advantages have been in some degree counterbalanced by the outlay incurred in defending it by stone revetments from the encroachments of the rivers which wash two of its sides." The fortifications are in a ruinous state, and their materials are fast disappearing, the stones being carried away and used in various public works, among others in the lighthouse at False Point, and in the macadamization of the cantonment roads. This old fort, says a recent observer, "deviates little from a regular parallelogram, having its longest faces to the north and south, the river running parallel with the former; at a short distance from it. The walls were originally defended by high square bastion towers projecting at different distances: the place could never at any time have offered much resistance, as the walls were barely five feet thick on the three land faces, which a six-pound shot could have perforated." On the river face, however, they were not only of great height but of proportional thickness.

"There is only one gateway, and that in the centre of the eastern face. It is narrow, and between two square towers, like the others wide at the base, and decreasing towards their summit. The archway is of comparatively modern date, and is the work of the Mogul government of the province. There was an inner gateway, which was taken down to build the lighthouse with." A broad deep moat faced with stone seems to have been greatly relied on by the natives for the defence of the place from hostile attack. On the British taking possession of the fort in 1803, this was drained, and numerous alligators which infested it, either destroyed or allowed to escape into the river. Within the fort is an old mosque, built by the former Mogul occupants. It has no architectural pretensions whatever. The town is straggling, and exhibits evident signs of decay. There are some very good houses of hewn stone and brick, but for the most part in very indifferent repair, the poverty of the inhabitants preventing them from maintaining their habitations in decent condition. In the suburbs is the "Kuddum Russool," a Mussulman building displaying neither grandeur nor elegance, but venerated from its containing some alleged sacred relics. The inclosure and the ground surrounding it are used as the common burial-place for the Moslem inhabitants; and the guardian priests make a good harvest in unhealthy seasons, by the mortuary-fees exacted for each grave. The Jama Masjid, or great mosque, in the main street, is a very clumsy, inelegant building: it is used both as a school and a place of devotion. The Brahminical temples are rude, ungraceful erections, and generally small. The only one of large dimensions, and which was commenced by a Mahratta governor, is unfinished. Very little trade now exists in Cuttack. It has manufactures of brass cooking-vessels, and shoes, which constitute the staple commodities of the place. The soil of the vicinity is poor and sandy: rice of indifferent quality is the principal crop. The population is estimated at 40,000. Distance from Madras, N.E., 635 miles; Nagpore, E., 440; Berhampore, in Ganjam, N.E., 108; Calcutta, S.W., 220. Lat. 20° 28', long. 85° 55'.

CUTTEREAH.—A town in the British district of Bhaugulpore, lieut.-gov. of Bengal, 38 miles S.W. of Bhaugulpore. Lat. 24° 46', long. 86° 39'.

CUTTUB MINAR.—See DELHI.

CUTWA, in the British district of Burdwan, lieut.-gov. of Bengal, a town on the route from Berhampore to Burdwan. It is situate at the confluence of the river Hadjee with the Bhaguttee, the great western branch of the Ganges, and is on the right side of both the confluent streams. In a commercial point of view, its situation is advantageous, commanding an easy communication by the course of the Bhaguttee and Ganges with the North-West Provinces, and also with Calcutta by the course of the

Bhagruttee and Hoogly. Distance N. from Calcutta, by land 80 miles, by water 120. Lat. $23^{\circ} 38'$, long. $88^{\circ} 10'$.

D.

DABLA.—A town in the Rajpoot state of Oodeypoor or Meywar, 98 miles N.E. from the town of Oodeypoor, and 55 miles S. from Ajmeer. Lat. $25^{\circ} 41'$, long. $74^{\circ} 49'$.

DABLING.—A village of Koonawar, in Northern India, situate in a belt of arable land near the left bank of the Sutlej, and four miles from the confluence of its feeder the Hopchoo, and amidst groves of poplars and orchards of apricots. The opposite bank of the Sutlej presents a perpendicular section of 6,000 or 7,000 feet of pure rock. The scanty population is, according to the description of Herbert, altogether of the Chinese Tartar type. "The head man, a Lama, came to pay his respects to us in a dress exactly similar to what is represented as the Chinese costume. His stockings were of woollen stuff sewed, and ought rather from their shape, or want of shape, to have been called bags. His shoes were exactly Chinese, the soles having a spherical shape. He wore also a Chinese skull-cap, but the other people in the village went bareheaded, and wore long tails plaited. They were all rather fair, particularly the women, who had a fine rosy colour. We were very much pleased with the appearance of the assembled village, and could hardly help thinking we had got on the high road to Pekin." Notwithstanding that the elevation of Dabling is 9,400 feet above the sea, the reverberation of the sun's rays from the rocks rising about it, caused, during the visit of Gerard, the heat to be so great, that the thermometer reached 109° in a tent. A mile to the east of Dabling, is another less village, called Doobling, the path between them being very rough, and rendered practicable by means of scaffolds or balconies fastened in some places against perpendicular faces of precipices. The vicinity is fertile, in comparison with the sterility of the mountains rising on every side, and produces walnuts, apricots (which, when dried, resemble prunes, and form an important article in the diet of the inhabitants), cherries of small size but fine flavour, deodars, and birches. Those villages are considered so connected, that they are always named together, under the appellation of Dabling-Doobling. Lat. $31^{\circ} 45'$, long. $78^{\circ} 39'$.

DABUNPOOR, in the jaghire of Jujhur, lieut.-gov. of the N.W. Provinces, a village near the eastern frontier, towards the British district of Delhi. Lat. $26^{\circ} 28'$, long. $76^{\circ} 43'$.

DABUR, in the British district of Agra, a village on the route from the city of Agra to the Rajpoot town of Jeypore, and 28 miles W. of the former. Lat. $27^{\circ} 3'$, long. $77^{\circ} 39'$.

DABUTA, in the British district of Budaon, lieut.-gov. of the N.W. Provinces, a village on the route from Ailygurh to Moradabad, 45 miles S.W. of the latter place. Lat. $28^{\circ} 21'$, long. $78^{\circ} 23'$.

DACCA.—A British district, named from its principal place, and situate within the limits of the presidency of Bengal. It is bounded on the north by the British district Mymensing; on the east by the British districts Tipperah and Bulloah; on the south by the British district Backergunge; and on the west by the British district Deccan Jelalpoore, or Furreedpore. It lies between lat. $23^{\circ} 12'$ — $24^{\circ} 17'$, long. $90^{\circ} 11'$ — $90^{\circ} 58'$, and has an area of 1,960 square miles. It is a level depressed tract, drained by numerous rivers, and by streams of inferior dimensions. In the north-western part of the district, however, and also in its eastern angle towards the Megna, are some small ridges, generally running from north to south, and having an elevation from twenty to fifty feet above the adjacent country. The southern division of the district is the most depressed, and being, in consequence, widely inundated during the periodical rains of closing summer and commencing autumn, is generally under rice-cultivation. Of the rivers, the Megna, or lower Brahmapootra, flowing from north-west to south-east, first touches on the district at its northern boundary at Agarasonda, and continuing to hold a direction south-east for thirty miles, forms the eastern boundary as far as Byrni Bazar, where it turns to the south, and flowing in that direction forty-five miles, forms the boundary on the east side of Dacca, towards Tipperah and Bulloah, as far as Moiskondi, where it leaves the district. At the point where it turns south, it receives on the left the Gora Outra, a considerable stream, and is thence termed the Megna; fifty miles lower down, it, on the right side, receives the Dulacserree, a large offset of the Koonae or Jabuna, and twenty-five miles lower down, on the same side, the Kirty-Nassa, a large offset from the Ganges. It also sends off and receives, right and left, many other watercourses of less importance, and several small tributaries from the Tipperah hills.

The year may be considered to be divided into three seasons—the hot, the rainy, and the cool. The first lasts from the beginning of March to the end of June, and is succeeded by the periodical rains, continuing until the early part of October, at the close of which the cool season commences, and lasts till the middle of February, when the weather gradually becomes warmer. During the cool season, ice may be obtained by exposing water to the night air in shallow, wide earthen vessels. Generally the climate is characterized by moisture, resulting as well from the great amount of rain, as from evaporation from the several great rivers. During the hot season, sickness is prevalent, and increases with the temperature. During the cool season, there are, with little intermission,

either fogs or heavy dews. The mean annual temperature at noon is 79° ; the greatest annual fall of rain has been found to be ninety-three inches, the least forty-six, the mean seventy. Of wild animals, Dacca possesses the elephant, buffalo, tiger, bear, and leopard. Of wild birds, there are the fishing-eagle, vulture, kite, argila or adjutant-bird, and cranes of various kinds. The porpoise is common in the large rivers, which also harbour in great numbers the gharial, or sharp-beaked crocodile, and the magar, or blunt-beaked crocodile (alligator). Snakes exist in great number and variety. Fish are abundant and excellent. The domestic animals are principally kine and buffaloes. Cultivation is partial and unskilful, so that the district does not supply its own consumption of grain, and that article is imported in large quantities from the neighbouring districts. Esculent vegetables are abundant, but usually not of kinds known in Europe. Sugar, betel-nut, hemp, indigo, and other plants yielding dye-stuffs, are produced in moderate quantities. Cotton was formerly produced in considerable quantities, but its culture has been much limited since the manufacture of fine muslins in the city of Dacca has ceased, the staple being too short for the manufacture of coarse strong fabrics, which alone are now made in the district. In the attempts recently made by the East-India Company to introduce the American cotton, Dacca participated; but the result was complete and total failure. The climate appears to be unsuitable for the purpose, and myriads of insects preying on the plants, destroyed the bolls and frustrated the hopes of the cultivators.

The amount of population is given under the article BENGAL. In the northern part of the district, are two tribes, denominated, the one Kunch, the other Rajbansi, apparently of different origin from the rest of the population; more robust in physical type, and more daring and resolute in character. Excluding these, the Mussulmans are considered to be more numerous than the Brahminists, but not in a great degree. Education does not appear to be greatly encouraged in Dacca, but the town has a government college in a prosperous state, of which some account will be found in the proper place. Dacca, the locality of the civil establishment and a military cantonment, Narainganj, and Islampoor, are described under their respective names in the alphabetical arrangement. There are scarcely any roads in this district, in consequence of the facility afforded by the several large rivers for communication by water, and the extreme difficulty of conducting roads across the numerous streams. There is a very indifferent route from south-west to north-east through Dacca, from Calcutta to Sylhet; another from south to north, from Dacca to Nussseerabad, in the adjoining district of Mymensing. A superior road, projected some years since, from the capital, was abandoned in consequence of the great difficulty in the way of its execution. At a recent

period, a line of steam communication was established experimentally, between Calcutta and Dacca, but the result was unfavourable, the expense having greatly exceeded the receipts. The failure being attributed in some degree to the slowness with which the natives of Bengal adopt new customs, it was resolved to continue the experiment, and to extend the line to Assam. It may be noticed that the projected line of the Eastern Bengal Railway Company will intersect this district.

Under the Mahomedan rule, the affairs of Dacca were administered by an officer appointed by the nawaub of Bengal, and accountable to him for the revenues of the province. The establishment of the British authority, on the grant of the Dewanny in 1765, of course put an end to the actual power of the subordinate governor, as well as to that of the chief; but an adequate provision was made for the Dacca nawaub, and his successors continued stipendiaries of the British government until the year 1845, when the title and dignity became extinct by the death of the last possessor without heirs. The pecuniary allowances thereupon lapsed, but a small sum was allotted for the maintenance of the female connections and servants of the deceased nawaub.

DACCA, a town, the principal place of the British district of the same name, presidency of Bengal, is situate on the Burha Gunga, a considerable stream, communicating with the Dulasseree, a large offset of the Koonae or Jabuna. The Burha Gunga is, however, here about half a mile wide in the dry season, and still wider during the rainy season. The climate is considered good, the heat being tempered by the cooling effect of the numerous rivers; and as their currents are rather rapid, they produce none of the deleterious results of stagnant water, or of water approaching to stagnancy. The city is four miles in length, and one and a quarter in breadth. It is at present a wide expanse of ruins, in many places overgrown with jungle, which, as well as the dilapidated buildings, is infested with numerous tigers, snakes, and other noxious creatures. "All its splendid buildings, the castle of its founder, Shah Jehangir, the noble mosque he built, the palaces of the ancient newaub, the factories and churches of the Dutch, French, and Portuguese nations, are all sunk into ruin, and overgrown with jungle." Though thus comparatively desolate, its minarets, huge ruined palaces, and other monuments of departed grandeur, give it an impressive and not unpleasant aspect, during the periodical rains of closing summer and autumn, when it stands alone above a wide, watery waste. At present, the works and places of public character are fitting only to be enumerated, not described. The city and suburbs are in a recent publication stated to possess ten bridges, thirteen ghats or landing-places, seven ferry-stations, twelve bazars, three public wells, a variety of buildings for fiscal and judicial purposes, a jail

and jail-hospital, a lunatic asylum, and a native hospital. Among the noticeable establishments is the elephant depot, containing generally from two to three hundred of these animals. The religious edifices devoted to Christianity are St. Thomas's Church, the Baptist Mission meeting-house, the Romish, Armenian, and Greek churches. There are said to be a hundred and eighty Mussulman mosques, and a hundred and nineteen Brahmical temples. The English, Armenians, and Greeks, have cemeteries at this place. Here is a college subject to the control of the government, but under the management of a local committee. The committee have a secretary, and for conducting the educational duties, there are, besides a head master, superintending the whole establishment, three masters in the senior, and nine in the junior school department, of which latter six are natives. There is also a vernacular department, directed by two pundits; and attached are a librarian and a writer. The Baptist Mission maintain a number of schools here.

In 1850, the Court of Chancery pronounced its judgment in favour of the validity of the bequest contained in the will of the late Mr. Robert Mitford, for the benefit of the native inhabitants of Dacca, and the residue of the testator's estate, amounting to between eleven and twelve thousand pounds, has been accordingly paid over to the government of Bengal, to be applied to charitable purposes within the city.

The manufactures of Dacca are at this time scarcely deserving of notice. A small quantity of coarse cotton, silk, and embroidered goods, constitutes the sum of them; and even this scanty remnant of skilled industry is constantly and rapidly giving way before the competition of British fabrics. The mullins of Dacca were formerly unrivalled for fineness and every desirable quality. The spinning of the very fine thread was carried on with wonderful nicety. The operation was performed with a fine steel spindle by young women, who could only work during the early part of the morning, while the dew was on the ground; for such was the extreme tenacity of the fibre, that it would not bear manipulation after the sun had risen. The darsers were so skilful, that they could remove an entire thread from a piece of mullin, and replace it by one of finer texture. The demand for those extremely beautiful fabrics was principally for the supply of the royal wardrobe at Delhi, and has declined with the decay of that court. Such mullin, from its wonderful fineness, was called *shrawan*, or "flowing water," and *shabnam*, "evening dew." The manufacture is now totally lost; and though some time ago an order was sent from China for a small quantity of such mullin, at the rate of ten rupees, or 1*l.* per square yard, no artisan could be found competent to execute it. The falling off of the general Dacca trade took place as far back as 1801, previously to which the yearly ad-

vances made by the East-India Company and private traders for Dacca mullins, were estimated at upwards of twenty-five lacs of rupees (250,000*l.*). In 1807, the Company's investments had fallen to 59,590*l.*, and the private trade to about 56,020*l.* In 1813, the private trade did not exceed 20,595*l.*, and that of the Company was scarcely more considerable. In 1817, the English commercial residency was altogether discontinued. The French and Dutch factories had been abandoned many years before. The extent of misery caused by the annihilation of the manufacture and trade of this once flourishing mart, is not readily to be conceived. The population is given under the article *BENGAL*. The civil establishment of the district of which this is the chief location, consists of a judge, a collector, and other European officers, with a due proportion of subordinates. For military purposes, Dacca is within the Presidency division, and the immediate vicinity of the town was usually the station of a regiment of infantry and a detail of artillery. It had, however, been alleged, that the site of the cantonment was unhealthy, and in consequence remedial measures were from time to time adopted. These, however, failed in producing the desired result, and at the latter end of 1852, it was finally determined to abandon the cantonment. Distance of the town from Furreedpore, E, 39 miles; Berhampore, E, 138; Calcutta, N.E., 150. Lat. 23° 43', long. 90° 25'.

DACCA JELALPORE.—See *FUREED-PORE*.

DACHEN.—A town in the native state of Sikhim, 51 miles N. from Darjeeling, and 150 miles N. from Dinajepore. Lat. 27° 44', long. 88° 36'.

DADANAIGPOLLIAM.—A town in Mysore, 48 miles N. from Bangalore, and 102 miles N.E. from Seringapatam. Lat. 13° 38', long. 77° 40'.

DADECALLEE.—A town in the British district of Barasut, lieutenant-gov. of Bengal, 35 miles N.E. of Calcutta. Lat. 22° 53', long. 88° 55'.

DADNUH, in the district of Dadree, subject to the native state of Jujhur, lieutenant-gov. of the N.W. Provinces, a town situate on the north-west frontier, towards Lohau. Lat. 23° 34', long. 75° 57'.

DADOOLA.—A village in Sind, on the route from Shikarpoor to Subulcoote, and 40 miles S.W. from the latter town. It is situate four miles from the left bank of the Indus, in a populous and well-cultivated country, and is supplied with water from three wells. Lat. 23° 2', long. 69° 14'.

DADREE, in the British district of Boondeshuhur, lieutenant-gov. of the N.W. Provinces, a town on the route from Delhi to Allypore, 20 miles S.E. of the former. Lat. 28° 53', long. 77° 38'.

DADREE.—A town, the principal place of

a division of the same name, in the native state of Jujhur, within the territories subject to the lieut.-gov. of the N.W. Provinces, and situate on the route from Hansee to Neemuch. Here is a large bazar, and supplies and water are plentiful. The road to the north, or towards Hansee, is sandy and heavy, but good southwards. According to De Cruz, the district of Dadree, which was originally conferred upon the nawaub of Bahadoorgurh for the support of troops, was retained by the Jujhur nawaub, who furnished the quota for whose maintenance the district had been granted; but it appears from more recent information, that the chief of Jujhur has restored the estate to the former grantee. Distance of the town from Hansee, S., 44 miles. Lat. $28^{\circ} 32'$, long. $76^{\circ} 20'$.

DADUPOOR, in the Cis-Satlaj territory of Sirhind, a small town or village five miles from the right bank of the Jumna, and close to the Delhi Canal. Elevation above the sea between 900 and 1,000 feet. Distance N. of Delhi 88 miles. Lat. $30^{\circ} 12'$, long. $77^{\circ} 27'$.

DAICHOO, in the Rajpoot state of Joudpore, a village on the route from Pokhurn to Joudpore, 28 miles S.E. of the former place. It is supplied with good water from four wells, 150 feet deep. Lat. $26^{\circ} 47'$, long. $72^{\circ} 27'$.

DAIGLOOR.—A town in Hyderabad, or dominions of the Nizam, 100 miles N.W. from Hyderabad, and 46 miles S. from Nandair. Lat. $18^{\circ} 32'$, long. $77^{\circ} 39'$.

DAILWOORA.—A town in the peninsula of Kattywar, province of Guzerat, four miles N.E. from Diu, and 106 miles S. from Rajkote. Lat. $20^{\circ} 46'$, long. $71^{\circ} 2'$.

DAJEEPOOR.—A town in the native territory of Kolapoor, presidency of Bombay, 30 miles S.W. from Kolapoor, and 53 miles N.W. from Belgaum. Lat. $16^{\circ} 22'$, long. 74° .

DAJEL.—A fort, town, and district of the Punjab, on the route from Dera Ghazee Khan to Bhag, situate among the mountains of Dajel and Hurroond. The town is a small but rather flourishing place, and important as commanding the communication through the Derajat to Cutch Gundava and Beloochistan, by the Polan Pass. Lat. $29^{\circ} 37'$, long. $70^{\circ} 19'$.

DAKHILU, in the jaghire of Jujhur, lieut.-gov. of the N.W. Provinces, a village on the left bank of the Hansoutee nullah, a torrent dry for a great part of the year, but overflowing considerably during the rains. Lat. $28^{\circ} 27'$, long. $76^{\circ} 37'$.

DAKIAT, in the native state of Gurhwal, a village at the southern extremity of the mountain bounding the fertile valley of Banal on the eastern side: it is close to the right bank of the Jumna. Lat. $30^{\circ} 49'$, long. $78^{\circ} 18'$.

DALAMOW, in the district of Banswara, in the territory of Oude, a city on the left bank of the Ganges, and presenting a striking appearance to those who navigate it. There

are two large antique shiwalas, or Hindoo temples, on the bank of the Ganges, and an ancient flight of brick-built steps gives access to the river, for the purpose of the ritual ablutions of pilgrims, it being recognised as a holy place: There is besides a brick-built fort, with walls. Butler states its "population to be 10,000, of whom 250 are Mussulmans." It is mentioned in the Ayeen Akbery. Distant S. from Lucknow 56 miles, N.W. from Allahabad 68 miles, N.W. from Calcutta 563 miles. Lat. $26^{\circ} 4'$, long. $81^{\circ} 7'$.

DALKISSORE.—A river rising in the British district of Pachete, lieut.-gov. of Bengal, about lat. $23^{\circ} 30'$, long. $86^{\circ} 34'$, and, taking a south-easterly course, passes through the districts Bancoora, Burdwan, and Hoogly, when, under the name of the Rooperain, it forms the boundary of the districts Hidjellee and Hoogly, and falls into the river Hoogly at Diamond Harbour, in lat. $22^{\circ} 12'$, long. $88^{\circ} 7'$. Its total length of course is 170 miles. At Bancoora, fifty miles from its source, it is crossed by ford, on the route from Calcutta to Hazareebagh, and at Jahanabad, sixty-five miles lower down, it is crossed by the same route by means of ford.

DALLAH.—A town in the recently acquired British district of Pegu, 42 miles S.W. of Rangoon. Lat. $16^{\circ} 21'$, long. $95^{\circ} 47'$.

DALLAH.—The name of one of the rivers forming the delta of the Irawady. It flows past the town of Dallah, and falls into the Bay of Bengal about lat. $16^{\circ} 8'$, long. $75^{\circ} 49'$.

DALPATPOOR, in the district of Pachamrat, territory of Oude, a town on the right bank of the Ghaghra, seven miles S.E. of Faizabad, 82 E. of Lucknow. In 1837, Harpal Singh, the zemindar or proprietor of the adjacent country, employed 500 men in building a mud fort of considerable extent. Lat. $26^{\circ} 44'$, long. $82^{\circ} 14'$.

DAMAKA.—A town in the British district of Camroop, in Lower Assam, 28 miles N.E. of Goalpara. Lat. $26^{\circ} 27'$, long. $90^{\circ} 56'$.

DAMAN.—A town on the coast of the Northern Concan, and belonging to the Portuguese, though included within the limits of the presidency of Bombay. It is situate on the Damungunga, or river of Daman, which rises in the Ghauts, about forty miles further east. The river has a bar at its mouth, having two feet water at low water spring tides, and eighteen or twenty feet inside. There is never less in common springs than three fathoms at high water on the bar, the rise of the tide being seventeen or eighteen feet. Outside the bar is a road, in which vessels may anchor in eight fathoms of water. The town is fortified, and has a rampart with ten bastions and two gateways. There are nine Christian churches, and a fort called the Castle of St. Hieronymus. The surrounding country is fruitful and pleasant, except in the rainy season, when it is extensively overflooded.

DAM—DAN.

During the dry season, there remain some shallow jhils or ponds, abounding in fish and reptiles. The river, admitting the tide, is brackish, and when the water left by the rain is evaporated, recourse is had to wells, the water of which, however, is also in some degree brackish, and moreover, very unwholesome, causing fevers and other formidable ailments. "Provisions and vegetables are cheap and plentiful." Daman is an excellent place for small vessels to remain at during the S.W. monsoon, and for the purpose of repair, the country being well stocked with ship-timber. Many ships of from 500 to 600 tons burthen have been built in this river. Daman, described as "a town great and strong," was sacked and burned by the Portuguese in 1531. It was subsequently rebuilt, and in 1558 was taken by the Portuguese, who converted the mosque into a Christian church. The place appears from that time to have remained one of their possessions. The district of which the town is the principal place is about ten miles in length from north to south, and five in breadth. Distance of the town of Daman from Bombay, N., 101 miles. Lat. $20^{\circ} 24'$, long. $72^{\circ} 53'$.

DAMAN, or THE BORDER, so called because it stretches between the Suliman Mountains and the Indus. The tract formerly constituted a portion of Runjeet Singh's kingdom of Lahore, and is now annexed to the British province of the Punjab. Where not under the influence of irrigation, it in general presents the appearance of a plain of smooth hard clay, bare of grass, but sprinkled with dwarfish bushes, tamarisks, and occasionally trees of larger size, but seldom exceeding the height of twenty feet, the soil or climate being unfavourable to their further growth. In place of the clay, the surface in some places consists of a loose and irreclaimable sand. The clay appears to be deposited by the waters either of the Indus or of the numerous small rivers which, during the season of the melting of the snow, stream down from the mountains, and add to the inundation. Where duly irrigated, the clay is very productive, and few countries are more fertile than the Derajat, or that part of the plain which extends along the western bank of the Indus. The Derajat, so called from the three towns, Dera Ismael Khan, Dera Fati Khan, and Dera Ghazee Khan, abounds in towns and good villages. In summer, the heat in the Daman is intense, and the productions in a great measure resemble those of India. The Daman is 300 miles long, from the Kala or Salt Range on the north, to the confines of Sind on the south, and has an average breadth of about sixty miles. Lat. $28^{\circ} 40'$ to $33^{\circ} 20'$, long. $69^{\circ} 30'$ to $71^{\circ} 20'$.

DAMDAMA.—A town in the Rajpoot state of Kotah, 73 miles N.E. from Neemuch, and 11 miles S. from Kotah. Lat. 25° , long. $75^{\circ} 56'$.

DAMMOODAH.—A river rising in the British district of Ramgurh, lieut.-gov. of

Bengal, about lat. $23^{\circ} 55'$, long. $84^{\circ} 53'$. It takes a south-easterly direction through the British districts Ramgurh and Pachet, into those of Bancoora and Burdwan, and twelve miles below the principal town of the last-named district, and in lat. $23^{\circ} 5'$, long. $88^{\circ} 1'$, it turns nearly due south, a direction which it holds for the remainder of its course through the British districts Burdwan and Hoogly, until its fall into the river Hoogly on the right side, in lat. $22^{\circ} 13'$, long. $88^{\circ} 7'$; its total length of course being 350 miles. Its feeders are numerous, the most important being the Barrachur, a considerable torrent, falling into it on the left side, in lat. $23^{\circ} 40'$, long. $86^{\circ} 51'$. On the route from Calcutta to Hazareebagh, it is crossed by means of a ferry, fifty miles above its mouth. At Ranegunj, eighty-five miles higher up, and in lat. $23^{\circ} 35'$, long. $87^{\circ} 8'$, the bed of the stream is described by Jacquemont as 500 yards wide, fordable, with a rapid current, and limpid water, about one foot deep in the middle of December, or during the dry season. At Gomeah, ninety miles higher up the stream, the same traveller states the bed to be 250 yards wide, and free from obstructions, with a slender stream of very fine water. The valley of the Damoodah, which is about to be traversed by the railway from Calcutta, is known to abound in coal and iron; and, indeed, the only doubt as to the practicability of manufacturing malleable iron in the district, arises from the absence of limestone for the reduction of the ore into metal. Limestone, however, may be imported from Sylhet and other places; and it has been estimated by competent authority, that, assuming the cost of railway-hauls at 10l. per ton, bar-iron may be manufactured in the Damoodah valley at least twenty per cent. lower than it could be imported from England.

DAMUK.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 25 miles S.E. from Omraouttee, and 85 miles S.W. from Nagpoor. Lat. $20^{\circ} 30'$, long. $78^{\circ} 1'$.

DAMUNGAUM.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 29 miles S.E. from Omraouttee, and 66 miles S.W. from Nagpoor. Lat. $20^{\circ} 45'$, long. $78^{\circ} 14'$.

DAMUNGUNGA.—A river rising on the western slope of the Syadree range of mountains, in lat. $20^{\circ} 11'$, long. $73^{\circ} 42'$, and, flowing in a westerly direction through the native state of Peint, and dividing the British collectorates of Surat and Tannah, intersects the Portuguese territory of Damaun, and falls into the Arabian Sea in lat. $20^{\circ} 23'$, long. $72^{\circ} 52'$.

DANA.—A town in the native state of Nepal, 158 miles N.W. from Khatmandoo, and 148 miles N.E. from Oude. Lat. $28^{\circ} 47'$, long. $83^{\circ} 3'$.

DANAYAKKAN KOTTEL.—A town in the British district of Coimbatore, presidency

of Madras, 30 miles N. of Coimbatore. Lat. $11^{\circ} 26'$, long. $77^{\circ} 7'$.

DANDEEAS.—See **DANTIWARA**.

DANDERPHUL.—A town in the British sub-collectorate of Nassick, presidency of Bombay, 39 miles S.E. of Nassick. Lat. $19^{\circ} 33'$, long. $74^{\circ} 7'$.

DANDYAUW.—A town in the native state of Nepal, 94 miles S.E. from Almora, and 36 miles S.W. from Jemlah. Lat. $29^{\circ} 8'$, long. $81^{\circ} 10'$.

DANGAUR.—A town in the native state of Sirgoojah, 27 miles S.W. from Sirgoojah, and 33 miles N.W. from Odeipoor. Lat. $22^{\circ} 50'$, long. $82^{\circ} 53'$.

DANGKHAR.—A town in the British district of Spiti, in the district of the Julinder Doab, one of the divisions of the Punjab, 92 miles N.E. of Simla. Lat. $32^{\circ} 5'$, long. $78^{\circ} 15'$.

DANGURTHUL.—A town in the Rajpoot state of Jeypoor, 36 miles S. from Jeypoor, and 15 miles N. from Tonk. Lat. $26^{\circ} 23'$, long. $75^{\circ} 56'$.

DANOO.—A town in the British district of Tannah, presidency of Bombay, 69 miles N. of Bombay. Lat. $19^{\circ} 57'$, long. $72^{\circ} 43'$.

DANPOOR, in the British district of Aligurh, lieutenant-gov. of the N.W. Provinces, a village near the northern boundary of the district. It is 65 miles S.E. of Delhi. Lat. $28^{\circ} 7'$, long. $78^{\circ} 6'$.

DANPOOR, in the British district of Boodlshubh, lieutenant-gov. of the N.W. Provinces, a small town on the route from the cantonment of Aligurh to that of Moradabad, and 22 miles N. of the former. It has a bazar, and is well supplied with water. Lat. $28^{\circ} 11'$, long. $78^{\circ} 16'$.

DANTIWARA, in the Rajpoot state of Joudpore, a village on the route from the town of Joudpore to that of Ajmeer, and 21 miles E. of the former. It contains 100 houses and five shops. Lat. $26^{\circ} 16'$, long. $73^{\circ} 30'$.

DANTOON.—A town in the British district of Midnapoor, lieutenant-gov. of Bengal, 32 miles S. of Midnapoor. Lat. $21^{\circ} 57'$, long. $87^{\circ} 20'$.

DANTROEE.—A town in the Rajpoot state of Serohee, 22 miles S.W. from Serohee, and 78 miles W. from Odeypoor. Lat. $24^{\circ} 49'$, long. $72^{\circ} 35'$.

DAODPOOR, in the territory of Oude, a village on the route from Lucknow to Sultanpore cantonment, 12 miles W. of the latter. It has a small bazar, and is well supplied with water. Lat. $26^{\circ} 18'$, long. $81^{\circ} 57'$.

DAOD KAYLE, in the Sind Sagur Doab division of the Punjab, a town situated on an offset of the river Indus, six miles S. of the town of Kala Bagh. Lat. $32^{\circ} 51'$, long. $71^{\circ} 35'$.

DAODNUGUR, in the British district Behar, lieutenant-gov. of Bengal, a town on the

right bank of the river Son, navigable up to this place from its confluence with the Ganges, a distance of forty-five miles. Some of the streets are straight and wide, but the greater number mere wretched lanes. Here is a spacious well-built serae, or public lodging-house, surrounded by a rampart of brick, with battlements and loopholes, and probably intended for a stronghold of the former government. There is another extensive serae, inclosed and secured by gates. The number of houses, including Ahmudgunj, has been computed at about 2,000; and, admitting the usual ratio of inmates to houses, the population appears to be about 10,000. It is a place of considerable trade, and has manufactures of setringis, or coarse cotton carpets, blankets, and cotton fabrics of various sorts. The town is 42 miles N.W. of Gya, 60 S.W. of Patna, 89 E. of Benares. Lat. $25^{\circ} 3'$, long. $84^{\circ} 27'$.

DAORALAH.—See **DOURALA**.

DAPOOLEE.—A town in the British district of Rutnagherry, presidency of Bombay, 55 miles N. of Rutnagherry. Lat. $17^{\circ} 48'$, long. $73^{\circ} 16'$.

DAPOOREE.—A town situate on the left bank of the Moota river, a feeder of the Bema, in the British district of Poonah, presidency of Bombay, four miles N. of Poonah. The town contains a residence for the use of the governor of Bombay, and in its vicinity are the Botanical Gardens, maintained by the government. Lat. $18^{\circ} 32'$, long. $73^{\circ} 51'$.

DARAGUNJ, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a town on the route from the cantonment of Allahabad to Jaunpore, and communicating by ferry with the former, of which it may be considered in some measure a suburb. The Ganges, on the left bank of which it is situate, has here a bed a mile wide, the stream in the dry season occupying only a third of that space, the remainder being moist sand and mud, over which the road is difficult. It is a place of some importance. Lat. $25^{\circ} 27'$, long. $81^{\circ} 57'$.

DARAMANY GHAT.—See **AMBEANHULLY**.

DARANAGUR, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Allahabad to the town of Futtehpoor, 40 miles S.E. of the latter place. Supplies and water are abundant. The road to the south-east, towards Allahabad, is heavy, but that to the north-west, or towards Futtehpoor, is good. The surrounding country is level and well cultivated. Lat. $25^{\circ} 41'$, long. $81^{\circ} 25'$.

DARANUGUR, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, a town on the route from Moradabad to Muzaffernugur, and 40 miles S.E. of the latter place. It is situate on the left bank of the Ganges, in a level, well-cultivated country, and has a bazar. The road in this part of the route is sandy, and bad for wheeled carriages. Distant

N.W. from Calcutta 944 miles. Lat. $29^{\circ} 17'$, long. $78^{\circ} 11'$.

DARAPOOR, in the Punjab, a small village about a mile from the right or west bank of the Jhelum. Close to it are extensive ruins, called Oodenuggur, which Brnes supposes to be those of Nicæa, built by Alexander to commemorate his victory on this spot over Porus. Lat. $32^{\circ} 46'$, long. $73^{\circ} 36'$.

DARAPOORAM, in the British district of Coimbatore, presidency of Madras, a town situate about half a mile from the left bank of the river Amrawati, in an elevated open country. The streets are wide, and the houses in general well built. Here is a large mud fort, formerly of considerable importance during the wars between the British and the rulers of Mysore, but now in ruins. Buchanan, after mentioning the fort, gives the following curious statement:—"The commandant, according to the report of the natives, agreed to surrender the place to Col. Fullarton. As, however, he wished to make a appearance of resistance, some pioneers were sent into the ditch to undermine the wall, which they did very coolly, while over their heads the garrison kept up a tremendous fire. When the passage was open, the firing ceased, and our troops walked in quietly, without any injury being done on either side." Distance from the town of Coimbatore, S.E., 42 miles; Madras, S.W., 250. Lat. $10^{\circ} 45'$, long. $77^{\circ} 38'$.

DARBARRA, in the Punjaub, a large fortress of the Daman. It is situate 12 miles N.W. of Tak, and at the mouth of a pass into the Suliman Mountains. Its walls are very lofty, but it does not appear to be otherwise of importance, and it is situate in a very barren and secluded country. Lat. $32^{\circ} 15'$, long. $70^{\circ} 20'$.

DARBEE.—A town of North-Eastern India, in the native state of Bhotan, 60 miles E. from Darjeeling, and 105 miles N. from Rungpore. Lat. $27^{\circ} 12'$, long. $89^{\circ} 18'$.

DARBUNG, or **ROOSHKATONG**, in Bussahir, a river of Koonawur. It rises in about lat. $31^{\circ} 57'$, long. $78^{\circ} 25'$, on the southwestern declivity of the stupendous range of Damuk Shu, bounding that territory on the side of Ladakh. Gerard estimates the elevation of its source at about 15,000 feet above the sea. The scene, as described by him, is one of terrific desolation. After a total course of about twenty-seven miles, it falls into the Sutlej, in lat. $31^{\circ} 43'$, long. $78^{\circ} 35'$.

DARICKEE.—A town in the British district of Cuttack, lieut.-gov. of Bengal, 36 miles S.E. of Cuttack. Lat. $20^{\circ} 4'$, long. $86^{\circ} 18'$.

DARISHE.—A town in the British district of Nellore, presidency of Madras, 30 miles N.W. of Ongole. Lat. $15^{\circ} 48'$, long. $79^{\circ} 44'$.

DARJEELING, in the British district of the same name, lieut.-gov. of Bengal, a sanatorium for troops located within the military

division of Cawnpore, Allahabad, Dinapore, and Benares. It is situate "on the southern side of a great hollow or basin, being that of the Runjeet River, which falls into the Teesta a few miles east of the place. To the north, the view is open, and exhibits the usual succession of range beyond range, all irregularly ramifying in every direction, and in apparently inextricable confusion: it terminates in the Snowy Range. To the westward, the view is confined by a lofty range at the distance of about ten miles; to the eastward, appears the valley of the Teesta; and on each side of it is the confused assemblage of mountain-ridges, as to the north; to the south, Darjeeling has the Sinchul Peak, elevated about 9,000 feet, and the Gurdun-Kutur range, which is a ramification of it. These mountains are completely clothed with forest from the top to the very bottom." In regard to natural scenery, the country round Darjeeling is described as inferior to that of Landour and Mussooree, but as contrasting favourably with that of Almora. In one respect, however, it has an advantage even over the former places, commanding as it does the most magnificent view which can probably be obtained of the Snowy Range, distant about sixty miles, in which, eminently conspicuous, appears the Kunching Jinga, rising 27,000 feet above the sea. Dr. Hooker, when on a botanical mission to this region, thus describes his first impression of the scene:—"Early next morning I caught my first view, and I literally held my breath in awe and admiration. Six or seven successive ranges of forest-clad mountains as high as that whereon I stood (8,000 feet), intervened between me and the dazzling-white pile of snow-clad mountains, among which the giant peak of Kinchin-junga rose 20,000 feet above the lofty point from which I gazed. Owing to the clearness of the atmosphere, the snow appeared to my fancy but a few miles off, and the loftiest mountain at only a day's journey. The heavenward outline was projected against a pale-blue sky, while little detached patches of mist clung here and there to the highest peaks, and were tinged golden-yellow or rosy-red by the rising sun." Gneiss is the principal formation of the rock at Darjeeling; slate occurs on the banks of the Runjeet River; at the foot of the hills, iron-ore abounds; and traces of copper are said to have been discovered.

The advantages possessed by Darjeeling, as the site for a sanatorium, in the salubrity of its climate and facility of access from the plains of Bengal, induced the British government, in 1835, to open a negotiation with the rajah of Sikkim, for its cession, in return for an equivalent in land or money. The rajah consented to an unconditional and gratuitous transfer. Several years afterwards, however, a grant of 3,000 rupees per annum was made to the rajah, as compensation for the cession, which sum at a later period was doubled. A sanatorium for Europeans has been established,

DAR—DAU.

and its results, as exhibited in official medical reports, are considered satisfactory. The district of which Darjeeling is the principal place, was enlarged in 1850, by the annexation of a further portion of the territory of Sikkim. The sequestration of this tract, yielding a revenue of 26,037 rupees, took place in consequence of outrages committed by the rajah against British subjects, a course of conduct which at the same time exposed him to the forfeiture of the annual payment which had been granted as compensation for Darjeeling. Lat. $27^{\circ} 2'$, long. $88^{\circ} 19'$.

DARMAPUR.—A town in the British district of Salem, presidency of Madras, 33 miles N. of Salem. Lat. $12^{\circ} 9'$, long. $78^{\circ} 14'$.

DARMOODAR.—A town in the native state of Nepal, 190 miles W. from Khatmandoo, and 103 miles N. from Oude. Lat. $28^{\circ} 17'$, long. $82^{\circ} 19'$.

DARRAH.—A town in the British district of Bhagulpoore, lieut.-gov. of Bengal, 50 miles S.W. of Rajmahal. Lat. $24^{\circ} 45'$, long. $87^{\circ} 5'$.

DARROOR.—A town in Hyderabad, or dominions of the Nizam, 185 miles N.W. from Hyderabad, and 72 miles S. from Jaulnah. Lat. $18^{\circ} 50'$, long. $76^{\circ} 11'$.

DARSHANGANJ, in the district of Pachamrat, territory of Oude, a town near the right bank of the river Ghaghra, five miles S.E. of Faizabad. It was built by Darshan Singh, a freebooter, the brother of an adventurer originally a trooper in the Company's service, but raised to the station of zemindar, or fofsee, by the favour of Saadat Ali Khan, formerly nawab vizier. It is rather a thriving place, several merchants of considerable property residing there. Distant E. from Lucknow 80 miles. Lat. $26^{\circ} 44'$, long. $82^{\circ} 12'$.

DASNUH, in the British district of Meerut, lieut.-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, situate on the route from Delhi to Ghurmukteesur, and 18 miles E. of the former. Elevation above the sea 821 feet. Lat. $28^{\circ} 41'$, long. $77^{\circ} 36'$.

DASOREE.—A town in the Rajpoot state of Joudpore or Marwar, 79 miles N. from Joudpore, and 50 miles S.W. from Beekaneer. Lat. $27^{\circ} 25'$, long. $72^{\circ} 56'$.

DASPORE.—A town in the British district of Midnapore, lieut.-gov. of Bengal, 31 miles N.E. of Midnapore. Lat. $22^{\circ} 37'$, long. $87^{\circ} 50'$.

DATCHAPULLY.—A town in the British district of Guntoor, presidency of Madras, 52 miles N.W. of Guntoor. Lat. $16^{\circ} 37'$, long. $79^{\circ} 48'$.

DATMER, in native Gurwhal, a village on the left bank of the Supin or Tonsee. The village is inhabited by savage and lawless banditti, who practise their misdeeds with much impunity, in consequence of the extreme diffi-

culty of access to their fastness. It was a secondary station in the great trigonometrical survey of the Himalaya. Elevation above the sea 8,354 feet. Lat. $31^{\circ} 5'$, long. $78^{\circ} 20'$.

DATPEE, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to Etawah, and 29 miles N.W. of the latter. Lat. $27^{\circ} 5'$, long. $78^{\circ} 42'$.

DAUDPOOR.—A town in the native state of Calahandy, one of the hill zemindarries of Orissa, 90 miles W. from Goomsoor, and 20 miles N.E. from Joonaagudda. Lat. $19^{\circ} 59'$, long. $83^{\circ} 19'$.

DAUKORE.—A town in the British district of Kaira, presidency of Bombay, 31 miles E. of Kaira. Lat. $22^{\circ} 42'$, long. $73^{\circ} 10'$.

DAUMNUGGUR, in the peninsula of Kattywar, province of Guzerat, or territory of the Guicowar, a town on a river which, fifty miles to the eastward, falls into the Gulf of Cambay. The surrounding country is well watered and fertile, producing abundant crops of fine grain, sugar-cane, and cotton. It is fortified, and belongs to the Guicowar, and received its name from Damoji, one of the family. Distance from Ahmedabad, S.W., 120 miles; Baroda, S.W., 120; Surat, N.W., 98; Bombay, N.W., 208. Lat. $21^{\circ} 40'$, long. $71^{\circ} 30'$.

DAUNABAD, in the Reechna Doab division of the Punjab, a town situated on a feeder of the river Ravee, 60 miles S.W. of the town of Lahore. Lat. $31^{\circ} 7'$, long. $73^{\circ} 21'$.

DAUNDIAKHERA, in the district of Bainswara, territory of Oude, a town on the left bank of the Ganges, 50 miles S. of Lucknow, 30 S.E. of Cawnpoore. Butter estimates the population at between 8,000 and 9,000, of whom 250 are Mussulmans. Lat. $26^{\circ} 10'$, long. $80^{\circ} 42'$.

DAUNG, THE.—A tract of country so called, situate within the limits of the presidency of Bombay, and comprising several petty native states, tributary to a chief styled the rajah of Daung. It is bounded on the north-west by the petty state of Wursavee; on the north-east and east by Candeish and the sub-collectorate of Nassick; on the south by the native state of Peint; and on the west by that of Baunsda. It extends from lat. $20^{\circ} 22'$ to $21^{\circ} 5'$, and from long. $73^{\circ} 28'$ to $73^{\circ} 52'$. Its length from north to south is fifty-two miles, and its breadth twenty-eight, comprehending an area of 950 square miles, with a population of 70,300. The country abounds in teak forests, which are rented by the British government of the Daung chiefs, who usually refer to the British representative any points of dispute among themselves.

DAUNTA, in the Myhee Caunta division of Guzerat, or the dominions of the Guicowar, a town, the chief place of the petty native territory of the same name, situate 48 miles E. of Deesa, and 139 miles N. of Baroda. The territory of Daunta is subject to the supre-

macy of the Rajpoot state of Edur, and, moreover, pays tribute to the Guicowar. In 1820, the Rana agreed to cede a fixed proportion of his revenues to the state of Pahlunpore, but the obligation was subsequently commuted for an annual payment of 500 rupees, and the district is now released from sequestration. The town of Daunta is in lat. $24^{\circ} 12'$, long. $72^{\circ} 50'$.

DAUSAN.—See DEESAUN.

DAVADANAPUTTY.—A town in the British district of Madura, presidency of Madras, 83 miles N.W. of Madura. Lat. $10^{\circ} 8'$, long. $77^{\circ} 43'$.

DAVAGOODOO.—A town in the British district of Nellore, presidency of Madras, 12 miles S.W. of Ongole. Lat. $15^{\circ} 20'$, long. 80° .

DAVANKONDA.—A town in the British district of Bellary, presidency of Madras, 52 miles N.E. of Bellary. Lat. $15^{\circ} 33'$, long. $77^{\circ} 37'$.

DAVAROY DROOG.—A town in Mysore, 76 miles N.E. from Seringapatam, and 89 miles N.W. from Bangalore. Lat. $13^{\circ} 22'$, long. $77^{\circ} 16'$.

DAVERCONDA, in Hyderabad, or territory of the Nizam, a town on a hill, near the left or northern side of a feeder of the river Pedawag, one of the tributaries of the Godavary. It is supplied with water from a tank of considerable size, situate on its west side. The extensive district of Daverconda, on the south side of the town, is named from it. Distant from the city of Hyderabad, S., 52 miles. Lat. $16^{\circ} 42'$, long. $78^{\circ} 59'$.

DAVERHULLY.—A town in Mysore, 68 miles N.E. from Bedenore, and 126 miles N. from Seringapatam. Lat. $14^{\circ} 6'$, long. $76^{\circ} 2'$.

DAVIPOOR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Almora, and 12 miles N. of the former. Lat. $28^{\circ} 59'$, long. $78^{\circ} 54'$.

DAVULGHAUT.—A town in Hyderabad, or dominions of the Nizam, 70 miles N.E. from Aurungabad, and 100 miles S.W. from Ellichpore. Lat. $20^{\circ} 30'$, long. $76^{\circ} 11'$.

DAWLUTWALLUH, in the Damaun division of the Punjab, a town situated 80 miles N.W. of Dera Ghazee Khan, 60 miles S.W. of the town of Dera Ismael Khan. Lat. $31^{\circ} 10'$, long. $70^{\circ} 20'$.

DEAGANJ, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Etawah, and 46 miles S.E. of the former. Lat. $27^{\circ} 3'$, long. $78^{\circ} 46'$.

DEAMAH, in the district of Sultanpoor, territory of Oude, a town on the route from Pettabgurb to Sultanpoor cantonment, 13 miles S.W. of the latter. It has a bazar, and is

abundantly supplied with water from wells. Lat. $26^{\circ} 10'$, long. $82^{\circ} 3'$.

DEARLY.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 17 miles S.E. from Ellichpore, and 13 miles N. from Omraouttee. Lat. 21° , long. $77^{\circ} 44'$.

DEATPORE.—A town in the British district of Malda, lieutenant-gov. of Bengal, 25 miles N.W. of Malda. Lat. $25^{\circ} 12'$, long. $87^{\circ} 52'$.

DEBEEPOORA.—See DAVIPOOR.

DEBRA.—A town in the British district of Midnapoor, lieutenant-gov. of Bengal, 16 miles E. of Midnapoor. Lat. $22^{\circ} 23'$, long. $87^{\circ} 39'$.

DEBUR.—A considerable lake in the Rajpoot territory of Oodeypoor or Meywar: it is about nine miles in length by five in breadth, and is fed by several streams flowing from the northward. On its southern side it has an outlet by a stream flowing into the Mbye river. Distant S.E. from Oodeypoor 30 miles. Lat. $24^{\circ} 12'$, long. $74^{\circ} 4'$.

DEBURA, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the river Raptée, 51 miles N.W. of Goruckpoor. Lat. $27^{\circ} 17'$, long. $82^{\circ} 58'$.

DECCAN, in its usual acceptation, implies the tract of country in Southern India, situate between the Nerbudda and the Kistna rivers. Properly speaking, however, it includes the whole of the territory lying south of the Vindhya Mountains, which separate it from Hindostan on the north. Taken in its latter extent, it comprehends the valley of the Nerbudda, and the narrow tract of lowland forming a belt round the coast of the Peninsula; and it occupies, in addition thereto, the vast expanse of triangular table-land, which, resting on each side upon the Eastern and Western Ghauts, is supported at its base by the sub-Vindhyan range, termed the Sautpoora Mountains. The seaward face of the table-land on the west, towards the Concan, though abrupt, is not precipitous, but consists of a succession of terraces or steps. In their northern section, the Ghauts, on this side of the Peninsula, attain an elevation seldom exceeding 3,000 feet; advancing southward, the range increases in height, Bonasson Hill being 7,000 feet above the level of the sea, and the peak of Dodapet, in the Neilgherries, having an elevation of 8,700. Near Cape Comorin, in the extreme south, and at the point of convergence with the range from the opposite coast, the Western Ghauts terminate abruptly in a peak about 2,000 feet above the sea. Their average elevation may be stated at about 4,000 feet. From the point of convergence, the Eastern Ghauts take a northerly direction. These last-mentioned mountains, at their southern extremity, may be characterized rather as detached groups and clusters of hills appearing at intervals, than as a regular range. About lat. $11^{\circ} 40'$, they assume the character of a continuous chain.

and, running along the coast of Coromandel in a direction a little north-west of the city of Madras, form a junction at Naggery, in lat. $13^{\circ} 20'$, with the main ridge, which crosses the Peninsula in a south-west direction, to the Neilgherries. Thence the Eastern Ghauts continue a northerly course, and terminate in about the same latitude as their counterpart of the opposite coast. Here uniting with the Vindhya zone, which crosses the continent from east to west, they constitute one side of the triangle upon which rests the table-land of the Deccan. In regularity and grandeur, the Eastern Ghauts bear no comparison with those of Western India; their average elevation does not exceed 1,500 feet. The intermediate table-land has consequently a gradual slope to the eastward, as indicated by the drainage of the country in that direction. All the principal rivers,—the Godavery, Cauvery, Kistna, and Pennaur, though deriving their sources from the base of the Western Ghauts, find their way into the Bay of Bengal through fissures in the Eastern Ghauts. According to Captain Newbold, "the mean elevation of the table-land around Bangalore and Nundidroog above the sea is 3,000 feet; northerly, towards Hyderabad, it sinks to 1,800 feet; and a little south of Bangalore, it falls, by rather abrupt steps, to the level of the plains of Salem, viz. 1,400 feet; whence to Cape Comorin the mean height of the country is about 400 feet. The average height of the low country between the Ghauts and the sea, on both the coasts of Coromandel and Malabar, may be roughly estimated at 200 feet, rising at the base of the mountains to 800 feet." On the Coromandel side, the slope to the sea is gentle, exhibiting the alluvial deposits borne down from the higher portions of the table-land; while that of Malabar is marked by a succession of irregular hilly spurs from the Ghauts, descending to the sea in abrupt cliffs. The central part of the Deccan is composed of waving downs, which, at one time, present for hundreds of miles one unbroken sheet of green lawns; but, in the hot season, bear the appearance of a desert, naked and brown, without a tree or shrub to relieve its gloomy sameness.

A general outline of the geology of the Deccan is all that the limits of this article will permit to be sketched. A writer, already quoted, observes, "Hypogene schists, penetrated and broken up by prodigious outbursts of plutonic and trappian rocks, occupy by far the greater portion of the superficies of Southern India. They constitute the great bulk of the Western Ghauts, from between the latitudes of 16° and 17° to Cape Comorin, and from the base of the Eastern Ghauts, from beyond the north limit of the Peninsula, to their deflection at Naggery, in lat. $13^{\circ} 20'$. They are partially capped and fringed in the Western Ghauts by laterite, and in the Eastern Ghauts by sandstones, limestone, and laterite. From Naggery to Cape Comorin, they form, with few exceptions, the basis of the plains of

the Carnatic, Arcot, the valley of Seringapatam, Salem, Trichinopoly, Coimbatore, Tanjore, Madras, Tinnevely, and Travancore; and, intimately associated with granite, the principal hills and ranges on the low lands south of the Salem Break and valley of the Cauvery. North of this valley, and above the break, they form the basis of the table-lands of Mysore, the Baramahal, Bellary district, part of Hyderabad, and the Southern Mahratta country; and present a ground-work on which will be sketched out, as accurately as the present imperfect state of information will permit, the circumscribed areas occupied by more recent aqueous strata. Towards the north-west flank of our area, almost in a line drawn diagonally across the Peninsula from Nagpore, by Beejapore, to the western coast, the hypogene and plutonic rocks disappear, emerging only occasionally under one of the largest continuous sheets of trap in the world." Compared, then, with some other countries, the geology of Southern India is clear and distinct in its principal features. It has been ascertained, partly from observation, and partly by means of specimens obtained from various sections of the country, that the entire basis of the Peninsula, and its principal elevations, are composed wholly of granite. Overlying the granitic floor, are the stratified hypogene rocks, the usual order of superposition: being gneiss resting immediately on the granite, followed by mica and hornblende schists, the two latter supporting clay-slate, statuary marble, &c. These rocks are wholly destitute of organic remains; for, although of aqueous origin, as attested by their stratified character, the sedimentary deposit has subsequently become crystallized by the effect of subterranean heat, and hence they are grouped by geologists in the metamorphic class. Ascending in the series, we next arrive at the fossiliferous strata. Here, in the order of superposition, limestone is the lowest, followed by varieties of clay and sand rocks. From various circumstances, arising chiefly from the paucity of the imbedded fossils, and from the failure of discovering among them the distinguishing genera, these varieties have not hitherto admitted of a detailed classification. These sedimentary rocks are overlaid by the trap formation, a volcanic product, fused by subterranean heat, and projected to the earth's surface, where it occasionally assumes a columnar form, but more usually may be traced in extensive sheets, covering a vast tract of country. Two rocks, of aqueous origin, peculiar to Southern India, are met with, capping trap and all other rocks, without reference to age or composition. These are laterite and regur. The former consists of an iron-clay. In its texture, it is full of cavities and pores, and contains a large quantity of iron. While in the mass, and excluded from the air, it is soft and readily cut; but upon being broken up and exposed, it soon becomes hard, and resists the effects of air and water better than brick. It is consequently one of the most valuable materials for building.

The maximum thickness of its beds does not exceed 200 feet, and these are not altogether destitute of organic remains. Regur is the black cotton clay, formerly supposed to be produced by the decomposition of trap rocks, but now regarded, and apparently more justly, as a marine deposit. One other overlying formation requires notice,—the calcareous substance termed *kunkur*, found on analysis to contain the elements of oolite and chalk. Its origin is referred to the action of thermal springs, charged with carbonic acid, bringing up lime in solution, and depositing it on the earth's surface. It is used as a rough building-stone, and universally employed to burn into lime.

The universal prevalence of granite and the hypogene rocks has been mentioned. It remains to describe the geographical position of the more recent and the overlying strata. Partial deposits of sand-rock, of a recent period, containing pelagic shells, are found scattered over the south-eastern extremity of the Peninsula; but the older sandstone and limestone beds are not met with south of Salem. The chief development of these older rocks lies in the district of Cuddapah, and again in Hyderabad, also in the Southern Mahratta country, and in the tract between the Godavary and the Kistna. A bed of shelly limestone occurs in the vicinity of Pondicherry, to which, from an examination of its fossils, geologists concur in assigning a more elevated position than to the limestone strata before described. The outpouring of the trap rock is distributed over a considerable portion of the Peninsula. It extends from the seashore, at the northern extremity of the Western Ghats, to its eastern limit at Nagpore and the banks of the river *Toonbudra*, and terminates southward on the seacoast, in the latitude of Fort Victoria or Bancot. Within these boundaries the landscape is marked by the usual distinctive features of basaltic rock; hills of tabular form rising from the general level, sometimes abruptly, in perpendicular masses; sometimes in steps, or terraces, piled one upon another, decked with magnificent forests, and producing beautiful and romantic scenery. From the southern termination of the trap, the laterite or iron-clay succeeds as the overlying rock, to Cape Comorin, covering the base of the mountains and the narrow tract that separates them from the sea, and occasionally exhibiting a succession of low rounded hills and undulations. It exists also in detached beds on the opposite coast of the Peninsula, expanding over a large surface near the south banks of the Pennar, crowning the loftiest summits of the Ghats, and of the table-lands in the interior. Regur, like laterite, overtops all other rocks, with the single exception of the most recent deposits. This soil is chiefly indebted for its fertility to its retentive power in regard to moisture. When its surface is dried to an impalpable powder, the substratum retains its character of a hard black

clay approaching to rock, usually moist and cold. "It occupies principally the elevated table-lands of the Ceded Districts, the Hyderabad, Nagpore, and Southern Mahratta countries. It is less common in Mysore, but is again seen in continuous sheets, from six to twenty feet thick, below the Salem Break, covering the lower plain of Coimbatore, Madura, Salem, Trichinopoly, Tanjore, Ramnad, and Tinnevely, to the vicinity of Cape Comorin."

Of the remote history of the Deccan little is known. Hindoo legend relates that it was invaded by Rama, king of Oude, when in pursuit of Ravan, the ruler of Ceylon, who had carried off his consort Siva; but the date of Rama's existence is involved in obscurity. An ancient distribution of the country into the national divisions of Dravira or the Tamul Country, Carnata, Telingana, Maharashtra, and Orissa, is, however, indicated by the five corresponding languages of the Deccan, all of which are derived from an origin totally distinct from the Sanscrit. In the fifth century before Christ, the Peninsula is stated to have been partitioned between the four kingdoms of Pandya, Kerala, Cola, and Chola. Passing, however, to authentic history, we learn that the first Mahometan invasion of the Deccan was attempted in the year 1294, by Alaudin, afterwards emperor of Delhi. Its object was restricted to the assault of Deogiri, the capital of Maharashtra; and this was successful, the city being captured and given up to pillage. A few years later, Alaudin extended his conquests over the whole of Maharashtra, Telingana, and Carnata; and in 1327 the reduction of the Deccan was completed by Mohammed Togluk. But the supremacy of the emperor was not of long duration: the Hindoo rajahs of Telingana and Carnata were the first to recover their possessions. Their success was followed by the general revolt of the Deccan, in 1347, when Hasan Ganga founded the Mahomedan dynasty of Bahmani. His independence was recognised at Delhi, and the power of the empire was thus driven across the Nertudda. In the struggles which ensued, the house of Bahmani succeeded in subverting the kingdom of Telingana, and, at a later period (1565), the fall of the monarchy of Bijayanagar or Carnata was effected, by the league of the Mussulman princes against Rajah Ram, at the battle of Talicote. Subsequent events tended to the dismemberment of the Bahmani empire; and its final dissolution gave rise to the independent Mahometan states of Beejapore, Ahmednuggur, Golconda, Bedur, and Berar. Of these the two latter, merging into one or other of the remainder, became extinct; and in the time of Shah Jehan, in 1630, the Deccan was divided into the three kingdoms of Ahmednuggur, Golconda, and Beejapore. The first of these became tributary to Shah Jehan in 1636; and in 1686, his son and successor Aurungezebo, subverting the monarchies of Golconda and Beejapore, the whole of the ter-

ritory previously severed from the empire was recovered, and the Deccan once more passed under the rule of Delhi. But though Aurungzebe now grasped the universal sovereignty of India, he was not destined long to retain it. The Mahrattas, who had previously attracted little notice, had emerged from obscurity during the reign of his father, and were now about to act a conspicuous part in the history of the Deccan. In the late imperial contest with Golconda and Bejjapore, they had shared the fate of the conquered; but their power and resources, though crippled, were not destroyed. The fortresses and districts of which they had been dispossessed were again fast falling into their hands; and upon Aurungzebe's retreat to Ahmednuggur, in 1706, they attacked the imperial army, and plundered its baggage. Ten years after the death of Aurungzebe, his successor concluded a peace with Saho, the Mahratta chief, and admitted his claim to levy tribute over the whole of the Deccan. The Mogul empire was now tending to its close. Asof Jah, whose descendants are known as the nizams of Hyderabad, had succeeded to the viceroyalty of the Deccan. He was subsequently promoted to the office of vizier at Delhi; but being disgusted with the court, and sensible that his power rested upon a solid foundation, he resigned his appointment, and returned to his government at Hyderabad. The Mahrattas, in the interim, had obtained a large accession of territory, and at the time of Asof's return, the chief authority of the nation was wielded by Balaji, one of Saho's principal officers, and subsequently the founder of the dynasty of the Peishwas. This able minister had laboured unremittingly to concentrate the power of the Mahrattas; and having succeeded, he usurped the authority of his master, and offered himself as a competitor for the sovereignty of the Deccan. But Asof deemed the power of his rival too formidable for resistance: he therefore applied himself to accomplish its reduction by means of dissensions among the principal chiefs; but, failing in his attempt, he finally effected a compromise with the Peishwa, and entered the lists himself as an usurper. The result was the foundation, on the part of Asof, of the Mahometan kingdom of Hyderabad, which still continues to be ruled by his descendants; and the formation, under the Peishwa, of a powerful monarchy, comprising the larger portion of the territories now included within the limits of the presidency of Bombay. The remainder of the imperial possessions in the Peninsula, with few exceptions, were held by chieftains subject to the supremacy of one or the other of these two potentates. Those north of the Toombuddra were distributed principally between the rajahs of Colapore and Berar, and Angria of Colaba, all of whom acknowledged some degree of dependence upon the Peishwa. Of the provinces south of the Toombuddra, the Carnatic and Tanjore were held under the feudal sovereignty of the Nizam. The Mysore, though previously

tributary to both Moguls and Mahrattas, assumed independence during the commotions of the times, and in the sequel became the prize of the Mahometan usurper Hyder Ali. In the extreme south, the petty state of Travancore, secured from invasion by its remote position, and by the sea and mountains which surround it, appears to have long enjoyed an uninterrupted freedom from foreign sway. The nabob of Kurnoul, Rajah Tondiman, the rajah of Coorg, and other inferior rulers, seized each on his own district, and rose to the rank of petty princes, acknowledging a feudal superiority, but maintaining their own exclusive right to internal independence.

Such were the changes introduced into the native governments of the Deccan in the earlier part of the eighteenth century. The possessions of European nations within the Peninsula afforded at that time no indication of future grandeur. A few petty settlements acknowledged the dominion of France and Portugal. The English occupied a station at Surat, and another at Madras; and these, with the island of Bombay, constituted nearly the sum of British territory in Southern India. In the subsequent contests for power which ensued between the native chiefs, the English and French took opposite sides. The results of these struggles proved unfavourable to the powers whose cause had been espoused by the French. Among the men of that nation most distinguished in India, both in war and negotiation, was M. Bussy, who established the French power and influence over the Northern Circars, so often referred to in the Indian history of the middle of the eighteenth century. These possessions, however, like most of the French acquisitions, remained to them only a very short time. Clive attacked them with a force from Bengal, and though opposed by a larger force, the skill, energy, and happy fortune which marked all Clive's enterprises, triumphed, and the Circars were transferred from the French to their great rival in India. Thenceforward the interests of France rapidly declined, the influence of the British rose in the ascendant, and a new empire was established in India. Within the limits of the Deccan the French still retain Pondicherry, with other minor settlements, and the Portuguese continue undisturbed within the slender territory of Goa and Daman; but important revolutions have occurred in the native governments within the Peninsula, from which the British alone, of all the European settlers in India, reaped any advantage. The diamembered provinces of Mysore, at the close of the first war with Tippoo, formed the earliest addition to their original acquisitions. A further annexation accrued upon the death of Tippoo, and the final partition of his dominions. This was followed by the incorporation with the British empire, of the Carnatic and Tanjore. Some years later, the forfeited possessions of the Peishwa tended to swell the extent of the empire. These acquisitions, with certain ceas-

sions from the Nizam, the subsequent conquests of Kurnool and Coorg, and the lapse, from failure of heirs, of Angria's territory of Colaba, and the raj of Sattara, constitute in the aggregate a continuous territory, stretching from the banks of the Norbudda to Cape Comorin. Its greatest length from north to south measures 1,000 miles, and its extreme breadth exceeds 800; and if Sindh and a portion of British Guzerat be excluded, the Deccan, as defined in this article, will be found to comprehend the provinces now distributed between the two presidencies of Madras and Bombay, with the several native states already enumerated.

It will be obvious that in so large a tract of country there must be a great diversity of people and great variations as to manners and character. In the countries connected with the British government of Bombay, the higher classes, everywhere in the East the most unmanageable, were in 1822 admitted by Mr. [unclear] to certain privileges. A great dislike existed towards the courts of law, and the privileged classes, of which there were three constituted, were exempted, the first totally, the second partially, from the strict process of the Adawlut; while a third class, composed of meritorious native military officers of the rank of *soubahdar*, were exempted from personal arrest. A commission was appointed, which took cognizance of cases involving claims upon the first two classes, and proceeded to dispose of them in a mode which, while securing justice, should be free from offence. The commission was subsequently abolished, and its duties transferred to an officer called "agent for *sirdars*."

DECCAN SHARAZPORE.—See **BAKKE-GURJE.**

DECKHALL.—A town in one of the native states known as the Cuttack Mehala, 39 miles N. from Cuttack, and 77 miles S.W. from Balasore. Lat. $21^{\circ} 1'$, long. $85^{\circ} 55'$.

DECTAUN. in a detached portion of the native state of Gwalior, a town belonging to Scindia, on the route from Mow to Baroda, 20 miles W. of former, 126 E. of latter. It is estimated to contain 1,000 houses, and about 5,000 inhabitants, and is the principal place of a *pargannah* of the same name. Elevation above the sea 1,231 feet. Lat. $23^{\circ} 34'$, long. $75^{\circ} 51'$.

DEKANUTPOOR. in the British district of Ahyugh, *lieut.-gov.* of the N.W. Provinces, a village on the route from the cantonment of Ahyugh to Agra, and 21 miles S. of the former. Lat. $27^{\circ} 35'$, long. $78^{\circ} 7'$.

DEEDWANA.—A village in the Rajpoot state of Joudpore or Marwar, 119 miles N.E. from Joudpore. Lat. $27^{\circ} 19'$, long. $74^{\circ} 30'$.

DEEG. in the territory of Bhurtpore, a town situate in a low tract, amidst numerous marshes and jhils, or small lakes, fed by the stream Maun Nye, conveying the drainage of a considerable country lying to the west. As

it is nearly surrounded by water during a great part of the year, it is then almost inaccessible to an enemy. Before dismantled by the British, its outline, the outer wall, was an irregular pentagon, the southern and longest side of which towards the middle curves inwards, or towards the north. At the south-west angle is the Shah Bourj, a high rocky mount, having on its summit an area of fifty yards square, and inclosed by a rampart, having four commanding bastions facing the four cardinal points. Within the walls, the fort, an extensive building with high rampart twenty feet thick, furnished with bastions, commands the whole town. Close to the west of the fort is the palace of the rajah, with a fine garden, inclosed by a high wall. The ground-plan of the garden is rectangular, 475 feet long and 350 wide; and on each side is a remarkably beautiful building. In the middle "is an octagonal pond, with openings on four sides, leading up to the four buildings, each opening having, from the centre of the pond to the foot of the flight of steps leading into them, an avenue of *jets d'eau*." These beautiful buildings, which are surpassed in India for elegance of design and perfection of workmanship only by the Taj Mahal of Agra, are constructed of a fine-grained sandstone, quarried of great dimensions at Roopbas, in the south-eastern part of the Bhurtpore territory. Deeg is a place of great antiquity. "The ancient name was Diragh, or Dirghapura, and will be found mentioned in the Skand Puran, and 4th chapter of the Bhagavat Mahatma." It became early one of the chief strongholds of the Jata, from whom, in 1776, it was wrested by Nujuff Khan, the powerful minister of Shah Alum. After the death of Nujuff Khan, however, it reverted to the rajah of Bhurtpore. Here, on the 13th of November, 1804, the army of Holkar was defeated by a British force, under the command of General Fraser; and the Jata, having taken a hostile part by firing on the victors, siege was laid to the place on the 16th of December following, and on the 23rd of the same month it was carried by storm. Subsequently restored to the Jat rajah, it, after the capture of Bhurtpore by the British, commanded by Lord Combermere, was surrendered without resistance, and dismantled. Distant W. from Kuttra 24 miles. Lat. $27^{\circ} 29'$, long. $77^{\circ} 25'$.

DEEGARKE. in the Rajpoot state of Joudpore, a village on the route from the town of Joudpore to that of Ajmeer, and three miles east of the former. The road in this part of the route, though sandy, is probably good, as *Bahman* travelled it on horseback, by moonlight, at the rapid rate of ten miles an hour. Lat. $26^{\circ} 17'$, long. $73^{\circ} 15'$.

DEEGH.—See **Diu.**

DEEGHYL. in the British district of Rohtak, *lieut.-gov.* of the N.W. Provinces, a considerable village on the route from Kurnool to Rewaree, and 76 miles S.W. of the former.

Water is abundant, though indifferent, and supplies are plentiful. Lat. $28^{\circ} 46'$, long. $76^{\circ} 41'$.

DEEGUCHEE.—A town in the British district of Sattara, presidency of Bombay, 61 miles E. of Sattara. Lat. $17^{\circ} 30'$, long. $74^{\circ} 59'$.

DEEHA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 795 miles N.E. of Calcutta by the river route, 13 S.E. of the city of Allahabad by the same. Lat. $25^{\circ} 19'$, long. $82^{\circ} 3'$.

DEEMLA.—A town in the British district of Rungpore, lieutenant-gov. of Bengal, 39 miles N.W. of Rungpore. Lat. $26^{\circ} 6'$, long. $88^{\circ} 55'$.

DEENANUGUR, in the Lahore division of the Punjab, a town situated on the right bank of the Baree Doab Canal, 89 miles N.E. of the town of Lahore. Lat. $32^{\circ} 10'$, long. $75^{\circ} 29'$.

DEENGROO.—A halting-place on a rivulet of the same name, on the southern declivity of the Shatul Pass. It is situated just above the limit of forest, in a tract having a rich soil covered with a close sward. Elevation above the sea 12,300 feet. Lat. $31^{\circ} 21'$, long. $78^{\circ} 1'$.

DEENGURH.—A town in the native state of Bhawalpoor, 32 miles S. from Bhawalpoor, and 116 miles N.W. from Beekaneer. Lat. $28^{\circ} 56'$, long. $71^{\circ} 49'$.

DEENHUTLA.—A town in the native state of Coah Behar, 61 miles N.E. from Dinajepore, and 10 miles S. from Behar. Lat. $26^{\circ} 7'$, long. $89^{\circ} 28'$.

DEEPLA.—A town in the British province of Scinde, presidency of Bombay, 162 miles E. of Kurrachee. Lat. $24^{\circ} 30'$, long. $69^{\circ} 40'$.

DEEROEE, a river of Assam, rises on the south-eastern boundary, in lat. $27^{\circ} 10'$, long. $95^{\circ} 21'$, and flows for about forty-five miles through the district of Seebpoor, to its junction with the Disang, a tributary of the Brahmaputra, in lat. $27^{\circ} 4'$, long. $94^{\circ} 41'$.

DEESA, in Guzerat, or dominions of the Guicowar, a town on the river Bunnass (western), the residence and possession of a petty Mussulman chief, styled the nawaub of Deesa, who is also nawaub of Pahlunpoor. There is here a British cantonment, which is situated on the left bank of the Bunnass, three miles N.E. of the town. Distance from Mbow, N.W., 301 miles; from Neemuch, W., 251; from Bombay, N., 370. Lat. $24^{\circ} 14'$, long. $72^{\circ} 5'$.

DEESAUN.—A river rising in the native state of Bhopal, a few miles north of the town of Seermow, in about lat. $23^{\circ} 28'$, long. $78^{\circ} 30'$, and at an elevation of about 2,000 feet above the sea. After a course of ten or twelve miles north, it passes into the British territory of Saugor and Nerbudda, through which it flows north-east sixty miles, to the south boundary of Bundelcund, which it enters in lat. $24^{\circ} 12'$,

long. $78^{\circ} 53'$, and flows through in a sinuous direction, but generally north, for 150 miles, falling into the Betwa on the right side, in lat. $25^{\circ} 48'$, long. $79^{\circ} 29'$; its total length of course being about 220 miles. Several torrents and small rivers fall into it, right and left, but none of any importance. It is crossed by a ford on the route from Banda to Gwalior, twenty miles above its mouth, and in lat. $25^{\circ} 34'$, long. $79^{\circ} 28'$, and has there "a sandy bottom, and water about knee-deep from November to June." Franklin regards it as the boundary between his rather arbitrary divisions of eastern and western Bundelcund. It abounds in fish, and is styled by Malcolm a fine stream; but it is not navigable.

DEESOORE.—A town in the Rajpoot district of Godwar, 75 miles S.E. from Joudpore, and 110 miles S.W. from Ajmere. Lat. $25^{\circ} 19'$, long. $73^{\circ} 39'$.

DEETAUN.—See DICTAUN.

DEGAON.—A town of Malwa, in the native state of Bhopal, 50 miles E. from Bhopal, and 56 miles S.W. from Sangor. Lat. $23^{\circ} 17'$, long. $78^{\circ} 10'$.

DEHGONG, in Guzerat, or territory of the Guicowar, a town on the route from Ahmedabad to Neemuch, 17 miles N.E. of the former, 165 S.W. of the latter. Population 8,000. Lat. $23^{\circ} 8'$, long. $72^{\circ} 50'$.

DEHPoor.—A town in the subdivision of Nassick, British district of Ahmednuggur, presidency of Bombay, 25 miles S.E. of Nassick. Lat. $19^{\circ} 53'$, long. $74^{\circ} 10'$.

DEHRA DOON.—A fertile valley at the south-western base of the lowest and outermost ridge of the mountains of the Himalaya, and forming with the pergunnah of Jounsar Bawur, a British district under the lieutenant-governorship of the North-West Provinces. The valley is inclosed on the north by the Jumna river, separating it from Sirmour and Jounsar; on the north-east by the mountains of native Gurhwal; on the south-east by the Ganges, dividing it from British Gurhwal; and on the south-west by the Sewalik range, separating this district from that of Saharanpoor. The length of the valley in a direction nearly from south-east to north-west, or from Rikkee Kasee on the Ganges, to Rajghat on the Jumna, is forty-five miles. Its breadth varies from fifteen to twenty miles. It lies between lat. 30° — $30^{\circ} 32'$, long. $77^{\circ} 43'$ — $78^{\circ} 24'$.

The mountains on the north-eastern frontier of the valley, towards Gurhwal, have an elevation of 7,000 or 8,000 feet above the sea; those of the Sewalik range from 3,000 to 3,500. The elevation of the bed of the Ganges at the confluence of the river Sooswa, at the south-eastern extremity, is 1,200 feet; that of the Jumna, at the confluence of the Asun, at the north-western extremity, is 1,403. Midway between those depressed extremities of the valley, a gently increasing elevation runs transversely from the Sewalik Mountains to

those on the north-eastern boundary, and divides the valley into two basins, that on the north-west drained by the Asun, and that on the south-east by the Sooswa, discharging themselves, as already mentioned, the former into the Jumna, the latter into the Ganges. The town of Dehra, situate on this ridge, has an elevation of 2,369 feet; the source of the Asun, an elevation of 2,148; that of the Sooswa, which river takes its rise a few hundred yards from the former, has the like elevation. These rivers flow along the north-eastern base of the Sewalik range, the surface of the valley in general having a considerable slope to that part, and in consequence, nearly all the supplies to those rivers proceed from the north-eastern side of the valley. The formations of the Sewalik are recent, or tertiary in the conventional language of geologists, and for the most part are composed of calcareous sandstone, clay conglomerate, or marl, containing a vast profusion of fossil remains of mammalia, fishes, reptiles, and testacea. The more elevated range on the north and north-east frontier consists generally of what in the same language are styled transition formations, compact limestone devoid of organic remains, clay-slate, greywacke, with occasionally dykes of trap and other stone, of supposed igneous origin, with extensive overlying beds of quartz sandstone, and in many places large beds of quartz. The transverse elevation connecting the Sewalik and north-eastern ranges, appears to be of loosely-aggregated diluvial formation, from the fact stated by Jacquemont, that the wells at the town of Dehra, situate on the crest, are nearly 200 feet deep.

The climate is marked by a range of temperature not inconsiderable. Dr. Royle states it to vary from 37° to 101°; and he adds, that snow occasionally falls in winter. In 1841 the mean heat of June, the hottest month, was 88°; of December, the coldest, 60°; and of the whole year, 74°. Other observations, made some years earlier, give results not greatly differing from these; the mean temperature of January, which in this instance was the coldest month, being 52°; that of June, the hottest, 86°; and that of the whole year, 70°. The most unhealthy months are July, August, and September, during which the periodical rains fall; and it is stated, that of the large number of individuals engaged in the extensive grants of land made by the government in 1837, not one person, European or native, escaped fever during the unhealthy period. Hopes, however, are entertained, that by clearance of the jungle and drainage of the swamps, the deadly malaria may be removed, or its effects materially mitigated. Arboresecent vegetation is greatly developed, and covers the uncultivated parts with dense and almost impenetrable forests, consisting of trees, many of which are common in more southern parts of India, and arboresecent species of genera of which the herbaceous ones are found

in the colder parts of the world. Here also occur plants found not only in Southern India, but even under the equator. The zoology is important, comprising the elephant, wild buffalo, tiger, leopard, hyæna, lynx, jackal, wild hog, bear, deer, and the four-horned antelope. Of quadrumanous animals, there are the langur (*Simia entellus*) and bandur (*Simia rhesus*). A species of python is met with, as might be expected in a tract so congenial to the nature of those reptiles. The soil is in general a deep rich mould, though in some places composed of shingle or gravel swept down by the torrents from the mountains. For the most part, the soil and climate are adapted to the successful growth of rice, maize, gram (*Cicer arietinum*), cotton, sugar, opium, hemp, indigo, plantain; and, according to a statement in a late work of good authority, "every English plant thrives luxuriantly in the Dhoon, where in March, April, and May, a splendid show of English flowers is to be seen in all the gardens." The eminent botanists, Dr. Royle and Dr. Falconer, who had ample means of local information, considered the south-western declivity of the range rising north of the Dehra Doon as well suited for the successful growth of tea. The result of the experiments made in consequence has amply justified the sagacity of their conjectures. Tea has been produced of a quality which has commanded the approval of the best professional judges. According to the latest reports, the plant was thriving in different localities, extending over four degrees of latitude and three of longitude, and it was believed that in Dehra Doon alone there were 100,000 acres suitable for its growth.

In 1837 extensive grants were made by government in the Dehra Doon. The terms were a forty years' lease, under which one-fourth was to be rent-free for the whole term, and the remainder for three years; after the expiration of which the twentieth part of the rent assigned was to be paid, rising annually in twentieths, until, at the end of the twenty-third year, the maximum rent of four annas per beegah, or twelve annas per acre, should become payable. The grants in the first instance amounted to something less than 30,000 acres, and the grantees having expended large sums in conveying emigrants and clearing and cultivating the lands, saw reason, as the year advanced, to anticipate their reward in crops of the finest quality; but on the setting in of the rains, the jungle-fever became so general, that from death, the prostration of disease disabling many who survived, and the departure of others in terrified flight, scarcely any hands remained to gather the harvest, which consequently rotted where it grew. The circumstances of the country, however, in regard to health, appear, as already intimated, to be improvable, and better results are looked for. It does not appear that the expectations of the grantees have been generally realized, as, in some instances at least, they have withdrawn from the speculation.

At the time the valley was wrested from the rajah of Gurwhal by the Goorkhas, it is said to have yielded an annual revenue of 10,000*l.*, though those invaders could never realize more than 2,000*l.* from it. Under British rule its prosperity has evidently advanced. The number of mouzahs or townships in Dehra Doon proper is 214. The area is 673 square miles, or 431,240 British statute acres.

Previously to the Goorkha invasion of the Dehra Doon, in 1803, it was regarded as the most valuable part of the dominions of the rajah of Gurwhal, who frequently resided at Dehra, and made his final stand at the village of Gurudwara, in its vicinity, where he was defeated and slain. The invasion of the valley by the British, in 1815, during the Nepal war, was marked by the obstinate though ineffectual defence which the Goorkhas made at Kalunga or Nalapani, and the fall of General Gillespie and a considerable number of men under its walls. On the final expulsion of the Goorkhas, it became a British district.

DEHRAH, the principal place of the Dehrah Doon, is situate on the crest of a ridge of moderate height, extending from the Sewalik range to that bounding the valley on the north-east. It is situate amidst an extensive and dense grove of very luxuriant mango-trees, and surrounded by verdure, the vicinity being watered by a torrent descending from the mountains. As the intermitting nature of the stream renders the supply of water from it precarious, the town is in dry weather supplied from several wells, nearly 200 feet deep. Jacquemont describes the place as a very large village, consisting of several cottages; and in a letter bearing date May, 1842, it is mentioned as "a large town, in the neighbourhood of which are many houses, the property of Europeans." Its situation is favourable for traffic, being at the intersection of the route from Hurdwar to Simoor with that from Saharunpore and the plains to the British sanitary stations of Mussoree and Landour, and to Western Gurwhal. Whatever may be the present prosperity of Dehrah, it must have resulted from British rule; for in the account of the trigonometrical survey of the Himalaya, drawn up about 1820, where it is noticed as one of the stations of small triangles, the town is said to be "small and poor." Mundy, writing eight years later, describes it as inconsiderable, but with good cantonments, and a handsome temple, built of stone, and embellished externally with designs in stucco. The elevation of this place above the sea is 2,369 feet. Distance N.W. from Calcutta 974 miles. Lat. 30° 19', long. 78° 5'.

DEHWAREE.—A town in the British district of Sattara, presidency of Bombay, 39 miles E. of Sattara. Lat. 17° 42', long. 70° 40'.

DEJBARA, in the British district of Broach, presidency of Bombay, a town on the headland bounding on the north the entrance

of the estuary of the river Nerbudda. Distance from Surat, N., 42 miles. Lat. 21° 41', long. 72° 34'.

DEINWAH.—A river rising in the district of Deogurh, territory of Nagpore, in lat. 22° 20', long. 78° 35'. After a northerly course of seventeen miles, it turns westward, and falls into the Samarsee river, in lat. 22° 33', long. 78° 6'.

DEJEKOTE.—A fort in Sind, belonging to Ali Moorad, ameer of Khyerpore, from which town it is distant eleven miles south. It is built on a range of low limestone hills, proceeding in a direction from south-east to north-west, and reaching the Indus at Roreo. It consists of a number of fortifications crowning several eminences, and connected by a single mud wall pierced with loopholes. Here, in January, 1843, the British army was encamped during the advance of Sir Charles Napier to destroy Emaum Ghur. Though stronger than most of the fortresses of Sind, Dejekote is open to capture by escalade. There is a large tower, which was intended to contain the treasure of the Ameer, and which is covered by an irregular outwork in a singular style. On the south side of the fort is a magazine and manufactory of powder. This fort is called also Ahmedabad. Lat. 27° 22', long. 68° 48'.

DEKAR.—A town in the British territory of Nagpore, 140 miles E. from Nagpore, and 172 miles W. from Sumbulpoor. Lat. 21° 30', long. 81° 20'.

DEKOOLEE.—See DEOKULLEE.

DEKTOWLI, in the British district of Mynpoore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Alighur to that of Etawah, and 34 miles N.W. of the latter. Lat. 27° 8', long. 78° 38'.

DELHI.—A British district within the limits of the lieutenant-governorship of the North-Western Provinces, so called from the celebrated city its principal place. It is bounded on the north by the British district of Paneeput; on the east by the Jumna, separating it from the British districts of Meerut and Boolundshuhur; on the south by Ballubgurh and the British district of Goorgaon; and on the west by the district of Rhotuck, and by Buhardoorgurh and Jhujur. It lies between lat. 28° 24'—28° 54', long. 76° 49'—77° 29', and has an area of 789 square miles. The population in 1853 amounted to 435,744. Of this number, 171,694 are returned as Hindoo and agricultural; 144,371 as Hindoo non-agricultural; 18,917 as Mahometans, and others not Hindoo, agricultural; and 100,762 of those classes non-agricultural. Nearly one-third of the entire population of the district is concentrated in the city of Delhi; and if the suburbs be included, the proportion will be found to exceed one-third. Exclusive of the city and its suburbs, the district is divided into two pergunnahs,—northern and southern. In both

pergunnahs, the Hindoo population greatly preponderates; but in the city and suburbs of Delhi, long the seat of a powerful Mahomedan monarchy, the two races exist in almost equal proportions. The eastern, northern, and north-western parts of this district are watered by the Jumna and its branches, by the Delhi Canal, or that of Ali Mardan Khan, and by the Hansouti Nullah, a torrent which, in the rainy season, expands into the Farrukhnagar Jhil, an extensive plash or shallow lake, discharging itself into the Jumna about two miles north of the city. The southern part is barren, with an uneven surface of rocky ridges. The aspect of the country is thus described by Dr. Royle:—"Delhi, the capital of Northern India, situate on the western bank of the Jumna, nearly at the upper part of the inclined slope which forms the plains of India, is elevated about 800 feet above the level of the sea. The soil is barren, and remarkable for its saline efflorescence; and the wells, for the brackishness of their water. The rocky soil, always exposed to the solar rays, absorbs much heat, and a high temperature, with considerable dryness, is produced in the hot weather; but from the openness of the country, and exposure to the winds which pass over extensive lakes in the vicinity, a greater degree of cold is produced in winter than we should otherwise expect. We do not, therefore, find in Flora round Delhi, such plants as Guttiferæ, Anonaceæ, and Strychnæ, which, requiring moisture with heat, flourish in the southern provinces of India. But the climate in general being favourable, and the minimum of cold not long-continued, we find many of the plants which are common in warmer parts of India, but which are not found at Saharunpore." The climate being in general dry, and the soil for the most part either sandy or rocky, requires consequently to be fertilized by frequent applications of moisture. The principal alimentary crops are barley, wheat, and pulse. The demand of government in this district, on account of the land revenue, amounted, in 1846-47, to 34,967*l*. The assessment has been fixed for a series of years, and is not liable to increase until the year 1870. The district is intersected by the grand trunk road from Calcutta, and is also connected with Meerut by means of an excellent road, completed some years ago. That a tract having inconsiderable natural resources, should for so long a period have contained the capital of a vast empire, seems extraordinary. It probably resulted from the progress of the conquest of Hindostan, previously to the British sway, having always been from the west to the east. Delhi, consequently, was found the best station for maintaining political and military communication between the Deccan and the great valley of the Ganges on the one side, and on the other the Punjab and Afghanistan, usually the base of operations to invaders.

DELHI.—A celebrated city, the principal

place of the British district of the same name, under the lieutenant-governorship of the North-Western Provinces. The site of the present city is a low rocky range, about a mile from the right bank of the Jumna, and on an offset of that river, which leaves the main stream five miles above the town, and rejoins it two miles below. The approach from the south-east, or the direction of Agra, is very striking, from the innumerable ruinous monuments of former prosperity and grandeur. "Everywhere throughout the plain, rise shapeless half-ruined obelisks, the relics of massive Patan architecture, their bases being buried under heaps of ruins bearing a dismal growth of thorny shrubs. Everywhere one treads on overthrown walls. Brick mosaics mark the ground-plan of the humbler dwellings of the poorer classes. Among the relics of a remote age, are occasionally to be seen monuments of light and elegant style of architecture, embellished with brilliant colours, gilt domes, and minarets encased in enamelled tiles." These surprising collections of ruins are the remains of the ancient city of Delhi, which, according to Wilford, extended above thirty miles along the banks of the Jumna. The present city, founded by Shahjehan in 1631, is about seven miles in circumference, and inclosed on three sides by a fine wall, which is interrupted towards the river. Shahjehan disposed along this defence a few weak towers scarcely projecting from it; but since the acquisition of the city by the British, it has been strengthened by large bastions, each mounting nine cannon. A ditch has also been excavated and the glacis raised. As the curtains are extensive, small external martello towers have been constructed, to bring the foot of the walls under the fire of musketry. The tops of but few houses appear above the ramparts, over which rise graceful acacias, and still overtopping these, lofty detached date-trees; while the minarets of mosques, and tombs shaded with the gloomy foliage of the salvadora, are scattered over the glacis. The Jumna Musjeed, or principal mosque, and the palace, displaying a very high and extensive cluster of towers and battlements, rise above all, and render the external aspect of the place very imposing. Franklin enumerates seven gates,—the Lahore, Ajmere, Turkoman, Delhi, Moor or Mohur, Caubul, and Cashmere. Bacon, who visited the place ten or twelve years ago, gives the same number, but styles the Caubul the Agra gate. The actual number, however, appears to be eleven,—the Cashmere, Lahore, Caubul, Buddurnao, Ajmere, Turkoman, Delhi, Rajghat, Negumbod, Lall, and Kaila gates. The last four are on the river face. The Cashmere gate has casemated apartments for the accommodation of the city-guard, which is stationed there. The streets are for the most part narrow, but the Chandni Chauk, or principal street, which runs north and south from the gate of the palace to the Delhi gate of the city, is a length of about three-quarters of a mile, is

fifty yards wide, having good slopes on both sides. It is also remarkably clean, a small raised watercourse flowing down the middle of the street in a channel of red stone. There is another large street running east and west, from the gate of the palace to the Lahore gate of the city, but it is inferior to the Chandni Chawk, though like it provided with a watercourse. The inhabitants have, however, spoiled the appearance of both by erecting houses in the centre and across the streets in some places, so that it is not without difficulty that their original course can now be traced. In the Chandni Chawk is situate the imperial palace, described by Heber as one of the noblest kingly residences he had ever seen; far surpassing the Kremlin, though not equal to Windsor. It is inclosed on three sides by a wall of red granite, a mile in circumference, and about forty feet high, flanked with turrets and cupolas. It is very beautifully built, and has two noble gateways, each defended by a barbican. On the remaining side it is defended by the river (the branch of the Jumna), over which is a narrow bridge, forming a communication with the old fort of Selimghur, on the eastern bank. That antique fort is supposed to have been raised by some early Patan sovereign, and is in a very heavy, massive style of architecture, devoid of ornaments, except a few rude carvings on the mouldings and cornices. The entrance to the palace is through a succession of noble and very lofty gateways, built of red granite highly sculptured; the principal one is described by Heber in the same terms which he applies to the palace generally. A splendid Gothic arch in the centre of the great tower is succeeded by a long vaulted aisle, like that of a Gothic cathedral, with a small open octagonal court in its centre, all of granite, and all ornamented with inscriptions from the Koran, and finely-carved flowers. The Dewani Khass, or "private council-chamber," is a pavilion of white marble, surmounted by four cupolas of the same material, and open on one side to the court of the palace, on the other to its garden. Its pillars and arches are exquisitely carved and ornamented with arabesques gilt and inlaid, flowers, and inscriptions, in the most elaborate Persian character. A rich foliage of silver, which formerly graced the ceiling, has been long since carried off. At present this splendid and tasteful hall is seldom entered by the emperor, and is in a very filthy state, being the retreat of crows, kites, and other unclean birds. The garden, though now quite neglected and desolate, was formerly extremely beautiful, and refreshed by numerous elegant fountains of white marble, supplied from an aqueduct of the same material. Within its inclosure is an octagonal pavilion of white marble, containing a fountain and an elegantly-ornamented bath, and consisting of three very large apartments surmounted by white marble domes; but all is now mutilated and defaced with dirt. The Moti-masjid, or private mosque for the court, is an elegant little building of white marble,

exquisitely carved, but, like the rest, neglected and dilapidated. The Dowrance-atna, or public hall of audience, is a large and splendid pavilion of marble, but now fallen into ruin and neglect, the throne, when seen by Heber, being nearly covered with pigeon's dung. Near the palace, and in the Chandni Chawk, is the small mosque of Roshan-a-Dowlah, from which Nadir Shah witnessed the massacre of the inhabitants of Delhi by his troops. The Jumma Masjid, or principal mosque, is situate on a small rocky eminence, of such height that the platform from which the structure rises, overtops the adjacent houses, and is thirty feet above the general level of the city. This platform or court, a square of 450 feet, is paved with red stone, and on each of three sides is entered through a large gateway, approached from below by flights of stone steps. In the middle is a marble reservoir for water, filled by several fountains supplied from a canal by means of machinery, and intended for the ablutions required in the Mahomedan ceremonial. On three sides the court is skirted by open arcades, with octagonal pavilions at convenient intervals; the west is occupied by the mosque, a splendid structure of an oblong form, 261 feet in length, and approached by another magnificent flight of stone steps. The whole front is faced with large slabs of fine white marble, and along the cornice are ten compartments, four feet long and two and a half broad, inlaid with numerous inscriptions from the Koran, in the Naskhi character, executed in black marble. The interior is paved with flags of white marble, three feet long and a foot and a half broad; and the walls and roof are lined with the same material. The structure is surmounted by three domes of white marble intersected with black stripes, and at each extremity of the front is a minaret of considerable height, and having a winding staircase of 130 steps of red stone, by which access is obtained to the summit, whence is a fine and extensive view of the city, with its palaces, mosques, and battlemented walls, as well as of the surrounding country, widely overspread with monuments and other buildings in every stage of decay. Attached to the mosque is a large and deep well, said to be excavated in solid rock, and from which the water is raised by means of complicated machinery and a succession of reservoirs. In 1809, the machinery became so much decayed as to be unserviceable, until repaired by the British authorities. Hamilton seems to intimate that the fountains in the court of the mosque are supplied from this source, and not from a canal, as stated by Heber. The Jumma mosque was commenced by Shahjehan in the fourth year of his reign, and completed in the tenth, at an expense of about 100,000*l*. English money. Authority was given in 1851 for the repair of the building. Of the other religious buildings, the only one worthy of much notice is the Kala Masjid, or Black Mosque, so called from the dark hue given it by time. It is a structure of no great size, in a plain

massive style of architecture, according to the plan of the primitive Arabian mosques, and consists of a square court, surrounded by an arcade, and surmounted by numerous small ill-shaped domes. It is generally supposed to have been built by some of the early Afghan sovereigns. Near the Chahmhere gate is an English church, erected at the cost of 10,000*l.*, by the munificence of Colonel Skinner, a highly distinguished commander of irregular troops in the East-India Company's service. Though above one-half of the population of the city consists of Hindoos, their temples are mean, in consequence perhaps of the general poverty of the votaries of the Hindoo creed. The many gorgeous palaces of the nobles of Delhi, which once gave so splendid an aspect to the city, have been in a great measure demolished, the beams and other wood-work having been torn away for fuel by the Mahrattas and Rohillas. Considerable improvements have, however, taken place since the acquisition of the city by the British, who have made it more cleanly, built a codit of justice, and, for the resident, a palace, which is surrounded by several fine houses in the Italian style of architecture. A great number of houses have also been built by the native inhabitants, the number of whom is considerably on the increase.

During the prosperity of the city, all parts were copiously supplied with water by means of a canal, made, at vast expense and with much difficulty, by Ali Murdan Khan, a munificent Persian, of great ability, and high in command under Shahjehan. Drawing its supply from the canal of Feroz Shah, near Rair, a distance of seventy miles, this great watercourse, as it approaches the city, is conducted along the summit of a prolonged artificial mound, of such an elevation that the bottom of the channel is much higher than the surrounding country; holding its course, by means of an aqueduct of masonry, over a considerable depression, and skirting the north-eastern base of the range of rocky hills stretching westward from Delhi, the stream is finally led across it, in a channel cut through the solid rock for nearly three miles, being twenty-five feet in breadth, twenty-five in depth, generally, but in one place sixty feet. It then enters the city, and, passing through it by an open channel, traverses another long extensive aqueduct, by which it reaches the palace, throughout the whole of which it ramifies, in open or covered courses, having outlets to the Jumna; thus diffusing constant streams of fresh water. In like manner, in the space between the range of hills and the palace, numerous under-ground channels were cut, leading to the various residences of the nobles, and the different divisions of the city; yielding to the whole city and its suburbs a supply of good water, from open well-shafts connected with these subterraneous water-courses. On a review of the ancient works in Delhi connected with the canal, it is obvious that money must have been expended with a most lavish hand, to effect even that of which the existence

is known; and much is yet hidden in the ruins of the neighbourhood. According to Polier, a watercourse ran through every principal street; and such a copious and pure supply was inestimable to Delhi, as the water of the Jumna in the neighbourhood of the city, impregnated with natron, is disagreeable and unwholesome. If, as stated, Ali Murdan Khan served Shahjehan from 1638 to 1656, the canal must have been made in that interval. The resulting revenue appears to have been assigned as a remuneration to the officer who provided for the requisite repairs; as Safdar Jang, the father of Shoojah-oo-dowlah, the nawab of Oude, is alleged to have derived an annual revenue of 250,000*l.* from it. In the course of the revolt of Safdar Jang, in 1752, and the subsequent disorders and disasters of Delhi, the canal went to ruin, and the supply of water was cut off; and though subsequently restored, at a cost of 10,000*l.*, by Ahmed Shah Durrane, in one of his temporary occupations of the city, it again became unserviceable through neglect, and the supply was interrupted, until, in 1820, the requisite repairs having been effected by the British authorities, the watercourses and conduits of the city were again set flowing, to the unspeakable joy of the inhabitants, who went out in jubilee to meet the stream, throwing flowers and other offerings into the water, and imploring blessings on the government. When the prosperity of Delhi was at its meridian, there was, near the left bank of the Jumna, opposite the palace, an imperial preserve and pleasure-ground, surrounded by numerous palaces of the nobles; and to supply these, as well as to irrigate the Doab, Ali Murdan made another canal, which, drawing its supply from the Jumna on its left side, nearly opposite the commencement of Feroz Shah's work, proceeded in a direction in some measure parallel with the parent stream, for a distance of 135 miles, and rejoined it abreast of the city. This work, known by the name of the Doab Canal, having also gone to ruin through neglect, was repaired by the British authorities, and the flow of water restored, in January, 1830.

According to a recent census, the city of Delhi contains 152,406 inhabitants; of which number 76,372 are stated to be Hindoos, and 76,034 Mahomedans. According to a table, published in the local Gazette, of the amount of traffic crossing the bridge of boats at Delhi, in 1852, the number of buffaloes is returned at upwards of 100,000, of mules and ponies 84,000, and of hackeries 65,000. The Delhi College is under the management of a local committee or council, composed partly of European and partly of native members. The college was founded in 1792. In 1829, Nawab Itmad-ood-Dowlah, formerly minister of the king of Oude, endowed the college with the sum of 170,000 rupees, the interest of which produces 7,253 rupees per annum; and this sum, added to the government grants and assignments, raises its gross receipts to the sum of 40,580 rupees per annum. The insti-

tution is divided into four departments,—English, Arabic, Persian, and Sanscrit. At the time of Heber's visit, in 1824, the exterior of the palace of the emperor was guarded by the troops of the East-India Company, but the internal duties were performed by a provisional corps, raised in the name of the local sovereign, and nominally under his orders. During Bacon's visit, several years afterwards, one corps in the East-India Company's service was stationed within the city, the remainder of the garrison being cantoned outside the walls. The arsenal is situate on the bank of the Jumna, and at the time of the visit of Von Orlich, in February, 1843, contained 110 guns of different calibre, and other arms of various kinds, arranged with great care and taste. The powder-magazine, until a very recent period, was situate within the walls of the city. Its dangerous position was brought to notice in the year 1850, and orders were given for its removal. The surrounding country is widely overspread with ruins, principally of Indreput or Delhi, the seat of empire previously to the foundation of the present walled town of Shahjehanabad. This scene of desolation extends from the garden of Shablimar, north-west of the present town, to some distance beyond the Kutb Minar, nine miles south of it. Even on the north-west, where the extent of dilapidated remains is smaller, the road is a "continued avenue of ruined tombs, gardens, serais, and palaces," up to the walls of Delhi. A few hundred paces to the south of the present city, is the Kotela, or citadel of Feroz Shah, formerly the fortress of the old city, within the north-western angle of which it is situate. The works of this citadel were very extensive; but the architecture is clumsy in style and rough in execution, and has no pretence to sought but strength. Rising from the terraced roof of a building at the bottom of the courtyard, is a pillar, popularly called the Lath or Staff of Feroz Shah, the visible part measuring thirty-seven feet in length, and ten feet four inches in girth at the base. It is a single shaft of red sandstone, without any joint, and is thought by Prinsep to have been quarried in the Sewalik Mountains at Rajpur, on the bank of the Jumna. About a mile and a half south of this is the tomb of Humayon, the emperor, who, after being driven from his kingdom, succeeded in re-establishing the Mogul dynasty on the throne of Delhi. It stands in the middle of a platform 200 feet square, supported on every side by arcades, and ascended by four great flights of stone steps. Each arch of the arcades serves as a receptacle of one or more tombs. The mausoleum of the sovereign, rising on the platform, is a noble building, of a square form, constructed of red stone, inlaid with marble, and surmounted by a large dome of the latter material, the style of architecture approaching to that usually termed Saracenic. In the interior is a large circular apartment, in the middle of which is

a small white marble sarcophagus, containing the remains of Humayon; and around are smaller apartments, in which are entombed his relatives and more favoured retainers. From the top of the building, the view is striking, being on every side over a wide expanse of ruins, which to the westward extends to a range of hills seven or eight miles distant. Some hundred yards west of this mausoleum is a collection of burial-places and small mosques, the most remarkable structure being the tomb of Nizam-ood-deen, a reputed Muslim saint, which building is ornamented with elaborate and elegant carvings in white marble. Around, most of the deceased members of the present imperial family lie buried, each within a small inclosure of elegant lattice-work, executed in white marble. Among these monuments is that of the Princess Jahannara, a daughter of Shahjehan. About two miles west of the tomb of Humayon, and four miles south of the city, is the mausoleum of Safdar Jang, vizier of the empire in the middle of the last century, and ancestor of the present king of Oude. It is composed of arcades, surrounding a large octagonal dome, built of white marble and red sandstone, arranged in alternate parallel perpendicular sections, and contains in its interior the body, deposited in a white marble sarcophagus, beautifully carved.

A few hundred paces west of the city is an observatory of enormous size, which (as well as similar structures at Jeypoor, Muttra, Benares, and Onjein, respectively) was made by Jeyasingh, rajah of Amber, who was employed by the emperor Mohammed Shah to reform the calendar. Nine miles south of the city is the celebrated Kutb Minar, probably the highest column in the world. It tapers regularly from the base to the cupola, which, according to Franklin, is capable of containing a dozen persons. The exterior is for a great part of the height adorned by fluting, there being twenty-seven projections, alternately round and angular. The column is surrounded by four balconies or galleries, supported by large stone brackets, and having small battlements, which, while they have an ornamental effect, afford some slight security to those who venture on such a giddy footing. In 1803, the column was injured by lightning and earthquake; and either from those causes, or from the more gradual influence of time, many stones on the west side have been displaced, so as to cause a vertical crack in the staircase and central pillar. A British officer of engineers has repaired the damage to a considerable extent, and has performed the task with great architectural skill. According to Bacon, the undertaking was a very bold one, as a very large portion of the masonry at the base of the pillar must have been removed before the new could be substituted. "The native masons," he observes, "generally a most hardy and adventurous set, were with the greatest possible difficulty brought to put their hands to

the labour." At no great distance from this column, is the burial-place of the unfortunate emperor Shah Alum, and close to it the country residence of his successors, "a large but paltry building, in a bad style of Italian architecture, and with a public road actually leading through its courtyard."

In the absence of direct observations respecting the elevation of Delhi above the sea, an approximate estimate may be safely made from careful observations at no great distance. The height of Dasna, sixteen miles due east of the channel of the Jumna, abreast of Delhi, is 821 feet. The slope of the surface from that part of the doab to the river is very gentle, and if assumed at two feet per mile, it will give the elevation of that part of the channel at about 790 feet. Farther, the elevation of Gurgaon, seventeen miles south-west of Delhi, is 817 feet, and as, during the rainy season, an extensive and nearly stagnant piece of water extends between the two places, the inclination of the surface from the former to the latter cannot be great; though undoubtedly there is some declension, as the drainage of the jhil or swamp is into the Jumna, at Delli. The elevation of Delhi, therefore, does not probably vary much from 800 feet. A series of observations, extending over a period of three years, gives the following as the mean temperature in the daytime, of the respective months:—January, 56°; February, 61°; March, 72°; April, 83°; May, 91°; June, 92°; July, 86°; August, 83°; September, 83°; October, 77°; November, 65°; December, 58°. Delhi may be regarded as a rather arid district; the fall of rain in 1842 is reported to have been only ten inches. That year, however, was considered a very dry one, even more so than 1837, in which the deficiency of rain was productive of dreadful famine. Smart frosts during the nights of mid-winter afford the means of producing ice, to be stored for a relief during the heats of summer. The earth, which is generally impregnated with mineral salts, especially salt-petre, is moulded into round shallow pans, into which water is poured to the depth of about an inch, and they are set out in rows on layers of split bamboos or hurdles, covered with straw. The frost of the night is sufficient, under such management, to produce ice, which is carefully removed in the morning, and deposited for preservation in deep pits.

Indraprestha or Indraput, the city which formerly occupied the site of the modern city of Delhi, is alleged to have been founded by Yudisthira, whose demise, according to the extravagant chronology of the Hindoos, occurred in the year 3101 before the Christian *era*. It ceased for several centuries to be the seat of regal government, until re-established by the adventurer Anungpal. About the year 980, the rajah of Delhi is mentioned as a member of a Hindoo confederacy defeated by Sebektigin, the Ghaznevide, in the Punjab; and again as a member of a similar confederacy, experiencing a like fate from Mahmood

of Ghuznee, in 1008. Ferishta, however, in recounting the expedition of that ruler to Kaunouj, which was undertaken in 1017, and the subsequent expeditions by which, in 1021 and 1023, he penetrated to Kalleenjur, makes no mention of Delhi; though in all three enterprises the routes of the invader must have lain at no great distance from it. But on the invasion of India, in 1191, by Mohammed Shahab-u-din of Ghor, Delhi appears as one of the four great Hindoo powers. It was then held in union with Ajmeer, by Pirthi or Pritwi Raj, a Rajpoot prince, who having, on the plains of Sirhind, given battle at the head of a force, according to native estimate comprising 300,000 horse and 3,000 elephants, besides infantry, was defeated, made prisoner, and put to death by the invader. Kutb-ou-deen, a lieutenant of the victor, took Delhi in 1193, and established there an independent Mahomedan dynasty, known among the Oriental historians as that of "the slaves of the sultans of Ghor." In 1288, the Khiljis or Giljis, adventurers from Afghanistan, having murdered the reigning prince, Keikobad, succeeded in transferring the sovereignty to Jelal-ood-deen, one of their number, and established the Khilji dynasty, which lasted till 1321, when it was terminated by the assassination of Sultan Mobarak, and the supreme power was transferred to Gheias-ood-deen Toghluks, the founder of the Toghluks dynasty. In the reign of Mahmud, of this dynasty, the Tartar conqueror Tamerlane invaded India; and, in 1398, marched to Delhi, the operations against which he prefaced by massacring in cold blood his Hindoo prisoners, reported by native authorities to have been 100,000 in number. After a brief resistance, Mahmud, the sovereign of Delhi, took to flight, the town was plundered and burned, and the inhabitants butchered. According to the account of a panegyrist of the invader, "high towers were erected of their heads, and their carcasses were left a prey to birds and beasts: never were such carnage and desolation known." The stay of Tamerlane in Delhi was only of sufficient length to enable him to complete the series of barbarities by which his visit is rendered infamously memorable; and after his departure the city and the adjoining territory remained for nearly half a century in an unsettled state, until the sovereignty was acquired, in 1450, by Behlol, of the Patan or Afghan tribe of Lodi. His grandson, Ibrahim, was, in 1526, defeated and slain, at the battle of Paniput, by the renowned Baber, whose lineal descendant, popularly called down to a late period the Great Mogul, is at present the titular sovereign. Baber's son and successor, Humaion, was, in 1540, defeated and expelled from India by Shir Khan, an adventurer of Patan descent; but receiving assistance from the king of Persia, Humaion recovered his sovereignty in 1554, by a decisive victory which he gained at Sirhind. The progress of the power of the Moguls in India was more rapid

even than that of the British in the same country; as in the reign of Akbar, the son and successor of Humaion, the empire extended from Chittagong in the east, to Candahar in the west, and from Bultistan or Little Thibet in the north, to the southern boundary of Berar at the opposite point. Subsequently, the southern frontier was for a short period extended by the conquests of Aurungzebe to Tanjore. The empire was originally distributed into twelve soubahs or vice-royalties, but the number was ultimately increased to fifteen, for the purpose of comprehending the additions which were the fruits of Akbar's later conquests. The assessed revenue of Akbar, settled by him in the fortieth year of his reign for a term of ten years, amounted to 9,07,43,881 sicca rupees, or about eleven millions sterling. Elphinstone, from Abulfazl, estimates the number of persons bound to render military service at 4,400,000, but the whole number at one time actually drawn out, did not probably much exceed 200,000 cavalry, and about 20,000 infantry and artillerymen. Bernier, who considered the army which Prince Dara, the son of Shah-jehan, led against his brother Aurungzebe, as inferior to none ever mustered in India, estimates it at 100,000 cavalry, 20,000 infantry, and eighty pieces of artillery. The treasure accumulated by Shahjehan amounted, according to report, to six millions sterling, exclusive of jewels and gorgeous furniture of much greater value. The harem of Akbar was maintained on a scale of great magnificence. In the Ayeen Akbery it is described as "an inclosure of such immense extent as to contain a separate room for every one of the women, whose number exceeds 5,000." By the conquests of the successors of Akbar, especially Aurungzebe, the extent and revenues of the empire were vastly increased, though perhaps with little, if any, advance of its actual power. The empire of Aurungzebe is stated to have been divided into twenty-one soubahs, assessed in the aggregate at 37,724,615*l*.

But this prosperity was only the prelude to rapid and total decay. The chiefs of Rajpootana became alienated from the throne of Delhi; a spirit of insurrection and fierce hostility pervaded the Sikhs, Mahrattas, and others; and, after the death of Aurungzebe, in 1707, his feeble successors became the helpless instruments of conflicting chiefs and parties. His grandson, Jehandar Shah, was, in 1713, deposed and strangled, after a reign of one year. Farokshir, the next in succession, met the same fate in 1719; in the course of which year two other occupants of the musnud passed thence to the grave. Rennell observes, that, "in eleven years from the death of Aurungzebe, five princes of his line who had mounted the throne, and six others who had been competitors for it, had been disposed of; and the degraded state of the regal authority during this period had introduced an incurable anarchy, and a disposition in all the governors of pro-

vinces to shake off their dependency on the head of the empire. From this time," he continues, "affairs declined very rapidly." During the reign of Mohammed Shah, who ascended the throne in 1719, the dismemberment of the empire to a vast extent took place, through the encroachments of the Mahrattas, who, in 1737, under their leader Bajee Rao, pushed their attacks to the gates of Delhi; and the usurpation of Asaf Jah, the Nizam-ool-mulk, and viceroy of the Deccan, who made himself the virtually independent ruler of the spacious realm now known as the territory of the Nizam. These disruptions, and the consequent weakening of the empire, tempted the invasion of Nadir Shah, the barbarous usurper of the sovereignty of Persia, who, having overrun the greater part of Afghanistan, crossed the Indus at Attock, and marched upon Delhi. He was met, on the 13th February, 1739, at Kernaui, by the Mogul army, which there experienced so decisive a defeat, that the invader occupied Delhi without farther resistance. Whilst engaged there in levying a heavy contribution, the Persian troops were rashly attacked by the populace, who destroyed several hundreds of them. Nadir attempted to restore order, but in vain; and being placed personally in some danger, he gave orders for a general military execution, which were acted upon with terrible fidelity. The massacre of the inhabitants continued from the dawn of light till the day was far advanced. Fifty-eight days after his arrival, Nadir marched from Delhi homewards, bearing with him plunder, the amount of which could not be much less than twenty millions sterling. At the same time Mohammed Shah ceded to Persia the greater part of the province of Tatta, commensurate with the tract now called Sind, and all the possessions of the Mogul empire west of the Indus. In other quarters, the empire was shorn of extensive provinces. Bengal disclaimed the sovereignty of the Mogul, and the Rohilla Patans, taking advantage of the disasters inflicted by Nadir, and the confusion subsequently caused by the invasions of the Dooranees, assumed independence in 1749, in the tract extending from Oude to the Jumna. Safdar Jang, the nawaub of Oude, made himself independent in that province. The Mahrattas, in addition to the encroachments in the Deccan, which have been already noticed, made themselves masters of Guzerat, Berar, and Orissa, and Malwa was divided between them and several native princes and zemindars; Ajmeer reverted to the Rajpoots, and the Punjab was, in 1752, ceded to Ahmed Shah Dooranee, of Cabul. Ahmed Shah, the Great Mogul, who had succeeded to the shattered sovereignty of Delhi on the death of his father, in 1748, was, in 1754, deposed and blinded. In his reign, the dismemberment of the empire may be regarded as completed, and on the accession of his successor, Alumghir II., nothing remained to the house of Tamerlane but the spoiled and decayed metropolis, which

itself, in 1756, was taken by Ahmed Shah Dooranee, and, in 1758, by the Mahrattas. The last-named people, now aiming at the entire empire of Hindostan, collected, under the command of Sedashio Bhao, their forces, estimated at about 70,000 cavalry and 80,000 infantry, and were, in January, 1761, encountered at Paniput by Ahmed Shah Dooranee, at the head of a confederate Mahomedan army of nearly equal number, when the Mahrattas were totally routed, their commander and the greater part of their army being cut to pieces. Shah Alum, whose right to the titular sovereignty accrued on the assassination of Alungir, in 1759, was at that time a fugitive in Bengal, and his son Jewan Bukht, a youth of thirteen years of age, was, under the name of Shahjehan, recognised shah of Delhi, by Ahmed Shah Dooranee. Shah Alum, however, assumed the title of Padshah, and coming into collision with the forces of the English East-India Company, was defeated by them at Patna, in February, 1760. Subsequently he threw himself on the clemency of the British, and in 1765, obtaining from the East-India Company an assignment of territory yielding a revenue of 260,000*l.*, he made over to them the Dewanny of the provinces of Bengal, Bahar, and Orissa, which was virtually a grant of the provinces themselves. In 1771, Shah Alum, determined at all hazards to try his fate at Delhi, left Allahabad, the residence assigned him by the British authorities, and made over to the Mahrattas the territory and revenue allotted to him by the arrangement of 1765. But the proposed transfer was of no avail to the Mahrattas, as the British authorities, regarding the alienation of the districts as an abandonment, did not hesitate to resume the grants; and the short-sighted emperor, having entered Delhi on the 25th December, 1771, found himself there the destitute and helpless captive of the Mahratta chief Madhaji Scindia, who became the real sovereign of the capital and the adjoining territory. The power of Scindia being weakened by various causes, Ghulam Kadir, a Rohilla chief, son of Zabithah Khan, and grandson of Najib-ood-dowla, who had made a great figure in the affairs of Delhi during the time of Ahmed Shah Dooranee and Alungir, gained a footing there; but his conduct to Shah Alum was more intolerable than even that of the Mahrattas, and the Shah wrote to Scindia, urging him to march to his deliverance. The correspondence having been treacherously disclosed to Ghulam Kadir, he forcibly entered the palace of the captive emperor, struck out his eyes with a dagger, seized his scanty treasures, and subjected the females of his family to plunder and outrage. This dreadful consummation of the emperor's adversity took place in 1788, when he was about sixty-five years of age, and had nominally reigned about twenty-nine years. Ghulam Kadir shortly after fell into the hands of Scindia, who put him to death with ostentatious cruelty. Under the Mahrattas, Shah Alum

long suffered neglect and abject poverty; nor was his condition improved when the command of Delhi was intrusted by that power to Perron, the French adventurer; for though a sum of about a hundred thousand pounds sterling was nominally allotted for the annual expenditure of the royal household, not much more than a fifth of that sum was ever actually disbursed. On the 8th September, 1803, the British army, under General Lake, marching from Allypore on Delhi, came in front of a superior Mahratta force, under command of Louis Bourquien, a French adventurer, and advantageously posted on the left bank of the Jumna to defend the approaches to the city. There the army of the Mahrattas was utterly routed with great slaughter, a vast number of their men being driven into the Jumna and drowned, and all their artillery and stores falling into the hands of the British. Delhi thereupon, without farther resistance, admitted the conquering army, and the Mogul emperor was taken under the protection of the East-India Company, an allowance being assigned for his support. By the twelfth article of the treaty of Serje Anjenjaum, signed 30th December, 1803, between the East-India Company and the Mahratta leader Dowlut Rao Scindia, the latter "renounces all claims upon his majesty Shah Alum, and engages, on his part, to interfere no further in the affairs of his majesty." In October, 1804, the Mahratta chief Jeswunt Rao Holkar, having under his command about 70,000 men, with 180 pieces of cannon, laid siege to Delhi; the British force in which consisted of but two battalions and four companies of native infantry, two corps of irregular horse, two corps of irregular infantry, and a corps of matchlock-men. Most of the irregular troops deserted, yet Lieut.-Colonel Burn, in command of the garrison, took measures for maintaining, with his very inadequate force, the whole line of defences, though nine miles in circuit, and in a very ruinous state. The operations of Holkar were materially crippled by a sortie, in which the guns of his breaching-battery were rendered unserviceable, and after an ineffectual attempt at escalade, he drew off his army with such haste, that three mines, laid for the destruction of some bastions, were left unexploded. General Lake, whose approach caused the siege to be so precipitately raised, reached the city three days afterwards. The unfortunate Shah Alum died in 1806, at the age of eighty-six, and was succeeded by his son Akbar, who, dying in 1837, at the age of eighty, was succeeded by the present Padshah, Mohammed Bahadur.

The prestige of the name of the Mogul throughout India, long after the nominal ruler of Delhi had ceased to possess any real power, was remarkable, and rendered expedient a jealousy on the subject which the real condition of the latter state would not otherwise have warranted. The feelings of deference for the throne of Delhi extended to provinces very remote from the seat of its former grandeur,

and to Hindoos not less than to Mahomedans. It was in fact universal. In 1813, the Tamburetty, or princess of Travancore, a Hindoo state situate near Cape Comorin, and never subject to Delhi, applied for a dress of investiture from the Padshah, for her infant son, though he was under the guardianship of the British government. It was with some difficulty that her desire was overcome; and though compelled to acquiesce in the decision of the British authorities, the applicant was by no means satisfied that the coveted investiture was unnecessary or improper. The universal respect entertained for the Mogul authority, and even for its semblance (of which the above is an instance), has rendered it necessary that the British government should discountenance as far as possible any assumption of regal or imperial dignity on the part of the representative of the great Mahomedan power which once was paramount in India, and the head of the house of Baber is fast subsiding into the station of a subject. The British government long since disallowed his pretensions to coin money, to establish weights and measures, to confer title or command, except within the limit of his own household. The pride of the Mogul is said to have been wounded by Lord Hastings, when governor-general, having remained seated during an interview. So early, however, as 1805, the presentation of nuzzur or offerings by British functionaries was subjected to check; the Marquis of Hastings and Lord Amherst restrained it still further, and a later governor-general, Lord Ellenborough, forbade it altogether, and substituted a pecuniary equivalent, which, after some hesitation, was accepted by the king. More recently an arrangement was made with the heir-apparent, by which the palace of Delhi was to be given up to the British government, the members of the royal family over whom he should continue to exercise jurisdiction (the number of such persons being considerably abridged) removing to another residence; but the heir-apparent having recently died, further arrangements with regard to the future privileges of the family will be rendered necessary. The formal title of the Delhi sovereign is Padshah or Badshah; and so late as 1806 he has been styled by Hindoos raja of Indraprestha. The official name of the city, in the documents of the Padshah, is Shahjehanabad. The number of persons connected with the Padshah, by consanguinity more or less remote, is considerable; and from the extension of their families and the withholding by the king of their due share of the allowances granted by the British government, they are said to have been sometimes subject to great distress. The king received compensation for the discontinuance of emoluments derived from nuzzur, or offerings made in recognition of his superiority, but still did not escape the pressure of debt. It was proposed a few years since, to increase the royal allowances (previously about twelve lacs

per annum), by the addition of three lacs, on condition of due provision being made for claims of dependants. His majesty did not at first think fit to accept the boon on the condition annexed to it, but subsequently altered his determination. Lat. $28^{\circ} 39'$, long. $77^{\circ} 18'$.

DELLAMCOTTA H.—A town in the native state of Bhotan, 27 miles E. from Darjeeling, and 99 miles N. from Dinajepore. Lat. $26^{\circ} 59'$, long. $88^{\circ} 44'$.

DELLY MOUNT.—See **DILLY**.

DEMAUN.—See **DAMAN**.

DEMREE.—A river rising in Thibet, north of the great Snowy range of the Himalayas, and in lat. $28^{\circ} 45'$, long. $92^{\circ} 11'$. It flows first southerly for sixty-five miles, when, passing through a gorge of the Himalayas, it turns south-west, and flows for 115 miles through the native state of Bhotan, to its junction with the Monas, a considerable feeder of the Brahmapootra, in lat. $27^{\circ} 2'$, long. $91^{\circ} 10'$.

DENDOWRA.—In the British district of Furuckabad, lieut.-gov. of the N.W. Provinces, a village on the route from Cawnpore to Futehghurh, and 36 miles S.E. of the latter. Lat. $26^{\circ} 59'$, long. $80^{\circ} 2'$.

DENDRAH.—A town in the native state of Cashmere, or territory of Gholab Singh, 21 miles N. from Jamoo. Lat. $32^{\circ} 55'$, long. $74^{\circ} 50'$.

DENKANICOTTA.—A town in the British district of Salem, presidency of Madras, 68 miles N. of Salem. Lat. $12^{\circ} 32'$, long. $77^{\circ} 50'$.

DEOBUND.—In the British district of Suharunpoor, lieut.-gov. of the N.W. Provinces, a town on the route from Mozuffurnuggur to Suharunpoor, and 20 miles S.E. of the latter town. It is situate between the rivers Hindun and Kali Nuddee, in an open and cultivated country, abounding in water and supplies for troops. The population is returned at 18,638. Distant N.W. from Calcutta 987 miles. Lat. $29^{\circ} 41'$, long. $77^{\circ} 44'$.

DEOCHUNPOOR.—In the British district of Ghazeepore, lieut.-gov. of the N.W. Provinces, a town on the route from Benares to Ghazeepore cantonment, 24 miles N.E. of the former. It is situate on the left bank of the Ganges, 20 miles W. of Ghazeepore. Lat. $25^{\circ} 31'$, long. $83^{\circ} 16'$.

DEO DHOORA.—In the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a temple on a lofty summit in the Sub-Himalaya, or mountain system south of the principal range, on the route from Chumpawut to Almora, S.E. of Fort Almora 19 miles. Elevation of summit above the sea 6,780 feet. Lat. $29^{\circ} 25'$, long. $79^{\circ} 56'$.

DEODUR.—A small independent district in the north-west quarter of the province of Guzerat, presidency of Bombay, containing an area of about eighty square miles, with a population of 2,000, consisting principally of Rajpoots and Coolies. This petty state pays

DEO.

no tribute to any government. Each village protects itself, depending on the British government for external defence. The first relations between Deodur and the British date from 1819, after the expulsion of the marauders who had infested the country. The protecting government exercises no interference in regard to the internal affairs of the district, but merely controls its external relations. The town of Deodur is in lat. $24^{\circ} 9'$, long. $71^{\circ} 49'$.

DEOGAON, in the British district of Azimgurh, lieut.-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, nine miles from the left bank of the Goomtee, 29 miles N. of Benares, 21 S.W. of Azimgurh. Lat. $25^{\circ} 44'$, long. $83^{\circ} 3'$.

DEOGARH.—See **DEWGURH**.

DEOGHUR BARREEA.—See **BARREEA**.

DEOGONG, in the British district of Ajmeer, lieut.-gov. of the N.W. Provinces, a town 50 miles S.E. from Ajmeer, 31 miles W. of Tonk. Lat. $26^{\circ} 10'$, long. $75^{\circ} 26'$.

DEOGUR.—A town in the British district of Bhaugulpore, lieut.-gov. of Bengal, 77 miles S.W. of Rajmahal. Lat. $24^{\circ} 31'$, long. $86^{\circ} 42'$.

DEOGUR.—A town, the principal place of a district of the same name, in the British province of Nagpoor, 55 miles N.W. from Nagpoor, and 52 miles E. from Baitool. Lat. $21^{\circ} 53'$, long. $78^{\circ} 46'$.

DEOGURH.—A town in the native state of Gwalior, or possessions of Scindia, 26 miles S.E. from Gwalior, and 56 miles S.W. from Etawah. Lat. $26^{\circ} 5'$, long. $78^{\circ} 39'$.

DEOGURH.—A town in the Rajpoot state of Oodeypoor or Meywar, 62 miles N. of the town of Oodeypoor. Lat. $25^{\circ} 31'$, long. $73^{\circ} 58'$.

DEOGURH, or **OOTGIR**.—A village in the Rajpoot state of Kerowly, 29 miles S.W. of Kerowly. Lat. $26^{\circ} 5'$, long. 77° .

DEOGURH, in the Rajpoot state of Joudpore, a village on the route from Pokhurn to the town of Joudpore, and seven miles N. of the latter. Lat. $26^{\circ} 25'$, long. $73^{\circ} 8'$.

DEO GURH.—A town of Bombra, one of the native states on the S.W. frontier of Bengal, 50 miles E. from Sumbulpore. Lat. $21^{\circ} 32'$, long. $84^{\circ} 47'$.

DEOHRA.—A village in the hill state of Bussahir. It is situate in a fertile valley inclosed by mountains, rising with a gentle declivity, formed into numerous terraces, covered with soil, and carefully cultivated under rice and other grains. The houses are dispersed in a straggling manner, amidst cultivated spots along the high banks of a feeder of the river Pabur. The residence of the Rana, situate on the summit of an isolated eminence, is a collection of buildings five or six stories high, communicating in the upper part by galleries and balconies of wood. The lower part of each building is constructed of large blocks of stone, bonded with great beams, of which the surrounding forests yield abundant

supplies. The eaves of the roofs project greatly, and the outer surfaces are concave, in the Chinese style. It is totally without defence against assault. Elevation above the sea 6,550 feet. Lat. $31^{\circ} 6'$, long. $77^{\circ} 44'$.

DEOHURI, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village close to the route from Bareilly to Almora, and 34 miles N. of the former. Lat. $28^{\circ} 53'$, long. $79^{\circ} 31'$.

DEOJANA.—See **DOOJANUH**.

DEO KHAS.—A town in the British district of Behar, lieut.-gov. of Bengal, 39 miles S.W. of Gayah. Lat. $24^{\circ} 40'$, long. $84^{\circ} 29'$.

DEOKULTEE, in the British district of Ghazee-pore, lieut.-gov. of the N.W. Provinces, a village on the route from Benares cantonment to that of Ghazee-pore, 29 miles N.E. of the former, 17 W. of the latter. It is situate three miles north of the left bank of the Ganges, and on the river Gungee, traversed here by a bridge of masonry. Lat. $25^{\circ} 33'$, long. $83^{\circ} 18'$.

DEOLEE.—A town in the British province of Nagpoor, 52 miles S.W. from Nagpoor, and 50 miles S.E. from Omraouttee. Lat. $20^{\circ} 40'$, long. $78^{\circ} 32'$.

DEOLEEA, in the British district of Ajmeer, lieut.-gov. of the N.W. Provinces, a town on the route from Oodeypoor to Kishengurh, 46 miles S. of the latter. Lat. $25^{\circ} 54'$, long. $74^{\circ} 53'$.

DEONELLY, in Mysore, a town with an important fort, near the eastern frontier, towards the British district of North Arcot. It was here, in 1749, when the place was besieged by Nundiraj, a man notorious in the history of those times, that Hyder Ali, subsequently tyrant of Mysore, and a formidable enemy to the British and other powers of that part of India, first distinguished himself. Here, also, in 1753, was born his son Tippoo Sultan. Deonelly is 22 miles N.E. of Bangalore, 90 N.E. of Seringapatam. Lat. $13^{\circ} 15'$, long. $77^{\circ} 46'$.

DEONTHUL.—A village on the route from Subhatoo to Simla, and 34 miles N. of the former station. It is pleasantly situate in a narrow and romantic glen on the banks of the river Gumbur, and amidst cultivated terraces, laboriously formed and overspread with soil, on the steep sides of the mountains. It should not be confounded with another place distant fifteen miles to the north-west, where a decisive action took place during the Goorkha war. The village of Deonthul is situate 2,200 feet above the sea, in lat. $31^{\circ} 1'$, long. $77^{\circ} 2'$.

DEONTUL, in the hill state of Hindoor, a summit of the Malown ridge, celebrated as the spot where the obstinately-contested Goorkha war was virtually decided. It is about a mile and a quarter S. of Malown, and is situate between that fortress and Surujgarh, both held by the Goorkhas at the beginning of April, 1815, when General Ochterlony advanced to

attempt their reduction. With a view to cut off the communication between those forts, and to facilitate the formation of a breaching-battery, a British detachment, under Colonel Thompson, took possession of Deontul, where it was furiously attacked by about 2,000 Goorkhas, who, however, were utterly defeated, with the loss of 700 men, including their commander. After this defeat the Goorkhas offered no further serious opposition, and soon after concluded the convention for ceding the hill states to the East-India Company. Lat. $31^{\circ} 11'$, long. $76^{\circ} 53'$.

DEOOR.—A town in the British district of Sattara, presidency of Bombay, 16 miles N.E. of Sattara. Lat. $17^{\circ} 51'$, long. $74^{\circ} 12'$.

DEOPRAG.—See DEVAPRAYAGA.

DEORALIO.—A town in the native state of Nepal, 56 miles N. from Khatmandoo, and 140 miles E. from Malebum. Lat. $28^{\circ} 29'$, long. $85^{\circ} 31'$.

DEORALLEE, or **DEVALI**, in Gurhwal, a village on the western declivity of the mountain inclosing the fertile valley of Bunal on the east. Lat. $30^{\circ} 50'$, long. $78^{\circ} 17'$.

DEOREE.—A town in the British district of Behar, lieutenant-gov. of Bengal, 100 miles W. of Gayah. Lat. $24^{\circ} 30'$, long. $83^{\circ} 32'$.

DEORI, or **BURADEORI**, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town with bazaar on the route from Saugor to Gurrah, 44 miles S.E. of former, 41 N.W. of latter. It appears to have been scarcely noticed by travellers, though once a considerable place, as it is stated, that when burned down by a freebooter some years ago, nearly 30,000 persons perished in the conflagration. Elevation above the sea 1,705 feet. Lat. $23^{\circ} 22'$, long. $79^{\circ} 4'$.

DEOSA.—See DOWSAH.

DEOSIH.—A village in the dominions of Gholab Singh, 56 miles N. from Sirinagur. Lat. $34^{\circ} 53'$, long. $75^{\circ} 2'$.

DEOTAN, in the British district of Baitool, Saugor and Nerbudda territory, lieutenant-gov. of the N.W. Provinces, a town on the route from Baitool to Mhow, 16 miles N.W. of the former. Lat. $21^{\circ} 59'$, long. $77^{\circ} 46'$.

DPOTHAN, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Muttra to Delhi, and 25 miles N.W. of the former. Lat. $27^{\circ} 45'$, long. $77^{\circ} 32'$.

DEPALPOOR, in the territory of Indore, or possessions of the Holkar family, a town on the route from Mow to Neemuch, 27 miles N.W. of former, 123 S.E. of latter. It is situate on the west side of a large tank or small lake, and in 1820 contained 1,035 houses, and about 4,000 persons. The pergunnah, of which it is the principal place, contained at the time just mentioned 7,489 houses, and a population of 30,466. Distance S.W. from Oojein 27 miles. Lat. $22^{\circ} 50'$, long. $75^{\circ} 34'$.

DERA, in the district of Ahladganj, territory of Oude, a town 30 miles N. of Allahabad, 80 S.E. of Lucknow. Buxton estimates the population at 8,000, all Hindoos. Lat. $25^{\circ} 49'$, long. $81^{\circ} 37'$.

DERA, in the Peshawur division of the Punjab, a town situated on the left bank of the river Indus, 83 miles N.E. of the town of Peshawur. Lat. $34^{\circ} 24'$, long. $72^{\circ} 59'$.

DERA DEEN PUNAH.—A town in the Punjab, situate near the left bank of the Indus, on the route from Mooltau to Leia, and 40 miles N.W. of the former place. Attached to it is a small but fertile district, which, at the time of Elphinstone's visit, yielded 150,000 rupees to the Afghan chief, who held it in jaghire. Lat. $30^{\circ} 25'$, long. $71^{\circ} 8'$.

DERA DEEN PUNAH.—A town of the Derajat, on the right or west bank of the Indus. It was nearly destroyed by the great earthquake of 1819 and the overwhelming floods which at the same time descended from the Suliman Mountains. Lat. $30^{\circ} 40'$, long. $70^{\circ} 52'$.

DERA FUTTI KHAN, a town of the Derajat, is situate in a very fertile country, on a small western branch of the Indus, and at no great distance from the main stream. The crops in the vicinity are principally cotton, grain of various kinds, indigo, and some sugar and opium. Lat. $31^{\circ} 9'$, long. $70^{\circ} 50'$.

DERA GHAZEE KHAN.—The most southern and also the most important of the three towns which contribute to give to the Derajat its name. It is a large, populous, and commercial place, situate in a low alluvial tract, four miles from the right or west bank of the Indus, and contains numerous ruins of mosques, and of the extensive and well-constructed residences of the former Durani governors and officers. It carries on considerable transit-trade; an advantage attributable to its being situate at the point where one of the great routes from Eastern India and the Punjab into Beloochistan and Khorasan intersects the great route from north to south into Sindh. The bazaar contains 1,600 shops, the inmates of 530 of which are engaged in weaving and selling cloth. It is in other respects well supplied with goods, but ill-built and dirty. Some manufactures are carried on here in silk, cotton, and mixed fabrics of silk and cotton, called longees, intended for scarfs and waistbands. Coarse cutlery is also manufactured to a considerable extent. The surrounding country is very unhealthy during the hot season, but remarkably fertile, being well irrigated, and producing grain, fruits in abundance and of fine quality, sugar, cotton, and much indigo, in which a considerable traffic is driven. Both the transit and the direct carrying trade are conducted almost exclusively by the Lohani Afghans, who are at once a pastoral and a mercantile tribe. Dera Ghazee Khan, in consequence of its advantageous position, has

been recommended by Burnes and others as the best site for a great annual fair, to be held under the protection of the British government, commanding, as it does, such important routes and the navigation of the Indus north and south. It was a dera, post, or camp of Ghazee Khan, who, about three centuries ago, figured as an adventurer here, and being wrested from the Durani empire by the Sikhs, fell to the British upon the conquest of the Punjab in 1849. Lat. $30^{\circ} 4'$, long. $70^{\circ} 54'$.

DERA ISMAEL KHAN.—A considerable town of the Derajat, built a short distance from the right or west bank of the Indus, to replace the former town, which, having been situate only a hundred yards from the river, was, a few years ago, swept away by it so completely that not a vestige was left. The town is well laid out, but is ill built of unburnt brick, and in general has an air of desolation, though in spring there is much business, it being then crowded by the Afghans of the Lohani tribe, who purchase great quantities of goods to transport by their caravans for the supply of Afghanistan and Central Asia. The most important article of commerce is white cotton cloth, of which two millions of yards are yearly sold here, and eighteen millions of yards taken through, in transit from Hindostan to the north and west of this place. There is also a considerable trade, by way of the Indus, southward, in grain and salt, from Kala Bagh. The position of Dera Ismael Khan is important, being situate on one of the great routes from the north to Sind and the Southern Punjab, and also in the vicinity of the ferry at Kaharee, one of the most frequented over the Indus. There is another ferry over that river three miles to the eastward of the town. About three centuries ago, there was here a dera, post, or encampment of Ismael Khan, an adventurer in this country; and hence the name which the town bears. It was wrested from the Durani empire by the Sikhs, and became incorporated with the British dominions upon the conquest of the Punjab in 1849. Its population is stated to be 8,000. Lat. $31^{\circ} 50'$, long. $70^{\circ} 58'$.

DERAJAT.—See DAMAN.

DERAPOOR, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Seyngur Nuddee, 35 miles W. of Cawnpore. Lat. $26^{\circ} 26'$, long. $79^{\circ} 51'$.

DERBEND.—A British military post, on the north-west frontier of the Punjab. It is situate on the left bank of the Indus, where the stream, previously straitened in its passage through the mountains, expands on entering into the plain; and hence probably the name of Derbend, which signifies the place of a dam or strait. In its neighbourhood, in 1827, Sheer Singh, the Sikh commander, defeated Saiyid Ahmed, the fanatic Afghan, who had excited a religious war against the Sikhs. Lat. $34^{\circ} 18'$, long. $72^{\circ} 55'$.

DERESURA, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Meerut to that of Muttra, and 21 miles N. of the latter. Lat. $27^{\circ} 45'$, long. $77^{\circ} 51'$.

DERIABAD, in the territory of Oude, a town on the route from Goruckpore to Lucknow, 123 miles W. of the former, 43 E. of the latter. Provisions and water are good and abundant, but firewood very scarce. Lat. $26^{\circ} 54'$, long. $81^{\circ} 34'$.

DERIAPOOR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Meerut to that of Moradabad, and 44 miles S.E. of the former place. It is situate in an open and partially cultivated country. Distant N.W. from Calcutta 888 miles. Lat. $28^{\circ} 51'$, long. $78^{\circ} 21'$.

DERIAPOOR.—A town in one of the recently sequestered districts of Hyderabad, or the dominions of the Nizam, 28 miles W. from Omraouttee, and 29 miles S.W. from Ellichpore. Lat. $20^{\circ} 50'$, long. $77^{\circ} 23'$.

DERRO.—A town in the British district of Shahabad, lieutenant-gov. of Bengal, 23 miles S.W. of Arrah. Lat. $25^{\circ} 17'$, long. $84^{\circ} 27'$.

DERWANEE, or DURWANEE, in the British district of Rungpore, lieutenant-gov. of Bengal, a town, the principal place of an extensive pergunnah of the same name. Distant N.W. from the town of Rungpore 30 miles, N. from Berhampore, by Dinajpur, 125. Lat. $25^{\circ} 50'$, long. $88^{\circ} 50'$.

DESNOK.—A town in the Rajpoot state of Beekaneer, 15 miles S. of the town of Beekaneer. Lat. $27^{\circ} 48'$, long. $73^{\circ} 23'$.

DESSOOR.—A town in the British district of North Arcot, presidency of Madras, 33 miles S. of Arcot. Lat. $12^{\circ} 28'$, long. $79^{\circ} 32'$.

DEVAPRAYAGA, in Gurwhal, a town at the confluence of the Aluknunda and Bhageerettee. The former flows from the east, the latter from the north, and at the vertex of the right angle formed by their junction the town is situate. According to the graphic description of Raper, "The contrast of the two streams is very remarkable; the former (Bhageerettee) runs down a steep declivity with a rapid force, roaring and foaming over large stones and fragments placed in its bed, while the placid Aluknunda, flowing with a smooth unruffled surface, gently winds round the point." The banks of both rivers are composed of hard black rock; but while those of the Aluknunda are almost perpendicular, to the height of eighty or a hundred feet, those of the Bhageerettee are shelving and expanded. The Aluknunda, the deeper and more considerable river, is, at the season of low water, 142 feet in breadth, and in the rainy season rises forty-six or forty-seven feet. It abounds with fish of the rohu species, four or five feet in length, regarded sacred, and so tame as to take food from the hand. The Bhageerettee is, at the

season of low water, 112 feet in breadth, and rises forty feet in the rainy season. Each river is crossed by a jhula or rope bridge. The united stream having a breadth of eighty yards, receives below the confluence the name of the Ganges. The town is built 100 feet above the water, on the scarp of a mountain rising behind it about 800 feet. A flight of steps cut in the rock gives access to the town from the water's edge. The houses are arranged so as to form two rows of unequal length, joined at a right angle, the longer row facing the Bhageerettee, the other the Aluknunda. They are generally two stories high, built of large stones, cemented with lime mortar, and having sloping roofs, covered with shingles. In the upper part of the town stands a temple, sacred to Ramachandra. It is situate on a terrace from twenty to thirty yards square, and six feet high, and is built of large blocks of cut stone piled on each other, without cement, so as to form a pyramid, bulging in the middle, and decreasing rapidly towards the summit, which is surmounted by a white cupola; and over all is a square sloping roof, composed of plates of copper, crowned above with a golden ball and spire. The entrance is on the western side, in a portico, from the roof of which are hung bells of various sizes. Under the shelter thus provided, the worshippers perform their devotions. The image of Ramachandra, about six feet high, carved in black stone, but painted red, except the face, is seated opposite the door, and under the eastern part of the cupola. Before the idol, and opposite the portico, is the brazen image of a Garuda. One knee is bent on the ground, and his hands are joined in the attitude of prayer. The whole height of the building is between seventy and eighty feet. Under the terrace is a temple, sacred to Mahadeva. The only information which the Brahmins professed to be able to vouch for, when questioned respecting the age or founders of the building, was, that it had stood for 10,000 years, which is certainly a very respectable degree of antiquity. It is a peculiarly sacred place of pilgrimage for the superstitious Hindoos, being one of the five principal Prayags or confluences mentioned in the Shastras. The grand rite is ablation, which takes place at the confluence, in three kundas or basins, excavated in the rock, at a level a little lower than the surface of the current, which here is so rapid and violent as to sweep away any attempting to bathe in it. The names of the pilgrims are registered on their making sufficient disbursements to the officiating Brahmins, on account of dues and oblations. The annual revenue of these functionaries, exclusive of such contributions, does not exceed 120*l.*, derived from twenty-five villages, granted for the purpose by the rajah of Gurwhal; and notwithstanding the holy celebrity of the place, the Brahmins are compelled to eke out a subsistence by the practice of trade. The temple, as well as the rest of the town, was much shattered by an earthquake in 1803, but subsequently repaired

by Brahmins sent thither for the purpose by Daulat Rao Sindia. The town contains between 200 and 250 houses, inhabited principally by Brahmins from the Deccan. The heat is sometimes very great, exceeding 100° at noon in the shade. Elevation above the sea, of the town, 2,266 feet; of the stream, 1,953. Lat. 30° 8', long. 78° 39'.

DEVEEKOTE, in the Rajpoot state of Jesulmeer, a small town on the route from the city of Jesulmeer to Balmeer, and 22 miles S.E. of the former. Lat. 26° 44', long. 71° 17'.

DEVIAPATAM.—A town in the British district of Madura, presidency of Madras, nine miles N.E. of Ramnad. Lat. 9° 28', long. 78° 58'.

DEVIKOTTA, within the British district of Tanjore, presidency of Madras, a town on the Coromandel Coast, at the mouth of the Coleroon, or great northern branch of the Cauvery. The entrance of the river is difficult, and dangerous of access, from a bank called Coleroon Shoal, which stretches four or five miles to the south-east. Devikotta was taken by the British about the middle of the last century, and their possession was confirmed to them by the rajah of Tanjore. Devikotta is distant from Tranquebar N. 24 miles, Madras S. 122. Lat. 11° 22', long. 79° 52'.

DEVUPALLI.—A town in the British district of Vizigapatam, presidency of Madras, 13 miles N.W. of Vizianagram. Lat. 18° 16', long. 83° 21'.

DEWAH RIVER.—See GOGRA.

DEWAN.—A town in the British district of Moorsshedabad, lieut.-gov. of Bengal, 15 miles N. of Moorsshedabad. Lat. 24° 24', long. 88° 16'.

DEWANGARI.—A town in the native state of Bhotan, 53 miles N. from Gowhatty, and 50 miles N.W. from Durrung. Lat. 26° 51', long. 91° 27'.

DEWANGUNJE.—A town in the British district of Hoogly, lieut.-gov. of Bengal, 40 miles N.W. of Calcutta. Lat. 22° 49', long. 87° 50'.

DEWANGUNJE.—A town on the left bank of the river Coosy, in the British district of Purneah, lieut.-gov. of Bengal, 49 miles N.W. of Purneah. Lat. 26° 24', long. 87° 14'.

DEWAS.—A town of Baghelcund, in the native state of Rewah, 21 miles N.E. from Rewah, and 50 miles S.W. from Allahabad. Lat. 24° 46', long. 81° 35'.

DEWAS, in Malwa, a town, the principal place of a small territory of the same name, situate between lat. 22° 30' and 23° 2', long. 75° 53' and 76° 27', and embracing an area of 256 square miles. This petty raj or state is held conjointly by two chiefs of the lineage of the Puar or Pramara Rajpoots, now greatly humiliated, but at a remote period so powerful that "the world is the Pramara's," was an ancient saying, denoting their extensive sway.

DEW—DHA.

Their dynasty is recorded to have ruled over Malwa for 1,058 years. In more recent times, we find one of the ancestors of the present rajahs, a military commander in the service of Sevajee, the founder of the Mahratta power, and his two sons, Tukajee and Jewajee, accompanying Bajee Rao, subsequently Peishwa, when appointed soubahdar of Malwa in 1735, and receiving from him Dewas and some other possessions. During the distracted state of Central India which followed, the dominions of the rajahs of Dewas were incessantly overrun by Mahrattas, Pindarries, and other freebooters, their towns and villages sacked, and themselves and families reduced to misery; but since the British protection has been extended to them, their dominions have been restored to order and prosperity. The treaty under which this was granted, is dated in 1818. By its engagements, the rajahs are bound to maintain a contingent force, to be at the disposal of the British government. This force, since the date of the treaty, has been considerably increased, and now consists of 400 infantry, forming part of the Malwa united contingent. The military force of the state consists of 175 horse and 500 foot. The rajahs have agreed to act by a union of authority, and to administer their affairs through one public minister. The revenue amounts to 400,000 rupees, or about 40,000*l*. The population is estimated at about 25,000. The town of Dewas is distant S.E. from Oojein 21 miles. Lat. 22° 58', long. 76° 4'.

DEWGURH, or **DEOGARH**, on the coast of the collectorate of Rutnagherry, Southern Concan, presidency of Bombay, a town with a harbour having three or four fathoms of water, and sheltered towards the sea by an island, on which is a fort. In this harbour disembogues the river Seo, flowing W. from the Ghats. Distant S. from Bombay 180 miles. Lat. 16° 22', long. 72° 25'.

DEWLE.—A town in the British district of Rutnagherry, presidency of Bombay, 25 miles E. of Rutnagherry. Lat. 17°, long. 73° 40'.

DEWRA.—A town of Bundelcund, in the native state of Chutterpore, 10 miles S.E. from Bijawur, and 23 miles S. from Chutterpore. Lat. 24° 54', long. 79° 40'.

DEWUD.—See **DOHUD**.

DEWULLEE.—A town on the south-west frontier of Bengal, in the native state of Mohurbunge, 37 miles S.W. from Midnapoor, and 37 miles N. from Balasore. Lat. 22° 3', long. 86° 58'.

DEWULMURREE.—A town in the British province of Nagpoor, on the left bank of the Prenheta or Weingunga river, and 140 miles S. from Nagpoor. Lat. 19° 20', long. 80° 1'.

DEYVULPULLY.—A town in Hyderabad, or dominions of the Nizam, 79 miles S.E.

from Hyderabad, and 73 miles N.W. from Guntoor. Lat. 16° 50', long. 79° 35'.

DHABA.—A town in Nagpoor, 89 miles S.E. from Chanda, and 111 miles S. from Nagpoor. Lat. 19° 39', long. 79° 41'.

DHABADDY.—A town in Hyderabad, or dominions of the Nizam, 30 miles N.E. from Aurangabad, and 18 miles N.W. from Jaulnah. Lat. 20° 2', long. 75° 46'.

DHABREE.—See **DATREE**.

DHADREE.—A town in a detached portion of the native state of Dhar, on the right bank of the river Nerbudda, and 49 miles S.E. from Mhow. Lat. 22° 17', long. 76° 28'.

DHALGAON.—A town in the native state of Meeruj, one of the Southern Mahratta jaghires, 75 miles S.E. from Sattara, and 53 miles N.W. from Beejapoor. Lat. 17° 9', long. 75° 1'.

DHAMA.—A town in the British district of Sumbulpore, on the south-west frontier of the presidency of Bengal, 16 miles S. of Sumbulpore. Lat. 21° 15', long. 84° 5'.

DHAMEE, a small hill state, is bounded on the north by Bhugee; on the east and south by the territories belonging to the rajah of Patecala; and on the west by Bhagul. Its length probably does not exceed five or six miles, its breadth may be taken to be nearly equal, and its area about twenty-five square miles. Its centre is in lat. 31° 12', long. 77° 8'. It is throughout a collection of summits of considerable height, with intervening valleys, and is drained northward by a stream which discharges itself into the Sutlej, and southward and westward by a few insignificant streams, feeders of the small river Gumbur. The general elevation of this small territory probably exceeds 4,000 feet. The left bank of the Sutlej at Soomee, to the north, and much lower than the greater part of the country, is 2,283 feet above the sea. It is one of the Barah Thakoorai, or "twelve lordships," which were in the tract between the Sutlej and the Tonse, until the divisions were obliterated by the Gorkha invasion. Dhamee belongs to a petty Hindoo rana or prince, who received it from the British government on the expulsion of the Gorkhas in 1815. It contains seven pergunnahs or subdivisions, estimated to have a population of 3,000, and to yield an annual revenue of 350*l*., out of which a sum of 72*l*. is paid as tribute to the East-India Company.

DHAMORA.—A river rising in lat. 26° 51', long. 86° 28', in the range of the Sub-Himalayas: it flows in a south-easterly direction for fifty miles, through the Terai of Nepal to the boundary of the British district of Tirhoot, from whence it maintains a southerly course for seventy miles, for the greater part of which it either intersects or bounds the district of Bhagulpore, and falls into the Gogaree in lat. 25° 31', long. 86° 45'.

DHAMONI, or **DHAMOUNI**, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the frontier towards Bundelcund. The fort of Dhamouni is of triangular ground-plan, and is situate on an eminence, to the eastern brow of which the rampart on that side conforms. The rampart is in general fifty feet high, and in most parts fifteen feet thick, with large round towers. There are besides interior works, strengthening the defences of the eastern quarter, where are the magazines and the residence of the commandant. Westward of the fort is the town, surrounded by a weak wall of loose stones, and to the south-west of the town is a large tank. In 1818, after the defeat and flight of Apa Sahib, rajah of Nagpore, or of Berar, it was invested by a British force under General Marshall, who, having to no purpose offered the garrison 10,000 rupees in payment of arrears, on condition of immediate evacuation, opened batteries against the place with such effect, that in six hours it was yielded unconditionally. Lat. $24^{\circ} 10'$, long. $78^{\circ} 49'$.

DHAMPOOR, in the British district Bijnour, lieutenant-gov. of the N.W. Provinces, a town on the route from Moradabad to Hurdwar, and 37 miles N.E. of the former. It contains a good number of old substantial houses, and has a bazar. Elevation above the sea 754 feet. Lat. $29^{\circ} 19'$, long. $78^{\circ} 34'$.

DHAMSALA, or **DHURRUMSALA**.—A sanatorium for troops in the Jullundur Doab, 92 miles N.W. from Simla, 126 miles N.E. from Lahore. Lat. $32^{\circ} 13'$, long. $76^{\circ} 22'$.

DHANA, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town 11 miles S.E. from Saugor, 39 miles W. of Dumoh. Lat. $23^{\circ} 43'$, long. $78^{\circ} 55'$.

DHANAPOOR, in the British district of Ghazepoor, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the river Ganges, 19 miles S.W. of Ghazepoor. Lat. $25^{\circ} 24'$, long. $83^{\circ} 24'$.

DHANNI, in the jaghire of Rampoor, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Almora, and 41 miles N. of the former. Lat. $28^{\circ} 49'$, long. $79^{\circ} 26'$.

DHANRA, in the British district of Gurdwal, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Vishnoo river, 64 miles N.E. of Sireenagur. Lat. $30^{\circ} 56'$, long. $79^{\circ} 30'$.

DHANROWAL.—See **BHYROWALAH**.

DHAONEE.—See **DHANNI**.

DHAP, in the British district of Rungpoor, lieutenant-gov. of Bengal, a town the principal place of a pergunnah, and situate six miles N.W. of the town of Rungpoor. It is the station of the native officer of police, and contains 300 houses, which, according to the usually admitted ratio of inmates to dwellings,

would make the population amount to about 1,500. The vicinity of the town has a pleasing aspect, containing several houses of Europeans embosomed in trees. Lat. $25^{\circ} 46'$, long. $89^{\circ} 10'$.

DHAR, in Bussahir, a considerable village, is situate on the declivity of a hill overlooking the valley of the Pabur. The surrounding country is characterized by Fraser as surpassing in beauty and fertility any which he had seen among the mountains. Lat. $31^{\circ} 6'$, long. $77^{\circ} 46'$.

DHAR.—A town in Hyderabad, distant N.E. from Aurungabad 58 miles, N. from Jaulnah 38 miles. Lat. $20^{\circ} 23'$, long. $76^{\circ} 4'$.

DHAR, in Malwa, the principal place of a raj of the same name, is situate on the route from Mhow to Baroda, 33 miles W. of the former, and 183 E. of the latter. The town is nearly three and a quarter miles in length and half a mile in breadth. It is surrounded by a mud wall, and has many striking buildings, especially two large mosques, built of red stone, but fast falling to decay. Water is abundant, being supplied from two small and eight large tanks. There is a fort, built of red stone, situate outside the city, on an eminence rising forty feet above the plain. The rampart, from thirty to thirty-five feet high, has twenty-four round, and two square towers, on the larger of which last the rajah's palace is, built of stone. The gate of the fort is in the western face, and is defended by octagonal towers. The city is represented to have once contained 20,000 houses, an amount which would assign it a population of about 100,000. At present its numbers fall short of that amount to an extent which would make comparison ludicrous. An English and vernacular school has been established here by the present ruler of Dhar.

The raj or petty state of Dhar contains an area of about 1,070 square miles, and has much fertile ground, producing abundant crops of rice, wheat, millet, maize, pulse, oil-plants, sugar-cane, tobacco, opium, ginger, cotton, hemp, turmeric, esculent vegetables, and pulse. The annual revenue is estimated at 475,000 rupees, or 47,500*l.*; the population at 104,860. The rajah maintains a military force, which, inclusive of the police, amounts to about 1,100 men; and a contribution is made by the state of 8,000 rupees per annum in aid of the support of the Malwa Bheel corps. The rajah is a Puar or Pramraj Rajpoot, of a very ancient family, but owes his present dignity to the gift of the Peishwa, about a century ago. Towards the close of the last and in the early part of the present century, the state of Dhar was miserably devastated by the troops of Scindia Holkar and other freebooters; and when the British troops, in 1817, advanced to this part of India, the limits of the state were greatly contracted, and its revenue did not exceed 35,000 rupees. By the intervention of the British government, various districts of

which Dhar had been dispossessed were restored to the rajah, and Bairseeah, which had been conquered from the Pindarries, was granted to him, subject to the condition that the British government should retain possession of it for a limited period, for the purpose of liquidating a loan; after which period that government was to have the option of holding it, or of letting it, for the benefit of the Dhar state, which was thenceforth to be entitled to the revenue and produce. This arrangement was made in 1819. In 1821, a new engagement was concluded, by which the district of Bairseeah was ceded to the British government from the expiration of the period of retention before stipulated for; in consideration of which, and of the tribute of Allee Mohun also ceded, a specified annual payment was to be made. The bargain, however, was found a losing one, and Bairseeah was in a few years given back to Dhar; but the home authorities regarding this as an illiberal proceeding towards an ally who had no power to resist, annulled the surrender, and directed the engagement of 1821 to be adhered to. Possession of Bairseeah was consequently resumed, and the stipulated payment restored. By the treaty of 1819 the British government undertook to protect the state of Dhar, in return for which the rajah ceded the tributaries of Banawarra and Doongerpore, entered into the usual engagements of subordinate co-operation and friendly alliance, and bound himself, at all times when required, to furnish troops in proportion to his ability. Elevation of the town above the sea 1,908 feet. Lat. 22° 35', long. 75° 20'.

DHAREE DEBEE, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Almora to Sireenuggur, and 10 miles S.E. of the latter. Lat. 30° 15', long. 78° 55'.

DHARMA, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a Bhotia mahall or subdivision, lying north of the main range of the Himalaya, and between it and Hiundes, or South-western Tibet. Still some of the summits have a great elevation; Lebong, on the eastern frontier, being 18,942 feet above the sea. The elevation of the Dharma pass, on the northern frontier, leading to Hiundes, is probably about 15,000. The whole habitable portion consists of the narrow and generally very rugged valleys down which flow the river Dhouli and its feeders; the rest consists of rocks or mountains, covered with perpetual snow. The boundaries of a tract so ill peopled and difficult to explore are not very precisely defined, but they may be considered as lying between lat. 30° 5'—30° 30', long. 80° 25'—80° 45', and as inclosing an area of about 400 square miles. When Traill drew up his account, it had twenty-four villages, containing 342 houses; and consequently, if six persons be allowed to each house, the population may be estimated at 2,052, or between four and five to the square mile. They are called

Bhotias, and are of the Mongolian or Tartar variety of the human race. "In their personal appearance," observes Traill, "the Bhotias are perfect Tartars, and exceed the natives of this province in size and stature, more particularly the Dharma Bhotias, among whom individuals possessing extraordinary strength are by no means uncommon. They are excessively dirty in their persons, using the skirts of their dress to cleanse both their persons and their cooking utensils, yet are in good circumstances, having warm clothing, substantial houses, and abundance of animal food in the flesh of their numerous sheep and goats, used as beasts of burthen in the lucrative carrying-trade with Hiundes. In the course of this commerce, grain, the produce of Lower Kumaon, and cotton broadcloths, hardware, sugar, and other goods, brought from Hindoostan, are sent to Hiundes, and exchanged for culinary salt, tincal or borax, gold dust, and wool; besides some others of less importance.

DHARMUDA.—A town in the British district of Midnapoor, lieutenant-gov. of Bengal, six miles S.W. of Midnapoor. Lat. 22° 21', long. 87° 19'.

DHARMKOT, in Sirhind, a small town in the British district of Ferozepore, with a fort, situate about seven miles from the left bank of the Sutlej. Dharmkot is distant 39 miles W. from Loodiana, N.W. from Calcutta 1,140 miles. Lat. 30° 55', long. 75° 17'.

DHARMSALEH.—A town in the native state of Nepal, on the left bank of the river Kurnalli, and 126 miles N.E. from Almora. Lat. 29° 51', long. 81° 45'.

DHARWAR, in the presidency of Bombay, a British district, named from its principal place. Previously to 1836, the collectorate of Dharwar consisted of eighteen talooks, stretching nearly 300 miles from north to south. In that year the ten northern talooks were formed into a new district, denominated the Collectorate of Belgaum, those in the south remaining under the control of the collector of Dharwar, and forming the district now distinguished by that name. As at present constituted, the district of Dharwar is bounded on the north by the Belgaum collectorate; on the east by the territory of the Nizam and the British collectorate of Bellary; on the south by the Mysore dominions; and on the west by the Madras territory and the Belgaum collectorate. It extends from lat. 14° 16' to 15° 50', and from long. 74° 50' to 76°. Its greatest length from north to south is 105 miles; its greatest breadth from east to west 77 miles. The area is 3,837 square miles. A great part of the collectorate consists of extensive plains. A small portion has an inclination to the south-west, as indicated by the direction taken by the streams, which, flowing towards that point, fall into the Kali Nadi, a river making its way through a deep valley in the Ghauts to the Arabian Sea or North Indian Ocean. The Tumbudra, rising in the territory of Mysore,

on the eastern declivity of the Ghauts, flows for ninety-five miles to the southern boundary of the collectorate; thence continuing its course circuitously, but generally towards the north-east, for sixty-five miles, it forms the boundary between this collectorate and that of Bellary. In lat. $14^{\circ} 56'$, long. $75^{\circ} 46'$, this river receives on the left side the Wurda, rising on the eastern declivity of the Ghauts, and flowing north-easterly for a distance of fifty miles. In many parts of the collectorate of Dharwar the soil is fertile, and well suited to the growth of cotton. Various attempts have been made by the Bombay government for the introduction of the New Orleans species. Previous experiments having failed, the last was commenced in 1842, and has been attended with success. In that year twenty-five acres only were sown with American cotton. It was cultivated by the ryots in the midst of their own native products, and much in the same manner, excepting that the American cotton was sown some weeks earlier. The return of the newly-introduced species being found much larger than that of the indigenous article, and the quality considered superior, the cultivation spread with extraordinary rapidity. Small experimental farms were established by government; but these, except in so far as they tended to provide a supply of seed, seem to have been of no value, as it is stated by competent authority, that the cultivation of the ryots themselves excelled that of the farms. These establishments were consequently soon relinquished, and the breadth of land devoted to the cultivation of American cotton continued, without artificial aid, to extend, until, in five years only from the date of the successful experiment, it had reached 25,000 acres; and it is stated that, but for the occurrence of unfavourable weather at the proper time for sowing, it would have amounted to 60,000 acres. The superiority of the New Orleans cotton over the indigenous species is now generally recognised in Dharwar. The principal marts are Hooblee, Havery, Naragorda, Sircy, Noolgoond, and Balsoor. Their distances vary from 80 to 130 miles from the Madras port of Coompta, to which a good road for wheeled carriages has been constructed, and where the cotton is shipped for Bombay. The population of this collectorate is for the most part Canarese, the Mahrattas, though once the ruling race, not amounting now to more than a tenth of the whole. Canarese, the language of the people, was, therefore, in 1836, judiciously substituted for Mahratta, in the transaction of official business. The population is given under the article BOMBAY. Dharwar, the principal town, and Hooblee, as well as others of note, are described under their respective names in the alphabetical arrangement. The principal roads are the following:—One leading from south-east to north-west, from the town of Dharwar to Belgaum, and thence eastward, through Sawunt Warree, to the port of Vingorla; another,

from south-east to north-west, from the town of Dharwar to Kolapore; and a third, from Dharwar to Hooblee, and thence to Wuddeguttee, on the Canara frontier of the Madras territory, there to join the road constructed by the Madras government for facilitating the inland trade between Dharwar and the port of Coompta.

The territory comprised within the collectorate of Dharwar appears at the earliest recorded period to have formed part of the Brahminical realm of Vijayanagar, and on its overthrow, by the defeat of its rajah at Talikot, in 1565, by a Mussulman confederation, to have become part of the kingdom of Beejapoor. In 1675 it seems to have been overrun and partially conquered by Sevajee, the notorious founder of the Mahratta sway, becoming thereby subject to the power of the rajah of Sattara, and subsequently to that of the Peishwa. In 1776 the province was overrun by Hyder Ali, the usurping sultan of Mysore. The capture by that chief, in 1778, of the fort and town of Dharwar, and their recapture, in 1791, by a British force acting in co-operation with the Mahrattas, are noticed in the article on the town. On the overthrow of the Peishwa in 1818, Dharwar was incorporated with the territory of the East-India Company.

DHARWAR, the principal place of the British collectorate of the same name, in the presidency of Bombay, is situate close to the frontier which divides the Bombay territory from the Madras collectorate of Canara. Duff, describing its condition, says, "The defences of this fortress are principally of mud, and though irregular and now greatly decayed, were then [in 1790] very strong. It is situated in a plain, having an outer and an inner ditch from twenty-five to thirty feet wide, and nearly as many feet deep. Adjoining to the fort on the south side, and outflanking it to the eastward, is a town or pettah, defended by a low mud wall and a ditch of no strength." In 1837, this place was the scene of religious disputes between the Brahmins and Lingayets, which rose to such a height as to render necessary the interference of authority. The principle upon which the British government have acted in such matters, is to allow to the members of every religious persuasion the undisturbed exercise of their own rites and ceremonies so long as they are unattended with danger to the public peace. The Vrayasunthole procession at Dharwar, in the judgment of the Bombay government, was incompatible with this necessary condition, in consequence of the mutual animosity subsisting between the Lingayets and the Brahmins, and it was determined that it should not again take place. Two of the government vernacular schools, the one Mahratta and the other Canarese, are established in this town; and as also one of the government English schools. In 1778, Dharwar was taken from the Mahrattas by Hyder Ali, the sultan of Mysore, and in 1791 retaken

by a British force auxiliary to the Marhattas, who very little furthered the operations. On the final overthrow of the Peishwa, this place, with the other possessions of that potentate, fell to the disposal of the British government. Distant from Bombay, S.E., 288 miles; from Poona, 223; from Sattara, 170; from Goa, K., 70; Hyderabad, S.W., 270; Seringapatam, N.W., 235. Lat. 15° 28', long. 75° 4'.

DHATA, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, five miles N.E. of the left bank of the Jumna, 36 miles S.E. of the town of Futtehpore. Lat. 25° 32', long. 81° 20'.

DHATA, in Sirhind, a village on the route from Hansee to Lodiana, 13 miles N. of the former town. It is situate in a level country partially cultivated, and yielding moderate supplies. The road in this part of the route is good. Distant N.W. from Calcutta 989 miles. Lat. 29° 16', long. 76° 5'.

DHAYABUNG.—A town in the native state of Nepal, on the left bank of the river Bori Gunduk, and 29 miles N. from Khatmandoo. Lat. 28° 3', long. 85° 3'.

DHEBUROOA, in the British district of Goruckpore, lieut.-gov. of the N.W. Provinces, a town on the left bank of the river Raptée, 60 miles N.W. of Goruckpore. Lat. 27° 24', long. 82° 51'.

DHEEGWAS, or **DHIGONS**, in the district of Ahladganj, territory of Oude, a town 30 miles N.W. of Allahabad, 80 S.E. of Lucknow. Better estimates the population at 8,000, all Hindoos.

DHEKISMAELPOOR.—A town in the British district of Midnapore, lieut.-gov. of Bengal, 40 miles S. of Midnapore. Lat. 21° 50', long. 87° 21'.

DHEEMAHPoor, in Eastern India, a town in the recently lapsed territory of Tooleram Senahputtee, situate on the left bank of the river Dhunseerree, and 70 miles S.E. from Nowgong. Lat. 25° 53', long. 93° 46'.

DHKEPA.—A town in the native state of Singboom, on the S.W. frontier of Bengal, 39 miles S.W. from Chaiabasa, and 100 miles N.E. from Sumbulpoor. Lat. 22° 19', long. 85° 18'.

DHEKULOO, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a guardhouse and military station on the route from Moradabad to Almora, and fifty miles north-east of the former. It is situate in the valley down which the river Kosilla flows from the mountains to the plains, on the right bank of the stream, and amidst scenery described by Heber as being as wild and romantic as ever painted by Salvator Rosa. Elevation above the sea 1,221 feet. Lat. 29° 29', long. 79° 12'.

DHENKANAU, one of the independent hill tribes known as the Cuttack Mehals, adjoining the British district of Cuttack: it is

situated on the banks of the Braminy river, and its centre is about lat. 20° 45', long. 85° 30'.

DHEN KANAULGUR.—A town in the native state of Dhenkanaul, one of the Cuttack Mehals, 25 miles N.W. from Cuttack, and 62 miles N.W. from Juggernaut. Lat. 20° 40', long. 85° 36'.

DHERALEE, in Gurhwal, a village on the left bank of the Ganges, or Bhageerettee, as that river is called in the upper part of its course. It is situate in a rocky recess, and commands a fine view of the river, and beyond it of the snow-clad peaks of Jumnotri, towering over forests of cedar. There are on the river side three small temples built of stone, and of good workmanship. Lat. 31° 2', long. 78° 49'.

DHERGAUM.—A town in the British district of Akraunee, presidency of Bombay, 73 miles E. of Broach. Lat. 21° 53', long. 74° 10'.

DHERIAGOTE, or **SOEE**.—A small village in Sinde, on the route from Sehwan to Larkhana, and 22 miles S. of the latter place. It is situate in the extensive and fertile island inclosed between the Indus and its great offset the Narra, and is seven miles from the right bank of the former, and three miles from the left bank of the latter. Lat. 27° 10', long. 68° 4'.

DHI.—A town in a detached portion of the possessions of Holkar, situate 78 miles S.W. from Mhow, and 90 miles E. from Baroda. Lat. 22° 9', long. 74° 37'.

DHINISA.—A town in the native state of Nepal, situate 50 miles N. from Nepal. Lat. 28° 24', long. 85° 22'.

DHOA, in the territory of Gwalior, or possessions of Scindia, a town 20 miles S.W. of the fort of Gwalior. Lat. 26° 3', long. 77° 54'.

DHOBHUNG.—A town in the native state of Nepal, 104 miles S.E. from Khatmandoo, and 90 miles W. from Darjeeling. Lat. 27° 17', long. 86° 54'.

DHODA, in the Peshawur division of the Punjab, a town situated on the route from Kala Bagh to Kohat, 14 miles S. of the latter. Lat. 33° 27', long. 71° 45'.

DHOKI.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 50 miles N. from Sholapoor, and 102 miles S. from Jaulnah. Lat. 18° 22', long. 76° 10'.

DHOLARRA, or **DHOLERA**, in the peninsula of Kattywar, province of Guzerat, a town within the British district of Ahmedabad, in the swampy tract extending along the western side of the Gulf of Cambay. The space between the town and the port of Dholera, a distance of about four miles, is traversed by a tramway, constructed by a company of native speculators. The line was opened in May, 1851, and bids fair to be highly profitable to its projectors. Distance

from the city of Ahmedabad, S.W., 65 miles. Lat. $22^{\circ} 11'$, long. $72^{\circ} 11'$.

DHOLATGHAT.—A town in the native state of Nepal, 27 miles S.E. from Khatmandoo. Lat. $27^{\circ} 34'$, long. $85^{\circ} 41'$.

DHOLKA, in the British district Ahmedabad, presidency of Bombay, a town situate amidst ruined palaces, mosques, mausoleums, and fine and spacious tanks, embanked and lined with masonry. Though not regularly fortified, it is surrounded by a wall of mud four miles in circuit. Population 25,000. Distance from Ahmedabad, S.W., 22 miles; Baroda, N.W., 60; Surat, N., 110; Bombay, N., 262. Lat. $22^{\circ} 42'$, long. $72^{\circ} 25'$.

DHOLNUH, in the British district of Budaon, lieut.-gov. of the N.W. Provinces, a village on the route from Futtehghurh to Meerut, and 80 miles N.W. of the former place. Lat. $27^{\circ} 50'$, long. $78^{\circ} 38'$.

DHOLPORE.—A small raj or territory on the northern bank of the Chumbul river, named from its principal place, and bounded on the north and north-east by the British district of Agra; on the south-east by the Chumbul, dividing it from the territory of Gwalior; and on the west by the territory of Kerowly. It lies between lat. $26^{\circ} 30'$ — $26^{\circ} 57'$, long. $77^{\circ} 32'$ — $78^{\circ} 20'$; is about fifty-four miles in length from north-east to south-west, twenty-three in breadth, and has an area of 1,626 square miles. The large river Chumbul, touching on the territory at its south-west angle, forms its south-eastern boundary for about sixty miles, and subsequently flowing eastward, forms the boundary between the British district of Agra and the territory of Gwalior. The Bangunga, called in this part of its course the Ootungun, after forming the boundary for a few miles, passes to the interior, through which it flows in a direction generally easterly for about fourteen miles, and subsequently, for twenty miles, forms the boundary between this territory and the district of Agra. In its course along the frontier, it on the right or south side, and in lat. $26^{\circ} 54'$, long. $77^{\circ} 57'$, receives the torrent Parbutty, flowing in a direction from south-west to north-east through this territory, which it enters from the territory of Kerowly. The surface of the country in the eastern part is generally level and sandy; the south-western part is hilly, being overspread with low ranges of sandstone, connected with the hills of Gwalior. Notwithstanding the poor quality of the soil, it is rendered fertile by continual irrigation, and in due season is covered with fine crops, interspersed with groves of mango-trees.

The principal towns of the territory—Dholpore, Baree, and Rajahkera—are described under their respective names in the alphabetical arrangement. If the population be assumed at the rate of that of the surrounding British districts, it will amount to 550,000. The revenue is estimated at 700,000 rupees, or

70,000*l.* per annum. The principal route through the country is from north to south, from Agra to Gwalior, by the town of Dholpore. The chief, who is styled Rana, and the majority of his subjects, are Jauts, who, according to the Brahminical notions respecting caste, are a spurious offshoot of the Rajpoots. Probably the first of the Rana's ancestors who rose into notice was the chief of Gohud, who, about the middle of the eighteenth century, acquired territory by the favour of the Peishwa Bajee Rao, but on the defeat of the Mahrattas at Paneeput, rebelled, and about 1761 made himself master of Gwalior and the adjacent country. The political relations between the Rana and the East-India Company commenced in 1779, when the respective parties formed a treaty of alliance, offensive and defensive, in which it was stipulated, that when peace should be concluded between the Company and the Mahrattas, the Rana should be included in it, and that his then present possessions, and such acquisitions made during the war as it should be agreed to leave in his hands, were to be guaranteed to him, together with the fort of Gwalior, recognised as of old belonging to the family of the Rana, if at the time of the peace he should be in possession of it. In 1780, that fort having been taken by a British detachment under Major Popham, was made over to the Rana, from whom subsequently it was wrested by Scindia, in 1784, the British government having abandoned the Rana, on the ground that he had been guilty of treachery. In 1804, however, that government engaged to establish the Rana in his hereditary dominions of Gohud, and certain districts enumerated in the treaty of that date; but difficulties arising in the way of carrying out this engagement, in consequence of the opposition of Scindia, the Rana agreed, by a new treaty, concluded in December, 1805, to relinquish the possessions thus guaranteed, receiving in their stead those which he now holds, comprising three districts—Dholpore proper, Baree, and Rajahkeri. Hence the chief is sometimes, though rather inaccurately, styled the Rana of Dholpore Baree. The military force maintained by the Rana, inclusive of the quotas of the jaghiredars, consists of about 2,000 men.

DHOLPORE.—The principal place of the small raj or territory of the same name, a town on the route from Agra to Gwalior, 34 miles S. of the former, 37 N. of the latter. It is situate a mile from the north-west or left bank of the Chumbul, here crossed by ferry, but fordable at Keytri, four miles higher up the stream, though the channel is there three-quarters of a mile wide. The river during the rainy season rushes down with a vast volume of water, overflowing the right bank, but restrained by the left, which is high and steep, so that the fort situate on it has a striking appearance. Here are some fine antique mosques and mausoleums. One of the mosques is stated to have been built by Shah Jahan in

1684; and some other of the buildings here are of still earlier date. They "are all elaborately built, and worked out of the fine freestone of the country; and the trellis-work upon some of their stone screens is still as beautiful as when first made." Dholpore is an ancient place, and was founded at a very remote period by a prince called Daula, from whom the name has been derived. Such, at least, is the traditional report of the natives, as recorded by Tieffenthaler. Baber repeatedly mentions the place, and states that it surrendered to him in 1526. He adds, that, seeing a huge solid mass of red stone there, he ordered it to be hewn into a house, if practicable; but finding that it had not sufficient depth for that purpose, he caused the top of the rock to be levelled, and a tank excavated therein. He also caused a palace, a mosque, a pleasure-ground, and a well to be formed near it. At present there is encamping-ground here, and a large bungalow or lodge for travellers, built by a former British resident, and purchased by the Rana for its present purpose. Distant N.W. from Calcutta, by Etawa, 793 miles. Lat. $26^{\circ} 41'$, long. $77^{\circ} 58'$.

DHOLPURI, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Almora, and 16 miles N. of the former. Lat. $29^{\circ} 2'$, long. $78^{\circ} 56'$.

DHOOLIA.—A considerable town in the British district of Candeish, presidency of Bombay, situate on the great route from Bombay to the city of Agra, 181 miles N.E. of Bombay. Lat. $20^{\circ} 54'$, long. $74^{\circ} 45'$.

DHOOLIAT.—A town in the native state of Gwalior, or territory of Scindia, 11 miles W. from Asseergurh, and 80 miles S. from Mhow. Lat. $21^{\circ} 29'$, long. $76^{\circ} 17'$.

DHOOM.—A town in the native state of Nepal, 91 miles N.E. from Pilleebheet, and 104 miles S.E. from Almora. Lat. $29^{\circ} 3'$, long. $81^{\circ} 19'$.

DHOOMA, in the British territory of Sangor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Nagpoor to Jubbulpoor, 40 miles S. of the latter. Lat. $22^{\circ} 44'$, long. $79^{\circ} 50'$.

DHOONDA, in Gurwhal, a village on the right bank of the Bhageerettee, as the Ganges is called in the upper part of its course. The road to the south is of extreme difficulty and danger, along the face of a precipitous mountain rising over the river on its right side. Dhoonda is in lat. $30^{\circ} 41'$, long. $78^{\circ} 24'$.

DHOONDGUL.—A town in Hyderabad, or dominions of the Nizam, 19 miles N. from Hyderabad, and 60 miles S.E. from Beder. Lat. $17^{\circ} 38'$, long. $78^{\circ} 30'$.

DHOOR.—A town in the British district of Cuddapah, presidency of Madras, 29 miles N. of Cuddapah. Lat. $14^{\circ} 51'$, long. $78^{\circ} 43'$.

DHOORCATEE, the smallest of the protected hill states between the Sutlej and the

Tonse, is bounded on the east by Bussahir, and on all other sides by the British district of Kothkasee. Its area is not more than five miles. Its centre is in lat. $31^{\circ} 8'$, long. $77^{\circ} 40'$. The surface has considerable elevation, the district containing the peak of Toongroo, which rises to the height of 10,102 feet above the sea, and whence streams flowing on the west to the Giree, and on the north to the Pabur, become feeders to those rivers. This state comprises only a single pergunnah, with a population of 200 and a revenue of 40*l*. It is free from tribute.

DHOOREE, in Sirhind, a village on the route from Hansee to Loodiana, and 41 miles S. of the latter town. It is situate in a country having a slightly-undulated surface, fertile, and partially cultivated. Distant N.W. from Calcutta 1,062 miles. Lat. $30^{\circ} 22'$, long. $75^{\circ} 57'$.

DHOOREEAPoor is the principal place of the pergunnah of the same name, in the British district of Goruckpoor, lieutenant-gov. of Agra, situate three miles to the west or left of the route from Azimgurh to Goruckpoor, and distant 34 miles N. of the former, 28 S. of the latter. It is styled by Buchanan a market-town. Distant N. from Ghazee-pore 78 miles, N.E. from Calcutta 509. Lat. $26^{\circ} 23'$, long. $83^{\circ} 18'$.

DHOOS, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a town on the route from Benares to Sasseram, 10 miles E. of the former. Lat. $25^{\circ} 16'$, long. $83^{\circ} 14'$.

DHOR, in the Peshawur division of the Punjab, a town situated on the left bank of the river Indus, five miles S. of the town of Attock. Lat. $33^{\circ} 50'$, long. $72^{\circ} 20'$.

DHORA OO.—A town in the British district of Bolundshuhur, lieutenant-gov. of the N.W. Provinces, 70 miles S.E. of Delhi. Lat. $28^{\circ} 7'$, long. $78^{\circ} 14'$.

DHORAJEE.—A town in the peninsula of Kattywar, province of Guzerat, 43 miles S.W. from Rajkote, and 52 miles E. from Poorbundur. Lat. $21^{\circ} 45'$, long. $70^{\circ} 33'$.

DHORI, in the British district of Azimgurh, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Azimgurh to Goruckpoor cantonment, 31 miles N.E. of the former, 34 S.E. of the latter. It is situate on the right bank of the Ghogra, here a great river, confined to one channel crossed by a ferry. Lat. $26^{\circ} 14'$, long. $83^{\circ} 33'$.

DHOULAGIRI, in Nepal, one of the highest peaks of the great Snowy range of the Himalayas, being 27,600 feet above the level of the sea. Lat. $29^{\circ} 11'$, long. $82^{\circ} 59'$.

DHOULI, a principal head-water or tributary of the great river Ghoghra, has its remotest source at the southern base of the Neo Dhoora Ghat, or pass leading from the Bhotia mahall, or subdivision of Dharma, to Hiundes or South-western Tibet, and at an elevation above the sea of probably about

15,000 feet, and in lat. $30^{\circ} 28'$, long. $80^{\circ} 33'$. Its source is to the north of the main range of the Himalaya, through which it holds its way by the valley of the Dharma mahall or subdivision, and flows at the western base of the great mountain Lebung. About thirty-five miles from its source, and in lat. $30^{\circ} 5'$, long. $80^{\circ} 40'$, it touches on the mahall of Choundans, the western frontier of which it forms for fifteen miles, and falls into the Kalee on the right side, in lat. $29^{\circ} 57'$, long. $80^{\circ} 38'$. Its stream is in general a succession of violent rapids in a rocky channel, amidst awful precipices and ravines. Webb describes it, at twenty-five miles from its source, as "violent, turbid, in continued rapids from six to twenty-five feet; bed rocky, average breadth from sixteen to twenty yards;" and adds, that after rain "the water is so foul and turbid as to be unfit for drinking." The road to Hiundes by the Neo Dhoora Pass proceeds up the course of the river, passing by means of spar bridges from side to side, according to the exigencies of the path, which sometimes winds along the faces of the nearly perpendicular precipices; yet, during the season when the passes are open, this difficult track is crowded by innumerable laden goats and sheep, bearing grain and other merchandise from the lower districts to Hiundes.

DHOOR BOONGA, in the British district of Gurhwal, lieut.-gov. of the N.W. Provinces, a town on the right bank of the river Sanee, 20 miles S. of Sireenuggur. Lat. $29^{\circ} 57'$, long. $78^{\circ} 52'$.

DHOURERA.—A town in the territory of Oude, 80 miles N. from Lucknow, and 73 miles E. from Shahjehanpoor. Lat. 28° , long. $81^{\circ} 9'$.

DHOWLUTNUGUR, in the Jetch Doosab division of the Punjab, a town situated on the route from Wazeerabad to Bhinbur, 20 miles N. of the former. Lat. $32^{\circ} 47'$, long. $74^{\circ} 9'$.

DHUBROOEE, in Guzerat, or the territory of the Guicowar, an ancient decayed town. It has a nearly quadrangular ground-plan, and is inclosed with a rampart two miles in circuit, made of large hewn stones, and having on the interior side a beautiful and useful colonnade of the same material. Within this inclosure is a large tank of strong masonry, access to the water of which is by means of a grand flight of stairs extending quite round it, and on the well-constructed stone embankment are numerous Brahminical temples. The total circuit of the tank is considerable, it being supplied with water not only from the periodical rains, but also by means of an aqueduct of stone, conveying it from the country outside. Viewed from the country, Dhubbrooe has a noble aspect, its ramparts being surmounted by fifty-two towers, besides one at each angle, of superior dimensions to the rest. In each face of the quadrangular rampart is a double gate, with a spacious area between, surrounded by a corridor and guard-rooms.

The portal on the eastern side is called the "Gate of Diamonds," and with the temple adjoining, forms a very noble and elegant specimen of Hindoo architecture. It extends 320 feet in length, with proportionate height, and the upper part of the building is supported by rows of figures of elephants sculptured in stone, and represented as richly caparisoned. All parts of these superb buildings are embellished with a profusion of sculptures, representing warriors in combat on horses, on foot, or on elephants, in a very superior style of execution; and there are besides, sculptures innumerable of lions, camels, birds, snakes, and various other animals. A considerable part of the ramparts and other buildings have been destroyed by the hand of time and by invading Mussulmans. According to native tradition, these magnificent structures, including the fortifications, tank, and temples, cost upwards of ten millions sterling. The vast quantity of massive hewn stone used in them, is calculated to excite the greater surprise, as not the smallest pebble is to be met with in this part of Guzerat. The place swarms with monkeys, which are supported, encouraged, and protected by the inhabitants, though very mischievous and troublesome. Distance from Baroda, S.E., 15 miles; Surat, N.E., 73; Bombay, N., 225; Ahmedabad, S.E., 80. Lat. $22^{\circ} 8'$, long. $73^{\circ} 25'$.

DHUJ PEAK, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a summit of the Sub-Himalaya, or mountain-system south of the great range, east of Fort Almora 40 miles, and equidistant from the rivers Ramganga (Eastern) and Kalee (Eastern). Elevation above the sea 8,248 feet. Lat. $29^{\circ} 38'$, long. $80^{\circ} 20'$.

DHUKOWLEA, in the British district of Futtehpoor, lieut.-gov. of the N.W. Provinces, a village on the route from Banda to the town of Futtehpoor, and four miles S.W. of the latter. Lat. $25^{\circ} 54'$, long. $80^{\circ} 50'$.

DHUMDA.—A town in the British province of Nagpoor, 135 miles E. from Nagpoor, and 30 miles N.W. from Ryepoor. Lat. $21^{\circ} 23'$, long. $81^{\circ} 14'$.

DHUMRAH, or **DOMRAH RIVER**, in Cuttack, the name of the principal outlet of the Byeturnee: its mouth is in lat. $20^{\circ} 59'$, long. $87^{\circ} 2'$.

DHUMRAH.—A town in the British district of Cuttack, lieut.-gov. of Bengal, 71 miles N.E. of Cuttack. Lat. $20^{\circ} 50'$, long. $86^{\circ} 59'$.

DHUMTERRY.—A town in the British province of Nagpoor, distant E. from Nagpoor 150 miles. Lat. $20^{\circ} 39'$, long. $81^{\circ} 26'$.

DHUMTHAN, in Sirhind, a halting-place in the British district of Kythul, on the route from Hansee to Loodiana, and 43 miles N. of the former town. Distant N.W. from Calcutta 1,019 miles. Lat. $29^{\circ} 42'$, long. $76^{\circ} 5'$.

DHUMTOUR, or **DUMTAUR**, in the

DHU.

British province of the Punjab, a valley extending nearly in a direction from east to west, in lat. $34^{\circ}—34^{\circ} 10'$, and long. $72^{\circ} 55'—73^{\circ} 15'$. It is described by Baron Hügel, who explored it, as giving the impression of having been once the bed of a vast torrent. It is still furrowed by numerous watercourses, discharging themselves into the river Dor, which flows with a scanty stream in a stony channel half a mile wide. Here the traveller, descending from the elevated country lying to the north, finds the vegetation assuming the character of that which prevails in Hindostan. The sugarcane especially is grown in such abundance, that it forms a principal article of fodder for cattle. The mountains which inclose the valley on the north-west are clothed with dense and luxuriant forests of oak, pine, walnut, wild olive, and plane trees. The valley is populous, and abounds in villages, each defended by a small fort. Dhumtoor, which gives name to the valley and district, is a small and poor place. The inhabitants are Eusufzai Afghans.

DHUMTOUR, in the Punjab, a small town, 16 miles E. of the Indus, lying on the route into Cashmere, by the Dub Pass. It is situate in a beautiful, well-watered, and productive valley, crowded with small forts, erected and maintained on account of the dangerous proximity of the Eusufzais. Lat. $34^{\circ} 7'$, long. $73^{\circ} 7'$.

DHUNAIREE.—A town in the province of Guzerat, or dominions of the Guicowar, 26 miles N. from Deesa, and 140 miles S.W. from Oodeypoor. Lat. $24^{\circ} 37'$, long. 72° .

DHUNCHI.—A town in the native state of Nepal, 42 miles N. from Khatmandoo. Lat. $28^{\circ} 19'$, long. $85^{\circ} 14'$.

DHUNELA, in the territory of Gwalior, or possessions of Scindia, a small town on the route from Agra to the fort of Gwalior, 60 miles S. of former, 11 N.W. of latter. It has a bazar, and supplies may be obtained. Here, on the 24th December, 1843, was the encampment of the Mahratta army, consisting of twenty-two regiments, with a large and well-appointed park of artillery, advancing to give battle to the British, posted at the neighbouring village of Hingona, under Sir Hugh Gough, commander-in-chief. Lat. $26^{\circ} 24'$, long. $78^{\circ} 8'$.

DHUNGAWAN, in the British district of Sohagpoor, territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town 34 miles S.E. of Sohagpoor, 119 miles E. of Jubbulpoor. Lat. $23^{\circ} 2'$, long. $81^{\circ} 52'$.

DHUNGOEE.—A town in the British district of Sarun, lieutenant-gov. of Bengal, 39 miles N. of Chupra. Lat. $26^{\circ} 17'$, long. $84^{\circ} 40'$.

DHUNGSURRA, in the Rajpoot state of Joudpore, a village on the route from Jessulmeer, *viâ* Nagor, to Nusseerabad, and 102 miles N.W. of the latter. Lat. $27^{\circ} 8'$, long. $78^{\circ} 35'$.

DHUNGURHEE.—A town in the terri-

tory of Oude, 130 miles N. from Lucknow, and 53 miles E. from Pilleebheet. Lat. $28^{\circ} 41'$, long. $80^{\circ} 47'$.

DHUNOWDA, in Sirhind, a small town with a bazar, on the direct route from Hansee to Loodiana, and 30 miles N. of the former place. Provisions may be had in abundance, and water from wells. Distant N.W. from Calcutta 1,006 miles. Lat. $29^{\circ} 31'$, long. $76^{\circ} 4'$.

DHUNSEEREE, a considerable feeder of the Brahmapootra river, rises in lat. $25^{\circ} 20'$, long. $93^{\circ} 33'$, on the southern frontier of Tooleram Senaputtee's country, and, flowing in a northerly direction through that country for twenty-one miles, then forming its boundary for forty-six miles on the side of the Nagor territory, subsequently separating the latter for the distance of thirty miles from the British territory of Nowgong, it traverses Assam for thirty miles, and falls into the Brahmapootra on the left side, in lat. $26^{\circ} 41'$, long. $93^{\circ} 44'$.

DHUNTALAO, in the territory of Gwalior, or possessions of Scindia, a village on the route from Hoshungabad to Neemuch, 93 miles W. of former, 181 S.E. of latter. It is situate at the north-west extremity, or on the crest of a pass leading from the valley of the Nerbudda to the table-land of Malwa. Lat. $22^{\circ} 44'$, long. $76^{\circ} 32'$.

DHUNWA.—A town in the Rajpoot state of Jessulmeer, five miles S. from Jessulmeer, and 62 miles W. from Pokurn. Lat. $26^{\circ} 50'$, long. 71° .

DHUR, in the mahall or subdivision of Dharma, British district of Kumaon, a village a mile from the right bank of the river Doulee. East of the village, a hot spring throws up a dense and powerful stream. The banks of its small channel are tinged of an ochreous hue, partly occasioned by its heat, and partly, perhaps, from a chalybeate quality. Elevation above the sea probably about 8,000 feet. Lat. $30^{\circ} 5'$, long. $80^{\circ} 37'$.

DHURAMPORE.—A town in the native state of Nepal, 70 miles S.E. from Khatmandoo, and 50 miles N. from Durbunga. Lat. $26^{\circ} 52'$, long. $85^{\circ} 55'$.

DHURAVEE.—An island situate to the north-west of Salsette, off the coast of Bombay: it is about seven miles long by two broad, and its centre is in lat. $19^{\circ} 14'$, long. $72^{\circ} 53'$.

DHURKOT.—A town in the native state of Nepal, 162 miles N.W. from Khatmandoo, and 122 miles N.W. from Goruckpoor. Lat. $28^{\circ} 22'$, long. $82^{\circ} 45'$.

DHUROWLEE, or **DEROWLI**, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Futtelgurh, and 39 miles W. of the latter. Lat. $27^{\circ} 30'$, long. $79^{\circ} 7'$.

DHURPHUREEPUTTEE.—A town in the British district of Tirhoot, lieut.-gov. of Bengal, 27 miles W. of Mozufferpoor. Lat. $26^{\circ} 7'$, long. $85^{\circ} 2'$.

DHURRUMPOOR, a petty Rajpoot state under the political superintendence of the government of Bombay, is bounded on the north by the petty raj of Bansda; on the east by the Daung; on the south by the district of the rajah of Penth; and on the west by the British district of Surat. The country (which includes an area of about 225 miles), overrun with dense forest, admits of little cultivation. The revenue is estimated at 91,000 rupees, or 9,100*l*. The rana maintains a small military establishment, and the population of his territory is returned at 16,650 inhabitants. In 1831 the rajah's pecuniary embarrassments led him to mortgage to his creditors the revenues of a portion of his villages, he agreeing to abstain from all interference in the revenue or police management of these mortgaged villages until his creditors' claims should be liquidated; but, at a later date, it being found that public inconvenience was occasioned from the suspension of the rajah's exercise of the powers of police, he was authorized by the Bombay government to resume them, but subject to the general control of the British agent. The rajah of Dhurrumpore was formerly tributary to the Peishwa, but, by the treaty of Bassein, concluded in 1802, the tribute was transferred to the British, and rated in the schedule of the treaty at 9,000 rupees per annum. The town of Dhurrumpore is in lat. $20^{\circ} 31'$, long. $73^{\circ} 15'$.

DHURUMPOOREE.—A town in the native state of Dhar, in Malwa, 29 miles S. from Dhar, and 35 miles S.W. from Mhow. Lat. $22^{\circ} 10'$, long. $75^{\circ} 26'$.

DHURUMPOOREE.—A town in the British territory of Sattara, presidency of Bombay, 49 miles N.E. of Sattara. Lat. $17^{\circ} 57'$, long. $74^{\circ} 44'$.

DHURUMSAL.—A town in the native state of Cashmere, or territory of Gholab Singh, 39 miles N.E. from Jhelum, and 78 miles S.W. from Sirinagur. Lat. $33^{\circ} 15'$, long. $74^{\circ} 10'$.

DHURUMSALLA.—A village in the native state of Cutch, presidency of Bombay, eight miles S. of Bhooj. Lat. $23^{\circ} 9'$, long. $69^{\circ} 41'$.

DHUTARA, in the British district of Boondlshubur, lieut.-gov. of the N.W. Provinces, a village on the route from Khaaganj to Meerut, and 45 miles S. of the latter. Lat. $28^{\circ} 23'$, long. $77^{\circ} 58'$.

DHYWELL.—A town in the British district of Candeish, presidency of Bombay, 41 miles W. of Dhoolia. Lat. $21^{\circ} 2'$, long. $74^{\circ} 7'$.

DIAMOND ISLAND, or **LYCHUNE ISLAND**, situate at the mouth of the Negravis river: it is low, covered with trees, about a mile and a half in extent, and surrounded with

reefs. It is considered unhealthy and dangerous to remain on it during the night. H.M.'s ship *Sibylle* lost several of her men by fever from this cause. Distant 70 miles S.W. of Bassein. Lat. $15^{\circ} 52'$, long. $94^{\circ} 19'$.

DIAMOND HARBOUR.—The well-known port so called is situate in the river Hooghly, 29 miles below Calcutta. The adjacent territory, though interesting from being the first possession of the East-India Company in Bengal, is singularly unhealthy, the whole country round being swampy. There is no town, unless a few native huts are worthy the appellation; but ships are usually lying in the harbour, for the reception or discharge of cargo. The road from Calcutta is excellent. Communication between this place and the capital is also maintained by means of the electric telegraph. Lat. $22^{\circ} 12'$, long. $88^{\circ} 10'$.

DIA SIAWALA.—See DEEHA.

DIBING.—A town in the native state of Cashmeer, or territory of Gholab Singh, 109 miles E. from Sirinagur, and 67 miles N.E. from Kishtewar. Lat. $33^{\circ} 56'$, long. $76^{\circ} 50'$.

DIBONG RIVER rises in lat. $28^{\circ} 23'$, long. $96^{\circ} 46'$, and, flowing for ninety miles west through Thibet, and fifty miles south-west through Sudiya, in Assam, falls into the Brahmapootra river in lat. $27^{\circ} 50'$, long. $95^{\circ} 28'$.—See BRAHMAPOOTRA.

DICHOO.—See DAICHOO.

DIG, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Cawnpore to that of Calpee, and 15 miles N.E. of the latter. Water is abundant here, but supplies must be collected from the surrounding country. Lat. $26^{\circ} 17'$, long. $79^{\circ} 57'$.

DIG, or **DIGA**, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the left bank of the Ganges, 752 miles N.W. of Calcutta by the river route, 56 S.E. of the city of Allahabad by the same. Lat. $25^{\circ} 15'$, long. $82^{\circ} 18'$.

DIGAR.—A town in the native state of Cashmeer, or territory of Gholab Singh, 20 miles N.E. from the town of Le, and 134 miles N.E. from Kishtewar. Lat. $34^{\circ} 16'$, long. $77^{\circ} 55'$.

DIGAROO.—A river in Upper Assam, rises in Thibet, in lat. $28^{\circ} 10'$, long. $96^{\circ} 13'$, and after a course of ten miles through Thibet and fifteen through the Sudiya district of Assam, falls into the Brahmapootra, in lat. $27^{\circ} 50'$, long. $96^{\circ} 2'$.

DIGGEE, or **DHIGGI**, in the Rajpoot state of Jeypore, a town on the route from Nussarabad to Gwalior, 48 miles E. of former, 193 W. of latter. It is of considerable size, and supplies and water are abundant. Lat. $26^{\circ} 24'$, long. $75^{\circ} 35'$.

DIGNUGGUR, in British district of Burdwan, lieut.-gov. of Bengal, a town four or five miles on the right of the railway now under

construction from the town of Burdwan to Raneeungee, 18 miles N.W. of former, 38 S.E. of latter. Jacquemont describes it as having many hundred houses, a considerable number of native gentry, some in the employment of government, others speculating in sugar, which is abundantly produced in the surrounding country. Distance N.W. from Calcutta by Burdwan 70 miles. Lat. $23^{\circ} 22'$, long. $87^{\circ} 45'$.

DIHATRA, in the Rajpoot state of Bikaner, a considerable village on the route from the town of Bikaner to that of Jessulmeer, and 40 miles S.W. of the former. The vicinity contains a few fields producing wheat. Dihatra is in lat. $27^{\circ} 43'$, long. $72^{\circ} 51'$.

DIHONG.—A river rising on the northern face of the Himalayas, in lat. $30^{\circ} 25'$, long. $82^{\circ} 5'$, and, pursuing an easterly course through Thibet for upwards of 1,000 miles, during the greater part of which it bears the name of the Sanpoo, it suddenly sweeps round to the south and enters Assam, where, under the name of the Dihong, it falls into the Brahmaputra.

DILLY (MOUNT).—A remarkable headland in the British district of Malabar. In clear weather it may be discerned from sea at a distance of from twenty-four to twenty-seven miles, and as the contiguous land is low, the headland, which is bluff, and has a small ancient fort on the summit, appears at a distance like an island. "The shore here is bold and safe to approach, there being seven and eight fathoms at one and two miles' distance, twenty and twenty-two fathoms at two or two and a half leagues' distance, and at fifteen leagues' distance abreast the mount you lose soundings. This is the narrowest part of the channel between the main and Lacadiva Islands, the distance being twenty-seven leagues between Elicalpeni Bank and Mount Dilly. Abreast of this headland there is frequently a drain of current to the southward, with a short confused swell, the effect of brisk north-westers, which greatly prevail here." Elevation above the sea 804 feet. Some years ago a project was set on foot for the construction of a harbour off this promontory, but in consequence of the enormous expense required for its formation, the scheme was abandoned. Lat. $12^{\circ} 2'$, long. $75^{\circ} 16'$.

DILODE.—A town of Malwa, in the native state of Bhopal, 17 miles N. from Bhopal, and 30 miles W. from Bhilsa. Lat. $23^{\circ} 30'$, long. $77^{\circ} 22'$.

DILSHAPOOR.—See **DULSHAFPOOR**.

DINAGPORE, under the lieut.-gov. of Bengal, a British district named from its principal place. It is bounded on the north-east by the native state of Bhotan; on the east by that of Coosh Behar and the British district of Rungpore; on the south by those of Bograh, Rajeshaye, and Malda; on the west by Purnea; and on the north by the British territory of Darjeeling. It lies between lat. $24^{\circ} 53'$ —

$26^{\circ} 38'$, long. $88^{\circ} 2'$ — $89^{\circ} 16'$; is 130 miles in length from north to south, and 75 in breadth. The area is 3,820 square miles. It is a very flat country, the only eminences being mere undulations, not rising more than 100 feet above the ordinary level of the surface. There is, however, a general, though very gradual, slope of the country from north to south, as indicated by the flow of the rivers in that direction. The principal of these is the Teesta, which, flowing southerly from the mountains of Sikkim, touches on the district in lat. $24^{\circ} 53'$, and flowing south-east for thirty-five miles, divaricates into two streams, one, called the Attree, flowing south, the other flowing south-east into Coosh Behar, and retaining the name of Teesta. The Attree communicates with other streams having courses in some measure parallel to its own, and sends from its right side a large offset, called the Pernabada, which, flowing south-westerly by the city of Dinagpore, passes the southern boundary of the district into the British district of Malda, and falls into the Mahanunda. The Jamuna, or Jabuna, a considerable stream, holds a course nearly parallel to the Attree, but on an average about fifteen miles to the east of it. With a parallel course, but still farther to the eastward, flows the river Curateea, an offset from the Attree. The Tangon, rising in the northern quarter of the district, and having a course parallel in some measure to the Attree, and on an average about twenty miles west of it, flows through this district for about 140 miles, crossing the southern frontier into the British district Malda. The Coolick, a considerable watercourse, unites the Tangon with an important stream termed the Nagor. Numerous smaller streams traverse the country, communicating with the greater and with each other; the whole tract, in consequence of the propinquity of the Himalaya and the powerful influence of the monsoons, having such redundancy of moisture, that the surface is little but a reticulation of watercourses. Rice is the principal grain of the district. Wheat and barley are raised, but in no great quantities; meruya (*Cynosurus coracanus*) and various kinds of millet are also articles of cultivation. Peas, and various other kinds of pulse, as well as oil-seeds, are extensively raised. The insipid fare of the bulk of the people peculiarly requiring seasoning, many products are grown for this purpose: ginger, turmeric, capicum, coriander, anise, and pepper. Of esculent vegetables, there are the potato, sweet potato, begun or egg-plant, esculent arum radish, plantain (*Musa paradisiaca*), various cucurbitaceous plants, and many others unknown in Europe; most of the vegetables of that quarter of the world, however, thriving here during the cool season. A small quantity of cotton is cultivated: it is generally of poor quality, and is retained for home use. There is, however, a kind denominated son, of superior quality, produced in the eastern part, having a strong staple, well suited for sailcloth and cordage.

The sugar-cane flourishes, having a stem of considerable thickness, and twelve or fourteen feet high. The canes are planted in the beginning of spring, and gathered towards the close of the succeeding winter. The juice is prepared merely by boiling down, either into a thick syrup or a hard dry cake, and in these states sent to market. The tobacco grown is not sufficient for the consumption of the district. Betel (*Piper betle*) and hemp (*Cannabis sativa*), yielding an intoxicating extract, are grown to considerable extent. The cultivation of indigo has been tried, but does not appear to prosper. Silk is produced in considerable quantity, the worms being fed on the foliage either of the mulberry or of the castor-oil plant (*Ricinus communis*).

The majority of the people are wretchedly lodged in huts, the sides of which are of strong coarse matting, the roofs of thatch, the framework of strong bamboos. Persons in easier circumstances have dwellings of mud, and latterly a few of the more wealthy have built houses of brick, in imitation of those of the Europeans. Mosques are numerous in the district. They are generally small, and of simple construction; the form, a cube, covered with a dome, or a paralleloiped covered with several. The most numerous Hindoo places of worship are denominated sthans, and are merely heaps or square terraces of earth placed under trees, having a stone or a rude image of clay painted as an object of worship. A step in advance of this is the mondpod, having walls painted with rude, frightful imagery, on subjects drawn from the Hindoo mythology. Such a building, surmounted by a pyramid or a dome, is a still higher effort of devotional zeal, and is reserved for the more revered objects of worship. The most complex and expensive is called a *novorotno*, or "building of nine ornaments," having a roof of two stages, with an octagonal ground-plan, a central pyramid, and eight others, one at each external angle. Such buildings are costly, as they are cased with expensive tiles elaborately carved. That at Gopalganj is said to have cost 20,000*l*. The population is given in the article *BENGAL*. The Mussulmans have been estimated to exceed the Hindoos. Among both, marriages take place excessively early, the conjugal union being ordinarily completed before the female has reached the close of her thirteenth year, or the male that of his sixteenth. The effects of these premature marriages are said to be manifested in the physical and intellectual deterioration of the population, and the small increase of their numbers. The inhabitants of Dinagopore are represented by Buchanan as a puny, weak race, and far from having numerous families. They are, moreover, said to be generally short-lived, being cut off in great numbers by fevers and dysentery. The prevalence of these affections does not appear to arise from want of food. Polygamy is very prevalent, especially among the Brahminists. Widows rarely burned themselves with the

bodies of their husbands, even when that horrible practice was permitted by law, and not more than one or two instances occurred annually. Only a few Brahmins of superior rank are versed in Sanscrit. Much more extensive is the knowledge of the Prakrit, a dialect corrupted from the Sanscrit, which has supplied most of the words, the syntax and inflexions having sprung from the ordinary tongue of the district. The common people are acquainted only with Bengalee. The number of towns is very small in proportion to the extent and population of the district, the great majority of the people residing in dispersed hamlets. The chief towns—Dinagopore the capital, Hemtabad, Raegang, Damdahah, and Ghonaghat—are noticed under their respective names in the alphabetical arrangement. There are few routes through this district. They are—1. From west to east, from Purneah, through the town of Dinagopore, to Rungpore; 2. from south to north, from Berhampore, through the town of Dinagopore, to Darjeeling; 3. from south-west to north-east, from Maldah to the town of Dinagopore.

Legends respecting the primeval state of the tract comprised in this district abound in the works relating to the early mythology of India; but the commencement of authentic history may be placed at the beginning of the thirteenth century, when Raja Lokhymon or Lakshmanyah was expelled from his dominions by Muhammad Bakhtyar, one of the generals of Kutb-uddin, emperor of Delhi. When Fakhruddin, in 1338, proclaimed himself independent sovereign of Bengal, he appears to have made himself master of Dinagopore at the same time, though its obedience was probably precarious. Eventually it was, in 1538, reduced, with the remainder of Bengal, by Shir Shah, the renowned Afghan, who soon after established himself in the sovereignty of Delhi, from which he had expelled Humayon. After the death of Shir Shah, it was subdued in 1534 by Akbar, the son of Humayon, and appears to have remained a district of the empire of Delhi until the time nearly of its dissolution. In 1765 it was conveyed to the East-India Company by the grant of Shah Alum.

DINAGOPORE.—The principal place of the British district of the same name, a town on the route from Purneah to Rungpore, 85 miles E. of the former, and 43 W. of the latter. It is situate on the river Purnabada. Through the exertions of the British authorities, it is now clean and well watched, which is understood to present a favourable contrast to its former state. There is no public building deserving any consideration, the spacious residence of the rajah having for many years been in a state of ruin, and the ditch and rampart with which it was inclosed being nearly obliterated. There are no Brahminical temples worth notice, and but one mosque, even that being small, and of no architectural pretensions. The public offices of the civil establish-

ment are large, but ill built, and totally devoid of elegance. The population has been estimated at from 25,000 to 30,000 persons. Dinagepore is distant N. from Berhampore 142 miles, N. from Calcutta 261. Lat. $25^{\circ} 34'$, long. $88^{\circ} 38'$.

DINAPOOR, in the British district of Patna, lieutenant-gov. of Bengal, a town on the right or south bank of the Ganges. It is an important military station, and remarkable for the fine barracks built by government for the accommodation of the troops. The barracks for the accommodation of the European soldiers are comprised within a magnificent and elegant structure, and those of the officers, though rather inferior, are yet very fine buildings, and of great extent. Many of the officers have built commodious lodges in the vicinity, and the grounds about them are neatly and tastefully laid out. There are also extensive and very handsome barracks for the native troops. The church is capacious and handsome, and the various houses scattered in market-places within the boundaries of the cantonment, and subject to military authority, were stated in 1807 to amount to 3,226; so that if five persons be allowed to each, the population should be estimated at 16,130, exclusive of military. The markets are well supplied, especially with articles suited to European taste. Distant E. from Benares, by Ghazepore, 145 miles, W. from Patna 10, N.W. from Calcutta 411. Lat. $25^{\circ} 37'$, long. $85^{\circ} 7'$.

DINAREH.—A town in the British district of Shahabad, lieutenant-gov. of Bengal, 70 miles S.W. of Dinapoor. Lat. $25^{\circ} 12'$, long. $84^{\circ} 6'$.

DINDARY.—A town in the British province of Nagpore, 175 miles N.E. from Nagpore, and 80 miles N. from Ryepoor. Lat. $22^{\circ} 20'$, long. $81^{\circ} 33'$.

DINDEE RIVER rises in lat. $17^{\circ} 2'$, long. 78° , and flowing in a south-easterly direction for 110 miles through Hyderabad, or the Nizam's territories, falls into the Kistna in lat. $16^{\circ} 22'$, long. $79^{\circ} 16'$.

DINDIGUL, in the British district of Madura, presidency of Madras, a town with a fort, situate at the north-eastern extremity of the valley of the same name. It is built on a gentle declivity, and is in length from north to south 987 yds., and in breadth from east to west 927. The streets are wide, the houses well built, and the bazars plentifully supplied with all the necessaries of life. The number of houses a few years ago was stated to be 1,833, and that of the inhabitants (exclusive of the troops) 6,550. The military lines, situate at the north-west corner of the town, are well drained, and always dry and clean. The Court of Justice and collector's lodge are about a quarter of a mile from the town; and between them and the town are the lodges of the officers, surrounded by groves and gardens, inclosed with hedges of euphorbium and aloes. The water is in general good, but the population give a preference, for drinking, to that obtained from the Brahmin's

Baoli, a large public well at the north of the town. Excellent water is also found in a reservoir situate at the bottom of the rock, and replenished by the rains. The fort is situate on a wedge-shaped mass of gneiss 400 feet in length and 300 in breadth, perfectly bare of vegetation, with the exception of a few patches of scanty soil about the summit, in which some stunted trees and shrubs grow. The ascent is on the eastern side by a flight of stone steps, the other sides being nearly perpendicular. Near the summit there is a well of great depth, erroneously supposed by the natives to be unfathomable. The water from it is excellent. Dindigul is the principal place of a subdivision of the same name, forming part of the British district of Madura. Elevation of the town above the sea 700 feet, of the rock 980. Distance from Madura, N., 32 miles; Tanjore, S.W., 88; Trichinopoly, S.W., 60; Cochin, E., 126; Madras, S.W., 247. Lat. $10^{\circ} 22'$, long. $78^{\circ} 3'$.

DINDOOREE.—A town in the British district of Ahmednuggur, presidency of Bombay, 96 miles N.W. of Ahmednuggur. Lat. $20^{\circ} 1'$, long. $73^{\circ} 50'$.

DINGAR, in the native state of Gurwhal, a village in the valley of the Budiar, and on the left bank of the torrent of that name. Elevation above the sea 7,119 feet. Lat. $30^{\circ} 56'$, long. $78^{\circ} 17'$.

DINGARA.—See **DINGAREE**.

DINGARH KINER, in Sirmoor, a large village situate on a very picturesque site in the gorge through which the route passes northwards from Nahun to Rajgurbh. It has very splendid views,—on the north, of the Chur mountain; on the south, of the valley of the Julal river. Fraser, who thought it the largest place in Sirmoor except Nahun, the capital, describes it as consisting of well-built flat-roofed houses, arranged in rows on the ledges of the solid limestone rock forming the mountain. The country, though very rocky, has some fertile spots, which produce luxuriant crops, especially of wheat. Lat. $30^{\circ} 44'$, long. $77^{\circ} 21'$.

DINGATHUR, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route up the course of the Ramgunga river (Eastern) from Petoragurbh to the Unta Diura Pass, 16 miles north of Petoragurbh, one and a half east of the left bank of the Ramgunga. It was an important position in the survey of Kumaon by Webb, who remained there fifteen days engaged in trigonometrical and meteorological observations. Elevation above the sea 4,443 feet. Lat. $29^{\circ} 49'$, long. $80^{\circ} 12'$.

DINGEE, in Sind, a fort between Kheypoor and Hyderabad, and 50 miles S. of the former town. It is surrounded by walls fifteen feet high, and has an abundant supply of water from wells. Here, in the beginning of 1843, the ameer of Sind collected an army, prepa-

ratory to their final struggle with the British. Lat. 26° 52', long. 68° 40'.

DINGUR KINGUR.—See **DINGARRH.**

DINGYE, in the Rajpoot state of Joudpore, on the route from Nusseerabad to Deesa, and 123 miles S.W. of the former. The surrounding country is in general level and bare, but occasionally with a few small hills. The road in this part of the route is firm and good. Lat. 25° 37', long. 73° 27'.

DIPAL, or **DUTI.**—A town in the native state of Nepal, 51 miles S.W. from Jemlah, and 70 miles N.E. from Pilleebheet. Lat. 29° 5', long. 80° 54'.

DIPALPOOR.—A town in the Punjab, situate in the Doab between the Ghara and the Ravee, 21 miles from the right bank of the former, 26 from the left of the latter. In the time of the emperor Acbar, it was the chief town of a district which yielded an income of 3,233,353 rupees. Lat. 30° 37', long. 73° 38'.

DIRAWUL, or **DILAWUR** (the *l* and *r* being interchangeable).—A fortress of Bhawalpoor, situate in the desert, forty miles from the left bank of the Punjab. It is strongly fortified, according to the notions of native powers, and with reference to their practical skill in the arts of defence; but its safety principally lies in the difficulty of access to it, the road lying through a parched desert totally devoid of water; so that a besieging army must draw its supply from a distance of fifteen miles. At the time of Atkinson's visit, it contained the treasure of the late nawaub Bhawl Khan, vaguely estimated at 700,000*l*. Here also was his zenana, and thither he retired for relaxation from the fatigues of business, or for security when threatened with invasion. There is here a manufactory of gunpowder for artillery, but the produce is of very indifferent quality. Lat. 28° 44', long. 71° 17'.

DIREEAPoor, in the British district of Allygurh, lieut.-gov. of the N.W. Provinces, a town with a bazar, on the route from the cantonment of Allygurh to that of Etawah, and 19 miles S. of the former. Lat. 27° 39', long. 78° 12'.

DISANG.—A river rising in lat. 26° 47', long. 95° 25', in the country inhabited by the Naga tribes, through which it flows north for thirty miles to the village of Boorhath, where it turns easterly, and flowing for sixty miles through the British district of Seelpoor, in the territory of Assam, it falls into the Brahmapootra in lat. 27° 4', long. 94° 30'.

DIU.—A seaport town on the south coast of the peninsula of Kattywar, province of Guzerat, belonging to the Portuguese, who obtained possession of the place in 1515. It is situate at the eastern extremity of an island extending in a direction from east to west about seven miles, and having a breadth varying from a mile and a half to two miles. "Off the point on which the town stands, and which projects to the eastward, there is a rocky ledge, extend-

ing upwards of a quarter of a mile farther in the same direction, and protecting to the southward the bay formed by the main coast opposite. The bay or harbour is further protected by two small banks, one a quarter and the other three-quarters of a mile to the eastward of the rocky ledge." The general depth of the anchorage is three and four fathoms, and formerly on the east side there was sufficient for a 74-gun ship; but the depth of water is considered to have decreased latterly. The channel between the island of Diu and the mainland is navigable only for fishing-boats and other small craft, the western entrance, which is defended by a fort, having four or five feet of water on the bar when lowest. The water is brackish, except that preserved from the rainy season. Vegetables and other provisions are plentiful, being brought from the mainland, the soil of the island itself being little productive. The town is well fortified, being surrounded by a wall strengthened with towers at regular intervals. Notwithstanding the excellence of the harbour for ships of moderate draught, there is but little traffic. Under orders from the Portuguese government in Europe, the trade in slaves formerly carried on in this island has been discontinued. Diu Head, two miles to the westward of the west end of Diu island, has on its east side a small harbour, where vessels might lie sheltered from the westerly winds in from two to three and a half fathoms. It lies in lat. 20° 42', long. 70° 52'. The town of Diu is distant from Ahmedabad, S.W., 192 miles; Baroda, S.W., 182; Bombay, N.W., 170. Lat. 20° 42', long. 71°.

DIVY POINT.—A low headland on the coast of the British district of Masulipatam, presidency of Madras. Around the point, and between it and the cape known as Divy False Point, several branches of the river Kistna fall into the sea. "The rise and fall of the tide is seldom more than four or five feet in the springs at the mouths of the rivers; but it sometimes happens, when a severe gale of wind blows from the sea, that the low land contiguous to it is inundated, causing great destruction of property and lives." Divy Point is 19 miles N.E. of the mouths of the Kistna, and 13 S. of Masulipatam. Lat. 15° 59', long. 81° 14'.

DIWARNUGGUR.—A town in the British district of Silhet, lieut.-gov. of Bengal, 33 miles W. of Silhet. Lat. 24° 59', long. 91° 20'.

DOA.—A village in Arracan, on the Aeng route, a little to the east of the Yomadoung Mountains. Lat. 20° 10', long. 94° 17'.

DOAREE, in the British district of Gurhwal, lieut.-gov. of the N.W. Provinces, a town on the route from Rampoor to Sireenugur, 37 miles S. of the latter. Lat. 29° 41', long. 78° 59'.

DOBBILI, or **BORYLEE.**—A town in the

British district of Vizagapatam, 62 miles N. from Vizagapatam, and 41 miles N.W. from Chicacole. In 1758 the fort was stormed by a force under the French commander Mons. Bussey. When all hope of maintaining it against the assailants had been abandoned by the garrison, the chiefs put to death their wives and children, and the massacre being performed, "those who accomplished it returned like men agitated by the furies to die themselves on the walls." Lat. $18^{\circ} 34'$, long. $83^{\circ} 26'$.

DOBUR HAUT.—A town in the British district of Seebpoor, in Upper Assam, 10 miles S. of Seebpoor. Lat. $26^{\circ} 52'$, long. $94^{\circ} 37'$.

DOBOORJEE, in the Baree Doab division of the Punjab, a town situated on the right bank of the Ghara river, 50 miles S. of the town of Lahore. Lat. $30^{\circ} 53'$, long. $74^{\circ} 20'$.

DODA, in the territory of Gwalior, or possessions of Scindia's family, a town on the route from Neemuch to Baitool, 51 miles S.E. of former, 261 N.W. of latter. It is supplied with water from wells, and has a small bazaar with market. Elevation above the sea 1,482 feet. Lat. $23^{\circ} 46'$, long. $75^{\circ} 10'$.

DODA.—A town in the Punjab, amidst the mountains south of Cashmere, situate on the right or north bank of the Chenaub, nearly opposite its confluence with the river of Budra-war. The Chenaub, here sixty yards broad, is crossed by a *jhoola* or bridge, formed by a cable stretched from bank to bank, and traversed by a suspended seat, drawn backwards and forwards by means of a rope. Doda is a neat, well-built town, with a good bazar, and a square fort having a tower at each angle. Lat. $33^{\circ} 12'$, long. $75^{\circ} 18'$.

DODABALLA, or **DODA BALAPORE**.—A town in Mysore, the name signifying "Balapore the Great," to distinguish between it and Chika Balapoor, or Balapore the Less, which is situate fourteen miles north-east of this place. Dodaballa has a mud fort of great size and strength, but within, nothing is found but ruins and rubbish. The place has some trade, but it is only for the supply of domestic wants. The traders have neither enterprise nor capital. Distant from Bangalore, N., 25 miles. Lat. $13^{\circ} 14'$, long. $77^{\circ} 24'$.

DODAREE, or **DODDERI**, in Mysore, a town about eight miles W. of the right bank of the river Vedavutty. Near this place, in 1698, the Mahrattas, commanded by Suntajee, surrounded, defeated, and destroyed a force commanded by Kasim Khan, whom Aurungzebe had appointed governor of the Carnatic. Distant from Chittel Droog, E., 22 miles; Bangalore, N.W., 110; Seringapatam, N., 180. Lat. $14^{\circ} 18'$, long. $76^{\circ} 46'$.

DODHUR.—See DODA.

DODOOKEE.—A town in the British province of Nagpoor, 118 miles S.E. from Nagpoor, and 76 miles E. from Chanda. Lat. $20^{\circ} 5'$, long. $80^{\circ} 33'$.

DOESAH.—A town in the British district of Chota Nagpoor, lieut.-gov. of Bengal, 100 miles S. of Shergotty. Lat. $23^{\circ} 7'$, long. $84^{\circ} 51'$.

DOGHINE, a small river of the Amherst district of the Tenasserim provinces, rises in lat. $16^{\circ} 58'$, long. $98^{\circ} 33'$, and flowing west for forty miles, falls into the Gyein river, in lat. $16^{\circ} 55'$, long. $98^{\circ} 6'$.

DOHRA, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route by Nanak Math, from the town of Pilleebheet to Almora cantonment, 25 miles N. of the former. Lat. $28^{\circ} 57'$, long. $79^{\circ} 49'$.

DOHUD, in the territory of Gwalior, or possessions of Scindia's family, a town on the common boundary of Malwa and Guzerat, W. of the former, E. of the latter, on the route from Mow to Deesa, 118 miles N.W. of former, 208 S.E. of latter. It is a place of considerable traffic and importance, the road being the channel of considerable and lucrative commerce between Malwa and Upper Hindostan on the one side, and Guzerat on the other. It commands the principal pass on the north-east of Guzerat by means of its fort, situate at the east extremity of the town. This building, formerly a great caravanserai, said to have been built by Aurungzebe, is of a square ground-plan, measuring each way 450 feet, and has two strong gates, one on the north, the other on the south, and in the interior contains two wells and a mosque, and some other structures of fine workmanship and durable materials. Distant W. of Oojein 100 miles, N.E. of Baroda 77. Lat. $22^{\circ} 50'$, long. $74^{\circ} 15'$.

DOLANUH, in the British district of Meerut, lieut.-gov. of the N.W. Provinces, a town on the southern frontier, towards the British district of Bolundshuhur, 23 miles E. of Delhi. Lat. $28^{\circ} 38'$, long. $77^{\circ} 43'$.

DOLEH, in the Rajpoot state of Joudpore, a group of three villages on the route from Balotra to the city of Joudpore, and 33 miles N.E. of the former. It is important as containing three wells, supplying the only good water obtainable throughout a considerable tract. Lat. $26^{\circ} 4'$, long. $72^{\circ} 52'$.

DOLEHKUN.—A town in the British district of Tannah, presidency of Bombay, 59 miles N.E. of Bombay. Lat. $19^{\circ} 29'$, long. $73^{\circ} 36'$.

DOLLA.—A town in the British district of Sudiya, in Upper Assam, six miles from the left bank of the Brahmapootra, and 12 S.W. of Sudiya. Lat. $27^{\circ} 42'$, long. $95^{\circ} 36'$.

DOMEL, one of the principal islands of the cluster known as the Mergui Archipelago: it is twenty-six miles in length from north to south, and five miles in breadth; its centre is about lat. $11^{\circ} 40'$, long. $98^{\circ} 20'$.

DOMEPARRA.—A town in the British district of Pooree, lieut.-gov. of Bengal, 44 miles N. of Juggernaut. Lat. $20^{\circ} 23'$, long. $85^{\circ} 40'$.

DOMRAH.—See DHUMRAH.

DOMRI, in the British district of Furrockabad, lieutenant-gov. of the N.W. Provinces, a town two miles to the left or west of the route from Futtehghurh to Khasgunj, and 44 miles W. of the former. Lat. $27^{\circ} 32'$, long. 79° .

DOMUS, in the British district of Surat, presidency of Bombay, a town situated on the headland bounding the estuary of the river Tptee on the south-east. Distance from the city of Surat, S.W., eight miles; Bombay, N., 150. Lat. $21^{\circ} 4'$, long. $72^{\circ} 48'$.

DONABUE. — A town in the recently-acquired British district of Pegu, situated on one of the main streams by which the Irawaddy flows into the sea: it is 65 miles N.W. from Rangoon, 54 miles N.E. from Bassein. The place has attained a degree of celebrity in the annals of Burmese warfare, as well from its successful resistance of Brigadier Cotton's attack in 1825, as from its contiguity to the scene of a more recent disaster which befell the British. Here, on the 4th February, 1853, a detachment of sepoys, accompanied by a party of seamen and marines under the command of Captain Granville Loch, of the Royal Navy, suffered a repulse in a struggle with a Burmese force, and lost some of its bravest officers, including its distinguished commander. Lat. $17^{\circ} 10'$, long. $95^{\circ} 27'$.

DONGERPOOR, in the jaghire of Rampoor, lieutenant-gov. of Agra, a town on the north-eastern route from the city of Rampoor to Nugina, and $1\frac{1}{2}$ mile N. of the former. Lat. $28^{\circ} 49'$, long. $79^{\circ} 5'$.

DONGUR MULARNEE.—A town in the Rajpoot state of Jeypoor, 66 miles S.E. from Jeypoor, and 98 miles W. from Gwalior. Lat. $26^{\circ} 16'$, long. $76^{\circ} 41'$.

DONGURPOOR, or DOONGERPORE.—A petty native state in the province of Rajpootana, under the political superintendence of the Governor-General. It is bounded on the north and east by Mewar or Oodeypore; on the south-east by Banswarra; and on the south and south-west by the Myhee Caunta district of the province of Guzerat. Its length from east to west is forty miles, its breadth from north to south thirty-five, and it contains an area of about one thousand square miles. It is situated between lat. $23^{\circ} 35'$ — $24^{\circ} 3'$, long. $73^{\circ} 40'$ — $74^{\circ} 18'$. Its chief is descended from a branch of the Oodeypore family, whose ancestors became, at an early period, dependent on the emperor of Delhi, and so continued until subjugated by the Mahrattas, from whose oppressive yoke the prince and his territory were rescued by the British. The treaty by which the British connection was established, was concluded in 1818; and the terms and conditions are substantially the same with those of the treaty concluded about the same time with the chief of Banswarra, and which are described in the article upon that state. The population of Dongurpoor, estimated at 100

to the square mile, amounts to 100,000. The revenue is stated at 109,000 rupees, or 10,900*l.* per annum. Under the treaty above referred to, the British government is entitled to tribute not exceeding in any case three-eighths of the actual revenue. The armed force of the state is represented to consist of 125 cavalry and 200 infantry, with a police establishment of 100 men; making a total of 425. The tributary chiefs holding lands on military tenure are only eight in number. Dongurpoor since its connection with the British government has not been free from those disturbances which seem inseparable from the condition of an Indian state. In 1827, the Rawul consented to divest himself of the exercise of the government, and to surrender it to his adopted son Dulpot Singh; but the latter was reclaimed by his grandfather, the rajah of Pertanbghur, being his only surviving descendant, and on whose death he was allowed to succeed to the raj of Pertanbghur, still remaining regent of Dongurpoor. On the death of the rawul of the last-named state, however, the question arose whether Dulpot Singh should succeed to the dignity by virtue of the adoption. It appeared that the thakoors or nobles of Dongurpoor were greatly averse to the union of the two principalities, and it was therefore agreed that Dulpot Singh should adopt a son from among the kindred of the late rawul, who should be placed on the Dongurpoor guddee, Dulpot Singh continuing regent during the minority. It seems, however, to have been thought, that in a legal point of view, the reclamation of Dulpot Singh by his own family did not annul the rights which had accrued to him by adoption; but for the sake of preserving the peace of the country, he consented to compromise his claim in the manner above described.

DONGURPOOR, in Rajpootana, a town, the residence of the rawul of the petty state of the same name, lies on the route from Neemuch to Deesa, and is 139 miles S.W. of the former, and 121 S.E. of the latter. It is of considerable size, and fortified. Distant direct from Mhow, N.W., 150 miles; from Bombay, N., 345. Lat. $23^{\circ} 50'$, long. $73^{\circ} 50'$.

DONGURTHAL, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Seoni to Nagpoor, 36 miles N.E. of the latter. Lat. $21^{\circ} 39'$, long. $79^{\circ} 22'$.

DON MANICK ISLANDS, situated near the mouths of the Megna, in lat. $21^{\circ} 55'$, long. $90^{\circ} 43'$, and 50 miles S.E. of Backergunge.

DOOAB (THE).—See NORTH-WESTERN PROVINCES.

DOOAB CANAL.—See JUMNA RIVER.

DOOBAH, a small river of Sind, rises in the southern part of the Keertar Mountains, about lat. $25^{\circ} 54'$, long. $67^{\circ} 45'$. After a course which may be estimated at forty-five miles, generally in a south-easterly direction,

it forms a junction with the Damajee river, coming from the south-west; and below the confluence the name is changed for that of Dhurwal. In the commencement of its course, it bears the name of the Pokrun river, and lower down, that of the Kajoor. It is dry for the greater part of the year, but water may always be obtained by digging in its bed.

DOOBAR, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Rewah to Mirzapoor, 17 miles S.W. of the latter. Lat. $24^{\circ} 59'$, long. $82^{\circ} 28'$.

DOOBDI.—A town in the native state of Sikhim, 24 miles N. from Dargeeling. Lat. $27^{\circ} 23'$, long. $88^{\circ} 20'$.

DOOBKEE, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawah to that of Cawnpore, and 41 miles W. of the latter. Lat. $26^{\circ} 21'$, long. $79^{\circ} 50'$.

DOOBLANA, or **DUBLANA**, in the territory of Boondee, in Rajpootana, a town on the route from Delhi to Mhow, 272 miles S.W. of former, 235 N. of latter. It has a bazar, and water is abundant. Here, in 1744, was fought an obstinately-contested battle between Omeda, the exiled raja of Boondee, and the troops of Jeypore, who had seized his capital, in which conflict the raja was utterly defeated. Distant from the city of Boondee, N., nine miles. Lat. $25^{\circ} 35'$, long. $75^{\circ} 44'$.

DOOBLING.—A town of Bussahir, in the division of Koonawur, on the left bank of the Sutluj, and 96 miles N.E. from Simla. Lat. $31^{\circ} 44'$, long. $78^{\circ} 40'$.

DOOBOWLEEA, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a town five miles from the left bank of the Gogra river, 53 miles W. of Goruckpoor. Lat. $26^{\circ} 40'$, long. $82^{\circ} 33'$.

DOOBTA.—See **DABUTA**.

DOOBULHATTEE.—A town in the British district of Rajeshaye, lieutenant-gov. of Bengal, 30 miles N.E. of Rampoor. Lat. $24^{\circ} 45'$, long. $88^{\circ} 58'$.

DOODEE, in Sirhind, a village on the route from Hansee to Lodiana, and 57 miles N. of the former town. It is situate in a level, low country, liable to be rendered swampy by the inundation of the river Gagur. When this occurs, the road, though generally good, becomes difficult. Distant N.W. from Calcutta 1,033 miles. Lat. $29^{\circ} 53'$, long. $76^{\circ} 1'$.

DOODEE GHAT.—A village in the Punjab, situate on the right bank of the river Chenaub, and five miles N.W. of Mooltan, from which there is a good road. It is mentioned by Elphinstone under the name of Oodoo-ka-Gote. Here is a much-frequented ferry, by which the great route lies from Mooltan to Deia Ghazee Khan. Lat. $30^{\circ} 15'$, long. $71^{\circ} 22'$.

DOODGAON.—A town in the native state of Sanglee, one of the Southern Mahratta jaghires, 62 miles S.E. from Sattara, and 18 miles N.E. from Kolapoor. Lat. $16^{\circ} 52'$, long. $74^{\circ} 30'$.

DOODGAUM.—A town in Hyderabad, or dominions of the Nizam, 136 miles N.E. from Jauina, and 67 miles S.E. from Elichpoor. Lat. $20^{\circ} 17'$, long. $77^{\circ} 58'$.

DOODHILI, in the Dehra Doon, on the frontier of Gurhwal, is a summit of the mountains rising above the valley on the north. It is surmounted by a small fort, now in ruins, which was a station of the lesser series of triangles in the trigonometrical survey of the Himalaya. Elevation above the sea 7,254 feet. Lat. $30^{\circ} 28'$, long. $78^{\circ} 2'$.

DOODHOO, in the Rajpoot state of Jeypore, a town on the route from Agra to Ajmer, 186 miles E. of former, 42 W. of latter. It is of considerable size, containing 700 houses, with more than 100 bunyas (shops), and is surrounded by a mud wall, with a thin fausse-braye or renee, its ditch being cut out of a hard kunkur soil, of which the ramparts are also constructed. Lat. $26^{\circ} 40'$, long. $75^{\circ} 18'$.

DOODNA.—A river flowing in a south-easterly direction through the territories of Hyderabad, or territory of the Nizam: it rises in lat. $20^{\circ} 2'$, long. $77^{\circ} 5'$, and falls into the Poorna river, a considerable branch of the Godavery, in lat. $19^{\circ} 16'$, long. $76^{\circ} 58'$, after a course of about 120 miles.

DOODDOO, in Bussahir, a village on the route from Mussourée to the Gunas Pass, and five miles N.W. of the former place. It is of inconsiderable size, but before the establishment of the British power was of some importance as the residence of a freebooter, who affected independence, and laid the surrounding country under contribution. Elevation above the sea 8,790 feet. Lat. $31^{\circ} 11'$, long. $78^{\circ} 8'$.

DOODPATLEE, or **DOODPUTLEE**, in Eastern India, a village of Cachar, and the site of a large cantonment of the Burmese during the war of 1825. The post was strongly fortified, consisting of seven stockades of a most formidable nature, which were destroyed upon the occupation of the place by the British. Lat. $25^{\circ} 3'$, long. $92^{\circ} 42'$.

DOODYALEE.—A town in the Rajpoot state of Joudpore, on the left bank of the Sookree river, and 69 miles S. from the town of Joudpore. Lat. $25^{\circ} 20'$, long. 73° .

DOOGAREE, in the territory of Boondee, in Rajpootana, a town on the route from Delhi to Mhow, 210 miles S.W. of former, 297 N. of latter. It has a bazar, and water is abundant. It is nearly surrounded by hills, and has to the westward a jhil or small lake. On the eastern margin of the lake, and adjoining the village, is an old residence of the raja of Boondee, on a considerable eminence; and on the extremity

of a tongue of land projecting into the jhil is a temple, consecrated to Mahadeo. Distance from Boondoe, N.E., 19 miles. Lat. $25^{\circ} 40'$, long. $75^{\circ} 52'$.

DOOJANO, in the Rajpoot state of Joudpore, a village on the route from Nusseerabad to Deesa, and 147 miles S.W. of the former. Lat. $25^{\circ} 17'$, long. $73^{\circ} 14'$.

DOOJANUH, in the jaghire of Jughur, a town on the route from Kurnaul to Rewaree, and 73 miles S. of the former. It is the residence of a jaghiredar or grantee of a small territory from the East-India Company. The jaghire was, in 1811, granted to Ubdus Summud Khan, in exchange for a part of Hurreana, which he had received in 1806 as a reward for his services against the Mahrattas. The small district of Bohoo Nahur Jul, also granted in 1806, has been united with Doojanuh, and these at present form the jaghire of the grandson of Ubdus Summud Khan. The area of the jaghire is about seventy-one square miles; the population is estimated at upwards of 6,000. A small force, consisting of 50 cavalry and 150 infantry, is maintained by the jaghiredar. The town of Doojanuh is situate in lat. $28^{\circ} 40'$, long. $76^{\circ} 40'$. The centre of the small district granted in 1806 is in lat. $28^{\circ} 25'$, long. $76^{\circ} 27'$.

DOOKOO.—A town in the territory inhabited by the Bor tribes, six miles N.E. from the river Dihona, and 40 miles N.W. from Sudiya, in Assam. Lat. $28^{\circ} 14'$, long. $95^{\circ} 16'$.

DOOKYN.—A village situate on the right bank of the Kuladyne river, in Arracan. Lat. $20^{\circ} 48'$, long. $83^{\circ} 4'$.

DOOLABAREE, in the British district of Rajshahye, lieutenant-gov. of Bengal, a town on the river Attree. Distance from Baulea, N., 25 miles; from Berhampore, by Baulea, 55; from Calcutta, by Berhampore, 180. Lat. $24^{\circ} 42'$, long. $88^{\circ} 42'$.

DOOLALGUNJE.—A town in the British district of Purneah, lieutenant-gov. of Bengal, 17 miles N.E. of Purneah. Lat. $25^{\circ} 53'$, long. $87^{\circ} 48'$.

DOOLAPOOR, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Mynpooree, and 17 miles N.W. of the latter. Lat. $27^{\circ} 22'$, long. $78^{\circ} 55'$.

DOOLA SERA, in the British district of Boolundshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Delhi, and 43 miles N.W. of the former. Lat. $28^{\circ} 24'$, long. $77^{\circ} 48'$.

DOOLEE.—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 41 miles N.E. of Dinapor. Lat. $25^{\circ} 59'$, long. $85^{\circ} 38'$.

DOOLKOTE.—A village in the British district of Delhi, lieutenant-gov. of the N.W. Provinces, on the route from Delhi to Rewaree,

and 22 miles S.W. of the former. Lat. $28^{\circ} 26'$, long. $77^{\circ} 1'$.

DOOLOO.—See BUSSUNDAR.

DOOLOORTA, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Hoosungabad to Nurnulla, 11 miles S.W. of the former. Lat. $22^{\circ} 37'$, long. $77^{\circ} 40'$.

DOOLUBA, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Goruckpoor to the Nepal territory, 46 miles N.W. of the former. Lat. $27^{\circ} 20'$, long. $83^{\circ} 15'$.

DOOMAH, in the British district of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Nurnulla to Baitool, 52 miles S.W. of the latter. Lat. $21^{\circ} 30'$, long. $77^{\circ} 39'$.

DOO MAHAN.—A town in the native state of Nepal, 44 miles S.E. from Khatmandoo, and 76 miles N.E. from Bettia. Lat. $27^{\circ} 11'$, long. $85^{\circ} 42'$.

DOOMALUNG.—A town in the native state of Bhutan, 110 miles E. from Dargeeling, and seven miles from the left bank of the river Bagnee. Lat. $26^{\circ} 52'$, long. $90^{\circ} 3'$.

DOOMKOT, in the British district of Gurhwal, lieutenant-gov. of the N.W. Provinces, a town on the route from Bijnour to Sireenugur, 13 miles S. of the latter. Lat. $30^{\circ} 4'$, long. $78^{\circ} 50'$.

DOOMUREEAHGUNJ, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a small town 52 miles N.W. of the cantonment of Goruckpoor. Buchanan describes it at the time of his survey, forty years ago, as containing 175 huts, very poor, but forming a straight wide street. Distant N. from Allahabad and Benares 135 miles. Lat. $27^{\circ} 10'$, long. $82^{\circ} 43'$.

DOONA GIREE, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a town on the route from Almora to Sireenugur, 19 miles N.W. of the former. Lat. $29^{\circ} 48'$, long. $79^{\circ} 30'$.

DOONARA.—A town in the native state of Joudpore, on the left bank of the Loonee river, and 33 miles S.W. from Joudpore. Lat. $25^{\circ} 55'$, long. $72^{\circ} 52'$.

DOONDA.—A town in Hyderabad, or dominions of the Nizam, situate four miles from the right bank of the Payne Gungah river, and 170 N.W. from Hyderabad. Lat. $19^{\circ} 50'$, long. $78^{\circ} 15'$.

DOONDEE, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a considerable village on the route by Nanakmath to Ruderpoor, from the town of Pilibheet, 28 miles N.W. of the latter. It is situate two miles E. of the left bank of the river Sockhee. Lat. $28^{\circ} 58'$, long. $79^{\circ} 43'$.

DOONDIA KHER.—See DAUNDIAKHERA.

DOONEE, in the territory of Jeypoor, in Rajpootana, a populous town, though of moderate size. It is surrounded by a mud wall, and though not provided with cannon, was in 1809 so resolutely defended as to baffle all the ill-directed efforts of Doulut Rao Scindia to take it. Distant from Jeypoor S. 70 miles. Lat. $25^{\circ} 53'$, long. $75^{\circ} 47'$.

DOONGA, or **TUPI DOONGA**, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a halting-place on the route by the Unta Dhura Pass, from Almora fort to Hiundes or South-western Tibet, 144 miles N.E. of Almora. It is a singularly desolate place, about four miles S. of the crest of the pass, and eight miles S. of the Chinese frontier. The elevation above the sea, according to Barron's estimate, from the boiling-water point, is 15,450 feet. Lat. $30^{\circ} 32'$, long. $80^{\circ} 17'$.

DOONGERPORE.—See **DONGURPOOR**.

DOONGRA, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a village with a small Hindu temple, a mile from the left bank of the Lohoghat river, and two from its confluence with the Kalee (Eastern). Lat. $29^{\circ} 20'$, long. $80^{\circ} 19'$.

DOOPUND.—A town in the British district of Cuddapah, presidency of Madras, 120 miles W. of Masulipatam. Lat. $15^{\circ} 56'$, long. $79^{\circ} 26'$.

DOORAMOW.—A town in the territory of Oude, 60 miles S.E. from Lucknow, and 55 miles N.E. from Futtehpoor. Lat. $26^{\circ} 17'$, long. $81^{\circ} 41'$.

DOOREHA.—A town in the native state of Punnah, in Bundelcund, 26 miles S.E. from Punnah, and 96 miles N.E. from Jubbulpoor. Lat. $24^{\circ} 27'$, long. $80^{\circ} 33'$.

DOORGADAS, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from Allahabad to Etawah, and 72 miles S.E. of the latter. Lat. $26^{\circ} 11'$, long. $79^{\circ} 57'$.

DOORGEENUGRA, in the jaghire of Rampoor, lieut.-gov. of the N.W. Provinces, a village on the route from Bareilly to Moradabad, and 38 miles N.W. of the former. Lat. $28^{\circ} 44'$, long. $79^{\circ} 8'$.

DOORHATTA.—A town in the British district of Hoogly, lieut.-gov. of Bengal, 32 miles N.W. of Calcutta. Lat. $22^{\circ} 54'$, long. $88^{\circ} 5'$.

DOORUNDA, in the British district of Chota Nagpoor, lieut.-gov. of Bengal, a cantonment on the route from Hazareebagh to Sumbulpoor, 60 miles S. of former, 170 N. of latter. At the cantonment is stationed the principal part of the Ramgurrh light infantry and four guns, and two squadrons of local horse. A mile and a half north of the cantonment is the civil station of Kishenpoor, where is the Sudder or head establishment of the Governor-General's agent for the South-West

Provinces. Doorunda is in lat. $23^{\circ} 24'$, long. $85^{\circ} 20'$.

DOORWAI, or **DHOORWYE**, in Bundelcund, a small town, the principal place of the jaghire of the same name, which contains an area of eighteen square miles, eight villages, and a population of 3,000 souls. Its chief has an annual revenue of 15,000 rupees, and maintains a small military force of eight horse and 230 foot. The jaghire is held from the East-India Company by sunnud or grant, dated in 1823. This raj was formerly tributary to Jhansi; but in 1821 the jaghiredars were induced to relinquish their claim to certain villages which had been resumed by Jhanai, in lieu of the annual tribute, which was calculated at 3,500 rupees per annum. Doorwai is 63 miles S.W. of Calpee. Lat. $25^{\circ} 28'$, long. $79^{\circ} 7'$.

DOOSTPOOR, in the territory of Oude, a town on the route from the cantonment of Goruckpoor to that of Sultanpoor, 84 miles W. of the former, 26 E. of the latter. Lat. $26^{\circ} 18'$, long. $82^{\circ} 30'$.

DOOVAH.—A town in the British district of Masulipatam, presidency of Madras, 54 miles N.E. of Masulipatam. Lat. $16^{\circ} 47'$, long. $81^{\circ} 41'$.

DOR, a small river of the Punjab, rises in lat. $34^{\circ} 27'$, long. $73^{\circ} 7'$, in the mountains west of Mazufurabad, which divide the valley of the Indus from that of the Jhelum. It holds a westerly course of about fifty miles, and, uniting with the Sirrun, falls into the Indus on the eastern side, near Torbela, in lat. $34^{\circ} 8'$, long. $72^{\circ} 50'$.

DORAH.—A town in the native state of Bhopal, 18 miles N.W. from Bhopal, and 111 miles S.W. from Saugor. Lat. $23^{\circ} 21'$, long. $77^{\circ} 10'$.

DORAVEED.—A town in Hyderabad, or dominions of the Nizam, 50 miles W. from Hyderabad, and 37 miles E. from Mulkaïr. Lat. $17^{\circ} 18'$, long. $77^{\circ} 50'$.

DORENALL.—A town in the British district of Cuddapah, presidency of Madras, 139 miles W. of Masulipatam. Lat. $15^{\circ} 55'$, long. $79^{\circ} 10'$.

DOTUNUH.—See **DEOTHAN**.

DOUBLE ISLAND.—Situated off the coast of the Tenasserim provinces, 14 miles S. of Moulmein. Lat. $15^{\circ} 52'$, long. $97^{\circ} 40'$.

DOUDCANDEE.—A town in the British district of Tipperah, lieut.-gov. of Bengal, 22 miles S.E. of Dacca. Lat. $23^{\circ} 31'$, long. $90^{\circ} 41'$.

DOUDPOOR.—A town in the British district of Beerboom, lieut.-gov. of Bengal, 20 miles S. of Moorshedabad. Lat. $23^{\circ} 54'$, long. $88^{\circ} 15'$.

DOUJA, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route, by Rajapoor ferry, from the canton-

ment of Allahabad to Banda, and 20 miles W. of the former. Lat. $25^{\circ} 23'$, long. $81^{\circ} 35'$.

DOULANG.—A town in the British district Amherst, in the province of Tenasserim, presidency of Bengal, 38 miles N.E. of Moulmein. Lat. $16^{\circ} 42'$, long. $98^{\circ} 14'$.

DOULEE.—A river rising in a spring on the southern face of the Niti Ghaut, in lat. $30^{\circ} 57'$, long. $79^{\circ} 54'$, leading from the British district of Kumaon to Tibet. The crest of the ghaut, from which the water flows southward, is 16,814 feet above the sea, yet was there no appearance of snow on it in the middle of August, nor even in the middle of October, though the cold was then found very severe. Passing by the village of Niti, it holds a course generally south for nineteen miles, as far as Mularce, in lat. $30^{\circ} 42'$, long. $79^{\circ} 55'$, 10,290 feet above the sea. As it is principally fed by rills running down the sides of the mountains inclosing the valley or vast gorge down which it flows, those supplies are suspended by congelation during the night, and released by the heat of the sun during the day, so that the river is invariably much fuller towards evening than in the morning. From Mularce the Doulee flows south west about twenty miles to Tupookun, in lat. $30^{\circ} 29'$, long. $79^{\circ} 42'$, and 6,182 feet above the sea. At Tupookun the river turns north west for eight miles, to its confluence with the Vishnoo at Vishnooprag, in lat. $29^{\circ} 33'$, long. $79^{\circ} 38'$, and 4,743 feet above the sea. The united stream of the Doulee and Vishnoo is named the Aluknunda downwards from the confluence; and the origin of the Doulee in the Niti Ghat is the remotest source of the Ganges, except that of the Jhnuvi.

DOULEE (river of Kumaon).— See **DOUL.**

DOULUTPOOK, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Calpee to Pertabgarh, and three miles N. of the former. Water is abundant here. Lat. $26^{\circ} 9'$, long. $75^{\circ} 49'$.

DOULUTPOOR, in the British district of Saharunpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from Saharunpoor to Huridwar, and 27 miles E. of the former town. There is a bazar here, and an abundant supply of water. Distant N.W. from Calcutta 938 miles. Lat. $30^{\circ} 6'$, long. $77^{\circ} 57'$.

DOULUTPOOR.—A village in Sindh, situate near the left bank of the Indus. It forms part of the district of Bhoonj Bhara, and was comprised in the transfer of territory made by the British in 1843, from the ameer of Khyrpoor to Mahomed Bhawl Khan, in reward of his steady friendship. Lat. $28^{\circ} 19'$, long. $69^{\circ} 45'$.

DOUNDEEKEIRA.—A town in the territory of Oude, on the left bank of the Ganges, and 50 miles S.W. from Lucknow. Lat. $26^{\circ} 11'$, long. $80^{\circ} 45'$.

DOUR VALLEY, situated in Bunnoo

Murwut, of the Daman division of the Punjab, is 80 miles W. of Kala Bagh, and 102 S.W. from Kohat. Lat. $32^{\circ} 55'$, long. $70^{\circ} 10'$.

DOURAHASERIE, in Sirhind, a village on the route from Kurnaul to Loodiana, and 14 miles S.W. of the latter. It consists of a few hovels, scattered at the base of a slight eminence, surmounted by a caravanserai; but the remains of temples and tombs prove it to have been formerly more considerable. There is a small bazaar, and water is abundant. The road in this part of the route is good. Distant N.W. from Calcutta 1,075 miles. Lat. $30^{\circ} 48'$, long. $76^{\circ} 8'$.

DOURALA, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Meerut to that of Saharunpoor, and eight miles N. of the former place. Distant N.W. from Calcutta 938 miles. Lat. $29^{\circ} 7'$, long. $77^{\circ} 46'$.

DOWDAUND.—A town in the British district of Bhagulpore, lieutenant-gov. of Bengal, 44 miles S.W. of Rajmahal. Lat. $24^{\circ} 39'$, long. $87^{\circ} 17'$.

DOWLASERUM.—A town in the British district of Rajahmundry, presidency of Madras, four miles S. of Rajahmundry. Lat. $16^{\circ} 57'$, long. $81^{\circ} 50'$.

DOWLPOOREE.—See **DHOLPUR.**

DOWLUTABAD, in Hyderabad, or the territory of the Nizam, a town with a celebrated fortress, near the north-west frontier. The fortifications of the town or pettah, which, however, are utterly contemptible, communicate on the east side with those of the stupendous fortress. This stronghold consists of a conical hill, or rather vast rock of granite, scarped all round to a complete perpendicular, for a height of about 150 feet from the base. The summit of this conical rock is a small platform not many feet in width, on which is mounted a brass twenty-four pounder; and there is also a staff, on which flies the flag of the Nizam. The upper and conical part of the hill is not accessible by any stairs or passage externally visible, but at the base of the scarp an opening gives admission into a low narrow passage, hewn in the solid stone, and leading to a large vault, excavated in the interior of the hill. From this chamber, a ramp, or gallery, gradually sloping upwards, and also excavated in the solid rock, winds round in the interior. This ramp, or ascending gallery, which has a height and breadth of about twelve feet, terminates above in a recess on the top of the rock, about twenty feet square. At the base of the hill, throughout its whole circuit, is a ditch, passable throughout its whole extent only by one causeway, constructed of stone, so narrow as to admit the passage of only two men abreast, and defended on the side towards the rock by a battlemented building. At a short distance outside the ditch is a minaret, apparently 100 feet high, said to be erected in commemoration of the first cap-

ture of this place by the Mahomedans. On the slope of the hill, and about 100 yards from the summit, is a cistern, hewn in the rock, and holding, it is conjectured, about forty hog-heads. The perpendicular height of the hill above the surrounding plain is about 500 feet. It is altogether isolated, being about 3,000 yards from the nearest hills, which are situate to the north and west. The original name of this place was Deoghur; and it received that of Dowlutabad from the Emperor Mohammed, son of Toghluks Shah, who proposed to make it the capital of the imperial state, to the super-session of Delhi, and who sought to force the inhabitants of the latter city to fix their abode in the former. The attempt, however, was abortive. It may be added, that the present state of Dowlutabad does not exhibit any appearance of the prosperity or good fortune indicated by its name. Dowlutabad is distant from Aurungabad, N.W., 10 miles; Hyderabad, N.W., 280; Bombay, N.E., 170. Lat. $19^{\circ} 57'$, long. $75^{\circ} 18'$.

DOWLUTGUNGE.—A town in the British district of Nudda, lieut.-gov. of Bengal, 21 miles E. of Kishnuggur. Lat. $23^{\circ} 25'$, long. $88^{\circ} 50'$.

DOWLUTGURH.—A town in the Rajpoot state of Odeypoor, six miles from the right of the Koree river, and 57 miles S.W. from Nusseerabad. Lat. $25^{\circ} 37'$, long. $74^{\circ} 25'$.

DOWLUTPOOR.—A town in the British district of Hyderabad, in Scinde, presidency of Bombay, 10 miles from the left bank of the Indus, and 78 miles N. of Hyderabad. Lat. $26^{\circ} 29'$, long. $68^{\circ} 5'$.

DOWLUTPOOR.—A town of Malwa, in the native state of Bhopal, 41 miles S.W. from Bhopal, and 55 miles W. from Hoosungabad. Lat. $22^{\circ} 53'$, long. $76^{\circ} 54'$.

DOWNA.—A town in the British district of Nagpoor, 133 miles N.W. from Sumbulpoor, and 21 miles S. from Ruttenpoor. Lat. $21^{\circ} 57'$, long. $82^{\circ} 2'$.

DOWSAH, or DEOSUR, in the Rajpoot state of Jeypore, on the route from Agra to Ajmer, 110 miles W. of former, 118 E. of latter. It is of considerable size, and is built on one side of a rocky hill, having a flat summit, "nearly four miles in circumference, which, besides being difficult of access, is surmounted with a wall pierced with loopholes, and having two large bastions at the bottom, on one side of the rock." It is at present used as a state prison by the government of Jeypore. The town is surrounded by a ruinous wall of stone, and contains one fine old Hindoo temple, several smaller ones, a mosque, and some large and richly-carved houses, but all verging to decay. There are also many handsome tombs. Lat. $26^{\circ} 50'$, long. $76^{\circ} 29'$.

DOYANG.—A river of Eastern India, rising on the frontier of the native state of Munceepoor, in lat. $25^{\circ} 36'$, long. $94^{\circ} 7'$, and, flowing in a northerly direction through the British

territory inhabited by the Naga tribes, falls into the Dhuuseeree river in lat. $26^{\circ} 7'$, long. $93^{\circ} 59'$.

DRAS, or DURAS, in Ladakh, at a short distance north of the northern frontier of Cashmere, is a collection of villages, with a fort, in a valley of the same name, through which lies the route from Le to Cashmere by the Lultul Pass. Through the middle of the valley flows the river Dras, which, rising in the Bultul or Kantul Pass, a little to the south, flows northward to the Indus, which it joins opposite the village of Morol, in lat. $34^{\circ} 44'$, long. $76^{\circ} 20'$. Dras is 9,000 feet above the sea, and in lat. $34^{\circ} 23'$, long. $75^{\circ} 54'$.

DRAUPA, in the peninsula of Kattywar, province of Guzerat, a town situate in the district of Hallar. There are seventeen villages annexed to it, and the total population is estimated at 4,000. An annual tribute of 4,000 rupees is paid to the British government. Distance from Ahmedabad S.W. 170 miles. Lat. 22° , long. $70^{\circ} 13'$.

DROOG.—A town in the British district of Nagpoor, 141 miles E. from Nagpoor, and 22 miles W. from Ryepoor. Lat. $21^{\circ} 11'$, long. $81^{\circ} 20'$.

DROORAJAPATAM, or DOOGOORAU-ZEPATAM, in the British district of Nellore, presidency of Madras, a town on the Coromandel Coast, on the western shore of the northern inlet forming communication between Pulicat Lake and the Bay of Bengal. Southeast of the outward or seaward mouth of the inlet, "is a space from three to four miles wide, now called Blackwood Harbour, with soundings from four and a half fathoms near the shore, to six or seven fathoms contiguous to the edge" of Armegon Shoal, which shelters it in certain directions, while Pundi Point and shoal, and the mainland, protect it on other points; so that ships may lie here in safety; and it is stated by Captain Maxwell, assistant marine surveyor-general, that "it is the only place on the Coromandel Coast which offers the least protection to ships during an easterly gale." "During the north-east monsoon, or stormy season, the sea breaks very high on the shallow ridge of the shoal, rendering the harbour within comparatively smooth." It has recently been determined to connect this town with the city of Madras, by means of an extension of the navigable line of communication through the Pulicat Lake. Distance from Madras, N., 60 miles; Nellore, S., 34. Lat. $13^{\circ} 59'$, long. $80^{\circ} 13'$.

DUB, in the Punjab, a pass over a mountain on the route from Attock to Cashmere, by the Baramula road. While under the dominion of the Sikhs, it was infested by freebooters, who held possession of the fort of Futighur, and spread terror over the whole vicinity. But Hari Singh, an intrepid and energetic Sikh chieftain, attacked them, drove them out of a jungle where they took refuge, by firing it, and put the whole body to the

sword. The Dub Pass is situate on the water-line dividing the feeders of the Kishengunga, and consequently of the Jhelum, on the east side, from those of the Indus on the west. Lat. 34° 17', long. 73° 21'.

DUBAREE.—A town on the right bank of the Brahmapootra, in the British district of Goalpara, lieutenant-gov. of Bengal, 46 miles S.W. of Goalpara. Lat. 26°, long. 89° 56'.

DUBBAR, or **DABHA**, an estuary of the Indus, being one of the numerous outlets by which the Indus reaches the sea. The mouth of the Dubbar is in lat. 24° 21', long. 67° 17'.

DUBBOI.—See **DRUBBOOEE**.

DUBHAE, in the British district of Booldshuhur, lieutenant-gov. of the N.W. Provinces, a town on the route from Buddaon to Delhi, 69 miles S.E. of the latter. Population 7,837 souls. Lat. 28° 13', long. 78° 21'.

DUBKA.—A river rising in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, on the southern declivity of the Gagur or Ghatgarh mountain, in lat. 29° 27', long. 79° 26'. It holds a south-westerly course for twenty miles, as far as the village of Burooa, where, in lat. 29° 20', long. 79° 13', it finally passes from the mountains into the plain; and for this distance the valley down which it flows forms the direct route from Almora to Moradabad. In this part of its course it is fordable at all seasons. From Burooa it takes a nearly southerly direction for about ninety miles, and falls into the Western Ramgunga in lat. 28° 24', long. 79° 17'. Below Burooa, it bears the name of Googha, and still lower down, that of Nahul.

DUBOKA.—A town in the British district of Nowgong, Lower Assam, 73 miles E. of Gowhatty. Lat. 26° 6', long. 92° 53'.

DUBRA, in territory of Gwalior, or possessions of Scindia, a village on the route from the fort of Gwalior to Saugor, 33 miles S. of former, 169 N.W. of latter. There is water from wells and a small stream, and supplies are procurable. Lat. 25° 53', long. 78° 20'.

DUBWALLEE, in the British district of Bhutteana, lieutenant-gov. of the N.W. Provinces, a town on the route from Hansi to the Punjab, 96 miles N.W. of the former. Lat. 29° 57', long. 74° 49'.

DUCHO.—A town in the native state of Nepal, on the left bank of a branch of the Bori Gunduk river, and 32 miles N. from Khatmandoo. Lat. 28° 9', long. 85° 13'.

DUDANA.—A town in the province of Guzerat, or territory of the Cuicowar, situate on the left bank of the Bunnass river, 39 miles S.W. from Deesa. Lat. 23° 49', long. 71° 42'.

DUD COOSY, a river tributary to the Coosy, rises in Nepal, in lat. 27° 59', long. 86° 31', and, flowing in a southerly direction for about fifty miles through Nepal, falls into the Coosy, in lat. 27° 20', long. 86° 30'.

DUDDEE.—A town in the British district

of Belgaum, presidency of Bombay, 16 miles N.W. of the town of Belgaum. Lat. 16° 2', long. 74° 30'.

DUDDIAN WALLA, in the Daman division of the Punjab, a town situated on the left bank of the Khoorum river, 56 miles N. of the town of Dera Ismael Khan. Lat. 32° 35', long. 70° 52'.

DUDDUR.—A town in the British district of Hyderabad, in Sind, presidency of Bombay, 70 miles N.E. of Hyderabad. Lat. 26° 10', long. 69° 8'.

DUDEROO, in the Rajpoot state of Beekaneer, a village on the route from Rutungurh to the town of Beekaneer, 66 miles E. of the latter. It contains 130 houses, and has a supply of excellent water from a well 196 feet deep. Lat. 27° 57', long. 74° 24'.

DUDHOA, in the jaghire of Jhujhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Hansee to Neemuch, and 52 miles S. of the former. Water is good and abundant. Lat. 23° 28', long. 76° 17'.

DUDKUNDA.—A town in the native state of Nepal, on the right bank of a branch of the San Coosy river, and 48 miles N.E. from Khatmandoo. Lat. 27° 54', long. 86° 1'.

DUFFLAPOOR.—A town in the native state of Juth, one of the Sattara jaghires, 87 miles N.E. from Belgaum, and 84 miles S.E. from Sattara. Lat. 17°, long. 75° 8'.

DUG.—A town of the Rajpoot state of Jhallawur, formerly belonging to Holkar, but transferred in 1818, by the treaty of Mundecor, to the ruler of Kotah, upon the partition of whose dominions it was allotted to the division of Jhallawur. Lat. 23° 55', long. 75° 55'.

DUGDUGEE, in the British district of Futtehpoor, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Ganges, 382 miles from Calcutta by the river, 74 miles above Allahabad, 22 miles E. of the town of Futtehpoor by land. Lat. 25° 56', long. 81° 15'.

DUGSHAI, in Sirmoor, a sanatorium for troops, between the rivers Sutlej and Jumna, eight miles S.E. from Sabathu, 16 miles S. from Simla. Lat. 30° 53', long. 77° 7'.

DUHLEE, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a town situate in lat. 27° 2', long. 78° 52'.

DUHLEEA, in the British district of Furrukhabad, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Ramgunga, eight miles N.E. of the city of Furrukhabad. Lat. 27° 26', long. 79° 45'.

DUHRAON, or **DHERAON**, in the British district of Booldshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Allyghur cantonment to that of Delhi, and 33 miles N.W. of the former. Lat. 28° 18', long. 77° 53'.

DUKIA, or **DUKEEA**, in the British district of Moradabad, lieutenant-gov. of the N.W.

Provinces, a village on the route from Moradabad to Almora, and 29 miles N. of the former place. Lat. $29^{\circ} 12'$, long. $79^{\circ} 1'$.

DUKKA JEUNG.—A town in the native state of Bhotan, on the right bank of the Gudada river, and 62 miles N.E. from Darjeeling. Lat. $27^{\circ} 21'$, long. $89^{\circ} 15'$.

DUKTOWLEE.—See DEKTOWILL.

DULASSEREE.—The name assigned to the lower part of its course to the Kumaon, a great watercourse in Bengal.—See KOSAIR.

DULCHIPOOR.—A town in the British native state of Shahgurih, 33 miles S.E. from Tehree, and 34 miles N.E. from Saugur. Lat. $24^{\circ} 14'$, long. $79^{\circ} 3'$.

DULEELUGUNJ.—A town in the territory of Oude, on the left bank of the Ganges, and 91 miles S.E. from Lucknow. Lat. $25^{\circ} 40'$, long. $81^{\circ} 38'$.

DULEEPGUNGE, in the territory of Oude, a village on the route by Shahabad from Lucknow to Shahjehanpoor, 24 miles south of the latter. It has a bazar and abundance of good water. Lat. $27^{\circ} 31'$, long. $80^{\circ} 2'$.

DULEEPGURH, in the Daman division of the Punjab, a fort designed and built by Major Edwardes, and situated on the right bank of the Khoorum, 63 miles N.W. of the town of Dera Ismael Khan. Lat. $32^{\circ} 41'$, long. $70^{\circ} 41'$.

DULEYNUGUR, or **DULAENAGAR,** in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a village on the route from Calpee to the cantonment of Etawah, and 29 miles S.E. of the latter. Lat. $26^{\circ} 31'$, long. $79^{\circ} 26'$.

DULGANO.—A town in the British district of Durrung, Lower Assam, 62 miles W. of Bishnath. Lat. $25^{\circ} 34'$, long. $92^{\circ} 12'$.

DULSAEPOOR, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly, and 38 miles N.E. of the former. Lat. $27^{\circ} 32'$, long. $78^{\circ} 30'$.

DULSING SERAI.—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 51 miles E. of Dinapoor. Lat. $25^{\circ} 38'$, long. $85^{\circ} 55'$.

DUMAJEE.—A village in Sindh, on the route from Sehwan to Kurrachee, and 60 miles N.E. of the latter town. The road near Dumajee is represented as indifferently good, and forage can be obtained to a considerable extent. The supply of water is rather scanty: there are two wells which afford it; but they are liable to fail in the dry season. After rainy weather, a torrent, called the Dumajee river, flows by the village, and falls into the Dhurwal river about twelve miles to the N.E. Dumajee is in lat. $25^{\circ} 21'$, long. $67^{\circ} 50'$.

DUMBA, or **DOOMBEH,** a small river in Sindh, rises in the southern part of the Keerlar range of mountains, about twenty miles north-east of Kurrachee, in lat. $25^{\circ} 4'$, long. $67^{\circ} 16'$, and, after a southerly course estimated

at eighteen miles, falls into the river Mularree, in lat. $24^{\circ} 52'$, long. $67^{\circ} 15'$. About ten miles above its mouth it is crossed by the route from Kurrachee to Sehwan, and is at that point, during the rainy season, a small stream. In the dry season, the channel has no stream, though water may be obtained by digging in the bed. The place where it is crossed by the road, as above mentioned, is called the Dumba Camp. The road there is generally good, and forage may be obtained in considerable quantities.

DUMDUHA, in British district of Purneah, lieutenant-gov. of Bengal, a town 22 miles W. of the town of Purneah. It is situated on the west or right bank of the river Cosy, is the principal place of a pergunna of the same name, and has 1,300 houses. Lat. $25^{\circ} 41'$, long. $87^{\circ} 11'$.

DUMDUM, in the British district called the Twenty-four Pergunnahs, a town, formerly the head-quarters of artillery for the presidency of Bengal. In its vicinity is the cannon-foundry, of which a military writer thus speaks:—"This cannon-foundry is in every respect better contrived than that of Woolwich. It contains a boring-room in which twelve brass guns may be bored at the same time, for the government procures the iron guns from Europe. During the time I was there, six guns were cast; and the arrangements are such, that three times the number might have been manufactured." The church "is a very pretty building, divided into aisles by two rows of Doric pillars, and capable of containing a numerous congregation." Distant from Barrackpore, S.E., 10 miles; Calcutta, N.E., eight miles. Lat. $22^{\circ} 38'$, long. $88^{\circ} 30'$.

DUMDUM.—A valley in Cashmere, with a pass over the mountains which inclose that country to the south. This pass, situated between the mountains Futi Panjal and Pir Panjal, is generally called the Pir Panjal Pass, but sometimes the Nandan Sar Pass. It is 11,800 feet above the sea, and through it lies the route into Cashmere from the Punjab, by Rajawur. The river Rembeera rises about the summit of the pass, and, flowing north-east, falls into the Vehut or Jhelum, which drains the whole of Cashmere. It is called the Huri-pur river by Vigne. Lat. $33^{\circ} 45'$, long. 75° .

DUMDUMA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Ganges, 788 miles N.W. of Calcutta by the river route, 16 S.E. of the city of Allahabad by the same. Lat. $25^{\circ} 19'$, long. $82^{\circ} 9'$.

DUMDUMA, in the British district of Baraset, lieutenant-gov. of Bengal, a village with a police-station, on the Isamutti, an offshoot of the Ganges. Distance from Calcutta, E., 42 miles. Lat. $22^{\circ} 28'$, long. $89^{\circ} 3'$.

DUMDUMMA.—A town in the British district of Dinajepoor, lieutenant-gov. of Bengal, 96 miles E. of Bhagulpore. Lat. $25^{\circ} 18'$, long. $88^{\circ} 31'$.

DUM—DUR.

DUMDUMINEAH.—A town in the British district of Bhagulpur, lieut.-gov. of Bengal, 20 miles S.W. of Rajmahal. Lat. $24^{\circ} 55'$, long. $87^{\circ} 31'$.

DUMJA.—A town in the native state of Nepal, on the left bank of the San Coos river, and 36 miles N.W. from Khatmandoo. Lat. $27^{\circ} 25'$, long. $85^{\circ} 46'$.

DUMKEIRA.—A town in the British province of Nagpoor, late territory of the rajah of Berar, 173 miles E. from Nagpoor, and 94 miles S.E. from Ramgurh. Lat. $21^{\circ} 39'$, long. $81^{\circ} 45'$.

DUMMOW. in the British territory of Saugor and Nerbudda, a town near the common boundary of Malwa and Gondwana, the principal place of a pergunnah of the same name, on the route from Jubbulpur to Saugor, 65 miles N.W. of former, 46 E. of latter. It has a large bazar, and water is abundant from wells. The area of this pergunnah is 1,554,058 acres. The total population at the period of the latest return was 363,584. The Hindoos greatly predominate; the numbers being, agricultural, 282,079; non-agricultural, 69,416; total, 351,495; while those of all other denominations amount only to—agricultural, 3,626; non-agricultural, 8,463; total, 12,089. The town of Dummow is distant from Calcutta, *via* Allahabad, 775 miles. Lat. $23^{\circ} 50'$, long. $79^{\circ} 30'$.

DUMOH.—See **DUMMOW**.

DUMPA.—A town in the native state of Bhotan, 146 miles N.E. from Darjeeling, and 130 miles N. from Goalpara. Lat. 28° , long. $90^{\circ} 27'$.

DUMUL.—A town in the British district of Dharwar, presidency of Bombay, 52 miles S.E. of Dharwar. Lat. $15^{\circ} 18'$, long. $75^{\circ} 50'$.

DUNAHAR. in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to the cantonment of Mynpooree, and nine miles W. of the latter. The road in this part of the route is in many places laid under water during the periodical rains in the latter part of summer; at other times it is tolerably good. The country is level, and partially cultivated. Lat. $27^{\circ} 14'$, long. $78^{\circ} 58'$.

DUNDEFSRUH.—See **DERESURA**.

DUNDOOKA. in the British district of Ahmedabad, presidency of Bombay, a town 62 miles S.W. of the city of Ahmedabad, 100 N.W. of Surat. Lat. $22^{\circ} 20'$, long. $71^{\circ} 56'$.

DUNDORUH.—See **DENDOWRA**.

DUNGAVA.—A town in the British province of Nagpoor, situate on the left bank of the Hutsoo river, and 208 miles S.W. from Sherghotty. Lat. $22^{\circ} 28'$, long. $82^{\circ} 34'$.

DUNGHYE. in the British district of Behar, lieut.-gov. of Bengal, a small town on the route from Hazareebagh to Benares, 43 miles N.W. of former, 146 S.E. of latter. It is situate at the north-west extremity of the pass of the

same name, at the bottom of the descent by which the road passes from the high land of Ramgurh to the plains of Behar. The road down this descent is, according to Jacquemont, execrable, and indicating great want of care and skill in the government engineers who laid it down. The little town itself has a bazar, and is well supplied with water. Elevation above the sea 660 feet. Lat. $24^{\circ} 27'$, long. 85° .

DUNGKOT.—A town in the native state of Nepal, 84 miles N.E. from Khatmandoo, and 137 miles N.W. from Darjeeling. Lat. $28^{\circ} 10'$, long. $86^{\circ} 32'$.

DUNHCRA.—A town in the British province of Nagpoor, late territory of the rajah of Berar, 102 miles S.E. from Nagpoor, and 67 miles N.E. from Chanda. Lat. $20^{\circ} 14'$, long. $80^{\circ} 21'$.

DUNKOUR. in the British district of Bolundshubur, lieut.-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, situate on the route from Muttra to Delhi by the left bank of the Jumna, and 28 miles S.E. of Delhi. Lat. $28^{\circ} 21'$, long. $77^{\circ} 37'$.

DUNTOIA.—A town in the British district of Purneea, lieut.-gov. of Bengal, 45 miles N.E. of Purneea. Lat. $26^{\circ} 9'$, long. $88^{\circ} 6'$.

DUNWAR.—A town in the British district of Shahabad, lieut.-gov. of Bengal, 51 miles S.W. of Dinapore. Lat. $25^{\circ} 9'$, long. $84^{\circ} 28'$.

DUPHA PANEE RIVER. a small stream of the Sudiya district of Upper Assam, rises in lat. $27^{\circ} 38'$, long. $96^{\circ} 50'$, and, flowing in a south-westerly direction for thirty-five miles, falls into the Noh Dihing river near the village of Imjong, in lat. $27^{\circ} 28'$, long. $96^{\circ} 30'$.

DUPHALA.—A tribe inhabiting the country lying between the main range of the Himalaya Mountains and that known as the Sub-Himalaya, and which is situate to the north of the Luckimpoor district of Upper Assam. The centre of the tract is in lat. $27^{\circ} 35'$, long. $93^{\circ} 45'$.

DURA. in the British district of Agra, lieut.-gov. of the N.W. Provinces, a town close to the western frontier towards Bhurtpoor, 19 miles S.W. of the city of Agra. Lat. $27^{\circ} 3'$, long. $77^{\circ} 48'$.

DURABUND. or **DERABUND.** in the tract of territory on the right bank of the Indus, a small town and fort in the Derajat, about 42 miles S.W. of Dera Ismael Khan. It is the place of rendezvous of the Lohani and other caravans, which every spring depart westward with the annual supply of British and Indian wares for Central Asia. These Lohanis descend, with their camels and other cattle, to spend the winter in the mild climate and luxuriant pastures stretching along the western bank of the Indus, and at the same time to furnish themselves with articles suitable for supplying their customers in Afghanistan and the countries north and west of it;

DUR.

and they assemble at Durabund to muster their strength for resisting the predatory tribe infesting the roads through which they have to pass. The town of Durabund is a small ill-built place, but bearing evidence of having been more prosperous, until ruined by the predatory attacks of the Vaziris and other marauders from the west. The permanent population is scarcely 1,000. Lat. $31^{\circ} 35'$, long. $70^{\circ} 13'$.

DURAJEE, in the delta of Sinde, a small town on the Buggaur, or great western branch of the Indus. When, about 200 years ago, this branch was navigable from the sea to the main channel of the river, Durajee and Lahorybunder, about two miles lower down, were the principal ports of Sinde, being accessible for vessels of 200 tons burthen. The Buggaur, however, has now for many years ceased to be navigable during the season of low water in the Indus, and goods landed at Durajee are, by means of camels, conveyed to Tatta overland, a distance of thirty miles. Though, during the season of low water, the Buggaur is unnavigable above Durajee, it has at all times a depth of at least twelve feet deep from that place downwards as far as the Pittyanee mouth of the Indus, a distance of twenty-eight miles. This easy access from the sea renders Durajee the port of Tatta and the greater part of the delta, as Kurrachee is the general haven for the upper part of Sinde. The closure of the port of Vikkur, in consequence of the great alteration which took place in the Hujanaree mouth in 1839, will probably cause an increased resort to Durajee. Lat. $24^{\circ} 30'$, long. $67^{\circ} 30'$.

DURALAH, in Sirhind, a village on the route from Kurnal to Lodiana, and 17 miles N.W. of the former town. Distant N.W. from Calcutta 982 miles. Lat. $30^{\circ} 2'$, long. $76^{\circ} 52'$.

DURBUH, or **DURBA**, in the British district of Bhuttiana, lieutenant-gov. of the N.W. Provinces, a small town or village near the south-eastern boundary, towards Hurriana. On the restoration of the canal of Feroz Shah in 1825, a branch, for the purpose of irrigation, was made from it to Durba, a distance of thirty-two miles. It gives name to one of the pergunahs or subdivisions of the district. Lat. $29^{\circ} 25'$, long. $75^{\circ} 12'$.

DURBUNGA, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town on the route from Dinapoor to Purneah, 70 miles N.E. of former, 131 W. of latter. It is situate on the banks of the river Buckea, and supplies for troops may be had here in great abundance. Lat. $26^{\circ} 8'$, long. $85^{\circ} 58'$.

DUREEAGUNJ, in the British district of Furrukhabad, lieutenant-gov. of the N.W. Provinces, a town on the north-western frontier, towards Aligurh, 33 miles N.W. of the city of Furrukhabad. Lat. $27^{\circ} 37'$, long. $79^{\circ} 8'$.

DUREEBA.—A town in the Rajpoot state of Jeypoor, 50 miles N. from Jeypoor, and

103 miles N.W. from Bhurtpoor. Lat. $27^{\circ} 39'$, long. $75^{\circ} 59'$.

DUREEPOOR.—See **DERIAPOOR**.

DURGAON, or **DERGAON**, in the native state of Gurwhal, a village on the western declivity of a mountain rising from the left bank of the Supin or Tonse, about 2,000 feet above its bed, and a mile above its confluence with the Roopin. Jacquemont, from an observation with the barometer, estimates its elevation above the sea at 7,159 feet. Lat. $31^{\circ} 4'$, long. $78^{\circ} 11'$.

DURGAPOOR.—A town in the British district of Mymensing, lieutenant-gov. of Bengal, 75 miles S. of Goalpara. Lat. $25^{\circ} 4'$, long. $90^{\circ} 41'$.

DURGUK.—A town in the native state of Cashmere, or territory of Gholab Singh, 220 miles N.E. from Jamco, and 189 miles N.E. from Kangra. Lat. $34^{\circ} 8'$, long. $78^{\circ} 17'$.

DURKOTHEE.—See **DHOORCATTIE**.

DURLAH.—A river of Bengal, rising in Bhootan, in lat. 27° , long. $88^{\circ} 43'$, and, proceeding in a southerly direction for forty miles, reaches the northern boundary of the British district of Dinajepore. Flowing through that district south-east for about ten miles, it passes first into the territory of Cooch Behar, and then into the district of Rungpore, and re-entering a second time each of the two last-mentioned tracts, which it traverses for the aggregate distance of ninety-eight miles, it is finally discharged into the Brahmapootra, on the right or west side, in lat. $25^{\circ} 40'$, long. $89^{\circ} 45'$. Its course throughout is from north-west to south-east, and its total length 148 miles. During the rainy season, it is navigable throughout for craft of about ten tons burthen, but at other times the upper part is not navigable. As far up as Mogulhat, however, about forty miles from its mouth, it is at all times navigable for craft of ten or twelve tons burthen.

DURMAHPOOR.—A town in the territory of Oude, seven miles E. from the left bank of the Gogra river, and 86 miles N.E. from Shah-jehanpoor. Lat. $28^{\circ} 11'$, long. $81^{\circ} 20'$.

DURMAWARAM.—A town in the British district of Bellary, presidency of Madras, 196 miles N.W. of Madras. Lat. $14^{\circ} 25'$, long. $77^{\circ} 48'$.

DURRAUNGDRA, in the peninsula of Kattywar, province of Guzerat, a town in the district of Jhalawar, near the northern frontier, towards the Runn or Salt Marsh. It was formerly a place of considerable importance, but is represented now as rather decayed, though still numbering 2,000 houses in good preservation, and having walls erected at a late period. Its chief, of the Jhala tribe, is considered one of the most exalted of that race. The territory to which this place gives name is, in its relations with the British government, considered united to the small tallook of Hulwud, conjointly with

DUR—DUT.

which it is returned officially as having a population estimated at 51,709, and paying annually a tribute of 43,909 rupees. In 1823, it was stated that many villages had been deserted, and that from famine and the inroads of freebooters, the population had been reduced to little more than a third of its former amount. There are some manufactures of coarse cloth, carpeting, and other articles. Distance from Ahmedabad, W., 75 miles; Baroda, N.W., 125. Lat. 23°, long. 71° 25'.

DURROOR.—A town situate in one of the recently sequestrated districts of Hyderabad, or dominions of the Nizam, 36 miles N.W. of Kurnool. Lat. 16° 13', long. 77° 44'.

DURRUNG, in Lower Assam, a town, the chief place of a considerable district of the same name, containing an area of 2,000 square miles, and a population of 80,000 souls. The town is situate on the right bank of the Brahmapootra, 73 miles S.W. of Bisnath. Lat. 26° 25', long. 92° 2'.

DURSENDAH.—The principal place of the pergunnah of the same name, a town on the river Baghin, a tributary of the Jumna, seven miles S.W. of the right bank of the latter, 39 E. of the town of Banda. Lat. 25° 27', long. 80° 57'.

DURUK.—A town in the territory of Oude, 70 miles E. from Pileebheet, and 81 miles N.E. from Shahjehanpore. Lat. 28° 35', long. 81°.

DURWESHABAD, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a town on the route from Hummerpore to the town of Futtehpore, and 14 miles N.W. of the latter. Lat. 26° 1', long. 80° 41'.

DURYAH KHAN, in the Sinde Sagur Doab division of the Punjab, a town situated near the left bank of the Indus, and 11 miles E. of the town of Dera Ismael Khan. Lat. 31° 45', long. 71° 5'.

DUSERA, in the British district of Boondshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Allygurh cantonment to that of Delhi, and 24 miles N.W. of the former. Lat. 28° 10', long. 77° 58'.

DUSGAON.—A town in the British district of Burdwan, lieutenant-gov. of Bengal, 79 miles N.W. of Calcutta. Lat. 23° 30', long. 87° 42'.

DUSNUGGUR.—A town in the British district of Silhet, lieutenant-gov. of Bengal, 36 miles S. of Silhet. Lat. 24° 25', long. 91° 45'.

DUSPULLA.—One of the Cuttack Mehals, in Orissa, placed under the political superintendence of an agent appointed by the Governor-General of India. It has an area of 162 square miles, containing a population of 7,290: its centre is about lat. 20° 25', long. 84° 40'. The timber required for the car of Juggernaut is annually supplied from this petty state, where the sal-tree, of which the car is constructed, grows to a prodigious size.

DUSSARA, in Guzerat, or the territory of

the Guicowar, a town lying a short distance beyond the northern frontier of the prant or district of Jhalawar, and near the eastern border of the Runn, or great Salt Marsh. With the twenty-five villages annexed to it, this place is shared among several zemindars, members of the same family, called the maliks of Dussara, who pay annually a tribute of 12,000 rupees to the British government. Distance from Ahmedabad, N.W., 55 miles. Lat. 23° 18', long. 71° 52'.

DUTI, or **DIPAL.**—A town in the native state of Nepal, on the left bank of one of the branches of the Ghogra river, and 101 miles N.E. from Bareilly. Lat. 29° 5', long. 80° 54'.

DUTNUGGUR, in Bussahir, a large village on the left bank of the Sutluj. It is situate where the valley of the Sutluj expands, and forms a flat of about two miles in length, well watered by canals, and bearing luxuriant crops of rice. It is inhabited by about fifty families, of whom one-half are Brahmins, holding their lands rent free. Elevation above the sea 3,200 feet. Lat. 31° 24', long. 77° 38'.

DUTTAEEBOODD, in Orissa, a town in the hill zemindary of Jeypoor, 15 miles S.E. from Jeypoor, and 102 miles N.W. from Vizagapatam. Lat. 19°, long. 82° 40'.

DUTTAHUR.—A town in the British district of Nellore, presidency of Madras, 137 miles N.W. of Madras. Lat. 14° 50', long. 79° 22'.

DUTTEEAH, in Bundelcund, a town, the principal place of the territory of the same name, lying on the route from Agra to Saugor, 125 miles S.E. of the former, 148 N.W. of the latter. Like most places in Bundelcund, it has a rocky site. It "is surrounded by a stone wall about thirty feet high, with its foundation on a solid rock; but it has no ditch or glacis, and is capable of little or no defence against cannon." Though the streets are narrow and intricate, the place has altogether a flourishing aspect, there being many good houses, the residences of the principal zemindars or landholders throughout the territory. The residence of the raja is in the town, within the walls of a garden or pleasure-ground, about ten acres in area, "crossed and recrossed at right angles by numerous walks, having rows of plantain and other fruit-trees on each side, and orange, pomegranate, and other small fruit-trees to fill the space between." The inclosing wall, about thirty feet high, with embattled towers at each of its four corners, has, in its eastern face, a fine and large gateway; and surmounting the wall at the opposite side of the pleasure-ground is the pavilion or lodge in which the raja resides. Between the pavilion and the gateway a building rises, in the midst of a fine reservoir, of which the following description is given:—"The shaft presented an octagon of about twenty feet span, surrounded with columned cloisters, and at each angle a figure of an elephant, sculptured in stone, with uplifted proboscis, spouted water

to a vast height into the air." Within the wall of the city is another palace, at present untenanted; and outside, and westward of the city, is a third, of great extent as well as strength, and in a fine style of architecture, but likewise deserted. The population, estimated by Sleeman at forty or fifty thousand, consists almost exclusively of votaries of Brahminism, though three or four miles from the town is a curious cluster of temples of the Jains. The Brahminical temples appear to be not much worth notice. The rocky ground around the town for two or three miles is overgrown with copse or stunted forest, abounding in game. Adjacent to the town is a jhil, or small artificial lake.

The raj or territory of which Dutteeah is the principal place, lies between lat. $25^{\circ} 32'$ — $26^{\circ} 18'$, long. $78^{\circ} 15'$ — $78^{\circ} 54'$. It is estimated to contain an area of 850 square miles, and 380 villages, with a population of 120,000. The revenue was estimated, in 1832, at 120,000*l.*, and in 1847, at 100,000*l.* The raja pays no tribute. He maintains a military force, consisting of 1,000 cavalry, 5,000 infantry, and eighty artillerymen. This state was formerly part of the dominions of Oorcha, and its raja appears to be descended from Dewada Bir, who, about the end of the fourteenth century, at the head of a colony of warlike Rajpoots, invaded and conquered a considerable tract of country. Subsequently, Dutteeah, after passing under the overwhelming domination of the Mogul empire, became subordinate to the Peishwa, as appears from the treaty concluded with the raja by Lord Lake, wherein the former "professes his obedience and attachment to the British government and to that of his highness the Peishwa." By this treaty, the raja "submits to the arbitration of the British government in matters of dispute with his neighbours, promises to join the British forces with his troops, and to act in subordinate co-operation. The ancient territories of his house are guaranteed, also protection against foreign aggression." The Peishwa having in 1817, by Art. XIII. of the treaty of Poona, ceded to the British government all his rights in Bundelcund, the raja of Dutteeah, in acknowledgment of his zealous friendship and active co-operation, was, by treaty in 1818, rewarded by the Governor-General with a considerable addition to his territory. The last hereditary raja died in 1839, and was succeeded by a founding whom he had adopted, and who was recognised by the British government. Dutteeah is distant W. of Allahabad, by Banda, Chirkaree, and Jhansi, 260 miles; N.W. of Calcutta 755. Lat. $25^{\circ} 40'$, long. $78^{\circ} 31'$.

DUTTODAH.—A town in the native state of Indore, or possessions of Holkar's family, 107 miles S.W. from Bhopal, and 215 miles S.E. from Ahmedabad. Lat. $22^{\circ} 33'$, long. $75^{\circ} 55'$.

DUWARKA, or DOARKA, in the district of Sultanpoor, territory of Oude, a fort on the

left bank of the river Goomtee, 32 miles S.E. of Sultanpoor cantonment, 110 S.E. of Lucknow. It is held by Fateh Bahadur, a notorious freebooter, who has 1,000 men under his command. In 1812, it was stormed by a British force commanded by Colonel Faithfull, and for some years was occupied by a detachment of the Company's troops, but evacuated about 1838. It was then repaired by the present occupant, who pays annually 50,000 rupees to the Oude government, and remunerates himself by widely ravaging the neighbouring country. Lat. $26^{\circ} 2'$, long. $82^{\circ} 28'$.

DWARA HATH, or DEWARA HATH, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a village on the route from Almora to Sireenuggur, and 25 miles N.W. of the former. Here, according to Traill, are tombs substantially built of large flat tiles, the memorials of Moguls located on the spot in the course of Tamerlane's expedition into Hindustan. Lat. $29^{\circ} 47'$, long. $79^{\circ} 28'$.

DWARKA, or DWARIKA, called also Jigat, in the peninsula of Kattywar, province of Guzerat, a town on the western shore, in the district of Okanundel. The land towards the sea is moderately elevated, and the place is conspicuous, from the commanding appearance of the great temple of Krishna or Dwarkanath, "the Lord of Dwaraka." It is the most celebrated of all the shrines raised to Krishna, and is built on an eminence rising from the seashore, and surrounded by a fortified wall (which likewise encircles the town), from which it is, however, separated by a lofty partition-wall, through which it is necessary to pass to see it to advantage. "It may be said to consist of three parts: the munduff, or hall of congregation; the devachna, or penetralia (also termed gabarra); and the sikra, or spire." "The munduff is square, measuring twenty-one feet internally, and five distinct stories high. Each story is colonnaded, the lower being twenty feet in height, and of the same square form to the last, where the architraves are laid transversely to form a base for the surmounting dome, whose apex is seventy-five feet from the pavement. Four massive pillars on each face of the square form the foundation for this enormous weight; but these being inadequate to sustain it, intermediate pillars to each pair have been added, to the sacrifice of all symmetry. A colonnaded piazza surrounds the lowest story, of about ten feet in breadth, from which to the north, south, and west, portions are projected, likewise colonnaded. Each story of the munduff has an internal gallery, with a parapet of three feet in height, to prevent the incautious from falling. These parapets, divided into compartments, had been richly sculptured." "The sikra or spire, constructed in the most ancient style, consists of a series of pyramids, each representing a miniature temple, and each diminishing with the contracting spire, which terminates at 140 feet

from the ground. There are seven distinct stories, before this pyramidal spire greatly diminishes in diameter. Each face of each story is ornamented with open porches surmounted by a pediment, supported by small columns. Each of these stories internally consists of column placed upon column, whose enormous architraves increase in bulk in the decreasing ratio of the super-imposed mass; and although the majority at the summit are actually broken by their own weight, yet they are retained in their position by the aggregate unity." "The entire fabric, whose internal dimensions are seventy-eight feet by sixty-six, is built from the rock, which is a sandstone of various degrees of texture, forming the substratum of the island. It has a greenish hue, either from its native bed, or from imbibing the saline atmosphere, which, when a strong light shines upon it, gives the mass a vitreous transparent lustre." Joined by a colonnade to this temple is a smaller one, dedicated to Deoki, the mother of Krishna; and at the opposite angle of the great temple is another, still smaller, dedicated to Krishna, under his title of Madhu Rae, or the "Prince the intoxicator." The Gunti, a small rivulet which flows by the group, is considered especially sacred, but it is so shallow that it does not reach the angle. The site of the temple was once insulated; but the sea having thrown up a sandbank across the channel, this sacred spot is now connected with the mainland. About eighteen miles north of Dwarka is Amrara, supposed to be Muldwarka or ancient Dwarka, where Krishna met his death. Others, however, consider Mahadoopoor, ninety-five miles south-eastward of Dwarka, to have been contiguous to Mool Dwarka, which, according to tradition, was swept away by the sea. At this spot, native report declares that a bird annually springs from the foam of the sea, and having perched and sported on the top of the temple, falls down and dies, and from its plumage the Brahmins prognosticate whether the year will be rainy or otherwise. Dwarka is distant from Ahmedabad, S.W., 235 miles; Baroda, W., 270. Lat. 22° 15', long. 69° 1'.

DWARKA.—A river rising in the British district of Beerbhoom, lieut.-gov. of Bengal, in lat. 23° 57', long. 87° 21'. Flowing through that district in an easterly direction nearly parallel with the Mor river, which it receives after a course of about sixty miles, the united stream, twenty miles below the confluence, falls into the Bhagruttee, in lat. 23° 43', long. 88° 10'.

DYAGUNJ.—See **DEAGANJ**.

DYALOUNG.—A river rising in lat. 26° 4', long. 93° 42', on the southern boundary of the British district of Nowgong, in Lower Assam. Flowing in a westerly direction for ninety-five miles, it falls into the Kullung, a tributary of the Brahmapootra, in lat. 26° 12', long. 92° 31'.

DYE, in the district of Bainswara, territory of Oude, a village on the route from

Cawnpore to Pertabgurh, 56 miles S.E. of the former. Lat. 26° 2', long. 81° 14'.

DYEHINDIA.—A village situate in one of the recently sequestered districts of Hyderabad, or the dominions of the Nizaa, 36 miles S.W. of Ellichpoor. Lat. 20° 50', long. 77° 11'.

DYHNWOLEE.—A town in the British district of Tannah, presidency of Bombay, 37 miles N.E. of Bombay. Lat. 19° 3', long. 73° 25'.

E.

ECHAGUR.—A town in the British district of Pachete, lieut.-gov. of Bengal, 163 miles N.W. of Calcutta. Lat. 23° 6', long. 85° 59'.

ECHAWUR, in Malwa, a town in the territory of Bhopal, on the route from Hindya to Sehora, 45 miles N. of former, 12 S. of latter. At the commencement of the present century, the district was wrested from Bhopal by the Mahrattas; but being ceded in 1818, with several other possessions, by the Peishwa to the British government, it was with four other pergunnahs granted to the nawab of Bhopal, in reward of his zeal and fidelity. Lat. 23° 3', long. 77°.

ECHIBUL, in Kashmir, a fine fountain, discharging a vast quantity of the most beautifully limpid water. It is situate in the eastern part of the district of Bureng, and has four or five orifices, from the principal of which the spring rises with such force as to form what may be termed a mound of water, a foot and half high, and twelve feet in diameter. Vigne, with much probability, supposes it to be the efflux of that portion of the water of the river Bureng which sinks into the ground about ten miles to the south-east. If, however, this opinion be correct, the sunken stream must receive large additions from springs in its subterraneous course, as the volume of water discharged at Echibul far exceeds that which disappears in the bed of the Bureng. According to Vigne, the water is not very good for drinking. Bernier, on the contrary, who describes this vast fountain under the name of Achiaval, states the water to be excellent (*admirablement bonne*); he adds, that it is so cold as to be almost insupportable to the touch. At the time of his visit (1665), it was surrounded by a superb pleasure-ground, belonging to Aurungzebe, having been made by order of his grandfather, Jehangir; but all is now in utter ruin. Lat. 33° 39', long. 75° 12'.

EDGHEER.—See **EIDGHEER**.

EDMONSTONE ISLAND.—An island at the mouth of the Hoogly river. From a mere half-tide sandbank, it became an island two miles long, covered with shrubs, and affording a supply of fresh water. In 1820 it was adopted as a marine station for affording

assistance to ships in distress; but was subsequently abandoned, in consequence of the rapid demolition of the island by the encroachment of the sea. Lat. $21^{\circ} 32'$, long. $88^{\circ} 20'$.

EDMY, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to the cantonment of Mynpooree, and 36 miles W. of the latter. Lat. $27^{\circ} 7'$, long. $78^{\circ} 35'$.

EDUR,—The principal Rajpoot state of the Myhee Caunta, in the province of Guzerat, tributary to the Guicowar, but under the political superintendence of the government of Bombay. This petty state was founded by Anund Sing and Race Sing, sons of the celebrated Ajeet Sing, rajah of Joudpore. The districts were assigned to them by their elder brother, the viceroys of Guzerat, under the Moguls; and the brothers, accompanied by several chiefs and 5,000 followers, took possession of their territory about the year 1724. The revenues of the state, including those of the recently acquired possessions of Ahmednuggur, and of the feudatories of both districts, were estimated in 1847 at 23,434*l.*; of which the rajah's share was 15,000*l.*, subject to the deduction, on account of tribute to the Guicowar, of 3,295*l.* The political relations of the British government with this state originated in 1820, under an arrangement with the Guicowar, by which it was stipulated that his troops should evacuate the province; and the British government thereupon guaranteed the payment of his dues free of all expense. The districts of Ahmednuggur, already noticed, were formerly comprised within the state of Edur, but were bestowed, about sixty years ago, by the ruling prince, upon his second son, Sugram Sing. The late rajah of Ahmednuggur, Tukht Sing, having, however, been elected to the vacant throne of Joudpore, his possessions in the Myhee Caunta reverted to the senior branch of the family, and are now reincorporated with the state of Edur. In 1848, the military force at the disposal of the Edur state, inclusive of the quotas of the feudal chiefs, consisted of 921 horse and foot. These troops are maintained almost entirely for purposes of police.

EDUR, in the Myhee Caunta division of Guzerat, presidency of Bombay, the principal town of the district. It is a place of little importance, containing about 1,200 houses. Though encircled by hills on three sides, and defended on the fourth by a wall, the position would be one of no strength, even if the defences were completed, as it is commanded by a hill to the right, which forms part of the range. In the rear, and upon the hill, which there rises to the height of between 400 and 500 feet, is a fort, now in ruins, which in former times afforded shelter to the rajahs of Edur when driven from the town below. The hill is ascended by a steep and stony zigzag pathway, having four gateways, in tolerable repair. The eminence on the right of the town is sur-

mounted by several Jain temples, and also by the remains of a palace, built by the former rajahs of Edur. Population 10,000. Lat. $23^{\circ} 50'$, long. $73^{\circ} 3'$.

EEB.—A river rising in lat. $20^{\circ} 50'$, long. $73^{\circ} 42'$, in the territory of the Daung rajahs, on the western slope of the Syadree range, and flowing westerly for seventy miles through the native states of the Daung, Baunsda, and the British district of Surat, falls into the Arabian Sea, in lat. $20^{\circ} 43'$, long. $72^{\circ} 54'$.

EECHOUREEA, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village situate on the left bank of the Ramgunga, six miles S. of the town of Bareilly. Lat. $28^{\circ} 17'$, long. $79^{\circ} 29'$.

ECTENA.—A town in the British district of Mymensing, lieutenant-gov. of Bengal, 215 miles N.E. of Calcutta. Lat. $24^{\circ} 30'$, long. $91^{\circ} 7'$.

EKAH, in the Rajpoot state of Joudpore, a village on the route from Phulodee to Pokrun, and six miles N.E. of the latter place. It is situate in an elevated rocky tract, and has a small fort, on a craggy eminence. On the south there is an extensive depression, which after the rainy season becomes a great sheet of salt-water, but is at other times dry. Lat. $26^{\circ} 56'$, long. $72^{\circ} 4'$.

EKAIRREE, or **AKHERI**, in the territory of Mysore, a decayed town, once the capital of a considerable and flourishing state, is situate amidst the headwaters of the Varada. Its walls are of great extent, and form three concentric inclosures. There are besides a citadel, a great temple of Siva, and a mean building, which was the ancient palace of the extinct dynasty of Sedasiva, a personage whose wonderful adventures are preserved in Hindoo fable. Historically, he appears to have been a gauda or chief of Kilidi, in the neighbourhood of Akheri, who received a grant of some districts from Krishna Rayara, of Vijayanagar, who also bestowed on him the name of Sedasiva Nayaka, he having previously borne that of Bhadracanda. Kilidi continued the seat of his government for about twelve years afterwards, when he removed it to Akheri, which then attained the highest measure of prosperity which it ever reached, and of which most exaggerated reports are preserved by the natives. In 1645 or 1646, the government was removed to the neighbouring town of Bednore, and subsequently Akheri became deserted. At this time, all the buildings except the temple above mentioned are desolate, and the town without inhabitants. In 1763, Hyder Ali, the usurper of Mysore, took Bednore, then governed by the widow of the last actual chief, a profligate and shameless woman, who had caused the adopted son of her deceased husband to be murdered; and who, in conjunction with her paramour, had selected another successor to the first place in the state. All the parties were righteously subjected by Hyder to imprisonment, intended to be perpetual, but from which the chances of war subsequently

relieved them. Akheri is distant from Bednore, N., 20 miles; from Seringapatam, N.W., 162. Lat. $14^{\circ} 7'$, long. $75^{\circ} 5'$.

EENDPALSIR-KA-BAS, in the Rajpoot state of Beykaneer, on the route from Ruttunghur to the town of Beykaneer, and 30 miles E. of the latter. It contains fifty houses, and has a supply of brackish water from a well 274 feet deep. It is the largest of seven contiguous villages, with separate wells. Lat. $27^{\circ} 55'$, long. $74^{\circ} 15'$.

EESAAE, or **HEESEYEE**, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Mynpooree, and 16 miles N.W. of the latter. Lat. $27^{\circ} 21'$, long. $78^{\circ} 55'$.

EESAGURH, or **ESAUGURH**, in the territory of Gwalior, or possessions of the family of Scindia, a town, with a fort, in a hilly and difficult country. It was formerly called Oondee, and belonged to a chief of the Ahir Rajpoots, from whom, at the close of the last century, it was taken by Doorjun Lal, a celebrated chief of the Kaichi Rajpoots, and by him denominated Bahadurghur, or "Hero's Town." It became the capital of his new dominions. Subsequently, in 1803, it was wrested from him by Baptiste, one of Doulat Rao Scindia's officers. It is styled in Malcolm's Index, "the fort of Resum or Esaugurh." Lat. $24^{\circ} 50'$, long. $77^{\circ} 55'$.

EESAH, in the British district of Etawah, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Agra to that of Etawah, and three miles N.W. of the latter. Lat. $26^{\circ} 48'$, long. $79^{\circ} 2'$.

EESOULEE.—A town in the territory of Oude, on the left bank of the Goomtee river, and 69 miles S.E. from Lucknow. Lat. $26^{\circ} 24'$, long. $81^{\circ} 58'$.

EGUTPOORA.—A town in the British district of Ahmednuggur, presidency of Bombay, 71 miles N.E. of Bombay. Lat. $19^{\circ} 43'$, long. $73^{\circ} 34'$.

EIDGHEER, in Hydrabad, or territory of the Nizam, a town on the left or north-west bank of the Peenia, a considerable tributary of the Krishna. Distance from Hydrabad S.W. 100 miles. Lat. $16^{\circ} 45'$, long. $77^{\circ} 11'$.

EILGUNDELL.—A town in Hydrabad, or dominions of the Nizam, 81 miles N.E. from Hydrabad, and 123 miles S.E. from Nandair. Lat. $18^{\circ} 23'$, long. $79^{\circ} 4'$.

EINWAH.—A town in the territory of Oude, on the left bank of the Gogra river, and 54 miles W. from Goruckpoor. Lat. $26^{\circ} 35'$, long. $82^{\circ} 33'$.

EJASSON.—A town of Malwa, in the native state of Burwanee, on the left bank of the Nerbudda river, and 205 miles W. from Baitool. Lat. $22^{\circ} 5'$, long. $74^{\circ} 48'$.

EKDIL SERAI, in the British district of Etawah, lieutenant-gov. of the N.W. Provinces, a

village on the route from Calpee to the cantonment of Etawah, and six miles S.E. of the latter. Lat. $26^{\circ} 45'$, long. $79^{\circ} 8'$.

EKDULLA KHAAS, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a town on the route from Allahabad to Hummeerpore, 52 miles N.W. of the former. Lat. $25^{\circ} 38'$, long. $81^{\circ} 9'$.

EKHUMBA.—A town in the British district of Purnee, lieutenant-gov. of Bengal, 66 miles N.E. of Bhagulpore. Lat. $25^{\circ} 56'$, long. $87^{\circ} 40'$.

EKOU.—A town in the native state of Nepal, 48 miles S.W. from Khatmandoo, and 52 miles N. from Bettia. Lat. $27^{\circ} 30'$, long. $84^{\circ} 34'$.

EKTALE.—A town in the British district of Midnapore, lieutenant-gov. of Bengal, 88 miles S.W. of Calcutta. Lat. $22^{\circ} 20'$, long. $87^{\circ} 4'$.

ELAMBAZAR, in the British district of Beerbhoom, lieutenant-gov. of Bengal, a town on the route from Berhampore to Bancoorah, 63 miles S.W. of former, 52 N.E. of latter. It is situated on the left bank of the river Hadjee, here navigable, and is from this circumstance a great mart for rice, extensively grown in the vicinity. The number of houses was estimated in 1814 at 544, the number of inhabitants at 2,950. Distance from town of Burdwan, N.W., 35 miles; from Calcutta, N.W., 90. Lat. $23^{\circ} 37'$, long. $87^{\circ} 39'$.

ELEPHANTA, in the presidency of Bombay, a small island on the east side of the harbour of Bombay, and distant about five miles from the mainland. It is something less than six miles in circumference, and is "composed of two long hills, with a narrow valley between them. The usual landing-place is towards the south, where the valley is broadest." About 250 yards to the right of the landing-place is a large clumsy figure of an elephant, cut out of an insulated black rock; and from this circumstance the island (which by the natives is called Gara-pori) has derived the denomination by which it is known to Europeans. This huge figure, which is thirteen feet in length, is represented as much mutilated, and rapidly sinking into total decay, its head and neck having, in 1814, fallen from the rest of the body, which was also fast coming to the ground, an extensive fissure having taken place in the back. On advancing farther from the landing-place, the visitor comes suddenly in front of "the grand entrance of a magnificent temple, whose huge masonry columns seem to give support to the whole mountain which rises above it," and out of which it is hewn. The geological formation of the rock is probably basaltic. The entrance is by a spacious front, supported by two ponderous pillars and two pilasters, forming three openings, under a thick and steep rock, overhung by brushwood; and the impression on reaching the interior is rendered very deep and solemn, by "the long ranges of columns, that appear closing in per-

spective on every side; the flat roof of solid rock, that seems to be prevented from falling only by the massive pillars, whose capitals are pressed down and flattened, as if by the superincumbent weight; the darkness that obscures the interior of the temple, which is dimly lighted only from the entrances; and the gloomy appearance of the gigantic stone figures, ranged along the wall, and hewn, like the whole temple, out of the living rock." There are three principal parts in this extraordinary work: the great temple, 133 feet broad and 130½ long; and two smaller temples, one on each side of the principal one. These two appendent temples do not range in a straight line with the front of the principal one, but recede considerably from it, being approached by two narrow passes in the hill, one on each side of the grand entrance, but at some distance therefrom. Each of these passes conducts also to a side-front of the grand excavation, exactly like the principal front, consisting of two huge pillars with two pilasters. These two side-fronts are precisely opposite to each other, on the east and west, the grand entrance facing the north; and the plan is regular, there being eight pillars and pilasters in a line from the northern entrance to the southern extremity, and the same number from the eastern to the western entrances. The only striking deviation from this regularity in the chief temple, is afforded by the occurrence of a small square excavation, observable on the right in passing up the temple. At the further extremity of the temple are two small excavations, facing each other on the right and left. "The pillars, which all appear to run in straight lines, parallel to each other, and at equal distances, are crossed by other ranges running at right angles in the opposite direction; they are strong and massy, of an order remarkably well adapted to their situation and the purpose which they are to serve, and have an appearance of very considerable elegance. They are not all of the same form, but differ both in size and ornaments, though this difference also does not at first strike the eye. They rise to upwards of half their height from a square pedestal, generally about three feet five inches each way, crowned on the top by a broad bandage of the same shape: above this, but divided from it by a circular astragal and two polygonic filets, rises a short round fluted shaft, forming about a fourth of the column, and diminishing with a curve towards the top, where a circular cincture of beads binds round it a fillet composed of an ornament resembling leaves, or rather cusps, the lower extremity of which appears below the cincture, while the superior extremity rises above, projecting and terminating gracefully in a circle of overhanging leaves or cusps. A narrow band divides this ornament from the round fluted compressed cushion, which may be regarded as the capital of the column, and as giving it its character: its fluted form coalesces beautifully with the fluted shaft below. This cushion has its cir-

cumference bound by a thin flat band or fillet, as if to retain it; and above supports a square plinth, on which rests the architrave, that slopes away on each side in scrolls, connected by a band or riband, till it meets the large transverse beam of rock, which connects the range of pillars." Fronting and within the principal entrance, is a "gigantic bust, representing some three-headed being, or three of the heads of some being to whom the temple may be supposed to be dedicated. Some writers have imagined that it is what they have called the Hindu trinity of Brahma, Vishnu, and Shiva." Others consider it a triform representation of Siva alone. This bust, which represents the deity down to the breast, and is consequently a third-length, has been ascertained by measurement to the top of the cap of the middle head to be about eighteen feet high; and a notion of its bulk may be formed from the measurement in an horizontal curved line, embracing the three heads at the height of the eyes, and touching them, which is nearly twenty-three feet. This, though the most remarkable, is but one specimen amidst a profusion of carved figures, representing various subjects of Brahminical mythology, though it is puzzling to observe, that one at least appears to be a representative of Buddha, held in abomination by the Brahmins. The precise nature of the worship to which these temples were consecrated, seems, indeed, to be of very disputable character. There are, in different parts, three sanctuaries or shrines, which, in the opinion of a judicious writer already quoted, were devoted to the adoration of certain emblems, which, though occupying a distinguished place in Hindu mythology, are not fitted to be made the subject of popular disquisition. This opinion is deduced from the position of the emblem in question in various parts of these excavations. The writer above referred to, in explaining the grounds of his belief, observes, that the "use made of temples by the ancient Greeks and Romans, as well as by the modern Hindus, is considerably different from that required of them by Christian nations. A Hindu goes alone, as an ancient Roman would have done, when he finds it convenient, offers his solitary prayers before his idol, prostrates himself in his presence, and leaves his offering: he attempts to bribe his god to prosper him in his trade, whether it be merchandise, or procuration, or theft. There is no stated regular time of teaching, no public prayers said by a priest in the name of a mixed congregation, no gathering of the people to go through a solemn service. Their great festivals are like our ideas of a fair; each man goes in his own time to the temple, makes his offering at the feet of the idol, goes out, and purchases sweetmeats. All teaching or reading of the sacred books is in private houses; or, if it is in the temple, it is in the courts of the temple, never in the consecrated edifice: the verandas or porticos near the temple are used just as any others equally convenient would be. This use, to which the

courts of the temple are applied, will throw light on many passages of history and the sacred volumes of the Jews. It is evident that the temples of nations, whose worship is so conducted, need not be large, like our churches, since it is not required that they should contain a multitude. In all very ancient temples, however magnificent, the part of the temple in which the deity is supposed to reside is small, surrounded by numerous buildings, in which the priests and servants of the temple reside. This seems to have been the plan of the first temple of Jerusalem; it was that of the older Grecian temples, as we may observe from the *Ion* of Euripides; and it is at this day that presented by the temple of Mecca. In the temples of the Hindus the great object of worship is not constantly exposed to view, nor placed in the larger outer building; it is always in an inner, small, dark apartment, usually having only one door, requiring to have lights burning before it in order to be seen, and facing the door, so as to be visible from the further side of an intervening saloon." The arrangements at Elephanta appear, as far as can be judged, to have corresponded precisely with this view, and to countenance the conjecture of the writer quoted. All, however, is wrapped in mystery. Even the period and authors of these extraordinary works are totally unknown; but there seem no good grounds for assigning them a very remote antiquity. The stone is of a mouldering nature, and many parts are far gone in decay. Elephanta is seven miles E. of Bombay. Lat. $18^{\circ} 57'$, long. 73° .

ELEPHANT POINT, on the coast of Chittagong, lieut.-gov. of Bengal, 85 miles S. of Chittagong, and 89 miles N.W. of Akyab. Lat. $21^{\circ} 9'$, long. $92^{\circ} 8'$.

ELEPHANT POINT.—A headland on the southern coast of the British province of Pegue, situate on the west side of the mouth of the Rangoon river, 23 miles S. of Rangoon: it derives its name from a clump of cocoanut-trees, "which, with the help of the imagination, does somewhat resemble that animal." Lat. $16^{\circ} 28'$, long. $96^{\circ} 25'$.

ELlichpoor, in the territory of Hyderabad, or the dominions of the Nizam, a town, the principal place of an extensive jaghire or fudal possession. The town is situate on the river Purna, a tributary of the Taptee, and is of considerable size, but slenderly fortified, being only partially surrounded by a stone wall, which, though sixty feet high, is but four feet in thickness. It is surmounted by battlements, and entrance is obtained by means of a highly-ornamented gateway, built, as well as the wall, of sandstone. The palace of the nawaub has no great splendour, but in its vicinity are some handsome houses and bazars built of brick. The nawaub holds his jaghire from the Nizam, on condition of furnishing a contingent of "a brigade of two battalions of infantry, 2,000 horse, and four guns." Of late, the relation

between the feudatory and his chief has been disturbed. On the 30th May, 1859, an action took place between the troops of the nawaub of Ellichpoor and a body of those of the Nizam, sent to dispossess the former of his jaghire. Considerable loss was sustained on both sides, but the result seems to have been favourable, on the whole, to the dependent chief. Another action, fought on the 20th July, is reported to have terminated in his defeat. The nawaub, however, rallied, and on the 9th August gained a victory over the troops of his master, which was followed by another on the 28th September. The grounds of the quarrel are not very satisfactorily explained; but the total disorganization of the Nizam's financial arrangements, and the character of the measures to which his ministers have too often resorted to repair their condition, give plausibility to the statement which ascribes the difference to the aggression of the superior ruler. Ellichpoor forms part of the Nizam's territory which has been recently sequestered to the British, as a provision for the maintenance of his military contingent. Distance from Hyderabad, N., 275 miles; from Madras, N.W., 600; from Bangalore, N., 570; from Nagpore, W., 100; from Bombay, N.E., 345; from Calcutta, W., 700. Lat. $21^{\circ} 10'$, long. $77^{\circ} 36'$.

ELLORA.—A decayed town in Hyderabad, or dominions of the Nizam, situate 13 miles N.W. from Aurungabad, and seven from Dowlatabad. It was formerly a place of some note, deriving its celebrity chiefly from the remarkable excavations in the neighbouring mountain, known as the temples of Ellora. According to Hindoo legend, the date of these temples is carried back for a period of 7,950 years, and their origin ascribed to Rajah Eeloo, the son of Peshfont, of Ellichpoor, when 3,000 years of the Dwarpa Youg were yet unaccomplished. The more rational account of the Mahometans states that "the town of Ellora was built by Rajah Eel, who also excavated the temples. Eel Rajah was contemporary with Shah Momin Arif," who lived 950 years ago. According to Elphinstone, however, the first mention in history of these caves occurs in connection with the princess Dewal Devi, daughter of the rajah of Guzerat, who was captured by a party who had gone from the camp of Alp Khan to visit the excavations at Ellora. These wonderful productions of human industry and perseverance, "which," says Elphinstone, "have been compared, as works of labour, to the pyramids of Egypt, and which in reality far surpass them as specimens of art," have drawn forth expressions of admiration from all who have studied them. "Whether," says Sir Charles Malet, "we consider the design, or contemplate the execution of these extraordinary works, we are lost in wonder at the idea of forming a vast mountain into almost eternal mansions. The mythological symbols and figures throughout the whole leave no room to doubt their owing their existence to religious zeal,—the most

powerful and most universal agitator of the human mind."

From the elaborate notice of a more recent observer, Colonel Sykes, it appears that the hill containing the excavations takes the form of a crescent, presenting its concavity to the west, and rising in its extremities to an elevation considerably above the intermediate level. The sculptures at the two extremities are those of Dehr Warra and Parumath, the interval, somewhat exceeding a mile, being occupied by other caves at irregular distances from each other, and seldom on the same level. The very minute and complete account of these celebrated caves which is contained in Colonel Sykes's paper, will furnish the inquirer with the fullest information, and leave him nothing to desire further. To this, therefore, the reader is referred. Ellora was ceded, in 1818, by Holcar, under the treaty of Mondesoor, to the British, who transferred it to the Nizam in 1822, by the treaty of Hyderabad. Ellora is in lat. 20° 2', long. 75° 13'.

ELLORE, in the British district of Masulipatam; presidency of Madras, a town with a military station, situate on the Jummalair, a torrent flowing in a direction south-east from the Eastern Ghats, and which, about three miles below the town, falls into the Colair Lake. On the right bank of the river are the barracks and the cantonment hospital; on the other side, the officers' houses. Communication between all parts of the station is practicable throughout the year, as the torrent is never unfordable. The town is tolerably well built. The sides of the streets and roads in the town and its vicinity are planted with rows of trees, affording very grateful shade, in a place where the heat has been known to reach 110° within-doors, and 120° in tents. The nights, especially during the months of April and May, are very oppressive; and it was in the latter month, when the land-wind blows with much violence, that the great degree of heat above mentioned was observed. The official report styles Ellora a "populous town;" but the number of its inhabitants is not stated. Distance from Bombay, S.E., 565 miles; Hyderabad, E., 180; Mangalore, N.E., 500; Bel-lary, N.E., 300; Bangalore, N.E., 350; Madras, N., 255; Masulipatam, N., 39; Calcutta, S.W., 620. Lat. 16° 42', long. 81° 10'.

ELPHINSTONE ISLAND.—An island on the coast of Tenasserim, thirteen miles long and four and a half broad, 65 miles N.W. from the town of Tenasserim. Lat. 12° 21', long. 98° 10'.

EMANGUNGE, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allahabad to Futtehpore, and 20 miles N.W. of the former. Lat. 25° 31', long. 81° 40'.

EMAUM GHUR, in Sind, was lately a strong fortress in the Thur or Great Sandy Desert, separating that country from Jessulmere. As scarcely a drop of fresh water can

be had on the route from Sind after leaving Choonkee, distant about fifty miles from Emaum Ghur, this fortress was generally considered by the aneers as an inexpugnable place of refuge. On this account, when the disputes between them and the British came to extremity, Sir Charles Napier determined at all risks to attempt its seizure. Setting out with fifty cavalry, two twenty-four-pound howitzers, drawn by camels, and three hundred and fifty European infantry, mounted on animals of the same description—two on each, he, after a very trying march of three days, over a succession of steep sandhills, reached the fort, which was immediately surrendered. The captor describes it as "exceedingly strong against any force without artillery. The walls are forty feet high, one tower is fifty feet high, and built of burned bricks. It is square, with eight round towers, surrounded by an exterior wall of fifteen feet high, lately built. There are some bomb-proof chambers." Twenty thousand pounds of powder were found in various places built up for concealment. These were employed in springing thirty-four mines, which reduced the fort to a mass of ruins, shapeless and irretrievable. The grain found in store had been previously distributed in rations. The British force marched back to the interior of Sind without any loss. Emaum Ghur is in lat. 26° 35', long. 69° 20'.

EMENABAD, in the Reechna Doab division of the Punjab, a town situated on the road from Lahore to Wazeerabad, 33 miles N. of the town of Lahore. Lat. 32° 4', long. 74° 10'.

EMILEEA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route by the Kutra Pass from Allahabad to Rewa, and 24 miles S.E. of the former city. Lat. 25° 15', long. 82° 10'.

EMROKEE, in the native state of Sumpter, in Bundelcund, a village on the route from Gwalior to Sangor, 60 miles S.E. of the former. Here, in the beginning of December, 1817, the British army under command of marquis of Hastings, governor-general, was encamped in its advance towards Gwalior, to intimidate Scindia. Distance S.W. of Calpee 54 miles. Lat. 25° 47', long. 79° 2'.

ENAYUT-KA-SARAE, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Allahabad to Benares, and eight miles S.E. of the former. Lat. 25° 25', long. 82°.

ENDREESA, in the Punjab, a village situate in the bifurcation where the Beas and Sutluj rivers unite. Burnes sought here in vain for the altars dedicated by Alexander to commemorate his conquests. He found nothing but a brick ruin, unquestionably of Mahometan origin. Were this even the actual locality of those altars which have given rise to so much controversy, the probability of their still existing is perhaps not great; it being unlikely that the natives would allow

the trophies of the invader's triumph to remain after his disappearance. Endreesa is in lat. $31^{\circ} 12'$, long. $75^{\circ} 3'$.

ENGLISH BAZAR, in the British district of Maldah, lieut.-gov. of Bengal, a town, the seat of the civil establishment of the district, on the route from Berhampore to Purnea, 62 miles N. of former, 70 S.E. of latter. It is situate on the right or west bank of the Mahanunda. Distant N. from Calcutta 188 miles. Lat. $24^{\circ} 58'$, long. $88^{\circ} 10'$.

ENNORE.—A town in the British district of Chingleput, presidency of Madras, nine miles N. of Madras. Lat. $13^{\circ} 13'$, long. $80^{\circ} 23'$.

ERICH, or **IREJ**.—A town of Bundelcund, in the British district of Jaloun, situate on the south or right bank of the river Betwa, on the route from Saugor to Gwalior, 65 miles S.E. of the latter. It was formerly a place of importance, and had a considerable population, principally Mahomedan, as is indicated by the numerous mausoleums, surmounted by domes, around it. Here, in the end of November, 1817, the British army, commanded by the marquis of Hastings, governor-general, was encamped in its advance on Gwalior, to intimidate Scindia. It was part of the territory of Jhansi until 1843, when it was ceded by the rao of that place to the East-India Company. At the time of cession, its annual revenue was returned at 7,148 rupees. Lat. $25^{\circ} 47'$, long. $79^{\circ} 9'$.

ERINPOORA.—A town in the Rajpoot state of Serohie, 135 miles S.W. from Nusseerabad, and 78 miles S. from Jodhpoor. Lat. $25^{\circ} 10'$, long. $73^{\circ} 9'$.

ERRIODE.—A town in the British district of Madura, presidency of Madras, 230 miles S.W. of Madras. Lat. $10^{\circ} 37'$, long. $78^{\circ} 8'$.

ERROAD.—See YIROAD.

ERRUCKPOOR.—A town in the British district of Cuttack, lieut.-gov. of Bengal, 196 miles S.W. of Calcutta. Lat. $20^{\circ} 40'$, long. $86^{\circ} 11'$.

ERUNDOLE.—A town in the British district of Candeish, presidency of Bombay, 212 miles N.E. of Bombay. Lat. $20^{\circ} 56'$, long. $75^{\circ} 19'$.

ESANUGGUR.—A town in the Boondela state of Chutterpoor, 84 miles N.E. from Saugur, and three miles E. from the right bank of the Deesaun river. Lat. $24^{\circ} 52'$, long. $79^{\circ} 26'$.

ESEE, in the British district of Allygurh, lieut.-gov. of the N.W. Provinces, a village on the road from the cantonment of Allygurh to that of Muttra, and eight miles S. of the former. Lat. $27^{\circ} 48'$, long. $78^{\circ} 7'$.

ESEPOORA, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route from Allahabad cantonment to Jaunpore, and nine miles N.E. of the former. Lat. $25^{\circ} 27'$, long. $82^{\circ} 1'$.

ESEWUN, in the territory of Oude, a ruined town on the route by Nanamow Ghat from Futtehgurh cantonment to Lucknow, 25 miles W. of the latter. When Lord Valentia passed it in 1803, it was nearly in ruins, having been deserted for the neighbouring town of Meahganj, recently founded by the eunuch Almas Khan, minister of finance to the Nawab Vazir of Oude. Its site is, however, pleasant, on a slight eminence, overlooking a small lake. It is mentioned in the Ayeen Akbery under the name of Aseyun. Lat. $26^{\circ} 48'$, long. $80^{\circ} 30'$.

ESSAU KAYLE, in the Daman division of the Punjab, a town situated on the right bank of the Indus, 177 miles N. of the town of Mooltan. Lat. $32^{\circ} 39'$, long. $71^{\circ} 16'$.

ESUN, a small river of the Doab, rises in the British district of Allyghur, in the neighbourhood of Sikundrarow, in lat. $27^{\circ} 41'$, long. $78^{\circ} 27'$. It takes a south-easterly course towards the Ganges, into which it falls on the right side, in lat. $26^{\circ} 47'$, long. $80^{\circ} 11'$. At the town of Mynpooree, it is crossed by a bridge of brick. About twenty miles lower down, the route from Etawa to Futtehgurh crosses it by a ford. It is throughout a mere torrent, and in the dry season the current totally ceases in some parts of its channel.

ESURDA, or **ESUNDA**, in the territory of Jyepore, in Rajpootana, a town 60 miles S. of the city of Jyepore, and near the left bank of the river Bunas. Broughton, who passed close to it, mentions, "It belongs to a takoor or lord of the Jyepoor family; is surrounded by a strong wall and ditch, and has a citadel in the centre of the place, and is apparently by much the handsomest and most commodious town that I have seen in this part of India." Lat. $26^{\circ} 10'$, long. $76^{\circ} 10'$.

ESWUNTGURH.—A town in the British district of Ratanagierah, presidency of Bombay, 164 miles S.E. of Bombay. Lat. $16^{\circ} 39'$, long. $73^{\circ} 25'$.

ETA, in the Rajpoot state of Jessulmeer, a village on the route from the town of Beykaner to that of Jessulmeer, and 55 miles N.E. of the latter. The road in this part of the route is heavy, lying among sandhills. Lat. $27^{\circ} 10'$, long. $71^{\circ} 42'$.

ETAROLI, in the British district of Etawa, under the lieut.-gov. of the N.W. Provinces, a village on the route from Lucknow in Oude, by Nanamow, to Etawa cantonment, and 20 miles E. of the latter place. Lat. $26^{\circ} 48'$, long. $79^{\circ} 25'$.

ETA WAH.—A British district named from its principal place, and subject to the lieut.-gov. of the N.W. Provinces. It is bounded on the north by the British districts Mynpooree and Furruckabad; on the east by the British district of Cawnpore; on the south by Bundelcund; on the south-west by the Maharratta territories of Gwalior; and on the west by the British district of Agra. It lies between

lat. 26° 21'—27° 9', long. 78° 46'—79° 49', and contains an area of 1,674 square miles. It was formerly part of Cawnpore, but was formed into a separate zillah under the sanction of the home authorities in 1840. The greater part of Etawah lies in the Doab, a small strip only, forming the pergunnah of Burpoora or Janibrast, being separated from the rest by the Jumna, and lying along the right or south-western bank of that river. The Jumna touches on the north-western extremity of the district, and, flowing in a south-easterly direction, either bounds or traverses it for 115 miles. About 25 miles S.E. of the town of Etawah, the Jumna is joined on the right side by the Chumbul. So considerable is the accession of water from this source, that the Jumna below the confluence has been known to rise in twelve hours between six and seven feet, in consequence of a flood in the Chumbul. The obstacles which formerly presented themselves to the safe navigation of the Jumna in this part of its course, were principally shifting shoals and sandbanks, trunks of trees imbedded in the bottom, and numerous boulders, as well as fixed rocks of kankar or calcareous conglomerate. The sunken trees were removed after a careful search, in 1833, and during the last twenty years, the clearance of other impediments has been in progress, under the directions of various officers of the engineer service. The channel is most obstructed at Kurimkhan, ten or twelve miles below the mouth of the Chumbul. The Seyngur or Kurun runs nearly parallel to the Jumna, but ten or twelve miles more to the eastward, and falls into that river on the left side, about twenty miles south of the southern frontier. The Rind flows across the north-eastern extremity of the district, in a direction parallel to the Seyngur, but about fifteen miles more to the eastward. The Pandwa and some other streams of the district are mere torrents during the periodical rains, and cease to flow during the dry season. All the streams run towards the south-east, indicating the general slope of the country to be in that direction; but there is also a slope from the middle part of the Doab towards the Jumna, all the streams of the district being ultimately discharged into that river. The levels taken in laying down the Etawah branch of the prolongation of the Ganges Canal have shown the elevation of the country above the sea to diminish from about 676 at the northern frontier, to 640 at the town of Etawah.

The principal spring crops are wheat, barley, gram (*Cicer arietinum*), and other pulse of various kinds. The autumnal crop consists of opium, sugarcane, cotton, indigo, rice, jowar (*Sorghum vulgare*), bajra (*Holcus spicatus*), moth (*Phaseolus aconitifolius*). The government assessment upon the lands of this district has been fixed for a specified period, and is not liable to increase till the year 1871. In the vicinity of the cantonment of Etawah, the seeds of European vegetables are sown after

the rainy season, at the close of summer, and peas, cauliflowers, and lettuce are fit for use at Christmas, attaining a high degree of excellence; carrots and other esculent roots are of inferior quality; oranges, citrons, limes, and lemons, are very fine, and grapes succeed tolerably. Melons are abundant, luxuriant, and excellent. The apple, mango, plantain, guava, jak (*Artocarpus integrifolia*), succeed well; but pomegranates are scarcely worth gathering. The unsheltered situation of Etawah affords ample opportunity for the contemplation of the changes of the atmosphere. In no part of India do the hot winds blow with greater fury. They commence in March, and continue during the whole of April and May. The wind usually rises about eight in the morning, and continuing through the whole day, subsides at sunset, though it sometimes blows throughout the whole night. "Every article of furniture is burning to the touch; the hardest wood, if not well covered with blankets, will split with a report like that of a pistol; and linen taken from the drawers is as if just removed from a kitchen fire. The nights are terrible, every apartment being heated to excess, each may be compared to a large oven." The human constitution suffers great exhaustion from this state of temperature. The hot winds are succeeded by the monsoon or periodical rains, the transition being marked by a furious tornado. Even at midday, darkness as of night sets in, caused by the dense clouds and volumes of dust; and so loud is the roar of the storm, that the incessant peals of thunder can be heard only at intervals, whilst the flashes of lightning seldom pierce through the gloom. The rain then descends in torrents, floods the country, and refreshes the animal and vegetable world. "Before the watery pools have penetrated into the parched earth, so rapid is the growth of vegetation, patches of green appear along the plain, and those who take up their posts in the veranda for an hour or two may literally see the grass grow. In the course of a single day the sandy hillocks will be covered with verdure, and in a very short time the grass becomes high and rank." The rains usually continue from the first or second week in June until the middle of October, and in some seasons are very violent, causing extensive and destructive inundations. The final fall is generally the heaviest, lasting three or four days, and ushering in cool weather. The climate is delightful from October to March; exercise in the open air may be taken with satisfaction on foot until ten o'clock in the forenoon, and all day in carriages; fires are requisite to comfort in the evening, and warm bedding is requisite at night.

The vigorous administration of the laws by the British authorities has of late years much checked the band of crime in this district, which was formerly infamous as one of the principal haunts and places of refuge of the Thugs and Phansigars, and whose secret and systematic

robberies and murders have been carried to an appalling extent all over Hindostan. Some of these wretches were Mahomedans, but the majority were Hindoos; some gangs contained a mixture of all denominations and castes. In some instances these assassins were under the protection of the zemindars or landed proprietors of the eastern part of the district, but the mixed gangs generally lurked in the ravines and jungles of the wild tract of Sindouse, on the right of the Jumna, and in the Doab between that river and the Chumbul. Some ostensibly followed agricultural avocations, or other pursuits equally unsuspected, though they were in reality supported by their nefarious practices; others were mere vagrants, living, when urged by want, on the flesh of jackals and other unclean animals. To so great an extent did the crime of thuggee once prevail, that in one year (1808) sixty-seven dead bodies were taken out of wells in this district. The population in 1853 was ascertained by official return to amount to 610,965. Of this number, 401,367 are returned as Hindoos engaged in agriculture; 176,791 Hindoos engaged in other pursuits; 9,327 Mahomedans and others, not Hindoos, agricultural; and 23,480 of those classes, non-agricultural. Hence it is seen that the Hindoos constitute an overwhelming majority of the population.

The following is a classification of the towns and villages of the district:—

Number containing less than 1,000 inhabitants ..	1,313
Ditto more than 1,000 and less than 5,000	96
Ditto more than 5,000 and less than 10,000	4
Ditto more than 10,000 and less than 50,000	1

Total

The principal towns will be found noticed in the proper places. The principal routes through the district are—1. From south-east to north-west, from Calpee to Muttra, by Etawah, running parallel to the left bank of the Jumna, and on an average ten or twelve miles from it; 2. from south-east to north-west, from Cawnpore, joining the former route five miles from the cantonment of Etawah; 3. from Lucknow, in Oude, to the cantonment of Etawah, and, subsequently crossing the Jumna, to Gwalior; 4. from north-east to south-west, from the cantonment of Futtoghur to that of Etawah; 5. from north to south, from the cantonment of Mynpooree to that of Etawah. The right of the British government to this tract dates from 1801, when it was ceded by the Nawaub Vizier, forming a portion of the possessions alienated by that prince in commutation of subsidy.

ETAWAH, a town, the principal place of the pergunnah and also of the district of the same name, is situate about a mile east of the left bank of the Jumna, here crossed by ferry, or occasionally by a bridge of boats. Access to the water is had by means of numerous ghats or flights of stairs, some in a state of great decay, others recently built by wealthy Hindoos, to afford devotees easy approach for the purpose of ritual ablution. The sight of

the town has a striking appearance, the houses being in many instances insulated on small summits, amongst which deep, narrow, steep-sided ravines wind. These indentations appear to have been formed by the violent torrents caused by the periodical rains washing away the softer parts of the elevated strata, leaving prominent the indurated kankar or calcareous conglomerate, in some instances sixty feet above the river. Hodges, who visited the place in 1783, describes it as then "large, but very wretched, having but two tolerable houses." Tieffenthaler spoke of it, about thirty years before, as "a very ancient and famous town, situate on the east side of the Jumna, and formerly well peopled. At present," he continues, "many old houses have fallen down. The fort, situate on a high sandhill, on the bank of the Jumna, which flows along its southern side, is of moderate size, and has a foundation of brick." In the time of Baber, in the early part of the sixteenth century, it was of much note, and was governed by the son-in-law of that sovereign, by whom it is repeatedly mentioned. At present its prosperity appears somewhat on the increase, in consequence of its favoured commercial position at the junction of the road from Calpee to Agra with that from Cawnpore to the same place. The jail is one of the largest and best secured of any in the North-Western Provinces. The cantonment is a mile north-west of the town. It is little liked by Europeans, who consider it to be "peculiarly desolate, and to exhibit in full perfection the dreary features of a junglesation. Upon a wide sandy plain, nearly destitute of trees, half a dozen habitable bungalows lie scattered, intermixed with the ruins of others, built for the accommodation of a larger garrison than is now considered necessary for the security of the place, a single wing of a regiment of sepoys being deemed sufficient for the performance of the duties of this melancholy out-station." The population consists of 23,300 persons. Distant N.W. from Calcutta 710 miles, N.W. from Cawnpore 100, S.E. from Agra 73, S.E. from Delhi, *via* Allyghur, 183. Lat. 26° 46', long. 79° 4'.

ETAWEH, in the British district of Saugor, territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Saugor to Jeypoor, 40 miles N.W. of the former. Lat. 24° 10', long. 78° 19'.

ETCHAK.—A town in the British district of Ramgur, lieutenant-gov. of Bengal, 218 miles N.W. of Calcutta. Lat. 24° 5', long. 85° 29'.

ETIMADPOOR, or ATAMADPOOR, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town on the route from the cantonment of Etawa to that of Muttra, and 39 miles S.E. of the latter. It is of inconsiderable size, and surrounded by an indifferent mud wall. Here is a large tank, inclosed by massive embankments of masonry, and having in the middle a polygonal building two stories

high, surmounted by a dome. It is built of stone, and communicates with the land by a bridge of several arches of the same material. Local tradition attributes its construction to a retainer of the imperial court of Delhi, but his name has not been preserved. The town has a bazar, and water and supplies are abundant. Lat. $27^{\circ} 14'$, long. $78^{\circ} 16'$.

ETOUNDA.—A town in the native state of Nepal, 24 miles S.W. from Khatmandoo, and 54 miles N.E. from Bettiah. Lat. $27^{\circ} 26'$, long. $85^{\circ} 8'$.

ETOWLEE, in the British district of Shahjehanpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to Lucknow, 56 miles S.E. of the former, 100 N.W. of the latter. Lat. $28^{\circ} 2'$, long. $80^{\circ} 12'$.

EVEREST MOUNT.—A mountain of the Himalaya range, situate between the mountain of Kinchingunga, in Sikkin, and the city of Khatmandoo, in Nepal, and presumed to be the loftiest summit in the world. Its elevation is 29,002 feet above the level of the sea. The highest summit of the Andes is Sorata, having an elevation of 25,267 feet. Mount Everest is reported to have been recently discovered by Colonel Waugh, and to have been named in compliment to the late surveyor-general of India.

EYTUH, or ETA.—The principal place of the pergunnah of the same name, in the British district of Mynpoorie, under the lieutenant-gov. of the N.W. Provinces. It has a bazaar, and is surrounded by a mud wall. In consequence of the lowness of its site, it is nearly encompassed by a jhil or piece of water during the periodical rains in the latter part of summer. Supplies and water are abundant at all seasons. This place lies on the route from Allyghur to Mynpoorie, and is 34 miles N.E. of the latter. Lat. $27^{\circ} 34'$, long. $78^{\circ} 43'$.

F.

FAGU, in the hill state of Keonthul, a halting-place on the route from Simla to Kotgarh, and 12 miles E. of the former. Here is a building of one apartment, erected by government for the accommodation of travellers. The adjacent country is picturesque, and in many places well wooded, and, though rough and mountainous, well suited for the culture of esculent vegetables, especially potatoes, and of the salep misri, a species of orchis, yielding in great abundance a mucilaginous food, both palatable and highly nutritious. Fagu is 8,080 feet above the level of the sea. Lat. $31^{\circ} 6'$, long. $77^{\circ} 21'$.

FALSE ISLAND.—The most southern of a cluster of islands on the coast of Arracan, situate between the island of Cheduba and the mainland. Lat. $18^{\circ} 39'$, long. 94° .

FALSE POINT.—A headland on the coast of Cuttack, at the mouth of the Mahanuddee

river, and 30 miles S.W. from Point Palmyras. "It is low and woody." A lighthouse has been erected here, exhibiting its light 120 feet above high water. Lat. $20^{\circ} 20'$, long. $86^{\circ} 51'$.

FARAH, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, lies on the route from the city of Agra to that of Muttra, 22 miles N.W. of the former, 13 S.E. of the latter. It is situate a mile from the right bank of the Jumna. Heber describes it as "built in a great measure within the inclosure of what has evidently been a very extensive serai, whose walls seem to have been kept up as a defence to the village. They have, however, not been its only defence, since, on a little hill immediately above it, is a square mud fort, with a round bastion at each flank, and a little outwork before the gate." The town is well supplied with water, and has a small bazar. The surrounding country is well cultivated and open. Lat. $27^{\circ} 19'$, long. $77^{\circ} 50'$.

FATIABAD, in the territory of Tijarra, under the political management of the Governor-General's agent in Rajpootana, a town on the route from Delhi to the town of Alwar, and 31 miles N. of the latter. Supplies may be procured here, and water is plentiful. Lat. $27^{\circ} 55'$, long. $76^{\circ} 45'$.

FATTEHGAD, in the Peshawur division of the Punjab, a town situated at the entrance of the Kyber Pass, 10 miles W. of the town of Peshawur. Lat. 34° , long. $71^{\circ} 30'$.

FAZILPOOR.—A village in the district of Mooltan, one of the divisions of the Punjab, situate 91 miles S.W. of Mooltan. Lat. $29^{\circ} 18'$, long. $70^{\circ} 25'$.

FEELNUGGUR, in the British district of Shahjehanpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to the cantonment of Futtehgurh, and 28 miles S.E. of the former. Lat. $28^{\circ} 1'$, long. $79^{\circ} 44'$.

FEEROZAPOOR, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Futtehgurh to Lucknow, and 28 miles S.E. of the former. Lat. $27^{\circ} 8'$, long. $79^{\circ} 58'$.

FENNY RIVER.—A stream rising in the mountains of independent Tipperah, and, flowing south-west, forms for several miles the boundary between Tipperah and the British district of Chittagong, and for thirty-two miles separates the district last named from that of Bulloah, and falls into the Bay of Bengal in lat. $22^{\circ} 53'$, long. $91^{\circ} 33'$.

FEEROZABAD, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, on the route from Muttra to Etawa, and 53 miles S.E. of the latter, 25 miles E. of the city of Agra. It is of considerable size, surrounded by a wall, outside which are numerous mounds and shapeless ruins. Jacquemont states that it "displays very beautiful

relics of ancient splendour. It must have been a wealthy town, but its fine edifices are in ruins and deserted; and its present inhabitants dwell in good cottages thatched with straw. Still it may in India be considered a town." It has a bazar, and is supplied with water from wells. The population is returned at 12,674. Its present name is of comparatively recent date, and has probably been given in honour of some chief of Afghan or Persian descent, Firoz being a usual appellation among those of that lineage. Under its former name, Chandwar, it is frequently mentioned by Baber as a place of importance. Lat. $27^{\circ} 9'$, long. $78^{\circ} 28'$.

FEROZABAD.—A town in Hyderabad, or dominions of the Nizam, on the left bank of the Beema river, and 114 miles S.W. from Hyderabad. Lat. $17^{\circ} 4'$, long. $76^{\circ} 50'$.

FEROZEPOOR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Allypore to the town of Moradabad, and 19 miles S.W. of the latter. Lat. $28^{\circ} 37'$, long. $78^{\circ} 40'$.

FEROZESHAH.—A village situate about twelve miles from the left bank of the Sutlej, within the country under the control of the commissioner and superintendent of the Cis-Sutlej states. This place has been rendered memorable by the attack made on the 21st December, 1845, by the British army, under Sir Hugh Gough and Sir Henry (afterwards Lord) Hardinge, on the formidably-intrenched Sikh camp here, which, after two days' hard fighting, was captured, and the enemy put to flight. The triumph was complete; but, as in most of the actions throughout the Sikh war, the loss of the victors was heavy. Lat. $30^{\circ} 52'$, long. $74^{\circ} 50'$.

FEROZE SHAH CANAL runs from the river Jumna, at lat. $30^{\circ} 20'$, long. $77^{\circ} 38'$. One branch discharges itself in the desert, in lat. $29^{\circ} 16'$, long. $75^{\circ} 16'$, and the other rejoins the parent stream at Delhi.

FEROZPOOR, in the British district of Mozuffurnuggur, lieutenant-gov. of the N.W. Provinces, a village with a small fort, half a mile from the right bank of the Ganges. Elevation above the sea 848 feet. Lat. $29^{\circ} 30'$, long. $78^{\circ} 2'$.

FEROZPOOR, in the British district of Suharunpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Meerut to Suharunpoor, 45 miles N.W. of the former. Lat. $29^{\circ} 37'$, long. $77^{\circ} 31'$.

FEROZPORE, a British district in Sirhind, deriving its name from the town so called, formerly a place of some note, and now again rising into importance. It forms part of what are called the Cis-Sutlej territories of the East-India Company. The boundary is irregular, and not very well defined, but its centre may be stated to be in lat. $30^{\circ} 45'$, long. 75° . Its area is returned at ninety-seven square miles; but this return, it is explained by the deputy

commissioner, refers only to the district of Ferozpoore as it stood before the war with Lahore. Subsequently, four pergunnahs, containing a very considerable tract of country, were added to it; and at a still later period, the larger portion of one of them was severed from the district, and transferred to a native chief, the rajah of Furreedkote. Part of the territory thus alienated was granted to the rajah, in consequence of his good behaviour during the war; another part was subject to certain cash payments; and a third portion was in exchange for other territory more conveniently situate with reference to Ferozpoore.

This latter process gave additional complication to the circumstances of the district, which is again increased by the incorporation with it of certain pergunnahs from Wudnee, abolished as a separate district. The fact that the latest return was made immediately after these changes, and before any sufficient arrangement could be entered into for insuring accuracy, accounts for the presentation of a statement which does not even offer any pretensions to correctness. The circumstances which have rendered the return as to area unsatisfactory, are equally applicable to the return of population, under which the number is given at 16,890. The district, however, is said to be very thinly peopled, not a thirtieth part, it is alleged, being under cultivation. The remainder is either barren or covered with jungle; but the former populousness and prosperity of the country are proved by the existence of several ruined villages and towns, as well as of fine brick-lined wells, now half-filled with rubbish. The wells at a distance from the river are deep, but much of the soil might be irrigated without recourse to them, as the dry bed of a nullah or watercourse, called the Sukri, traverses the country with a sinuous channel, and it would only require a canal a mile in length to admit the water of the Sutlej or Gharrah. In the following extract, the climate is represented as favourable to the European constitution:—"The climate of Ferozpoore promises well: it is peculiar to this part of India, and unlike any other, except Loodiana. Continual cloudy weather, occasionally rainy, and a climate particularly advantageous to Europeans, as well as natives. We can ride out all day without the slightest inconvenience, except that sometimes it is rather too cold than otherwise, to be comfortable without a great coat: scarcely any sick in hospital." The condition of the climate here described was in January. The territory of Ferozpoore escheated to the British, upon the demise, in 1835, of Sirdarree Luchmun Koar. The claims of Lahore were subsequently compromised by a division of the territory with Runjeet Singh, the portion then allotted to that potentate again changing masters, as above noticed, upon the conclusion of the Lahore war.

FEROZPORE, in Sirhind, a town and fort
307

so named because built by Feroze Toghluq, who sat on the throne of Delhi from 1351 to 1388. It is the chief place of a portion of the British possessions in that quarter, and is situate three miles from the left bank of the Sutlej. It must have been formerly a large town, as the extensive ruins around it indicate. The fort is an irregular building, incapable of defence against a regular attack. It is a hundred yards long, forty broad, and has a dry ditch, ten feet wide and ten deep, with one gateway, which is on the east face. The interior is filled with earth to half the height of the walls, and the mound thus formed is crowded with rear brick houses and mud hovels, separated by alleys not exceeding six feet wide. The town is surrounded by a ditch and by a weak mud wall. It is well supplied with water from a hundred and twenty-four brick-lined wells. Before the introduction of artillery, and when in good repair, the fort must have defied attempts to storm it; and even now, according to the report of an eyewitness, when viewed at a distance, its appearance is very striking. "The large, heaped-together, and well-raised round towers of the forts about here," says a visitant, "give more an impression of England than any I have seen in India. At two or three miles distant, in looking on Ferozepore, you might fancy yourself gazing on Arundel, if not Windsor Castle." The town, though originally very mean, has been improved since its occupation by the British; bazars have been made, and several good shops established. The population has also greatly increased. Its rapid improvement is thus described by a late traveller:—"When I was at Ferozepore in January, 1839, the streets were narrow, and in the filthiest state imaginable; the houses all huddled together. When I was there in February, 1841, on my return from Afghanistan, a totally new prospect presented itself. The fort and town had been new-modelled, indeed rebuilt of burned brick; wide streets, with colonnaded rows of shops, had been constructed, and the whole exhibited the promise of an extensive mercantile city. For this improvement, we are much indebted to the zeal and exertions of Captain H. Lawrence, assistant political agent. The native merchants of India and the Punjab, seeing distinctly the dawn of commercial prosperity in that quarter, at once entered into the speculation of erecting long lines of shops and warehouses, and increasing the town; and there can be no doubt that in a very short period Ferozepore will become one of the most important mercantile entrepôts in the north-west part of India." For this purpose it is well adapted, by its situation near one of the great rivers, and its recipient the Indus. There is also facility of communication by good roads with all parts of Sirhind. In November, 1838, an interview took place here between

Runjeet Singh, then maharaja of the Punjab, and Lord Auckland, the Governor-General of British India, on which occasion 10,000 men, rendezvoused at Ferozepore previously to their advance to the invasion of Afghanistan, went through the evolutions of a bloodless battle for the amusement of the Seik ruler, as well as to produce on him an impression of the superiority of British discipline and tactics. In the subsequent operations of the Afghan war, it was repeatedly visited by British armies, marching and countermarching. Within the monumental church erected in this town, the names of the gallant officers and men who fell in the Sutlej and Punjab campaigns will be perpetuated on tablets sacred to their memory. The population of Ferozepore is about 6,000. It is distant W. of Loodiana 79 miles, N.W. of Calcutta 1,181 miles. Lat. 30° 55', long. 75° 35'.

FEROZPORE.—The principal place of the pergunnah of the same name, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, on the route from Delhi to Alwar, and 74 miles S. of the former. Jacquemont describes it as surrounded by a rather strong wall, flanked with small towers, and inhabited principally by Mussulmans. The fort had strong walls and towers, constructed of mud and mounted with cannon, and contained the nawab's palace, of no great size, but handsomely built, and furnished in the English style. According to the latest official return (1848), the number of inhabitants was 7,989; but this statement was founded on a census made two or three years earlier, and chiefly, if not entirely, through native agency. The jaghire of Ferozepore, containing an area of about 138 square miles, with that of Loharoo, containing 350, were granted, in the beginning of the present century, the former by Lord Lake, the latter by the ruler of Alwar, to Ahmud Buksh Khan; on whose death, in 1827, they descended to his son, Shumsooddeen Khan. The two younger brothers of Shumsooddeen, having well-founded claims on Loharoo, in virtue of an arrangement made by their father Ahmud Buksh, Mr. William Fraser, the British political agent at Delhi, exerted himself to induce the British government to make a partition in their favour. Shumsooddeen, to avert the threatened loss, and in revenge for the proposed measure, as well as for some censure passed, and some coercion exercised, in regard to certain parts of his conduct, caused Mr. Fraser to be murdered, at Delhi, by a hired assassin, in October, 1835. A year afterwards, he was brought to trial for the murder, and, being duly convicted, was hanged. His jaghires being declared forfeited, Loharoo was granted to his brothers, and Ferozepore embodied with the British district of Goorgaon. There are works in the town for smelting iron-ore, raised at a mine three miles distant. The bazar is well supplied, and water is abundant. The road in this part of the route is good. Elevation above the sea about 840 feet. Dis-

tance N.W. from Calcutta, by Agra and Muttra, 895 miles. Lat. $27^{\circ} 47'$, long. $77^{\circ} 1'$.

FILOR, or FALOUR.—A town in the Julinder Doab division of the Punjab, on the route from Amritsir to Loodiana, and about six miles N.W. of the latter place. It is situate on the right bank of the Sutluj, and is defended by a fort, built on the high steep rising from the river. The fort, which was constructed by order of Runjeet Singh in 1809, is small, affording accommodation for a garrison of only 150 men, but it is rendered conspicuous by its large barbican. Here is the ferry over the Sutluj, for the communication of Loodiana and its neighbourhood with Amritsir and Lahore. The Sutluj, in inundation, forms extensive sheets of water round the town, and these remain after the river has shrunk to the confines of its usual channel. Lat. $31^{\circ} 2'$, long. $75^{\circ} 49'$.

FIVE SISTERS ISLANDS.—A group of islands on the coast of the Tenasserim province, in lat. $11^{\circ} 25'$, long. $98^{\circ} 9'$, and 82 miles S.W. from the town of Tenasserim.

FLAT ISLAND.—An island, called by the natives Negamale, situate about five miles from the south-eastern shore of Cheduba (Arracan), which island in soil and productions it very much resembles. It is about four miles in length from north to south, has a pool or two of fresh water, and is high towards the centre. Lat. $18^{\circ} 37'$, long. $93^{\circ} 50'$.

FORT ST. DAVID.—A town and fort on the coast of Coromandel, in the British district of South Arcot, presidency of Madras. This place, formerly known as Tegnapatam, was purchased by the East-India Company from a native prince in 1691, and became a station of some importance. Upon the capitulation of Madras to the French in 1746, the Company's agent here assumed the general administration of British affairs in the south of India, and successfully resisted an attack made by Duplex upon the settlement. In 1756, Clive was appointed governor of Fort St. David. It was attacked by the French in 1758, both by sea and land, and capitulated, when the fortifications were demolished, and were never rebuilt. Distant N. from Cuddalore three miles; from Madras, S., 100. Lat. $11^{\circ} 45'$, long. $79^{\circ} 50'$.

FORT ST. GEORGE.—See MADRAS.

FORT WILLIAM.—See CALCUTTA.

FOUL ISLAND, off the coast of Arracan, situate about six leagues from the mainland, is two miles in length, its shape conical, with a gradual declivity from the centre towards the sea. The island is covered with a profusion of trees. Lat. $18^{\circ} 4'$, long. $94^{\circ} 16'$.

FRASERPET, or KOOSHALNUGGUR, in the British district of Coorg, presidency of Madras, a town situate on the left bank of the river Cauvery, here 225 feet wide, fordable in the dry season, but during the monsoon rising from twenty to thirty feet. It is situate close to the ruins of Jaafarabad, a fort built by

Tippoo Sultan on the site of the ancient Koo-shalnagar, and is the head-quarters of the sappers and miners employed on the roads and other public works in Coorg. The soil is alluvial but well drained, and the air salubrious, though, in consequence of its comparatively depressed site, warmer than in most parts of Coorg. The nights, however, are cool and pleasant at all seasons, and during the monsoon little rain falls, and the temperature is moderate, the heat of the sun being mitigated by continual clouds and light fogs. Elevation above the sea 3,200 feet. Distance from Mer-kara, E., 14 miles; Mangalore, S.E., 81; Bangalore, S.W., 117; Madras, W., 290. Lat. $12^{\circ} 28'$, long. $76^{\circ} 1'$.

FRENCH ROCKS, in Mysore, a British military station for native troops, at a rocky hill, five miles N. of the river Cauvery at Seringapatam, and 300 feet above it. The cantonment is on a gently rising ground, with a gravelly soil and well drained. There are no jungles nor marshes in the vicinity, nor any stagnant water, except that contained in a fine deep tank with a rocky bottom, which yields an abundant and excellent supply throughout the year. The atmosphere is rather moist; fogs and heavy dews prevail at the close of the winter and the early part of spring. The heat is less than at Seringapatam, a few miles distant, and the thermometer is at no time much above 85° . The monsoon rains generally cease about the middle of September. Notwithstanding the many apparently favourable circumstances of its site, it has been from time to time subject to attacks of severe endemic fever, generally of intermittent type. They appear, however, to be in a great degree confined to the native population, the British generally enjoying good health. Elevation above the sea 2,300 feet. Lat. $12^{\circ} 31'$, long. $76^{\circ} 45'$.

FRENCH SETTLEMENTS.—See PONDICHERRY.

FULAILEE, in Sind, is a branch of the Indus, leaving the main channel about nine miles above Hyderabad, and in lat. $25^{\circ} 31'$, long. $68^{\circ} 29'$. It flows southward, after proceeding a short distance to the east of Hyderabad, which it insulates, by sending off to the westward a branch which rejoins the main river about fifteen miles below the town. Below this last divarication it bears the name of the Goonee, takes a south-easterly course, discharging its water eastward into the Purana or Phurraun, and ultimately into the sea by the Kooré mouth.

FULJAR TAL, in the British district of Shahjehanpoor, lieut. gov. of the N.W. Provinces, a small lake, the source of the river Gromtee. Lat. $28^{\circ} 35'$, long. $80^{\circ} 10'$.

FULTA, in the British district known as the Twenty-four Pergunnahs, lieut. gov. of Bengal, a town on the left bank of the river Hooghly, opposite the mouth of the Damoodah. Distance from Calcutta, S.W., by land, 22

miles ; by the course of the Hooghly, 29. Lat. 22° 18', long. 88° 10'.

FUREEDABAD, a town in Bulubgurh or Fureedabad, a jaghire under the lieut.-gov. of the N.W. Provinces, is situate on the route from Delhi to Muttra, and 21 miles S. of the former city. The country around is for the most part barren and disagreeable, but groves of tamarinds and other trees enliven the immediate neighbourhood of the town. Here is a bazaar, and also a large tank. The town is surrounded by a wall. At the time of Thorn's visit, fifty years ago, it was noted for the manufacture of bows and arrows. Water is abundant. Lat. 28° 25', long. 77° 23'.

FUREEDGUNGE, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the old route from the cantonment of Allahabad to Futtehpore, and 39 miles N.W. of the former. Lat. 25° 41', long. 81° 25'.

FUREED KOT, in the British district of Bhubteana, lieut.-gov. of the N.W. Provinces, a town on the route from Patialah to Bhawalpoor, 116 miles S.W. of the former. Lat. 30° 1', long. 74° 47'.

FUREED KOTE, one of the protected Sikh states of Sirhind, is bounded on the north, south, and east by the British district of Ferozepore, and on the west by the native state of Mundote: it extends from lat. 30° 40' to 30° 56', and from long. 74° 22' to 75° 9'; is forty miles in length from east to west, and nineteen in breadth. The area is 308 square miles, containing a population of 45,892. Fureedkote, the chief town, is 60 miles S.W. from Ludiana. Lat. 30° 40', long. 74° 59'.

FUREEDPOOR, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from Allyghur to the town of Moradabad, and four miles S.W. of the latter. It is situate near the right bank of the Gangun, in an open, level, cultivated country. Lat. 28° 47', long. 78° 49'.

FUREEDPOOR, in the British district of Bareilly, the principal place of the pergunnah of the same name, on the route from the town of Bareilly to Shahjehanpoor, and 12 miles S.E. of the former. It is situate close to a grove of very fine mango-trees, in a flat fertile country, well cultivated, especially under cotton. Heber describes his visit to this place on November 18th as delightful:—"The morning was positively cold, and the whole scene, with the exercise of the march, the picturesque groups of men and animals round me, the bracing air, the singing of birds, the light mist hanging on the trees, and the glistening dew, had something at once so oriental and so English, I have seldom found anything better adapted to raise a man's animal spirits and to put him in good temper with himself and all the world." There is a bazar here, and water and supplies are abundant. The road in this part of the route is good. Lat. 28° 12', long. 79° 36'.

FUREEDPORE.—A British district under the lieut.-gov. of Bengal, named from its principal place. It is bounded on the north by the British district Mymensing; on the east by the British district Dacca; on the south by the British district Backergunge; and on the west by the British districts Jessore and Pubna: it lies between lat. 23° 3'—24° 5', long. 89° 30'—90° 15', and has an area of 2,052 square miles. Fureedpore is altogether an alluvial tract, low and swampy in the southern and north-eastern parts, where it is much subject to inundation; but in the north and north-western portions, rather more elevated, with a deep soil of fine quality. Few districts more abound in rivers: the Ganges, in this part of its course called the Podda, touches on the western frontier at Juffergunge, where that river receives an offset of the Konaie or Jabuna, by which its volume of water is more than doubled. Thence taking a south-easterly course for fifteen miles to Malapora, it enters the district, through which it flows for forty-five miles, to Kagauta, on the eastern frontier, at which place it sends off eastward a great branch, called the Kirtynassa; and then taking a southerly course for fifteen miles, it at Hobi-gunje crosses the southern frontier into the British district of Backergunge. It on the left side receives numerous considerable water-courses, and on the right side sends off many others, especially during the rainy season, when it rolls along with a vast volume of water, four, five, or six miles in width. The Konaie, or Jabuna, from the north, touches on this district at its north-western corner, and flowing southerly for about five miles, forms its western boundary as far as Amceerabad, where it sends off to the left, or south-eastwards, a large stream, called the Dulasseree, and, turning south-westward, it receives, at a distance of five miles, the Oora Sagar, on the right side; the united stream a few miles lower down falling into the Ganges. The Dulasseree holds a south-easterly course for thirty-five miles to Sabar, on the eastern frontier, towards the British district of Dacca, where it receives the Bunsu, flowing from the north. From the confluence, the Dulasseree holds a course south-east, forming for twelve miles the eastern boundary of Fureedpore towards Dacca, when it passes into that district. The Barashee or Chundna, a large offset of the Ganges, flowing from north-west to south-east, touches this district on the western frontier, at Moodocallee, and taking a course very sinuous, but generally southerly, for fifty-five miles, to Gopalgunje, it for that distance forms the western boundary, towards the British district Pubna and Jessore. Rennell remarks that "the only subordinate branch of the Ganges that is at all times navigable, is the Chundnah river, which separates at Moddapore, and terminates in the Hooringotta;" and Horsburgh states that ships of 500 tons can enter and load in the Hooringotta estuary. The Barashee or Chundna is the only stream in this district navigable

throughout the year ; all the others, including the main stream of the Ganges or Podda, during the dry season become in many parts so shallow, that even small boats cannot traverse them.

The soil is in general very rich, particularly in the northern part, producing fine crops of sugarcane, cotton, indigo, oil-seeds, and some others of less value ; while the swampy grounds are fruitful in rice. Sugar is probably the most important crop. The manufacturing industry of the district is chiefly employed in the preparation of indigo and sugar, and in the distillation of rum. A considerable quantity of coarse cotton cloth is made for home use. Here are mahajans or merchants, reputed to be considerable capitalists, who drive an extensive and lucrative business, there being a brisk traffic in the import, export, and transit departments. The population is given under the article BENGAL. Mussulmans are more numerous in the southern part, and Brahminists in the remainder of the district. There are some thousands of native Christians of the Romish persuasion, descended from the offspring of the union of Portuguese with native women. The district of Fureedpore passed to the East-India Company by the grant of Shah Alum, emperor of Delhi, in 1765. Fureedpore, the locality of the civil establishment, Hobigunge and Juffergunge, the principal places, are noticed under their respective names in the alphabetical arrangement.

FUREEDPORE.—The principal place of the British district of the same name, situate on the right or south-west side of the Ganges, here called the Podda. According to Heber, "The huts of the natives are in no compact village, but scattered thinly up and down a large and fertile extent of orchard-garden, and paddy (rice) ground." There seems to be little more to be said of Fureedpore, and that little not of the most creditable character, it having formerly been a noted resort of river pirates, who made the navigation of this part of the river very hazardous ; but the evil has in a great measure ceased since the place has become the locality of the principal government establishments of the district. Here are various buildings for the accommodation of the different branches of the civil department. Distance from Dacca, W., 38 miles ; Calcutta, N.E., 115. Lat. $23^{\circ} 36'$, long. $89^{\circ} 50'$.

FUREEDUH, in the British district of Bolundshuhur, lieut.-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, situate on the right bank of the Ganges, 60 miles E. of Delhi. Lat. $28^{\circ} 33'$, long. $78^{\circ} 17'$.

FURRA.—A town in the native state of Gwalior, or possessions of Scindia, five miles from the right bank of the Parbutty river, and 113 miles S.W. from Agra. Lat. $25^{\circ} 57'$, long. $76^{\circ} 59'$.

FURRUCKABAD.—A British district, under the lieut.-gov. of the N.W. Provinces,

named from its principal place. It is bounded on the north by the British districts Budaon and Shahjehanpore ; on the east by the territory of Oude ; on the south by the British districts of Etawah and Cawnpore ; and on the west by Etawah and Mynpoore. It lies between lat. $26^{\circ} 46'$ — $27^{\circ} 43'$, long. $78^{\circ} 57'$ — $80^{\circ} 2'$, and has an area of 1,909 square miles. The general slope of the country is to the south-east, as indicated by the courses of the Ganges, Esun, and Rind, which run in that direction. The other rivers intersecting the district are the Kali Nadi and the Ramgunga. The south-western portion of the district is part of the crest or gentle elevation extending along the Doab at nearly an equal distance from the Ganges and the Jumna.

The soil varies a good deal in quality, much of that on the banks of the Ganges being khadir or maran, having a deep rich soil, saturated with moisture. The town of Imrutpoor, in this tract, is described as situate in a "country spread for many surrounding leagues with one sheet of luxuriant cultivation, interspersed with beautiful and ancient mango-trees. In the rainy season this rich and fruitful tract is scarcely habitable or passable, the whole country between the Ganges and Bareilly exhibiting one vast lake of water." Even in the driest part of the year, water may be obtained at a very small depth below the surface, and many ponds and watercourses occur. The most important crop on soil of this description is indigo, which is thought to be indigenous, being everywhere observable wild ; and the herb thus produced has been said to yield a finer dye than when cultivated. The culture is generally managed by the natives, who dispose of the crop to European capitalists for conversion into a marketable state, a process which is largely carried on in the town of Furruckabad. A considerable part of the country is very sandy and sterile, especially the northern, and there the soil is so little retentive of moisture, that it becomes perfectly dry a few hours after being drenched with rain ; yet assiduous culture, and judicious irrigation where water can be obtained from either streams or wells, clothe these unpromising tracts with good crops of grain, pulse, and tobacco. Where unimproved by human industry, the aspect of the country is dismal. In many places in the midland and southern parts of the district, the soil is fertile, producing fine wheat, barley, and pulse, and the crops of maize and sugarcane are so luxuriant and dense, as to attain a height of eight or ten feet, and exclude the rays of the sun. The southern part is so well wooded, as, when viewed from some distance, to have the appearance of a forest. Cotton and tobacco are grown chiefly for home consumption. Many vegetables of usual growth in Europe succeed well here, especially potatoes, which are so much esteemed, that they are sent to many other parts. The land revenue in this district has been fixed by the government for a term of years, and is not liable

to be increased until the year 1865. The population of this district is returned at 1,064,607; of which number, 695,567 are classed as Hindoo agricultural; 241,180 as Hindoo non-agricultural; 45,608 as Mohammedans and others, agricultural; and 82,252 as coming under the same general head, but non-agricultural. The Mussulmans are said to be descendants of the Patans or Afghans, who early in the last century established themselves in the tract extending between Oude and the Punjab, and have been reputed to retain some of the sanguinary and turbulent spirit characteristic of their ancestors. Lord Valentia describes the condition of society before the settlement of the district by the British authorities in gloomy terms:—"The state of the country was then most wretched. Murders were so frequent at Furruckabad, that people dared not venture there after sunset, and the workmen who came out to the cantonments always retired to their own houses during daylight." He adds, that seventy persons were in prison to be tried for murder. Tennant also, writing in 1798, complains hearing of the numbers and murderous outrages of the banditti of Furruckabad. Archer, writing thirty years later, and even after the establishment of British rule, says, "No peasant thinks of living out of the village in a cottage by himself: it would not be secure, and would certainly tempt to plunder and murder." Happily, a very different state now prevails. The district is not only tranquil, but prosperous. The recent revenue settlement, effected for a term of thirty years,—a period sufficient to afford opportunity for agricultural enterprise, without surrendering in perpetuity the just rights and interests of government,—has been extended to this district, in common with other portions of the North-Western Provinces. Under it, the rights of all parties being defined and secured, industry is sure of its reward, and consequently flourishes. Honest labour has superseded lawless rapine as an occupation; and person and property are alike safe. The minuter advantages of civilization are in course of introduction, and efforts have been made to communicate to every class some measure of education. The progress of improvement is mainly attributable to the exertions of the late Mr. Thomason, while filling the office of lieutenant-governor of the North-West Provinces. "To him," says a late writer, "is due an improved executive administration, such as we have never had elsewhere in India." The principal routes in the district are—1. From west to east, from Agra to Mynpooree, whence one branch proceeds to Futteghur, and another (the grand trunk road from Calcutta to Delhi) to Cawnpore. 2. From Allyghur to Futteghur, and thence to Cawnpore. 3. From south-west to north-east, from Etawah to Futteghur, and continued thence to Bareilly. The East-Indian Railway intersects the southern quarter of the district. The principal places are Furruckabad, Chubramow, Imrut-poor, Allygury, Kunnoj, Khudaganj, Nawab-

ganj, Jalalabad, which will be found noticed in their proper places.

In the earlier part of the eighteenth century, the Rohilla Patans had established themselves in the tract comprised in the present district. In 1749, Ahmed Shah, of Delhi, urged by his vizier, marched thither, and confiscated the estates of the deceased ruler, who had just fallen in an unsuccessful war with the Rohillas. The country, with the exception of a small portion allotted to the support of the family of the late prince, was bestowed on the vizier, from whom, however, it was wrested by Ahmed Khan, brother of the former ruler, who forthwith proceeded to invade Oude. Expelled from that territory, though not without difficulty, Ahmed sought refuge in the hills, but on his submission was restored to Furruckabad, with a revenue of sixteen lacs of rupees. After being occupied by various classes of adventurers, it appears, however, to have reverted to the vizier of Oude, who, in 1801, transferred his claims to the East-India Company. In 1802 the Company assumed actual possession of Furruckabad, liquidating the claims of the tributary Patan nawaub by a fixed monthly stipend of 9,000 rupees, in addition to which, an annual sum of nearly 180,000 rupees was bestowed in pensions and charitable allowances to his dependants. In 1804, Holkar, at the head of a great body of cavalry, the number of which has been estimated at 60,000, ravaged this tract, and, flying before the British army under Lord Lake, was surprised at the town of Furruckabad, and having lost 3,000 men, the remainder were so reduced by desertions and other causes, that not above half their number ever rejoined the standard of their leader: the loss of the British was only two dragoons killed, and about twenty wounded. In their march to overtake the enemy, and in the pursuit subsequent to the route, the British traversed a distance of above seventy miles in twenty-four hours.

FURRUCKABAD, the principal place of the district of the same name, in the N.W. Provinces, is situate between two and three miles west of the right bank of the Ganges; its Patan founders, from their exclusive addiction to military pursuits, attaching no value to the facilities afforded by the great river, navigable upwards for nearly two hundred miles, and downwards to the ocean. Furruckabad is rather a handsome town, and considered healthy, though many of the streets are shaded by trees, a circumstance usually considered to have in India a tendency to produce malaria. Its population is returned at 56,300 persons. The healthiness of the place may be owing, in a great degree, to its cleanliness, a point more attended to here than in most Indian towns; and the width of the streets and squares no doubt contributes towards this good end. The trade is considerable, and the banking business especially is extensive and important. The surrounding country being fertile and well cul-

tivated, provisions are abundant and excellent. In the town is a mud fort, built as a residence for the nawaub, on a considerable height, commanding extensive views of the Ganges and of the surrounding country. The commercial importance of this town was marked by its having a mint, the coinage of which circulated extensively, especially throughout the North-Western Provinces. The issue continued down to the year 1824, the value of the Furruckabad rupee being to the Sicca rupee as fifteen to sixteen. The British military cantonment of Futtygurh is three miles east of the town, and on the right bank of the Ganges. The elevation of Furruckabad is probably about 570 feet above the sea. It lies twenty miles to the right of the great north-western route from Calcutta to Delhi, by the new line, and distant N.W. from the former 660 miles, S.E. from the latter 160, N.W. from Lucknow 95, E. from Agra 90. Lat. 27° 24', long. 79° 40'.

FURRUCKABAD.—A town in the British district of Maldah, lieutenant-gov. of Bengal, 16 miles S.W. of Maldah. Lat. 24° 49', long. 88° 4'.

FURRUCKNUGGUR.—A petty Mahomedan chieftainship, comprising a few villages, situate on the south-east corner of the native state of Jhujhur. On acquiring supremacy in the Delhi territory, the British government found Mozuffer Khan in possession of the jaghire, and his rights were respected in the subsequent grant of Jhujhur to the Buraitch family. The chief bears the title of nawaub. The centre of the estate is in lat. 28° 24', long. 76° 52'. Its area is about twenty-two square miles. The population, assuming the average of the adjacent territories, may be estimated at 4,400. The nawaub maintains a small military force of twenty-five infantry.

FURUKNUGUR, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a town on the route from Delhi to the town of Meerut, and 14 miles N.E. of the former. It is situate on the right bank of the Hindun, here crossed by ford from two to two and a half feet deep, and in an open and partially-cultivated country. Lat. 28° 44', long. 77° 26'.

FUTEHGUNGE (WESTERN), in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a town on the route from Bareilly to Moradabad, and 12 miles N.W. of the former. It is a thriving and populous village, and has a bazar and market, and is abundantly supplied with water from wells. Here, in 1796, the Rohilla Patans were defeated by a British force under Sir Robert Abercrombie. Within view of the action were about thirty thousand native troops, in the service of the nawaub of Oude, ostensibly an ally of the East-India Company; but they kept aloof until the British, after suffering very severely, totally routed their adversaries, when their treacherous auxiliaries rushed in and seized the greater part of the spoil. The cavalry of the British army fled on the first

charge of the Patans, who, taking advantage of the opening thus made, got into the rear, and cut to pieces six companies of infantry, but ultimately fell before the unshaken courage of the survivors. Ramsay, the commander of the cavalry, who showed the example of flight, saved himself from the punishment due to his delinquency by taking refuge in America, and ultimately was employed by Napoleon in his commissariat. The East-India Company raised a monument to those of their troops who fell in the action. "It is of obelisk form, and stands on a small mound, the only elevation in this vast plain, on which point of vantage the enemies' guns were ranged, and afterwards taken. The names of fourteen British officers are recorded on the 'storied stone;' among whom were three commanding officers of regiments. Within a stone's throw of this plain and simple monument, rises the carved and minaretted tomb of two illustrious Rohilla chiefs, who fell in the action." A collection of dwellings, the extension of the contiguous village of Petoura, and which were the immediate scene of the conflict, has received the appellation of Futehgunje, or "Victory Market." Lat. 28° 28', long. 79° 24'.

FUTEHGUNJE (EASTERN), in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a town on the route from the town of Bareilly to Shahjehanpore, and 23 miles S.E. of the former. It is situate near the right bank of the river Bhagul, and close to a noble grove of mango-trees, covering between twenty and thirty acres, but is a poor, insignificant place, surrounded by a ruined mud wall, in which, however, are two handsome brick gateways. It has a small bazar, and is well supplied with excellent water. The town was founded by Shujahuddawlat, the nawaub of Oude, in commemoration of a victory which, gained by the British army in 1774, gave him possession of a large portion of Rohilcund. It is probable that the battle was not, however, fought on the site of the present Futehgunje, but at Tessunah, about four miles north-west of it, and marked as a battle-field, with crossed swords, in Rennell's Bengal Atlas. The engagement is sometimes called the battle of Cutterah or Kuttra, from a town three miles to the south-east of Futehgunje. The successive conflicts in an action so obstinately contested, probably took place in localities at a considerable distance from each other. Hafiz Rahmat Khan, the Rohilla commander, was described to Heber "as a noble old warrior, with a long grey beard, who led his cavalry on in a brilliant style against the allied armies. When his nobles, at the head of their respective clans, either treacherous or timid, gave way, he remained almost alone on a rising ground in the heat of the fire, conspicuous by his splendid dress and beautiful horse, waving his hand, and vainly endeavouring to bring his army back to another charge, till, seeing that all was lost, he waved his hand once more, gave a shout, and

galloped on the English bayonets. He fell, shot through and through." Colonel Champion, who commanded the British, had his body wrapped in shawls, and sent with due honour to his relatives. Futehgunje is in lat. $28^{\circ} 4'$, long. $79^{\circ} 42'$.

FUTEHPOOR, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Cawnpore to that of Futehgurh, and 25 miles S.E. of the latter. Lat. $27^{\circ} 5'$, long. $79^{\circ} 53'$.

FUTEHPOOR, in the Baree Doab division of the Punjab, a town situated on the right bank of the Ghara river, 50 miles S.E. of the town of Mooltan. Lat. $29^{\circ} 41'$, long. $72^{\circ} 10'$.

FUTHABAD, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of Futhabad, is situated on the right bank of the Jumna. Lat. $27^{\circ} 2'$, long. $78^{\circ} 22'$.

FUTEHPOOR SIKRI, in the British district of Agra, a town on the route from the city of Agra to Jeypore, and 23 miles W. of the former. The place in its present state is an expanse of ruins, inclosed by a high stone wall, about five miles in circuit, and having battlements and round towers. This space is divided by a hilly ridge of considerable elevation, running nearly from south-west to north-east, and extending beyond the inclosure five or six miles on each side. The scene of desolation is the more awful, as Akbar commenced those structures as late as 1571; and the fury of victorious enemies, principally Mahrattas, has in the comparatively brief interval reduced them to their present shattered or prostrate state. The most striking object at present is the great mosque, still in tolerable repair. The aspect of the great front is southwards, "crowning the principal height, and overlooking the low country, the face of its walls terminating in a gigantic causeway, surmounted with domes and minarets. From a distant position, the effect of this enormous structure is to cause the hill on which it stands to dwindle into a mere hillock; but when the traveller arrives at its base, and can estimate the magnitude of the building by that of the eminence on which it is exalted, his admiration is raised to wonder and awe at the startling height to which it rises." The height of the gateway, from the pavement to the summit of the interior outline, is 72 feet, and to the exterior summit, 120. The gateway is reached by a flight of steps of almost unrivalled magnificence; but these are becoming dilapidated, the periodical rains, which sweep down the slope of the hill, annually loosening some and dislodging others, so that, if requisite repairs be not attended to, in a few years the whole of this superb portal must become a heap of shapeless ruins. The interior, to which this noble entrance leads, is a quadrangle nearly 500 feet square, and all around which runs a very lofty and majestic cloister, into which opens a range of cells,

intended probably as lodges for dervishes, or for pilgrims. In this quadrangle, and to the left of the entrance, is a large mosque, surmounted by three fine domes of white marble, and opposite the entrance, the tomb of Shekh Selim Cheestee, a Mussulman ascetic, whose intercession by prayer to heaven Akbar had implored, that the imperial couch might be blessed by the birth of a son. The prayer was considered to be answered by the timely birth of a prince, named Selim, in honour of the Shekh, and subsequently emperor of Hindostan, under the name of Jehangir. The outline of the tomb is a square of forty-six feet, the material white marble, elaborately carved with much taste, in a florid style. The sarcophagus containing the body is inclosed within a screen of marble, carved into lattice-work and inlaid with mother-of-pearl. Numbers of women repair to this place to pray at the tomb and implore the saint's intercession in their favour. There is also within the inclosure another tomb of elaborate workmanship, represented to contain the remains of several members of Akbar's family. To the westward of the great inclosure are the massive ruins of the palace. The stables form a long and wide street, with a portico on each side fifteen feet deep, supported with carved stone pillars in front, and roofed with enormous slabs of stone, reaching from the colonnade to the wall. The whole hill on which the palace stands bears marks of terraces and gardens, to irrigate which an elaborate succession of wells, cisterns, and wheels, appears to have been contrived adjoining the great mosque. Numerous other great and remarkable ruins are everywhere scattered over the extensive inclosure of the ancient ramparts of the town. A huge and massive gateway is particularly worth notice, on account of two figures of "astonishing elephants," of the natural size, carved in stone with admirable skill and truth. At no great distance is a tower, forty or fifty feet high, built, according to local report, of elephants' tusks, but actually of composition, moulded and enamelled into a resemblance of those natural substances. Outside the town, and to the north of the hills on which it is built, is the ruined embankment, extending a circuit of twenty miles, and formed by Akbar to dam up the torrent Khari. A lake was thus made, and on its margin was built an amphitheatre with high minarets. Abulfazi continues: "The amphitheatre is used for the game of chowgong; and here also are exhibited the elephant-fights." The wide extent inclosed by the ruined wall of this favourite city of the greatest of the monarchs of Hindostan is now overspread with "ruined houses and mosques, interspersed with fields cultivated with rice and mustard, and a few tamarind-trees." The surrounding country is fine, and its character shows the good taste of Akbar, who chose it as the scene of his gorgeous seclusion. "The scene [from the top of the great gateway] is indeed a lovely one, extending over an immense tract of country, the

horizon of which is on all sides thirty miles distant from the beholder on a clear day, such as that which we enjoyed. The low line of hills upon which the place is built is seen creeping through the whole face of the level country from east to west, crowned every here and there with ruined buildings, or a hill fortress. Among these Bhurtপুর is just visible. On the opposite side is the Jumna, winding through the distance, and leading the eye to the glittering, though far-off, towers and domes of Agra. The middle distance is richly wooded, and thickly spotted with ruins of every age, and in every style of design." The town, though so ruinous, has at present a good bazar, and is at all times abundantly supplied with good water from wells and tanks. Population 5,949. Lat. $27^{\circ} 6'$, long. $77^{\circ} 44'$.

FUTICKCHERRY.—A town in the British district of Chittagong, lieut.-gov. of Bengal, 23 miles N. of Chittagong. Lat. $22^{\circ} 40'$, long. $91^{\circ} 54'$.

FUTI PANJAL, a mountain in Kashmir, is one of that range which bounds the valley to the southward. According to the estimate of Vigne, its height must exceed 12,000 feet, as its summit rises above the lake Kosah Nag, which has that elevation. Its name signifies the mountain of victory. Its culminating ridge in some measure resembles the arc of a circle, the extremities of which are east and west, and the northern or concave part directed towards Kashmir. Its total length is about forty miles. Lat. $33^{\circ} 34'$, long. $74^{\circ} 40'$.

FUTTEABAD.—A town in the native state of Gwalior, or possessions of Scindia, 134 miles N.W. from Hoosungabad, and 12 miles S.W. from Oojein. Lat. 23, long. $75^{\circ} 40'$.

FUTTEGHUR.—A fort built by the Sikhs, during the prevalence of their sway, to command the eastern end of the Khyber Pass. It is situated a mile N.E. from Jamrood, and being close to the entrance of the pass, has great command over it. The defences consist of a square of 300 yards, protecting an octagonal fort, in the centre of which is a lofty mass of buildings commanding the surrounding country. The supply of water from the mountain-streams is liable to be cut off by the hostile Khyberes of the adjacent hills. In the hope of providing a remedy for this inconvenience, the Sikhs sunk a well 200 feet deep, but without reaching water. Lat. $34^{\circ} 2'$, long. $71^{\circ} 25'$.

FUTTEGURH.—A town in the Rajpoot native state of Kishengurh, 72 miles S.W. from Jeypoor, and 35 miles S.E. from Ajmeer. Lat. $26^{\circ} 10'$, long. $75^{\circ} 10'$.

FUTTEHABAD, in the British district of Hurreana, lieut.-gov. of the N.W. Provinces, on the route from Hansee to Bhutneer, and 40 miles N.W. of the former. Lat. $29^{\circ} 30'$, long. $75^{\circ} 25'$.

FUTTEHABAD, in the British district of Huriana, lieut.-gov. of the N.W. Provinces,

a town on the route from Hansee to the Punjab, 41 miles N.E. of the former. Lat. $29^{\circ} 29'$, long. $75^{\circ} 38'$.

FUTTEH ALLY, in the Reechna Doab division of the Punjab, a town situated on the left bank of the Chenaub river, 72 miles W. of the town of Lahore. Lat. $31^{\circ} 44'$, long. $72^{\circ} 57'$.

FUTTEHGURH, in the British district of Bhutteana, lieut.-gov. of the N.W. Provinces, a town on the route from Bhawalpoor to Ferozpoor, 51 miles S.W. of the latter. Lat. $30^{\circ} 27'$, long. $73^{\circ} 59'$.

FUTTEHJUNG, in the Sinde Sagur Doab division of the Punjab, a town situated 24 miles from the left bank of the Indus, and 29 miles S.E. of the town of Attock. Lat. $33^{\circ} 35'$, long. $72^{\circ} 39'$.

FUTTEHPOOR, in the British district of Etawah, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawah to Calpee, and 33 miles S.E. of the former. Lat. $26^{\circ} 30'$, long. $79^{\circ} 28'$.

FUTTEHPCOR.—A town in the British district of Mymensing, lieut.-gov. of Bengal, 212 miles N.E. of Calcutta. Lat. $24^{\circ} 36'$, long. $90^{\circ} 58'$.

FUTTEHPOOR, in the Rajpoot territory of Shekawuttee, a town held by a thakoor or baron of the country, whose annual income, according to Tod, is 64,000 rupees. The town is surrounded by a low weak rampart of stone, but the fort is rather strong, and has a roomy interior, defended by lofty ramparts, a fausse-braie, and a ditch of masonry. This was a prosperous and important place during the life of Rao Raja Luchman Singh, who resided here; but since his death it has been much deserted. Water is brackish and scarce, being drawn from wells ninety feet deep. Distance W. from Delhi 145 miles, N.W. from Jeypoor 90, E. from Bikaner 105. Lat. $27^{\circ} 58'$, long. $75^{\circ} 5'$.

FUTTEHPOOR.—A town in the territory of Oude, 21 miles N.E. from Lucknow, and 96 miles S.E. from Furruckabad. Lat. $27^{\circ} 8'$, long. $81^{\circ} 18'$.

FUTTEHPOOR.—A town in the Rajpoot state of Kerowly, 84 miles S.E. from Jeypoor, and 69 miles S.W. from Agra. Lat. $26^{\circ} 37'$, long. $77^{\circ} 12'$.

FUTTEHPOOR, under the lieut.-gov. of the N.W. Provinces, a British district named from its principal place. It is bounded on the north-east by the Ganges, which divides it from the kingdom of Oude; on the east by the British district of Allahabad; on the south-west by the Jumna, dividing it from the British districts Humeerpore and Banda; and on the north-west by the British district of Cawn-pore. It lies between lat. $25^{\circ} 25'$ — $26^{\circ} 18'$, long. $80^{\circ} 12'$ — $81^{\circ} 23'$, and has an area of 1,583 square miles. The whole district is comprised within the tract called the Doab, and the two large rivers the Ganges and the Jumna, which

bound it on two sides, afford extensive means of inland navigation. The Rind or Urrund, a small river, passes into this district from that of Cawnpore, over the north-western boundary, and, flowing by the town of Korah, holds a course nearly southerly for thirty miles, finally falling into the Jumna on the left side. The Etawah branch of the Ganges Canal will also pass over the north-western boundary into this district, from that of Cawnpore, and, holding a south-easterly course for about fifteen miles, will join the Jumna about twenty miles below the town of Humeerpore.

The climate can differ little from that of southern Oude, situate on the other side of the Ganges, and at the same elevation. According to Butler, the climate of that country is characterized by great dryness, and wide range of variation in the thermometer, which sometimes rises to 112° , at others falls to 28° ; the mean daily range being about 30° , and the mean temperature 74° . Heber states, that in 1824, the year in which he passed through this district, no rain had fallen as late as the beginning of October. The statement is, however, made on report, and not on personal observation. As the physical circumstances of the district are so nearly similar to those of southern Oude, the reader may refer to the article on that country for further information. The soil is fertile, and in seasons not afflicted by drought, well repays the tiller's care. Von Orlich, whose journey took place in the beginning of March, observes, "Its peculiar freshness in this dry season was very remarkable. It is a boundless garden, in which sugarcane, indigo, cotton, poppy, wheat, barley, and many vegetables flourish. Beautiful groves of mangoes, tamarinds, and bananas overshadow the village pagodas, mosques, and tanks, and give an ever-varying beauty to the landscape, which is animated by pilgrims, peasantry, travellers on foot and horseback, heavily-laden carts, and camels. Altogether, this district presents one of the most original and picturesque scenes of Indian life." It may be inferred that this part of India has been much benefited by British rule, as Tennant, who travelled through it in 1798, describes it as then a melancholy waste, though exhibiting in its ruined towns, tanks, seracs, and other scattered works of utility, memorials of former prosperity. Under the existing revenue settlement of the North-Western Provinces, the government demand on the lands of this district has been fixed for a term of years, and is not liable to be increased until the year 1870. The population is officially returned at 679,787, of which number the Hindoos form by far the larger proportion; viz., 364,159 agricultural, and 248,278 non-agricultural; while the Mussulmans amount only to 28,006 agricultural, and 39,344 non-agricultural. The number of towns containing less than 1,000 inhabitants, is 1,247; those containing more than 1,000 and less than 5,000, are 145; four towns contain more than 5,000; and there is one con-

taining upwards of 10,000; making a total of 1,397. The principal towns—Futtehpore, Korah, Kudjooa or Cujwa, Hatgang, and Huswa—are noticed under their respective names in the alphabetical arrangement. The great trunk road from Calcutta to Delhi and the northern Doab, by Allahabad, proceeds through this district, in a direction from south-east to north-west, passing through the town of Futtehpore. From this last town a route proceeds south-westward by Chillatara Ghat to Banda; another westward to Calpee. The route from Cawnpore to Banda by Chillatara Ghat passes through the north-western part of the district in a direction from north to south. The district is also traversed by the East-Indian Railway.

The tract in which this district is comprised, was conquered, in 1194, by the Afghan Mussulmans, under Shahabuddin Muhammad, ruler of Ghuznee. These invaders so well established their power in this quarter, that they were able to offer an obstinate resistance to Baber, whose son Humayon they expelled, under the conduct of Sher Shah. After Akbar removed the seat of government to Agra, the adjacent part of the Doab became of great political importance, and in 1659, Aurungzebe and his brother Shuja met in conflict for sovereignty and life at Kudjooa or Cujwa, twenty miles north-west of the town of Futtehpore. After a sharp action, Shuja was routed, with the loss of 114 pieces of cannon, and the entire dispersion of his army. By treaty dated 16th August, 1765, between the East-India Company and Shuja ud Dowlah, the nawab of Oude, this part of the Doab was assigned to the emperor of Delhi, the fourth article providing, that "the king, Shah Allum, shall remain in full possession of Cora, and such part of the province of Allahabad as he now possesses, which are ceded to his majesty as a royal demesne for the support of his dignity and expenses." Shah Allum having in 1772 given up to the Mahrattas his claims on these provinces, that step was regarded by the British authorities as amounting to a forfeiture, and they agreed by treaty of the 1st May, 1775, that this tract should remain in the possession of the nawab of Oude, in as full a manner as the rest of his dominions. Finally, by treaty of the 10th November, 1801, the nawab re-conveyed it to the Company, in commutation of the subsidy which he had stipulated to pay for the defence of his territory.

FUTTEHPORE.—The principal place of the district of the same name, a town on the route from Allahabad to Cawnpore, 70 miles N.W. of the former, and 50 S.E. of the latter. It has a spacious serae or lodge for travellers, built of brick, which Heber describes as a "large court, with two gateways opposite to each other, surmounted by towers not unlike those of a college, with a cloister or veranda all round, raised about a foot from the ground,

with a pukka (baked brick) floor, and having little fireplaces contrived against the wall, just large enough to hold the earthen pitchers in which all the cookery of the country is carried on; and behind this a range of small and dark apartments, a step lower than the veranda." Contiguous to the serae is a well-supplied bazar. Futtchepore is a large and thriving town, with a population of 20,864 persons. It has some good houses, and a small but very elegant mosque, built by the nephew of Almas Ali Khan, a eunuch, the minister of the nawaub of Oude, 'armour of the revenues of the Southern Doab, and "of nearly half of the province of Oude" at the close of the last century and commencement of the present. The environs are crowded with burial-places. Tieffenthaler, writing a century ago, describes it as having a long street, and formerly populous, but at that time much decayed. At its north-east side was a mud fort, of quadrangular outline, with a round tower at each corner. In the Ayeen Akbery, its revenue is stated to be 72,317 rupees. Here is the chief seat of the civil establishment of the district, consisting of a judge, collector, deputy-collector, and other functionaries. In the military distribution, Futtchepore is within the Benares division, and a detachment of infantry is usually stationed here. The Arabic word fath, forming part of the name, shows that it must have been given subsequently to the overthrow of the Hindoos by the Afghan Mussulmans, under Shahabuddin, in the year 1194. The place was certainly in existence previously to the invasion of this region by Baber, as it is mentioned by him. Supplies and water may be had here in great abundance, and the road in this part of the route is good. Distance N.W. from Calcutta 571 miles, and from Allahabad 76; S.E. from Cawnpore 48, from Delhi 267. Lat. 25° 57', long. 80° 54'.

FUTTIHPOOR, in the Baree Doab division of the Punjab, a town situated on the left bank of the Ravee river, 92 miles S.W. of the town of Ferozepoor. Lat. 30° 50', long. 73° 5'.

FUTTOOHA, or **FUTWA**, in the British district of Patna, lieutenant-gov. of Bengal, a town at the confluence of the Poonpoo with the Ganges, and on the right bank of each river. The Poonpoo is here crossed by "a very long and handsome bridge." It is on the route from Berhampoor to Dinapore, 272 miles N.W. of former, 21 E. of latter. It has a large bazar, and contains 2,000 houses, with a population estimated at 12,000. The Ganges here is considered especially sacred, and at certain times of the year vast multitudes assemble and bathe here. Futwa is 10 miles S.E. of Patna, 21 S.E. of Dinapore; from Calcutta N.W., by Berhampore, 390. Lat. 25° 30', long. 85° 22'.

FUTTUNPOOR, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the can-

tonment of Allyghur to that of Futtcheghur, and 20 miles N.W. of the latter. Lat. 27° 28', long. 79° 24'.

FUTTYGUNGE, in the territory of Oude, a town on the route by Nanamow ghat or ferry from Etawah to Lucknow, eight miles W. of the latter. It has a bazar, and is supplied with water from wells. Lord Valentia, who passed through this place in 1803, describes it as tolerably populous, and consisting of a street, inclosed by a wall of trifling height, and having at each end a gateway, the gates of which were broken. It was built by Shuja ud daulah, nawaub vizier of Oude, in commemoration of a victory gained over the Rohillas; and hence the name. Lat. 26° 48', long. 80° 49'.

FUTTYGURH, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a military cantonment on the left bank of the Ganges, crossed here by ferry, and three miles E. of the city of Furruckabad. Tieffenthaler describes it as consisting, in his time, about a century ago, of two parts. It is now of somewhat less importance than during the period from the first establishment of the cantonment, in 1777, to the beginning of the present century, when the dubious political relations of the East-India Company with the state of Oude, and the proximity of the Marhatta power under Perron, required considerable military resources to be promptly available in this part of India. It is a favourite station with the military, being healthful, and abundantly supplied with a variety of excellent provisions at a cheap rate. The consequence of this station is likely to be increased on the completion of the projected branch of the Ganges Canal, which, issuing from the main channel on the left side, a little north of Meerut, is continued for the distance of 170 miles to Futtighur. There is a church at this place. Holcar, in the course of his incursion into the Doab in 1804, attacked the town, burned the cavalry stables and the officers' bungalows, and was proceeding to attack the defences, when the arrival of the British, and his consequent defeat, drove him into precipitate flight. The cantonment is 25 miles to the E. of the great route from Calcutta to Delhi, and 703 miles N.W. of the former, 184 S.E. of the latter. Elevation above the sea 550 feet. Lat. 27° 22', long. 79° 41'.

FUTTYPOOR, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town 20 miles S. of the south or left bank of the river Nerbudda, and on the Union, a small stream tributary to that river. Its site is picturesque, among the low hills forming the southern boundary of the valley of the Nerbudda, and it is a place of some importance, as three petty Gond rajas or chiefs reside there. Distant from Saugor cantonment 80 miles. Lat. 22° 38', long. 78° 38'.

FUTWA.—See **FUTTOOHA**.

FYZABAD, in the British district of Saharunpoor, lieutenant-gov. of the N.W. Provinces, a village in lat. $30^{\circ} 19'$, long. $77^{\circ} 38'$.

FYZABAD, called also **BANGLA**, in the district of Pachamrat, territory of Oude, a town on the right bank of the Ghoghra, here a great and navigable river, expanding in some places in the rainy season to the breadth of a mile and a half, and crossed at the Rai ghat by ferry. Fyzabad, and the ruins of the ancient Ayodha or Oude, adjoining it on the south-east, extend ten miles along the right bank of the river, and for a distance of two miles from it. Saadat Ali Khan, first nawaub vazir of Oude, and who may be considered the founder of this town, about the year 1730 built here a palace, and adjoining to it laid out a handsome garden, in the Persian style. It was further embellished by his successors Sefdar Jang and Shujah ud daulah with various buildings and pleasure-grounds. The latter enlarged the market-place, strengthened the fort with a wall, a ditch, and round towers, and collected so great a population, that it became a great city. Subsequently, however, on his acquisition of a large part of Rohilkund, he removed the seat of government to Lucknow. This took place in 1775, and since that time Fyzabad has much decayed, the present population consisting almost exclusively of the lower and more indigent classes, the leading men, merchants, bankers, and others, having transferred their residence to Lucknow. The tide of emigration, which is represented as constantly increasing, is accelerated by the exactions practised on the inhabitants. Everything brought into the town is heavily taxed. The chief manufactures at present are cloth, metal vessels, and arms. The population is estimated by Butler at 100,000, but is fast diminishing, from the numbers of those who seek an asylum from oppression, in the Company's territories, or wherever else peace and security may be enjoyed. The military route from Goruckpore cantonment to that of Lucknow passes through this place, crossing the river Gogra by ferry at the Rai ghat, where are usually many boats. To the west of the town is an encamping-ground. Distant E. from Lucknow 89 miles, N. from Allahabad 95. Lat. $26^{\circ} 47'$, long. $82^{\circ} 10'$.

FYZEPOOR.—A town in the British district of Candeish, presidency of Bombay. Some very elegant and expensive houses, belonging to native bankers and cotton-merchants, have of late years been built in this town. Lat. $21^{\circ} 11'$, long. $75^{\circ} 53'$.

G.

GADHWALA, in the Rajpoot state of Bikaner, a village on the route from Ratun-gurh to the town of Bikaner, and nine miles E. of the latter. It contains forty houses, supplied with very good water from a well 270 feet deep. Lat. $27^{\circ} 57'$, long. $73^{\circ} 30'$.

GAIGHAT, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a petty market-town on the small river Manaura, on the route from the cantonment of Goruckpoor to that of Sultanpoor, in Oude, 49 miles S.W. of the former, 61° N.E. of the latter. The number of its houses is stated by Buchanan at 115, which, allowing six persons to each house, would give a population of 690. Lat. $26^{\circ} 35'$, long. $82^{\circ} 47'$.

GALAOTI, or **GOLAUTTI**, in the British district of Boolundshuhur, lieutenant-gov. of the N.W. Provinces, a town on the route from Allyghur to the town of Meerut, and 29 miles S. of the latter. It has a bazar. Lat. $28^{\circ} 36'$, long. $77^{\circ} 51'$.

GALKOT.—A town in the native state of Nepal, on the left bank of a branch of the Gunduck river, and 142 miles N.W. from Khatmandoo. Lat. $28^{\circ} 18'$, long. $83^{\circ} 7'$.

GALNA.—See **JALNA**.

GANDARACOTTAH.—A town in the British district of Tanjore, presidency of Madras, 195 miles S.W. of Madras. Lat. $10^{\circ} 36'$, long. $79^{\circ} 5'$.

GANDAREE.—A town in Hyderabad, or territory of the Nizam, 78 miles N.W. from Hyderabad, and 180 miles S.E. from Jaulnah. Lat. $18^{\circ} 24'$, long. $78^{\circ} 10'$.

GANEROW.—A town in the Rajpoot state of Godwar, 108 miles S.W. from Nusserabad, and 78 miles S.E. from Jodhpoor. Lat. $25^{\circ} 16'$, long. $73^{\circ} 36'$.

GANESPOOR, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a small town on the river Koyane. According to Buchanan, it contains 200 houses, and consequently, allowing six persons to each, a population of 1,200. Part is surrounded by a rampart of earth. Distant W. from Goruckpoor cantonment 38 miles. Lat. $26^{\circ} 48'$, long. $82^{\circ} 48'$.

GANGAMEIK.—A village in Arracan, situate on the left bank of the Arracan river. Lat. $20^{\circ} 21'$, long. $93^{\circ} 5'$.

GANGAROWL, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a town 20 miles S.E. of the cantonment of Allyghur. Lat. $27^{\circ} 41'$, long. $78^{\circ} 18'$.

GANGES.—A celebrated river of India, and of which the Bhageerettee is generally and popularly regarded as the remote feeder. The distinction of originating the great mass of waters subsequently termed the Ganges was some years since proposed to be accorded to the Jahnui, a stream which joins the Bhageerettee in lat. $31^{\circ} 2'$, long. $78^{\circ} 55'$. It was then believed that the Jahnui took its rise from the north of the culminating range of the Himalayas, within the limits of Chinese authority. This supposition turns out, however, to be erroneous. It has been since ascertained that the remotest source of the Jahnui is situate in British territory, on the southern base

of the before-mentioned range; and in reference to this discovery, Captain Strachey, to whom its merit is due, contends that the Ganges should be considered to originate in the most distant tributary of the Aluknunda (a feeder of the Ganges having a larger volume of water than the Bhageerettee). But as the distance between the ascertained source of the most remote tributary of the Bhageerettee and the point of confluence of the latter river with the Aluknunda is still believed to be fully equal to the distance between the source of the Doulee, to which the Aluknunda owes its commencement, and the same point of confluence, there seems no reason for depriving the sacred stream of the Hindoos of its ancient title; and it is therefore proposed in this article to regard the Bhageerettee as the true Ganges. The Bhageerettee first comes to light near Gangotri, in the territory of Gurwhal, in lat. $30^{\circ} 54'$, long. $79^{\circ} 7'$, issuing from under a very low arch, at the base of a great snow-bed, estimated to be 300 feet thick, which lies between the lofty mountains termed St. Patrick, St. George, and the Pyramid, the two higher having elevations above the sea, respectively, of 22,798 and 22,654 feet, and the other, on the opposite side, having an elevation of 21,379. "From the brow of this curious wall of snow, and immediately above the outlet of the stream, large and hoary icicles depend. They are formed by the freezing of the melted snow-water at the top of the bed; for in the middle of the day the sun is powerful, and the water produced by its action falls over this place in cascade, but is frozen at night." As in Brahminical mythology, the Ganges is said to flow from the head of Mahadeva or Siva, a Hindoo who attended the English party by whom this place was explored, expressed his belief that these icicles must be the hair of the deity. On the 31st May the mean breadth of the stream was found to be twenty-seven feet; the mean depth was estimated at fifteen inches. From this spot, which has an elevation of 13,800 feet, the stream holds a direction north-west for ten miles to Gangotri, where the mean breadth, on the 26th May, was found to be forty-three feet, the depth eighteen inches, and the current very rapid. On the 2nd June the stream was ascertained to be two feet deep, and wider than previously observed. The elevation of Gangotri is 10,306 feet, and the average descent of the river thereto, from the place where it emerges from the snow-bed, is 350 feet per mile. From Gangotri the Bhageerettee holds a course nearly north-west to Bhairogati, in lat. $31^{\circ} 2'$, long. $78^{\circ} 54'$, the point of confluence with the Jahnvi, holding its steep and foaming course from the north-east. The latter is considerably the larger river. The distance is seven miles from Gangotri to Bhairogati; and as this latter place has an elevation of 8,511 feet, the average descent of the river in this part of its course is 255 per mile. The united stream holds a course first westerly,

and then south-westerly, for thirteen miles, as far as Sookhee, in lat. $30^{\circ} 59'$, long. $78^{\circ} 45'$, where it may be said to "break through the Himalaya Proper." The elevation of the waterway is here 7,608 feet, and consequently, the descent of the stream from the confluence is on an average seventy feet per mile. From Sookhee the river holds a very sinuous but generally a south-westerly course for about thirty-six miles, to Utal, in lat. $30^{\circ} 43'$, long. $78^{\circ} 25'$, where it turns nearly southward for about fifteen miles more to Surota, in lat. $30^{\circ} 33'$, long. $78^{\circ} 24'$. It thence takes a direction south-east, and, at a distance of nine miles, in lat. $30^{\circ} 28'$, long. $78^{\circ} 29'$, receives, on the left side, the Julkar, a considerable torrent flowing from the north-east; and eight miles lower down, on the same side, at Teeree, in lat. $30^{\circ} 23'$, long. $78^{\circ} 31'$, the Bhilling, another tributary of considerable size, also flowing from the north-east. The elevation of the waterway at this confluence is 2,278 feet, and the average descent of the river from Sookhee thereto is seventy-eight feet per mile. Continuing to flow south-east for twenty-two miles, it is, at Deoprag, in lat. $30^{\circ} 8'$, long. $78^{\circ} 39'$, joined on the left side by the Aluknunda, a large stream formed by the union of the Vishnoo and the Doulee. The Aluknunda is a larger river than that whose volume it contributes to swell, bearing to it the proportion of three to two. The elevation at the point of this confluence is 1,953 feet; and consequently the average descent of the river from Teeree to it is fifteen feet in the mile. From Deoprag, the united stream, now called the Ganges, flows southwards eight miles, to Nougaoon, in lat. $30^{\circ} 8'$, long. $78^{\circ} 38'$, where, on the left side, it receives the Nyar, a considerable stream flowing from the south-east. From this confluence the river holds a course very sinuous, but generally westerly, for twenty-four miles, to Rikkee Kasee, in lat. $30^{\circ} 6'$, long. $78^{\circ} 23'$, where it touches upon the Dehra Dhoon. Rikkee Kasee having an elevation of 1,377 feet, the fall of the river to that place from Deoprag is on an average eighteen feet per mile. In its passage between the Dehra Dhoon and the province of Kumaon, it receives, opposite the village of Kankur, in lat. $30^{\circ} 2'$, long. $78^{\circ} 19'$, on the right bank, the Sooswa, a considerable stream, draining the valley, down which it flows in a south-easterly direction. This is the only stream of importance which falls into the Ganges on the right side, from the confluence of the Jahnvi to this part of its course, though it receives numerous small torrents on that side. Its descent by the Dehra Dhoon is rather rapid to Hurdwar, in lat. $29^{\circ} 57'$, long. $78^{\circ} 14'$, a distance from Rikkee Kasee of fifteen miles, in a south-westerly direction. The elevation of Hurdwar is 1,024 feet; consequently, the average descent of the river in passing the Dehra Dhoon is twenty-three feet per mile. The volume of water discharged at Hurdwar when the river is lowest is estimated at 7,000 cubic feet per

during the dry season. Like other rivers subject to periodical inundations, the water of the Ganges carries down earth in a state of suspension. The amount of solid matter in bulk in proportion to the quantity of water, is, according to laborious observations and calculations made by the Rev. R. Everest, as follows:—During the rainy season $\frac{1}{15}$ th part, or about two cubic inches in a cubic foot; during the winter five months, $\frac{1}{30}$ th part; and during the rest of the year, $\frac{1}{75}$ th part; and following out his data, this writer concludes the total annual discharge of earthy matter to be 6,368,077,440 cubic feet in bulk. The total extent of inland navigation connected with the Ganges is not ascertainable with any degree of accuracy, but is unquestionably very large, and will be considerably increased on the completion of the works now in progress for facilitating the irrigation of the Doab by means of the Ganges Canal, and at the same time adding to the means of water-transit. The first idea of a plan of irrigation for the Doab originated as long since as the time of Lord William Bentinck, by whose orders some steps were taken for ascertaining its practicability; but, upon inquiry, the project did not appear capable of being successfully carried out. Under Lord Auckland the inquiries were resumed, the importance of the subject having been painfully pressed upon the notice of government by the occurrence of severe famine in the districts which the proposed works were designed to benefit. A magnificent plan for irrigation and navigation was laid down by Captain Cautley, comprising a main trunk line, running from the town of Hurdwar, through the centre of the Doab, with a connecting line to Cawnpore, as the inlet and outlet for navigation; the tracts of country lying between the different rivers which run into the Jumna and Ganges being irrigated by branches, extending the benefits of this fertilizing process to every village in the Doab. This project was subsequently referred to a committee of engineer and artillery officers for examination and report. Their testimony was highly favourable. The only serious difficulty to the execution of the project was presented by the tract of low land through which the drainage of the Solani river runs before its junction with the Rutnoo. Two methods of surmounting this were suggested: one by an aqueduct; the other by diverting the line so as to cross the Solani and its tributaries by means of dams. The latter was recommended by its being presumed to be less costly; but the former plan, deemed far better in every other point of view, was finally adopted. An account of this magnificent aqueduct will be found under the article "Solani River." The Ganges Canal is now rapidly advancing to completion. The main line has been constructed from Hurdwar to the vicinity of Allyghur, whence it diverges in two channels, one to Cawnpore, and the other to Humeerpoor, *via* Etawa, with three offsets, designated the Futtehbhur, Bolund-

shuhur, and Coel branches. The total length of the canal with all its branches will measure about 810 miles.

	Miles.
Hurdwar to Allyghur.....	180
Allyghur to Cawnpore	170
Allyghur to Humeerpoor	180
Branch to Futtehbhur	170
Ditto to Bolundshuhur	60
Ditto to Coel	50
	<hr/>
	810

The total cost is estimated at a million and a half sterling. No inconvenient diminution of the navigable facilities of the Ganges is anticipated from the abstraction of the larger portion of its waters at Hurdwar for the purposes of the canal, inasmuch as no such result has taken place on the Jumna, where the whole apparent stream has been diverted to feed the two canals diverging from that river. Notwithstanding this, the under-current which percolates the gravelly or sandy bed, together with the drainage of the intermediate country, furnishes a navigable stream of water at Agra, a distance of 290 miles by the river's course; and it is thence inferred that the navigation of the Ganges below Cawnpore will not be injuriously affected; while the navigation above will be carried on by means of the canal. It may be observed, that the discharge of the Ganges at Hurdwar, the place at which it emerges from the hills, is in the dry season in proportion to that of the Jumna as seven to three, the discharge of the Ganges being estimated at 7,000 cubic feet per second, and that of the Jumna at the canal heads at about 3,000.

GANGLUNG.—See GANTUNG.

GANGOONDOUM.—A town in the British district of Madura, presidency of Madras, 274 miles S.W. of Madras. Lat. $9^{\circ} 28'$, long. $78^{\circ} 47'$.

GANGOOROO.—A town in the native state of Gurhwal, on the right bank of the Tonsé river, and 60 miles N.E. from Dehra. Lat. $31^{\circ} 9'$, long. $78^{\circ} 23'$.

GANGOTRI, in the native state of Gurhwal, a small temple on the right bank of the Bhageerettee, as the Ganges is called in the upper part of its course, and eight or ten miles N.W. of its source. The river here expands a little, and on the bank of a small bay or inlet the temple is built, about fifteen feet above the water. It is in a small inclosure, surrounded by a wall of unhewn stone, cemented with lime-mortar, and has close to it, and in the same inclosure, a small comfortable house, built for the officiating Brahmins. The temple is a square building, about twenty feet high, and contains small statues of Ganga, Bhagirathi, and other mythological personages, supposed to be connected with this locality. There is no village here, the pilgrims having no other shelter than a few sheds of wood, and caves in the adjoining cliffs. There are

several pools, called by the names Brahmakund, Bishnukund, and others of corresponding import. Ablution in these is considered an important part of the ritual to be observed by pilgrims who visit this spot, considered popularly to be the source of the Ganges, as farther progress up the stream is generally, though erroneously, regarded as impracticable. Though this ablution, with due donations to the officiating Brahmans, is considered to cleanse from all offences, the number of pilgrims is not considerable, in consequence of the great length and ruggedness of the journey, and the difficulty of obtaining subsistence by the way. Flasks and similar vessels are filled at Gangotri with the sacred water of the stream, and being sealed by the officiating Brahmin, are conveyed to the plains, where they are highly prized by the superstitious. Gangotri is below the upper limit of forests; cedars growing here, though to no great size, and birch-trees thriving remarkably. The mean breadth of the Bhageerettee or Ganges here was ascertained by Hodgson, on the 26th of May, to be forty-three feet, the depth eighteen inches, the current very swift, and over rounded stones. On the 2nd of June following, he conjectured its volume to be doubled, in consequence of the rapid melting of the snow. Rennell's account of Gangotri would scarcely have been expected from one who usually displays so much information and judgment. "This great body of water [the Ganges] now forces a passage *through* the ridge of Mount Himmaleh, at the distance possibly of 100 miles below the place of its first approach to it, and sapping its very foundations, rushes through a cavern, and precipitates itself into a vast basin, which it has worn in the rock at the hither foot of the mountains. The Ganges thus appears to incurious spectators to derive its original springs from this chain of mountains, and the mind of superstition has given to the mouth of the cavern the form of the head of a cow." The Brahmin who showed the holy places to Fraser, ridiculed the fancy that the stream issued from a rock like a cow's mouth. Herbert estimates the length of course of the Bhageerettee or Ganges, from its source near Gangotri to its entrance on the plains of Hindostan, at about 203 miles. The elevation of the temple above the sea is 10,319 feet. Lat. 30° 59', long. 78° 59'.

GANGPORE.—A petty raj within the territory superintended by the political agent for the south-west frontier of Bengal. It is bounded on the north by the British district of Chota Nagpore; on the east by the native state of Bonei; on the south by that of Samba and the British district of Sumbulpore; and on the west by the native states of Ryghur and Jushpore. It extends from lat. 21° 50'—22° 37', and from long. 83° 31'—84° 57', and is ninety miles in length from east to west, and thirty-five in breadth, with an area of 2,493 square miles. The latest available

reports give a very unfavourable account of the state of the country, which is little better than a great jungle, giving shelter to vast numbers of wild animals, and affording admirable sport to the hunter. The soil is naturally rich, but there is little cultivation, and not even the semblance of any administration of justice. The annual revenue was supposed to be about a lac of rupees (10,000*l.*), and the British tribute, which is only 500 rupees, was regularly paid. The prince, at the date of the report, though a young man, was sunk into that condition of sloth and imbecility which almost invariably results from indulgence in opium. The population is believed to be about 112,000. Gangpore, the principal place, is in lat. 22° 3', long. 84° 43'.

GANISCOTTEE.—A town in Hyderabad, or territory of the Nizam, 85 miles N.E. from Hyderabad, and 204 miles S.E. from Ellichpore. Lat. 18° 32', long. 78° 53'.

GANJAM.—A British district under the presidency of Madras, named from the town formerly its principal place. It is bounded on the north-west, north, and north-east, by the territory of Orissa; on the south-east by the Bay of Bengal; on the west by the British district of Vizagapatam; and lies between lat. 18° 13'—19° 52', long. 83° 50'—85° 15'. The area is stated officially to be 6,400 square miles. The seacoast, commencing at the estuary of the Naglaudi Nadi, or Chicacole river, is bold and rocky, and is marked by a range of rugged hills, running in some parts close to the shore; in others, nearly parallel to it, but a few miles inland. Those near the northern extremity of the coast recede gradually from it, and leave space for an extensive sandy plain, partly occupied by the jhil or lake of Chilka, lying between this district and that of Cuttack, and separated from the sea for many miles by a long narrow strip of sand, seldom more than three hundred yards in breadth. Though coasting vessels may enter the river Rasikoila, in lat. 19° 22', long. 85° 8', there is throughout the whole extent of coast no haven for ships of any considerable burthen, which, if trading to places on any part of it, must anchor abreast of them in the open sea. The streams of the district flow from the western hills, and hold a course south-eastward, falling into the Bay of Bengal. The principal are, the Naglaudi or Chicacole river, the Callingapatam river, and the Rasikoila; but all, without exception, are mere torrents, which are dry for a part of the year. The jhil or lake of Chilka, the greater part of which lies within the limits of the British district of Cuttack, touches part of the northern frontier of this district. It is about forty-two miles in length from north to south, and fifteen in breadth; of small depth, its greatest not exceeding six feet, while in most parts it has not more than four. During the hot season, and the close of the rainy one, agues and fevers of very bad type are common; and in

1815 these diseases carried off such great numbers, both of the European and native population, of the town of Ganjam, that the civil and military establishments were removed to Chicacole; and the former place has since been nearly deserted. The level country is in general extremely fertile, producing abundant crops of rice, sugarcane, maize, millet, pulse of various kinds, oil-seeds, and raji (*Eleusine coracana*); while the hilly country yields wax, lac, guma, dye-stuffs, arrowroot, and great variety of timber and ornamental woods. Cotton is produced annually to a considerable extent; and the local demand is such as to leave scarcely any for exportation. The only manufactures of importance are coarse cotton cloths and muslins, which last were formerly in high esteem and extensively manufactured, but are not now produced to the same extent, on account of the diminished demand consequent on the irresistible competition of British fabrics. The population is given under the article MADRAS PRESIDENCY. The former prevalence, and recent suppression of human sacrifices in a part of Ganjam, are briefly noticed in the article GOOMSOOR. Ganjam occupies the northern portion of the territory known as the Five Circars, the possession of which was an object of fierce contention between the French and English about the middle of the last century. They were obtained by the former in 1753, and continued under their dominion for six years, when Clive transferred them to the East-India Company, to whom they were formally ceded in 1765, by the emperor of Delhi. Chicacole, the principal place of the district, Ganjam and Russelkondah, the towns of note within the district, are described under their respective names in the alphabetical arrangement. The great route from north-east to south-west, from Calcutta to Madras, runs through the whole length of the district parallel to the seacoast, and generally at a short distance from it. The construction of a macadamized road from Berhampore to Russelkondah has been authorized, at the estimated cost of 14,224*l*.

GANJAM, in the British district of the same name, presidency of Madras, a town on the left side of the Kosiakola Nuddee, immediately above its fall into the Bay of Bengal. This town, formerly remarkable for its fine buildings, is now much decayed, the fort and cantonments being in ruins, and the place nearly deserted, in consequence of a deadly epidemic fever, which, in 1315, carried off great numbers of the inhabitants, both Europeans and natives. The civil and military stations were then removed to the town of Chicacole. The insalubrity of the situation has, it is said, passed away; but the establishments which formerly caused its prosperity have not been restored. It has still, however, some coasting trade by means of the river. Distance direct from Chicacole, N.E., 110 miles; Vizagapa-

tam, N.E., 165; Madras, N.E., 536; Cuttack, S.W., 90; Calcutta, S.W., 315. Lat. 19° 23', long. 85° 7'.

GANJBUR, in the British district of Paneesput, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Delhi to Kurnal, and 16 miles S.E. of the latter. Lat. 29° 29', long. 77° 2'.

GANTUNG PASS, in Bussahir, over a range of mountains on the north-eastern boundary, between Koonawur and Chinese Tartary. Jacquemont describes it as a vast opening between summits which overtop it about a thousand feet. The highest part of the pass is covered with perpetual snow. To the west, a declivity extends towards the distant Sutluj, with a surface sloping gradually, but inexpressibly rugged. Gerard crossed the pass at the end of July, amidst falls of snow and sleet, which lasted all day, yet so mild was the temperature, comparatively with the enormous elevation, that the thermometer did not sink below 33°. The Rishi Gantung, a snowy peak rising above the pass, has been ascertained trigonometrically to have an elevation of 21,229 feet above the sea; that of the pass itself is 18,295 feet. Lat. 31° 38', long. 78° 47'.

GAOMUTEE, in Kumaon, a river rising on the eastern declivity of the peak of Budhan Garh, and in lat. 30°, long. 79° 36'. It holds a course, generally south-easterly, through an extensive valley or elevated plain, remarkably level, and above ten miles in diameter. This expanse is fertile, wooded, though not densely, and well watered by the numerous feeders of the Gaomutée; but though having an average elevation of above four thousand feet above the sea, it is extremely unhealthy, from some cause as yet unascertained. The Gaomutée, after a course of about twenty miles, joins the Surjoo, a feeder of the Kalee, at Bagesur, in lat. 29° 49', long. 79° 49'.

GAPELONG.—A village in Arracan, situate on the left bank of the river distinguished by the same name. Lat. 20° 48', long. 93° 7'.

GAR.—A town in the Rajpoot state of Boondee, 73 miles S.E. from Nusseerabad, and 74 miles S. from Jeypoor. Lat. 25° 52', long. 75° 52'.

GARAHUNG.—A town in the native state of Nepal, near the left bank of the Gunduck river, and 102 miles N.W. from Khatmandoo. Lat. 27° 57', long. 83° 41'.

GARAKOTA, in the British territory of Sangor and Nerbudda, a town, situate in the angle formed by the confluence of the rivers Sonar and Guddari. The fort is at the apex of the angle, and is of irregular ground-plan, being washed on two sides by the confluent streams. In October, 1818, the town was held by a garrison for the raja of Nagpore or Berar, and being invested by a British force under General Watson, in a few days a prac-

licable breach was made, and the place surrendered. Distant 25 miles E. of Saugor, 206 S.W. of Allahabad. Elevation above the sea 1,345 feet. Lat. 23° 47', long. 79° 12'.

GARASPOOR, in the territory of Gwalior, or possessions of Scindia's family, a town on the route from Hosungabad to Saugor, by Bhilsa, 88 miles N.E. of former, 49 S.W. of latter. The town has a small fort of masonry on its south-east side, and a tank east. There are some antique buildings, having elaborate sculptures, in the fine sandstone of the neighbouring hills. Lat. 23° 40', long. 78° 10'.

GAR GUNSA.—A town in the native state of Cashmeer, or territory of Gholab Singh, 177 miles N.E. from Dehra, and 185 miles N.E. from Simla. Lat. 32° 10', long. 80° 4'.

GARHA, in the district of Sultanpoo, territory of Oude, a fort on the right bank of the Goomtee, 14 miles S.E. of Sultanpoo cantonment, 106 S.E. of Lucknow. It was, in a remote period, built by a sovereign of Oude, of the Bhar race, a low caste of Hindoos, and the stone used in its construction was, according to tradition, brought by water from Nepal. It early fell into the hands of the Patan invaders of Hindostan, who destroyed the upper part of the walls, leaving them standing to the height of eight or ten feet. The ruined portion has been restored, partly in brick, partly in mud. Part of the stone wall rises from the bed of the Goomtee, and exhibits many sculptures, as well as inscriptions, some in the Nagari, some in the Persian character, relating the history of the place. Lat. 26° 10', long. 82° 19'.

GARIADHAR, in the peninsula of Kattywar, or territory of the Guicowar, a town in the district of Gohilwar, in a fertile tract, well watered, but indifferently cultivated. Distance from Ahmedabad, S.W., 125 miles; Baroda, S.W., 120; Surat, N.W., 90; Bombay, N.W., 195. Lat. 21° 31', long. 71° 31'.

GARI SADA KHAN, in the Sinde Sagur Doab division of the Punjab, a town situated near the left bank of the Kishengunga river, 74 miles N.E. of the town of Attock. Lat. 34° 20', long. 73° 28'.

GAROBIR.—A town in the native state of Nepal, on the left bank of the Jimru river, and 200 miles N.W. from Khatmandoo. Lat. 28° 5', long. 82° 5'.

GAROTHA, or **GUROTA**, in Bundelcund, a small town on the route from Banda to Gwalior, 78 miles W. of the former, 126 S.E. of the latter. It has a bazar, and water is plentiful. Lat. 25° 35', long. 79° 22'.

GAROWKE, or **KAROWKE**.—A halting-place on the great Aeng route (Arracan), and situate at the foot of Natyagain. The ascent is very steep, but the path being carried in a zigzag manner, the labour is thereby lessened. The encamping-ground is good, and well sup-

plied with water. Elevation 3,165 feet. Lat. 20° 2', long. 94° 5'.

GARREE.—A town in the British district of Hydrabad, in the province of Sinde, presidency of Bombay, 63 miles S.E. of Tatta. Lat. 24° 18', long. 68° 51'.

GARROW HILLS.—This group, situate on the north-eastern frontier of the Bengal territory, extends over a tract of country bounded on the north by Goalpara; on the east by the Cossyah hills; and on the south and west by Mymensing. The chief divisions, with the statistical particulars of each, as far as they can be ascertained, are as follows. The Garrows contain by estimation an area of 2,268 square miles; Ram Rye, 328; Nurtung, 360; Mariow, 283; Molyong, 110; Mahram, 162; Osimla, 350; Kyrim and the domains of various petty chiefs, 486. The population of the whole is given at 65,205. The character of the country is wild, as is also that of the people. For some years past the just and liberal policy of the British government has secured the general prevalence of tranquillity; but in 1852 it was deemed necessary to depute Lieutenant Agnew into the Garrow Hills to inquire into a local disturbance.

GAR YARSA.—A town in the native state of Cashmeer, or dominions of Gholab Singh, 202 miles N.E. from Simla, and 177 miles N.E. from Dehra. Lat. 31° 49', long. 80° 29'.

GASULPOOR, in the British district of Saugor and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Jubbulpore to Rewah, 16 miles N.E. of the former. Lat. 23° 20', long. 80° 10'.

GAUR, or **LUCKNOUTI**.—A ruined city in the British district of Maldah, presidency of Bengal. It is situate on a range of inconsiderable eminences, extending along the east or left bank of the Bhagruttee, a watercourse formerly the main channel of the Ganges, but now containing a small portion only of its stream. The best description of this vast monument of the industry and resources of India at a remote period is that given by Rennell, who visited the place. "Taking the extent of the ruins of Gour at the most reasonable calculation, it is not less than fifteen miles in length (extending along the old bank of the Ganges), and from two to three in breadth. Several villages stand on part of its site; the remainder is either covered with thick forests, the habitations of tigers and other beasts of prey, or become arable land, whose soil is chiefly composed of brick-dust. The principal ruins are a mosque, lined with black marble elaborately wrought, and two gates of the citadel, which are strikingly grand and lofty. These fabrics, and some few others, appear to owe their duration to the nature of their materials, which are less marketable, and more difficult to separate, than those of the ordinary brick buildings, which have been, and continue to be, an article of merchandise,

and are transported to Moorshedabad, Mauldah, and other places for the purposes of building. These bricks are of remarkably solid texture, and have preserved the sharpness of their edges and smoothness of their surfaces through a series of ages. The situation of Gour was highly convenient for the capital of Bengal and Bahar as united under one government, being nearly central with respect to the populous parts of those provinces, and near the junction of the principal rivers that compose that extraordinary inland navigation for which those provinces are famed; and, moreover, secured by the Ganges and other rivers on the only quarter from which Bengal has any cause of apprehension."

Gaur is probably a place of great antiquity; the researches of Wilford, however, do not appear to establish it as of any great importance until A.D. 648, when its chief became independent, on the fall of the previously paramount sway of Magadha. The chiefs of Gaur from that time were powerful, until the reign of Lakshmana, from whom it probably received the name of Lucknouti, by which it is frequently mentioned in history. In 1202 the city was taken, and Lakshmana driven into flight, by Bakhtiar Khilji, a commander subordinate to Kutbuddin Aibak, viceroy of Delhi, for Shahabuddin, monarch of Ghor, in Afghanistan. It in A.D. 1212 was made the capital of the kingdom of Bengal, by Ghiyasuddin, who built there a fine mosque, a college, a caravanserai, and made numerous embankments to protect the city against inundations. About a century and a half later, the seat of government was transferred to Pundua or Peruya, but restored to Gaur in 1409, by Jalaluddin. Nasir Shah, in 1450, surrounded it with the vast rampart of which the extent may still be traced. In A.D. 1536, Sher Shah, the Patan rival of Humayun, having overrun Bengal, took Gaur, and drove its king, Mahmood, into flight, but was himself, the year after, dispossessed by Humayun, who resided for some months in the city, and changed its inauspicious name of Gaur to Jennetabad. He, however, found it necessary to retreat to the western part of his dominions, and his rival, Sher Shah, took possession of the city. After the death of Sher Shah, the governors of Bengal assumed the style of independent rulers of that country, until 1574, when Mouaim Khan, in command of the troops of Akbar, subjugated it, and made it the seat of local government, but in a few months perished, with nearly all his troops, by the effects of the pestilential climate. From that period commenced the ruin of the city, and on the acquisition of the country by the British, soon after the middle of the eighteenth century, Maldah, and subsequently English Bazar, became the seats of government of the province. Gaur is distant from Burhampoor, N., 61 miles; from Calcutta, by Burhampoor, 179; Rajmahal, S.E., 25. Lat. 24° 55', long. 88° 8'.

GAURA.—A town in the native state of Nepal, on the right bank of a branch of the San Coos river, and 55 miles E. from Khatmandoo. Lat. 27° 45', long. 86° 10'.

GAWILGURH, in Hyderabad, or dominions of the Nizam, a stronghold on the southern declivity of the range of mountains bounding the valley of the Taptee to the south. It consists of two forts, one of which, fronting the north, where the rock is inaccessible, is defended by an outer fort, that entirely covers it to the north and west. All the walls are very strong, and rendered more formidable by bastions and towers. It is a post of considerable importance, as it commands a route much frequented across the mountains from south to north. Its strength is greatly increased by the extreme difficulty of transporting guns of sufficient calibre into commanding positions. Gawilgurh was taken by storm in 1803, by the British troops under Colonel Stevenson. Distance from Nagpoor, W., 114 miles; Ellichpoor, N.W., 15; Aurungabad, N.E., 170; Bombay, N.E., 340; Hydrabad, N., 290. Lat. 21° 20', long. 77° 23'.

GAYAH.—A town, the principal place of the British district of Behar, lieut.-gov. of Bengal. It consists of two parts, one the residence of the priests and of the population connected with them; the other, the quarters of the great bulk of the population. This last, the name of which was originally Elahabad, was much enlarged by Law, and thence denominated Sahibgunj. The streets in Sahibgunj are wide, straight, and have on each side a row of trees, between which is a road for carriages, with a footway on each side. The town is well laid out, but the houses are for the most part merely mud-built huts, though there are a few brick-built, having neat gardens. There is an hospital, principally for the relief of sick or wounded pilgrims. The old town of Gayah, which is inhabited by the priesthood and their retainers, "is a strange-looking place, and its buildings are much better than those of Sahibgunj, the greater part of the houses being of brick and stone, and many of them having two or even three stories. The architecture is very singular, with corners, turrets, and galleries projecting with every possible irregularity." From this style of building, and the elevated site, the appearance of this portion of the town from a distance is picturesque, but on entering it, the streets are found crooked, narrow, and uneven, and withal so filthy, as to be with difficulty passable. The town and its vicinity abound in shrines and places of pilgrimage, the visits of votaries to which are attended with heavy charges, some persons of high rank having been known to expend 4,000*l.* or 5,000*l.* each. The torrent Phalgu is considered a holy stream, and ghats, or flights of stone stairs, give access to the water, for the purpose of ritual ablution. The best-built and most revered structure is the Vishnupod, a building in an elaborate style of architecture, eighty-

two feet in length, and surmounted by an octagonal pyramid about 100 feet high. It was built at a cost of 30,000*l.* by Ahalya Bai, a superstitious Mahratta princess of Indore. The number of pilgrims annually has been estimated at 100,000, though in some years there have been double that number. Between the two towns, on an area once called the Ramna or Game Preserve, is the British civil establishment, consisting of the ordinary European and native functionaries. Buchanan estimated the number of houses at the time of his visit, early in the present century, at 6,400; which, according to the usually admitted ratio of inmates, would give the amount of population at about 32,000 persons. A considerable enlargement of the town, and a proportional increase of its inhabitants, appears to have subsequently taken place, a late return giving the number of houses at 9,165, and the population at 43,451. Gayah is distant 55 miles S. of Patna, 265 N.W. of Calcutta. Lat. $24^{\circ} 48'$, long. $85^{\circ} 4'$.

GAZEEPOOR KHASS, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a town on the route from Allahabad to Humeerpore, 73 miles N.W. of the former. Lat. $25^{\circ} 48'$, long. $80^{\circ} 50'$.

GEEABOONG, in Bussahir, a village of the district of Koonawur, is situate in the valley of Ruskulung, and near the right bank of the river Darbung. The site is pleasant, at the north-eastern base of a wooded eminence, and in a dell inclosed by mountains covered with perpetual snow. The population consists of about twenty families of lamas. Elevation above the sea 9,200 feet. Lat. $31^{\circ} 47'$, long. $78^{\circ} 29'$.

GEEDHORE, or GIDHOUR, in the British district of Bareilly, division of Pilleebheet, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to Petragurh, and 48 miles N.E. of the former. Lat. $28^{\circ} 49'$, long. $79^{\circ} 56'$.

GEEDUR GULLEE, in the province of Peshawur, is a pass between Peshawur and Attock, and has received its name—*The Jackal's Pass or Neck*, from its being so extremely narrow, that the natives, in exaggeration, say that a jackal only can make its way through it. The defile is not more than ten or twelve feet wide, and is bounded on each side by rather high and rugged hills. Though much frequented, it does not appear to be regarded as important in a military point of view, probably from the facility with which it can be turned. It is five miles N.W. of Attock. Lat. $33^{\circ} 56'$, long. $72^{\circ} 12'$.

GEEDWAS.—A town in the British district of Purneah, lieutenant-gov. of Bengal, 64 miles N.E. of Bhagulpore. Lat. $26^{\circ} 4'$, long. $87^{\circ} 25'$.

GEELATULLEE.—A town in the British district of Silhet, lieutenant-gov. of Bengal, 74 miles W. of Gowhatty. Lat. $25^{\circ} 5'$, long. $91^{\circ} 39'$.

GEERWAH, or GIRWAH, in the British district of Banda, lieutenant-gov. of the N.W. Provinces, a small town or village on the route from the town of Banda to Rewa, 11 miles S. of the former. Lat. $25^{\circ} 19'$, long. $80^{\circ} 27'$.

GEESGURH.—A town in the Rajpoot state of Jeypoor, 56 miles E. from Jeypoor, and 128 miles S.W. from Delhi. Lat. $26^{\circ} 52'$, long. $76^{\circ} 49'$.

GEHOON, in the Rajpoot state of Joudpore, a village on the route from Pokhurn to Balmer, and four miles N. of the latter place. It lies at the eastern base of a small range of rocky hills, dividing the Great from the Little Desert. The road in this part of the route is sandy and uneven. Lat. $25^{\circ} 50'$, long. $71^{\circ} 20'$.

GEIRAH, or GIRA, in Gurhwal, a village in the valley watered by the Bunal, and about five miles above its confluence with the Jumna. It is pleasantly situate on the southern declivity of a mountain, and contains about a dozen houses and 100 inhabitants. Lat. $30^{\circ} 52'$, long. $78^{\circ} 15'$.

GENORI, or GUNOURI.—A town with a fort, in the British district of Boolundshuhur, lieutenant-gov. of the N.W. Provinces, 55 miles S.E. of Delhi. Lat. $28^{\circ} 20'$, long. $78^{\circ} 4'$.

GEORGE GURH, in the jaghire of Jhujhur, lieutenant-gov. of Agra, a small fort built by the adventurer George Thomas during his temporary dominion over this part of India. Here, in 1801, Thomas was attacked by the Mahrattas, and being driven into the fort, was there closely invested. His officers now advised unconditional surrender, but Thomas determined, if possible, to effect a retreat to Hansi. Quitting his camp accordingly, at the head of a small body of cavalry, he fell in with a party of the enemy, who attacked him with vigour, and his men, dispirited by constant defeat, giving way on all sides, he made his escape with difficulty to Hansi, the scene of his final discomfiture. Georgegurh is in lat. $28^{\circ} 38'$, long. $76^{\circ} 37'$.

GEORGE TOWN.—See PRINCE OF WALES ISLAND.

GERAPOORUM.—A town in Hyderabad, or territory of the Nizam, on the left bank of the Godavery river, and 150 miles N.E. from Hyderabad. Lat. $18^{\circ} 28'$, long. $80^{\circ} 29'$.

GEROLA, on the south-western frontier of Bengal, a town in the native state of Phooljee, 50 miles W. from Sumbulpore, and 92 miles S.E. from Ruttunpore. Lat. $21^{\circ} 18'$, long. $83^{\circ} 7'$.

GEROLI, or GURROWLEE, in Bundelcund, a jaghire or feudal grant named after its principal place, which is situate in lat. $25^{\circ} 5'$, long. $79^{\circ} 24'$. "It is stated to comprise fifty square miles, to contain eighteen villages, with a population of 5,000 souls, and to yield a revenue of 15,000 rupees. The jagheerdar (feudatory) maintains forty horse and 100 foot." The sunnud, or grant of the jaghire from the East-India Company, is dated 1812.

GEROLI, in Bundelcund, the principal place of the jaghire or feudal grant of the same name, a town on the right bank of the river Dhasan, 80 miles S.W. of Calpee. Lat. $25^{\circ} 5'$, long. $79^{\circ} 24'$.

GERWARA, or **GIRWAR**, in Bundelcund, a village on the route by Rewa from Allahabad to Saugor, 123 miles N.E. of the latter. Elevation above the sea 1,216 feet. Lat. $24^{\circ} 31'$, long. $80^{\circ} 29'$.

GEYGLAH, or **GIGELLA**, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to the cantonment of Aligurh, and 17 miles N. of the former. Lat. $27^{\circ} 22'$, long. $78^{\circ} 6'$.

GEYLA.—A river rising in Kattywar, in lat. 22° , long. $71^{\circ} 20'$, and, flowing in an easterly direction, falls into the Gulf of Cambay, in lat. $21^{\circ} 47'$, long. $72^{\circ} 13'$.

GHAGUR, or **GHUTGARH**, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a lofty mountain, forming the most southern brow of the Himalayan system, and rising abruptly over the terai or marshy forest north of Pillebheet. It extends in a direction nearly from south-east to north-west, between lat. $29^{\circ} 14'$ — $29^{\circ} 30'$, long. $79^{\circ} 10'$ — $79^{\circ} 40'$; is about thirty-five miles in length, with an average breadth probably of ten or twelve. Though the most southern range of the great Himalayan system, and the most remote from the line of greatest elevation, it exceeds in height some which intervene. The road from Almora to Moradabad passes by Ghagur fort, at the elevation of 7,121 feet above the sea. Budhan Dhoora, a summit of the same range, three or four miles to the north-west, has the elevation of 8,502 feet; Uraka Khan, five miles to the south-east, that of 7,366. The summit of Ghagur is crowned with a noble forest of cypress, toon, fir, and other timber-trees.

GHAIKOOL.—A town in the British province of Nagpoor, late territory of the rajah of Berar, on the right bank of the Wein Gunga river, and 103 miles S.E. from Nagpoor. Lat. $19^{\circ} 49'$, long. $79^{\circ} 48'$.

GHARA.—A town in the British district of Kurrachee, province of Scinde, presidency of Bombay, 22 miles W. of Tatta. Lat. $24^{\circ} 44'$, long. $67^{\circ} 39'$.

GHARA.—A stream in Sind, flowing by the village of the same name, and falling into a long creek opening into the Indian Ocean, ten miles east of Kurrachee. The mouth of the Ghara creek is in lat. $24^{\circ} 45'$, long. $67^{\circ} 12'$. As the country on each side of the Ghara is low, both westward, to the mouth of this creek, and also eastward, and the stream communicates with the Indus, it seems probable that a ship-canal might be formed to connect Kurrachee with the deep and wide part of the Indus, near Tatta. The country between the Ghara river and the port of Kurrachee, it is to be observed, is also low and suitable for the purpose.

GHARA.—The name by which the united streams of the Beas and Sutluj are known, from their confluence at Endreessa to the confluence with the Chenaub, in lat. $29^{\circ} 18'$, long. $71^{\circ} 6'$. The length of course between these points is about 300 miles. After the confluence last mentioned, the united streams are called the Punjnd. At the ferry of Hurekee, a short distance below the confluence of the Beas and Sutluj, Burnes found "the Ghara a beautiful stream, never fordable," 275 yards wide at the lowest season, and twelve feet deep, running at the rate of two miles and a quarter an hour. In the same locality Vigne found it 200 yards wide. It is remarkably direct in its general course, which is south-west, but tortuous at short intervals. In the lower part of its course, where it forms the boundary, it is a slow muddy stream, with low banks of soft alluvial earth, overflowed to the extent of several miles on occasion of the slightest swell. The confluence with the Chenaub takes place without any turbulence, in a low marshy tract, in which the channels of the rivers are continually changing. Each river is about 500 yards wide, and the united stream about 800 yards. The water of the Chenaub is reddish, that of the Ghara pale; and for several miles downwards, the difference of hue may be observed, the right side of the stream being of a red, and the left of a pale hue.

GHATAMPOOR, in the district of Bainswara, territory of Oude, a town three miles from the left bank of the Ganges, 45 miles S. of Lucknow, 22 S.E. of Cawnpore. Butter estimates the population at 4,000, including fifty Mussulmans. Lat. $26^{\circ} 16'$, long. $80^{\circ} 40'$.

GHATPILLY.—A town in Hyderabad, or territory of the Nizam, 97 miles N.E. from Hyderabad, and 100 miles S. from Chanda. Lat. $18^{\circ} 30'$, long. $79^{\circ} 22'$.

GHATTA.—A town in the Rajpoot state of Jeypoor, 45 miles S.E. from Jeypoor, and 104 miles S.W. from Agra. Lat. $26^{\circ} 38'$, long. $76^{\circ} 35'$.

GHATUMPOOR, in the British district of Cawnpore, the principal place of the pergunnah of the same name, a town on the route from Calpee to Pertabgurh, and 28 miles E. of the former. There is a small bazar. Lat. $26^{\circ} 9'$, long. $80^{\circ} 13'$.

GHAUTS (WESTERN).—An extensive range of mountains of Southern India. Their northern limit is the valley of the Taptee, of which a branch from the Syadree Mountains (as the upper part of the Western Ghauts is called by the natives) forms the southern inclosing range, about lat. 21° — $21^{\circ} 15'$, long. $73^{\circ} 45'$ — $74^{\circ} 40'$, and is connected with groups which diminish in height towards the east until they sink into the table-land of Berar. The northern side of the valley of the Taptee is inclosed by the Satpura range, having an elevation of about 2,000 feet above the sea. The Syadree range in this part consists of

trappean formations, which extend to the sea-coast, forming the rocks of Bombay and Salsette, and others in that vicinity. In lat. $21^{\circ} 10'$, long. 74° , this great range (the Western Ghats) turns south nearly at right angles to that which forms the south inclosing range of the valley of the Taptee. Its elevation increases as it proceeds southwards, and at Mahabulishwar, in lat. 18° , long. $73^{\circ} 40'$, is 4,700 feet above the sea. In this part, as elsewhere, the western declivity is abrupt, and its base depressed nearly to the level of the sea: on the eastern side, though generally undulating, or even rugged, it slopes gradually eastward towards the plains of Hyderabad. In respect to geological structure, it may be observed generally, that the great core of the Western Ghats is of primary formation, inclosed by alternating strata of more recent origin. These strata, however, have been broken up by prodigious outbursts of volcanic rocks, and from Mahabulishwar to their northern limit, the overlying rock of the Western Ghats is stated to be exclusively of the trap formation. The face towards the Concan is not uniformly precipitous, but consists of vast terraces with abrupt fronts, such a conformation being characteristic of this kind of rock. The scenery is delightful and grand, "displaying stupendous scarps, fearful chasms, numerous waterfalls, dense forests, and perennial verdure." "The Western Ghats," says Elphinstone, "present the charms of mountain scenery on a smaller scale" than the Himalayas; "but it is no exaggeration of their merits to say, that they strongly resemble the valleys of the Neda and the Ladon, which have long been the boast of Arcadia and of Europe." Chasms and breaks in the brows or the culminating ridges of the range, give access to the highlands, and are denominated ghats or passes, a name which has become generally applied to the range itself. The principal elevations between the eighteenth and nineteenth degrees of latitude, are Poorundhur, 4,472 feet; Singhur, 4,162; Hurrechundurghur, 3,894. In consequence of the boldness of the declivities and the precipitous character of the faces of the trap rocks, the summits in many parts of the range are nearly inaccessible. The natural strength of these portions has in many instances been increased by art, and the hill forts in all ages of Indian history have been regarded as the bulwarks of the Deccan. The trap formation terminates southward on the sea-coast, in about lat. 18° , and is succeeded by laterite, a ferruginous clay, easily cut when first raised, but by continued exposure to the atmosphere becoming hard as brick. This last-mentioned formation extends southwards as the overlying rock, almost without interruption, to Cape Comorin, covering the base of the mountains and the narrow slip of land that separates them from the sea. South of Mahabulishwar, and in latitude about 15° , the elevation diminishes, so as not to be more than 1,000 feet above the sea; the slopes are gradual, and the outlines

rounded. Still farther to the south, however, the elevation increases, and attains its maximum towards Coorg, where Bonasson Hill is said to be 7,000 feet above the sea; Tandianmole, 5,781; Pupagiri, 5,682. South of those elevations, the Ghats join the Neilgherry group by means of the Nedimula range, which forms the western outdress of the Neilgherry table-land to lat. $11^{\circ} 15'$, long. $76^{\circ} 25'$, where it rises into the lofty Kunda Mountains, and about twenty-five miles farther south terminates abruptly in high and nearly perpendicular precipices, forming the northern side of that great valley or depression, which, affording an uninterrupted communication in this latitude between the eastern and western sides of the peninsula, is bounded on the south by the extensive range of mountains of which Cape Comorin is the extremity. South of this valley, the mountains are described as lofty, and pouring down cascades of prodigious height. The width of this extensive gap, called the Palghat Valley, from the town of that name, is about twenty miles.

The length of the Western Ghats, from the northern extremity of the Syadree Mountains, forming the southern side of the valley of the Taptee, to the southern brow, joining the Kunda Mountains on the north side of the Palghat Valley, is about 800 miles. The mountains rising on the south side of Palghat Valley, and which may, with some latitude of expression, be called a continuation of the Western Ghats, have considerable elevation, a spacious table-land, being 4,740 feet above the sea, a peaked summit 6,000, another 7,000; and there are several peaks not measured, but judged by sight to have elevations not inferior. The length of the chain of mountains extending from Cape Comorin to the valley of Palghat is 200 miles. The western brow of the range is, with little exception, abrupt; on the eastern side of the culminating range, the declivity is in general gradual, the surface in many places being extensive table-land, sloping gently, and nearly imperceptibly, eastward. Such a conformation would seem to indicate a volcanic disturbance of the surface, the disruption taking place along the western precipitous face.

It has been supposed that the steep declivity of the Western Ghats on the seaward side, by presenting a vast front to the violence of the south-west monsoon, is instrumental in arresting and condensing the abundant moisture borne along by that formidable aerial current from the Indian Ocean, and that the excessive rains which fall in the Concan and in Malabar result from this cause. Such a conclusion, however, is at variance with the fact that Chill and Peru, similarly circumstanced with respect to the Pacific Ocean and the Cordilleras, are amongst the driest countries in the world,—a discrepancy the cause of which does not appear to have been explained. But it is not only the countries intervening between the mountains and the sea that are visited with so great

a superabundance of rain: the fall on the west brow of the Western Ghats is enormous, and perhaps unparalleled. At Mahabulishwar, in lat. 18° , long. $73^{\circ} 40'$, the mean annual fall of rain is 239 inches. There, however, during a considerable portion of the year, the weather is dry. Not so at Bednore, in lat. $13^{\circ} 49'$, long. $75^{\circ} 6'$, situate on the western verge of the table-land of Mysore, and near the western brow of the verge. There "nine rainy months in the year are usually calculated on, and for six of that number it is the practice in most families to make the same preparatory arrangements for provision (water only excepted) as are adopted for a ship proceeding on a six months' voyage." In consequence of this excessive moisture, the low tract between the Ghats and the sea is traversed by innumerable torrents, which, stagnating as they approach the coast, overspread the depressed levels, and form that extraordinary series of shallow lakes called by the British, Backwaters. The word Ghats, as already mentioned, is an appellation given by the British to the range which in its northern part is by the natives called Syadree, in its southern Sukhien.

GHAUTS (EASTERN).—A chain of mountains of Southern India, rising in the vicinity of Balasore, in about the same latitude as the Western Ghats on the opposite side of the peninsula. This chain may be traced in a south-westerly direction, a little to the west of Ganjam, and thence to Naggery Nose, about 56 miles N.W. of Madras, where it forms a junction with the range, "which sweeping irregularly inland, crosses the peninsula in a south-west direction by Chittore, Sautghur, and Salem, and joins the Western Ghats north of the Gap of Paulghautcherry." The direction of the Eastern Ghats, south of the point of junction with the transverse range, is marked at intervals along the coast of Coromandel by outliers and detached hills to a point within about twenty miles of Cape Comorin, where the Eastern and Western Ghats appear united. It is to be observed, however, that the point of junction between the two great ranges of Malabar and Coromandel is not unusually regarded as taking place at the Neigherries, "which, rising into the loftiest summits of the peninsula, form the southern boundary of the great table-land" of the Deccan. The average elevation of the Eastern Ghats is stated to be about 1,500 feet. With regard to geological structure, granite is said to constitute the basis of the whole range, and overlying the granite, gneiss, and mica-slate, that form the sides of the mountains, are occasionally found clay-slate, hornblende-slate, flinty slate, and primitive or crystalline limestone. The surface of the level country appears to consist of the debris of granitic rocks, as far north as the Pennar, in approaching which, the laterite or iron-clay formation expands over a large surface. From the Krishna northward, the granite is often penetrated by injected veins of trap and dykes of greenstone. Pass-

ing on to Vizagapatam and Ganjam, syenite and gneiss predominate, occasionally covered by laterite.

HAZEEODDEENINUGGUR, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a small town on the route from Delhi to Moradabad, and 18 miles E. of the former. It is surrounded by a weak wall, and situate on the left bank of the river Hindun, navigable for rafts and small boats from this place to the Jumna, a distance of thirty miles, but, notwithstanding this advantage, is much decayed. Lat. $28^{\circ} 40'$, long. $77^{\circ} 29'$.

HAZEEPOOR.—The principal place of the pergunnah of the same name, a town 10 miles N.E. of the left bank of the Jumna; 10 miles S.W. of the town of Futtehpour. Lat. $25^{\circ} 49'$, long. $80^{\circ} 48'$.

HAZEEPORE.—A British district under the lieutenant-gov. of the N.W. Provinces, and named from its principal place. It is bounded on the north-west and north by the British district Azimgurh; on the north-east by the great river Ghagra, separating it from the British district Sarun; on the south-east by the British district Shahabad; on the south partly by the British district Shahabad, partly by the British district Benares; and on the west by the British districts Benares and Jaunpore. It lies between lat. $25^{\circ} 17'—26^{\circ}$, long. $83^{\circ} 8'—84^{\circ} 40'$; is ninety-six miles in length from east to west, and forty in breadth. It embraces an area of 2,187 square miles. The principal rivers which skirt or traverse the district are the Ganges, Ghagra, Karamnassa, Tons, Bisu, and Manghi. The country on both sides of the Ganges slopes gently, probably in the degree of seven or eight inches in a mile, from north-west to south-east. In the eastern part of the district is one large piece of water, called Surbah Talao; and many hills or shallow lakes are dispersed over the country. The elevation of the waterway of the Ganges where it is greatest, that is, at the western extremity of the district, is about 260 feet; and as there are no eminences of any importance, probably no point in the district is much more than 350 feet above the sea. Water in some places is to be had by digging to the depth of ten or twelve feet, in others it is not to be obtained at less depth than fifty or sixty feet. From the resources afforded by wells, tanks, hills, and rivers, the means of irrigation are derived; and the practice is universally pursued, it being indispensable for the success of the rubber or crop grown in the cool or dry season, commencing in October and ending in the following March. The climate is in general healthy, except at the close of autumn, when fevers are common, but not remarkably malignant in character. The thermometer ranges in the coldest months from 58° to 71° ; in April, 86° to 96° ; May, 86° to 98° ; June, 85° to 98° ; July, 86° to 96° . The agricultural produce consists principally of maize, rice, indigo, pulse of various sorts, and oil-seeds, wheat,

barley, oats, gram, safflower, opium, cotton, tobacco, and sugar. The sugarcane of this district is greatly esteemed, and fetches a high price. The number of the entire population is returned at 1,596,324; and thus subdivided:—Hindoos, agricultural, 984,331; non-agricultural, 453,754; Mahomedans, and others not Hindoo, agricultural, 35,050; non-agricultural, 123,189. It thus appears that the numbers of the agricultural classes nearly double those of the non-agricultural, and that the Hindoos are more than seven times as many as the followers of all other systems. The number of inhabitants to the square mile is about 484. The chief places stand in the following order as to population:—

Number containing less than 1,000 inhabitants...	5,506
Ditto more than 1,000 and less than 5,000...	268
Ditto " 5,000 " 10,000...	16
Ditto " 10,000 " 50,000...	3
Total.....	5,793

The language spoken by the common people is Hindee of a very corrupt kind. The principal routes are,—1. From Benares through Ghazee-pore to Buxar, crossing this district from west to east; 2. from the cantonment of Goruckpore to that of Ghazee-pore, north to south; 3. from Azimgurh to Ghazee-pore, north-west to south-east; 4. from Chupra through Ghazee-pore town to Jaunpore, east to west; 5. from Ghazee-pore, crossing the Gauges at the eastern extremity of the town, pursuing a direction north to south, and joining at Sawunt the great route from Calcutta to Benares.

The tract comprised within this district probably formed in remote antiquity part of the "territory which in ancient legend is called Maha Kosala," first subject to the sovereigns of Ayodhya, subsequently to those of Kanouj. On the overthrow of the Kanouj dynasty, by the victory gained in 1194, over Jaya Chandra, by Mohammad of Ghor, this tract fell under Patan sway, from which it was wrested by the conquering Baber. On the dissolution of the empire of Delhi, consequent on the invasion of Ahmed Shah Durani in 1761, it formed part of the portion seized by Shujah-ood-dowla, nawaub-vizier of Oude. In 1764, the emperor of Delhi, Shah Allum, granted the territory of Ghazee-pore to the East-India Company, by whom, in the subsequent year, it was relinquished to the nawaub-vizier of Oude. Finally, in 1775, the nawaub-vizier by treaty ceded it, with other districts, to the East-India Company. In the Ayeen Akbery it is styled Sircar Ghazipoor, in soobah of Allahabad. Its military contingent is there stated at 310 cavalry, 16,650 infantry; and its revenue at 335,782 rupees.

GHAZEEPORE, the principal place of the district of the same name, is situate on the left bank of the Ganges, which is crossed by ferry at the north-eastern extremity of the town. Bishop Heber states the river to be here as

wide as the Hooghly at Cossipore. Ghazee-pore is surrounded by luxuriant groves of the banyan (*Ficus indica*) and pipal (*Ficus religiosa*), enlivened by flocks of nightingales, jays, crested sparrows, and many other birds; and by crowds of monkeys, unmolested, and familiar as domestic animals. Ghazee-pore contains a population of 38,573 persons. Viewed from the river, its appearance is very striking; but, on closer inspection, the buildings are found to be mostly in ruins. At the eastern extremity of the town is a palace, which, though somewhat disfigured by time and neglect, still retains abundant marks of former beauty. It is said to have been built by Meer Cossim Ali, the nawaub of Bengal, infamous for the massacre in cold blood of his British prisoners. "It is raised on a high bank, and on a point commanding two great reaches of the river, up and down. From the bank, which is full thirty feet from the water, is raised another basement of brick and masonry, fifteen feet high, in which are some apartments; on this is the building, which is an oblong square (rectangle), with great pavilions at the angles, and in the centre of each side; the whole is an open space, supported by colonnades surrounding it. Within, on the floor of the building, is a channel for water, about four feet wide, which encircles the floor; and at equal spaces there were formerly fountains. In the centre of the building is a space sufficient to contain twenty people. Nearly adjoining to this palace is a building for the purpose of raising water for the fountains, and supplying them by means of pipes, which communicate with each other." Heber characterizes the palace as the best and most airy of any eastern building which he had seen, with magnificent verandas, and capable of being made, at no great expense, one of the handsomest and best-situated houses in India. It is at present a custom-house, the numerous apartments being converted into store-rooms and habitations for the guards and officials. There is a jail here, reported to be large, strong, and airy. The bazars are well constructed, and well supplied, the skill of the tailors especially being noted. A few Europeans keep shops, duly furnished with wares in demand with the population from home. Ghazee-pore is celebrated for its rose-water, and the rose-fields in the vicinity of the town occupy several hundred acres. Some attar, or essential oil, is also made, and is sold, even after some adulteration as is believed, at the rate of 10l. for one rupee-weight. There is a church, represented as a very attractive object, and an hospital. At the south-west end of the town, and separated from it by gardens and scattered cottages, are the bungakows or lodges of the servants of the Company, here employed on civil duties. These consist generally of spacious and handsome apartments, mostly on ground-floors. Beyond these are the military cantonments, the buildings in which are low and unsightly, with sloping roofs of red tiles.

Contiguous is a cenotaph monument to Lord Cornwallis, who died here in 1805, while in progress up the country. It is constructed of excellent stone, but, according to Heber, the style and execution are utterly at variance with good taste. It has been suggested, however, that it might be turned to account by being converted into a belfry, in the event of a church being built in contiguity to it. Two miles inland from the river are the remains of a serai, or lodge for travellers, and nearly adjoining, several tombs, in a handsome style of architecture, and good preservation. Races, held close to the town, are some of the best and most-frequented in India. A stud, which government maintains in the vicinity, supplies the cavalry and horse artillery with many good horses.

From observations on the thermometer, made in the town of Ghazee-pore, in the years 1831 and 1832, May appears to have been the hottest month (mean temperature 97°), and January the coldest (mean temperature 56°). Bishop Heber says, "Ghazee-pore is celebrated throughout India for the wholesomeness of its air." He ascribes this to the advantages of its locality, "the elevated level on which it stands, and the dryness of its soil, which never retains the moisture, and after the heaviest showers, is, in a very few hours, fit to walk on with comfort." Another favourable circumstance he considers to be, "that it has a noble reach of the river to the south-east, from which quarter the hot winds generally blow." Ghazee-pore is distant N.W. from Calcutta, by water 598 miles, by land 431; N.E. from Benares, by water 71, by land 46; E. from Allahabad, by water 210, by land 120. Lat. 25° 32', long. 83° 39'.

GHAZIKA THANNA.—A town in the Rajpoot state of Ulwar, 47 miles N.E. from Jeypoor, and 110 N.W. from Agra. Lat. 27° 27', long. 76° 21'.

GHENDY.—A town in the native state of Nepal, situate three miles from one of the branches of the Gunduck river, and 122 miles N.W. from Khatmandoo. Lat. 28° 21', long. 83° 29'.

GERGONG.—A town in the British district of Seebpoor, Upper Assam, eight miles S.E. of Seebpoor. Lat. 26° 57', long. 94° 46'.

GHERIAH, or VIZIADROOG, in the collectorate of Rutnagherry (Southern Concan), presidency of Bombay, a town and fort at the mouth of the river Kunvee, which flows west from the Ghauts. This place "has an excellent harbour, the anchorage being landlocked and sheltered from all winds. There is no bar at the entrance, the depths being from five to seven fathoms, and from three to four fathoms inside at low water. The rise of the tide is about six or seven feet." Gheriah was fortified, in 1662, by Sevajee, the Mahratta chief. It subsequently passed into the possession of the Angria branch of the Bosla family, from whom the Portuguese and English in 1722, and the Dutch two years later, in vain attempted to

wrest it. In 1755, it was attacked by a British force, consisting of three ships of the line, one ship of fifty guns, and one of forty-four, with some armed vessels belonging to the Bombay marine, amounting altogether to fourteen sail, commanded by Admiral Watson, and having on board 800 Europeans and 1,000 native soldiers, under Colonel Clive. A bombardment was immediately commenced; Angria's fleet was totally destroyed, and, in the course of a few hours, the place surrendered. It was a few months afterwards given up to the Peishwa, under the treaty concluded with the Mahrattas in 1756, and finally acquired by the British government on the overthrow of that potentate in 1818. The name Gheriah is that by which the fort was denominated by the Mussulmans, Viziadroog being the name more familiar to the Mahrattas. The place is distant S. from Bombay 170 miles. Lat. 16° 32', long. 73° 22'.

GHIDDORE, in the British district of Monghyr, lieut.-gov. of Bengal, an ancient fort of great extent. Its walls are from twenty-three to twenty-four feet in thickness, and thirty feet high. According to Buchanan, it was built at a very remote period by a Hindoo raja, but repaired by Sher Shah, the Patan chief, in his war with Humaion, about 1539. Distant S. from Monghyr city 35 miles. Lat. 24° 53', long. 86° 15'.

GHIRDEE.—A town in the British province of Sattara, presidency of Bombay, 89 miles S.E. of Sattara. Lat. 17° 17', long. 75° 21'.

GHIRGAON, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a village on the route up the course of the Ramgunga (Eastern), and subsequently of the Goriee, from Petoragurh to the Oonta Doora Pass, 32 miles N. of Petoragurh. It is situate seven miles west of the right bank of the Goriee, on a ridge proceeding southwards from the main range of the Himalaya, and consists of cottages scattered over the steep declivity and summit of the ridge. Lat. 30° 2', long. 80° 13'.

GHISWA, or GHISSOOA.—The chief town of a pergunnah of the same name, in the British district of Jounpore, lieut.-gov. of the N.W. Provinces, distant 17 miles W. from Jounpore, 39 miles N. from Mirzapoor. Ghiswa has a population of 3,863 persons. Lat. 25° 41', long. 82° 28'.

GHOGHEEA.—A town in the British district of Sarun, lieut.-gov. of Bengal, 93 miles N.W. of Dinapoor. Lat. 26° 54', long. 84° 38'.

GHOGRA.—A large river, and a considerable feeder of the Ganges. Its remotest head-water, as far as has been hitherto ascertained, is the source of the Kalee (Eastern), on the south-western declivity of the range forming the northern boundary of the British district of Kumaon, towards South-western Tibet. This spot, situate in lat. 30° 29', long. 80° 40', was visited by Webb, and is thus described by him: "The Kalee river, two furlongs distant,

its breadth reduced to four or five yards. At two and a quarter miles in a north-west direction, it is covered with snow, and no longer to be traced; neither is the road passable beyond this point at the present season. After the middle of July, when the thaw is perfected, it may be traced as a small stream for about four miles more, in the direction last mentioned, and from thence to its head in the snow, north-west two miles farther. The stream scarcely flows in winter, being derived almost exclusively from the thawing snow." The elevation above the sea, of the source, is probably between 17,000 and 18,000 feet. The river takes a south-easterly direction down the valley of Beas, receiving numerous snow-fed torrents right and left; and at thirty miles from its source, the Kalipani, a considerable stream, flows into it on the left side. Two or three miles below that point, the river turns to the south-west, in which direction it continues to flow twenty-three miles farther, to the confluence of the Dhoul, a large river, which falls into it on the right side, in lat. $29^{\circ} 57'$, long. $80^{\circ} 38'$. The Kalee, which at the confluence appears to be twice the size of the Dhoul, is previously a vast torrent, and in many places a huge cataract tumbling over vast rocks, which in some spots form natural bridges, being wedged together by their pressure against each other, and against the sides of the precipices inclosing the deep gorges down which the stream rushes. In many places the stream for considerable distances is totally hidden under glaciers. Below the confluence the stream is thirty yards wide; but, swelled by numerous mountain-streams received right and left, it soon attains a width of eighty yards. It continues to flow in a south-westerly direction, and twenty-two miles lower down, or seventy-five from its source, it on the right side receives the Gori or Gorungga, a river equal in size to the Kalee. This confluence is in lat. $29^{\circ} 45'$, long. $80^{\circ} 25'$, and is 1,972 feet above the sea; so that the river has a descent, so far, of about 15,500 feet in seventy-five miles, or 207 feet per mile. Below this place twelve miles, and eighty-seven from its source, the river is represented in the surveyor-general's map as receiving on the left side, from Nepal, the Chumulea; and three miles lower down, at the Jhula ghat, a ferry from Kumaon to Nepal, the elevation of the water's edge is 1,789 feet; so that the declivity of the waterway now diminishes to twelve feet per mile. Sixteen miles below this, at Puchesar, lat. $29^{\circ} 27'$, long. $80^{\circ} 18'$, it on the right side receives the Surjoo (Western), the greatest of its feeders. Thenceforward the united stream is no longer called the Kalee, but, variously, the Sarda, the Surjoo, and the Ghogra. At Puchesar it turns a little to the south-east, and ten miles lower down, on the right, receives the Loboghat river, two miles below the confluence of which a large tributary from Nepal flows in on the left. Turning southwards at that point, it, at a distance of eighteen miles beyond, receives

on the right the Ludheea, a considerable stream. By all these accessions it becomes a great river, and at Birimdeo, twelve miles lower down, in lat. $29^{\circ} 6'$, long. $80^{\circ} 13'$, and 148 miles from its source, it enters the plain of Hindoostan, 798 feet above the sea. Webb found it "about 150 yards broad on an average, bed stony, very deep, and moderately rapid." Herbert estimates the discharge of water here during the dry season at 4,800 cubic feet per second; that of the Ganges at 7,000, at Hurdwar. From within a few miles of its source to this place, according to Art. V. of the treaty of Seegowlee, it forms the boundary between the British district of Kumaon and Nepal, holding generally in this part of its course a direction nearly from north-east to south-west. From Birimdeo guardhouse, the river, sweeping first for about twenty-three miles in a southerly direction, forms for that distance the boundary between the British district of Pillebheet and the territory of Oude, and subsequently, flowing south-east for forty-five more, forms the boundary between the British district of Shah-jehanpore and the territory of Oude. In that interval, according to Buchanan, it becomes navigable for craft of considerable burthen from Mundeya, in lat. $28^{\circ} 40'$, long. $80^{\circ} 18'$, but probably those of lighter description can be brought up as far as the vicinity of the egress from the mountains, or about forty miles higher. One hundred and ten miles below Birimdeo, it on the left side receives the Kurnalli, flowing from the mountains of Nepal, whence much timber is sent by the stream. Buchanan regards this river merely as a different channel by which the great river Setiganga, descending from the Himalaya of Nepal, discharges itself. Wilford considers the Setiganga or Swetaganga as identical with the Gunduck. According to the surveyor-general's map, at ninety-four miles below the last-mentioned confluence, and in lat. $27^{\circ} 10'$, long. $81^{\circ} 25'$, the Ghogra receives on the right side a considerable tributary in the united streams of the Chouka and Woel; twenty-two miles farther down, it on the left side receives the Eastern Surjoo, and thenceforward is known in Oude by the names Deoha, Surjoo, or Sarayu, as well as Ghogra. Butler describes it as navigable for the largest class of boats in all seasons, and as having an annual rise and fall of thirty feet. Forty-two miles below the confluence of the Surjoo (Eastern), it touches on the British district of Goruckpore, having passed in its course the city of Oude. Thence pursuing a south-easterly direction, it forms for seventy-five miles the boundary between the British district and the territory of Oude. In this part of its course it is considered by Buchanan larger than the Ganges at Chunar, and is from one to three miles in breadth. Like other great rivers traversing low alluvial tracts, it sends off lateral watercourses, communicating in the rainy season by numerous offsets with the parent flood, and with each other. Of these the principal, called the Tons

(North-eastern), leaves the Ghogra on the right side, ten miles above the city of Oude, and, taking a south-easterly course, falls into the Ganges near Bhullea. The Ghogra enters the British territory in lat. $26^{\circ} 15'$, long. $83^{\circ} 11'$, and, still pursuing a south-easterly direction for sixty-five miles, forms the boundary between the British districts of Goruckpore and Azimgurh. In this part of its course, it on the left side, and in lat. $26^{\circ} 12'$, long. $88^{\circ} 46'$, receives the large river Raptee, and at other points a few streams of less importance. Flowing still south-east, it for eight miles forms the boundary between the districts of Azimgurh and Sarun, and for thirty-six miles the boundary between the districts Ghazee-pore and Sarun, joining the Ganges, on the left side of the latter river, in lat. $25^{\circ} 46'$, long. $84^{\circ} 40'$. The total length of course of the Ghogra may be estimated at 606 miles. According to Buchanan, an eye-witness of the confluence, the Ghogra certainly exceeds the Ganges in breadth and rapidity, and equally in depth. Though throughout the year navigable nearly to the mountains, the Ghogra is turned to little account in this respect. The navigation is indeed in some places rendered hazardous and intricate by the occurrence of shoals of kunkur or calcareous conglomerate; but engineering skill, with adequate means, could easily remove such obstructions, and render free the navigation of the Ghogra, as well as throw open that of its tributaries the Raptee and the Chouka.

GHOLAB SINGH'S DOMINIONS.—See CASHMERE.

GHONGEE.—A river which has its source beyond the northern frontier of British India, in the Nepaul territory, and in about lat. $27^{\circ} 50'$, long. $83^{\circ} 20'$. It holds a course generally southerly, and at Lotan, about seventy miles from its source, and in lat. $27^{\circ} 15'$, long. $83^{\circ} 19'$, Buchanan found it in January to have a deep channel, along which rolled a wide, rapid, fordable stream. It receives many streams right and left, and by lateral channels communicates with numerous pieces of water, stagnant or running; drains or fertilizes, by means of its many branches, a great extent of country, and, running still in a direction generally south-easterly, joins the Dhumela in lat. $27^{\circ} 5'$, long. $83^{\circ} 12'$, and ultimately falls into the Raptee on the left side, in lat. $27^{\circ} 3'$, long. $83^{\circ} 12'$, having altogether flowed about 100 miles.

GHORROUTUH, or GAROTAH, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Muttra to Delhi, by the right bank of the Jumna, and 55 miles S.E. of the latter city. Lat. $27^{\circ} 56'$, long. $77^{\circ} 28'$.

GHORA TRUP.—An inconsiderable village situate on the right bank of the river Indus, 11 miles S.W. of Attock, and 34 S.E. of Peshawur. The river here has a very dangerous rapid, with a sudden fall of a foot and a half, resulting from the lateral contraction

of the high and rocky banks inclosing it, as the depth is no less than 186 feet. Wood describes the passage as very dangerous. "Though the fall was shot with startling rapidity, the boat, when over, seemed spell-bound to the spot, and hung for some time under the watery wall in spite of the most strenuous efforts of her crew. At last she moved, the men cheered, and out she darted into the fair channel." The breadth of the Indus here is only 250 feet, and through this narrow gut the whole of its immense volume of water rushes at the rate of from nine to ten miles an hour, and with the noise of thunder. Ghora Trup is about six miles below Nilab, and for the whole of this distance the river may be described as one immense and irresistible rapid. Lat. $33^{\circ} 46'$, long. $72^{\circ} 9'$.

GHORAWUL, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Sasseram to Rewah, 78 miles S.W. of the former. Lat. $24^{\circ} 46'$, long. $82^{\circ} 51'$.

GHOSEA.—A town in the district of Azimgurh, lieutenant-gov. of the N.W. Provinces, on the route from Ghazee-poor to Goruck-poor, and 47 miles N. of the latter. Distance N.E. from Benares 64 miles. Lat. $26^{\circ} 5'$, long. $83^{\circ} 36'$.

GHOSEEA, or GUSIA, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a village situate four miles north of the left bank of the Ganges, and where the route from the city of Benares to that of Allahabad is intersected by that from Jounpoor to Mirzapoor. Distant W. of the city of Benares 29 miles; from Allahabad, E., 45. Lat. $25^{\circ} 16'$, long. $82^{\circ} 36'$.

GHOSGURH.—A town in the native state of Bhawalpoor, 73 miles S.E. from Bhawalpoor, and 127 miles N.E. from Jessulmeer. Lat. $28^{\circ} 24'$, long. $72^{\circ} 6'$.

GHOSNA, or GUSUNA, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Aligurh to that of Muttra, and five miles N.E. of the latter. Lat. $27^{\circ} 32'$, long. $77^{\circ} 48'$.

GHOSPOOR, in the British district of Ghazee-poor, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Ganges, 10 miles E. of Ghazee-poor cantonment, 590 miles N.W. of Calcutta by water. Lat. $25^{\circ} 37'$, long. $83^{\circ} 47'$.

GHOTAI, in the British district of Hooghly, lieutenant-gov. of Bengal, a town on the river Roopnarain, on the route from Burdwan to Midnapore, 40 miles S. of former, 30 N.E. of latter. Distance from Calcutta, W., 40 miles. Lat. $22^{\circ} 38'$, long. $87^{\circ} 48'$.

GHOTE.—A town in the British province of Nagpoor, late rajah of Berar's dominions, 110 miles S.E. from Nagpoor, and 131 miles N.W. from Jugdulapoor. Lat. $19^{\circ} 50'$, long. $80^{\circ} 8'$.

GHOTIPURTI.—A town in Hyderabad, or dominions of the Nizam, 73 miles N.E. from Hyderabad, and 140 miles N.W. from Masulipatam. Lat. $17^{\circ} 30'$, long. $79^{\circ} 39'$.

GHOUBIPOOR.—See **CHOSIPOOR.**

GHUGA, or **GUGYA**, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Ghazeeipoor to that of Goruckpoor, 22 miles S. of the latter. Lat. $26^{\circ} 20'$, long. $83^{\circ} 30'$.

GHULLA.—A town in the native state of Wusavee, 163 miles N.E. from Bombay, and 32 miles S. from Broach. Lat. $21^{\circ} 15'$, long. $73^{\circ} 5'$.

GHUNDAWUL.—See **CHUNDAWUL.**

GHUNNAPOORA, in Hyderabad, or territory of the Nizam, a town, the principal place of a district of the same name. It is situate on an eminence, is surrounded by a rampart, and contains some good buildings. Distance from the city of Hyderabad, S.W., 60 miles. Lat. $16^{\circ} 34'$, long. 78° .

GHUNSAMPOOR, in the British district of Shajehanpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to Setapoor, and 48 miles S.E. of the former. Lat. $28^{\circ} 6'$, long. $80^{\circ} 6'$.

GHUNTAL.—A village in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces. Lat. $28^{\circ} 14'$, long. $76^{\circ} 53'$.

GHURAUNDA, or **GUROUND**, in the British district of Paneeput, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Delhi to Kurnal, and 12 miles S.E. of the latter. It has a bazar. Lat. $29^{\circ} 32'$, long. $77^{\circ} 2'$.

GHURCHOOROLEE.—A town in the British province of Nagpoor, on the left bank of the Wein Gunga river, and 87 miles S.E. from Nagpoor. Lat. $20^{\circ} 12'$, long. $80^{\circ} 1'$.

GHURIALA, in the Rajpoot state of Bickaneer, a small town on the route from the town of Bickaneer to that of Jessulmere, and 50 miles S.W. of the former. It is situate two or three miles from the frontier towards Jessulmere, and contains a small fort, 180 houses, a few shops, and two wells 210 feet deep, yielding brackish water. On the frontier, close to this place, an interview took place in 1835, between the rulers of Bickaneer and of Jessulmere, and by the arrangement made by a British mission under Lieut. Trevelyan, an amicable adjustment of the common boundary was made. Ghuriala is in lat. $27^{\circ} 44'$, long. $72^{\circ} 36'$.

GHURMUKTEESUR.—See **GURMUKTESUR.**

GHUROUT, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Hansee, by Goorgaon, to Muttra, and 54 miles N.W. of the latter. Lat. $28^{\circ} 5'$, long. $77^{\circ} 16'$.

GHURPARRAH, in the British district of Saugur, lieutenant-gov. of the N.W. Provinces, a town on the route from Saugur to Tehree,

seven miles N.W. of the former. Lat. $23^{\circ} 55'$, long. $78^{\circ} 47'$.

GHUSIPURA, in the British district Bij-nour, lieutenant-gov. of the N.W. Provinces, a village on the route from Moradabad to Hurdwar, and 33 miles S.E. of the latter. Lat. $29^{\circ} 35'$, long. $78^{\circ} 25'$.

GHUSPUR, in Sirhind, a village on the route from Loodiana to Ferozpoor, and 10 miles W. of the former town. It is situate close to the watercourse of Loodiana, an offset of the Sutlej, four miles from the left bank of the main channel, and in an open, level country, scantily cultivated. Distant N.W. from Calcutta 1,112 miles. Lat. $30^{\circ} 57'$, long. $75^{\circ} 44'$.

GHUSUL PASS, in Bussahir, across the range of the Himalaya, forming the southern boundary of Koonawur. It is a quarter of a mile S.E. of the Gunas Pass, and less than half a mile S.E. of that of Nibrung. "These three passes," observes Gerard, "lead from Sungla to Chooara, and although they are so near to each other, they can only be crossed at different times: Neebrung is first open, and it had become practicable only a few days before we arrived (June 21); the other two passes were shut, and had not been attempted this year." Elevation of Ghusul above the sea 15,851 feet. Lat. $31^{\circ} 21'$, long. $78^{\circ} 13'$.

GHUTASUN DEBI PASS, in Sirmoor, lies through a low ridge traversing the Kyarda Doon in a direction from north to south, and running from the Sub-Himalaya to the Sewalik range. Its crest forms the division between the waters of the Bhuta, flowing eastward to the Jumna, and those of the Markanda, flowing to the south-west towards the Sutluj. A route from Dehra to Nahun lies through the pass. Elevation above the sea 2,500 feet. Lat. $30^{\circ} 31'$, long. $77^{\circ} 28'$.

GHYBEEPOOR.—A village in the British district of Huriana, lieutenant-gov. of the N.W. Provinces. Lat. $29^{\circ} 25'$, long. 76° .

GIDDALOOR.—A town in the British district of Cuddapah, presidency of Madras, 158 miles S. W. of Masulipatam. Lat. $15^{\circ} 23'$, long. 79° .

GIHROR, in the British district of Mynpoorie, a small town on the route from Agra to Mynpoorie, and 17 miles W. of the latter. Elevation above the sea 648 feet. Lat. $27^{\circ} 11'$, long. $78^{\circ} 51'$.

GILGIT, in the dominions of Gholab Singh, a small unexplored country on the southern declivity of Hindoo Koosh, lying between Baltistan or Little Tibet on the east, and Chitral on the west. It consists principally of one large valley, down which the stream called the river of Gilgit flows, and falls into the Indus on the right or north-western bank, in lat. $35^{\circ} 47'$, long. $74^{\circ} 31'$. There is also a village of the same name on the right bank of the stream, in lat. 36° , long. $74^{\circ} 10'$.

GINEEKHERA, in the British district of

Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Alnora, and 28 miles N. of the former. Lat. $29^{\circ} 11'$, long. 79° .

GINGEE.—A town in the British district of South Arcot, presidency of Madras, 82 miles S.W. of Madras. Its fortress, though originally of some strength, which was extravagantly magnified in the estimation of native opinion, was taken by the French in 1750, with extraordinary facility, but subsequently yielded to a British force under Captain Smith. Lat. $12^{\circ} 16'$, long. $79^{\circ} 27'$.

GIRAE.—A village in the British district of Hurriana, lieut.-gov. of the N.W. Provinces. Lat. $29^{\circ} 14'$, long. $75^{\circ} 58'$.

GIRAJISIR, in the Rajpoot state of Jessulmere, a small town on the route from the town of Bikaner to that of Jessulmere, and 50 miles S.W. of the former. Close to this place, under the management of the British mission, in 1835, a conference was held between the ruler of Jessulmere and that of Bikaner, and an amicable adjustment made of the common boundary, which had been previously disputed. Girajsir is in lat. $27^{\circ} 42'$, long. $72^{\circ} 36'$.

GIRAREE, in the British district of Sohagpoor, one of the divisions of the Saugor and Nerbudda territory, lieut.-gov. of the N.W. Provinces, a town on the route from Ramgurih to Palamow, 39 miles N.E. of the former. Lat. $22^{\circ} 53'$, long. $81^{\circ} 37'$.

GIRAOB.—A town in the Rajpoot state of Joudpoor, 62 miles S.W. from Jessulmeer, and 157 miles S.W. from Joudpoor. Lat. $26^{\circ} 5'$, long. $70^{\circ} 40'$.

GIRDHEEAE, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Almora, and 26 miles N. of the former. Lat. $29^{\circ} 10'$, long. 79° .

GIRHUR.—A town in the British province of Nagpoor, 37 miles S. from Nagpoor, and 110 miles S.E. from Ellichpoor. Lat. $20^{\circ} 39'$, long. $79^{\circ} 10'$.

GIRNA.—A river rising in lat. $20^{\circ} 37'$, long. $73^{\circ} 45'$, on the eastern slope of the Syadree range of mountains, and flowing through the British district of Candeish, in the presidency of Bombay, first in an easterly direction for 120 miles, and subsequently north for fifty miles, falls into the Taptee on the left side, in lat. $21^{\circ} 9'$, long. $75^{\circ} 17'$.

GIRNAR, in the peninsula of Kattywar, province of Guzerat, or territory of the Guicowar, a remarkable mountain of granite, in the north of the district of Sorath, the summit being, according to native account, about ten miles east of the town of Janagurih. The elevation has been variously conjectured at 3,500 and 2,500 feet above the sea. Distance from Baroda, S.W., 175 miles. Lat. $21^{\circ} 30'$, long. $70^{\circ} 42'$.

GIRREE, a river of the hill state of Kothkaee, and a considerable feeder of the Jumna. It rises in lat. $31^{\circ} 4'$, long. $77^{\circ} 42'$, and at an elevation of 7,400 feet above the sea, on the concave side of a ridge of a horse-shoe shape, which connects Wartu summit with that of the Chur, and which, on the convex or eastern side, throws off numerous feeders to the Pabar. Holding a south-westerly course for about thirty-five miles, during which it receives numerous insignificant feeders, it is joined by the Ushun, in lat. $30^{\circ} 54'$, long. $77^{\circ} 16'$. It thence takes a south-easterly course for fifty miles, and falls into the Jumna in lat. $30^{\circ} 27'$, long. $77^{\circ} 44'$. At the confluence, this river discharges on an average 100 cubic feet of water per second.

GIRWAR.—A town in the Rajpoot state of Seerooe, 57 miles W. from Oodeypoor, and 51 miles N.E. from Deesa. Lat. $24^{\circ} 36'$, long. $72^{\circ} 45'$.

GIRWAREE.—A town in the native state of Gwalior, or territory of Scindia's family, 50 miles S.W. from Gwalior, and 69 miles N.W. from Jhansee. Lat. $25^{\circ} 48'$, long. $77^{\circ} 37'$.

GISREE, in Sind, one of the mouths of the river Indus, receiving a small torrent flowing from the southern part of the mountain-range called, farther north, the Keertar and Lukkee hills. Lat. $24^{\circ} 45'$, long. $67^{\circ} 8'$.

GIVAROL.—A town in Hyderabad, or territory of the Nizam, eight miles from the right bank of the Godavary river, and 51 miles S.E. from Aurungabad. Lat. $19^{\circ} 17'$, long. $75^{\circ} 49'$.

GNASANQUA.—A town in the native state of Bhotan, 76 miles N.W. from Durrung, and 83 miles N.E. from Goalpara. Lat. $27^{\circ} 12'$, long. $91^{\circ} 15'$.

GNA YOKHYOUNG.—A pass over the Youmadoung range of mountains, from the coast of Arracan to the town of Bassein, in Pegu, 27 miles S.W. from the latter. Lat. $16^{\circ} 30'$, long. $94^{\circ} 35'$.

GNETZAZAKAN.—A small village, with an encamping-ground, on the Aeng pass (Arracan), about five miles from Sarowah, and situate on the edge of a precipitous descent. There is a spring at the bottom of the hill.

GNOPARAWA.—A village of Arracan, situate on one of the connecting creeks between the Arracan and Kuladyne rivers. Lat. $20^{\circ} 31'$, long. $93^{\circ} 20'$.

GOA.—The former capital of the Portuguese possessions in India, once an opulent and powerful city, but now fallen into an apparently irremediable and hopeless state of decay. It is situate in lat. $15^{\circ} 30'$, long. 74° . The territory of the same name lies on the western coast of the Indian peninsula, and is bounded on the north by the native state of Sawant Warree; on the east by the British districts of Belgaum and North Canara; and on the south-west by the Indian Ocean. It extends from lat. $14^{\circ} 54'$ to $15^{\circ} 45'$, and from long. $73^{\circ} 45'$ to $74^{\circ} 26'$; is

sixty-two miles in length from north to south, and forty in breadth, and contains an area of 1,066 square miles. The population has been returned at 313,262. Of this number two-thirds are stated to be Christians, of the Roman Catholic persuasion; but these are not under the direct jurisdiction of the Church of Rome, the throne of Portugal claiming the right of appointing its own bishop, and assuming the control and direction of the Catholic Church in its Indian possessions.

The settlement of Goa is divided into districts, which are again subdivided into parishes, the largest of which is Pangaum, containing the present seat of government, and about 10,000 souls. The harbour, which is a fine one, is formed by an arm of the sea, into which flows a small river, and is distant about five miles from the old city of Goa. The appearance of the harbour is of imposing beauty; but on reaching Pangaum, which is the new town and nearest to the harbour, all agreeable impressions vanish, the situation being low and sandy, and the houses wretched. Goa is connected with this place by a stone causeway about 300 yards long: though containing many fine buildings, churches, and monasteries, it is fast becoming a mass of deserted ruins—miserable and squalid indications that there has been here a great city. Its inhabitants are almost entirely ecclesiastics. The military force of the state of Goa consists of 3,300 fighting men, of whom about 400 are Europeans. The revenues are estimated at 719,200 rupees, an amount stated to be annually exceeded by the expenditure. The chief products are rice, but not in sufficient quantity for the consumption of the inhabitants; pepper, coconuts, betelnut, and salt; which latter article is manufactured to a very large extent. The brilliant career of the Portuguese in regard to India, and their achievements in navigation and conquest during the fifteenth and sixteenth centuries, are thus noticed in a modern historical work:—The Portuguese, indeed, have made no durable impression on the country, in which they appeared like a brilliant but destructive meteor; but their unwearied exertions to push the arts and discoveries of navigation beyond the limits within which they had been previously restricted, were too beneficial to the world at large to be passed over without notice. Their discoveries received the first impulse from Henry, the fifth son of John, the first king of Portugal of that name. Under his auspices, several expeditions were fitted out for exploring the coast of Africa and the adjacent seas. The first discovery was not very important, but was sufficient to afford encouragement, and stimulate to perseverance. It consisted of the little island of Puerto Santo, so named from its having been discovered on the festival of All Saints. This was in the year 1418. In the following year the adventurers were further rewarded by the discovery of Madeira. For more than half a century, the voyages of the Portuguese were continued in the same direc-

tion, but in general without more important results than occasional additions to the small stock of geographical knowledge then existing. Little progress seemed to have been made towards the attainment of the grand object of these enterprises, viz. the discovery of a new route to India, till the latter end of the fifteenth century, when Bartholomew Dias eclipsed the fame of all preceding navigators, by his success in reaching the southernmost point of Africa, and in doubling the famous promontory called by himself Cabo Tormontoso, the Cape of Storms, but more happily and permanently designated by his sovereign, Cabo de Bona Esperanza, the Cape of Good Hope. Emanuel, the successor of John of Portugal, proceeded in the steps of his predecessor. An expedition was fitted out in furtherance of the object in view, and committed to the care of Vasco de Gama. It sailed from Lisbon on the 9th of July, 1497, doubled the Cape on the 20th of November following, and finally reached Calicut; thus achieving the triumph so long and so anxiously sought. The admiral was forthwith introduced to the native prince, a Hindoo, called by the Portuguese historians Zamorin, by native authorities, Samiri; and after a short stay, marked by alternations of friendliness and hostility, set sail on his return to Portugal, where he was received with the honours which he had so well earned. The Portuguese returned, and received permission to carry on the operations of commerce. But disputes soon arose, and acts of violence were committed on both sides. The power and influence of the Portuguese, however, continued to extend, and the assistance afforded by them to the neighbouring king of Cochin, in his quarrel with the Zamorin, was rewarded by permission to erect a fort for their protection within the territories of the former prince. Thus was laid the foundation of the Portuguese dominion in the East. An attempt to obtain possession of Calicut failed. Against Goa the invaders were more successful. That city was taken by storm; and although subsequently retaken by a native force, was again captured by the Portuguese, and became the seat of their government, the capital of their Indian dominions, and the see of an archbishop, the primate of the Indies. The Dutch supplanted the Portuguese as traders, and with their commerce the latter nation lost their power and grandeur. Thus did Goa become the melancholy spectacle which it is now, and which it will continue to present until some further step in downward progress shall sink it still lower into wretchedness and degradation, or unless by some happy incident it should become absorbed into the British territories.

GOA, or GWA.—A populous village in the district of Sandoway, in the province of Arracan. It was formerly a town of considerable importance, but has for some time been on the decline. It possesses a harbour for vessels of 200 tons burden, but there is an awkward ob-

struction at its entrance, occasioned by a bar of sand, which renders it highly dangerous. A route from this place to Henzadah, on the Irawaddy river, is called the Goa route. Lat. 17° 33', long. 94° 41'.

GOA ISLAND, or GWA ISLAND.—A small island situate near the mouth of the river in Arracan bearing the same name, and about a mile and a half from the shore. There is a large coral bank three miles to the westward. Lat. 17° 34', long. 93° 38'.

GOA RIVER.—A small river which empties itself in the sea near the village of the same name in Arracan. Its entrance is broad and deep, sufficiently so for ships of 500 tons burden. Its mouth is about lat. 17° 34', long. 93° 40'.

GOALGUNGE, in the territory of Bijawur, in Buendelkund, a town on the route from Banda to Saugor, 93 miles S.W. of the former, 79 N.E. of the latter. It has a bazar, and is supplied with water from wells. Lat. 24° 42', long. 79° 26'.

GOALPARA.—A British district of the Bengal lieut.-gov., bounded on the north by the native state of Bhotan; on the east by the British district of Camroop, in Lower Assam; on the south by the native territory of the Garrow tribes and the British district of Myensing; and on the west by that of Rungpore and the native state of Coosh Behar. It extends from lat. 25° 40' to 26° 31', and from long. 89° 42' to 91° 8'; is 100 miles in length from north-west to south-east, and seventy miles in breadth, and contains an area of 3,506 square miles, with a population of 400,000. The principal crops of the district are cotton, tobacco, and sugar; mustard, also, is said to be extensively grown. Goalpara, or North-eastern Kungpore, in a geographical point of view, belongs to Bengal proper, having constituted an integral part of that province in 1765, when the British government obtained the grant of the Dewanny from the emperor of Delhi; but from the circumstance of its being placed under the superintendence of the commissioner of Assam, and from its general resemblance in respect of climate and other circumstances to that province, it has sometimes been regarded as one of the districts of Assam. Goalpara, the principal town of the district, suffered severely by fire in 1838. Lat. 26° 8', long. 90° 40'.

GOAS.—A town in the British district of Moorsheadabad, lieut.-gov. of Bengal, 114 miles N. of Calcutta. Lat. 24° 13', long. 88° 29'.

GOBEENUGUR.—A town in the British district of Dinajepoor, lieut.-gov. of Bengal, 32 miles N.W. of Dinajepoor. Lat. 25° 59', long. 88° 27'.

GOBINDGUNJ.—A town in the British district of Sarun, lieut.-gov. of Bengal, situate on the left bank of the Gunduck river, 52 miles N.W. of Chupra. Lat. 26° 29', long. 84° 41'.

GOBINDGUNJE, in the British district of

Bogra, lieut.-gov. of Bengal, a town 22 miles N. of the town of Bogra. It is a place of considerable trade, and contains about 1,000 houses, a number which, according to the usually-received average of inmates of dwellings, would assign it a population of about 5,000. Lat. 25° 10', long. 89° 22'.

GOBRIA.—A town of Malwa, in the native state of Bhopal, two miles from the left bank of the Betwa river, and 18 miles S.E. from Bhopal. Lat. 23° 9', long. 77° 37'.

GOCURNUM, in the British district of North Canara, presidency of Madras, a town on the coast of the Arabian Sea, or North Indian Ocean. It is built in a straggling manner among cocconut-palms, but has some commerce, and is held in high repute among the Brahminists, on account of an image of Mahabaliswar or Siva, said to have been brought to this place by Ravana, the giant tyrant of Lanka. Distance from Mangalore, N., 120 miles. Lat. 14° 32', long. 74° 22'.

GODAGARI, in British district of Rajeshaye, lieut.-gov. of Bengal, a small town on the left bank of the Podda, or great eastern branch of the Ganges. It is situate on a ridge of stiff clay, mixed with kunkur or calcareous conglomerate, and derives its importance from the stability of its site, many of the places in this district being subject to inundation by the swollen rivers during the periodical rains of autumn. The Podda is here crossed by means of a ferry on the route from Berhampore to Jumalpoor, 32 miles N.E. of former, 151 S.W. of latter, 150 N. of Calcutta. Lat. 24° 30', long. 88° 20'.

GODAIRY.—A town in the Khoond state of Purlahkemedy, 118 miles N. from Vizagapatam, and 83 miles W. from Gaujam. Lat. 19° 20', long. 83° 51'.

GODAR DEOTA, in the British district of Raeen, near Bussahir, a peak surmounted by a curious temple of a tutelary deity of that locality. It is situate near the left bank of the Pabur. Elevation above the sea 8,605 feet. Lat. 31° 10', long. 77° 50'.

GODAVERY.—A river rising in the Decan, in the British district of Ahmednuggur, on the eastern declivity of the Western Ghats, near Nassick, in lat. 19° 58', long. 73° 30', and 50 miles E. from the shore of the Arabian Sea. Taking a direction south-east for 100 miles, it reaches the western frontier of the territory of the Nizam at Phooltamba, in lat. 19° 48', long. 74° 40', and continuing to hold the same direction for ninety miles further, forms the boundary between the collectorate of Ahmednuggur and the territory of the Nizam, to a point ten miles beyond Mongee, in lat. 19° 23', long. 75° 37', having previously, at Toka, in lat. 19° 37', long. 75° 2', received on the right side the river Paira, flowing from the west. Below Mongee the Godavery enters the Nizam's territory, after which it proceeds in a sinuous, but generally easterly course, for 160 miles, to the

vicinity of Lasona, and receives on the left side, in lat. $19^{\circ} 6'$, long. $77^{\circ} 5'$, the Doodna, a considerable stream flowing from the north-west. From that confluence, taking a course south-east for eighty-five miles, in lat. $18^{\circ} 48'$, long. $77^{\circ} 55'$, it receives on the right side the Manjara, a large river flowing from the south. The course of the Godavery after this confluence is still sinuous, but generally eastward, for about 170 miles, to the town of Veel Saugor, in lat. $18^{\circ} 48'$, long. $79^{\circ} 49'$, near which the Manair river falls into it: thence flowing for about twenty miles to Kulaisur, in lat. $18^{\circ} 52'$, long. $79^{\circ} 55'$, it receives on the left side the Wain Gunga (there termed the Prauheeta), a large river from the north, which discharges the great drainage of the southern declivity of the Vindhya range. Thence the Godavery takes a direction south-east for 170 miles, to Kottoor, in lat. $17^{\circ} 29'$, long. $81^{\circ} 34'$, where it crosses the frontier into the British district of Rajahmundry, finding its way through a deep chasm in the Eastern Ghats, with a very slight declivity. About twenty-five miles below Kottoor, it issues from the mountains at Polaveram, in lat. $17^{\circ} 15'$, long. $81^{\circ} 42'$. In passing through the great barrier of hills, it is stated by the boatmen who navigate the river, that there are no falls throughout the length of its channel, nor indeed any obstructions of importance; and the testimony of these persons would appear to be confirmed by the fact, that large timber-rats from the Nizam's territory are floated down when the river is almost at its lowest, and has not more than two or three feet water at the fords in the low country. From Polaveram the river continues to hold a direction south-east for twenty-three miles, to Pechakalunka, in lat. $16^{\circ} 57'$, long. $81^{\circ} 49'$, where, entering the alluvial country which it has itself formed, it diverges into two great branches, the left flowing to the south-east for fifty-five miles, and falling into the Bay of Bengal at Point Gordeware, in lat. $16^{\circ} 48'$, long. $82^{\circ} 23'$; the right taking a southern direction for fifty-five miles, and falling into the bay at Narsipur, lat. $16^{\circ} 18'$, long. $81^{\circ} 46'$.

The alluvial country traversed by the two streams spreads out on both sides, extending on the west till it meets the delta of the Kistnah, at the Colair Lake, a distance of about forty miles; and on the east side spreading for about thirty-two miles, to the shore of Coringa Bay, where the coast runs for some distance nearly north and south. From the hills the river has a very moderate fall. At Polaveram, where, as already stated, it issues from the mountains, the alluvial land forming its banks is eighty feet above the level of the sea at high water. This land has a very regular slope, commencing with a foot and a half per mile, and gradually diminishing to one foot as it approaches the sea. But as the rise and fall of the river at Polaveram amounts to thirty-eight feet, its summer surface at that place cannot exceed forty-two feet above the sea-level, which gives an average fall of seven inches

and a half per mile. At the head of the delta, the bed of the ford is twenty-two feet above the sea, and the actual distance being about fifty miles, the fall is little more than five inches per mile. Besides the slope of the land towards the sea in the delta, it has another and much more abrupt slope in a direction lateral to the course of the river. The banks of the river on both sides form ridges, rising several feet above the level of the land beyond. This ridge-like character is common to rivers which overflow their banks without restraint, as for instance the Nile, and is well known to arise from the deposit of the heavier matter near to the margin of the river, while the finer and lighter is carried to the limits of the inundation. The delta inclosed between these two great arms is traversed by many smaller branches diverging from them. An offset from the great north-eastern branch flows by the town of Coringa, and admits vessels of ten or twelve feet draught. The branch which disembogues at Narsipur is less suited for the purposes of navigation, admitting only vessels drawing eight or nine feet water. In December, 1846, the sanction of the Court of Directors was given to the construction, at an expense of 47,500*l.*, of a dam or annicut of sufficient height to command the delta of the river, and to supply to the rich alluvial soil of which that tract is composed, the means of constant irrigation. In 1848 the amount had been expended, but the works were far from completion, and a further sum, equal to 13,900*l.*, was assigned for that object. The annicut, 4,200 yards long, has been thrown across the river near the village of Dowlasweram on the east bank, and Wadapillay on the west. For boats and timber that may be required to pass down or up the river when there is neither so much water as to allow of their passing over the annicut, nor so little as to prevent their navigating the river, locks are constructed at the heads of the irrigating channels, by means of which a communication between the upper and lower stream is maintained round the annicut. At the town of Rajahmundry, a few miles above the point where the river divaricates, the channel is of great width, and during the periodical inundations in the close of summer, is filled from bank to bank with a vast and rapid body of water, bearing down great quantities of timber, wrecks of wooden houses, and carcasses of animals; but during the dry season the current shrinks so much, that it might in most places be forded. The construction of the annicut already noticed has, however, changed this, by retaining, for the benefit both of agriculture and navigation, a never-failing supply of water, previously suffered to flow in useless abundance to the sea. The long gorge by which the river finds its way through the Eastern Ghats, though having so slight a declivity as to admit of navigation, allows the channel a space of not more than a quarter of a mile, with banks rising on each side into mountains so steep and high, that travelling along the stream by land

is altogether impracticable, and communication can be maintained by navigation only. Above the gorge, the volume of water in the upper or more level country expands during inundations to a width of from three to six miles on each side of the river, and on the retreating of the stream, the soil remains covered with a black alluvial mud, which imparts to it great fertility. The total length of the Godavery from its source to Narsipur is 898 miles.

The value of this river as an instrument of communication for commercial and military purposes is perhaps not yet fully appreciated. It appears, that from Mahadepoor to Rajahmundry the voyage in boats properly adapted to the purpose has been performed in fifty-two hours; and it is inferred, with great appearance of probability, that steamers similar to those used on the Ganges might ascend the Godavery to a considerable distance, affording great facility for conveying troops and stores to Nagpore and Jubbulpore, as well as a mode of transmitting to the eastern coast the produce of Berar and the Nagpore territories, far more advantageous than the land route by carts and bullocks. The passage from Chanda, on one of the feeders of the Godavery, to Mahadepoor, has been performed in eighteen hours; and it has been suggested, that by means of this great river and its tributaries an uninterrupted water communication might be obtained from the coast into the heart of the Deccan. The experiment of navigating the Godavery by means of steam has been entertained by the government of Madras, and measures for carrying it into effect are under consideration.

GODHUL.—A town in Hyderabad, or territory of the Nizam, 69 miles S. from Hyderabad, and 34 miles S.E. from Ghunnappora. Lat. $16^{\circ} 21'$, long. $78^{\circ} 37'$.

GODRA, in the territory of Guzerat, presidency of Bombay, a town on the route from Neemuch to Baroda, 187 miles S.W. of former, 52 N.E. of latter. It was formerly a very important place, the head of a large district of the kingdom of Guzerat, yielding annually 2,000,000 rupees, and is still a considerable town. Lat. $22^{\circ} 45'$, long. $73^{\circ} 36'$.

GOGAON, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 36 miles W. of the city of Mirzapoor, 757 N.W. of Calcutta by water. Lat. $25^{\circ} 13'$, long. $82^{\circ} 20'$.

GOGAREE.—A river traversing the British district of Tirhoot, lieutenant-gov. of Bengal. In the upper part of its course it is denominated Kamala or Kumla, and, according to Buchanan, rises in Nepal, in the Sub-Himalaya, about lat. $27^{\circ} 20'$, long. $85^{\circ} 40'$. Taking a course south-east for about seventy miles, it passes through the Terai or marshy forest in the southern part of Nepaul, and in lat. $26^{\circ} 35'$, long. $86^{\circ} 15'$, crosses the British frontier into the district Tirhoot, through which it flows in a southerly and south-westerly direction for

about thirty-five miles, and subsequently for fifty miles in a south-easterly direction, when, passing from Tirhoot, it flows for forty miles through the district of Monghyr, and for twenty-five miles through Bhaugulpore; then, forming for fifteen miles the boundary between the districts of Purneah and Bhaugulpore, it falls into the Coosy, on the right side, in lat. $25^{\circ} 24'$, long. $87^{\circ} 16'$; its total length of course being about 235 miles.

GOGGOT RIVER.—An offset of the Atree, quitting it a few miles after its divergence from the Teesta, and in lat. $26^{\circ} 19'$, long. $88^{\circ} 45'$. It maintains a south-east direction, and, flowing through Coosh Behar, Rungpore, and Bograh, falls into the Konaie, a main branch of the Brahmapootra, after a total course of 145 miles, in lat. $24^{\circ} 55'$, long. $89^{\circ} 41'$.

GOGHA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village close to the route by the Kutra Pass from Allahabad to Rewa, and 29 miles S.E. of the former. Lat. $25^{\circ} 13'$, long. $82^{\circ} 13'$.

GOGHPOOR, in Sirhind, a village on the route from Kurnal to Loodianah, and 32 miles N.W. of the former town. It is situated in a level tract, insulated by two branches of the river or torrent Markunda. Distant N.W. from Calcutta 997 miles. Lat. $30^{\circ} 5'$, long. $76^{\circ} 49'$.

GOGI.—A town in Hyderabad, or dominions of the Nizam, 126 miles S.W. from Hyderabad, and 68 miles S.E. from Beejapoor. Lat. $16^{\circ} 43'$, long. $76^{\circ} 49'$.

GOGO, in the British district of Ahmedabad, presidency of Bombay, a town situated in the peninsula of Kattywar, on the western shore of the Gulf of Cambay. About three-quarters of a mile east of the town, is an excellent anchorage, in some measure sheltered by the island of Perim, which lies still further east. The best Lascars in India are natives of this place, and ships touching here may procure water and refreshments, or repair damages. It is a safe place for vessels during the south-west monsoon, or to run for if they part from their anchors in Surat Road, being an entire bed of mud, three-quarters of a mile from the shore, and the water always smooth. The land about Gogo being generally low, is inundated at high spring-tides, which renders it necessary to bring fresh water from a distance of four or five miles: firewood is scarce. The inhabitants of this town have for many years laudably exerted themselves in promoting municipal improvements by means of self-taxation. Distance from Bombay 190 miles. Lat. $21^{\circ} 39'$, long. $72^{\circ} 15'$.

GOGGOLPULLY.—A town in the British district of Nellore, presidency of Madras, 138 miles S.W. of Masulipatam. Lat. $15^{\circ} 17'$, long. $79^{\circ} 21'$.

GOGRA RIVER.—See GHOGRA.

GOGRI, in the British district of Mongheer, lieutenant-gov. of Bengal, a town a mile north-east of the left bank of the Ganges. It is the

principal place of a pergunnah of the same name, but is of small size, the population not exceeding 700 or 800. Distant N.E. from Moongheer 10 miles, N.W. from Bhaugulpore 27 miles. Lat. $25^{\circ} 25'$, long. $86^{\circ} 37'$.

GOH.—A town in the British district of Behar, lieutenant-gov. of Bengal, 30 miles N.W. of Shergotty. Lat. $24^{\circ} 58'$, long. $84^{\circ} 41'$.

GOH, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Dhouli river, and 69 miles N.E. of Almora. Lat. $30^{\circ} 15'$, long. $80^{\circ} 35'$.

GOHADEE, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Almora, and 43 miles N. of the former. Lat. $28^{\circ} 52'$, long. $79^{\circ} 27'$.

GOHALA, in the Rajpoot territory of Shekhawatee, a town on the route from Hansee to Nusserabad, 127 miles S. of former, 116 N.E. of latter. It has a large bazar, and water is abundant. Lat. $27^{\circ} 39'$, long. $75^{\circ} 43'$.

GOHANUH, in the British district of Rohtuk, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name. It is situated on the Rohtuk branch of the Delhi Canal, and near the northern extremity of a great depression of the soil, extending about fifty miles southwards. In the course of the original formation of the canal by Ali Mardan Khan, the water being introduced as far as Gohatuh, could proceed no farther along the channel, in consequence of an error in the level, and, accumulating at this spot, overflowed and swept away the embankment intended to form the waterway. The great body of water which thus escaped, extensively inundated the country, and destroyed Lalpore, a considerable town, the ruins of which may still be seen. The town of Gohanuh is 50 miles N.W. of Delhi, with a population of 6,668. Lat. $29^{\circ} 8'$, long. $76^{\circ} 47'$.

GOHAR TULAO, in Sindh, a tank on the summit of a strong pass on the route from Kurrachee to Sehwan, and 34 miles N.E. of the former place. The importance of the place results merely from its having a supply of water; in other respects it offers nothing to the traveller, the country around having a rugged surface of bare rock, and yielding neither forage nor provisions. Lat. $25^{\circ} 5'$, long. $67^{\circ} 33'$.

GOHILWAR, in the peninsula of Kattywar, province of Guzerat, or territory of the Guicowar, a district named from the Gohil Rajpoots, by whom it is principally peopled. It is bounded on the north by the British district of Ahmedabad; on the east and south-east by the Gulf of Cambay and Ahmedabad; on the west by the districts of Babriwar and Kattywar; on the north-west by the district of Kattywar; and lies between lat. $20^{\circ} 56'$ — $22^{\circ} 3'$, long. $71^{\circ} 14'$ — $72^{\circ} 13'$. It is eighty-

five miles in length from north-east to south-west, and sixty in breadth. The principal towns—Limri, Palitayna, Mowa or Mahowa, and Tulaji or Taloja—are noticed under their respective names in the alphabetical arrangement. The district contains 690 towns and villages, and the aggregate population has been computed to be 247,980. The chief, styled the Rawul Raja, or thakoor of Bhaonagar, has an income estimated some years since at 740,000 rupees annually, and pays a tribute of 81,950 rupees to the British government, and 39,202 to the Guicowar. Bhaonagar, his capital, is within the jurisdiction of the British district of Ahmedabad; and this being regarded as an humiliating circumstance, has sometimes suggested to this affluent chief the removal of his residence to some town within his own.

GOHUD, in the territory of Gwalior, or the possessions of the family of Scindia, a town on the route from Etawa to Gwalior, 55 miles S.W. of the former, and 28 N.E. of the latter. Its fortifications consist of an outer curtain of mud, faced with stone, and inclose an extensive area, between which and the citadel are two other walls. The citadel is lofty, with massive towers, and has spacious and commodious apartments. Around the outermost rampart runs a ditch, which can be filled with water from the small river Besulsee. Tieffenthaler, describing the condition of the place seventy years ago, states it to be then populous and rich. It is now, however, much decayed, though there are a few good modern houses, especially that of the Mahratta governor. The rana of Gohud was originally a Jat zemindar or landholder, who, in the early part of the eighteenth century, rose to considerable power by taking advantage of the opportunities for aggrandizement which were common during that troubled period. In 1779, he secured the alliance of the British government, from whom, in the following year, he received most valuable aid against the Mahrattas. Among other services, the fort of Gwalior, previously reputed impregnable, was captured by a British force under Captain Popham, and placed in the possession of the rana of Gohud. Here, however, in 1784, the rana was besieged by Madhjee Scindia, and obliged to surrender. His capital, Gohud, also passed into the hands of the enemy. In 1803, negotiations were opened by the British government with the rana of Gohud, and a treaty was concluded, by which certain territorial possessions were guaranteed to that chief. The right of the British thus to deal with the territory in question was, however, impugned by Scindia, and, in consequence, a new arrangement was effected. Gohud was transferred to Scindia, and the rana received from the British government the territory of Dholpore, which his descendant still enjoys. Distance S.E. of Agra 60 miles; N.W. of Calcutta, by Etawah, 700. Lat. $26^{\circ} 25'$, long. $78^{\circ} 26'$.

GOHUN, in the British district of Jaloun, lieut.-gov. of the N.W. Provinces, a town on the route from Jaloun to Etawah, 18 miles N.W. of the former. Lat. $26^{\circ} 19'$, long. $79^{\circ} 20'$.

GOHUREE, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route from Allahabad cantonment to that of Pertabgarh, in the Oude territory, seven miles N. of the former, 24 S. of the latter. Lat. $25^{\circ} 34'$, long. $81^{\circ} 51'$.

GOKAK.—A town in the British district of Belgaum, presidency of Bombay, 32 miles N.E. of Belgaum. Lat. $16^{\circ} 10'$, long. $74^{\circ} 53'$.

GOKUL, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a small town on the left or eastern bank of the Jumna. Here is a ferry across that river to Mohunpur, on the right bank, six miles S.E. of Muttra cantonment. It is a place of some note among the Hindoos, from its association with the memory of one of their revered sages. Wilson observes: "Vallabhi Swami, the son of Lakshmana Batt, a Talinga Brahman—This Sanjasi taught early in the sixteenth century; he resided originally at Gokul, a village on the left bank of the Jumna, about three cos to the east of Mathura." It is also regarded by some as the place where Vishnu first appeared on earth, in the form of Krishna. Lat. $27^{\circ} 26'$, long. $77^{\circ} 48'$.

GOKUL, a village of Bussahir, on the frontier of Gurwhal, is situate at the south-eastern extremity of a high and massive ridge rising between the valleys of the rivers Tons and Pabur. Elevation above the sea 7,079 feet. Lat. $31^{\circ} 4'$, long. $77^{\circ} 57'$.

GOL, in the Rajpoot state of Joudpore, a village on the route from Balmeer to the town of Joudpore, and 46 miles E. of the former. It is situate in a low swampy country, on the right bank of the Lonce, at the confluence of the torrent called Leek. The surrounding country is extensively overflowed by the inundations of those streams during the rainy season. Gol contains fifty houses. Lat. $25^{\circ} 52'$, long. $72^{\circ} 9'$.

GOL.—A town in the Rajpoot state of Joudpore, on the right bank of the river Sookree, and 76 miles S.W. from Joudpore. Lat. $25^{\circ} 25'$, long. $72^{\circ} 29'$.

GOLA.—A town in the British district of Ramgur, lieut.-gov. of Bengal, 38 miles N.E. of Hazareebagh. Lat. $23^{\circ} 34'$, long. $85^{\circ} 44'$.

GOLAH GHAT.—A village situate on the right bank of the Dhunserree river, in the British district of Seelipoor, Upper Assam, 72 miles E. from Nowgong. Lat. $26^{\circ} 23'$, long. $93^{\circ} 58'$.

GOLCONDA, in the territory of the Nizam, a fortress and ruined city, seven miles W. of the city of Hyderabad. The fortress, situate on a rocky ridge of granite, is extensive, and contains many inclosures. It is altogether

very strong, and in good repair, but is commanded within breaching distance by the summits of several of the enormous and massive mausolea of the ancient kings of the place. Being the depository of the treasures of the Nizam, and also used as a state prison, it is very strictly guarded, and entrance cannot be obtained by any but official persons in confidential capacity. The ancient mausolea form a vast group, about 600 yards from the fort, in an arid, desert, rocky ground, the stern features of which heighten the impressiveness and grandeur of those astonishing buildings. "Desolate, and abandoned to the ravages of time, they rear their stately domes and pinnacles on the bare plain, no outward defences now existing to ward off the approaches of any assailant, who, through ignorance or wantonness, may hasten the progress of decay. The most ancient of these tombs is not more than 300 years old; but they have been subjected to so many and such barbarous attacks, that nothing save the great solidity of their walls has preserved them from utter ruin. Each mausoleum stands in the centre of a spacious quadrangular platform or terrace, approached on all sides by flights of steps, entering upon a rich arcade, formed of an equal number of pointed arches on each front, and finished with a lofty balustrade, and a minaret at each angle. The body of the building, also quadrangular, rises about thirty feet above the upper terrace of this arcade, and is also surrounded by a balustrade, flanked with minarets of smaller dimensions than those below. From the centre of this portion of the building springs the dome, forming by its magnitude a distinguished feature in a structure equally remarkable for the splendour and symmetry of its proportions. The principal material employed is grey granite, ornamented in some parts with stucco, and in others with the porcelain tiles for which India was at one time so famous. The colours retain their brilliancy to the present day, and the extracts from the Koran, formed of white characters on a polished blue ground, have all the richness of enamel. There is a mosque attached to each of these tombs, which formerly possessed the privileges of sanctuary; and those religious edifices not only supported a considerable number of priests, but also afforded a daily meal to the neighbouring poor." "These tombs were erected at a great expense, some of them being said to have cost 150,000*l*. The enamelled-work with which they are ornamented is reported to have been the production of artists brought from China for the purpose; but there is every reason to believe that these decorations are of native workmanship, similar ornaments being to be found at Beejapore, Agra, Behar, Bengal, and other places." The diamonds of Golconda have obtained great celebrity throughout the world; but they were merely cut and polished here, having been generally found at Parteall, in a detached portion of the Nizam's dominions, near the southern frontier, in lat. $16^{\circ} 40'$, long. $80^{\circ} 28'$, a

place which affords no favourable indication of the wealth to be derived from the avocation of seeking diamonds, as it is in ruins, and the inhabitants ill-clothed, and half-starved in appearance.

Golconda, in former times, was a large and powerful kingdom of the Deccan, which arose on the dissolution of the Bahmani empire, but being subdued by Aurungzebe, was incorporated with the empire under his rule. Even in its extinction, however, it was able to maintain some struggle, and even to venture on an attack upon the imperial army, and to plunder its baggage. The confusion consequent upon the breaking up of the empire almost obliterated the recollection of the once flourishing kingdom of Golconda. The fort is in lat. $17^{\circ} 22'$, long. $78^{\circ} 29'$.

GOLUGONDA.—A town in the British district of Vizagapatam, presidency of Madras, 56 miles W. of Vizagapatam. Lat. $17^{\circ} 40'$, long. $82^{\circ} 31'$.

GOLYGAIRA.—A town in the Mysore, 67 miles N.E. from Seringapatam, and 118 miles W. from Arcot. Lat. $12^{\circ} 51'$, long. $77^{\circ} 38'$.

GOMATI.—A river of the hill state of Kooloo, rising in lat. $32^{\circ} 2'$, long. $77^{\circ} 34'$, and, flowing in a south-westerly direction for fifty-five miles, falls in the Beas river near the village of Hurla, in lat. $31^{\circ} 49'$, long. $77^{\circ} 12'$.

GOMBELA, or **TOCHEE**, a river of Bunnoo, rising in lat. $32^{\circ} 53'$, long. $70^{\circ} 1'$, on the eastern slope of the Suliman range of mountains, and, flowing easterly for about 100 miles, falls into the Indus near the village of Kafer Kote, in lat. $32^{\circ} 30'$, long. $71^{\circ} 20'$.

GOMUL.—A river, or rather a prolonged torrent, rising in the eastern part of Afghanistan, and making its way through the Suliman range of mountains towards the Indus. After a course of about 160 miles, it is lost in the sands to the east of the Suliman range. Its bed for a great distance forms the Goolairee Pass, or great middle route from Hindostan to Khorasan, by Dera Ismael Khan and Ghuznee, the northern being through the Khyber Pass, and the southern through the Bolan. It crosses the Suliman range about lat. $32^{\circ} 6'$.

GOMUL.—A village in the Damian division of the Punjab, on the road from Ghuznee to Dera Ismael Khan, and 40 miles W. of the latter place. It is situate near the eastern entrance of the pass of Gomul, and on the river or torrent of the same name. Lat. $31^{\circ} 58'$, long. $70^{\circ} 8'$.

GONDA, in the British district of Sehagpoor, Saugor and Nerbudda territory, lieutenant-gov. of the N.W. Provinces, a town on the route from Jubbulpoor to Sirgoojah, 100 miles E. of the former. Lat. $23^{\circ} 2'$, long. $81^{\circ} 35'$.

GONDA, in the territory of Oude, a village six miles N.E. of the town of Pertaubghur. According to Butter, the "population is 2,000, all of the military tribe of Hindoos, except

about fifty Mussulman weavers." Lat. $25^{\circ} 59'$, long. $82^{\circ} 3'$.

GONDAGHAON, in the British province of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Bhopal to Aurrungabad, 52 miles S.W. of the former. Lat. $22^{\circ} 31'$, long. $77^{\circ} 10'$.

GONDWANA, or the land of the Gond race, an extensive, imperfectly-defined tract of Southern India. It may, however, be considered as lying between lat. $19^{\circ} 50'$ and $24^{\circ} 30'$, long. $77^{\circ} 38'$ and $87^{\circ} 20'$, and as comprising part of the British districts of Saugor and Nerbudda, and also those of Singrowli, Chota Nagpore, and Sirgooja, with the petty native states on the south-west frontier of Bengal, the Cuttack Mehals, and the greater portion of the northern part of the British province of Nagpore. It is throughout a hilly tract, comprising within its limits the eastern portion of the Vindhya and Mahadeo mountains, and having in some places a considerable elevation, stated, though perhaps without sufficient grounds, to be at Amarkantak 5,000 feet above the sea. Its great elevation in some parts is, however, proved by the fact that rivers take their course northward, as the Betwa and others of less importance, which flow into the Jumna or Ganges; eastward, as the Mahanuddy, to the Bay of Bengal; and westward, as the Nerbudda and Taptee, with their tributaries, to the Indian Ocean. The Goonds, who form the greater portion of the population of Gondwana, have been conjectured to be the aborigines of Hindostan, and speak a language radically different from Sanscrit and its dialects, introduced from regions west of the Indus. Many of the Goonds seen by Blunt in his passage through the country were so devoid of any approach to civilization as to live in a state of entire nudity. They appeared, however, to be an athletic, well-looking race.

The history of a race so rude must obviously be scanty and obscure. The Goond rajah Narsing Rae is represented in 1399 to have been powerful and wealthy; but his greatness was overthrown in 1433, by Hoosung, the Mussulman monarch of Malwa, who, having slain him in battle, reduced Kehrla, his capital. Subsequently, in 1513, the Goond chiefs are found forming a powerful confederacy against the king of Malwa. The western part was subjugated by Akbar, and included within the fiscal organization of his empire; Kehrla, the capital of the principal Goond rajah, being mentioned in the Ayeen Akbery as the chief place of a circar of the soubah of Berar. The eastern part, as remarked by Rennell, "was neither reduced by Akbar, nor even known in particulars to the author of the Ayeen Akbery." The rajah of Deogarh, in this part of Gondwana, was, in the latter part of the seventeenth century, induced to profess Mahomedanism by the influence of Aurungzebe; and in 1744, his sons having embroiled themselves with Ragoghee Bhonsla, were by him deprived

of their possessions, which he incorporated with his own. Ragoghee in the previous year had overrun and partially subjugated Western Gondwana. There is henceforward little to relate until the operations of the British forces in the Nagpore dominions in 1818-19. Appa Sahib Bhonsla, the rajah of Berar, having fled from Nagpore, his capital, took refuge among the Mahadeo Mountains, in Western Gondwana. The British forces tracked him with unwearied perseverance through those intricate wilds, and, successively gaining his fastnesses and lurking-places, obliged him to fly in disguise. Another British armament overrunning Southern Gondwana, stormed the fortified town of Chanda; a third marching into South-eastern Gondwana, stormed the town of Kompta, and took military occupation of the neighbouring country. By the treaty of Nagpore, in 1818, the British government acquired the extensive tract now denominated the Saugor and Nerbudda territory, with other considerable tracts in the northern portion of Gondwana. It may, however, be observed in conclusion, that the name Gondwana must be regarded as obsolete.

GONDWARA.—A town in the British district of Purneah, lieut.-gov. of Bengal. It is the principal place of an extensive pergunnah or subdivision, yet consists of only three straggling market-places, having a population of about 1,500. Lat. 25° 30', long. 87° 22'.

GONKOR.—A river of Nepal, formed by the junction of the Ponna and the Mui. The united stream flows in a direction south for twenty-five miles, through the Terai of Nepal; for 100 miles through the British district of Purneah; and for ten miles, during which it forms the boundary between Purneah and Malda, when it falls into the Ganges, near the town of Deatpore, in lat. 25° 10', long. 87° 51'.

GON MYOO.—A town in the British district of Amherst, one of the Tenasserim provinces, presidency of Bengal, 55 miles S.E. of Moulmein. Lat. 16° 2', long. 98° 23'.

GONSAINTHAN.—A peak of the Himalaya Mountains, between Nepal and Tibet. Altitude 24,700 feet above the sea. Lat. 28° 20', long. 86°.

GOODALOOR.—A town in the British district of Coimbatore, presidency of Madras, 11 miles N. of Coimbatore. Lat. 11° 9', long. 77° 1'.

GOODALUS.—A town in the British district of Malabar, presidency of Madras, 81 miles S.E. of Cannanore. Lat. 11° 30', long. 76° 35'.

GOODAREE.—A town in the British province of Nagpore, late dominions of the rajah of Berar, 186 miles E. from Nagpore, and 81 miles S. from Ruttonpoor. Lat. 21° 8', long. 81° 59'.

GOODHA. in the Rajpoot native state of Jeypoor, a town on the route from Delhi to the city of Jeypoor, 39 miles N.E. of latter. It is situate among isolated rocky hills, rising

abruptly from a barren sandy plain. Lat. 27° 4', long. 76° 31'.

GOODHA.—A town in the Rajpoot state of Boondee, 97 miles S.E. from Ajmeer, and 10 miles S.W. from Boondee. Lat. 25° 20', long. 75° 39'.

GOODHA.—A town in the Rajpoot state of Shekawtee, 66 miles N.W. from Jeypoor, and 19 miles S.E. from Jhoonjhnoo. Lat. 27° 50', long. 75° 40'.

GOODHANUH.—A village in the British district Goorgaon, lieut.-gov. of the N.W. Provinces. Distance S. from Delhi 45 miles. Lat. 28°, long. 77° 25'.

GOODICOTTA, in the British district of Bellary, presidency of Madras, a town, the principal place of a subdivision, distant from Chittel Droog, N.E., 44 miles; from Bellary, S.W., 30. Lat. 14° 50', long. 76° 42'.

GOODDOOR.—A town in Hyderabad, or territory of the Nizam, 30 miles N. from Hyderabad, and 165 miles E. from Sholapoor. Lat. 17° 46', long. 78° 25'.

GOODROWLEE, or CHUK BHAN, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a village on the route from Cawnpore to the town of Futtehpore, and 23 miles N.W. of the latter. Lat. 26° 8', long. 80° 38'.

GOODUH, in the British district of Bhutteeana, lieut.-gov. of the N.W. Provinces, a town on the route from Hansee to Furreed Kot, 72 miles N.W. of the former. Lat. 29° 42', long. 75° 6'.

GOODYWADA.—A town in the British district of Masulipatam, presidency of Madras, 22 miles N.W. of Masulipatam. Lat. 16° 27', long. 81° 3'.

GOOGUL.—A town of Malwa, in the native state of Tonk, on the left bank of the Parbuttee river, and 137 miles N.W. from Saugur. Lat. 24° 43', long. 76° 51'.

GOOJAH, in Sinde, a town on the route from Kurrachee to Tatta, and 10 miles W. of the latter town. Masson describes it as "a small bazaar town, with pools or deposits of rain-water." Situate only 12 miles E. of Garrah, and on a navigable creek debouching into the Indian Ocean close to Kurrachee, it is believed that an inland navigation might easily and advantageously be effected here between that seaport and the main channel of the Indus, the intervening ground being low and level. Lat. 24° 44', long. 67° 48'.

GOOJERANWALA.—See GUJURUWALLA.

GOOJERAT.—See GUJERAT.

GOOJERBAS, in the native territory of Alwur or Machery, under the political management of the Governor-General's agent in Rajpootana, a village on the route from Mhow cantonment to Delhi, and 88 miles S.W. of the latter. There are a few shops. Lat. 27° 50', long. 76° 22'.

GOOJRAT, in the Sinde Sagur Doab division of the Punjab, a town situated on the left bank of the Indus, and 31 miles W. of the town of Mooltan. Lat. $30^{\circ} 8'$, long. 71° .

GOOJUNGGUR.—A town in the British district of Cuttack, lieutenant-gov. of Bengal, 55 miles N.E. of Juggernaut. Lat. $20^{\circ} 14'$, long. $86^{\circ} 36'$.

GOOJUROO, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a fort on a ridge of the Sub-Himalaya, bounding the Patlee Doon to the north-east. It is situated three miles to the right of the route, by the course of the Ramgunga (Western), from Moradabad cantonment to Fort Almorah, 80 miles by route N.E. of the former, 26 W. of the latter. Lat. $29^{\circ} 35'$, long. $79^{\circ} 16'$.

GOOLAH.—A river rising in the southern or outer group of the Himalaya, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces. Lat. $29^{\circ} 28'$, long. $79^{\circ} 44'$. It leaves the mountains close to Khera, in lat. $29^{\circ} 15'$, long. $79^{\circ} 37'$, after a tortuous course, generally in a south-westerly direction, for a distance of thirty miles, in which it receives the drainage of Nyini Tal, Bhim Tal, and some smaller lakes. From its entrance on the plain, it takes a further course a little west of south for eighty miles, to its junction, under the name of Sunka, with the Ramgunga, on the left side of that stream, in lat. $28^{\circ} 17'$, long. $79^{\circ} 27'$.

GOOLAIREE.—An important pass across the Suliman range, from the Derajat into Kabool. It holds its course along the channel of the Gomul river, or (in the words of Burnes) "leads by broken rugged roads, or rather the watercourses of the Gomul, through the wild and mountainous country of the Muzarees." It is a pass of great importance, being the middle route from Hindostan to Afghanistan, as the Khyber is the northern and the Bolan the southern. Immense caravans, consisting principally of Lohani Afghans, every spring traverse it westward from the Indus and the adjacent countries, and, returning in autumn, winter in the Derajat. The Goolairee Pass enters the Suliman Mountains at their eastern base, in lat. $32^{\circ} 6'$, long. 70° . Its course is very winding: for about twenty miles from its entrance into the mountains, the direction of the road is north-west; then for about forty miles it proceeds in a westerly direction, though with numerous deviations at short intervals: it then turns to the north-west, in which direction generally it holds a sinuous course to Ghuznee. It is much infested by freebooters of the Vaziri Afghan tribe, and the caravans have often to fight their way with much loss of life and property.

GOOLAM ALIKA TANDA.—A town in the British district of Hyderabad, province of Scinde, presidency of Bombay, 36 miles S.E. of Hyderabad. Lat. $25^{\circ} 9'$, long. $68^{\circ} 59'$.

GOOLEUM.—A town in the British district

of Bellary, presidency of Madras, on the right bank of the Hugry, and 19 miles N.E. of Bellary. Lat. $15^{\circ} 20'$, long. $77^{\circ} 9'$.

GOOLUREA, in the territory of Oude, a village on the route from Bareilly to Lucknow, 58 miles S.E. of the former, 98 N.W. of the latter. Lat. $23^{\circ} 1'$, long. $80^{\circ} 14'$.

GOOLUREEA, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Meerut, and 22 miles W. of the former. Lat. $28^{\circ} 54'$, long. $78^{\circ} 31'$.

GOOMA.—A town in the British district of Ramgur, lieutenant-gov. of Bengal, 33 miles N. of Hazareebagh. Lat. $24^{\circ} 25'$, long. $85^{\circ} 35'$.

GOOMA.—A river of the peninsula Kattywar, presidency of Bombay, rising in lat. $22^{\circ} 18'$, long. $71^{\circ} 30'$, and, flowing in an easterly direction for seventeen miles through the territories of native chieftains, and fifty-three miles through the British district of Ahmedabad, it turns south-east, and after a further course of eighteen miles, falls into the Gulf of Cambay, in lat. $22^{\circ} 3'$, long. $72^{\circ} 17'$.

GOOMANOOR.—A town in the British district of Bellary, presidency of Madras, 23 miles E. of Bellary. Lat. $15^{\circ} 10'$, long. $77^{\circ} 19'$.

GOOMGAWN.—A town in the native state of Bhotan, 57 miles N.W. from Nowgong, and 48 miles N.N.E. from Gowhaty. Lat. $26^{\circ} 47'$, long. $92^{\circ} 8'$.

GOOMGONG, in the British province of Saugur and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Hoosungabad to Boorhaunpoor, 59 miles S.W. of the former. Lat. $22^{\circ} 5'$, long. $77^{\circ} 9'$.

GOOMLA.—A town in the district of Singboom, on the south-west frontier of Bengal, 106 miles S. from Hazareebagh, and 111 miles W. from Midnapoor. Lat. $22^{\circ} 30'$, long. $85^{\circ} 41'$.

GOOMSOUR, in the British district of Ganjam, presidency of Madras, a town situated 43 miles N.W. of Ganjam. It was formerly the principal place of a feudal possession of the same name, tributary to the British, but the native chief failing in his feudatory obligations, and subsequently rising in rebellion, the zemindary, in 1835, was declared forfeited to the paramount power. A period of disorder ensued, during which atrocious acts of violence and outrage were perpetrated, and at length it was found necessary to appoint a special commission, with a view to the restoration of order and tranquillity. Among the beneficial measures arising from these proceedings, is the suppression in this part of India of human sacrifices. A discovery had been made that this horrible practice prevailed to a considerable extent among the Khoonds, a barbarous people inhabiting the adjacent frontier tracts. Recourse was had in the first instance to conciliatory means, by which it was hoped the civilization of the Khoonds might be effected; but the experiment, though continued through

a series of years, failed in presenting any prospect of ultimate success; and in 1845, a commission for the suppression of Meriah sacrifices was appointed by the Indian government. Disturbances again broke out, attended with great destruction of life and property, and it became necessary to call in military aid. The insurgents were defeated, and peace restored. Several chiefs have been induced to enter into formal engagements to abandon the practice of human sacrifices and female infanticide, on condition of British protection; and these barbarous rites are now considered as effectually suppressed. The town of Goomsoor is in lat. $19^{\circ} 50'$, long. $84^{\circ} 40'$.

GOOMTEE.—A river rising in lat. $23^{\circ} 43'$, long. $92^{\circ} 24'$, in the native territory known as Independent Tipperah, and flowing through that state in a westerly direction for eighty miles, and for sixty miles through British Tipperah, falls into the Megna or Brahmapootra river, in lat. $23^{\circ} 32'$, long. $90^{\circ} 42'$.

GOOMTEE.—A river rising in the British district of Shahjehanpore, lieutenant-gov. of the N.W. Provinces, in an alluvial tract between the rivers Deohah or Gurrâh, and Ghogra. According to the surveyor-general's map, Fuljur Tal, the source of the Goomtee river, is a small lake or morass, in lat. $28^{\circ} 35'$, long. $80^{\circ} 10'$, and nineteen miles east of the town of Pilleebheet. As the elevation of Pilleebheet above the sea is estimated at 517 feet, and the intervening country is remarkably level, the source of the Goomtee may be assumed as about 520 feet above the sea. It takes a course sinuous, but generally to the south-east, for the distance of forty-two miles, when it crosses into the territory of Oude, and according to the surveyor-general's map, it, at the distance of about ninety-four miles from its source, in lat. $27^{\circ} 28'$, long. $80^{\circ} 27'$, receives on the left side a stream flowing from the north, and having a course of about forty miles. From this confluence the Goomtee continues its progress in its previous direction for about eighty miles, to Lucknow, receiving during its course the Suraru. It is at that city navigable, and crossed by a bridge either of brick or of stone. Rennell describes it to be at that place "a small river," and Lumsden, "a paltry and narrow stream;" but according to Von Orlich, a bridge of boats traversing the stream, below that of masonry, is 240 paces in length; and the same traveller states that an iron bridge of three arches, sent out in pieces from England, to traverse the river, was calculated for a width of 200 paces. The river certainly admits of navigation to an important extent; a small steamer belonging to the king of Oude having tested its capability in this respect. Tieffen-thaler observes that the breadth of the river is more remarkable than its depth. Though its value for the purposes of navigation and irrigation is great, the water, according to Butter, is often contaminated by gross impurities, and occasionally becomes the source of disease.

"During the rainy season, the water of the Goomtee is loaded with an immense quantity of yellow clay, and becomes unfit for drinking; and when any great mortality prevails at Lucknow, or along the banks of the river, a putrid scum forms on its surface, occasioned by the number of dead bodies thrown into it." Fish, however, so abound in it, that Butter estimates that a fifth of the population draws its subsistence from that source. It is greatly affected by the periodical rains, rising and falling annually from that cause about fifteen feet; and according to tradition, the variation formerly was much greater. At all times "it is excellently adapted for navigation, its waters never dispersing themselves over a greater breadth than 140 yards, and having generally a depth of four feet in the driest season; while its excessive windings, which lengthen its course seventy-five per cent., answer the purpose of canal locks in diminishing slope and rapidity. It is, however, intersected at every four or six miles by kankar (calcareous conglomerate) ridges of two or three yards in width, which in the dry season sometimes diminish the depth to two feet. These ridges might be removed at no great expense, were the political condition of the country such as to give its natural importance to the trade between central Oude and the British provinces. At present, the few boats which convey supplies to Lucknow return empty. During the rainy season, boats of 1,000 or 1,200 maunds (forty tons) are sometimes seen proceeding to Lucknow." The river continues its course in a south-easterly direction from Lucknow, and about seventy miles below, it, according to the surveyor-general's map, receives on the left side, in lat. $26^{\circ} 42'$, long. $81^{\circ} 40'$, the Kuliani, a stream flowing from the north-west, and having a course of about eighty miles. Below this confluence, the river's right bank is in general high, and consists of solid kankar; the left, low and sandy. At the station of Sultanpore, about 170 miles south-east of Lucknow by the river's course, eighty in direct line, the stream is in the dry season 100 yards wide, with a mean depth of four feet, and a current of two miles an hour. About fifty-two miles lower down, and in the same direction, it passes over the frontier into the British district of Jounpore, and flows through it thirty miles, to the town of the same name, where its breadth is such as to require a bridge of sixteen fine arches. About eighteen miles below that town, on the right side, it receives the river Sai; thirty-three miles lower down, in its course by the district of Benares, on the same side, the Nind; and five miles below the last confluence, and in lat. $25^{\circ} 29'$, long. $83^{\circ} 15'$, it falls into the Ganges on the left side, after a total course of 482 miles. Close above its mouth, it is crossed by means of a bridge of boats from the middle of October to the middle of June, and during the rains by ferry.

GOOMY.—A town in the native mehal of

Puriahkemedi, on the S.W. frontier of Bengal, 54 miles N. from Ganjam, and 66 miles N.W. from Juggernaut. Lat. 20° 10', long. 84° 58'.

GOONAH, in the territory of Gwalior, or possessions of the Scindia family, a British cantonment on the route from Gwalior fort to Mow, 135 miles S.W. of former, 185 N.W. of the latter. The village in which it is situate is large, and in 1843 was inhabited by plunderers, who, notwithstanding the presence of eighty or 100 men of the Gwalior contingent, connived at and aided the freebooters, who swarmed in the neighbourhood during the disturbances consequent on the disputes at the court of Gwalior. Lat. 24° 40', long. 77° 20'.

GOONASS PASS, in Bussahir, across the southern range of the Himalaya, which hold a direction from east-south-east to west-north-west. In approaching this pass from the south side, the road first proceeds upwards by the course of the Rupin, a feeder of the river Tons. The valley through which this river flows is terminated abruptly by a steep ridge, down which the stream pours in a cascade above 100 feet high. The ascent is by a path winding up by this stream, and proceeding over an expanse of snow to the crest of the pass, 16,026 feet above the sea. The inclination of the mountain-slope on the northern side is more gradual, but still very difficult, being, as far as the eye can reach, a dreary expanse of snow. The Goonass Pass lies in lat. 31° 21', long. 78° 13'.

GOOND.—One of the native hill states on the left bank of the Sutlej river, tributary to the chief of Keyonthul. It is bounded on the north by a detached portion of Kooloo and the native hill state of Komharsin, which also bounds it on the east; on the south by those of Bulsun and Mudhan; and on the west by those of Bhugee and Theog. It lies between lat. 31° 4'—31° 15', long. 77° 22'—77° 32'; is twelve miles in length from north to south, and six miles in breadth.

GOONDAGOLE.—A town in the British district of Masulipatam, presidency of Madras, 46 miles N.E. of Masulipatam. Lat. 16° 49', long. 81° 20'.

GOONDAOW, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly, and 26 miles N.E. of the former. Lat. 27° 26', long. 78° 20'.

GOONDAR.—A river in the Madras collectorate of Madura, rising in lat. 9° 57', long. 77° 45', and, flowing in a south-east direction for ninety-five miles, falls into the Gulf of Manaar, in lat. 9° 8', long. 78° 33'.

GOONDEE.—A town in the native state of Cashmeer, or territory of Gholab Singh, on the right bank of a branch of the river Pir Panjal, and 89 miles N.E. from Wazeerabad. Lat. 33° 48', long. 74° 24'.

GOONDLOOR.—A town in the British district of Cuddapah, presidency of Madras, 47

miles S. of Cuddapah. Lat. 13° 50', long. 78° 52'.

GOONDOOMREE.—A town in the British province of Nagpoor, late rajah of Berar's dominions, 68 miles E. from Nagpoor, and 67 miles S.E. from Seuni. Lat. 21° 11', long. 80° 12'.

GOONDRÉE.—A town in the native state of Guzerat, or territory of the Guicowar, three miles from the right bank of the Bunnass river, and 26 miles N.E. from Deesa. Lat. 24° 32', long. 72° 17'.

GOONEER, in the British district of Futtehpoor, lieut.-gov. of the N.W. Provinces, a town which, with that of Kootea, gives name to the pergunnah or subdivision of Kootea-Gooner. Gooneer is situate a mile from the right bank of the Jumna, 16 miles direct N.W. of the town of Futtehpoor. Lat. 26° 5', long. 80° 44'.

GOONJE.—A town in Hyderabad, or territory of the Nizam, on the right bank of the Godavery river, and 200 miles N.W. from Hyderabad. Lat. 19° 15', long. 76° 17'.

GOONJEE.—A town in the British district of Belgaum, presidency of Bombay, 22 miles S. of Belgaum. Lat. 15° 31', long. 74° 34'.

GOONNOUR, in the British district of Budaon, lieut.-gov. of the N.W. Provinces, a town on the route from Boolundshuhur to Budaon, 44 miles N.W. of the latter. Lat. 28° 15', long. 78° 30'.

GOONRA.—A town in the territory of Oude, 64 miles N.E. from Lucknow, and 113 miles N. from Allahabad. Lat. 27° 5', long. 82°.

GOONWARO, in the territory of Saugor and Nerbudda, in the jaghire of Myhir, a village on the route from Mirzapoor to Jubulpoor, 87 miles N.E. of the latter, 158 S.W. of former. Lat. 24° 8', long. 80° 40'.

GOOR.—A river rising in lat. 19° 8', long. 73° 36', on the eastern slope of the Western Ghats, and, flowing in a south-easterly direction for fifty miles through the British district of Poona, and for fifty through that of Ahmednugur, falls into the Beema river, in lat. 18° 30', long. 74° 36'.

GOORAH.—A town in Hyderabad, or territory of the Nizam, on the left bank of the Payne Gurga river, and 179 miles N. from Hyderabad. Lat. 19° 55', long. 78° 11'.

GOORBAN, in Sinde, a village on the route from Sehwan to Kurrachee, and 30 miles N.E. of the latter place. It is situate on the river of the same name, where it receives a small torrent called the Kuttagee. Water consequently may readily be obtained, and even when the rivers have ceased to run, it may be had from pools or wells dug in their beds. The country hereabouts is very rocky and barren, and supplies are scanty. Lat. 25° 4', long. 67° 28'.

GOORBAN.—A river in Sinde, so called from a village of that name on its bank. It rises in the mountainous tract between Kurrachee and Sehwan, about lat. 25° 14', long.

67° 36', and, after a south-westerly course of about sixty miles, falls into the Bay of Kurrachee by the Gisree creek, in lat. 24° 47', long. 67° 6'. Like most of the streams in this part of Sind, it is known by different names in different parts of its course; being called Vuddia near its source, Goorban in the middle, and Mulleeree lower down. Though occasionally flooded, and having then a considerable body of water, it is dry for the greater part of the year; but water, as stated in the preceding article, may at all times be obtained by digging in its bed. It is crossed by the route from Kurrachee to Sehwan, at the village of Goorban.

GOORDAH, in the territory of Bhurtpore, a village on the route from Agra to Ajmeer, 48 miles W. of former, 180 E. of latter. It is situate on the Baun or Ootunghun, "where the bed is about three-quarters of a mile wide, and of heavy sand. From November to July there is little water in the river, and from being so much spread out at the Ghat, it is but seldom unfordable any length of time in the rains." Lat. 27° 3', long. 77° 20'.

GOOREA-TEEKA, or GURIALI, in Gurchal, a pass over a ridge having a south-easterly direction from Surkanda summit to the right bank of the Bhageerettee, as the Ganges is called in the upper part of its course. It was a secondary station in the trigonometrical survey of the Himalayas. Elevation above the sea 7,041 feet. Lat. 30° 19', long. 78° 27'.

GOORETHUH, in the British district of Budaon, lieut.-gov. of the N.W. Provinces, a town on the route from Bareilly to Bolundshuhur, 38 miles E. of the latter. Lat. 28° 24', long. 78° 32'.

GOORGAON, a British district under the lieut.-gov. of the N.W. Provinces, is bounded on the north by the jaghire of Jujhur and the British district of Delhi; on the east by the jaghire of Bullubgurb and the river Jumna, separating it from the British districts of Boolundshuhur and Allygurb; on the south by the British district of Muttra, and by Tijarra and the territory of Bhurtpoor; and on the west by Tijarra and Jujhur. It lies between lat. 27° 40'—28° 30', long. 76° 21'—77° 35', and contains an area of 1,942 square miles. The population amounts to 662,486, of whom 322,183 are returned as Hindoo and agricultural; 138,591 Hindoo non-agricultural; 158,371 as Mahomedans and others not being Hindoos, agricultural; and 43,341 of the like classes non-agricultural. There are four towns containing each between 5,000 and 10,000 inhabitants, and three containing upwards of 10,000. The climate is for the greater part of the year dry and hot. The general elevation of the country is about 820 feet above Calcutta, or 840 above the sea; that of the town of Goorgaon being fixed by a scientific observer at 817. Some parts are, however, considerably higher. Jacquemont

estimates the height of the hills about Soonah at more than 400 feet above the general level of the country; and Fraser mentions some which rise 600 feet above it. The part extending along the right bank of the Jumna is low, level, and in many places rather fertile, though, long after the cause had ceased to operate, it continued to be overrun with jungle, the consequence of the neglect of cultivation, produced by incessant devastation by the Mahrattas and other freebooters, previously to the conquest of the country by the British. Heber, who passed in 1825, observes, it "is still but badly cultivated; but fifteen years ago it was as wild, I am assured, as the Terrai, as full of tigers, and with no human inhabitants but banditti." The progress of improvement, however, seems to have been rapid, as Jacquemont, five years later, describes the country as rather well cultivated; and more recently a further stimulus has been given to agricultural industry by the revenue settlement of the district, under which the rate of the government assessment on the land has been fixed for a series of years, and is not liable to be increased until the year 1872. In the vicinity of the town of Ferozepore, iron-ore is extracted and smelted; but the quantity diminishes annually, in consequence of the great difficulty of obtaining charcoal, the country being very scantily wooded; and the miners and iron-workers earn but a very wretched subsistence. The surface of the country is furrowed by numerous deep chasms and ravines, usually indicating the course of a torrent. The air in many of those ravines is, in autumn, deadly in the extreme, especially where the course of the torrent is marked by the growth of bamboos, which are invariably signs of the insalubrity of the situation. Yet each generally contains a hamlet of goatherds, now of necessity peacefully dwelling under the powerful but mild restraint of British rule, but until lately the pests of the surrounding districts, which they incessantly harassed with their incursions, sweeping away all moveable property, and seizing the inhabitants, with the view of extorting ransom. This rude people are of the Meo or Mewatti race, for the most part nominally professing Mahomedanism, but intermingling it with innumerable Hindoo superstitions. They are very fond of animal food, especially goat's flesh, and also of spirits, but are not addicted to opium. Jacquemont, who considers them the aborigines of this part of India, describes them as very black, with the lower extremities long, the features in general not strongly marked, but the nose approaching to the aquiline form, lips rather prominent, moderately-sized mouths, and oval eyes, the cast of their countenances altogether resembling that of the North-American Indians. Westward of the first rocky tableland, rising from the valley of the Jumna, and inclosed between it and the rocky range still farther west, is a valley or depressed sandy plain, stretching from north to south, about

twenty miles in length and six or eight in breadth. In many places, the ground is so saturated with salt, that in the hot dry weather the surface is covered with an efflorescence of it; the soil is barren, or produces merely a scanty growth of mimosa, and a few other products, common under such circumstances. These tracts are so abruptly defined, that, in the immediate neighbourhood of them the soil will be found free from saline impregnation, and fertile, the wells also yielding fresh water. In many places, by digging to the depth of twenty or thirty feet, fresh water is found; but if the well be sunk ten or twelve feet lower, salt springs are reached, the water of which is less saline than that of the sea, but more bitter, in consequence of containing a large quantity of sulphate of soda and muriate of magnesia. The salt water of each well being raised in a large leathern bucket, worked by rope and pulley, and set in motion by the labour of oxen and buffaloes, is conveyed through a small channel into a reservoir two or three feet deep, and lined with clay or mortar; and the moisture exhaling by the heat of the sun, the crystals are collected for sale. The quantity of salt produced in this way was formerly very considerable, but the article is now almost excluded from the market by the cheaper produce of the Sambhar Lake. In this sandy tract is a jhil or lake, about eight miles in length from north to south, and four in breadth. It is shallow, and its water, though without outlet, is fresh. It is frequented by great numbers of water-fowl, especially pelicans.

The greater part of the district of Goorgaon passed to the British by the treaty of Serjes Anjengum, dated 30th December, 1803, by which Doulut Rao Scindia ceded to the East-India Company his territories "northward of those of the rajahs of Jeypore and Joudpore, and of the ranah of Gohud." Part of it, containing about a hundred and eighty square miles, was held in jaghire by the Kashmirian adventurer Zebal Nisaa, more generally known under the name of the Begum Sumroo, and lapsed to the British on her death in 1836. Another portion of about 200 square miles, termed the jaghire of Ferozepore, from its principal place, was held with Loharoo by Shamsuddin Khan, who took it by descent from Ahmad Buksh Khan, to whom it had been granted by the British government early in the present century, on account of services rendered against the Mahrattas. Shamsuddin Khan having, with the view of defeating some contemplated measures which would affect his jaghire, caused the murder of Mr. William Frazer, the British political agent at Delhi, was hanged at that city, in October, 1836, and his jaghire forfeited. Loharoo was by the British government generously bestowed on the offender's half-brothers; but the territory of Ferozepore was embodied with the district of Goorgaon. The principal places are Goorgaon, Ferozepore, Faridabad, Re-

warree, Pulwul, and Hodul, which will be found noticed under their respective names in the alphabetical arrangement.

GOORGAON, a town giving name to the British district so called, is situated near the western base of a range of hills of quartzose formation. Here was formerly a considerable military cantonment, the buildings erected for which are now occupied by the civil establishment. Goorgaon was formerly one of the principal places in the territory of the Begum Sumroo, which, lapsing on her death in 1836, was embodied with that of the British. The elevation of Goorgaon above the sea is 817 feet. Its mean temperature has been ascertained for various months as follows:—May, 104°; June, 98°; July, 85°; August, 84°; September, 89°; October, 87°; November, 75°; December, 66°; January, 70°; February, 72°; March, 80°. Distant S.W. from Delhi 18 miles; N.W. from Calcutta, by the grand trunk road, 918. Lat. 28° 28', long. 77° 5'.

GOORGAUT.—A town in the native state of Guzerat, or territory of the Guicowar, three miles S. of the Gulf of Cutch, and 100 miles W. from Rajkote. Lat. 22° 12', long. 69° 19'.

GOORHA, in the British district of Banda, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Banda to Rewa, 24 miles S. of the former. It is situated on the right bank of the river Baghin. Lat. 25° 9', long. 80° 33'.

GOORHA.—A town of Baghelcund, in the native state of Rewah, 13 miles from the left bank of the river Sone, and 13 miles E. from Rewah. Lat. 24° 30', long. 81° 35'.

GOORMA, a river in Baghelcund, or territory of Rewah, rises on a plateau in lat. 24° 40', long. 82° 16'. The elevation of its source above the sea exceeds 1,100 feet, since, at the cascade of Bilotri, about ten miles lower down, the elevation of the stream is 1,128 feet. It is at that cascade precipitated 398 feet over the brow of the Kutra ridge, and continuing in a north-westerly direction for a farther distance of fifteen miles, falls, on the right side, and in lat. 24° 56', long. 81° 56', into the Chutenea river, the united stream flowing a few miles further down into the Bilund, a tributary of the Tons.

GOORCO.—A town in the British district of Kurrachee, province of Scinde, presidency of Bombay, 39 miles S.W. of Tatta. Lat. 24° 18', long. 67° 39'.

GOOROURUH, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a town on the route from Rewares to Rohtuk, 38 miles S. of the latter. Lat. 28° 21', long. 76° 42'.

GOORSERAIE, in the British district of Jaloun, lieutenant-gov. of the N.W. Provinces, a town on the route from Humnampoore to Jhansee, 58 miles N.E. of the latter. Lat. 25° 36', long. 79° 14'.

GOORSOUTTEE, or **GURSOUTI**, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Alighurh, and 18 miles N. of the former. Lat. $27^{\circ} 23'$, long. $78^{\circ} 7'$.

GOORSUHAGUNJE, in the British district of Furrukhabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Cawnpore to Futtehgurh, and 19 miles S.E. of the latter. Lat. $27^{\circ} 7'$, long. $79^{\circ} 47'$.

GOORUM CONDA.—A town in the British district of Cuddapah, presidency of Madras, 127 miles N.W. of Madras. Lat. $13^{\circ} 46'$, long. $78^{\circ} 38'$.

GOORWALLUH, in the Daman division of the Punjab, a town situated thirty-five miles from the right bank of the river Indus, and 105 miles N.W. of the town of Mooltan. Lat. $31^{\circ} 11'$, long. $70^{\circ} 12'$.

GOOSUR.—A town in the Rajpoot state of Coochypoor, 74 miles N.W. from Neemuch, and 58 miles S.E. from Seerooce. Lat. $24^{\circ} 42'$, long. $73^{\circ} 47'$.

GOOTHNEE.—A town in the British district of Sarum, lieutenant-gov. of Bengal, 51 miles N.W. of Chupra. Lat. $26^{\circ} 8'$, long. $84^{\circ} 6'$.

GOOTOOHATOO.—A town in the British district of Chota Nagpore, lieutenant-gov. of Bengal, 74 miles S.S.E. of Hazareebagh. Lat. $22^{\circ} 59'$, long. $85^{\circ} 46'$.

GOOTUL.—A town in the British district of Dharwar, presidency of Bombay, 88 miles E.N.E. of Honahwar. Lat. $14^{\circ} 50'$, long. $75^{\circ} 42'$.

GOOTY, in the British district of Bellary, presidency of Madras, a town and military station. The place consists of a cluster of fortified hills, nearly surrounding a lower fort and native town; and outside the chain of fortified summits are the military cantonment and another pettah or town. The summits of the inclosing rocks are connected by a rampart, and the access to the town within is through two openings, secured by fortified gateways, one on the south-east, the other on the south-west; and there are besides two footpaths, affording a communication through Sallypore. In the northern part of the circuit of inclosing rocks is an immense smooth rock, which, "fortified by gradations surmounted through fourteen gateways, overlooks and commands the whole of the other works, and forms a citadel which famine or treachery can alone reduce." On the summit of this fortified hill are several tanks and reservoirs for water, and various buildings, in which are detained some state prisoners. About half-way down the northern side of this huge rock is a projecting shoulder of considerable extent, called Maha Gooty, on which are barracks, formerly occupied by part of a European regiment, but now fast falling to decay. External to this circular inclosure of rocky hills, and on the west side, are the present cantonments, with a

contiguous pettah, consisting of one principal street, well drained, and having tolerably good houses. The cantonment, once of considerable size, is now in ruins, with the exception of two or three houses. There is a good parade-ground, on the north of which are a place of arms, store-rooms, and huts contiguous, for accommodating native infantry. On the west of the cantonment is a large tank, which is devoid of water during part of the year. This place, formerly the head-quarters of a brigade, including one European regiment, is now garrisoned by two companies of native infantry, who enjoy excellent health, the air being in general salubrious. The population of the town is stated to be 4,386, of whom one-fourth are Mussulmans, the rest Brahmmins of various castes, with the exception of about forty Christians. Elevation of highest summit above the plain 989 feet, above the sea 2,171. Distance from cantonment of Bellary 48 miles; from Bangalore, N., 146; Madras, N.W., 215. Lat. $15^{\circ} 7'$, long. $77^{\circ} 42'$.

GOPALGUNJE.—A town in the British district of Jessore, lieutenant-gov. of Bengal, 92 miles E.N.E. of Calcutta. Lat. $23^{\circ} 1'$, long. $89^{\circ} 48'$.

GOPALGURH, in the territory of Bhurtpore, a town on the route from Muttra to Ferozpoor, 40 miles N.W. of the former, 12 S.E. of latter. Lat. $27^{\circ} 40'$, long. $77^{\circ} 7'$.

GOPALPOOR, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village near the southern frontier, towards the district of Agra, and close to the left side of the route from Muttra cantonment to Bhurtpoor, 13 miles N.E. of the latter. Lat. $27^{\circ} 21'$, long. $77^{\circ} 39'$.

GOPALPOOR, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Ganges, 898 miles from Calcutta by the river, 88 miles above Allahabad, and 12 miles N.E. of the town of Futtehpore. Lat. $26^{\circ} 2'$, long. $81^{\circ} 1'$.

GOPALPOOR, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Azimgurh to Goruckpoor cantonment, 28 miles N. of the former, 33 S. of the latter. It has a bazar, and water and supplies are abundant. This town, though within the limits of Goruckpoor district, gives name to a pergunnah in that of Azimgurh. Lat. $26^{\circ} 20'$, long. $83^{\circ} 20'$.

GOPALPOOR, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Ganges, 16 miles N.W. of Mirzapoor, or higher up the stream; 737 N.W. of Calcutta by the river route. Lat. $25^{\circ} 15'$, long. $82^{\circ} 26'$.

GOPAMAU, in the district of Sandi, territory of Oude, a town situate two miles S.W. of the left bank of the Gomtee, in a plain on the northern verge of a thick forest. It was built by Patana, and contained many houses of brick, surrounded by handsome gardens. Even

in the time of Tieffenthaler, a century ago, it was much ruined, having been nearly depopulated in the wars which afflicted the country. Distant 60 miles N.W. of Lucknow. Lat. 27° 32', long. 80° 21'.

GOPALPOOR, in the territory of Gwalior, or possessions of the Scindia family, a town 46 miles S.W. of Gwalior fort. Lat. 25° 43', long. 77° 37'.

GOPEAGUNJ, in the British district of Etawah, lieutenant-gov. of the N.W. Provinces, a small town on the route from the cantonment of Etawah to Lucknow, in Oude, and 11 miles E. of Etawah. Supplies and water are abundant. Lat. 26° 47', long. 79° 16'.

GOPEE, in the British district of Allypore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Mynpooree, and 20 miles S.E. of the former. Lat. 27° 45', long. 78° 23'.

GOPEEBULLPOOR.—A town in the British district of Midnapore, lieutenant-gov. of Bengal, 29 miles S.W. of Midnapore. Lat. 22° 11', long. 87°.

GOPIGANJ, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a town with bazar, on the route from the city of Benares to that of Allahabad, 35 miles W. of the former, 39 S.E. of the latter. Lat. 25° 16', long. 82° 30'.

GOPUT.—A river rising in Korea, a native state on the south-west frontier of Bengal, and about lat. 23° 40', long. 82° 27'. It flows circuitously, but generally in a north-westerly direction, for seventy miles, and in lat. 24° 12', long. 81° 37', takes a north-easterly course for fifty-five miles, to its fall into the Sone, on the right or southern side, at the small town of Burdhee, and in lat. 24° 33', long. 82° 26'.

GORA.—A town in the British district of Tanjah, presidency of Bombay, 50 miles N. by E. of Bombay. Lat. 19° 39', long. 73° 6'.

GORA, in the British district of Mirzapore, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 21 miles N.W. of the city of Mirzapore, or higher up the stream. Lat. 25° 12', long. 82° 24'.

GORABI RIVER, one of the mouths of the Indus, discharging its waters about 50 miles S.W. of Tatta, in lat. 24° 20', long. 67° 21'.

GORAE RIVER.—A considerable water-course diverging from the left bank of the Ganges, in lat. 23° 55', long. 89° 6', and, flowing south-east through the British district of Jessore for forty-five miles, falls into the Koomar river, in lat. 23° 33', long. 89° 32'.

GORAGOT, or **GHORAGHAT**, in the British district of Bograh, lieutenant-gov. of Bengal, a town on the northern boundary, towards the British district of Dinapore. It is situated on the river Kurates, an offset of the Teesta, and hence the name, signifying horse-ferry or horse-pass, as Virat, an ancient Hindoo rajah, kept his horses here. The city, at the time

of its greatness, extended eight or ten miles in length and about two in width, but appears to have been at all times built in a straggling manner. There are the remains of several small mosques, but no traces of any great public building, except the rampart of a fort, inclosing a space on the bank of the river about a mile in length and half a mile in width. Goragot at present has about 3,000 inhabitants, which continue to carry on some trade; but such altogether is the desolation of the place, that tigers prowl nightly in the streets. Distant S.E. from the town of Dinapore 48 miles. Lat. 25° 12', long. 89° 17'.

GORAOW, in the British district of Etawah, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Agra to that of Etawah, and 20 miles N.W. of the latter. Lat. 26° 59', long. 78° 51'.

GORBOONJEE.—A town in the native state of Calahandy, 153 miles N. by W. from Vizagapatam, and 153 miles W. by N. from Ganjam. Lat. 19° 50', long. 82° 51'.

GOREYEE, in the British district of Allypore, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name. Lat. 27° 42', long. 77° 54'.

GORI, or **GORIGUNGA**, one of the most considerable feeders of the great river Ghogra, rises within and near the northern boundary of the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, about twelve miles from the southern base of the Unta Dhura Pass into Hiundes or Chinese Tartary, and in lat. 30° 34', long. 80° 16'. It flows from a vast glacier, apparently of very remote formation. This is thus described by Weller:—"The river comes out in a small but impetuous stream, at the foot of apparently a mass of dirt and gravel, some 300 feet high, shaped like a half-moon. This is in reality a mass of dark-coloured ice (bottle-green colour), extending westward to a great distance, and covered with stones and fragments of rock, which in fact form a succession of small hills. I went along this scene of desolation for a long space, but could not nearly reach the end. Here and there were circular and irregularly-shaped craters (as it were), from 50 to 500 feet diameter at top, and some of them 150 feet deep. The ice was frequently visible on the sides; and at the bottom was a dirty sea-green-coloured pool of water, apparently very deep. Into one of these craters I rolled down numerous large stones from off the edge, and in a few seconds huge masses of ice rose from below, seemingly detached by the agitation of the water." Webb found the stream at its exit from the glacier twenty-eight feet wide and four deep, and from its coldness and great rapidity altogether unfordable. There is no passage up the gorge beyond the glacier. The elevation above the sea, of the point of emergence from the glacier, is, by barometer, 11,543 feet. The great accumulation of snow in the gorge results from the fall of avalanches, which Webb ob-

GOR.

served to cause in a few days an increase in the thickness of the stratum of upwards of forty feet. Hence, notwithstanding the extraordinary rapidity of the stream, resulting from a fall in some parts of its bed of 800 feet per mile, the river is overlaid with deep snow for a considerable distance below its source. It first takes a south-easterly direction for four miles, to its confluence with the Ghunka, which, rising on the southern declivity of the Unta Dhura Pass, has a course nearly south, and in lat. $30^{\circ} 24'$, long. $80^{\circ} 12'$, joins the Gori on the left side of the latter. Though the Ghunka has a greater length of course by about twelve or fourteen miles, and a greater volume of water than the Gori, the latter gives its name to the united stream. For some miles below the confluence, the stream varies in width from twelve to twenty yards, and runs with such extraordinary violence and rapidity, as in many places to resemble a cascade tumbling down a rugged face of rocks; in others it is hid below a continuous mass of ice and snow. In forty miles, the declivity of the waterway is 6,599 feet, or upwards of 160 in a mile. It receives on the right and left many torrents, none very considerable; and continuing its course in a southerly direction, so as totally to run about sixty miles, falls into the Kalee on the right side. Webb, who crossed it at this place by a sangha or spar bridge, found it unfordable, 102 feet wide, very violent and rapid. A short distance lower down, it is, however, fordable in three and a half feet water. The confluence is 1,972 feet above the sea. Lat. $29^{\circ} 45'$, long. $80^{\circ} 25'$.
